Yugoslavia's leaders perceive General Mihailovich, who rescued hundreds of American airmen during World War II, as having collaborated with the German occupiers of Yugoslavia. They would surely interpret the building of a statue to General Mihailovich on Federal land in our Nation's Capital as an unfriendly act calling into question the

sincerity of our policy.

The Department feels strongly that we should not risk the damage to our security interests in Europe and the Mediterranean which construction of a monument to General Mihailovich on Federal land would

Our opposition to construction of a monument is based solely on the fact that it would authorize the use of public lands for the purpose. A monument on private land would not directly involve the foreign policy of our Government.

It appears to me that the State Department is confusing two kinds of action. The first is a deliberate insult to another country for the direct and sole purpose of breaking or straining relationships with that country. No

tude of those whose lives he helped to one is asking that the United States engage in this sort of action against Yugoslavia.

> The second kind of action is one undertaken in good faith and for good reasons by one country, but which may cause hard feelings in another country.

> The erection of the Mihailovich memorial, it seems to me, falls into this second category of action and, as such, must be judged entirely on its merits and its probable outcome. It seems to me highly improbable that Yugoslavian leaders are going to break relationships with the United States or act in such a way that our security interests on NATO's southern flank are threatened simply because American citizens who owe their lives to Mihailovich have erected a statue to him on public land.

> While I admire and recognize the necessity for diplomatic caution and prudence, there are times when caution and prudence can gradually become timidity and, eventually degenerate into moral cowardice. I think the State Department has reached the "timidity" stage of this deplorable process and should be rescued before it descends to the depths of abject capitulation to the perceptions of others.

Mihailovich was fighting Nazis while Tito, at that time slavishly devoted to his Communist master, Josef Stalin, was not even in the field. Perhaps it is impolitic to bring up this fact but if the State Department is going to make policy based on what some Communist leaders of another country happen to 'perceive" about certain incidents in World War II, let us get all perceptions into the debate.

I fully understand the sensitivities involved. I know that the official Yugoslavian Communist Party mythology about the events of the Second World War has a deep emotional basis to it. But at the same time I also recognize that General Mihailovich was perceived-to use the same word-by Americans as a hero during and after World War II. Have we come to a point where we are allowing those of other nations to tell us who we may publicly honor? If we cannot allow American citizens to publicly praise a hero on public ground, what have we come to?

I hope that President Reagan, an admirer of Mihailovich, will reverse current and longstanding policy of the State Department on this issue. More is at stake than the question of Mihailovich's place in history. President Reagan was elected because a majority of Americans wanted new direction and pride in our Nation. We should not allow longstanding bureaucratic 'perceptions" to interfere with the President's admiration for Mihailovich's actions. As to the question of whether Tito or Mihailovich better

served the principles we honor, let history judge.

NASSAU COUNTY DEMON-STRATES THE TRUE SPIRIT OF AMERICA

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

 Mr. LENT. Mr. Speaker, the image of Americans as warm and generous people, who respond with help for people in distress, was greatly enhanced this summer by events in my home county of Nassau, N.Y.

The hand of international friendship was extended to a group of Belgian tourists who were found stranded in our county through no fault of their own. Thirty-two people, half of them handicapped, were located on a university campus, where they had rooms, but no agenda for touring, no meal plan, no guide, and little hope of achieving their dream of a long look at New York and its environs.

They had been sitting in virtual isolation on the university grounds, penned in by the barrier of language communication, the difficulties of mobility for the handicapped, and limited

funds.

Nassau County Executive Francis T. Purcell learned of their plight and quickly initiated a rescue project for them. The last 6 days of their scheduled stay became a whirlwind of excitement and activity as Nassau County agencies, people, and businesses extended all manner of invitations and assistance.

Sabena Belgian World Airlines, the carrier which brought the visitors to New York, offered services and the help of an interpreter, although it had no responsibility in the matter. Sabena officials sponsored and paid for what became a 17-hour tour of Manhattan and included visits to Times Square, the United Nations, the Statue of Liberty, the Empire State

Building, and Chinatown.

The Metropolitan Suburban Bus Authority provided a free tour bus and drivers for the group for all 6 days. Gus and Claire Garnier, who operate the Ambassador Diner in Hempstead, Long Island, fed the entire group four complete breakfasts, a sumptuous dinner, and a lavish bon voyage luncheon without charge. William Miller opened the gates of his Adventureland Amusement Park in Farmingdale, Long Island, to the group for a free afternoon of rides, games, and refreshments.

Mr. and Mrs. Joseph Bindles of Nissequogue, Long Island, made their home available to the tourists for an evening including dinner, refreshments, and the use of their pool. Mrs.

Anne Bindles, a native of Belgium, spoke the Flemish language and answered many questions about life in the United States.

Roosevelt Raceway in Westbury, Long Island, opened its doors to the 32 for an evening at the races and dinner and named a race for the group's sports club in Geraardsbergen, Belgium. The New York Racing Association hosted them at Belmont Park Race Track in Elmont, Long Island, for lunch, racing, and a major concert afterward.

Many individuals came forward with offers to take group members touring, to take them to their homes, and to interpret for them. Other business concerns supplied meals, tours, and visits.

Nassau County agencies responded to the request by County Executive Purcell by providing a day at the beach and sailing on Long Island Sound, a visit to a park/museum which recreates a colonial community, and the opportunity to attend a symphony concert and ballet performance.

County Executive Purcell's staff members stayed with the group during their 6 days and the county executive personally greeted them on several occasions, including his participation in their farewells at Kennedy Airport.

The tourists' gratitude was strongly expressed through interpreters and through the language barrier.

They took a powerful message back to their homeland and expressed it on European television: that Americans—in this case Long Islanders—are the greatest in the world.

I urge my colleagues in the Congress, and all in the executive department of the U.S. Government to take note of this outstanding example of American generosity, hospitality, openhanded, and warmhearted friendship toward visitors from overseas who faced unexpected problems. It shows the true spirit of Americans. I believe that Nassau County lit a candle for international friendship and deserves our congratulations for its contribution to a better world understanding of Americans.

OIL SHALE MINING

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. PARRIS. Mr. Speaker, during the recent recess it was my privilege to inspect the Oil Shale Corp., mining facility near Parachute, Colo. This is the first commercial oil shale project in the United States. This operation and many more like it to come, will surely represent an important part of our Nation's effort to reach energy independence and lessen our dependence on foreign sources for petrochemical products.

The President recently approved, and on August 6, 1981, the Department of Energy executed a Federal loan guarantee financing package, a summary of which follows. It is my hope that my colleagues will find this information useful and informative.

SUMMARY OF THE LOAN GUARANTEE TRANSACTION

The U.S. Department of Energy and Tosco Corporation have executed a federal loan guarantee financing package under which the Government has agreed to guarantee borrowing by Tosco's wholly-owned subsidiary, the Oil Shale Corporation, to pay for 75 percent of Tosco's 40-percent share of construction expenses for the Colony Shale Oil Project.

The project, which will be the first commercial oil shale project in the United States, is located in northwestern Colorado and will produce 48,000 barrels per day of hydrotreated shale oil and associated products when the plant is operating at full capacity. Exxon Corporation, which holds a 60-percent interest in the project, will fund its share of the project costs entirely with private funds. Exxon did not participate in the application and will not share in any way in the guarantee.

Tosco applied to DOE for the loan guarantee in response to a competitive solicitation issued pursuant to the Defense Production Act of 1950 ("DPA"), as amended by the Energy Security Act of 1980. The DPA amendments created a "fast start" interim program for the most advanced and commercially ready synthetic fuel projects capable of making the earliest contribution to the national production goal of 500,000 barrels per day established by the Congress.

Under the terms of the loan guarantee commitment, Tosco will fund 25 percent of its share of the project construction costs (approximately \$440 million) from its own revenues and will borrow the remaining 75 percent (approximately \$1.1 billion) in the private sector. The loans are to be repaid by Tosco's share of anticipated revenues from the Colony Project. Tosco will also pay the federal Government an annual guarantee fee. To secure the guarantee covering 75 percent of its share of project costs, Tosco has pledged 100 percent of its interest in the project to the Government.

In connection with the loan guarantee, Tosco has made a long-term commitment to supply the Department of Defense with 10,000 barrels per day of military specification fuels at prevailing market prices as determined by DOD. The Government can, at its option, reduce or terminate the deliveries of fuel from Tosco. Tosco has also agreed to make its proprietary oil shale technology to be used in the Colony Project available for future oil shale projects.

No price subsidy or direct federal role in project construction or management is involved in the transaction. If commercial production of shale oil is achieved at the Colony Project as anticipated, there will be only minimal Government involvement beyond the guarantee of private sector borrowings and no expense to the Government in achieving a significant breakthrough under the Energy Security Act in the development of the United States' vast oil shale reserves.

The procedures used for the loan guarantee agreement are similar to the financial procedures successfully relied upon by the Government for more than 30 years under

the Maritime Administration for commercial ship financings. The Maritime Adminis-tration program has more than \$7 billion in guaranteed obligations outstanding. As a result of the guarantee fee charged, the program has been completely self-sustaining and, in fact, has made money for the Government over the years.

In a manner similar to the Maritime Program, the loan guarantee for Tosco will involve the issuance of United States Government Guaranteed Synthetic Fuel Financing Bonds. These bonds will be issued by The Oil Shale Corporation and guaranteed by the United States Government. They will be sold to the private investment community through normal investment banking channels. This method has proved highly successful in the shipping area and has attained wide acceptance by the investment community.

The synthetic fuel financing bonds will be repayable over a period of twenty years commencing with the completion of the project. The bonds will be issued from time to time during the course of the project as needed to finance construction.

AMERICAN NATIONAL SECURITY SAYS NO TO AWACS SALE TO SAUDI ARABIA

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. FITHIAN. Mr. Speaker, I rise today to protest the proposed sale of the AWACS and F-15 enhancements to Saudi Arabia because such a sale is not in the national security interests of the United States.

For decades American leaders of both political parties have valiantly sought a permanent and lasting peace in the Middle East. Since the 1967 war, Presidents Johnson, Nixon, Ford, and Carter have tried to find a peaceful solution to Middle East problems. The Camp David accord was an important step in resolving the problems that emerged from the 1967 war and laid the foundation for resolving the remaining disputes. Saudi Arabia, however, has refused to recognize the Camp David accord, and has, in fact, opposed this peace attempt in the strongest possible manner. Rather than encouraging initiatives for the peaceful settlement of disputes, Saudi Arabia has openly criticized Israel and Egypt for their part in the Camp David agreements. At the same time, Saudi Arabia financially supports the terrorist Palestine Liberation Organization with almost \$400 million yearly. By these actions, Saudi Arabia has been an impediment to peace in the Middle East. In my judgment, it does not make any sense to reward Saudi Arabia with billions of dollars of sophisticated military hardware as long as it continues to be a roadblock to peace in the Middle East.

American national security interests in the Middle East are best served by

promoting peace in the Middle East, rather than by further escalating the arms race in the world's most explosive region. During the decade of the 1970's about half of America's foreign arms sales were shipped into the Middle East. The further shipments of billions of dollars of equipment to Saudi Aradia will not enhance peace but could upset the balance of military power in the region. It could also establish a set of circumstances in which Saudi Arabia could become involved in a wider Middle East war. By possessing the AWACS and its sophisticated radar systems, Saudi Arabia could become a target for a preemptive attack by Israel, leading to a wider, general war in the Middle East.

Can we as a nation afford to sell our most important, unique, sophisticated weaponry to a nation whose ruling feudal families are so insecure and unstable? Whose government is so fearful of internal rebellion? And whose leaders constantly fear a revolt by thousands of foreign guest workers? Can we afford to allow our weapons systems to fall into unfriendly hands? Have we not fully learned the hard lessons of arming Iran with our most valuable weapons systems? The Saudi regime is vulnerable to internal rebellion from numerous factions. The history of political assassinations and the attack on the holy mosque in Mecca demonstrate the instability of the present regime. I do not feel secure in granting Saudi Arabia these weapons under the present circumstances, for I do not want these weapons to fall into unfriendly hands.

While I strongly believe that America's national security interest dictate that the AWACS and the F-15 enhancements should not be sold to Saudi Arabia, other observers disagree with this conclusion. They argue that the Saudis need these weapons for self-defense, to protect themselves from hostile neighbors or a Soviet thrust into the Middle East. Furthermore, they argue that the arms sales will win the support of the Saudis for an anti-Soviet consensus foreign policy in the Middle East, while at the same time rewarding them for their moderate and restraining oil pricing policy. In addition, the arms sales would increase American military presence in

the Middle East. Under closer examination, however, these arguments do not stand up. First, these weapons are clearly usable for offensive, not defensive, tactics. Second, the availability of these arms will not prevent or repel an invasion by either the Soviet Union or a powerful neighbor like Iraq. Third, the Saudis are already anti-Soviet and are clearly part of an existing anti-Soviet consensus in the Middle East. We do not have to sell them AWACS to convince them that they face a potential threat from the Soviet Union, especially after Afghanistan. Fourth, the history of Saudi Arabia has been one of strict self-interest, maximizing its oil revenues and buying off possible threats from the PLO and others. Did not the Saudis help form the OPEC cartel and raise its oil from \$2 per barrel in 1970 to \$32 per barrel today? Fifth, if the objective is to safeguard our oil supply from the Persian Gulf and maintain an American presence in the Middle East, why do we not use diplomatic pressure to convince the Saudis to grant us rights to an airbase near the gulf? Sixth, the arms sales would threaten the security of Israel and create an intelligence system whereby information gathered by Saudi AWACS could be forwarded to Israel's more menacing enemies.

We as a nation should not delude ourselves into thinking that our national security would be enhanced by the sale of AWACS and F-15 enhancements to Saudi Arabia. In fact, such a sale would jeopardize not only our own national security, but could well jeopardize the peace process in the Middle East. I respectfully urge that my colleagues in the House and Senate reject the Reagan administration's request for this dangerous arms

sale to Saudi Arabia.

VISIT TO THE UNITED STATES BY VICE PRESIDENT OF NIGE-RIA

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

. Mr. BROOMFIELD. Mr. Speaker. as the ranking Republican member of the House Committee on Foreign Affairs, I would like to comment upon the recent visit of the Vice President of Nigeria to the United States, and the criticism expressed in the House of the manner in which the administration received this distinguished visitor.

The Vice President of Nigeria, Dr. Alex Ekwueme, led a Nigerian delegation to Washington, September 7-9 for bilateral economic talks held at the Vice Presidential level. I am advised that Vice President Bush met privately with Dr. Ekwueme and hosted a reception in his honor at the Department of State. Additionally, the two Vice Presidents participated jointly in the opening and closing ceremonies.

The Vice President's meetings with Vice President Ekwueme afforded the opportunity for wide-ranging discussion of both bilateral and regional questions. On bilateral economic matters, the Vice Presidents signed two important agreements, one in health field and the other in education. Significant progress was made on a number of other issues. Among the matters of regional interest discussed were southern African questions.

I am informed that the President's busy schedule precluded a meeting with Dr. Ekwueme, but that the visit was very productive and the bilateral talks contributed significantly to the continued strengthening of our economic relations with Nigeria. I am also advised that the administrative arrangements for the visit were in accordance with the standard procedures followed on such visits and all customary services and courtesies were extended.

JUDGE ROBERT WESLEY HAYES

HON. KEN HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. HOLLAND. Mr. Speaker, while the Congress stood in recess during the month of August, we in South Carolina lost one of our most distinguished and able stewards of public service in our State, Circuit Court Judge Robert Wesley Hayes.

His many years of splendid public service spanning some three decades is a beacon of example to all of us he left

behind.

Judge Hayes' long career included service in the Armed Forces, on Rock Hill, S.C., City Council, in the South Carolina State Senate and on the circuit court bench as a distinguished jurist.

I join his family, friends and many admirers in mourning the passing of this good and great man. I am glad I knew Judge Hayes and I insert in the Record this article from the Rock Hill Evening Herald of August 11, 1981, about a man who showed what good government is all about:

A Man for the People

Robert Wesley Hayes knew just about everybody in York County, and he spent 28 years of his life trying to help thousands upon thousands of them.

People—and how they were buffeted about or benefited by other people and events around them—were the abiding concern of the Mullins native who worked his way through USC law school, served as Rock Hill city councilman, state senator and

16th Circuit judge.

"I've had the opportunity, on occasion, to be of some help to both lawyers and clients," he said modestly in January when he retired after 14 years on the bench. There are many who say the judge erred there on the side of understatement. He would, on rare occasion, show his indignation at a vicious crime. But, mostly, his observations from the bench were conciliatory, marked by concern for those brought before him and compassion equally for the victim of a crime and for the family of the offender.

It was a necessity, but as he frequently indicated, not a pleasant nor a vindictive duty to send a husband, father or young son off to prison. His own hurt at an unfortunate turn of events that brought someone before him for sentence showed through frequently as he spent more time than do most judges trying to reason with and counsel those guilty of transgressions against society. It was not unusual for him to bolster a young errant's courage and try to instill a determination to do better by reminding a defendant of the good, hard-working par-

When Judge Hayes concluded he must send someone off to prison, people in his courtroom were convinced it had to be the only alternative consistent with his sworn duty—and that it hurt him as much as it did

ents who must now be hurt, too.

the defendant.

He insisted on dignity in his court, but at the same time maintained a relaxed, cooperative atmosphere where getting at the truth and protecting the rights of those involved were paramount to technicality and protocol. He did not like pompous judges and wanted everyone involved in a proceeding to feel that this judge was approachable to listen to their concerns.

His was a genuine concern for people of all walks of life, and tens of thousands of people came to him with problems when he was on the city council and for the 10 years they elected him to the State Senate. His period in the Senate—at a time when the effective county government was the delegation and the senator was its dominant voice—was a period of population and economic growth, including industrial and hospital expansion.

He did not get to enjoy much of his hardearned retirement time but that, perhaps, is how he wanted it. Friends had urged he retire earlier because of his worsening health, but he declined. He was not one

used to idleness.

Robert Wesley Hayes was a symbol of conservative stability and continuity in government, and of dignity and compassion on the bench. His contributions to the people of York County and the State of South Carolina will long stand as a solid testimonial that he walked this way and helped make things better for his fellow man.

TO MARK THE 75TH ANNIVERSA-RY OF LOCAL 437, INTERNA-TIONAL BROTHERHOOD OF ELECTRICAL WORKERS

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mrs. HECKLER. Mr. Speaker, the week following Labor Day is traditionally a time to reflect on the historic contribution that the working men and women of America have made—and are continuing to make—to the building of our Nation. It is especially a time to recognize the strong and vital role of organized labor in our economy, and in our society.

This week, Mr. Speaker, there is an extraordinary reason for the people of Massachusetts to recall the contributions of organized labor. Tomorrow, in the city of Fall River, the members of local 437 of the International Brotherhood of Electrical Workers will mark the 75th anniversary of their local's founding—75 years of progress for

workers, their families, and the city in which they live.

Since 1906, when 12 charter members founded the greater Fall River chapter of the IBEW, local 437 has continually worked to promote the well-being of its members—and all citizens of the surrounding area—through economic and civic development. Always on the forefront of progress, it has demonstrated that the health and prosperity of the working man and woman are the bedrock of a strong and thriving city.

The members of local 437 have not limited themselves to the arena of economic self-interest. The local has been actively involved in community affairs: one of the most dedicated and farsighted former chairmen of the Fall River Housing Authority, George H. Cottell, was business manager of local 437 for 35 years, and his example of activism and civic concern continues to guide the membership.

Today the 130 members of local 437 are a vital force in a proud and growing community. Under the leadership of local 437's executive board-including President Maurice Chouinard, Business Manager Elwood Robert-shaw, Jr., Vice President Paul M. Sousa, Treasurer Arnold Bamford, Jr., and Secretary David H. Tickle-the members continually work to better the lives of all the citizens of their community. As skilled workers in the building trades they contribute, quite literally, to the building of their city and its economy; as involved citizens they are helping to build its future as well, through interest in and support of civic and youth groups throughout the greater Fall River area.

For 75 years, Mr. Speaker, local 437 of the International Brotherhood of Electrical Workers has worked to fulfill the high goals of organized labor, as enunciated by the great Samuel Gompers:

To protect the workers in their inalienable rights to a higher and better life * * * their liberties as men, as workers, and as citizens; to overcome and conquer prejudices and antagonism; to secure to them the right to life, and the opportunity to maintain that life; the right to be full sharers in the abundance which is the result of their brain and brawn, and the civilization of which they are the founders and the mainstay.

These are the goals local 437 has worked to reach, and which it continually labors to preserve. Its members are the guardians of a proud tradition, and they uphold it with honor. I believe the highest congratulations are in order as they celebrate the 75th anniversary of their local's founding; I am proud to salute the leaders and members of Local 437, IBEW, and I ask all my colleagues in this House to join with me in paying tribute to one of the most distinguished local labor organizations in the Commonwealth of Massachusetts.

CAUTION VOICED ON INTERIM LICENSING OF NUCLEAR REAC-TORS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

. Mr. MARKEY. Mr. Speaker, the nuclear industry and its supporters in the Congress are pushing for congressional authority to place new nuclear powerplants online before all licensing requirements, specified by Federal law, have been completed. Legislation granting the NRC permission to issue such "interim licenses" is expected to come to the floor of the House in the next few weeks.

This effort is a bold attempt to circumvent safety procedures in favor of economics. Those of us who follow the activities of the nuclear industry with vigilance know that interim licensing will not counterbalance investor dissatisfaction with and citizen skepticism about atomic energy. But in communities across the United States, from New England to southern California, interim licensing poses an ominous threat to the ability of citizens to hold utilities accountable in their pursuit of this costly, dangerous, and increasingly unnecessary technology.

As Congress turns to consideration of legislation granting the NRC fast track licensing powers, I commend to the attention of all Members an article, written by Ralph Nader and Harvey Rosenfield and published in the Boston Globe, August 11, on the perils of interim licensing.

The article follows:

Now There's a New Danger at Nuclear POWERPLANTS

Once upon a time, we were told that an accident at a nuclear power plant could never happen. Now, it appears, we're being asked to believe one never did. While thousands of gallons of radioactive water in the Three Mile Island reactor vessel stand in mute testimony to the dangerous and little understood technology of nuclear power. Congress is considering proposals to allow reactors that have not yet completed public hearings and other statutory licensing requirements to begin operation under "interim" licenses

Ironically, it is not the pro-nuclear Senate but the House Energy and Commerce Committee that has produced the most alarming legislation. Under its approach, the Nuclear Regulatory Commission would be allowed to issue an interim license without any evidence that the plant needed one because of regulatory delay. Rather than requiring a careful phase-in from low to full power, the Energy Committee would allow the NRC to grant an interim license for immediate fullpower operation.

The legislation provides no expiration date for an interim permit, a reactor could operate in a temporary mode for years with no incentive to complete the legal require-ments mandated by the Atomic Energy Act.

Interim licensing is a solution for an illusory problem concocted by desperate busi-

nessmen. The nuclear industry, faced with dozens of cancellations and no new orders in more than two years, is in dire straits. Its Washington lobbyists have been badly stung by lack of cooperation from the Reagan Administration on a federally subsidized wastedisposal program, termination of the Barnwell, S.C., reprocessing facility and luke-warm assistance on funding for the Clinch River breeder reactor. They have thus mounted a campaign to blame NRC licensing proceedings for investor and utility skepticism about nuclear power.

The industry asserts that long delays in the licensing of a handful of reactors will cost consumers millions of dollars in carrying costs and extra electricity charges. But of the nine plants that would be affected by the legislation, eight are not yet completed: the "delay" claimed by the industry is only what they speculate might occur once the facilities are finished.

The existence of delays aside, the broader and more important issue is whether the NRC should put nuclear plant licensing back on the fast track it was on before Three Mile Island. The major conclusion of the Kemeny Commission, which examined that near-catastrophe, argues to the contrary. The commission wrote that "the NRC is so preoccupied with the licensing of plants that it has not given primary consideration to overall safety issues." The NRC has properly diverted more resources to assessments of safety at existing plants in the wake of Three Mile Island. Apparently the nuclear industry has concluded that a little more concern about safety is too much.

Both the NRC and safer-energy activists agree that the licensing process does not always function perfectly. In a series of rulings this spring, the NRC acted to eliminate redundancies in its review process, urged licensing boards to consolidate proceedings and allocated more staff to licensing. Most of the NRC's directives will allow the process to work more efficiently-but without sacrificing the necessary emphasis upon safety.

Citizens across the nation have found the regulatory process to be an important ally in challenging the hasty construction of nuclear reactors in their neighborhoods. Public hearings and intervention in NRC proceedings allow residents and taxpayers to raise critical safety and economic questions about proposed plans.

In many communities such as San Luis Obispo, where an almost-completed plant sits close to a recently discovered earthquake fault, the townspeople have been relying on the hearings process to get the views of their geologists, physicists and attorneys across to the NRC commissioners in distant Washington. They hope to convince them not to license the Diablo Canyon reactor facility.

The new interim licensing authority will allow such plants to go on line before the regulatory process has been completed-effectively negating the right of citizen participation in government decision-making, and aggravating the already tense relationship between the people and their leaders in Washington.

A TRIBUTE TO SCOTT PLOTKIN

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

• Mr. MATSUI. Mr. Speaker, much has been said in recent years about the decline of political parties in our country and the negative effects this trend has had on the quality of government, particularly in the legislative branch. I have joined those who lament the fracturing effect that a myriad of special interest groups have had on our system, displacing the role of our great political parties as guiding forces that traditionally helped shape our national agenda and establish policy around the crucial issues facing America.

For that reason, I have found it particularly gratifying to work with local political leaders at the grassroots level who have tried to build and strengthen our parties, men and women who have recognized that good politics is good government.

In my home county of Sacramento, Calif., we are about to lose the party leadership of one such person, Mr. Scott P. Plotkin, who for almost 3 years has served as chairman of the Sacramento County Democratic Central Committee.

Despite his youthful age of 28, Scott Plotkin has displayed impressive wisdom with regard to the role the political parties should play in our system. In his letter of resignation sent recently to central committee members, Scott Plotkin pointed out the need "to move back to a strong party system-one that enhances the value of the party to assimilate and accommodate divergent points of view and shape them into a consensus that can be used to govern."

Those of us in Sacramento County who are members of the Democratic Party are thankful for the service Scott has rendered in strengthening our party at the grassroots.

Because of professional opportunities, Scott has found it necessary to resign as county chairman, but he will continue to work as a member of our central committee.

I would like to take this opportunity to thank him for his many contributions and to wish him the very best as he begins his new position as assistant director for governmental affairs for the California State University and Colleges. He will be promoting the interests of California higher education in our State legislature.

We need more Scott Plotkins if we are to rescue our political system from some very serious problems it is facing. I am pleased to make my colleagues aware of the efforts of this fine young political leader in California.

AMERICANS DESERVE ACCOUNT-ABILITY ON NEW ZEALAND BUTTER SALE

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

• Mr. ROTH. Mr. Speaker, I am pleased to note that the Agriculture Committee Subcommittee on Livestock, Dairy and Poultry is holding hearings today on the sale of 220 million pounds of butter to New Zealand.

Export sales of Commodity Credit Corporation-held dairy products have been rightly encouraged by the Congress. These sales act to reduce inventories and develop funds to offset the cost of price support programs. However, we have a clear responsibility to the American people to insure that they get the best terms possible on these sales. That is just "sound business practice."

Clearly, there is ample room to debate the wisdom of the recent butter sales to New Zealand in this

regard.

The issue I find most puzzling, is the lack of specification in the contract that this butter or its by-products not be sold to Russia. This ambiguity, coming on the heels of a rejected offer from the Soviet Union to purchase the butter at a price higher than offered by New Zealand, raises doubts as to the soundness of the contract.

Should foreign policy dictate that we not sell products to a particular nation, then our contract sales should

reflect this policy.

My own view is that we should have sold this butter to a private concern or another country which would have paid a higher price for this commodi-

As it stands now, New Zealand is free to sell some of this butter or butter-products to the Soviet Union, contrary to our policy dictates, and no

doubt at a higher price.

Consistancy was abandoned in this sale, and the American people are the losers. I applaud the subcommittee's determination to get to the bottom of this matter, and provide full accountability to the American people for the terms of this contract.

THE NEUTRON BOMB: TOYING WITH MADNESS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

. Mr. EDWARDS of California. Mr. Speaker, an excellent editorial appeared in the San Jose Mercury during the recent district work period, and I wanted to share it with my colleagues.

The editorial examines the President's decision to proceed with production of the neutron bomb. Noting the irony of the fact that the President's decision was announced on the anniversary of the U.S. bombing of Hiroshima, this thought-provoking essay points out that once again it is the United States which is escalating this seemingly inexorable rush toward doomsday.

I believe my colleagues will find the

article of interest.

[From the San Jose Mercury, Aug. 12, 1981] THE NEUTRON BOMB: TOYING WITH MADNESS

"A single B-29 bomber flew over Hiroshima, Japan, on Aug. 6, 1945, at 8:15 in the morning, local time. . . . An atomic bomb carried from Tinian Island in the Marianas

was dropped.

The combined heat and blast pulverized everything in the explosion's immediate vicinity, generated spontaneous fires some distance away, produced winds that fanned the flames in Hiroshima's crater-like configuration so powerfully that they burned almost 4.4 square miles completely out, and killed between 70,000 and 80,000 people (flash burns killed 20-30 percent, radiation 15-20 percent), besides injuring more than 70,000 others.

"A second bomb, dropped on Nagasaki, on Aug. 9, killed between 35,000 and 40,000 people, injured a like number, and devastated 1.8 square miles."-Encyclopaedia Britan-

The coincidence of dates is uncanny.

On Aug. 6, 1981, 36 years to the day after Hiroshima, the administration of President Ronald Reagan decided to notify United States allies that neutron bombs are now being produced by this nation. And on Aug. 9, the anniversary of Nagasaki, newspapers broke that news to the American people.

In fact, the neutron bomb went into production weeks ago, Defense Secretary Caspar Weinberger said Monday. That revelation and others came out of an extraordinary series of seven separate television interviews Weinberger conducted in an effort to sell acceptance of the administration's decision to assemble and stockpile the bomb.

The administration's almost frantic efforts to sell the notion that the neutron bomb is necessary should be a tip-off-a warning that something very dangerous,

even deadly, is going on here.

It's not just that the very concept of the neutron bomb-a weapon designed to kill people but minimize property damage— seems inhumane. There is a terrible irony in the very idea of a bomb that would kill humans and other living things slowly and painfully with enhanced radiation while leaving buildings and other structures undamaged by its blast effect. But that's not the principal problem.

It's not just that the administration's rationalization that the bomb is needed to counter the Soviet Union's 45,000 tanks in central Europe may be specious. Indeed it may be; in the current issue of Scientific American magazine, Paul Walker, a member of the Union of Concerned Scientists, argues that the danger of a "blitzkrieg" by Russian armored divisions may be overrated. He may be right, and the neutron bomb may also be less than cost-effective, as Walker maintained in a telephone interview with UPI Monday. But that's not the principal problem either.

It's not just that Weinberger seemed selfcontradictory when he argued that it wasn't necessary to consult our NATO allies in advance, because assembling the bomb was an internal U.S. matter-and then went on to say that it could be deployed in Europe in "only a few hours."

It's not just that Weinberger was disingenious in implying that Congress, and not the Reagan administration, really made the decision to assemble the bomb. The fact is, the fiscal 1981 defense authorization bill directed the president to produce and stockpile all of the separate components of the neutron bomb, but not to assemble them as useable.

It is the Reagan administration, not Congress, which has decided to do what the Carter administration proposed and then vascillated away from-i.e. to assemble the bomb as a usable weapon.

Weinberger tried hard to blur that distinction, by stressing that Carter's inept fumbling "gave the impression of a weak, irresolute America." He's right about that. It did. The Reagan team's projection of a bellicose America isn't necessarily any better, but even that is not the chief reason that Americans should be alarmed.

The real cause for concern is that once again the world has moved closer to nuclear war-and once again it is the West, not the Soviet Union, which has taken another step toward total annihilation of life on Earth.

It was we who began, and it has been at nearly every crucial juncture we who have escalated this seemingly inexorable rush toward doomsday. We were first to develop and test the atom bomb. We were the first to use it, at Hiroshima and Nagasaki. We took the lead in raising the level of destructiveness by developing the hydrogen bomb. We introduced the multiple warhead. And now-although both France and the Soviet Union have developed and tested the neutron bomb-once again it is the United States which has become the first nation actually to produce and stockpile this weapon

The awful implication of the neutron bomb is not that it merely adds another layer to a worldwide nuclear arsenal that already exceeds the potential for more than a million Hiroshimas. That would be bad enough, but this latest step is pregnant with an even more bizarre and terrible notionthe concept of that the United States should be prepared to fight-and could expect to win-a limited nuclear war.

The madness of such reasoning did not originate with the Reagan White House. The concept of limited nuclear war has been kicking around Washington ever since the Nixon administration, and the Carter administration brought it out in the open with Carter's own on-again, off-again flirting with the neutron bomb, and with his now infamous Presidential Directive 59, which explicitly abandoned the one absolute commitment that has kept us all alive until now. And that is the knowledge that our very existence depends on nuclear weapons literally serving to deter war, not to wage it—and that approval of new weapons systems must only occur within that context.

Of course a limited nuclear war would be preferable to blowing up the world-if it were possible to have one without the other. But the fallacy is the assumption that once any nuclear weapon is used, it will be possible to limit the escalation of destruction. Former Defense Secretary Robert McNamara put his finger on the flaw in such rea-

soning years ago.

You can conduct a limited nuclear strike, McNamara said, and you can be perfectly clear in your own mind that that's all you expect in response. But you have absolutely no guarantee that that's all you'll get.

And that's the problem with the current vogue of talking about "precision nuclear strikes"—the very kind of thing for which a neutron bomb would be used. The underlying assumption is that we could cross the crucial threshold between conventional and nuclear war, with both the White House and the Kremlin carefully calculating, even as the missiles homed in on their own troops and bases and silos, precisely what the limits would be on the next strike, and the next counter-strike, and the one after that, and the one after that, and the one on either side would make a fatal miscalculation.

To believe that requires a faith in our own leaders—and in the Russians'—that transends all logic.

Weinberger would have us believe that all opposition to the neutron bomb grows out of a "well-orchestrated propaganda campaign based in Moscow." Certainly there is such a campaign. But one hardly needs to parrot the communist line to question the production of the neutron bomb. One needs only to be sane.

Years ago, just after Hiroshima, Lewis Mumford, the eclectic social historian, planner and prophet, wrote words that come to mind now:

"We in America are living among madmen. Madmen govern our affairs in the name of order and security . . . And the fatal symptom of their madness is this: they have been carrying through a series of acts which will lead eventually to the destruction of mankind, under the solemn conviction that they are normal responsible people, living sane lives, and working for reasonable ends. . . .

"These madmen have a comet by the tail, but they think to prove their sanity by treating it as if it were a child's skyrocket. They play with it; they experiment with it; they dream of swifter and brighter comets...

"Why do we let the madmen go on with their game without raising our voices? Why do we keep our glassy calm in the face of this danger? There is a reason: we are madmen too. We view the madness of our leaders as if it expressed a traditional wisdom and a common sense.

"We view them placidly, as a doped policeman might view with a blank, tolerant leer the robbery of a bank or the barehanded killing of a child... Our failure to act is the measure of our madness. We look at the madmen and pass by.

"Truly, those are infernal machines that our elected and appointed madmen are setting. When the machines go off, the cities will explode, one after another, like a string of firecrackers, burning and blasting every vestige of life to a crisp.

"We know that the madmen are still making these machines, and we do not even ask them for what reason, still less do we bring their work to a halt...

"We are thinking only of the next hour, the next day, the next week, and that is further proof that we are mad; for if we go on in this fashion, tomorrow will be more heavy with death than a mortuary." CENTRAL RABBINICAL CON-GRESS: WELCOME TO WASH-INGTON

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. RICHMOND. Mr. Speaker, I know my colleagues will all join me in welcoming the many thousands of dedicated individuals from the Central Rabbinical Congress of the United States and Canada who are in our Nation's Capital today to make their views known on issues of concern to them.

More than 3,000 of my own constituents from the Williamsburg neighborhood in Brooklyn are among the participants in today's activities.

We welcome the participants in this gathering—the first of its kind in Washington.

JIM LEACH ON EL SALVADOR

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

. Mr. BEDELL. Mr. Speaker, I wish, to bring to your attention a recent article by our distinguished colleague, Representative JIM LEACH of Iowa, entitled "El Salvador: Can Reagan Save Himself From Reaganism?" Congressman Leach has followed the events in El Salvador closely as a member of the House Foreign Affairs Committee. His comments are both perceptive and constructive: They focus on the fundamental irrelevance of military aid to the economic and social tensions of developing countries; as well as the danger that our growing military intervention will undermine our criticisms of Soviet military aggression while providing the El Salvadoran rebels with anticolonial legitimacy.

The text of the article follows: [From the Ripon Forum, August 1981]

CAN REAGAN SAVE HIMSELF FROM "REAGANISM?"

(By Congressman JIM LEACH)

No army, no weapon and no military leader has succeeded in bringing lasting peace to any corner of the globe in modern times. Increasingly explosive international conflicts require regional if not global military balances, but, with few exceptions, solutions to fundamental social problems have little to do with modern soldiers and weapon systems.

Military means are not only the most destructive method of problem-solving; they are in many instances irrelevant. The nuclear arsenals of the great powers are of vital strategic consequence to the United States and Soviet Union, but they are of little value in most Third World settings where internal divisions are rooted in poverty, illiteracy, and social injustice.

A classic example is El Salvador. Violence in this unfortunate civil war has such a tendency to beget more violence that the perpetrators on both sides have lost much of the moral imprimatur that may have justified their original causes. The same applies to the intervention of outside powers. U.S. intentions are honorable, but our involvement is itself counter-productive.

The sending of U.S. military advisers has stamped an increasingly ideological revolutionary movement with anti-colonial legitimacy and helped transform an internecine conflict into a romantic national liberation struggle. The clear effect of treating Third World citizens as pawns in an East-West conflict is to embolden the opposition.

It is true that in the face of recent Soviet adventurism the new Administration should make clear to the world that the introspective days of vacillation and self-doubt that followed our involvement in Vietnam are over. But even our closest allies are concerned that the Administration is overreacting to the military as opposed to the economic dimension of Central American politics. A serious social problem, they have warned us, should not be escalated into a military crisis.

El Salvador may be, as President Reagan observed, an "inherited" rather than a "created" problem, but it can only be described as a "contrived" crisis. Its import comes from the top down, not vice-versa. The American people did not cry out for action; rather a few in the Administration decreed a crisis and mapped out a response. A power play appears to have been attempted by those in our government advocating greater military involvement in Latin America in the power vacuum that occurred at the exact time of the transfer of authority from a Democratic to a Republican President. As former Ambassador to El Salvador Robert White has remarked:

"I think that there is a driving need, which I do not pretend to understand, by the American military to involve themselves on the ground in Central America."

Worthy of public scrutiny is the content as well as the timing of the request of the U.S. military mission in El Salvador to increase substantially our military presence there. Coming at the behest of the Pentagon, this request was submitted to Ambassador White on January 19 and subsequently sent with the Ambassador's disparaging assessment the next day, when Washington was more concerned with the pomp and circumstance of the inaugural than the risks implied with a foreign policy change of this magnitude.

Worthy also of public understanding is the difficulty new foreign policy advisers have in cautioning restraint in the immediate aftermath of an election in which the incumbent President was defeated in part because he was perceived to "blink" when tough decisions were demanded.

Much has been made inside and outside the U.S. of the analogy between Vietnam and El Salvador. Administration spokesmen have been quick to point out the different dimensions of the two conflicts and the contrast between Central American and Southeast Asian culture and politics. But one lesson from the Vietnam experience appears directly relevant. A preoccupation with the domino theory of government toppling led in the 1960s to the emergence of a domino theory of decision-making. In our concern for stopping Communist expansion in Southeast Asia, America's political leaders lost perspective and the ability to control

the decision-making process. Attempts to influence policy in a minor way in a distant country led to a steadily greater involvement. Falled policies did not lead to a reassessment of judgment; rather they sparked appeals to patriotism which precluded rational criticism. The pride of politicians caused successive Administrations of both parties to declare that American policies were not wrong; only their manner of implementation was faulty. What couldn't be acomplished by one level of force, three Presidents asserted, could at a higher level.

Foreign policy in the American system is largely a function of the Executive. Since crucial decision-making is a reflection of Presidential personality, it is important to assess the individual ultimately responsible for establishing government policy in situa-

tions like El Salvador.

While clearly not averse to the use of force, Mr. Reagan appears to be at peace with himself, lacking the towering self-esteem with which Mr. Johnson and Mr. Nixon were so visibly afflicted. A unique political personality, the President may be the one individual in the new Administration with sufficient self-assurance to acknowledge mistakes when made, to have the confidence to embrace restraint as a proper foreign policy option. Only Reagan can save himself from "Reaganism."

In this regard, it is important to stress that the commitment of 54 military advisers, while a mistake, may not be irretrievable. The ruling out of further escalation as well as the hints of concern coming from within the White House that the El Salvador issue is taking too much attention away from the economy could represent "light at the end of the tunnel"—not for victory, but for modesty. A mistake appears to be recognized, and hopefully this recognition will serve as a lesson for this young Administration as it addresses other policy concerns.

There are lessons to be learned as well from recent actions of our principal adversary in the world—the Soviet Union.

When Soviet tanks rumbled into Prague twelve years ago to quell a popular revolt, the Kremlin invoked what has come to be called the "Brezhnev Doctrine" to justify its aggression.

In essence, the Brezhnev Doctrine proclaims the Soviet Union's right to intervene to protect socialism in those neighboring states where it had been imposed but was threatened by "counter-revolutionaries" aided by "outside forces." Since rationalizing the crushing of the Czechs, the Brezhnev Doctrine has been invoked to legitimize Russia's ruthless invasion of Afghanistan in 1979 and the menacing of Poland today.

In formulating the Brezhnev Doctrine, the Russians may have believed they were following a precedent set in 1823 by the U.S. when President Monroe promulgated the Doctrine that bears his name. If this is the case, their reasoning is profoundly flawed. The Monroe Doctrine was prohibitory rather than interventionist in intent. Designed to close the Western hemisphere to further colonization, the Monroe Doctrine challenged the right of "any European Power" to further conquests in the New World.

Unlike the Brezhnev Doctrine, which sanctions Soviet colonialism, the Monroe Doctrine upheld the principle of self-determination for our southern neighbors. Rather than providing a philosophical rationale for our intervention in the affairs of Latin America, it was intended to warn others against such intervention.

In policy terms, military intervention is the doctrine of the Soviet Union, not the United States; of Brezhnev, not Monroe. A substantial U.S. military presence in El Salvador would therefore leave us open to the charge of being guilty of the same hypocrisy of which the Kremlin stands convicted. In the eyes of many it would deprive the West of any moral standing to oppose a Soviet invasion of Poland and ironically increase the likelihood of such an invasion.

Colonial interventionism is an idea whose time on the historical clock has passed. It is also an idea that has demonstrably been proven futile. The history of the past half century is the history of peoples demanding their independence from outside influence. Country after country in Africa, Latin America, and Asia have thrown off colonial mantles, and in the last year alone we have seen two of the most extraordinary resistance movements ever recorded, develop and flourish.

In Afghanistan, largely uneducated semitribal people are showing total disdain for the tanks and chemical weapons of the Soviet Union. In Poland, a single man who claims never to have read a book, who says his only political philosophy is that the Queen of Poland is the Virgin Mary, is holding 57 Soviet divisions at bay. Military forces may capture capitals and control for a time the machinery of government, but the human spirit cannot be conquered by guns.

That is why we have so little to fear of Soviet hegemony over our neighbors to the south and why American policy is better served by the Peace Corps than the Green Berets in Latin America.

A TRIBUTE TO JAMES V. RYAN

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. YATRON. Mr. Speaker, on September 13, the Super Sunday Committee of Minersville, Pa., is paying tribute to the accomplishments of a very special individual, the Honorable James V. Ryan, at a celebration marking the 150th anniversary of the establishment of their community.

Jimmy Ryan's dedication to his community is well known in Schuylkill County and throughout Pennsylvania. It is indeed fitting that he is to receive a tribute from the Super Sunday Committee for his outstanding leadership and his unwavering assistance to the city of Minersville.

Jimmy Ryan has been a leader in the coal industry for many years. He has served as president of the Cass Township School Board for the past 28 years and was appointed a U.S. marshal by President Kennedy. He was also the Democratic Committee chairman for many years and a participant in countless organizations and activities to benefit his community.

He is an inspiration to all who meet him—a strong, forceful, and, above all, a compassionate man who has maintained a reputation for fairness, devotion to his community, integrity, and honor. He is always there with advice and assistance when anyone in need comes to him. It is because of men like Jimmy Ryan that our community and country are better places to live. I know that my colleagues will join me in paying tribute to this very important Pennsylvanian, my good friend Jimmy Ryan.

THE RAILROAD LAND GRANT DEVELOPMENT ACT OF 1981

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. WILLIAMS of Montana. Mr. Speaker, in the late 1800's, the Federal and State Governments granted approximately 10 percent of the entire land mass of the United States to various railroad companies to encourage and compel the construction and operation of rail lines through the then-undeveloped West.

Today, a century after most of the land grants were made, the transcontinental railroads are in decline; consolidations, mergers, and takeovers threaten ever greater railroad monopolies, offering less and less service and higher and higher prices. The Federal Government has been too cautious in representing the legitimate public interest by demanding corporate responsibility from the descendants of the railroad robber barons.

Congress ought not to sit idle, listening to the continuous litany from the railroad companies about the high cost and unprofitability of providing public service, and about how financial conditions dictate that they abandon service to many communities and raise rates to others. Many railroads have had difficulty identifying operating capital.

And yet, the railroads and their parent organizations retain title or rights to some of the most valuable land in this country; land under which rich deposits of coal, oil, gas, and other natural resources can be found in great abundance; land which was originally granted to the railroads by the Government. Railroads and their parents have their own pots of gold.

But these great riches are generally not available to the railroad companies to which they were originally granted. The reason is simple: Corporate restructuring in the railroad industry has resulted in a virtual theft of the most valuable assets of our land-grant railroads. The portions of the railroads that held the land grants and their resources have been severed and now are held in subsidiaries reporting not to the railroad but to a nonrailroad holding company. In turn, the land-grant railroads have been made independent subsidiaries that

now must operate without the revenues and resources of the land grant. Thus, the public subsidy given to the railroads to carry out the peculiarly public functions of our arteries of commerce has effectively been redirected to various natural resources and energy companies. Those independent companies have no authority to receive any general public subsidy, need no such subsidy, and are not compelled to perform any service in return for such subsidy.

And now, we find the railroads, or more properly, the railroad holding companies, pressing Congress to provide what will, in effect, become a second land grant and further public subsidy, which may be diverted to the

energy companies.

Tomorrow morning, the Senate Committee on Energy and Natural Resources will begin to take testimony on legislation to repeal a provision of the Mineral Lands Leasing Act of 1920 which prohibits railroads from leasing Federal coal.

If this law is repealed, as is highly possible considering the political climate in this Congress, we will throw open the gates to full-scale, unfettered, and uncompetitive coal mining by railroad holding companies.

I propose an alternative, one that may serve not only as an inducement to development of the vast resources of coal held by the railroad holding companies if that is the will of Congress, but also as a source of continued

viability for the railroads.

I have today introduced the Railroad Land Grant Development Act of 1981, which repeals the 61-year-old ban on Federal coal leasing by railroads, but couples that repeal with provisions that direct at least onethird of the revenues from development of the land grants to be returned to the railroads as a source of capital and operating income. The bill also requires that one-third of the revenues returned from the energy subsidiaries to the railroad subsidiaries of these holding companies be dedicated to maintenance and operation of railroad branch lines.

A few may say that we are exacting still more public obligation from an industry that believes it has discharged its original duties and obligations in exchange for the land grants. There are, however, those who believe as I do that the public responsibilities of the railroads must be of the same duration as the land grants. As we stand on the brink of unlocking even more chests of the national wealth for the railroad companies, the demand for public service from those companies must be maintained rather than diminished.

If we repeal section 2(c) of the Mineral Lands Leasing Act of 1920 and allow a railroad holding company to lease Federal coal lands, most of which, through the checkerboard pat-

tern of the land grants, are adjacent to the company's lands, we will set up an uncompetitive situation wherein the only likely successful bidder for that Federal coal will be the railroad holding company. Because of the checkerboard pattern, no other company interested in developing a mine in the area of a Federal lease could be expected to obtain a lease and successfully operate a mine, as the railroad holding companies are not likely to be interested in parting with their alternate squares of land. And, without those alternate squares, no company could obtain access to a sufficiently large chunk of land with which to economically develop a strip mine to obtain the coal. Thus, the only successful developer will be the railroad holding companies, which likely will pay bottom dollar for the Federal leases and gain access to valuable Federal coal at a very minimal cost.

That will be the second land grant.

And, it will be a grant that reaps no benefits for the railroad or the public,

save the provision of coal.

If we are going to provide that handout, let us at least get something in exchange. In this case, the best exchange seems to be that we require some money to be pumped back into the railroads that originally were granted those riches.

Ideally, it would seem appropriate for us to insist that all revenues derived from development of the land grants be returned to the railroad; realistically, such a requirement may be so onerous as to preclude development, thus defeating the purpose.

I would like to close by reciting a quotation from a weary traveler to the west coast who more than 100 years ago was disgusted with the attitudes of the railroads whose routes he had just traveled:

Some day in this country, it will be decided that railroads are to be run for the public, and for their benefit and accommodation. Corporations and monopolies, cliques and combinations may, for a time, oppress and hinder the people; but there always comes a day when the public assert, and asserting, maintain their rights.

Our work to fulfill that prophecy is not yet complete.

H. P. HOOD REMAINS IN CHARLESTOWN

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. O'NEILL. Mr. Speaker, I would like to commend the H. P. Hood Co.'s decision to remain and to expand its Charlestown, Mass., operations in my congressional district. Hood's decision should be recorded as a vote of confidence in the Boston economy. Hood, the largest employer in Charlestown, is to be congratulated for this decision, which will enable the continued employment of over 900 employees from the Boston area. Mr. Edward Gelsthrope, chairman of H. P. Hood Co., worked long and hard to bring this expansion to Charlestown and he deserves our appreciation. Furthermore, Mayor White of Boston and I will continue to work closely with Hood, as well as other businesses in Boston, to secure the necessary financing needed to maintain a sound economy for the people of Metropolitan Boston.

THREAT TO OUR CIVIL SERVICE

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. VENTO. Mr. Speaker, earlier this year, I spoke on the House floor on the threats to our civil service employees and the resultant "brain drain" of qualified Federal workers.

It is obvious that unless the inequities and abuse which Government workers now endure are remedied, more and more dedicated, hard working civil servants will leave for jobs in the private sector. The result of this exodus can only harm the American taxpayer and lower the current high level of service provided. A career in the public sector will no longer be an attractive alternative and, as a result, the qualification of job applicants will drop.

Low wages and inadequate pay raises are often cited as the cause for Federal worker dissatisfaction. However, I believe that the problem goes much deeper than that. The American public, encouraged by the demagoguery of some politicians, now believe that every Federal employee is an uncaring, incompetent, lazy bureaucrat. This stereotype is totally untrue. The average Federal worker takes pride in their job and has a deep sense of responsibility to the American people which they serve.

Nevertheless, this new mentality has led to a shocking disregard for the rights of Federal employees. Abuses, both physical and verbal, are dumped on Federal workers from all sides. This attitude and the resultant mistreatment can only lead to a decline in quality services by the Government.

It is the responsibility of Congress and the President to correct the public's misconceptions about Federal employees. Where there is abuse or waste, we must correct those problems, but we cannot allow the continued abuse of dedicated civil servants.

At this time, I would like to draw to my colleagues attention a recent U.S. News and World Report article detailing the new incivility toward civil serv-

THE NEW INCIVILITY TOWARD CIVIL SERVANTS

A dog warden in Pulaski County, Ky., had the back window of his pickup truck shot out not long ago by an angry pet owner and frequently receives threatening telephone calls in the middle of the night.

In Oakland, Calif., a city employe was struck in the face and knocked off her chair after she told a man that he would have to wait a few minutes for a job interview.

A claims examiner at a state unemployment office in North Newark, N.J., was stabbed and critically wounded by a 22-year-old man who became enraged when told he did not qualify for extended benefits.

In one city after another, government workers—often accused of a callous or lackadaisical attitude toward the public—find themselves on the receiving end of verbal and even physical mistreatment from angry, frustrated elitions

frustrated citizens.

Special targets. "The abuse of government employes is becoming more and more of a problem in all public-contact jobs," says Linda Lampkin, director of research for the American Federation of State, County and Municipal Employes. "For some reason, people feel justified in saying and doing things to a public worker that they would never say or do to a grocery clerk."

Attacks on public employes are becoming so widespread that, in some cities, officials have trouble keeping certain jobs filled. Security is being beefed up in some government offices. A few government workers even demand "combat pay."

"Life in the front lines of the municipal infantry is never dull," says John Teipel, director of street and sanitation services in

Dallas.

Behind this ominous trend, officials say, is a growing frustration with government in general and a widespread feeling that public

workers are "inept bureaucrats."

"The illusion the public has about public employes is that they are underworked, overpaid, inefficient and ineffective, and this makes some people mad," explains George Masten, executive director of the Washington Federation of State Employes. Adds Don Svedman, deputy commissioner of the Colorado Department of Agriculture: "Let one government worker become known as a deadbeat, and the rest of us end up paying for it."

At times, anger vented toward a low-level government worker has little, if anything, to do with the worker. "People are tense and bitter about the cost of living and looking for a way to talk back to the government," explans Lt. Bill Rell of the Denver Police Department. "Sometimes we're it."

Many people believe that, as taxpayers, they are entitled to make heavy demands on public employes. "The rudeness usually takes the form of the 'you work for me' syndrome," says Bob Currie, executive director of AFSCME Council 6 in St. Paul. Adds Joe Weikerth, assistant director of Houston's Civil Service Department: "So often we hear people say, 'We pay your salary; I pay my taxes; so you work for me, and I deserve better treatment."

The most common form of abuse of public employees appears to be rudeness and verbal mistreatment. "I've been here for 30 years and I guess there's nothing in the book that I haven't been called," remarks Melvin Cox, superintendent of the Danville, Ky., water-meter department.

Other public-utility employees report that customers frequently blame them for high bills. Clerks in Houston's water department are allowed extra time away from the telephones to get a breather from the verbal abuse hurled at them by irate citizens. Out

of the 1,500 to 2,000 calls per week, about 50 are considered hostile, says a water-department official, who adds: "They really get

you going."

Meter maids are frequent targets, too. One in Evansville, Ind., recently returned to her vehicle after writing a parking ticket and found a dead snake in the back. Another saw a man who had received a ticket smash a parking meter with a sledgehammer. Obscenities are common. "You have to have a pretty good sense of humor to handle a job like this," says Monnia Hudson, who has been a meter maid in Evansville for eight years.

But sometimes the public's wrath turns ugly and violent. A New York City welfare recipient, when told that her check was delayed, picked up a chair and hit a clerk over the head. Hospitalized with a brain concussion, the clerk couldn't return to work for

more than a year.

Such violence has become so common in New York City that union contracts now provide for 18 months of leave with pay after an assault. "Our people are being threatened constantly," says Sheila Davidson, a senior clerk at the state unemployment office in Peekskill, N.Y. "It is a growing problem that we have had in the city, and now it is spreading to the suburbs."

Fire-department paramedics also are frequent targets of personal assault, either by delirious victims or friends or relatives of

he injured

"Rudeness and violence are almost an everyday affair for the type of work I'm in," says Larry Matkaitis, a Chicago paramedic. In 1980 alone, he says, there were 56 assaults on paramedics in Chicago.

The reason for the attacks? "Some people associate our uniforms with the police department," says Matkaitis. "A lot of people

don't understand what our job is."

A victim of one such attack was Tom Guzik, an ex-Marine who suffered a disabling back injury when he was assaulted three years ago by the husband of a woman hurt in an accident. "I was more scared in the ambulance in the Chicago ghetto than I was in Vietnam," says Guzik.

Violence against paramedics has had serious repercussions in Chicago. In two separate incidents, paramedics—afraid to enter public-housing projects without police protection—waited 10 to 15 minutes for police to arrive. In both cases, the patients died. However, medical examiners later ruled that the delays were not factors in the deaths. Today, paramedics are equipped with portable two-way radios whenever an emergency requires that they leave the ambulance

Assaults on employes of New York City's water department became so common that police officers now routinely accompany them whenever they enter rundown neighborhoods during hot summer months to shut off spewing fire hydrants.

Abuse of public workers poses other problems both for employers and employes. Richard Brawner, manager of water-customer services for Houston, says job turnover in his department is 40 percent each year. "Other utilities provide bonuses for their phone operators because it is such a hard, ich." Praymora such

job," Brawner says. Stressful job conditions can result in ulcers and other physical ailments, say employers. "The climate today encourages people to express anger," says Edward Post, chief of the Colorado Department of Revenue's collection force. Workers who regularly answer telephones in his office, he says, "have to be tough as nails."

In Los Angeles, employes of the water and power department often "are not prepared for the stress" of dealing with irate customers, says Lloyd Herbs, customer-relations director. Sometimes they are moved to other jobs.

Some employers and unions have begun offering special training for workers in jobs where abuse is likely. Employes are taught how to handle irate people and to defuse tense situations. "Essentially, we're teaching them how to communicate without getting assaulted," says AFSCME's Lampkin. Some unions are demanding higher pay for public employes who hold high-stress jobs.

Both unions and employers are concerned that the problem may grow worse before it gets better. Budget cuts at all levels of government are likely to mean fewer employes to handle growing workloads. "That means longer lines and shorter tempers," says Lampkin. "And as unemployment benefits, food stamps and other federal relief programs are cut back, government employes will become more and more the bearers of bad tidings."

A lucky few public workers are able to have the last word. The U.S. Postal Service, whose letter carriers have a long history of encounters with angry dogs, wants to bite back. Specifically, the Postal Service is helping carriers assemble evidence for personal lawsuits against owners of pets that cause injuries. As matters stand, the service already spends more than \$250,000 a year on dog repellent.

But most employes are philosophical. "There are some people who aren't going to like whatever service they get," says David Truly, director of the Dallas Civil Service Department. Teipel, director of street and sanitation services in Dallas, offers this advice for public employes: "It's like Truman said, 'If you can't stand the heat, stay out of the kitchen.'"

CARL KARCHER: AN AMERICAN SUCCESS STORY

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. DANNEMEYER. Mr. Speaker, the focus of the 97th Congress has been on the future of our Nation's economy. In our own way, each of us has endeavored to promote policies that will foster economic growth and expansion. The debate over the size and nature of Government that is implicit in the battle over the budget comes down to the basic question of from what source or sources does economic and spiritual success accrue to an individual. Should we look to Government to provide for our wants and needs, to protect us, shelter us and secure happiness for us? Or is it our responsibility and our mission to work hard for ourselves and our families?

Those who criticize the latter route and choose government often doubt that an individual can get ahead in our private sector, free enterprise economy. Those of us who favor a reliance of individual initiative and responsibility are sometimes guilty of speaking in generalities about the opportunities that our way of life offers to all Americans. This is an especially timely subject in today's economic climate. Mortgage rates near 20 percent are a source of uncertainty and discouragement to the young newlywed trying to figure out if a home is just a dream. The same applies to Americans young and old, but especially to those who are entering the work force for the first time.

To all Americans I wish to take this opportunity to present as a testimonial of the opportunities of our private enterprise system, the case of Carl Nicholas Karcher—a man whose life is an American success story.

Carl arrived in California in 1937 and worked in an uncle's feed store in Anaheim. He learned the rigors of hard work at this early age of 20 by putting in 12-hour days, 6 days a week for a wage of \$18. Just 4 years later, Carl-who had never gone beyond the eighth grade-borrowed a little over \$300, using his Plymouth automobile as collateral, added \$15 in cash of his own money and purchased a hotdog cart at the corner of Florence and Central in Los Angeles. He later added two more stands. All the while his wife Margaret helped with cooking and helping customers. Forty years later, in 1981, Carl Karcher Enterprisesbased in the congressional district I represent-is the largest privately owned, nonfranchised restaurant operation in the country. Current sales are over \$200 million annually and Karcher Enterprises employs more than 11,000 people.

The story of Carl Karcher's 40 years in business in southern Californiathe 40th anniversary is being celebrated this year-is proof that an extensive formal education and inherited wealth are neither necessary nor sufficient ingredients for success. What counts are determination, hard work, sacrifice, patience, and a willingness to take risks in the marketplace. Carl Karcher has exhibited all of these characteristics throughout his life. Beyond that, Carl and his family have not confined themselves solely to their business enterprises. Carl, true to the spirit of selflessness, has been a community leader over the years in Anaheim, where he and his wife Margaret reside. Civic posts and affiliations infollowing: the Providence Speech and Hearing Center; St. Jude Hospital; Braille Institute of America; California Angels; Cerritos College Self Employment Committee; United Way; Orange County Council of the

Boy Scouts; and, South Coast Repertory Theater.

One important measure of an individual is the esteem with which he is held by his peers. An award is a symbol of this expression. Carl was named one of three humanitarians of the year by the Orange County Chapter of the National Conference of Christians and Jews. He was honored by the Freedoms Foundation at Valley Forge in 1980.

It is only fitting that the House of Representatives join with friends in California and elsewhere to take note of the 40th anniversary celebration now in progress. I take great pride in pointing out Carl Karcher's accomplishments for the Record in recognition of his contributions to the growth and success of the free enterprise system.

OIL COMPANY TAXES: MYTH AND REALITY

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

. Mr. MARTIN of North Carolina. Mr. Speaker, in the past there was an annual purported exposé about American-based international companies' taxes. The exposé routinely involved comparing their worldwide income with their U.S. taxes. Normally, that showed U.S. taxes quite low compared to income, a comparison that had constituents assuming that the companies were avoiding taxes on a massive scale. That old annual exposé used an incorrect comparison. You should compare worldwide income with worldwide taxes, or you should compare U.S. taxes with U.S. income. Doing it otherwise would be akin to comparing a nationwide U.S. company's nationwide income to the State income taxes paid to North Carolina. That's a meaningless comparison.

The old exposé appeared again this year in a story by UPI. It was countered by an ad placed by Mobil Oil Co. Both seemed a bit strained. The article stated that the effective tax rate for oil companies was 12.4 percent, a lower tax rate than is paid by many factory workers. Mobil disputed that and contended that the article and the branch of the Energy Department that produced the data in the first place had consciously misstated the facts. I had more faith in Secretary Edwards than that and wrote the Energy Department for clarification and an assessment of both the UPI story and the Mobil ad. The answer follows. The fact is that the oil companies pay 42.7 percent (not 12.4 percent) of their worldwide income in worldwide taxes. It also turns out that Mobil's ad was not 100 percent perfect. in that DOE's report—on which the story was based—contained the correct data, data that was available to the authors of the old annual exposé, reborn.

I offer this only to assure that the truth be printed somewhere, if not in the journals that dutifully carried the mistaken exposé, then at least in the CONGRESSIONAL RECORD. This correction will not of course guarantee that the same mistake will not be repeated next year. Indeed if you make wagers, put your money on the sure thing. Namely, that next year will routinely be treated to the same phoney discovery that U.S. oil companies pay a small U.S. tax as a percentage of income, again without clarifying that the income base is worldwide and taxed accordingly.

DEPARTMENT OF ENERGY,
Washington, D.C., August 4, 1981.
Hon. James G. Martin,
House of Representatives,
Washington, D.C.

DEAR MR. MARTIN: This letter is in response to your July 16, 1981, letter inquiring as to the appropriateness and accuracy of the financial reporting system (FRS). I am also providing comment on the United Press International (UPI) and the Mobil Corporation (Mobil) Newspaper items concerning oil industry profits and taxes.

THE UPI ARTICLE

It is our opinion the UPI article is misleading, although factually correct in most instances. The Energy Information Administration (EIA) will not attempt to address its conclusion—that the oil companies do not pay a fair share of taxes—but we can comment upon the data and methodology used to arrive at that conclusion.

First, the headline states "Energy firms tax rate put at 12.4 percent." In fact these firms pay taxes at a 42.7 percent rate, worldwide. The headline as it stands implies that the total tax rate is 12.4 percent, whereas this is only the U.S. tax rate paid on worldwide income. The rest of the article does go on to clear up the initial misimpression.

Secondly, we also find misleading the comparison made of the 12.4 percent effective U.S. tax rate for the energy firms to that paid by an individual earning \$20,000. Such a comparison seems to reinforce the impression given by the headline that the 12.4 percent is the total tax rate, since the \$20,000 wage earner pays no foreign income taxes.

Thirdly, and as noted by Mobil, the 12.4 percent U.S. tax rate is based upon a worldwide income figure, which is subject to substantial foreign income taxes as well as the 12.4 percent U.S. taxes. UPI does make mention of the foreign taxes paid, but this is left to the latter half of the article. In our opinion, total communication of the facts would require mention of the foreign taxes up front in the article.

Lastly, UPI quotes critics of the industry who take the position that the foreign income taxes paid are not really income taxes, but are a form of royalty, and that the U.S. taxpayers are subsidizing foreign governments with the tax credit allowed against the U.S. tax bill for foreign taxes paid. They state that the foreign tax credit makes the domestic rate "grossly low." This is incorrect, since the foreign tax payments can only be used to reduce U.S. taxes due on

foreign earned income subject to U.S. taxes. UPI apparently missed the distinction between U.S. taxes levied on income earned in the U.S. and U.S. taxes on income earned worldwide.

THE MOBIL AD

The Mobil ad, as you know, recommends that U.S. taxes be compared to U.S. incomes, or worldwide taxes be compared to worldwide income. However, Mobil also strongly implies that the FRS report is misleading in the same manner as the UPI article

Such an implication is quite wrong. Even a casual reading of Chapter 2 of the FRS report, "Performance Profiles of Major Energy Producers," will bear out the fact that the type of income tax presentation that Mobil feels is appropriate, was in fact

used in the FRS report:

Table 7 (page 28) compares worldwide taxes to worldwide pretax income of the FRS companies and the Standard & Poors (S&P) 400 for 1979. This table and the accompanying text, indicate total tax expense of 50.8 percent for the FRS companies, including 42.7 percent being paid currently and the difference of 8.1 percent being deferred for payment in later years. The table further contrasts the 50.8 percent tax rate of the FRS companies with the somewhat lower S&P 400 company rate of 45.5 percent

Table 8 (page 29) provides greater detail on worldwide taxes and pretax income, but only for the FRS companies. Among other things it provides a breakdown by geopolitical area of the 42.7 percent taxes paid: 28.1 percent foreign; 12.4 percent U.S. federal; and 2.1 percent state and local. This table was the source of the 12.4 percent figure used by UPI.

As you can see, both tables compare worldwide taxes to worldwide taxable income.

CONCLUSION

In summary, we are disappointed that UPI used FRS data out of context, as they were not only furnished a copy of the report, but a member of the FRS staff reviewed the tax tables with them in detail. Likewise, we are disappointed with the Mobil ad because Mobil, too, had a copy of the report.

Enclosed is a copy of the FRS report. You will find that it covers many other aspects of the energy industry, in addition to taxes. If there are any questions, Arthur T. Andersen is the director of the FRS program, and can be reached at 633-8806.

Sincerely,

J. ERICH EVERED,
Administrator,
Energy Information Administration.

JUSTICE: OUT OF CONTROL

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. McDONALD. Mr. Speaker, in recent times, there is no department that has had a more pervasive influence on the every day lives of our citizens than the Department of Justice. The record of its interference and intrusion into private lives and local concerns is extensive and need not be expounded upon here. So it was with

great anticipation that I, together with a number of my colleagues, awaited President Reagan's announced intention to revamp the Justice Department.

However, those announced intentions have not come to fruition, nor are they likely to unless the administration takes control of the Justice Department. I use that phrase, for in the words of White House Chief of Staff, James Baker, the Reagan Justice Department is in fact "out of control."

For my colleagues who may not be aware of the situation at the Department of Justice, what follows is an article from Human Events of August 15, 1981. I ask my colleagues to read the article and compare the current situation with those intentions announced by President Reagan. It becomes obvious that the current situation is the very antithesis of the President's announced intentions.

It is for that reason that I ask my colleagues to join me in urging President Reagan to take immediate action to rectify the situation that exists at the Justice Department.

The article follows:

[From Human Events, Aug. 15, 1981]
JUSTICE DEPARTMENT "OUT OF CONTROL"?

At a recent meeting with some conservative leaders, White House Chief of Staff James Baker startled those in attendance by remarking that the Reagan Administration's own Justice Department was "out of control."

"Out of control" is, in the eyes of many, an understatement for a department which has drafted memos declaring Reagan campaign promises unconstitutional, has forwarded a Supreme Court candidate without thoroughly researching her views on abortion and has continued to actively pursue the liberal agenda of a policy-making staff largely held over from the Carter Administration.

Speaking on the House floor, Rep. Larry McDonald (D.-Ga.) summarized the problem when he noted: "The Department is consistently taking positions in both domestic and foreign affairs areas that are totally alien to what was promised the American people in the election of 1980 . . . leftists are still with us in the Justice Department. It also appears that the President at best is being tendered misinformation that is causing deep consternation among that majority of the American constituency that elected him."

Among the more recent anti-conservative efforts by the department are two draft memoranda which were prepared and given limited circulation within the Administration. One would have declared tuition tax credits unconstitutional. The other would have held that Congress is unable to remove jurisdiction to prevent federal courts from issuing controversial rulings promoting abortion and forced busing and prohibiting prayer in public schools.

This latter draft opinion was prepared in spite of the fact that the Constitution clearly subjects the Court's jurisdiction to "such Exceptions, and such . . . Regulations as the Congress shall make." Because of intense anger from Reaganite conservatives, the Justice Department now refuses to confirm or deny the existence of either of these opinions.

But these are just the most recent in a series of controversial Justice Department positions. From information gathered from a variety of reliable sources, we have learned of Justice Department position papers that would:

Declare the legislative veto unconstitutional. (This opinion, which was apparently prepared by a Carter holdover using language taken from a Carter Administration opinion on the same subject, would divest Congress of one of the most important tools for controlling a runaway bureaucracy.)

Holding the Helms anti-busing amendment unconstitutional. (Robert McConnell, the Department's chief lobbyist, had to be prevented from lobbying in favor of racial busing by White House intervention.)

Finding that an anti-affirmative action amendment in the House was unlawful because it constituted "legislating" on a "money bill." (If the anti-affirmative action amendment is unlawful, then presumably so is the Hyde Amendment, which has been upheld by the Supreme Court.)

In fact, another Cabinet-level Reagan Administration official has stated privately that the Justice Department had to be bludgeoned into compliance with the Reagan Administration's policy against forced busing.

Because of these activities, it does not surprise observers that the Justice Department did not regard as important Judge Sandra O'Connor's positions on abortion and the Equal Rights Amendment. The Justice Department also continues to resist a suit to declare the ERA extension unconstitutional, which would bury the amendment once and for all.

Ironically, the White House's problem can be traced back to its refusal to get involved in Justice personnel decisions.

Conservatives on the White House personnel team were prohibited from forcing conservative, politically astute candidates on the Justice Department, on the grounds that Atty. Gen. William French Smith was himself a conservative and was, after all, Ronald Reagan's personal attorney. When Smith delegated staffing functions to nonconservative Deputy Atty. Gen Edward Schmults—a Wall Street lawyer with no interest in social issues—that paved the way for non-conservative staffing in all of the Department's highest positions.

There is, for example, the Assistant Attorney General for Lands, Carol Dinkins. A member of the Sierra Club for many years, Dinkins has been described by a member of her own staff as having little expertise and few opinions on the environmental issues which her 300-man division is charged with litigating. In the meantime, division employees are continuing to leak confidential information to liberal environmentalist groups, according to reliable conservative sources.

Then there is Jonathan Rose, Assistant Attorney General in charge of the Office of Legal Policy. A confident of former Atty. Gen. Edward Levi confides that Rose was removed from the same position by Levi and transferred to a job where his principal function was speech-making.

Rose has retained a Carter holdover, Deputy Assistant Atty. Gen. Ronald Gainer, to push for recodification of the federal criminal code.

Gainer startled conservatives during the 96th Congress by advocating a recodification bill which would have watered down federal pornography laws, massively increased penalties for regulatory offenses by legitimate businessmen, decriminalized

marijuana and generally reduced penalties for many drug offenses, repealed a major portion of the Hatch Act and created a new abortion funding program (in the "technical amendment"). Now, Gainer is back with a slightly updated version of the same bill. The situation is made even worse by the fact that the department's commission on violent crime is prepared to issue recommendations for stringest new gun control laws, according to sources close to the gun lobby.

William Bradford Reynolds, who has been appointed to lead the Department's Civil Rights Division, is another appointee who was opposed by many conservatives. Reynolds, who had no significant experience in the civil rights area prior to coming to Justice, has apparently been totally co-opted by the radical holdover elements within that division.

Within a very short space of time, the Department (1) rejected the Chicago school integration plan is insufficiently far-reaching, (2) vetoed Virginia's redistricting plan because it failed to maximize black voting strength in Norfolk and (3) conducted a straw poll on Capitol Hill in order to determine the Department's position on extending the Voting Rights Act. This was the same division which, just before Reynolds arrived, agreed to a court settlement invalidating a federal employment test for upperlevel bureaucrats on the basis of a high failure rate by minorities.

Finally, the Reagan Justice Department has:

Forced the conservative Washington Legal Foundation and 16 conservative senators out of a suit in which they were attempting to defend federal government aid to El Salvador against challenges from liberal representatives.

Come out in opposition to an amendment sponsored by Sen. Dale Bumpers (D.-Ark.), which would shift the presumption and burden of proof which currently favors government agencies in suits against private parties.

Reportedly attempted to "take a dive" on the case challenging men-only registration, with Justice insiders telling U.S. News & World Report that Department employees favored constitutionally overturning the registration law that was eventually upheld by the Supreme Court.

Continued a suit to force the building of low-income housing in Yonkers on sites chosen by the Justice Department on the grounds that Yonkers violated the Constitution by building low-income housing on HUD-approved sites which subsequently became residentially black.

In the words of one Capitol Hill conservative who closely follows Justice, "No one in the Carter Administration—not Sam Brown, not Joe Califano, not Carol Tucker Foreman—had done as much damage to the conservative movement as the Justice Department has during the first six months of the Reagan Administration."

MINERSVILLE, PA.

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. YATRON. Mr. Speaker, on Sunday, September 13, the people of Minersville, Pa., are celebrating the 150th anniversary of their town. To mark this important occasion, the Super Sunday Committee, which has organized celebrations in Minersville for the past 4 years, has planned a block party to pay tribute to their town and to one of their leading citizens, the Honorable James V. Ryan.

Minersville was incorporated into a town in 1831 through a bill signed by Gov. George Wolf. The town got its name because of the chief occupation of its citizens at that time—coal mining. The first election of borough officers was held on May 1, 1931.

English and Welsh immigrants familiar with coal mining in their own countries began to settle in the community. German and Irish immigrants also arrived and by 1845 the population of Minersville was 1,265. By 1850 the town had almost 3,000 citizens.

In 1844, Minersville revolutionized the anthracite coal industry by establishing the first anthracite coal breaker, the forerunner of the process used today. The first breaker was able to prepare 200 tons of coal a day, a major achievement at that time.

Between 1864 and 1871, Minersville established four fire companies, the Mountaineer Hose Company, the Good Will Hose Company, the Independent Hose Company, and the Rescue Hook and Ladder Company. In 1872, Minersville had its own newspaper, the Schuylkill Republican.

The post-Civil War period resulted in the formation of new civic and veterans organizations. The first veterans group was the Lawrence Post No. 16 of the Grand Army of the Republic, the first in Schuylkill County. Other groups included the Ancient Order of Hibernians and the Frugal Savings Fund.

The first telephone was installed in Minersville in 1888. The 1880's and 1890's witnessed Minersville's industrial expansion and union organization. Railroads were constructed to the coal fields of the individual colleries in the early 1890's and the trolley came into existence along with electric lights.

The First National Bank was erected in 1896 and the Union National Bank in 1902. More immigrants began to settle in Minersville of Italian, Lithuanian, and Polish heritage. As Minersville moved into the 20th century, it had a population of 5,000.

The influence of the United Mine Workers of America grew in the early 20th century under the leadership of Johnny Mitchell. After several labor struggles the miners were given a 9-hour working day and a 4-percent wage increase. More important, the foundations were laid for all subsequent wage agreements between operators and mine workers which are the basis of the agreement governing labor relations within the industry today.

Other industries tried to establish themselves in Minersville, but for the next two decades coal mining re-

mained the principal occupation. The city of Minersville valiantly worked through World War I and was hard hit by returning troops who brought with them an influenza epidemic that caused the death of over 500 citizens. During the depression several years later, the town suffered severe hardships and many of the colleries closed down and never reopened.

In the 1930's garment factories were established in Minersville and during World War II they manufactured uniforms for our troops. In the 1950's when coal mining was reduced, other industries were attracted to Minersville. Today, the city is a very important community in Schuylkill County with a long and proud history of work and dedication to their town and their country.

Mr. Speaker, I know my colleagues will join me in saluting the town of Minersville, Pa., on its 150th anniversary and wishing its citizens our very best wishes for the future. It is indeed important to remember our past and the ancestors which made it possible for us to live in freedom today.

BILL GREEN ON THE TAX BILL

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

 Mr. GREEN. Mr. Speaker, Congress recently completed action on the tax bill known as the Economic Recovery Tax Act of 1981. This important piece of legislation reduces taxes for individuals and businesses by almost \$749 billion over the next 5 years and is the largest tax cut in the history of the United States. There has been a great deal of debate over who will benefit by the tax cut and whether it will help curb inflation and encourage more rapid growth in our economy. I thought it would be useful if I explained some of the problems I had with all the alternatives the House had before it, why I voted for the administration bill, and some of the important provisions in that bill. Given that the Udall-Obey-Reuss substitute provided inadequate tax cuts for individuals and that both moderate Democrats and Republicans were unable to rid the Ways and Means bill of tax cuts to particular "distressed" industries and the oil industry and the administration bill of even greater tax cuts to the oil industry, I felt, on balance, the administration bill was superior. Most importantly, it contains a 3year tax cut and tax indexing that will be better for almost all persons, regardless of income. It contains a mass transit provision which I had added to the legislation which will help public mass transit systems acquire new equipment. A charitable deduction is

included for those persons who do not itemize which will be of particular benefit to many residents and institutions of New York City. Finally, it makes a number of changes in the Tax Code which will help a cross-section of the population: capital gains reduction: marriage tax reform; investment tax credits for rehabilitation of nonresidential property; eligibility for individual retirement accounts (IRA's), and increasing limits on IRA's and Keogh plans; and broadened incentives for research and development.

HOUSE VOTE

On Wednesday, July 29, the House of Representatives approved the administration's tax package by a vote of 238 to 195. I voted for the administration's bill-known as the Conable-Hance bill-in preference to the Ways and Means Committee's alternative. Without question, there were several ill-conceived provisions in both bills. The committee's bill contained a "bailout" provision granting six so-called distressed industries unused investment tax credits accumulated since 1962, while the Conable-Hance version contained some major tax breaks for the oil industry above and beyond the excessive tax breaks already given that industry in the Democratic bill.

UDALL-OBEY-REUSS SUBSTITUTE

Some may argue that the "liberal" Udall-Obev-Reuss substitute bill-a third alternative—was a reasonable option. But, on inspection, it was not and had too many weaknesses. It contained just a 1-year 5-percent tax cut to occur only late in the year, not enough to offset inflation and resultant "bracket creep" even for that single year, so that it would in fact have meant a tax increase for most

Capital gains tax relief has proven to be a boon to capital formation which has contributed to increased productivity and employment. I cosponsored the capital gains tax reduction passed by Congress in 1978, a very successful piece of legislation. It has produced a significant upturn in venture capital investment and new issues coming to market with no loss in Federal revenues. The Udall-Obey-Reuss substitute, unlike both the Democratic and Republican proposals, had almost no capital gains relief. Furthermore, it did not contain a provision for mass transit that was contained in both other bills, nor did it contain the savings incentives or incentives for lowincome housing contained in the other bills.

WAYS AND MEANS COMMITTEE BILL

As mentioned earlier, a major reason for opposing the committee bill was a massive tax subsidy limited to six industries that violated all standards of tax policy. Those select industriesautos, airlines, mining, railroads, steel, and paper-would have been able to

cash in unused investment tax credits all the way back to 1962. All other businesses and industries under existing law are able to do that for only 3 years. That carryback provision would simply have been a subsidy, with the companies getting special tax refunds for which no other companies or industries, no matter how distressed, would have been eligible. Even highly profitable firm, as long as it was included in one of the distressed industries, could have taken advantage of the special refund provision. Other industries and companies equally distressed, many of the type which are located in New York City, would have received no help whatsoever. This \$3.3 billion provision in the Democratic bill was one that we could not afford.

OIL INDUSTRY PROVISIONS

Quite honestly, I felt that the oil provisions in the administration's bill were not in the best interests of the country and New York City. These breaks were proposed just 2 years after Congress provided the industry with deregulation as an incentive for exploration. I joined with other "frost Republicans and moderate Democrats on two occasions to try to remove those special tax cuts for the oil industry. On July 27, 2 days before the tax bill was to be considered, I joined in a letter to the Rules Committee, signed by other moderate Republicans, asking that a separate vote be allowed on the oil tax provisions. Several Democrats also expressed to the Rules Committee their belief in the need for a separate vote on this issue. We were turned down by the Democratic Rules Committee. A second opportunity came on a procedural vote on the rule. Had we prevailed on that procedural vote, we would have proposed a rule allowing us to reduce the Republican oil industry provisions by \$10 billion and to remove the \$3.3 billion six-industry subsidy from the Democratic bill. Again, those of us who wanted a chance to rid the tax bill of those handouts were denied the opportunity to do so by a vote of 282

The tax reductions to the oil companies were extravagant. The committee bill provided a \$10 billion tax break while the Republican bill had \$16 bil-

lion in saving for this industry.

I was disappointed, to say the least, at the outcome of these proposals. In fact, I wrote the House conferees, both Democrats and Republicans, urging that they agree to the Senate action which would reduce oil industry taxes by \$6.6 billion. The conferees did cut these tax reductions to \$11.6 billion, a figure I still consider far too great.

While we were unable to kill the special treatment for the oil industry, I felt the Conable-Hance bill was the preferable tax cut legislation before the House. It contained tax cuts for individuals which are far better than

the other alternatives and some specific provisions which are helpful to both my region of the country and to the residents of my district.

PERSONAL TAX CUT

The personal tax cut in the administration's bill is better for the average person than the Democratic bill. Inflation is responsible for taking more and more of a worker's income and putting it directly into the U.S. Treasury instead of into the pocket or bank account of the worker. Inflation causes bracket creep, whereby if you make more, you are forced into a higher tax bracket, even if your income, adjusted for inflation, has not increased. As a result, your after-tax income decreases. The only solution to bracket creep is to cut taxes to compensate for bracket creep. The administration's bill does that in different ways. First, it provides for a 25 percent reduction in taxes over the next 3 years for everyone, regardless of income, and then it institutionalizes that tax reduction as of 1985 through indexing. As inflation goes up, tax brackets are adjusted accordingly. Without indexing, Congress would, as it has been forced to do in the past, tinker with the Tax Code on a frequent basis to try to cope partially with inflation. As many of us know, Congress has not done a very good job at this. The Ways and Means bill did not contain any provision for indexing.

I should also mention another reason why I supported the administration's version of the tax cut. There was much talk about how the Democratic personal cut was aimed at the middle-income household and the Republican tax cut was aimed at the rich. That simply was not the case. First, let me state that the Republican bill was for 3 years with a cumulative 25percent tax cut while the Democratic bill was for only 2 years and 15 percent with the possibility of a third year tax cut triggered in if certain economic targets were met. Even at first glance, it is hard to deny that the Republican bill would be better for all persons, even with the skewing in the Democratic bill, after implementation of the third year of the tax cut and with the indexing in the succeeding years.

The Library of Congress Congressional Research Service, an impartial party in this debate, published a study of the personal tax cuts. First, it stated that it was probable that the third year trigger in the Democratic bill would not go into effect. Second, without that trigger, the study maintained, the Republican bill would provide larger tax cuts and lower marginal tax rates to nearly all taxpayer in 1984. Even in the first 2 years of the tax cut, 1982 and 1983, the reported tilt in favor of middle-income taxpayers in the Democratic bill accounts for only a few dollars per week for moderate-income taxpayer and, according to the Library of Congress study, extend only up to the \$35,000 income level and the difference on tax liabilities in this income range may be smaller than has been surmised. Indeed, it amounted to only \$2 per year for a taxpayer who earned \$20,000 in 1980 and whose income grew commensurate with inflation. With the provision for charitable deductions in the administration's bill, come out ahead under the administration's bill.

MASS TRANSIT PROVISIONS

I negotiated an addition to the Republican tax bill which will assist the Metropolitan Transit Authority and other mass transit agencies in their acquisition of new rolling stock. According to the MTA, over the next 10 years, more than 20 percent of the subway cars will pass their designated 35-year lives. The administration has proposed that its mass transit capital subsidy program be shifted toward upgrading existing systems rather than creating new systems. My provision, while not the only solution to the problem, is a useful one and a reason to support the administration bill. I expect that the Federal Government will be providing less funds for the purchase of this type of equipment in the future and it is certainly obvious to anyone who has ridden on a subway in New York City recently that new cars are needed.

CHARITABLE DEDUCTION

Many New Yorkers are apartment renters without the benefit of deductions for mortgage interest and real estate taxes, a situation I am seeking to alleviate in my Tenants Tax Justice Act, and they are more likely to take the standard deduction than suburbanites at the same income level. With the reduction in gift and estate taxes contained in both the Democratic and Republican bills it is possible that legacies to charities will decrease. Providing this deduction will be an important incentive to low- and moderateincome persons to contribute to charity. It is also a break for low- and moderate-income households that the Democratic bill did not provide.

OTHER PROVISIONS

There are many other provisions in the Republican bill which I support. In some cases, similar provisions were also contained in the Democratic bill. The top rate in long-term capital gains tax will be reduced, an incentive for increased investment which should increase the productivity of our economy. There is a major reform in the marriage tax which will do a great deal to minimize the unfair tax situation of married couples without increasing taxes for singles. The investment tax credit for the rehabilitation of nonresidential buildings will be in-

creased. This should be helpful in encouraging business to remain in the Northeast. I should add that this shift in the administration's tax proposals was a major victory for Northeast-Midwest Republicans in our negotiations with the administration on the tax program.

An important savings incentive is the increase in the limit on IRA contributions from \$1,500 to \$2,000 and Keogh plan contributions from \$7,500 to \$15,000 for the self-employed. For the first time, participants in private pension plans also will be allowed to participate in IRA's up to a limit of \$1,000. Another provision is one for broadened tax incentives for research and development. The bill would provide for a 25-percent tax credit on qualified research and development expenditures. I am particularly excited about this provision, as I was one of several Republicans who wrote the President urging him to expand the Republican version of the tax package to cover that, something that was ultimately done. According to an analysis done by the bipartisan Northeast-Midwest Coalition, a primary factor in the drop in productivity in our region has been the fall off in research and development expenditures. Expanded incentives for more research are needed to insure rapid growth in our hightechnology businesses and modernization on our basic industries in order to match much of the success of our foreign competitors.

I join all my colleagues in the Congress in hoping this tax cut will be as successful as claimed by the administration. It is a major change in our tax policy and, while still containing too large a tax break for the oil industry, a better plan than the one offered by the Ways and Means Committee. My support for it was premised basically on what it would do for the individual income tax and tax indexing should help all persons keep up with inflation.

MEDICARE SUPPLEMENTAL BEN-EFITS PROGRAM FOR CLINI-CAL SOCIAL WORKERS, CLINI-CAL PSYCHOLOGISTS, AND PSYCHIATRIC NURSE SPECIAL-ISTS

HON. FLOYD J. FITHIAN

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. FITHIAN. Mr. Speaker, I rise today to support H.R. 3373, a bill to amend social security to provide more adequate coverage of the services of mental health specialists—clinical social workers, clinical psychologists, and psychiatric nurse specialists—under the medicare and medicaid supplemental benefits program. This

much needed legislation would insure that qualified mental health providers and specialists will be directly reimbursable under these social security programs, without any Federal requirement of physician supervision or referral. Senator Daniel Inouye has introduced a companion bill on the Senate side. S. 123.

The existing law allows a medicare or medicaid beneficiary to obtain mental health services only from a physician—who may not have even been trained as a mental health specialist. The three other core mental health specialists are excluded—clinical social workers, clinical psychologists, and psychiatric nurse specialists.

As in so many other areas, the States have demonstrated the leadership in establishing programs that allow a beneficiary to have freedom of choice in selecting his or her mental health specialist. Several States including Idaho, California, Colorado, Maryland, Utah, Wisconsin, New York, and Virginia have enacted freedom of choice laws mandating coverage for the services of clinical social workers in all mental health insurance programs.

Many private insurance companies have issued policies providing coverage for social workers as mental health specialists. In addition, many of the most important government employees organizations recognize the need to reimburse social workers for their mental health services. For some time the Department of Defense's CHAM-PUS program has been directly reimbursing clinical psychologists for mental health services, and last year implemented a pilot demonstration project for independently reimbursing psychiatric nurses and clinical social workers for their services.

We as a nation must recognize that the mental health delivery system has changed drastically in the last two decades, with States and private insurance companies providing the leadership. Now the time has come for the Federal Government to recognize the need to make a fundamental change in the social security system by broadening and expanding coverage to include direct reimbursements to all of the mental health specialists.

The 1978 President's Commission on Mental Health recommended that all existing private and public health insurance systems, including medicare, as well as any future national health insurance program, should provide for mental health care in the "most appropriate and least restrictive setting; and the consumer should have a choice of provider and provider systems." Certainly the reimbursement of clinical social workers, clinical psychologists, and psychiatric nurse specialists makes available a wider range of therapeutic services. Nondiscrimina-

tory coverage of all four core professions would give the elderly and the poor the same freedom of choice which is enjoyed by CHAMPUS beneficiaries. The present system of financial reimbursements clearly works at cross purposes with other Federal efforts to improve the mental health delivery system.

The underserved mental health populations-rural residents, small town dwellers, the urban poor and racial and ethnic minorities-are particularly impacted by the existing system of financial reimbursement for mental health services. As a Congressman from northwestern Indiana-largely small towns and rural areas-I can directly attest to the limited mental health resources in these communities. Many towns are without a doctor, and a psychiatrist is many miles away. Under these circumstances it only makes sense to utilize the other mental health services which are available. Why should a patient seeking mental health services be forced to drive many miles to a distant town simply because it is the only way under the existing law to get reimbursement for these services.

The present system of financial reimbursement for mental health services includes only physicians who are the least available and the most costly. Although physicians and psychiatrists play an important role in the mental health system-since they alone can prescribe medication-they treat only a small portion of beneficiaries. Clinical social workers provide more psychotherapy to individuals and groups in a variety of settings, including hospitals, outpatient clinics, community mental health centers, health maintenance organizations, private and public agencies and in private practice. In fact, clinical social workers provide services to many more patients than psychiatrists, clinical psychologists, or psychiatric nurse specialists. A 1978 survey of mental health manpower, published by National Institute of Mental Health, found that 42 percent of all mental health treatment in federally funded community mental health centers was provided by clinical social workers. The time has come to recognize those mental health specialists that provide the bulk of the services and establish a system that allows them to be directly reimbursed for their services.

Importantly, H.R. 3373 legislatively defines at the Federal level the professional standards and the type of educational requirements that are necessary for each of the four traditional mental health disciplines under which they can practice independently. I have specifically spelled out the proposed definitions of clinical social workers, clinical pyschologists, psychiatric nurse specialists, and psychiatrists. By adopting these strict educa-

tional requirements, as well as State licensure and/or certification, I am confident that only highly qualified practitioners will become reimburseable under the law.

Again, many of the States and professional organizations have taken the lead in establishing licensing and certification laws, as well as minimum requirements for education and experience. Clinical social workers, for example, are subject to State licensing and certification laws in 26 States, containing a majority of the Nation's population. The professional organizations are actively working to establish a minimum standard for independent unsupervised practice of at least a masters degree in social work plus 2 years of postgraduate supervised clinical experience. In addition, the National Registry of Health Care Providers in Clinical Social Work and the National Association of Social Workers clinical Clinical Registry certifies social workers who meet these requirements of education and experience. Is it not time that the Federal Government implement the same strict standards that already exist in numerous States across the country?

Most importantly, increasing the availability of mental health services to our Nation's social security recipients by including clinical social workers, clinical psychologists, and psychiatric nurse specialists will not result in huge cost increases for the program. In fact, there is every indication that the overall cost of our national health care programs would decline. How is this possible in an age of rapidly escalating prices and inflationary pressures? First, the utilization of less costly outpatient psychotherapy has been shown to decrease the need for more costly inpatient psychiatric care. It simply costs much more to treat people in a hospital setting. Second, psychiatrists simply charge more for their services than other mental health specialists. If we as a nation could further utilize these other core mental health providers, we could reduce the cost of psychotherapy. A recent survey of Psychotherapy Finances concluded that of 1,284 respondents the highest percentage of

Third, a recent study by the National Institute of Mental Health pointed out that the utilization of mental health services resulted in decreased utilization of physical health services. This data is not shocking news. General practice physicians have long been aware of the high percentage of pa-

psychiatrists report charging "\$60 or more" for individual psychotherapy

sessions, while clinical social workers

charge \$40 per session, and clinical

psychologists charge \$50 per session.

Consequently, the reimbursement of

clinical social workers and clinical psy-

chologists actually costs less than psy-

tients who are suffering physical symptoms; for example, spastic colon, migraine headaches, caused by underlying nervous and mental disorders. Other studies confirm these findings. A pilot study conducted by the Group Health Association of Washington, D.C., revealed that patients who received short-term outpatient psychotherapy reduced their usage of general medical services and of X-ray and laboratory services by approximately 30 percent. Another study by Kaiser-Permanente over a 16-year period with mental health benefits concluded that patients who underwent short-term psychotherapy showed a reduction of almost 75 percent in medical utilization over a 5-year period. Consequently, it is possible to decrease physical health services which have become exceedingly costly.

Fourth, it is possible to increase coverage to include other core mental health specialists without raising overall costs. A study by the Union Labor Life Insurance Co. of New York City and Bankers Life Insurance Co. of Des Moines, Iowa, demonstrated that it was not necessary to raise premiums because of their inclusion of social workers as core mental health specialists. In fact it is possible to obtain more services for less money.

Fifth, the use of other core mental health providers would reduce the cost of hospital, medical and surgical costs while stimulating worker productivity and increased profits in private industry. A pilot program conducted by a clinical social worker at a Kennecott Copper plant in Salt Lake City, Utah showed the cost-effectiveness of an onsite, outpatient mental health program. Over a 1-year period, the employees involved showed a significant reduction in absenteeism-from 5.8 working days per month to 2.93 days, a drop of 40.5 percent-and in hospital, medical and surgical costs-from \$109.04 per person per month to \$56.91 per person per month, a reductioin of 48.7 percent. Over the same period the control group-those not involved in the outpatient mental health program-showed a 2-percent increase in absenteeism and a 7.7-percent increase in hospital, medical, and surgical costs. Consequently, we as a nation can actually reduce the overall costs of our mental health programs while expanding the scope of mental health services and fully utilizing other core mental health specialists.

The existing mental health delivery system includes four core professional groups, but medicare and medicaid does not recognize these contributions because it only directly reimburses physicians. Ironically, it reimburses the least available, the most expensive, and the smallest group of mental health specialists. We as a nation must take advantage of the mental health

services provided by clinical social workers, clinical psychologists, and psychiatric nurse specialists. We cannot continue to neglect these fundamental human resources within our communities across the country. The time has come to directly reimburse these other mental health specialists for their services under medicare and medicaid.

For much too long, mental health programs in general have been relegated to second-class status and the contributions of clinical social workers, clinical psychologists, and psychiatric nurse specialists have been ignored and forgotten. The general public has not known or understood the complex mental and emotional problems experienced by millions of Americans nor appreciated the services provided by mental health specialists.

We must now remove these inequities in the law by amending the existing medicare and medicaid programs. I respectfully urge my colleagues in the House to join me in cosponsoring H.R. 3373 and supporting its passage in the 97th Congress. A copy of the bill is reprinted as follows:

H.R. 3373

A bill to amend titles XVIII and XIX of the Social Security Act to provide more adequate coverage of the services of mental health specialists under the medicare supplemental benefits program and under medicaid programs.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the first sentence of section 1861(r) of the Social Security Act is amended by inserting, immediately before the period at the end thereof, the following: ", or (6) except for the purposes of section 1814(a) other than (a)(2)(A), section 1835 except (a)(2) and (b)(1), and subsections (j), (k), (m), and (o) of this section, a mental health specialist, but (unless clause (1) of this subsection also applies to him) only with respect to functions which he is legally authorized to perform as such in the State in which he performs them".

(b) Section 1861 of such Act is further amended by adding at the end thereof the following new subsection:

"Mental Health Specialist

"(bb)(1) The term 'mental health specialist' means an individual who is a clinical psychologist (as defined in paragraph (2)), a clinical social worker (as defined in paragraph (3)), a psychiatric nurse specialist (as defined in paragraph (4)), or a psychiatrist (as defined in paragraph (5)).

"(2) The term 'clinical psychologist' means an individual who (A) is licensed or certified at the independent practice level of psychology by the State in which he so practices, (B) possesses a doctorate degree in psychology from a regionally accredited educational institution, or for those individuals who were licensed or certified prior to January 1, 1978, possess a master's degree in psychology and are listed in a national register of mental health service providers in psychology which the Secretary of the Department of Health and Human Services deems appropriate, and (C) possesses two years of supervised experience in health

service, at least one year of which is postde-

"(3) The term 'clinical social worker' means an individual who (A) possesses a master's or doctor's degree in social work, (B) after obtaining such degree has performed at least two years of supervised clinical social work, and (C) is licensed or certified as such in the State in which he practices, or if such State does not license or certify clinical social workers, is listed in a national register of social workers who, by education and experience, qualify as health care providers in clinical social work.

"(4) The term 'psychiatric nurse specialist' means an individual who (A) is licensed to practice nursing by the State in which the individual practices nursing, (B) possesses a master's degree or higher degree in psychiatric nursing or a related field from an accredited educational institution, and (C) is certified as a psychiatric nurse by a duly recognized national professional nurse organization.

"(5) The term 'psychiatrist' means a physician who (A) is described in clause (1) of section 1861(r), and (B) is board certified by the American Board of Psychiatry and Neurology or has successfully completed a minimum of three years of approved graduate medical training in psychiatry.".

(c) Section 1833(c) of such Act is amended by striking out all that follows "purposes of subsections (a) and (b)" and inserting in lieu

thereof "no more than \$1,000"

(d) The amendments made by subsections (a) and (b) of this section shall be effective in the case of services furnished after the date of enactment of this Act, and the amendment made by subsection (c) shall be applicable in the case of services furnished in any calendar year after calendar year 1980.

SEC. 2. (a) Section 1905(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (16).

(2) by redesignating paragraph (17) as paragraph (18), and

(3) by inserting immediately after paragraph (16) the following new paragraph: "(17) services of a mental health specialist

(as defined in section 1861(bb)); and".

(b) Section 1902(a)(13)(C)(ii) of such Act is amended by striking out "numbered (1) through (16)" and inserting in lieu thereof "numbered (1) through (17)".

LEGISLATION TO AMEND EXCISE TAX ON TRUCK PARTS

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. BRODHEAD. Mr. Speaker, today, I and my colleague, Mr. Vander Jagt of Michigan, are introducing legislation to amend the manufacturers excise tax on truck parts and accessories. This legislation is necessary to help remove competitive disadvantages within the industry that have been caused by the current structure of the excise tax, and to alleviate the heavy burden of complying with certain complicated provisions of the law which yield very little revenue to the Federal Government.

The legislation has three main provisions. First, it repeals the excise tax on light-duty truck parts. The vast majority of these parts are already exempt from taxation under the current law. The costs to the industry of keeping track of the remaining few, which are used as replacement parts, are very high. The tax is also easy to avoid, and is often not paid, a fact which puts careful, honest manufacturers at a competitive disadvantage as compared with those who do not monitor carefully which of their parts are taxable and which not. Because of concerns that the outright repeal of the tax on light-duty truck parts might lead to certain parts for heavier trucks escaping taxation, I considered including special authority for the Secretary of the Treasury to promulgate lists of parts considered taxable under the statute. However, I became convinced that this authority already exists under section 7805 of the Internal Revenue Code, and we anticipate that it will be exercised.

Second, the bill corrects an unfair situation created by the current law, in which manufacturers of truck bodies or chassis who combine a body or chassis with one or more of a specified list of parts or accessories must pay a tax of 10 percent on the entire unit, while a nonmanufacturer who performs the same operation is liable for only an 8 percent tax on the part or accessory. There is no good reason for this discriminatory tax treatment, which creates an arbitrary disadvantage for manufacturers of bodies and chassis.

Last, the bill expands the list of items which are not subject to the 10percent tax merely by reason of the combination. The tax status of one of these proposed additions to the listthe mere lengthening or shortening of a truck body or chassis-has been a subject of considerable litigation and of confusion within the industry. The amendment would end the confusion as to what constitutes a taxable operation. The second addition-a lift axle-is considered within the industry to be an accessory, rather than further manufacture, as it is presently treated. In addition, the tax is often not collected on the addition of a lift axle, since this operation is often carried out after title to the truck transfers to the ultimate purchaser, and he, rather than the person hired to do the work, is responsible for paying the tax. In many cases, the customer is unaware of his liability for the tax and it goes uncollected. Thus, little revenue loss would result from bringing the tax into conformance with industry practice, and a burden on those parts distributors who install a lift axle before the ultimate sale of the truck would be lifted.

It is my view that these changes would be of great help to an already distressed industry, yet would have such a small revenue effect that they would not preempt ongoing efforts to develop a comprehensive solution to the financing of the Highway Trust Fund. I hope that my colleagues will lend their support to this measure.

H.R. 3789: THE FREE MARKET GOLD COINAGE ACT-FREE-DOM OF CHOICE IN CURRENCY

HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

. Mr. DANIEL B. CRANE. Mr. Speaker, the fundamental principal of our economy and perhaps of our entire society is the right to freely choosefreedom of choice in the marketplace. We who sit in Congress have been so honored because our fellow citizens exercised their right to freely choose their representatives. As our pledge to the Constitution makes clear, we have the responsibility to uphold this most basic of rights for all citizens.

While we endorse the peoples' right to choose in the marketplace, however, we deny them what many believe to be the most fundamental choice of all. That is the freedom of choice in

currency.

Many people in our country want the economy to be based on the gold standard. They argue that gold is sound money and that it would be anti-inflationary. President Reagan has reportedly said that no nation that cut its ties to gold has survived. Others, though, don't believe that a gold standard would be an asset to our economy. They point to many potential problems, such as the availability of supply and the difficulty in fixing the price.

Mr. Speaker, I think that the only solution consistent with the ideas of free society is to let those who wish to commerce in gold be free to do so. That is why I have introduced H.R. 3789, the Free Market Gold Coinage Act. It calls for the establishment of gold coins as an alternative lawful tender without abandoning the dollar and without fixing the price of gold. It thus overcomes the primary objection of those opposed to gold coins while permitting freedom of choice to all concerned—those who want a gold

standard and those who do not.

Naturally, there have been many questions about my proposal. In order to address the most often asked questions, and to introduce the idea to my colleagues who have not had an opportunity to study it, I am hereby publishing the text of H.R. 3789, followed by some of the most common ques-tions. I hope my colleagues will seri-

ously consider supporting this measure, as it brings to our currency what is cherished in the rest of the economy: freedom of choice.

H.R. 3789

A bill to provide for the minting of United States gold coins

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the Free Market Gold Coinage Act".

POLICY OF THE UNITED STATES

SEC. 2. (a) It shall be the policy of the United States to promote the free coinage

of gold at a free market price.

(b) Nothing in this Act shall be construed to prohibit or to discourage the manufacture or circulation of gold coins by persons, organizations, or agencies of the several States, nor to restrict the free importation or exportation of gold coins for either monetary or nonmonetary purposes.

PUBLIC COINAGE

Sec. 3. (a)(1) The Secretary of the Treasury shall offer the gold bullion reserves of the United States for sale to the public, except that such sales shall only be in the form of gold coins which are minted in accordance with the provisions of this Act.

(2) All such gold coins shall be minted from .900 fine gold of a standard coin alloy which shall be determined by the Secretary.

(3) The weight of each such gold coin, as specified in subsection (b)(1)(A), refers only to the gold content of such gold coin and not to the weight of the standard coin alloy involved.

(b)(1)(A) The Secretary shall mint-

(i) gold coins which weigh 1 troy ounce (31.103 grams):

(ii) gold coins which weigh 1 ounce (28.349

(iii) gold coins which weigh 10 grams (154.321 grains); and

(iv) gold coins which weigh 5 grams (77.161 grains).

(B) Not less than half, as measured by weight, of all such gold coins minted and sold under this Act shall be of the weight specified in clauses (iii) and (iv) of subparagraph (A). After conducting public hearings, the Secretary shall determine the proportion of gold coins described in clauses (i) and (ii) of subparagraph (A) which shall be minted under this Act.

(2) One side of each gold coin described in paragraph (1)(A)(i) shall bear the likeness of John F. Kennedy in left-profile, and inscription of the year in which such gold coin is minted, the inscriptions "Liberty" and "In God We Trust", and an appropriate mint mark which shall be determined by the Secretary. On the other side of each such gold coin, the inscriptions "E Pluribus Unum" and "United States of America" shall surround the inscription "One Troy Ounce Gold" which shall be not less than one-half of the diameter of such gold coin in both height and width.

(3) One side of each gold coin described in paragraph (1)(A)(ii) shall bear the likeness of Abraham Lincoln in right-profile, an inscription of the year in which such gold coin is minted, the inscriptions "Liberty" and "In God We Trust", and an appropriate mint mark which shall be determined by the Secretary. On the other side of each such gold coin, the inscriptions "E Pluribus Unum" and "United States of America" shall surround the inscription "One Ounce Gold"

which shall be not less than one-half of the diameter of such gold coin in both height and width.

(4) One side of each gold coin described in paragraph (1)(A)(iii) shall bear the likeness of Thomas Jefferson in left-profile, an incription of the year in which such gold coin is minted, the inscriptions "Liberty" and "In God We Trust", and an appropriate mint mark which shall be determined by the Secretary. On the other side of each such gold coin, the inscriptions "E Pluribus Unum" "United States of America" shall subject to the following sentence, surround the inscription "10" which shall be less than one-half of the diameter of such gold coin in both height and width. Immediately below the inscription "10" shall be the inscription Gold Grams"

(5) One side of each gold coin described in paragraph (1)(A)(iv) shall bear the likeness of Adam Smith in right-profile, an inscription of the year in which such gold coin is minted, the inscriptions "Liberty", "In God We Trust", and "Adam Smith", and an appropriate mint mark which shall be determined by the Secretary. On the other side of each such gold coin, the inscriptions "E Pluribus Unum" and "United States of America" shall, subject to the following sentence, surround the inscription "5" which shall be not less than one-half of the diameter of such gold coin in both height and width. Immediately below the inscription "5" shall be the inscription "Gold Grams".

(c) The edges of all gold coins minted pursuant to this section shall be milled in a manner which will discourage shaving of the edges of such gold coins.

(d) No seigniorage shall be charged by the Secretary for any gold coin minted under this Act, except that the Secretary shall charge a production fee whenever a gold coin which is minted by the Secretary under this Act is sold by the Secretary for the first time or is offered by the Secretary for the first time in an exchange under section 5(a) for gold bullion or gold coins which contain less than .900 fine gold.

(e) Gold coins may be minted by any State or local government or by any person, whether or not such person mints such coins in the United States, except that such gold coins shall not bear the inscription

United States of America" FREE MARKET PRICE OF GOLD

SEC. 4. (a)(1) In accordance with regulations which shall be prescribed by the Secretary, the Secretary shall establish a formula for determining on an hourly basis the competitive market price of gold.

(2) The Secretary shall collect information on gold sales from the organized gold exchanges in London, England, Hong Kong, New York, New York, Chicago, Illinois, San Francisco, California, and the standard metropolitan statistical area in which Los Angeles, California, is located. The Secretary shall use such information together with such formula to determine the competitive market price of gold.

(3) In using such information with such formula, the weight given to the information received from any such gold exchange shall be equal to the ratio, expressed as a percentage, which the total amount of gold sold on such exchange during the period involved bears to the total amount of gold sold on all such gold exchanges during such

period.

(b) The competitive market price of gold as determined under this section shall be the conversion rate between dollars and

gold (hereinafter in this Act referred to as the "Official Conversion Rate").

PURCHASES AND SALES OF GOLD

SEC. 5. (a) The Secretary shall exchange gold bullion or gold coin from any source for its equivalent weight in gold coins minted under this Act. The production fee shall be waived if the gold bullion or gold coin offered for exchange contains not less than .900 fine gold. At the election of the person offering such gold bullion or gold coin to the Secretary, any difference in units of weight shall be paid in dollars at the Official Conversion Rate.

(b) All purchases and sales of gold by the Secretary shall be made at the Official Conversion Rate prevailing at the time of entering into the agreement to buy or sell gold even if the delivery of such gold does not occur at the time of entering into such

agreement.

(c) Neither the United States nor any State-

(1) shall impose an excise or transaction tax upon the use of gold or upon banking services that involve the promise to pay with gold; or

(2) shall restrict the convenient transfer of any ownership or equity interest in gold, such as checking or savings accounts, or certificates of deposit or promissory notes

stated in terms of gold.

(d) If any party to a legal action before any court or administrative agency of the United States or of any State or territory within the jurisdiction of the United States elects to pay or receive any judgment, award, or penalty in gold, the rate of conversion of gold into dollars or dollars into gold shall be the rate that prevailed at the time that the claim or cause of action acpublic record at such time shall be conclusive evidence of such rate.

PROMOTION OF GOLD COINS

SEC. 6. The Secretary shall take all appropriate actions to encourage the public to recognize and use the gold coins minted under this Act.

REGULATIONS

SEC. 7. Not later than six months after the date of the enactment of this Act, the Secretary shall promulgate such regulations and take such other actions as are necessary to carry out the provisions of this Act.

DEFINITIONS

Sec. 8. For purposes of this Act-

(1) the term "production fee" means a fee equal to the cost of minting and selling a gold coin, including labor, materials, dies, use of machinery, overhead expenses, and the current market value of any metal, other than gold, contained in such gold coin; and

(2) the term "Secretary" means the Secretary of the Treasury".

The "Free Market Gold Coinage Act" does four important things:

1. It creates a new official gold coinage (Section 3).

2. It prevents the U.S. Treasury from manipulating the free market price of gold (Section 4).

3. It requires the U.S. Treasury to buy and sell gold coins at a free market price (Sec-

tion 5, parts a & b).

4. It guarantees that citizens can use the gold coins for all kinds of business and legal purposes, and the courts will enforce their right to choose gold instead of paper dollars (Section 5, parts c & d).

This bill is a major challenge to the monopoly power of the Federal Reserve System over the United States currency. Since the Fed has abused its monopoly power and caused inflation, it is time to give Americans the freedom of choice to avoid future inflation by using gold coins.

ANSWERS TO SOME OF YOUR QUESTIONS

Why should the United States have a gold standard?

Throughout history, gold coins have been recognized as "honest money." When President Roosevelt forced Americans to surrender their gold coins in 1933, he set the stage for the Great Inflation of the 1970s.

If Americans had enjoyed the freedom of

choice to use gold coins in business and for the protection of their savings, the terrible inflation would not have occurred. A gold coinage is necessary to give Americans back their Constitutional rights to honest money.

Why doesn't the bill include a Gold Dollar coin, as well as coins denominated in

ounces and grams?

The idea of a gold coinage requires each coin to be a clear and accurate weight of gold. A "dollar" is not a unit of weight. The origin of the dollar goes back to a large, high-quality silver coin that circulated in the Thirteen Colonies at the time of the American Revolution. Because there was no international system of weights and measures in 1776, the United States just adopted the most common coin and made it the standard unit. In our modern gold coinage proposal, we need to use the same units of weight that the National Bureau of Standards specifies for everything else in business and world trade.

Also, if you think about it—"a gold dollar

coin" would be a coin with a fixed price, and it would not circulate as money. An old eco-nomic rule known as "Gresham's Law" would drive all of the "gold dollar coins" out

of circulation.

Why should there be coins in both ounces and grams, instead of just ounces and half,

quarter, and tenths of ounces?
Since the new coinage is denominated in units of weight, it is important to have representative units from each of the common systems of measurement. Since even the smallest gold coin would be too expensive for use as pocket change, it is more impor-tant to have full-sized units instead of fractional units.

The fundamental principle of the new gold coinage is the freedom of choice for individuals-yet some people want ounces and others prefer grams. The Free Market Gold Coinage Act gives everybody freedom of choice to weigh their gold coins in any manner they choose. People who prefer a decimal coinage will want grams, and people who prefer a traditional coinage will want

Does the "Free Market Gold Coinage Act" fix the price of gold or make the dollar convertible into gold at a fixed price?

No, that would cause financial problems for American business. The main problem with the classical gold standard, like the one in the 19th century, was the fixed price of gold. Price-fixing always causes problems in a free market economy.

Under the 19th century gold standard, there were often bank failures and business cycles. This modern proposal for freedom of choice to use gold if you-individually want to, will not cause any financial problems for business.

Why does the "Free Market Gold Coinage Act" say that private corporations and agencies of State governments can mint gold coins?

The free market is the best way to determine how many gold coins should be in cir-culation. If the U.S. Treasury had a monopoly over the gold coins, then there might be too many or too few coins in circulation. By permitting anyone to mint honest-weight coins, we can guarantee that there will be no problems with the supply of coins. No U.S. mark, though, would appear on the private coins.

The four coins that H.R. 3789 calls for are not the only coins that can be minted, either. As long as the weight of a coin is clearly stamped on the back of the coin, you could put anybody's picture on the face of it. This is an important part of "freedom of choice in currency" too.

How will the "Free Market Gold Coinage

Act" take away the monopoly of the Federal

Reserve System?

A monopoly is defined as a "single seller" of a product. The product in this case is money, and all current U.S. money is Federal Reserve Notes. If anybody can manufacture and issue gold coins, then there is no longer a monopoly.

Just as important, but slightly more technical, is that the cause of inflation has been too much money in circulation. As long as there is only one kind of money, due to the monopoly, people in business are not able to tell the new, excessive money from the older money they may have received the previous year. If they could tell the difference, they might recognize that the new money is worth less than the old money.

Under the "Free Market Gold Coinage Act," prices of goods and services quoted in terms of gold coins will be much more stable and predictable than prices quoted in terms of dollars. When the prices in terms of dollars increase, it will be clear that the Federal Reserve is making mistakes in its monetary policy. That is an important aspect, also, of eliminating its monopoly.

Would the oil-producing nations of the Middle East, or the gold-producing nations, like the Soviet Union and South Africa, be able to manipulate the price of gold?

No, because the Secretary of the Treasury would gather his information about the price of gold hourly from gold markets as widely separated as London, New York, Chicago, Los Angeles, and Hong Kong. Nobody could possibly manipulate all those markets. The Soviets and South Africa don't produce enough gold each year to cause its price to change. The beauty about gold as money is that most of the gold mined since the days of Adam and Eve still exists. Gold does not rust or corrode. The people who have caused the price of gold to jump up and down so violently in recent years are governments and central banks. Under the "Free Market Gold Coinage Act" no country or group or individuals could possibly manipulate the price of gold.

If people had the right under the "Free Market Gold Coinage Act" to use both gold coins and paper dollars in business, wouldn't that cause confusion?

People are never confused about real economic values, only about technical or legal things. If the contracts or financial papers are confusing today, individuals ask for the advice of experts. The experts would have no trouble with this proposal to use gold, and we think that the average person would have no trouble either.

Since the value of the smallest gold coin would still be relatively high, at today's price of gold, the coins would not be very common at the grocery store. People would still prefer folding money to carry in their

pockets, but for their savings or for larger purchases, they should have the right to use gold.

Can you provide the names and addresses of other places for information on the gold standard?

The following are non-profit, tax-exempt sources of reliable information about gold

and money:
Committee for Monetary Research and Education, Postal Box 1630, Greenwich, Connecticut 06830.

U.S. Choice in Currency Commission, 325 Pennsylvania Avenue, SE., Washington, D.C. 20003.

Foundation for Rational Economics and Education, Postal Box 1776, Lake Jackson, Texas 77566.

FEDERAL HIGHWAY PROGRAM

HON. DONALD JOSEPH ALBOSTA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

Mr. ALBOSTA. Mr. Speaker, the House of Representatives has today taken a major step forward in approving H.R. 4209, a bill making appropriations for the Department of Transportation in fiscal year 1982. This important bill obligates \$8.2 billion for the Federal highway program covers interstate, primary, and secondary roads as well as Federal bridges. Without an effective highway system, farmers are unable to move goods to market efficiently, business cannot ship products as cheaply, thereby holding down the cost to consumers, and finally people cannot travel as easily around this great country

As a member of the Public Works and Transportation Committee, I strongly support the Federal highway program that has evolved during the past 30 years. We need to improve upon the present system and make sure it does not deteriorate through inadequate funding. I also want to pay tribute to America's roadbuilders who have worked so effectively with the Federal Highway Administration and the State departments of transportation around the country to build and maintain our Interstate Highway

System.

Today's vote in support of H.R. 4209 will help provide the funds necessary to continue this program in fiscal year 1982. We must continue to support the highway program as we rebuild the American economy in the 1980's.

THE FARMWORKER BILL OF RIGHTS ACT

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

 Mrs. CHISHOLM. Mr. Speaker, today I am introducing the Farmworker Bill of Rights Act. Despite countless volumes of testimony, hundreds of existing statutes and regulations, frequent media exposes, and occasional public outcries, migrant farmworkers remain the most exploited and impoverished group of workers in America. My proposed legislation, if enacted by the Congress, could finally put an end to conditions that have been correctly labeled a "Harvest of Shame."

At the heart of the Farmworker Bill of Rights Act is the opportunity for individual consumers, through his or her own purchases, to support decent living and working conditions for migrant farmworkers. Once a farmworker bill of rights is prepared by the seven-member Commission created by this legislation, agricultural products for sale in our stores would begin displaying labels indicating that the items were produced by employees covered by the farmworker bill of rights. Under a purely voluntary system that creates no enforcement bureaucracy or regulatory maze, agricultural employers could seek permission of the Commission to label their products, and consumers could check for the label on the goods they buy. Through this free enterprise approach, market forces would provide the incentive for eliminating the shameful exploitation of America's migrant farmworkers.

The Congress, and several State legislatures, have attempted over the years to address this issue. Unfortunately, the laws have been weak, and their enforcement has been weaker. My bill seeks to provide a comprehensive solution that covers all areas of farmworker needs by mandating that the Farmworker Bill of Rights include provisions on labor, health and safety, education, housing, and access to Government programs.

A few grim facts point out the persistent needs in all these areas:

Most farmworkers are denied the right to join unions or bargain collectively for wages and benefits;

The average family income for migrants is under \$4,000 per year, more than three-fourths live under the official poverty level, and few earn the minimum wage:

Farm labor is the third most dangerous occupation in the country, and health problems are compounded by unsanitary conditions and exposure to hazardous chemicals;

Seventy-eight percent of migrant children never complete high school, and schooling is frequently interrupted as families travel from State to State:

Migrant farmworkers often stay in isolated labor camps lacking clean water, sewer systems, paved streets, and adequate living space; and

The average life expectancy for migrants is just 49 years.

The 1960 documentary, "Harvest of Shame," was recently rebroadcast on

television. Not only was it shocking to be exposed to the plight of migrants some 20 years ago, it was also frustrating and depressing to know that there has been little change or improvement since the film's 1960 Thanksgiving Day airing.

A new generation of excluded Americans still toils in the sweatshops of the soil. They still live as primitive as man can live. They still exist as rented slaves who suffer from bad housing, flies, mosquitoes, dirty beds, dirty toilets, and no hot water for bathing. They still travel thousands of miles each year to work, but still food and cattle travel better. They are still trapped in the stream in an updated version of John Steinbeck's "Grapes of Wrath," and they have nobody in Congress to really represent them.

A recent series of articles by Ward Sinclair in the Washington Post is yet another illustration of our lack of progress. His focus on the "Migrants of the East" portrays the poverty, hunger, illness, ignorance, and exploitation suffered by migrants working just a few hours away on the farms of Maryland's Eastern Shore. We are reminded that it is a life of uncertainty and peril for the thousands of migrants that arrive for the harvest.

Nearly 5 million people in this Nation work to produce the food we consume. Of the 1 million who are migrant farmworkers, over half are Hispanics, a third are black, 100,000 are Native Americans, and the remainder are white. These people, these families, deserve better treatment for the invaluable labor they perform. They deserve decent incomes, decent education, decent health care, and decent living conditions.

They deserve protection by a farmworker bill of rights that will be enforced by the American public which uses what migrant labor produces.

Mr. Speaker, my conscience will no longer allow me to wait patiently for improvement, when no improvement is discernable. It is time for a U.S. Commission on Farmworkers to be established, and time for it to get to work on the drafting and implementing of a farmworker bill of rights. For the sake of the migrants, and for the sake of the conscience of America, I hope the bill is considered and enacted before another "Harvest of Shame" has begun.

Following is the complete text of the Farmworker Bill of Rights Act:

A bill to establish the United States Commission on Farmworkers, to authorize such Commission to draft a Farmworker Bill of Rights, to provide for the labeling of agricultural products to inform con-sumers that the products were produced in conformity with such Bill of Rights, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Farmworker Bill of Rights Act".

ESTABLISHMENT OF COMMISSION ON FARMWORKERS

SEC. 2. There is established a commission to be known as the United States Commission on Farmworkers (hereinafter in this Act referred to as the "Commission").

DUTIES OF COMMISSION

SEC. 3. The duties of the Commission are as follows:

- (1) Prepare a Farmworker Bill of Rights establishing minimum standards for the protection of farmworkers which shall take effect unless disapproved by the Congress pursuant to section 7(a) of this Act. Any standard established pursuant to this paragraph shall incorporate, and not diminish, any requirement of existing law concerned with the subject matter of such standard. The Farmworker Bill of Rights shall cover at least the following issues with respect to farmworkers:
 - (A) Labor Rights.

(i) Collective bargaining and negotiation for wages.

- (ii) Workers compensation.
- (iii) Unemployment insurance. (iv) Social Security coverage.
- (v) Minimum wage protection. (vi) Pensions and retirement pay.
- (vii) Overtime pay.
- (viii) Preference over temporary foreign
- (B) Health and Safety Rights. (i) Protection from exposure to pesticides.
- (ii) Health insurance.
- (iii) Safe equipment and machinery.
- (iv) Drinking and washing water in the field.
- (v) Toilet facilities in the field.

(C) Housing Rights.

- (i) On-farm housing which, when occupied, continuously exceeds any applicable minimun standards set by the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) or regulations issued under the authority of such Act.
- (ii) Access to housing camps on farms by visitors of farmworkers during non-working hours

(D) Education Rights.

- (i) School attendance for all children of compulsory school age which is equivalent, in hours per year, to school attendance of children in nonmigrant farmworker fami-
- (ii) Adult and high school equivalency education.
- (iii) Preschool programs for children of ages 3 to 6.
- (iv) Day care for children up to 6 years of age
 - (E) Government Program Access Rights.
- (i) Accessibility to programs provided by Federal, State, and local governments.
- (ii) Abolition of or limitations on restrictive residency requirements as applied to farmworkers.

(2) Devise labels to be attached to domestically produced agricultural products to indicate to retail consumers that the agricultural product was (A) produced using farmworkers covered and protected by the Farm-worker Bill of Rights, or (B) not produced using the labor of farmworkers.

(3) Establish a procedure enabling growers and producers of agricultural products who employ farmworkers to apply for and receive (A) certification by the Commission that such farmworkers are employed under conditions which meet the minimum standards set by the Farmworkers Bill of Rights. and (B) the right to use the labels described

in paragraph (2)(A).

(4) Establish a procedure enabling growers and producers of agricultural products who do not employ farmworkers covered under the Farmworker Bill of Rights to apply for and receive (A) certification by the Commission that no such farmworkers are employed by the applicant, and (B) the right to use the labels described in paragraph (2)(B).

(5) Establish procedures for obtaining such assistance as is necessary to enable the Commission to administer the certification program and to monitor certified growers and producers for continued compliance with the Farmworkers Bill of Rights from Federal departments and agencies which implement the various Federal laws which concern farmworkers, including the Department of Agriculture, the Department of Labor, the Occupational Safety and Health Administration, the Department of Health and Human Services, the Community Services Administration, and the Environmental Protection Agency.

(6) Serve as a national clearinghouse for information on Federal, State, and local laws and regulations which concern farmworkers, and investigate and provide information on the status of compliance, nationwide, with the provisions of the Farmwork-

ers Bill of Rights.

(7) Establish a procedure for periodic review of the laws, regulations, and policies of the Federal government that pertain to farmworkers to determine the effectiveness and the degree of implementation of such laws and policies.

(8) Make recommendations for improvements in Federal programs relating to farmworkers and better coordination between Federal departments and agencies adminis-

tering such programs.

(9) Develop a reasonable standard definition of "farmworker".

MEMBERSHIP

Sec. 4. (a) NUMBER AND APPOINTMENT.-The Commission shall be composed of seven members, appointed by the President and with the advice and consent of the Senate, from persons who are not officers or employees of any government. One individ-ual shall be appointed from among persons who are agricultural producers or representatives of a growers organization and one person shall be appointed from among persons who are specially qualified in one of each of the following fields by virtue of their education, training, or experience:

(1) Labor.

- (2) Health and occupational safety.
- (3) Housing.
- (4) Education.
- (5) Public administration.

(b) TERMS.-(1) Except as provided in paragraph (2), members shall be appointed for unstaggered terms of five years.
(2) Any member appointed to fill a vacan-

cy occurring before the expiration of the

term for which his predecessor was appointed shall be appointed only for the remainder of such term. A member may serve after the expiration of his term until his successor has taken office.

(c) Basic Pay.-Members of the Commission shall each be paid at a rate not to exceed the rate of basic pay payable for level III of the Executive Schedule.

(d) QUORUM.-Four members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(e) CHAIRMAN.—The Chairman and Vice Chairman of the Commission shall be designated by the President. The Chairman and Vice Chairman shall not be of the same political party.

STAFF OF COMMISSION

Sec. 5. (a) DIRECTOR.—The Commission shall have a Director who shall be appointed by a majority of the Commission.

(b) STAFF.—Subject to such rules as may be prescribed by the Commission, the Director may appoint such personnel as the Commission considers appropriate.

(c) APPLICABILITY OF CERTAIN CIVIL SERV-ICE LAWS.-(1) The Director and staff of the Commission may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service.

(2) The Director and staff shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, United States Code, relating to classification and General Schedule pay rates.

(d) EXPERTS AND CONSULTANTS.—Subject to such rules as may be prescribed by the Commission, the Chairman may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum rate of basic pay payable for GS-18 of the General Schedule.

POWERS OF COMMISSION

SEC. 6. (a) HEARINGS AND SESSIONS.-The Commission may, for the purpose of carrying out this Act, hold such hearings, sit and act at such times and places, take such testimony and receive such evidence, as the Commission considers appropriate.

(b) Powers of Members and Agents.-Any member or agent of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take.

(c) OBTAINING OFFICIAL DATA.-The Commission may secure directly from any department or agency of the United States information necessary to enable it to carry out this Act. Upon request of the Chairman or Vice Chairman, the head of such department or agency shall furnish such information to the Commission.

(d) Mails.-The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(e) ADMINISTRATIVE SUPPORT SERVICES. The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(f) Subpena Power.—(1) The Commission may issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence that relates to any matter under investigation by the Commission. Such attendance of witnesses and the production of such evidence may be required from any place within the United

States at any designated place of hearing

within the United States.

(2) If a person issued a subpena under paragraph (1) refuses to obey such subpena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judical district within which such person is found or resides or transacts business may (upon application by the Commission) order such person to appear before the Commission to produce evidence or to give testimony relating to the matter under investigation. Any failure to obey such order of the court may be punished by such court as a contempt thereof.

(3) The subpenas of the Commission shall be served in the manner provided for subpenas issued by a district court of the United States under the Federal Rules of Civil Procedure for the district courts of the United

States.

(4) All process of any court to which application may be made under this section may be served in the judicial district in which the person required to be served resides or

may be found.

IMMUNITY.-No person shall be excused from attending and testifying or from producing books, records, correspondence, documents, or other evidence in obedience to a subpena, on the ground that the testimony or evidence required of him may tend to incriminate him or subject him to a penalty or forfeiture; but no individual shall be prosecuted or subjected to any penalty or forfeiture by reason of any transaction, matter, or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

REPORT

SEC. 7. (a) FARMWORKER BILL OF RIGHTS.—
(1) The Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives the report containing the proposed Farmworker Bill of Rights prepared pursuant to the first paragraph of section 3 of this Act by the end of the one year period beginning on the date

the Commission is duly organized.

(2) The proposed Farmworker Bill of Rights described in paragraph (1) shall not take effect if within the ninety calendar days of continuous session of the Congress which occur after the date of receipt of the report described in paragraph (1) by the Secretary of the Senate and the Clerk of the House of Representatives, both Houses of the Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows (with the blank space appropriately filled): "That the Congress disapproves the Farmworker Bill of Rights which was promulgated under the Farmworkers Act by the United States Commission on Farmworkers and which was transmitted to the Congress on ."

(3) For purposes of this subsection—
(A) continuity of session is broken only by an adjournment of the Congress sine die;

(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the periods of continuous session of the Congress speci-

fied in paragraph (2).

(b) Legislative Recommendations.—The Commission shall transmit to the President

and to each House of the Congress a report

containing such recommendations for legislative action as it considers appropriate not later than February 1 of each year.

(c) Administrative Recommendations.— The Commission shall transmit to the President a report containing its recommendations for administrative actions whenever the Commission considers such action appropriate.

ROY WILKINS

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mrs. COLLINS of Illinois. Mr. Speaker, it is with great sadness and an acute sense of loss that I, along with millions of Americans, mourn the death of Roy Wilkins, well-known leader of the National Association for the Advancement of Colored People.

Black America has lost one of its most eminent leaders. Roy Wilkins dedicated more than 50 years of his life to the social, economic, and political betterment of his race. As a civil rights activist, his leadership of the NAACP was instrumental in the Supreme Court's school desegregation decision of 1954. He took his untiring efforts for racial equality and human rights to the streets as well as to the courts. As early as 1934, Roy Wilkins was marching for civil rights. As the years passed, his civil rights marches took him to such landmark cities as Selma and Montgomery, Ala., Jackson, Miss., and Memphis, Tenn.

Roy Wilkins' unselfish humanitarianism has for decades inspired all mankind. He has been praised and revered by people from all walks of life.

Indeed, Roy Wilkins will be sorely missed. We must pick up the torch he left behind and carry on.

GRATEFUL TRIBUTE TO BEN T. PLYMALE

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. KEMP. Mr. Speaker, on August 8, I lost a friend—and the United States lost a patriot. His name was Dr. Ben T. Plymale, a brilliant defense strategist and engineer. Ben's formidable talents were placed in service of the Nation on many occasions: From 1968-72, when he served as Deputy Director of Defense Research and Engineering, and most recently as second in command of the Defense transition team.

Ben's judgment in matters of national security was held in highest regard by his professional colleagues, bringing distinction to the Boeing Corp., which he served with singular dignity and loyalty for 30 years. But his

friends will remember him best for his forthright honesty; his knack for seeing the essence of any issue or individual, and stating his opinions without hesitation or equivocation; and the special touches of humor that could come only from him, reflecting both his sense of realism and the uncompromising principles by which he lived.

While critically ill from cancer and a failing heart, Ben devoted countless hours and bottomless energy to the campaign and transition work for Ronald Reagan. A leading candidate and my personal choice—for Undersecretary of Defense for Research and Engineering, Ben withdrew his name from consideration for the office because he feared that his poor health might impinge upon his ability to continue to serve in an official capacity. But his advancing illness did not detract from his unofficial, uncompensated service to the Nation, as he completed work on the alternative defense budget President Reagan commissioned his campaign task forces on defense to prepare, and he actively participated in internal debates over the future of U.S. strategic forces. With this, and much more, how can we begin to measure the contributions Ben has made to the security of our Nation?

I am proud to have known Ben Plymale, and to offer this tribute as a token of my gratitude for his advice and friendship and for the high service he rendered the United States.

At my request, just a week before his death, Ben prepared discussion papers on several key issues in the MX-ICBM debate. Now I believe it only fitting that I share this work with my colleagues, that the country might have the benefit of his counsel one more time:

ISSUE PAPERS BY DR. BEN T. PLYMALE

I. LAUNCH ON WARNING OF ICBM'S

"Launch on Warning" is being discussed as one of the possible options to ensure survivability of ICBM's against preemptive enemy arguments related to this option.

The Launch on Warning concept calls for launching our ICBM's following warning information to the effect that enemy missiles are actually on their way, and are aimed at our ICBM launch sites. In this sense, Launch on Warning (LOW) is not preemptive, since it will only take place upon reliable evidence that the enemy has actually fired its first strike.

On the pro side of the LOW issue, one must recognize that if our ICBM's are launched on warning, they will "survive", in the sense that they will destroy the intended targets (subject to the usual attrition factors due to reliability and penetration). It is also possible, although by no means proven, that the improvements in the warning and command and control systems which could make the Launch on Warning concept technically acceptable would result in somewhat lesser overall cost than looking to completely new systems to ensure survivability.

The arguments against the attractiveness of the LOW concept are many and interacting. For reasons of clarity, they are grouped here into four categories: Technical, Military, Policy and Cultural.

1. Technical

The LOW concept depends on sensors to detect that an attack is in progress, on communication links to relay the sensed information, on data processing equipment where sensed information is combined to gain increased confidence, and requires an override (or veto) function, to give the President or National Command Authority the option of circumventing automatic response.

Under many situations, many different types of sensors can be used to enhance strategic warning and increase system confidence. However, we must provide protection against a totally unexpected (surprise) attack or be vulnerable to its consequences. Only satellite sensors and early warning radars are useful in this context. In the LOW context, false alarms, due to equipment failures that report an attack are catastrophic in that they result in an unwarranted nuclear war, so a high degree of equipment redundancy is absolutely required. Failures that result in not reporting an attack when one is in progress are also catastrophic. When the attacker can cause such failure he is motivated to attack rather than be deterred. When these are not caused by the attacker, he may be deterred to some extent, but the survivability feature of LOW has, nonetheless, failed.

In any redundant systems, some form of "voting" mechanism is needed to reject or accept the inputs received from the sensors. While the sensors and communication networks can be made highly redundant, in the end the "voting" mechanism will be the weakest link in the confidence building chain. Within our ability to forecast and plan, the technology state of the art will not support a data processing mechanism with sufficient confidence to chance a nuclear war when one is not called for.

The LOW veto power given to the NCA is more cosmetic than real and may indeed be counterproductive as discussed below. If the NCA had any independent basis on which to execute a veto, such basis would be incompatible with the LOW mechanization to increase its reliability and confidence.

Even though the performance of the warning, command and control system can be tested to a certain degree in the field, the possible destruction by means of enemy attacks on key elements, or the possible degradation by means of enemy countermeasures cannot be accurately predicted or essentially precluded. This introduces a further element of uncertainty in the decision process implied in LOW approach to survivability.

2. Strategic

Our deterrent capability against the Soviet Union is further weakened by allowing the Soviet decision makers any room for doubt about the reliability of our retaliatory strikes. If it is possible for the Soviets to interfere with our warning, command and control systems even for the short time span required for the LOW to offer its alleged advantages, then such doubt becomes possible with possibly catastrophic consequences.

The short period preceding the irrevocable commitment of our missiles in the LOW mode precludes retargeting, i.e., changing the targeted aimpoints prior to launch. This, of course, deprives the ICBM force of

one of its most attractive attributes, flexibility coupled to accuracy.

Retention of a secure reserve force, capable of supporting our national objectives over long protracted periods of nuclear warfare, is considered as a paramount requirement of our strategic posture. To various degrees, the other elements of our strategic TRIAD exhibit deficiencies in regard to this essential characteristic of endurance. Making the ICBMs dependent on LOW for survival would in effect deprive this segment of the TRIAD from any degree of enduring survival.

3. Policy

Our policy is, and is expected to remain, to endure any conceivable attack on our strategic nuclear forces and to decide the appropriate response following careful assessment of our then apparent national interests and objectives. Under no circumstances should the President be faced with the dilemma of either losing significant fraction of all strategic nuclear forces, or launching them against a previously established target set which may not at that time be consistent with our national interest. If for instance our ICBMs are targeted in the 'counterforce" mode, they may be simply wasted on empty enemy launchers. If our LOW salvo is even partially aimed at Soviet urban/industrial targets, we may precipitate a Soviet retaliatory strike against our own cities. This could result in excess of 100 million U.S. fatalities, If the original attack was limited to our ICBM force and we survived the attack, assessed damage and limited our reponse to a counterforce attack we might well be able to terminate hostilities with as little as 10 million fatalities. An automatic LOW response almost guarantees the deaths of half or more of our popula-

The LOW concept implies that the President has the capability to effect a massive ICBM launch against Soviet targets by simply not exercising his veto power to stop and otherwise irrevocable LOW process. In effect then, the President can, by default, start a nuclear war on the basis of the (possibly automated) command and control decision process, overlaid by his personal judgment in regard to a matter of such momentous consequences. He may, if there is time, consult his personal advisers, but he is more likely to make the ultimate decision on the basis of his own deeply held standards, convictions and prejudices. The Cabinet may not be at hand on short notice; but consultation with Congress, as required by law in matters of exercising war powers, is certainly out of the question.

4. Cultural

Irrespective of the formally prescribed process for leasing nuclear weapons, the individual exercising the functions of the National Command Authority (NCA) faces a problem of unprecedented nature and magnitude when it comes to commit, or not to veto, the massive use of nuclear weapons. When the decision must be taken in a matter of minutes, when the views of the advisors are confused or conflicting, and when the outcome would result in certain death for tens of millions of human beings, it is almost certain that the NCA's decision will be against the launch of our weapons. This simple fact deeply rooted in our cultural background, is largely independent of the political persuasion of the individuals involved and cannot be changed by additional refinement in equipment or procedures. It is a massive argument against the alleged survivability afforded by the Launch on Warning concept.

II. BALLASTIC MISSILE DEFENSE OF ICBM'S Introduction

Solutions to the ICBM survivability question, with major emphasis on basing alternatives, have been studied by the past four administrations, examined in depth by innumerable expert panels and committees, and further reviewed extensively by the Congress. Alternative survivable ICBM deployments were analyzed based on proposals from basement inventors, universities, "think tanks", major defense contractors, and the Armed services.

As a result of this exhaustive public review and the ongoing R&D program, the MX MPS system advantages and disadvantages are well understood. However, an uneasiness still persists with respect to some perceived disadvantages of MX MPS basing—such as the environmental impact. This continuing uneasiness has led to a compulsion to discover a quick and easy answer.

An active defensive system or ABM is now a candidate to solve the ICBM survivability problem. But is the ABM technology ready and can the proposed ABM concept do the job? ABM systems have not been given serious consideration in recent years because of concern over (1) adequacy of ABM technology in the nuclear environment, (2) effectiveness against a reactive threat, (3) MPS shelter proliferation cost advantage over ABM total costs, and (4) ABM treaty constraints. LoAD's ability to improve MX survivability is doubtful

The LoAD system, proposed to defend MX MPS, may cause MX to fail catastrophically by contributing to compromise in Position Location Uncertainty (PLU) before an initial attack. LoAD also could cause MX to fail catastrophically if a low level "spoof" attack forces LoAD to reveal the MX location, even if pre-attack PLU is not compromised. LoAD was not designed to engage a responsive Soviet threat, which might include maneuvering RV's, anti-radiation homing RV's, jammers, decoys, or a myriad of other potential countermeasures.

The ability of ABM's to protect ICBM's launchers in known locations has not been proven adequately

An ICBM, in a silo of known location, will be subject to saturation attack, not only on itself, but also on any defensive system designed to protect it. The reason that no U.S. operational ABM system exists today is that no one has been able to show cost effectiveness and technological feasibility for such a system.

Abrogation or modification of the ABM Treaty will be done deliberately, not by default

There exists in Congress a significant number of members who look to SALT type treaties to guarantee a stable strategic balance with the Soviets. If the current ABM treaty is to be modified or abrogated, Congress will insist that such action be weighed and argued on its own "arms control" merits rather than backing into such a decision by committing ABM for the defense of our ICBM's.

Conclusion

At this point, it is premature to make a major commitment to ABM defense of ICBM's. However, ABM systems show sufficient promise to warrant aggressive R&D, within the confines of the existing treaty, to resolve the critical technical questions while

the larger national security issues related to ABM undergo the test of public debate.

III. AIR LAUNCHED MX IN THE CONTINUOUS AIRBORNE ALERT BASING MODE ("BIG BIRD")

1. The continuous airborne alert basing mode for the air launched MX does not satisfy the major mission requirements

The continuous airborne alert basing concept calls for deployment areas over the oceans. Such deployment is, to a considerable extent, vulnerable to surprise attack. The Soviets are in position to develop specifically tailored "reactive threats," including surveillance and weapon delivery, which could, in a time frame well within our plan-ning horizon, preempt the MX force. Typical surveillance systems might be based on land or ship-based over-the-horizon (OTH) radars or satellite radars; weapons could be delivered by long-range strike aircraft equipped with terminally guided air-to-air semi-ballistic or cruise missiles.

The potential Soviet threat to the MX

carrier aircraft over international waters does not require the use of nuclear weapons to be effective. Individually targeted air-toair or surface-to-air interceptor missiles have at present operationally demonstrated short miss distances which result in very high aircraft kill probabilities while using conventional warheads. The potential for attrition and even preemption is a destabilizing factor in the strategic balance.

The continuous airborne alert based aircraft are severely limited in postattack endurance. The airborne endurance of the currently contemplated carrier aircraft is, at best, six to eight days. With less than ten nuclear weapons the enemy can destroy the main operating bases provided for recovery; with a few hundred weapons the enemy can destroy dispersed emergency recovery air-fields as well. In both instances, this is a very small price for him to pay to force us either to launch the MX missiles (which may result in immediate escalation to uncontrolled levels of general nuclear warfare, including attacks against our cities), or to lose the whole MX system for lack of usable recovery bases.

Airborne deployment, especially when constrained to slow, low-flying (propeller) aircraft in the interest of fuel economy, has all the disadvantages of placing major nuclear assets over broad ocean areas not under sovereign U.S. control. In this sense, airborne deployment has the disadvantages of submarine basing without the corresponding unique benefits of submarines: relatively long on-station endurance (up to 60 days) and being essentially unaccessible to wide-area surveillance.

2. The effectiveness of the proposed implementation concept(s) is open to question

The current configuration of the MX missile has not been defined in keeping with the requirements for air launch. Its size, range, and payload capability are not even close to that needed for an air launch role. There is no evidence based on test programs to show that an MX-size missile can be launched from the proposed aircraft. No commitment to such a system should be made until this capability is verified by

It is possible, and indeed likely, that other missile configurations (two Minuteman III missiles or several small, single reentry-vehicle missiles in the 20 to 25,000 lb. gross weight range) may be more suitable for the air launch deployment role.

In order to ensure even a minimal level of protection against surprise attacks, major

EXTENSIONS OF REMARKS

defensive assets (sea/air based air and antimissile defense) would have to be diverted from the U.S. general purpose forces. The cost of these defensive assets must be included when assessing the effectiveness of the airborne alert type deployment. Defensive assets will have to be provided from our heavily committed general-purpose forces inventory, if the enemy chooses to increase his preemptive threat against the MX airborne deployment.

The cost for the enemy to preempt an airborne alert based weapon system is considered to be much smaller than the resources required to preempt the MX in their landbased multiple shelter mode. The latter, for sake of comparison, imply the expenditure of 4,600 high-accuracy warheads or, alternatively, remarkably sophisticated gence/surveillance, retargeting capabilities.

Air-deployed intercontinental missiles not having access to accurate azimuth references will have delivery accuracy significantly inferior to those associated with land-based ICBM's. This can be remedied at the additional cost of radio beacon based inflight updating, which in turn introduces its own vulnerability risks.

Relatively low altitude, fuel efficient flight profiles (5,000 to 15,000 ft.) and propulsion techniques are required in order to give a minimum level of airborne endurance (six days). Such flight profiles imply accident rates far exceeding those normally associated with modern jet aircraft, and certainly far in excess of those associated with land basing. Extended deployment ranges may require flight through turbulent at-mospheric regions where the accident rate would be higher still.

The MX missile design is not best suited for airborne carriage. In point of fact, the specially developed airplane which is being proposed may not be necessary. It is an open question whether one should design the carrier aircraft for one large missile with ten warheads or for two or three Min-uteman III's with three warheads each, or perhaps for several small missiles each carrving a single warhead.

The number of trained crews is significantly larger than the number of airplanes in the air all the time. Six-day continuous airborne missions are beyond the experience

3. The continuous airborne alert basing has a number of undesirable side effects

The number of peacetime takeoffs and landings with the associated risk of crashes involving live nuclear weapons raises the question of environmental impact due to plutonium contamination. The problem could be partially solved by redesigning and procuring oralloy based warheads, but such designs and weapons are not now available in stockpile.

Attacks against the main operating bases or against the emergency recovery bases, aimed at destroying the endurance of the airborne deployment could result in several tens, and possibly hundred, million casual-

4. A number of technical, schedule, and cost risks are associated with the continuous airborne alert basing

Nuclear hardening of MX-carrier aircraft. Ejection of missile from aircraft, postlaunch stresses and flight dynamics.

New navigation/guidance initialization system.

dedicated special-purpose missile carrier aircraft.

Design of all-oralloy nuclear warheads.

All these put an early IOC date at considerable risk.

TRIBUTE TO MAYOR DAVID SHEPHERD

HON, JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

· Mr. BLANCHARD. Mr. Speaker, this past weekend the people of Oak Park, Mich., and the entire Detroit metropolitan area were shocked and saddened by the sudden death of one of the areas most influential and effective leaders, Mr. David H. Shepherd, mayor of Oak Park.

Dave Shepherd was much more than the mayor of one of the communities in my congressional district. The Detroit News called Dave Shepherd "One of the most powerful Mayors in suburban Detroit during the past 20 years,' and they went on to say, "The name Shepherd has been synonymous with suburban politics." He was a leader inside and outside of the community, he was one of the foremost authorities in the country on the issues, problems, and needs facing municipal government, he was someone that I often turned to for advice and counsel on matters affecting local government, and he was a personal friend.

The list of Dave Shepherd's public service activities is virtually endless. Let me mention just a few. He was elected mayor of Oak Park five times and was running again this fall. He was a former chairman of the Southeastern Michigan Council of Governments, a representative on the National League of Cities, the U.S. Conference of Mayors Environmental and Energy Committee, and the board of trustees of the Michigan Municipal League. He won the Tom Bradley Leadership Award from the National Association of Regional Councils as the outstanding policymaker of the Nation in 1978. He was 1 of 10 U.S. mayors invited to China this past year and 1 of 10 U.S. mayors invited to Israel in 1979 to discuss urban problems with Israeli Government officials. If Dave Shepherd had a downfall it was that he was simply too active for his own physical well-being.

Dave Shepherd was recognized and will be remembered as one of the most hard working and respected government leaders in the country. The fact that the mayor of a small suburban community could have attained such national acclaim is testimony to his effectiveness and accomplishments. His loss will be felt whenever and wherever policies and issues affecting local communities are being discussed or de-

His loss, for me, is also a very personal one. When I first sought election to Congress Dave was the first municipal official to support my effort. From that time until his death Dave remained a loyal supporter and a trusted adviser. Beyond that he was a dear friend and I will miss him deeply.

Dave exemplified the very best in public service. I know that all of my colleagues in Congress join with me in this special tribute to Dave Shepherd and in extending our most heartfelt condolences to his wife Frances and family.

WAYS AND MEANS COMMITTEE BILL BETTER FOR INDIVID-UALS AND SMALL BUSINESSES OF SOUTH CAROLINA

HON. KEN HOLLAND

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. HOLLAND. Mr. Speaker, I believe it will be helpful to Members of the House as well as my constituents for me to explain why I supported the Ways and Means Committee tax bill (H.R. 4242) instead of the Republican substitute (H.R. 4260).

The administration's Conable-Hance bill enjoyed heavy promotion, including a nationally televised speech by the President. However, the available evidence showed that the committee bill was, beyond question, better for the great majority of individuals and businesses of my District. I also believe it would have been better for the overall U.S. economy.

GREATER TAX CUTS FOR MIDDLE-INCOME INDIVIDUALS UNDER COMMITTEE BILL

The tax reductions for individual taxpayers were deeper in the Ways and Means Committee bill—year for year—for all taxpayers with incomes up to about \$70,000.

The Republicans proposed an "across-the-board" tax cut. This means that people of every income level get the same percentage cut. For example, if your tax comes to \$2,000, you would save 10 percent, or \$200. If your tax comes to \$20,000, a 10 percent savings is \$2,000; and at \$200,000, you save \$20,000.

Clearly, wealthy people will be better off under the Republican version of the tax cut. Two days after the House vote, the Washington Post estimated that the wealthiest 5½ percent of the population, those with incomes of over \$50,000, will receive 35 percent of the individual tax reductions. But the average family in South Carolina does not have an income of \$50,000.

I am very proud of the progress my State has made over the past 20 years in raising its standard of living. Our people work hard. The percentage of the population employed within our State has been consistently higher than both the average for the South Atlantic region and the United States as a whole.

As a result, the per capita income in South Carolina rose from \$1,396 in 1960 to \$2,951 in 1970, a percentage increase of 111. By 1979, it had jumped again, to \$7,027, a rise of 138 percent. That is the good news. But, there is also bad news; these advances still left South Carolina ranked 47th in the Nation, in per-capita income. Only three States were lower.

It seems to me that my part of the State is quite typical. Therefore, most of the people of the Fifth District of South Carolina are not helped very much by tax cuts that are concentrated in the upper brackets. They are, for the most part, struggling to get along and would have had more money in their pockets to pay bills, spend, and save under the Ways and Means Committee bill.

The other difference between the two bills was the safety valve present in the Ways and Means Committee bill, which would have made the outyears' tax reductions depend upon the economy's achieving the goals President Reagan has set for inflation, interest rates and the Federal deficit. The committee wanted to preserve some freedom of action in case they are not met. For example, if inflation and interest rates are still very high. some completely unpredictable problems threaten to push the budget deficit out of control, people will be hurting, especially those in the lower and middle-income brackets. Under such conditions I feel it would be healthy for Congress and the President to review the situation and be able to adjust the cuts in either direction depending on the circumstances at that time.

The Republican tax bill not only locks us into another 10-percent across-the-board income tax cut for 1983, but additional cuts beginning in 1985 based upon the rates of inflation in those years.

The advocates of the Republican bill argue that the indexing features of their bill will "prevent automatic tax increases caused by inflation." But, there is a real danger that indexing will make inflation worse. If financial markets react to this danger, interest rates will stay at high levels and most people will find it difficult or impossible to buy a house or a car or many of their daily needs.

One Washington newspaper called indexing a step into the political and economic unknown and said that the only certain consequence would be to "greatly reduce political flexibility in dealing with budget questions." ¹

The Republican majority leader of the Senate, on national television, described the Republican bill as "a riverboat gamble" with the economy. We wish the President luck, of course. But, I do not believe it is prudent to trust to luck to such an extent, or to commit the country's revenues so far into an uncertain future.

I believe it is wiser to be able to review and revise, if change is called for. The Ways and Means Committee's "trigger mechanism" would have given Congress that flexibility. I feel that made the committee bill better legislation.

SMALL BUSINESSES AND FARMS WOULD HAVE RE-CEIVED MORE BENEFITS UNDER COMMITTEE RILL

As many people know, the great majority of small businesses are unincorporated. The statistics show that 13 million of the 15½ million U.S. enterprises are either proprietorships or partnerships. The owners of these firms are taxed under the individual income tax schedules.

We have just seen that individual taxpayers earning less than about \$70,000 (including about 95 percent of unincorporated businesses) would have done better under the Ways and Means Committee individual tax rate reductions.

Most farms and businesses in the Fifth District are small. In fact, in the 10 counties of my District, there are only 220 businesses with more than 100 employees. That is 3.31 percent of the business population of 6,639. It should be noted that the 100-employee level is well below the Small Business Administration's definition of 500 employees for a small business.

I know that some businesses were concerned that the trigger would not have gone off, leaving only 2 years of Ways and Means reductions compared to every-year reductions under the Republican substitute.

But the only thing that could have prevented the trigger from firing was if the economy did not measure up to the goals the President set.

If those goals were not met, it would be a pretty clear sign that the economy was in deep trouble. If interest rates hang high, survival would be in doubt for many small firms.

We are beginning to see this come through in the statistics. After about 1½ years of record-high interest rates, bankruptcies for January-April 1981 are already 26 percent above the 1980 rate, and construction industry failures for January and February 1981, are 69 percent above the same period in 1980.

I earnestly hope that interest rates fall quickly, and stay down. However, if they are in the 20-percent range 2 years from now, it will be unbearable for small and independent business. I

[&]quot;Tax Indexing Is a Leap Into the Unknown" by John Berry, Washington Post, July 20, 1981, p. A4:

think Congress should be making some contingency plans now.

COMMITTEE BILL OFFERED CORPORATE RATE CUTS FOR SMALLER COMPANIES

The Ways and Means Committee realized early this year that limiting the business tax cut to the original 10-5-3 depreciation and investment credit proposal would bring enormous benefits amont the largest U.S. companies, which make massive investments in heavy machinery and equipment, and bring little or no benefits to millions of smaller businesses that would not be investing very much.

The committee sought to provide greater balance in the bill for the 15 million smaller firms that account for 80 percent of the new jobs, 60 percent of existing employment, 50 percent of the innovations, 48 percent of the do-mestic output (GDP) and 43 percent of the gross national product (GNP).

The committee bill did this in several ways. Most notably are proposed significant reductions in the corporate income tax. This was designed to help all corporations-large and small-not just the ones making heavy investments.

Most companies cannot raise capital from the national money markets and are therefore dependent upon retaining more of the capital they earn in the marketplace.

The corporate rate cuts proposed by the committee would have helped these companies most. They would have resulted in tax savings of \$11.9 billion for small companies between 1981 and 1986.

In contrast, the Republicans' substitute, on the Friday before the vote, agreed to include in H.R. 4260 a corporate rate provision worth \$2.4 billion during this period.

Thus, for the country's smaller independent corporations, the Ways and Means Committee tax reductions were almost five times larger than the Republican cuts.

MANY OTHER IMPORTANT SMALL BUSINESS PROVISIONS FORMULATED BY COMMITTEE

The committee bill also developed a whole series of additional provisions to benefit both incorporated and unincorporated firms. Altogether, this added up to a business program designed to make it easier for businesses to grow, prosper, and survive. A partial list of these provisions is as follows:

PROVISIONS DEVELOPED BY WAYS AND MEANS COMMITTEE TO AID SMALL BUSINESS

Expansion of current law.-Lower corporate rates for small companies.

Expansion.-Lower individual tax rates for small unincorporated businesse

New.—Expensing of capital spending. Expansion.—Increase in investment credit for used machinery; provisions to promote continuity of small and family businesses; increases the unified credit exemption equivalent from \$175,000 to \$600,000, phased in over six years

New.-Reduction of the maximum estate tax rate from 70 percent to 50 percent; an unlimited marital reduction.

Expansion.—Increases the annual gift tax exclusion from \$3,000 to \$10,000, effective in 1982; decrease from 50 percent to 35 percent in the minimum amount of adjusted gross

estate that must include interests in a closely held business in order to take advantage estate tax installment payments; creases to 50 percent the amount of a closely held business interest that can be disposed of before triggering acceleration of installment payments.

New.-Reform of inventory procedures for firms using or adopting LIFO accounting; savings incentives targeted to help construc tion and local businesses; specialized capital

formation provisions.

Revived.-Revival of stock options. Expansion.-Accumulated earnings crease; increse in Subchapter S shareholders allowed; rehabilitation credit for existing structures.

New .- Research and development credit. Expansion.-Broadening of targeted jobs credit

After it became apparent that these provisions were sound and popular, many of them-again in the final days of the debate-found their way into the Republican substitute bill (H.R. 4260)

But even after these changes, there were still significant changes in degree. The committee bill remained much more generous to small and in-

dependent business.

In the days before the key July 29 vote, the National Small Business Association sent to each Member of Congress an analysis showing the Ways and Means Committee treatment of the four most important small business items would result in tax savings of \$26.6 billion, compared to savings of \$6.1 billion under the Republican substitute.

The table furnished by that association follows:

REVENUE COMPARISONS: POTENTIAL SMALL BUSINESS TAX SAVINGS

[Calendar year tax benefits in billions of dollars]

	1981	1982	1983	1984	1985	1986	Total
House Ways and Means Committee bill: Expensing of 1st \$25,000. Rates cuts under \$200,000	2.9	2.0 1.0	1.4 1.8	0.9	4.4	2.9	14.5 11.9
Advantages to purchasers of used equipment	(1)	.034	.037	.041	.045	(²) .049	.20
Totals	2.9	3.034	3.237	3.841	7.445	6.149	26.6
onable-Hance II bill, as revised (H.R. 4260) as of July 24, 1981: Expensing of 1st \$5,000 to \$10,000. Rates cuts under \$50,000. Increase in used machinery investment credit. Accumulated earnings increase.	.1	1.1 .2 .1	.645 .5 .1	.765 .5 .1	.301 .6 .2	.005 .6 .2	2.81 2.4 3.7 .2
Total 1981–86	1	1.4	1.245	1.365	1.101	.805	3 6.1

Amount of used equipment treated same as new raised from \$100,000 in 1980 to \$150,000 in 1981, \$191,667 in 1983, \$275,000 in 1984, and \$575,000 in 1985. Numbers do not add due to rounding.

Source: National Small Business Association, July 24, 1981.

Some portion of this additional \$20.5 billion in tax savings for smaller firms would have filtered into my State and my district. In my opinion, the entire economy is better served by such an equitable commitment to job-producing, dynamic, competitive small businesses.

EVIDENCE FAVORED COMMITTEE BILL

When the evidence was all in, it pointed overwhelmingly to the Ways and Means Committee bill.

Individual taxpayers in the lower and middle brackets received large tax reductions, and small and independent business enterprises were in a superior position by far under the committee bill. Those are the people I represent.

It is true that the Republican substitute, in the last days, brought in many of these provisions-although at much lower levels of benefits in many instances. They would not have done even this much if the Ways and Means Committee had not opened up the original narrow bill, H.R. 3849, and developed these provisions.

We certainly applaud the decision of the Republicans to broaden their bill to the extent they did. We only wish they had done more.

I am proud to serve on the Committee on Ways and Means. I commend the chairman, Dan Rostenkowski, and the other Democratic members of that committee for their courage and their competence in opening up the 1981 tax bill to include the many good

provisions I have described, in the face of opposition from an extremely popular President. The merit of these provisions is indicated by the fact that they were ultimately accepted, in principle, by the Republicans in the House and Senate. The legislative process that the chairman set in motion thus resulted in more balanced legislation than if the bill were confined to the 10-10-10 individual and 10-5-3 business cuts on which the President was relying and insisting.

ASSISTANCE FROM THE NATIONAL SMALL BUSINESS ASSOCIATION

During the development of this legislation, I became familiar with the National Small Business Association, a Washington-based group with about 50,000 members in all industries.

In March of this year, when the President's proposal was still limited to 10-10-10 and 10-5-3, the NSB testified publicly that the bill should be opened up to provide equitably for businesses of all sizes.

The NSB presented to our committee, and to the staffs of the many offices and committees of the House, a specific 16-point program for equitable treatment of the diverse small business community. The association's recommendations also proposed as much in tax savings as in tax costs.

I was impressed by this NSB package.

It is a tribute to the effectiveness of the NSB that the Ways and Means Committee adopted 13 out of 16 of its suggestions-11 in full and 2 in substantial part.

These 11 included the corporate rate reductions up to \$200,000; direct first year expensing of \$25,000; substantial improvements in treatment of used machinery; major expansion of the estate tax; expansion of the rehabilitation credit; and revival of incentive stock options. This program advocated inauguration of several new conceptsdirect expensing, research and development credits, savings incentives targeted to help local businesses, and reform of inventory accounting.

These NSB recommendations became the heart of the Ways and Means Committee small business pro-

Subsequently, the Republican bill accepted the same 13 concepts, 6 in full and 7 in part, although to a lesser level of benefits.

I do not believe that any committee member would have predicted at the beginning that remarkable degree of

The success was earned. The NSB program was well conceived, carefully designed, painstakingly researched, and ably presented.

All three of the revenue-saving provisions—amounting to about \$57.1 billion over a 5-year period-were universally adopted by the Congress, the administration, the Democrats and Re- ary market is currently being develpublicans alike.

The Ways and Means Committee would have allocated about half of those savings back to the small business community in whose name they were proposed. The Republican bill allocates about 101/2 percent of those savings back to small business.

In my opinion, the National Small Business Association did an extraordinary job in arguing the case of the small business community during the development of the 1981 tax bill. I am grateful for the assistance that the NSB gave me and my Ways and Means Committee colleagues during deliberation of the Economic Recovery Act of 1981.

OF DISCUSSION ISSUES AND WAYS AND MEANS OVERSIGHT SUBCOMMITTEE RECOMMEN-DATIONS ON H.R. 4420

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

Mr. RANGEL. Mr. Speaker, over the past several years, the volume of industrial revenue bond (IRB) issues has increased significantly. In 1980, for example, the dollar volume of small issue IRB sales was more than six times greater than it had been in 1975. Moreover, if current law remains in effect without change, CBO estimates that the amount of IRB sales could rise from the \$8.4 billion in 1980 to between \$15 and \$49 billion in 1986.

Although volume in itself need not necessarily be a cause for alarm, the substantial expansion within a relatively short period of time warrants closer congressional attention. Given the fact that IRB's can be used to serve various purposes, the Congress needs to periodically reassess the program to assure that tax-exempt small issue IRB's are serving legitimate public purposes.

The phenomenal growth of IRB issues in recent years is a result of several factors: Soaring interest rates on conventional loans; the greater spread in recent years between taxable and tax-exempt interest rates; the higher \$10 million limit on the size of bonds initiated in 1979; the increased use of IRB's for commercial, nonindustrial projects; and less restrictive State laws governing the use of tax-exempt bonds.

There is a potential for major expansion in the volume of IRB's, particularly if the States continue to issue IRB's on a more aggressive basis in the future. One factor that does seem likely to continue to stimulate the increased use of small issue IRB's is the continuing liberalization of State IRB enabling statutes. Moreover, a secondoped for small issue IRB's.

Nevertheless, the trend toward increasing use of tax-exempt small issue IRB's raises a number of policy issues and concerns. Primary among these concerns is the potential effect of IRB sales on Federal revenues. CBO's revenue loss estimates, which have been endorsed by the Treasury Department and the Joint Committee on Taxation, indicate that the Federal Government would realize a gain of \$1.393 billion in fiscal year 1982 if Congress removed the interest tax exemption on all outstanding small issue IRB's.

Because the subcommittee's recommendations would only affect small issue IRB's issued after December 31. 1981, such legislation would result in relatively small revenue gains in the next fiscal year. However, as the estimates below indicate, substantial gains would occur in all subsequent years.

Preliminary estimates indicate that the subcommittee's recommendations will result in revenue gains as follows:

THE REAL PROPERTY OF THE PARTY	Millions
Fiscal year 1982	\$22
Fiscal year 1983	100
Fiscal year 1984	300
Fiscal year 1985	700
Fiscal year 1986	1,200

(These revenue estimates assume an overall increase in "small issue" IRB sales of roughly 15 percent a year.)

While such factors as revenue loss and the effect on local government borrowing were viewed by the subcommittee as significant considerations, other important public policy issues in connection with the current rules regarding IRB financing, such as their effectiveness in stimulating development in economically distressed areas and in assuring financing for projects that create jobs or promote economic diversification, were also considered. Moreover, the subcommittee recognizes, as the testimony submitted at the hearings made abundantly clear. that there are positive aspects to IRB financing. However, the subcommittee concluded, as many witnesses urged, that the current rules regarding IRB financing do not adequately assure the most appropriate and effective use of these bonds and that legislative changes are warranted. Parameters are needed to assure that use of small issue IRB's is channeled into the most productive areas.

The subcommittee's specific recommendations for legislative changes are discussed below. The Subcommittee believes that each of these recommendations warrants the most serious consideration by the committee and that appropriate legislative action needs to be taken promptly.

A. Recommendation: Public hearing requirement.-Provide that each IRB issuing authority shall:

First, conduct a public hearing prior to the approval and issuance of each small issue IRB;

Second, prepare a formal statement of findings following each such hearing which conclude that the proposed bond issue (a) will stimulate the local economy; (b) result in the creation of—or retention of—a significant number of jobs; (c) not create an unjustified competitive advantage as against existing businesses in the area; and (d) that the activity for which IRB financing is sought would not be undertaken in the absence of IRB financing:

Third, certify to the Governor's office, or other designated agency or department, that the issuing authority has complied with the above procedures.

EXPLANATION

The hearing record reflects practically universal support for the application of a public hearing requirement. The subcommittee believes there is a need to further enhance local responsibility for issuing IRB's while, at the same time, provide assurance that all interested parties in the community have an opportunity to be heard on the subject of the anticipated impact of the proposed bond issue. These procedural requirements would be satisfied, for Federal, tax exemption purposes, upon the local authority's certification to the State that the public hearing has been held and the requisite findings made.

B. Recommendation: Reporting requirement.—Provide that each State file with the Treasury Department, by February 15 of each year, a report containing information regarding each small issue IRB closing made in the State during the previous calendar

EXPLANATION

Until now, very little information has been available to the Congress and the public generally on the nature and extent to which tax-exempt IRB's have been issued by the States and local governments for the benefit of private firms. One reason for this general lack of information on a national scale is that small issue IRB's are typically privately placed with local lending institutions. The bonds are not generally sold on the public bond market, nor do they normally involve underwriters. Therefore, nationally reported bond figures do not reflect most small issue IRB sales. Moreover, the Internal Revenue Service only collects information on IRB's issued for more than \$1 million. This information is of limited value for purposes of monitoring the volume of IRB sales since approximately 60 percent of the IRB's issued in 1980 were in amounts of less than \$1 million.

The Congressional Budget Office, the Treasury Department, and numerous other witnesses before the subcommittee expressed the view that the absence of comprehensive information on IRB sales will continue to hamper congressional efforts to monitor the program. Thus, there is practically universal agreement on the need for a uniform, national reporting system. The subcommittee agrees that the Congress needs to have access to comprehensive and accurate information on IRB sales on a continuing basis if any realistic assessments of the program are to be undertaken in the future.

The subcommittee recommends that the required annual State report on small issue IRB sales include the following information:

Name of issuer; bond amount; date of issuance; bond term; interest rate; principal users; assets and previous year's sales of principal user; capital expenditures; prior outstanding issues; bond counsel; type and description of project noting the applicable "Standard Industrial Classification" Code; jobs created and/or retained; location of the facility; and the bond purchaser(s).

C. Recommendation: Target commercial IRB-financed projects.—Provide that commercial IRB-financed projects be located in economically distressed areas.

(a) Economically distressed areas would be defined as areas, within a city or county, composed of contigous census tracts, block groups or enumeration districts where: at least 2,500 families reside; at least 70 percent of the families have incomes below 80 percent of the statewide median income; and at least 30 percent of the families have incomes below the national poverty level.

(b) Commercial projects would be defined as property used in an activity classified in the Federal Government's Standard Industrial Classification (SIC) Manual under:

Division F—Wholesale Trade; Division G—Retail Trade;

Division H-Finance, Insurance,

Real Estate;
Division I—Services (except 805—proprietary hospitals, 806—nursing homes):

Activities at Central Administrative offices—within the meaning of Appendix A.

Auxiliary establishments would be characterized according to the firm's primary activity, as the manual provides.

EXPLANATION

"Small issue" IRB's were not used to finance commercial projects to any significant degree when Congress created the small issue exemption in 1968. Since the recent surge in IRB sales is attributable in part to the substantially increased use of IRB's for commercial ventures, many Members and State officials have raised questions as to whether such a develop-

ment is fully consistent with the congressional intent and whether IRB financing of certain types of commercial ventures serves a legitimate public purpose.

The subcommittee believes that, in general, commercial projects follow marketplace demands and that, with the sole exception of economically distressed areas where unfavorable market conditions typically exist, the availability of IRB financing is not a crucial factor in site selection. Thus, the subcommittee concluded that a distinction should be made between commercial and industrial projects and that the IRB financing of commercial projects should be limited to economically distressed areas. Current law would be basically retained industrial-noncommercial-projects seeking IRB funds.

The subcommittee was well aware of the problems involved in constructing reasonable criteria which would operate to identify those areas, both urban and rural, suffering from severe economic depressed conditions. Nonetheless, the subcommittee considers its recommended criteria particularly appropriate for the targeting of commercial projects and believes it will operate in an equitable fashion nationwide. The income and poverty criteria the subcommittee recommends reflects, in essence, the criteria used in the Urban Development Action Grant's (UDAG) pockets of poverty program.

The above-described definition of economically distressed" would allow the State and/or local government to those contiguous census tracts, block groups, and enumeration districts within their city or county for the purpose of designating an eligible economically distressed area. Where necessary, a project could be located directly adjacent to a distressed area if it is determined by the Secretary of Treasury and HUD that a suitable site for the project does not exist in the distressed area and that the project would substantially contribute to the economic development of the distressed area.

Defining commercial activities is also difficult task. However, the subcommittee believes that its recommended definition will provide both generally acceptable and reasonable characterizations of commercial activity-as distinguished from industrial. So that the States and local authorities will have immediate access to a precise and uniform definition of commercial, the subcommittee recommends that the definition be keyed to the Federal Government's existing, published classification system, the "Standard Industrial Classification" (SIC) manual. Currently, a number of States target commercial types of IRB-financed projects in this manner.

D. Recommend: Other specific restrictions.—First, provide that IRB proceeds may not be used to finance the purchase of farmland; second, provide that IRB proceeds may not be used to relocate existing activities from one State to another.

EXPLANATION

First, the subcommittee is aware that a large number of States are considering legislation that would significantly expand the use of small issue IRB's by allowing the bonds to be used to finance the acquisition of agricultural land. It appears that since the supply of land is fixed, the widespread availability of IRB financing would ultimately drive up such land prices. Current land owners would be the only true beneficiaries of such a use.

The subcommittee's proposal explicitly prohibits the use of IRB funds where the proceeds will be used merely to facilitate the purchase of land or other real property used for farming purposes—as defined in Internal Revenue Code section 6420(c)(3). The proposal would continue to allow the use of IRB financing for the acquisition of farm-related equipment and construction or expansion of farm

structures.

Second, since all but three States allow the IRB financing of a wide range of activities, it is not clear that any overall national public purpose is served by a firm's relocation from one State to another. The subcommittee members agree that such shifts in economic activity do little more than benefit one State to the detriment of another. As a matter of Federal policy, such relocations should not be subsidized by a Federal tax-exempt financing tool. Accordingly, the subcommittee recommends that IRB proceeds not be available to firms relocating in another State, but rather that the firm seek any necessary location incentives directly from the benefiting State or local jurisdiction.

E. Recommendation: Future congressional oversight and review.—
First, provide that the Secretary of the Treasury, conduct a comprehensive study of small issue IRB's and submit a report to the Committee on Ways and Means by July 1, 1983, to include a summary and analysis of the data supplied by the States, and such recommendations as the Secretary

finds appropriate.

Second, provide for a sunset provision with respect to small issue IRB's effective January 1, 1984.

EXPLANATION

The absence of comprehensive and reliable information about the volume and uses of small issue IRB's has severely hampered congressional capacity over the years to clarify public policy in accordance with changing national needs and priorities. With the information that would become available under the subcommittee's recom-

mended reporting requirment, the Secretary would be in position to fully assess the current uses and effects of IRB financing and to provide analysis with respect to the potential future role of this financing mechanism.

In addition, the sunset provision, timed to occur after the committee has had ample opportunity to review the Secretary's report and data, will assure that the Congress undertakes in a timely manner a comprehensive review of the appropriateness of small issue IRB financing and decides whether such tax-exempt financing should be continued. The subcommittee believes also that the recommended sunset provision would provide the States with a meaningful incentive to responsibly develop locally applicable criteria for utilizing IRB financing in ways that legitmately and effectively serve the most pressing economic needs of their communities.

BUDGET CUTS AND VALUES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. SIMON. Mr. Speaker, one of the recent additions to Southern Illinois is Dr. Samuel Goldman, the dean of the College of Human Resources.

Recently, he delivered a talk on "Budget Cuts and Values" to the annual meeting of the board of directors of the Comprehensive Health Planning Group of Southern Illinois, more commonly known as CHIPSI.

What he said ought to be heard beyond Southern Illinois, and I am taking the liberty of inserting it in the CONGRESSIONAL RECORD at this point so my colleagues around the Nation can heed his words of wisdom.

BUDGET CUTS AND VALUES

I am very pleased to be here this evening to share with you some of my views and thoughts on matters of interest to both of us. These kinds of meetings give me an opportunity in the early months of our presence here in Southern Illinois to express deep appreciation to all of you, to our friends, to our neighbors, to our colleagues who have opened their hearts in friendship to receive me and my family in this area. There is a great deal to be said about something called rural although it really is a misnomer these days. Mr. Royko who writes for a newspaper in Chicago, believes that rural means country bumpkins. He sees a caricature of somebody in overalls riding a horse or donkey on a country road. Mr. Royko has obviously never lived in an area like this and so he is simply unable to understand the temperament and the nature of the people in this type of environment.

I think it is important that we all begin to recognize that as a consequence of the explosion in technology and telecommunications we have become part of a broader universe of people. That there really is no such thing as rural or urban when it comes to such issues as health and human services. A

great many interests and needs and concerns are held commonly among all people of this country no matter where they are located geographically. It is for this reason that we must understand that whatever happens on a broader geographic level, particularly at the national and increasingly more at the international level has great meaning for all of us.

Daniel Bell, a noted sociologist, in 1968 wrote: "The United States today, for the first time, is genuinely a 'national society.' In fact, many of the domestic problems we confront. . . arise out of a multiplicity of problems—education, transportation, welfare, urban renewal, air and water pollution, medical care and the like-(these) no longer are manageable on the state and local level but are now passed on to the national society for solution. In the last twenty-five years we have become: (1) an intertwined national economy, in which government has become an active regulator of economic activity as well as a partner in many enterprises; (2) a national polity, in which (as demonstrated in the example of civil rights) the government has become an active force for social change and, in consequence of World War II, the Korean War, and the war in Vietnam, there is a permanently mobilized military posture; (3) a welfare society, in which medical care, education, and, in increasing ways, income maintenance for the disadvantaged, have become a responsibility of the central government; and, (4) a national culture, not only through the diffusion of the popular arts through the mass media, but symbolically (if not quite tangibly) through the creation of a National Humanities and Arts foundation which organizes government support for the scholarly, creative, and performing arts."

I believe that Bell has very clearly given us some of the major reasons why the federal government cannot abandon its role in providing for the needs of the American people. We have come too far in our development as a nation for any leader or for any power group to easily unravel the fabric that has made us the society we are.

This thought is fundamental to our understanding of what is being attempted by the current administration in Washington.

Activity on the national scene is extremely unsettling and unsettled. The Reagan administration has had enormous impact in attempting to reverse the course of human service events that has dominated this country over the past half century. A critical question being hotly debated is the degree and nature of the involvement of the federal government in the delivery of human services. The resolution to this question could mark a critical turning point in this nation and we must be sure that we understand the question and that we are involved in its resolution. Let us be certain that we do not confuse what is going on. There is a great deal of discussion, rhetoric and debate concerning the control of inflation, concerning the size of the federal debt, concerning tax cuts. And let me tell you that I will raise my voice and I am sure that you will too, to say yes to legitimate and reasonable moves to cut the budget, to moves that will reduce inflation, to moves that will cut taxes which increase our take-home pay. But while these are crucial, they are not the real issues. For the real issue we are dealing with is a major shift in the values that have dominated this great nation. The current debate initiated at the federal level deals very fundamentally with the values that will guide the relationships between government and the people

and the relationships among people of various social and economic strata.

It hardly seems possible that in a period of just a few months, fifty years of American compassion for its citizens has begun to unravel. Congress is being asked to change, after only very brief review, almost 100 laws that took decades to enact. Current plans call for dramatic reductions in spending levels for over 95 programs ranging from food stamps, to student loans to welfare. The so-called safety net which Roosevelt had begun to weave and which subsequent presidents and congresses had strengthened and raised to humanitarian heights has been lowered to catch the few who are "truly needy."

And how are the truly needy defined-why, by number of course.

The Wall Street Journal, a leading cheerleader for the administration has worked out a formula, using numbers, to define the truly needy. Here is a brief excerpt from an April 30 editorial entitled "Budgets and the

Poor'

"In fiscal 1980 there were over 41 million 'poor' persons in the U.S. or about 18.8 percent of the population, if you exclude all government benefits. Once cash transfer payments are included, the number of 'poor' persons is halved to 18.8 million or 8.6 percent of the population. If you add in the value of in-kind transfers, the number is again slashed to under 9 million or 4.1 percent of the population. If you go back to deduct medical care benefits, as a special case, the 'poor' amount to 13.5 million or 6.2 percent of the population, who in the average fall below the poverty level by \$13 a week.

'These numbers are small enough that you must be talking mostly about special cases-the conclusion seems to us inevitable that we have a 'safety net' providing basic support for the unfortunate."

One has to be struck at how easy it is to solve the problems of the poor among us. Just do the calculations right and presto,

they go away in very large numbers.

The problem is that poor people are human beings, not numbers. They eat, drink, breathe and live among us in hope of

The highest form of charity is assisting an individual to be self sufficient so that he or she may live in dignity. But let us remember that the action word is assisting. A hungry child will not attend to his studies while his stomach rumbles for want of food. A handicapped person cannot work unless the work place will receive him. An elderly citizen cannot be healthy if health services are beyond his means. Women will always be second class citizens so long as what they do

is not valued equally.

The theme of "getting government off our back" may have more of a musical ring than a societal benefit. For what do we really mean? What do we really want? Do we really want the federal government to withdraw from involvement with its people? Are we really serious when we say that local de-cision making is far better for a national society? Let us remember that the reason categorical grants emerged with some dominance at the federal level was because the local area was simply unable or unwilling to solve many of its problems. Do we actually believe that block grants will be better than categorical grants? The compounding factor to this situation is that state and local governments don't have funds to continue some of the progress that has been made in the human condition by the categorical grants at the federal level.

I urge you again not to be so caught up with ideas of saving dollars and I ask that you be certain to keep an eye on the values implied by the current actions by our federal government.

In preparing this address, I wanted to put to words the great loss we would suffer if values currently expressed by Reagan administration went into effect totally. To do this, I went to find the writings of a President whose beliefs and programs are the object of the Reagan cuts.

I found the Great Society Speech of

Lyndon Johnson.

On January 4, 1965, in his State of the Union address before Congress, Lyndon Johnson introduced his concept of the Great Society. In one particularly striking passage he said:

"But we're only at the beginning of the road to the Great Society. Ahead now is a summit where freedom from the wants of the body can help fulfill the needs of the

spirit.

"We built this nation to serve its people. "We want to grow and build and create,

but we want progress to be the servant and not the master of man.

"We do not intend to live in the midst of abundance, isolated from neighbors and nature, confined by blighted cities and bleak suburbs, stunted by a poverty of learning and an emptiness of leisure.

"The Great Society asks not how much, how good; not only how to create wealth but how to use it; not only how fast we are going, but where we are headed.

And with this as an introduction, Lyndon Johnson outlined his proposals for developing and enriching the human resources of this great nation. Johnson proposed a vision for America which he said grew "from the scattered hopes of the American past.'

Things went wrong for President Johnson and I'm afraid that many well-intentioned

Great Society goals got derailed.

There have been many things wrong with several of the programs of the Great Society. Indeed we haven't heard much about it even in the waning days of the Johnson administration. Many of the programs were marred by corruption, mismanagement and inefficiency. But many good things did emerge and much improvement in the quality of life of Americans can be shown. Let us not turn the hands of our clock back so far as to cancel these gains out.

Today's rhetoric from our leaders in Washington is in sharp contrast to the hopes of the Great Society. And let me quote a passage to you. (Howard, 1978, pp.

39-42.)

"The dream of a more humane society has turned into a nightmare of governmental extravagance and corruption, of unfulfilled promises on a gigantic scale, of foolish, useless counter productive and expensive programs.'

Is assisting young people to go to college a useless counter productive program? Is providing adequate health care for the elderly foolish? Is providing for the nutritional needs of our young an extravagance? Is clearing up our environment useless and counter productive?

I don't believe they are. I believe that they are necessary and vital answers to some very critical needs of our people. The current leadership at the national level (and the rush by many at the state level to follow and even out-do this leadership) is fashioning a different vision of America. It is a vision not of hope for the needy among us, but of abandonment. It is not a vision of a genuine compassion based upon a sense of justice and fair play. It is a vision which denies human feeling and replaces it with statistics.

Perhaps to best illustrate what I mean, let

me share a parable with you. Many, many years ago in a tiny Russian village, a Russian Prince who was extremely wealthy overheard one of the peasants who worked in his fields proclaim how great it would be if he could own some land and be wealthy. The Prince one day approached the peasant and said to him. "I heard of your wish and I am going to grant it to you. This is what you must do. Tomorrow morning at sunup come over here where I am standing and then by walking or running cover land and all of the land that you can cover between sunup and sundown you may keep. The only stipulation is that at sundown you must return to the original point from which you left at sunup." The peasant was ecstatic with joy. At last his dream of land ownership and wealth was going to come true. The night before he could not sleep. He was very very excited. The next morning just prior to sunup he came to the appointed place and the Prince was there. The Prince reminded the peasant that he could keep all the land that he covered either by walking or running provided that he return to the original starting place at sunset. The peasant agreed and at precisely sunup, he started off. Originally he thought that he would run a little bit and he began to run. He was feeling good. Later on the sun began to beat heavily upon him. The heat of the day was beginning to slow him down. But he kept going. Shortly after noon some friends caught up with him they said to him. "Your neighbor is in trouble. He needs your help. Please come and help him." The peasant felt torn, he wanted to help his neighbor, but at the same time he did not want to stop in his quest of accumulating land. And so he said, "No, I cannot go now" but in his heart he said, "Wait until tomorrow. Tomorrow I will be so rich I will be able to help my neighbor with every-thing. And I will do it, I pledge that I will do it." And so he kept going. Late in the afternoon the sun began to beat down on him oppressively and he began to get weary and very thirsty. But he kept going with firm resolve. His wife caught up with him and she said, "Help, return, one of the children is ill and I don't know what to do. Please, please come home now and help." Once again he was torn, and he didn't know what to do. but he kept going and he said to his wife. 'Go home. Tomorrow, tomorrow I will have all the wealth we need and I will take care of the child. The child will have everything that he needs." The peasant kept going. He left his distraught wife behind. He began to realize he could cover more land if he ran some more, so he ran. Then he began to notice that the sun was starting to set. He began to get very anxious. He may have gone too far. He decided that it was time now to start back, so that he could come back to the original starting point by sunset and collect what the Prince had promised. He turned around and began his trip back. The sun was beginning to set rapidly. And he began to panic. He began to ask more of his very, very weary and strained body. He ran harder and harder until he could not breathe. But he kept going. Then at a distance he could see the Prince, but he feared that his goal was still quite a way off so he ran harder. He ran and ran to the starting point. As he approached the Prince, the peasant collapsed and fell dead. The Prince

looked down and said to people near him, "Take him away. Dig him a plot 6 ft. by 4 ft. That is all the land he is ever going to need."

One can draw many lessons from this parable, but I think an appropriate moral is that in our race for economic gain and development, in our pursuit for a one-sided view of economic health, we may be in jeopardy of throwing away the most precious resource that we have, our human resource. We may be in jeopardy of denying to the people of this great nation the kinds of services they must so desperately have in order that they may create, in order that they may work, in order that they may be good citizens.

The past few decades have seen an unprecedented rise in human aspirations among our people. The elderly, the handicapped, minorities, women and others have tasted opportunity never before available to them. They will not be denied. They will demand their due. Any attempt to roll back the gains they have experienced will be resisted. And we will again face turmoil, hatred, brother against sister—another divided America.

Those who wish to lead and are given the responsibility to do so must recognize that it is not enough to proclaim the ideal of life, liberty and the pursuit of happiness.

We must expect of our leaders that they provide some basis—other than through eloquent words alone—for hope that these rights will be secured for all of our people.

In a turbulent world the people have a right to look to their leaders for stability, calm, inspiration and hope, and very importantly, they expect compassion for those less fortunate and those who are out of the mainstream of our society.

mainstream of our society.

We must measure our leaders not only by their acts and deeds. We must measure

them also by their lofty goals and their vision for a better quality of life.

Will there be a consensus among Americans with respect to basic values and issues?

The answer will continue to be no, so long as there are people on either side of the issues who believe that all virtue is theirs and all sin belongs to the other person. No meaningful and lasting resolution can be reached where one side or the other side must perish or totally surrender.

Accommodation is not fatal. Meeting part ways is not a sign of weakness. And showing compassion for the less fortunate among us is not a lack of national resolve.

Reality tells us that the future for America will always be a push and pull in various directions. And so we must protect ourselves and our precious heritage by holding firmly to a set of values and beliefs that transcends political parties, that binds us together in justice, truth and compassion.

(1) We must always have faith that our future will always be better than our past because we want to make it so. And we must never break faith with the less fortunate among us. They must know and believe that no generation will ever cause them to be worse off than they were before. They must not be pushed down any forther.

not be pushed down any farther.

(2) We must master our own destiny and not permit groups whether local or outside our area to force their will upon us. We must set our values and decide for ourselves what is truly worthy for us and for this great nation.

(3) We must know the truth and live by it.
(4) We should have a very high regard for ethical and moral conduct.

(5) We must have and show compassion that is genuine American compassion that is rooted in an ethic, a morality, a sense of justice and fairplay that is timeless and enduring.

(6) Knowing that resources will be fewer we must learn to manage with less. What some people want to call "managing for decline." Let us do this within a framework that values human life, that cherishes human dignity, and expresses the true feelings of America for all its people.

(7) Let us open our planning and operating processes across larger numbers of institutions which have broad and specific responsibilities for health and human service. Let us speak to each other and then with one voice, let us speak to those who set policy that affects what we do

policy that affects what we do.

I would urge all who hold positions of responsibility for the planning and delivery of health and human services in this region to come together now to decide on a course of action that is in the best interests of our people. And they should make known just what this course of action should be and they should lead in its achievement.

Who are our teachers in this time of searching for values by which to live? Many want to look to the Bible for a path, a direction. The irony is that there are many passages in the Bible with many interpretations. And there are many who wish to use the Bible to support their own biases. We need to be wary of these people for they abuse and misuse the greatest teachings of all time. These abusers speak of getting even, of hit lists containing the names of those with whom they disagree. By ultimatum and intimidation and by religious zeal they seek to destroy all who disagree with them.

The Bible doesn't tell us to do that. It tells us to turn away hatred, to shun arrogance, to be compassionate, to care about people.

The Bible tells us: "To do justice, to love mercy, and to walk humbly with God." Dare we do less?

HOUSE OF REPRESENTATIVES—Friday, September 11, 1981

The House met at 10 a.m. and was the following Members on the part of Ford, estimates the deficit in fiscal year 1982 at \$67 billion. called to order by the Speaker pro tempore (Mr. Long of Louisiana).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C. September 10, 1981. I hereby designate the Honorable GILLIS

W. Long to act as Speaker pro tempore on Friday, September 11, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

Rev. Richard C. Halverson, LL.D., D.D., Chaplain, U.S. Senate, offered the following prayer:

Almighty God, Sovereign Lord of history, Judge of all the Earth, we acknowledge our need of Thee. Thy Word declares that "there is no authority except from God, and the authorities that exist are appointed by God" (Romans 13:1). All who rule do so at Thy good pleasure. All governments are accountable to Thee.

May we remember that Thou are the judge of all that is done here; that we are accountable to Thee in our thoughts, our desires, our words, and our action. We are accountable to Thee in our public life and in our private life.

Gracious God, help us to dispose of our duties here, in our homes, and in all that we do that Thou will be honored and the Nation blessed.

We ask this in the name of Him who loved to His death all the peoples of the Earth. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

APPOINTMENT OF ADDITIONAL MEMBERS TO ATTEND THE FUNERAL OF THE LATE HONORA-BLE WILLIAM R. COTTER

The SPEAKER pro tempore. Pursuant to House Resolution 206, without objection the Chair appoints as additional members of the Funeral Committee of the late William R. Cotter

Mr. FORD of Michigan:

Mr. FRENZEL of Minnesota;

Mr. Jones of Oklahoma:

Mr. GRADISON of Ohio;

Mr. Moore of Louisiana;

Mr. GEPHARDT of Missouri;

Mr. JENKINS of Georgia; and

Mr. HANCE of Texas.

There was no objection.

FURTHER CUTS WHICH COULD BE MADE IN BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNE-MYER) is recognized for 30 minutes.

Mr. DENNEMEYER. Mr. Speaker. all of us are deeply concerned about high interest rates. The prime rate remains over 20 percent. The National Association of Realtors reports that the average mortgage rate was 17.7 percent last month. I am afraid that the interest rate spiral will continue until we in the Congress face the fact that the mounting Federal budget deficit places upward pressure on interest rates through increased Federal borrowing. Deficits also fuel inflationary expectations on Wall Street and across the country. Is it any wonder that the American people feel a sense of uncertainty and major investors question the resolve of Congress when we stop to consider what has happened to the estimate of the Federal budget deficit over the course of this year as we looked ahead to fiscal year 1982:

In January, the Carter administration left us a projected budget deficit estimated at \$27.5 billion. This was clearly not based on sound economic projections.

In March, the President's budget revisions estimated a deficit of \$45 bil-

Yet the House-passed first budget resolution estimated \$31 billion. The final version of the resolution put the deficit at \$37.3 billion.

The official administration ceiling for the deficit was revised on July 15 and put at \$42.5 billion.

Perhaps in the large part because Congress did not approve all of the President's cuts, the deficit estimates have recently shot up dramatically.

The Congressional Budget Office and the Senate Budget Committee have ventured an estimate of \$57 to \$60 billion since May and remain committed to those figures.

Alan Greenspan, the noted economist and former adviser to President

Finally, the September 1981 issue of the Morgan Guaranty Trust Co. of New York's monthly survey reports financial experts as predicting a \$60 to \$80 billion deficit.

None of these estimates include the almost \$20 billion in off-budget outlays that will need to be financed by borrowing, just like the on-budget deficit

Then again this morning there was an item in the Washington Post over today's date indicating and quoting the head of the Congressional Budget Office, Alice Rivlin, to the effect that we expect a deficit in 1982 of some \$80 billion.

Well, someone may ask, what can be done about this projected deficit no matter what its size? And in answer to that question, a research committee of which this Member from California is a member, earlier this year began a very laborious task of analyzing the budget for 1982, in very critical detail.

As a part of this analysis, which was a work product of the Republican Research Committee, the Budget Study Subcommittee, of which this member was chairman, we analyzed the 22 categories of spending fiscal year 1982, and on the basis of that analysis, came up with a recommendation or a list of where cuts could be made in fiscal year 1982 totaling some \$52-plus billion.

They are identified and precise in 272 specific items and I would submit to the Members that when they examine these items in detail, one by one, they will find that this effort to reduce Federal spending in 1982 is not being done on the backs of the poor, the downtrodden, the handicapped, or the deprived in our society.

During the course of the next few weeks, it is the intention of this Member from California to take a few moments at the close of the session, such as we have this morning, and just read through these items so that the Members can get flavor of what they really stand for.

I intend this morning to take a few moments to do just that. I do not know how long it is going to take to read through these 272 items, but I think it is constructive to do so.

In each instance, for those who are listening, I would ask them to ask several questions.

Will the adoption of this proposed cut adversely affect the deprived in our society, the handicapped, the

[☐] This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

[•] This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

poor, those who are unable to fend for themselves?

In almost every instance, I think the answer will be overwhelming, it does not.

Where does the cut come, one may ask. Quite frankly, it comes in the bureaucracy that has been built into our governmental system in this country over the course of the last 40 or 50 years. It is in this direction that these cuts are desired to be made.

The first category that I intend to read from this morning is what we call legislative, and in this category Members will notice that in most instances these cuts are accomplished by nothing more than limiting the growth in spending for fiscal year 1982 to 10 percent over what was spent in fiscal year 1981.

Now, in fairness, I do not think it is unreasonable to ask members of the bureaucracy to limit their growth in spending to 10 percent in that one year from 1981 to 1982, and I would like to enumerate them briefly for the Members as follows:

The first one would permit spending for compensation of mileage of the Vice President and Senators to grow 10 percent over 1981. If we follow that mandate, we would save \$474,300. In other words, the proposed expenditure for that item in the budget for fiscal year 1982 is \$474,300, more than 10 percent above what was spent in 1981.

Second is in the Office of Legislative Counsel of the Senate. Here again we would limit the growth in spending for fiscal year 1982 to 10 percent over what was spent in 1981. That would save \$17,500.

In the legal counsel for the Senate, we would limit growth in fiscal year 1982 to 10 percent over what was spent in 1981. This would save \$121,000.

In inquiries and investigation in the Senate we would limit growth to 10 percent over what was spent in 1981. This would save \$7,055,300.

And then a series of miscellaneous items in the Senate. We would cut 10 percent from 1981, because we believe that certain of those expenses were unnecessary. This would save \$7,490,600.

We would limit the growth of funding the Joint Committee on Printing to 10 percent over what was spent in 1981. This would save \$22,200.

We would limit what we spent on the Office of the Attending Physician to 10 percent over what was spent in 1981. It would save \$30,300.

We would limit what is spent for Capitol Police to 10 percent over what was spent in 1981. This would save \$5,900.

We would limit the growth in funding the Congressional Budget Office to not more than 10 percent over what was spent in 1981. This would save \$604.200.

We would limit what the Architect of the Capitol spends in 1982 to the extent of not more than 10 percent over what was spent in 1981. This would save \$202,600.

We would limit what is spent for maintenance of Capitol buildings in an amount not in excess of what was spent in 1981, plus 10 percent. This would save \$273,000.

In Senate office buildings we would allow 10 percent over what was spent in 1981. We would save \$40,600.

The Library of Congress: We would permit the growth to grow by 10 percent over what was spent in 1981. It would save \$202,700.

In the Office of Superintendent of Documents, salaries and expenses, we would allow growth of 10 percent over 1981. This would save \$548,600.

In the acquisition of site and building plans and designs, we would defer certain programs that are planned on the grounds that frankly we cannot quite afford those programs at this time. This would save \$22,300,000.

□ 1015

In the U.S. Tax Court we would limit salaries and expenses to 10 percent over what was spent in 1981. It would save \$411,400.

The Commission on Security and Cooperation in Europe, whatever that is, we would limit expenses for salaries and expenses for that Commission to 10 percent over what was spent in 1981. This would save \$23,200.

The proposed outlays of this august body in the functioning Government are a 42.3-percent increase over 1980 which we, the committee, concluded to be exorbitant.

In the Botanic Gardens, the salaries and expenses, we would allow 10 percent over what was spent in 1981, saving \$273,000.

In the Railroad Accounting Principles Board, salaries and expenses, we would eliminate this program. It was designed to determine the economically accurate costs associated with transportation of goods. We believe this can better be done in the private sector. This would save \$959,000.

We would eliminate the Office of Technology Assessment, which works for the House of Representatives and the Senate, because we believe that its functions can be performed by the Congressional Research Service, the General Accounting Office, and the Congressional Budget Office. This would save \$12,465,000.

Those complete our recommendations in the legislative arena. Now I would like to move to our second category designated "the judiciary." In this category we would allow expenses to increase 10 percent above 1981 for the defender services, for the appeals and district courts and other judicial services. This would save \$753,200.

For fees for jurors and commissioners in the appeals and district courts

and other judicial services, we would allow a growth of 10 percent over 1981. This would save \$325,700.

For operations and maintenance, for appeals and district courts and other judicial services, we would permit growth to grow 10 percent above 1981, which would save \$3,982,300.

For salaries and expenses of magistrates for appeals and district courts and other judicial services, we would allow 10 percent over what was spent in 1981. This would save \$3,249,100.

The bankruptcy court, salaries and expenses of appeals and district courts and other judicial services, we would allow 10 percent over what was spent in 1981.

Incidentally, in this category the proposed outlay represents a 54.3-percent increase since 1980, which our committee felt was exorbitant. This would save \$10,703,800.

Space and facilities of appeals and district courts and other judicial services, we would permit a growth in 1982 to be 10 percent over what was spent in 1981. This would save \$4,759,700.

The special railroad reorganization court, appeals and district courts and other judicial services, we would allow 10 percent over what was spent in 1981. This totals some \$55,600.

Finally in this category, we would permit expenses for the Administrative Office of U.S. Courts, salaries and expenses, to grow by 10 percent over what was spent in 1981. This would save \$1,423,400.

Members, I do not intend to take any longer time this morning, but as I indicated at the beginning of my remarks, I will pick up reading these items one by one on the next day that we meet.

I would also like to add this caveat. The figures that I have expressed this morning were accurate as of the date of the publication of this work product, which was in mid-July of this year. The meaning of that is quite simple. We adopted a budget reconciliation bill in the latter part of July and there may be certain adjustments as a result of the adoption of that bill which would make some modifications in one or more of these figures and when those adjustments are known, I will make these adjustments available and knowledgeable to the Members of the House.

Does the gentleman from Georgia desire recognition?

Mr. BRINKLEY, Mr. Speaker, will the gentleman from California yield?

Mr. DANNEMEYER. I will be happy to yield to the gentleman.

Mr. BRINKLEY. I thank my friend for yielding. I wish to compliment the gentleman on his remarks today.

If I might take a minute or two, I would like to add to the gentleman's remarks in support of them.

Today I introduced a resolution with reference to lowering and stabilizing the interest rates. The resolving clause is a short one, and if I may share that with the gentleman, I would appreciate it.

Mr. DANNEMEYER. Certainly. Mr. BRINKLEY. The resolving

clause is as follows:

Now, therefore, be it Resolved, That the President, the Board of Governors of the Federal Reserve system, and the Congress should take the following three steps:

Toward this goal I have outlined steps to lower and stabilize interest rates. There are three of them:

First, immediate spending cuts should be made by identifying and eliminating nonessential and low priority items which may remain in the budget.

Second, Government revenues should be increased by eliminating existing preferences, such as last-minute inducements added to the tax bill and tax loopholes, which are neither fair nor necessary.

Third, the Board of Governors of the Federal Reserve System should prudently increase the money supply in order to ease the burden on credit markets and restore public confidence in the Board.

I might add, congressional confidence in the Board.

This plan, I say to the gentleman from California, would be a broad-based approach. It would combine the three elements and I believe would restore some stability and some confidence in the future of the money supply.

As to item 1, the gentlemen has made a good effort in identifying the items in the budget which could be considered. I do commend the gentleman for that.

On item 2, if there are loopholes in our tax structure, if there were things added as inducements, as no doubt there were because we are such a diverse people, then we might want to look at them again with cooler heads and wiser thoughts.

Then finally, as to the Board of Governors of the Federal Reserve System, we have got to understand that once usurious interest rates get out of sight as they are today, that productivity which is the salvation of our country is gone. We simply must have interest rates which are affordable by business and by agriculture if we as a Nation are to survive.

Therefore, this is the plan that I have. I salute the gentleman for the contribution he has made today and intend to examine these budget items to which he has referred and to which he will refer in an effort to join forces in the best interest of the country and, of course, the economy.

Mr. Speaker, the resolution is as follows:

H. RES. 211

Resolved, That current high interest rates constitute an unprecedented threat to American agriculture and businesses, which depend on credit, and American consumers who depend on their products and services; and

Whereas the causes of these interest rates are acknowledged to be higher than expected government deficits, increased consumer spending, and the restrictive monetary policy followed by the Federal Reserve Board, and

Whereas dealing with one of these causes alone to a degree sufficient to bring about immediate interest rate relief could exacerbate other economic problems so as to cause more harm than good: Now, therefore, be it

Resolved, That the President, the Board of Governors of the Federal Reserve System, and the Congress should take the following three steps:

First, immediate spending cuts should be made by identifying and eliminating nonessential and low priority items which may remain in the budget.

Second, Government revenues should be increased by eliminating existing preferences, such as last-minute inducements added to the tax bill and tax loopholes, which are neither fair nor necessary.

Third, the Board of Governors of the Federal Reserve System should prudently increase the money supply in order to ease the burden on credit markets and restore public confidence in the Board.

Mr. DANNEMEYER. I thank the gentleman for his comments. I wish the gentleman well on his resolution.

On the first item, I am wholeheartedly in agreement with the gentleman.

On the second item, I think, frankly, there are some elements in that tax bill that were a compromise, as the gentleman pointed out, that individually if we had a chance to vote on we would reject them as not being in the best interest of the country.

On the third element, we can talk about the stewardship of the Federal Reserve Board members at some length. This Member from California happens to believe in the evidence that this year the expansion of the money supply has been far in excess of the target set by the members of the Federal Reserve Board themselves. For instance, the target the Board set earlier this year was a growth in M1B of money supply for this year of 3 to 5 percent. In fact, the data indicates the growth of that statistic M1B in this year 1981 calendar year to date for the 8 months on which the data is available indicates a growth is of a magnitude of 8 or 9 percent, which is baffling.

In other words, it is my conclusion that rather than a tight money supply, the Federal Reserve Board is pursuing a loose money supply policy which is exacerbating inflation and high interest rates.

Let me add, though, that we should be careful as Members of this body to shift the responsibility or the burden on to the Federal Reserve Board for managing the economic affairs of this Nation. The Federal Reserve Board, in the opinion of this Member from California, has been irresponsibly expanding the money supply in the decade of the seventies in order to provide the liquidity in the banking system to finance the irresponsible level of spending of this institution, the Congress of the United States.

What I am saying is this: The irresponsible level of spending going on by this body today is not the cause of what the Federal Reserve Board is doing. It is what we Members of Congress have done. The buck stops here. If we Congressmen want to stop the irresponsible level of spending, we have to take the intellectual courage collectively to adopt one or more of these items in this work product.

I am not suggesting that every one of these should be adopted by the Congress. The spirit of this effort is nothing more than to suggest to Members that here are opportunities whereby we can cut spending, to bring down interest rates, because the Federal demand for credit this year is so extensive. Specifically, 35 to 40 percent of the available credit every month is being consumed by the Federal Government. If we want to reduce the Federal demand for credit, we are going to have to reduce Federal spending.

I say to the Members, if they do not like these 272 items, what are your recommended changes or ideas for reducing spending?

Mr. BRINKLEY. Mr. Speaker, will the gentleman continue to yield?

Mr. DANNEMEYER. I would be happy to yield.

Mr. BRINKLEY. As my friend knows, I do not impugn the steward-ship of the members of the Board of Governors. Certainly they need the wisdom of Solomon in this day and time in trying to achieve what their charter calls for and to be insulated from the political arena as they are.

I am certain they are doing all that they can in good conscience, but the fact remains that there is a severe problem with reference to money markets. Of course, the gentleman feels that the money is not tight, that there is probably more in circulation than there should be.

Well, reasonable men may differ and, of course, we do differ in that regard; but I would like to propound a question to the gentleman under this scenario.

Mr. DANNEMEYER. Yes.

Mr. BRINKLEY. With reference to the money in circulation and how we could best achieve our common goal, let us play as if the tax bill had not been passed and let us assume then that the deficit would be far less and that the demand of the Federal Government on the money supply would be far less. Then would the gentleman not agree with me that the interest rates would be far less than they are today because of the lower deficit which would in and of itself make a

fine contribution to productivity, toward the continuation in business of

farmers and businesses.

Mr. DANNEMEYER. The gentleman makes a very good point. Specifically, we cut taxes for fiscal year 1982 about \$55 billion in the tax bill. If we had not cut taxes, the deficit would be approximately eliminated or close to it.

It is tantalizing then to say, "Well, maybe we shouldn't have cut taxes."

I do not accept that and I will tell the gentleman why. If we are truly interested in establishing incentives in the Nation for economic expansion and incentives for people to work and invest and save, we must as a principle reduce the heavy level of taxes on the American people. It so happens that the tax load on the American people today is the highest in the history of our Republic in peacetime. I think that is unacceptable and this was the mandate that our President Reagan ran on last November and the people elected him to do. The tax bill is now a part of our economic system.

In 2 years' time, in my opinion, 18 months to 2 years, the feedback to Government from the economic expansion of the reimplementation of those tax cuts are going to do, I think, profound beneficial good to the Treas-

ury of the United States.

Our challenge is what do we do in the interim when the demand for financing this deficit or these deficits is so excessive? That is the full thrust of

this work product.

I believe sincerely that we have the challenge in the Congress of the United States this month before this year is out to adopt significant further budget cuts in order to reduce the demand of the Federal Government for credit to drive down interest rates, to help stimulate economic recovery.

□ 1030

Mr. BRINKLEY. If the gentleman would yield, finally, I do not disagree with the gentleman. I, too, supported the tax bill. I think one of the most important things the tax measure has achieved is a new attitude among the American people. You know, it is a thing of good cheer and enthusiasm to work and earn, because you can keep more. Motivation is a thing that drives a free people. That is what the gentleman and I believe in.

Mr. DANNEMEYER. We share that

belief.

Mr. BRINKLEY. I thank the gentleman.

Mr. DANNEMEYER. I yield back the balance of my time.

WE MUST MEET THE SOVIET CHALLENGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

Mr. GINGRICH. I thank the Speak-

Mr. Speaker, I requested a special order today because at the present moment the Reagan administration is in the process of making a series of decisions about the defense budget, about the future of defense spending, about the structure of our defense forces, which I believe need to be carefully examined.

The context and structure of those decisions, I think, need to be explained to the American people, and within the administration itself there is a lively debate going on as to how much defense we need, how much defense we can afford, and frankly, I think there is a third element missing in that debate, and that is the purpose of

today's talk.

I am convinced that we need not only a revolution in the public willingness to meet the Soviet challenge, not only a revolution in the Congress willingness to support the Secretary of Defense and the President; we also need a revolutionary commitment by the President and the Secretary of Defense to fundamentally reshape the structure and nature of the Pentagon, to produce the speed of decisionmaking, the efficiency, and the effectiveness in the Pentagon bureaucracy that we are seeking in the civilian bureaucracies.

To place this in context, I think we have to begin with President Reagan's commitment. Under President Carter, in constant 1982 dollars we had proposed to spend \$172.9 billion in 1980 in obligational authority. That had grown to \$186 billion in 1981 and to

\$196 billion in 1982.

Under President Reagan, however, we dramatically increased from \$172.6 billion in 1980 to \$193.9 billion in 1981, to a proposed \$222.2 billion in 1982, to \$238.4 billion in 1983, and so on. It is the largest increase in defense spending in peacetime since the late thirties.

Why did President Reagan believe we need that increase? Because the President and his advisers believe that the world is dangerous, because they believe that the Soviet military build-

up is a threat.

I agree with them. The world is dangerous. The Soviet military buildup is a threat. I would, in fact, go further than they are suggesting. I think the American people need to be told the simple truth, which is that if war came tomorrow, the United States would lose; that there is no conceivable victory that one can project from any battlefield with the Soviet Union except at the extremities of the Soviet power; that in Europe or anywhere within reach of the Soviet forces on the Eurasion Continent the United States could not defeat the Soviet Union.

Part of the reason we are in that shape is because we have been following for 30 years a war-deterring rather than a war-winning strategy. We have followed the policy that says if you will think of the story of the three little pigs, we will not build a brick house that the big bad wolf cannot blow down; we will build a paper house, but we will paint it to look like bricks. If the wolf is convinced it is a brick house, nothing bad will happen.

That war-deterring strategy worked as long as we had domination of strategic nuclear weapons. It has worked as long as the Soviet leadership has not tried to gamble. But the simple truth is that should war come, the

United States would lose.

We would lose because we do not have adequate troops, we do not have adequate reserves, we do not have adequate equipment, we do not have adequate munitions. In fact, if you look at the Franco-Prussian War of 1870, I think it will be found the most accurate model of what would happen in an American-Soviet war in the eighties. Unfortunately, we play the part of the French.

We have too few troops. They are not positioned well. Their doctrine is inadequate. We are not keeping up with technology. The sum total of our lack of commitment to reality for the last 20 years in defense is that we are today in terrible danger, should war come, of decisive defeat.

How vital is this consideration? How important is it to use as everyday citizens to worry about a war that probably will not come; to worry about a

battle that may not happen?

Let me suggest first of all that the actual processes of defeat is, itself, in wartime, everything. No matter how good your intellectual arguments, no matter how good your bureaucracies, no matter how eloquent your statements to Armed Services Committees, if you cannot win on the battlefield, nothing else matters.

It was said best by Winston Churchill, who warned us in "The Gathering Storm," quoting from a speech he made in 1934, that wars come quickly, that you cannot be certain when they will happen, that one day suddenly an ambassador comes, he delivers a message, and the following day your countries are at war.

The battlefield is more than just this front or that front, this division or that division. The battlefield is the heart and mind of the nation, the strategy, the general conditions in which the political leadership makes decisions.

Harry Summers, in an excellent book on Vietnam entitled "On Strategy—The Vietnam War in Context," Colonel Summers, currently an active officer in the Army, teaching at the Carlisle War College, begins his book with a quote.

"You know, you never defeated us on the battlefield," said the American Colonel. The

North Vietnamese Colonel pondered this remark a moment and said, "That may be so, but it is also irrelevant." Conversation in Hanoi, April 1975.

The North Vietnamese won that war on the battlefield of our minds, on the battlefield of our budgets, on the battlefield of our foreign policy, even if they never won that war on the battlefield around Saigon, so long as American troops were present.

Currently, we face a crisis because we are losing a war on the battlefield of the Pentagon, just as surely as we are losing a war potentially on the battlefields of Europe or the Middle East.

President Reagan attempted to shift the quantitative side of defense spending. He attempted to increase dramatically our commitment to a sound defense. Secretary Weinberger has done, I think, an excellent job, at the strategic level, of forcing the military bureaucracies to think again and again about the MX mobile basing system. Under Secretary Carlucci has done a super job of forcing fundamental thinking about procurement policy within the context of the Pentagon. In some recent votes on authorization bills, we have changed some of the laws to allow the Pentagon to spend more wisely.

But on balance, the Reagan administration has not done the job it needs to, and as a consequence we are today at the beginning of our first retreat from what was a brief, 6-month surge

of defense spending.

There are three reasons we are retreating. First, the Russians have not invaded Poland. The world seems less dangerous. And shooting down two Libyan jets felt good. It gave the American people the sense that we showed them.

Second, the wave of spending cuts on the civilian side has not been matched by equal toughness in defense spending. There is not a sense that we are as willing to grill the generals as we are to grill the civilian bureaucracies. While I praise Secretary Weinberger and Under Secretary Carlucci for their initiatives, I have to fault them for their lack of flair, their lack of publicity. To too great an extent "Cap the Knife" is in danger of becoming "Cap the Advocate," and should that happen, I fear he will lose his effectiveness in convincing the American people that we will question a military bureaucracy as tightly as a civilian bureaucracy.

The third and deeper reason that the Reagan administration is steadily losing ground in the Congress and I think ultimately in the news media in the country on the issue of defense sending is because the dry rot of the Pentagon bureaucracy remains unchallenged. You can take every quote by President Reagan about bureaucracy in general, every quote about its waste, its silliness, its lack of direction,

and you can apply them to the Pentagon. The reality is that the Pentagon is the largest, most sophisticated bureaucracy in this city; that for last 35 years they have systematically and steadily developed an ability to do less and less while spending more and more with greater and greater complexity.

Here are some recent examples:

The Desert One tragedy in Iran led to no firings, no resignations, no courts of inquiry. When the British in the 18th century lost Majorca, they executed the admiral who failed. In this country on all too many occasions in recent years we have promoted the senior officer who failed.

On cost overruns, to the best of my knowledge, there have been no major firings of the military leaders directly involved in spending large chunks of money. In effect, whatever happens on the battlefield or in the building project the game goes on. In many cases the officer who had the overrun ends up working for the company he had the overrun with.

Simply throwing more money at obsolete ideas and absurd structure does not solve anything. In the long run, it may in fact weaken things both by crippling those of us who favor a strong defense, and also by leading some people to believe we are actually being saved while all we are being is wasteful.

The challenge I would raise is much deeper than anything we have seen this year. If the administration thinks the defense threat, the danger of war, is important enough to spend this amount of money on, then it ought to be willing to fundamentally reform the Pentagon bureaucracy. We need Elihu Root, not Henri Maginot, as Secretary of Defense. We need a willingness to fundamentally restructure things.

For those who remain faithful to the vision of military bureaucratic competence, let me suggest the following facts should at least lead them to question their faith.

First, I have asked this of every officer I have seen recently. There is no major war we can win with the Soviets, period. Let me repeat that. There is no major war we can win against the Soviets, period.

Second, we now focus on buying high technology in a narrow formula that prevents us from using the high technology we spend so much money on. For example, we buy the F-15 fighter aircraft, a superb aircraft, clearly one of the two finest air-superiority fighters in the world, the other being the F-14. We buy it with enormously complex and expensive electronic gear so it can fight in what is called a force-on-force conflict; that is, with many aircraft in the air at one time. Yet in testimony before the Senate Appropriations Committee on

the Department of Defense appropriations for 1981, General Russ said about the third level, which is force on force—

So I would say that 95 percent of our people are at level 1, maybe 50 are at level 2, and a few are at level 3.

What that means is that you are buying extraordinarily expensive aircraft which you are not flying the pilots in long enough to use the aircraft at its current capability, so that 50 percent of our pilots are using the plane as though it were a dramatically cheaper one-on-one fighter plane. Another 40 percent or so are using the aircraft as though it is a slightly superior one-on-two or one-on-three airplane. And probably 10 percent of your fighter pilots are sufficiently qualified to use the airplane for the purpose you paid for. It is like using a Cadillac as a dump truck. And it is done because the Air Force is focused on procuring hardware rather than on building a balanced force that has enough money to fly the airplane, to train the pilots, to buy the munitions and to maintain the entire system.

We have to develop a total equation of research and development, procurement, maintenance, training, in order to measure full systems against each other.

Third, we are buying an all-high-technology force in a way that is historically absurd. The reality is that high technology limits size, and as Lord Nelson warned us, "Numbers annihilate." It is important to remember that when the German Army invaded Russia in 1941, there were only 24 armored divisions. The rest of that army was infantry with horse-drawn logistics. The Israelis in 1973 were still using World War II super-Sherman tanks when necessary.

We simply cannot buy enough F-15's, F-16's, and A-10's to equip all of our Regular Forces and all of our Reserves. But the professional military bureaucracy's answer is to blame the politicians and the people. That is candidly a copout.

Wellington had to fight the peninsular war with the army he had, not the army he dreamed of. Midway was won in what Walter Lord called an incredible victory, with the Navy available, not the Navy Admiral Spruance wanted.

The current military bureaucracy buys what it wants and shrugs off the gaps in procurement and training as someone else's fault. That is simply fundamentally professionally wrong. It is like buying a new car and having no money to buy gas to drive it home. The Syrians in the Golan Heights in 1973 lost over 100 tanks simply because they ran out of gasoline.

□ 1045

The Japanese suffered extremely high aircraft losses in the Mariana turkey shoot of 1944 because they could not train the pilots. The first operational jet fighter of Germany, the ME 262, could not achieve its peak effectiveness because of the lack of aviation fuel in Germany in 1944 and 1945. The American military bureaucracy is actually planning, in the purchasing patterns we see, to create the probable fiascos of the future for our own military: to spend the money in such a manner that you cannot finish the entire process; that fancy weapons systems exist that cannot be used is simply irresponsible.

Example: We have a long war structure for the Army that is capable, not of fighting a short war, but fighting only a skirmish; literally incapable of fighting even a war the length of Yom

Kippur.

Mr. ROTH. Mr. Speaker, will the gentlement yield?

Mr. GINGRICH. I yield to my good friend from Wisconsin.

Mr. ROTH. Mr. Speaker, I thank the gentleman for yielding, and I want to commend him for bringing a new dimension, a new variable, into discussions that I see taking place in discussions on our military preparedness.

All to often, I think, we recite the same cliches and go along with the same type of thinking, and what we need now is to think anew and act anew. I do not see that type of thinking forthcoming, so I thank the gentleman for taking the time to prepare his statement, which I think is very well thought out and very well delivered incidentally, too.

I am reminded, when the gentleman was quoting the different generals and the different situations, that Caesar had a motto, which was, "Divide et vinci," meaning "Divide and conquer."

I think that is taking place to some degree in the Western World, if not to a great degree, in the Western World today. I think we have to speak with one voice. It is not how many dollars, how many billions we spend, but how we spend those dollars. I think that is what the gentleman is driving at.

We cannot have people in our own administration continually disagreeing with each other. I think, quite frankly, that we have to speak with one voice—not only our country, but in the Western World—if we are going to preserve

the peace.

I think the gentleman's analysis of the Pentagon deserves some consideration on this floor by those of us who are entrusted with the responsibility to look at not only the defense budget but also how those dollars are being spent. Quite frankly, I do not see a Winston Churchill in America today sounding a clarion call for new thinking and to wake up the American people, but I think maybe this is a

step in the right direction by our friend from the State of Georgia.

The other thing, when we criticize the Pentagon, and rightly so because there is criticism I think that Department should be subjected to, we have to remember that we bear some of that responsibility right here in this House. How many times have you heard a general make an unpopular decision or opinion in public and have people go to the well to back up that general? I have not heard that very often. In fact, I cannot remember a single instance, because today in America you have to be popular and whatever you do has to be popular. You will never do the unpopular thing, and what we need in America today is the unpopular thing because the message that the American people have to hear, my friend, is not going to be popular.

So, I commend the gentleman from Georgia for taking the well at this time and giving us the benefit of his thinking. I hope that he will do this more often in the future, because it is not ourselves, but our children and our grandchildren that are going to be thankful for the work that is being done by the gentleman on bringing a new dimension to the thinking of America, because we have been going along in a stereo thinking for all too often. We are still fighting the Second World War. That is a thing of the past.

Mr. GINGRICH. I want to thank my colleague. I could not agree with him more. His comment on unpopularity—you know, it is always more popular to buy ice cream than health insurance. It is always easier to buy the immediate goody than it is to buy fire insurance. Yet it is very improvident and in the long run unwise. I think what we are trying to buy now is the right fire insurance, structured in the right way.

The current bureaucracy at the Pentagon, if I can pursue along the line of my colleague, it is vital to recognize that we have here a systematic dry rot that runs very deep. We have highly sophisticated airplanes, with pilots who cannot get enough flying time to use the equipment that we are paying for. We have carrier battle groups expensively built to survive multiple hits, with expensive F-14's, with inadequate supplies of Phoenix missiles. The carrier might survive the hits, and since it is nuclear it would not need refueling. The problem is, it just could not flight because it would run out of munitions. We would have in effect a large luxury liner with 6,000 men on it after the first few days of the war.

In sum, we are facing a military disaster of the first order unless we shift from a war-deterring to a war-winning strategy. The war-deterring model works fine as long as nothing happens to make you use it. It is, in effect, an

extraordinarily expensive bluff, but there is no survival.

The current crisis of high interest rates is forcing the administration to rethink its defense budget. That is good. Secretary Weinberger and Under Secretary Carlucci have done a good job of questioning the MX basing system, on revising procurement, on reestablishing morale in the services. Now they face a new challenge.

I remind you that Winston Churchill, in a speech made in the 1930's in a book called, "Blood, Sweat and Tears," said:

I have always had sympathy for my right hon. Friend, the Minister for the Co-ordination of Defense. On public grounds, at considerable personal sacrifice, he accepted nearly three years ago an office for which his high gifts and lifelong specialist training had in no way fitted him. And as the House seemed to realize at the time, although it could not shake off its inertia, the office itself was framed in a manner so curious that he really never had a chance of discharging it successfully. It was a compromise which bore in every paragraph the imprint of inter-departmental interests, and rivalries.

Tragically, in our society nothing has changed since Churchill issued that warning in the 1930's. We are now in the midst of the greatest revolution in peacetime defense spending since the 1930's. We need an equally great revolution in defense thinking and management. As they prepare the defense budget cuts this weekend, I hope that Stockman and Weinberger and Carlucci will plan to do the following 15 things:

First, tell the American people the truth about the scale of the Soviet military buildup. At the present time, there is no clear understanding in this country of what would happen if we went to war, of the awesome scale of Soviet military strength, and of the fact, quite simply, that we would lose.

Second, tell the American people the truth about our military unpreparedness. Right now, they have inherited somebody else's mess. Now they have the Carter defense structure, but if they do not share the full, grim story of our inadequacy, people cannot understand why we have to rebuild virtually everything.

Winston Churchill, again in 1938, reported that he had been misled by the Secretary of the Air, and he said:

When does the House suppose that statement was made? Not last month, or last year. The date is July 20, 1936—twenty-two months ago. And I say that that statement certainly gave the impression to the House that all was proceeding well, that a great flow of modern machines was proceeding from the factories into the Royal Air Force. I know my right hon. Friend would be the last to mislead the House of Commons. But he was himself misled, because he had not the knowledge or experience, great as is his legal acumen, to enable him to conduct the necessary technical cross-examination.

I hope the new Air Minister will imitate the example of Lord Baldwin, and when he makes a mistake blurt it out in the most appalling manner, so that, at any rate, whatever we may complain about, we cannot complain that we have been misled.

I think that is excellent advice for the current team. They do not have the experience; they will not have the experience; they cannot have the understanding, and they are far better off to preside over an opening and flourishing debate for the next year than they are to make decisions now with inadequate data which will lock them into the Pentagon bureaucracy in a manner which will be unacceptable to the Nation and in the long run, I fear, unacceptable to history.

Third, they must force the military to build from the battlefield back to the Pentagon. Right now, we do the opposite. There are four separate battlefields for our separate services. The Navy has a sea war different from the Air Force. Indeed, there are separate battlefields inside the same service, and you can find a variety of battlefields described by different branches of the Air Force, Army, or Navy.

The time to integrate the battlefield is now, while planning, not during a

war while dying.

Fourth, they must force a shift from an attrition-oriented doctrine to a maneuver-oriented doctrine. The scale of misunderstanding of the concept of maneuver inside the professional bureaucracy, military and civilian, is so fundamental that it is appalling. John Wilcox of the Army Concept Analysis Agency is quoted in the fall issue of Armed Forces and Society, as follows:

One "serious political constraint" is the Federal Republic of Germany's insistence that as little ground as possible be lost and that damage be confined to a minimum.

His argument against full-fledged maneuver warfare would sound insane. The Wehrmacht certainly did not launch the blitzkrieg into France by attacking back into the Ruhr; or by the Israeli Army, which has the least ground to give of any army in the world and is the most committed to the maneuver doctrine. It is fundamentally childish and almost unbelievable intellectually that the concept of maneuver doctrine, which is fundamental to history, which is illustrated by the Wehrmacht and the Israeli Army, by the Mongols, that that concept is as thoroughly misrepresented and thoroughly misunderstood, either willfully or out of sheer ignorance, by so many of the senior military bureaucracy. It is a phenomenon that historians will wonder about.

Fifth, we must procure from today's crisis forward; no budget cuts can be allowed to affect our ability to win or lose in 1982. It is clear that we would lose today. At a minimum, we should not make it easier to lose in 1982. At a maximum, we must replenish operations and maintenance and munitions

and training before doing anything about the future beyond 1982.

As Churchill warns us in "The Gathering Storm":

Wars come very suddenly. I have lived through a period when one we looked forward, as we do now, with great anxiety and uncertainty to what would happen in the future. Suddenly something did happen-tremendous, swift, overpowering, irresistible. Let me remind the House of the sort of thing that happened in 1914. There was absolutely no quarrel between Germany and France. One July afternoon the German Ambassador drove down to the d'Orsay and said to the French Prime Minis-"We have been forced to mobilise against Russia, and war will be declared. What is to be the position of France?" The French Premier made the answer which his Cabinet had agreed upon, that France would act in accordance with what she considered to be her own interest. The ambas-sador said, "You have an alliance with Russia, have you not?" "Quite so," said the French Premier. And that was the process by which, in a few minutes, the area of the struggle, already serious in the East, was enormously widened and multiplied by the throwing-in of the two great nations of the West on either side.

To go on, and I quote:

We may ourselves, in the lifetime of those who are here, if we are not in a proper state of security, be confronted on some occasion with a visit from an Ambassador, and may have to give an answer, and if that answer is not satisfactory, within the next few hours the crash of bombs exploding in London and the cataracts of masonry and fire and smoke will warn us of any inadequacy which has been permitted in our aerial defences. We are vulnerable as we have never been before.

The final quote, which I hope will most concern those of our friends in the Pentagon who mean will but do ill, is:

Not one of the lessons of the past has been learned, not one of them has been applied, and the situation is incomparably more dangerous.

Let me suggest, as we begin the budget for 1982, we start with insuring that we survive 1982.

Sixth, we must force research and development for the future outside the military frame of comfort. Currently, while we are spending enormous amounts on research and development, we are spending it on things that the senior officers feel comfortable with, that they feel good about. I would suggest to you that, by definition, those things in the late 20th century which a man who entered service 30 years ago likes and feels comfortable with are almost by definition not the things which will dominate our grandsons' wars. They are not the things we should spend research and development money on. We need once again the Carl Vinsons in the House, forcing us to spend money on airplanes, as he did in the 1920's. Now, we need someone forcing us to spend money on the equivalent of airplanes for the 1990's.

In the 1930's, Adna Chaffee, an old cavalry officer, a man who had grown

up in the Army of the American Indian wars, a man who had literally been a horse cavalryman, fought a war for the tank worth remembering.

I quote from "Alternative to Armageddon," a study by four military officers of the need for maneuver:

So it was in this frustrating environment that Adna Chaffee was compelled to labor. As early as 1927 he began his campaign for mechanization as a member of the General Staff in Washington. Shortly afterward, General Summerall, then Chief of Staff, issued a directive for the organization of a mechanized force based on concepts furnished by Chaffee, who also contributed to a written report of the War Department Mechanization Board, of which he was a member.

□ 1100

But in the depression years Congress was in no mood to appropriate funds to support any such activity. Moreover, the limitations on appropriations in general spurred on the jealousies of service branch chiefs who saw their very existence threatened. The result was ten years of bickering and political infighting which told heavily on Chaffee's health.

He prepared a lecture, "Mechanization of the Army," which he delivered at all the service schools and finally before the students and the president of the Army War College. He concluded the talk with the remark, "The main point is that we, as soldiers must recognize the tremendous strides our automatic industry has made since the last war. If we neglect to study every possible use of this great asset in the next war, we would not only be stupid, but incompetent."

"I then had the honor," said Chaffee, "of being told by the President of the War College that my lecture was visionary and crazy."

Chaffee's realization that the motor had replaced the horse came as a shock to many service friends. In the United States, as in Britain, the tradition of the horse died hard.

When the armored force was finally formed, with Chaffee in command it might have been said that he had gained his objectives. But the years of frustration had taken their toll. Broken in health, he died in 1941 at the age of 56, after a recommendation for his promotion to the grade of lieutenant general had been made, and just as the German panzers were demonstrating the soundness of Guderian's doctrine, so much like his own. * * *

Chaffee, of course, had help. Palmer, Charles L. Scott, and Willis D. Crittenberger all pioneered in the development of the nucleus of the American lighteningwar capability, all except Palmer going on to brilliant field or school commands. Then too, there were unsung young lieutenants, Withers, Heiberg, Sears, and many others of like grade who evolved the tactics of the smaller units and kept their cranky and unreliable vehicles in operation through sheer determination; many even purchased gasoline from their own limited funds, an unchallengeable sign of personal interest. Mildred Gillie, in her fine study, "Forging the Thunderbolt," recounts the details of these formative years.

One of the great prophets of blitzkrieg, in the field of automotive design, and one without honor in his own country was J. Walker Christie. As an engineer Christie developed a new and critically important suspension system for tracked vehicles. But for reasons most combat-experienced officers have never been able to fathom, the Christie system was never acknowledged by the U.S. Ordnance Department. Yet the concept was welcomed abroad, especially in Russia, where tanks began to be mass produced in 1936, using the Christie design. In this year the United States ceased to give Christie further consideration. Ultimately, the Russian T-34 tank, then the best in its field, emerged not only with his suspension system but with his ideas on sloping armor

Where today are the Chaffees? Where are the Christies? Where are the Wright Brothers, who were turned down by the Army in their first request to experiment with the airplane? It is vital that we move in such a manner and that Secretary Weinberger moves in such a manner that we recruit throughout the existing bureaucracy those men and women with ideas. The reality is that we are currently backing all of the proven winners of the last war and starving all of the possible winners of the next war.

Seventh, we must force the services to justify every defense expenditure within an accepted Joint Chiefs' battlefield plan. How does each dollar help us win on the battlefield? How does it help the other services do their job, and do the other services agree that it helps them to do their job?

Eighth, we must force the services to cut their internal bureaucracy. In effect, we must deregulate the military. As a goal, how much paperwork do we have to do to cut one-half of the total military and civilian personnel working in the Pentagon and its satellites?

Ninth, we must cut our procurement time or cycle down for battlefield use. We must cut it down to do longer than the Soviet time.

Churchill, speaking again on the Ministry of Supply in 1934, said, and I quote:

I am very anxious to press the point of a Ministry of Supply. Let us see what is the present organization that is employed in producing armaments from British industry. It is an extraordinarily cumbrous and complex organization. First of all there is the Admiralty, with all its establishments and activities. Secondly, there is Admiral Brown's Department of the War Office. Admiral Brown is Director-General of Munitions production for the War Office, and he is a member of the Army Council. He makes for the War Office and he makes certain things for other Departments as well. Included in his sphere is the old Department of Master-General of the Ordnance, which we were told was working so splendidly a year ago, but which, when the new Secretary of State for War came along, was found to be in such a condition that it had to be transferred en bloc to the control of Admiral Brown. Thirdly, there is the enormous system of committees working under the Committee of Imperial Defense.

In the same speech Churchill went on to say something which similarly could be used to describe our world today:

I was surprised at my right hon. Friend. He treated the matter, when he was describing the reason against a Minister of Supply, as if everything that had happened so far was satisfactory. That apparently is his point of view. I say this machinery has failed; I say it has not delivered the goods. And this is the machinery which some people think should be replaced forthwith by an effectual Ministry of Supply under a responsible Parliamentary head and with all necessary executive powers. The Prime Minister obdurately resists this Ministry of Supply. He made difficulties today about powers, and seemed to be willing to excite a prejudice, which I do not think exists, upon the other side of the House against reasonable powers. Who has ever suggested that this Ministry should be equipped with power to prevent strikes in time of peace?

He goes on to say that-

British industry is more flexible and more fertile than Germany industry in every sphere except munitions. We have for generations completed successfully on even terms, and even adverse terms, in the markets of the world. If Germany is able to produce in these three years equipment and armament of every kind for its Air Force and for sixty or seventy divisions of the Regular Army, how is it that we have been unable to furnish our humble, modest military forces with what is necessary? If you had given the contract to Selfridge or to the Army and Navy Stores, I believe that you would have had the stuff today.

The essence of what Churchill was saying and what I am saying almost 50 years apart is that it is necessary to cut through the redtape of peacetime in peacetime or one will have to cut through the redtape in wartime.

Tenth, we must force intellectual vigor and professional honesty into the planning and debate inside and

outside the Pentagon.

Civilian aide Franklin Spinney has a brief entitled "Defense Facts of Life." It is a radical critique of the Air Force. It is candidly being savaged and knifed in a petty bureaucratic war worthy of the subject of a C. P. Snow novel. It is clear that there is in fact an Air Force rebuttal to the Spinney brief. It is clear that it is a secret, hidden rebuttal. It is clear that the Air Force will not come out in the open with it because they do not want to get into a debate they may lose. It is precisely the wrong kind of maneuvering. It is a maneuver warfare of the shallowest and meanest kind. Spinney may be wrong, but he deserves an honest, open debate. In fact, I would far prefer to see us promote people who debate honestly even if they are wrong than to promote people to hide from debate even if they are right. In the long run we can afford wrongness in the right process far more than rightness in the wrong process.

Similarly, the Navy response to diesel submarines has been as fundamentally misleading as the Air Force

response to the Spinney brief. Some Navy officials will tell us that diesel submarines are noiser than nuclear submarines, when the simple fact is that they operate on battery, and the West German diesel submarine is quieter and better than the nuclear submarine, and it defeats our antisubmarine warfare forces.

Eleventh, rather than cutting across the board, we have an obligation to zero out some items. I would suggest the F-18 as a start. We need to systematically decide what we cannot afford and cut those chunks of the budget in whole rather than nibble every piece so all is weak and none is strong.

Twelfth, we must confront honestly the manpower issue. The simple reality is that we can have a professional military if we have the strategy of Pitt the Elder to focus on blue water, but we cannot have a professional military if we intend to have the Marlborough continental strategy.

Two wars in this century taught Great Britain that they cannot avoid war if the European Continent is threatened. We cannot either. The simple reality is that if we are going to protect Western Europe, if we are going to protect the oil reserves, we must have reserves, reserves, reserves.

Look at the figures for Soviet and American mobilization of D-plus-90, 90 days after war begins, and you will find that it is absurd that we cannot possibly survive. To have a military effort large enough to stand against the Soviets means a commitment by the middle class far beyond buying mercenaries. It means either universal military training or the draft. There is no other solution that is believable on the battlefield.

Thirteenth, the very nature of a potential theater of war with the Soviets requires a massive buildup of the Reserves and the National Guard. Any plan or budget which does not include the National Guard and the Reserves as the very base of our long-term warmaking capability is simply nonsense. A war-winning battlefield-oriented defense rests on Reserves. That is not without reality in history. The Israeli experience in 1973 was that they could mobilize their entire civilian reserves in 24 to 48 hours and go to war on a surprise basis. It was the French lack of reserves in 1870 which made defeat almost certain. It is the American lack of Reserves which would make defeat almost certain for us in the eighties. We must fundamentally put the National Guard and the Reserves in the center of our defense plan.

Fourteenth, we must go into space in a massive way. It is the aviation of the 21st century. It is a zone where we can with our high technology, electronically focused industry, have the greatest advantage over the Soviets. It is the area where we can regain domination of the exploration of space. It is literally irrational to focus on pouring concrete for MX missiles instead of building electronic capabilities for space when all of our strengths are in space and none are in concrete. It is vital that we have a dramatic plan, at least comparable to the Vinson shipbuilding plan of the thirties to make America the dominant Nation on the escalation ladder and to give us a chance to survive in space.

Fifteenth, finally, we must assume an interactive model of defense planning. The Soviets are going to respond to whatever we do. For far too many years we have bought for the battlefield of the next year and finally get the equipment 5 years later and then are shocked that the Soviets have done something different than what we had planned. It is time to have interactive planning and game out what we think their response will be to our developments, because we are in the long run a more flexible society and we had the capabity to outmaneuver them.

Our critics will say that these ranges of ideas are academic and theoretical. As one general has charged, they are the product of theorists who—and I quote—"do not have combat experience or even a military background." That is the rankest nonsense and the clearest example yet of bureaucratic thinking.

Moltke the Elder's first combat experience came as commander in chief of the Prussian Army in a war with Denmark in 1864.

Eisenhower technically never had a combat command. He was a Camp Colt trainer in armored tankers in Gettysburg during all of World War I.

The Prussian Army adopted revolutions and firepower and maneuverability and communications in the 1850's and 1860's without fighting a battle, and it fundamentally changed in peace time by following professional standards.

Simply stated, professional military doctrine based on professional principles in military history should be arguable on the grounds of professional standards. It is a sad cry of decay to attack the critics instead of the criticism, to snipe at the person instead of the idea.

What we are trying to do is to replace a war-deterring model that is rotten to the core, that dooms this country to defeat in any war in the near future. It is a war-winning model that allows us to survive as a free country. As an historical analogy, we are trying to have Scharnhorst without Jena. We are trying fundamentally to reform the military without having a decisive military defeat. It happens seldom, and it is unlikely, unless this Congress forces those changes, that it will happen now.

President Reagan, Secretary Weinberger, and Under Secretary Carlucci have an opportunity to design a military system that preserves freedom in this country for the foreseeable future. That system does not exist. Simply buying more hardware or paying more for the officer corps will not create that system.

As Churchill warned us, war could come at any time. I have spoken today because it is my hope that as the administration focuses in the next few days on the kind of budget changes required by the high interest rate situation, the administration will recognize that while it has done much to increase our awareness of the dangers and while it has done much to explain the need for more spending, its efforts to fundamentally create an open debate, to create an opportunity for genuine dialog, and to create a professional doctrine against which to measure the budget, in that zone we are at ground zero, and in some areas frankly we have been declining for the last 2 months.

I fear greatly that the traditional Pentagon bureaucracy, which frankly has failed, is failing, and will fail, is in gave danger of seizing the momentum of growth. Should that happen, it is this Congress which will have to permit it to happen; it is this President who will have to allow it to happen. The burden is on us in the next 90 days to force the Pentagon bureaucracy to begin to change fundamentally, and it is the control of the budget which gives us that opportunity

I thank the Speaker.

□ 1115

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

• Mr. GILMAN. Mr. Speaker, yester-day I was unavoidably detained in meetings at the Department of State and was unable to participate in two rollcall votes. I take this opportunity to announce the positions I would have taken, had I been able to be present.

On rollcall No. 195, the question of whether the House should resolve itself into the Committee of the Whole House on the State of the Union for the consideration of H.R. 4209, which passed 367 yeas to 3 nays, I would have voted "yea."

On rollcall No. 196, the question of

On rollcall No. 196, the question of whether the Committee should agree to the Studds amendment, which added \$84 million for the Coast Guard, and failed by a vote of 129 to 260, I would have voted "yea."

Mr. Speaker, during the months of September, October, and November, I will be serving, at the request of the President, as a member of the U.S. delegation to the United Nations General Assembly in New York which will necessitate my presence at the U.N. in New York on a number of days when the House may be in session. I will attempt to be in the House Chamber to the greatest extent possible during that period. I am today making a separate request to the House for official leave for the purpose of fulfilling my duties at the United Nations.

WE MUST-BUT CAN WE BALANCE THE BUDGET?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Anderson) is recognized for 10 minutes.

Mr. ANDERSON. Mr. Speaker, before going to our home districts for our August work period, this Congress passed the largest tax reduction ever, and shortly before we made massive cuts in planned spending. The cuts in spending were painful for many programs, and some good programs were hurt. Some programs of marginal value were eliminated, although unfortunately a few of these were retained. But these massive cuts do symbolize putting a halt to ever-increasing Federal Government spending.

But now we read in today's newspapers that the administration is gearing up for additional cuts that may reach as much as \$74 billion in 1983 and 1984. I am just not sure where cuts of that magnitude can be derived. With a budget the size of the Pentagon's, there most certainly are marginal programs, such as some of the studies we read about, that should be eliminated. And there are other economies which I feel can be made. But we must not cut the muscle out of our defense. And, I find it hard to conceive that \$74 billion can be cut in the 2 years without drastically impairing our national defense or completely abandoning the social programs which do so much to make America as morally strong and compassionate just as it is today. But I would like to ask my colleagues to look at the other side of the spending cut/ tax package. And that is the tax cut portion.

Yesterday, Alice Rivlin, our very able Director of the Congressional Budget Office, testified that unless spending cuts are made, the Federal deficit next year will reach about \$80 billion. That is nearly double the last official administration estimate that I have seen. And Ms. Rivlin further testified that it would take additional spending cuts of about \$100 billion to balance the budget in fiscal 1984, as President Reagan has promised us he would do. So, Mr. Speaker, where does that leave us?

I want a balanced budget as soon as possible, and certainly by 1984 as Mr.

Reagan has promised. In talking to my constituents at home, there were two main themes underlying all of these conversations. The first is, that interest rates must be reduced. Home building is catastrophically crippled. Young married couples cannot afford to get a place to stay. Automobile sales, truck sales, everything is curtailed due to high interest rates. People cannot afford to pay 20 percent for the money they need to make essential purchases. The second theme was "balance the budget and get inflation under control." And, of course, these two are inextricably intertwined. Inflation has been somewhat reduced. I am happy to say. But in part it has been reduced only at the expense of experiencing the terrifically high interest rates we have seen posted these past months. And I think also the interest rates are reflected in investors' lack of confidence in the stock and bond markets.

Mr. Speaker, earlier this year I introduced a tax reduction bill which embodied many of the features in the legislation which we passed for the administration. I have long called for measures to arrive at a balanced budget, and having reached a balanced budget, in subsequent years to start reducing the nearly \$1 trillion debt which hangs over the American people today. But the bill which we passed went much further and faster in the field of individual income tax reduction than I proposed. I feel that incentives given to business to modernize plants and equipment and thus create new jobs are essential, and that our tax reduction bill in these areas should not be altered. I also believe that incentives to saving must be retained, such as we have done in the All-Savers Tax Act. That, therefore, leaves us one area where moneys could be found to offset the forecast deficit, and this is in the personal income tax. I do not like to pay my individual taxes more than anyone else, but I think we all recognize that paying taxes is our obligation to provide the kind of life that we enjoy in this country today. But I sincerely believe that we went toofar too fast in the personal income tax reductions we have just passed: 5 percent this year and 10 percent for the succeeding 2 years, amounts to 25 percent-a one-quarter

We must balance the budget, and to do so we must make some additional cuts in planned spending, both defense and nondefense. But a most important step in achieving a balanced budget would be to delay implementation of all of the individual income tax cuts planned. And, I would suggest that probably the most equitable way to achieve this would be to delay implementation of the 1982 tax cuts by 3 months, and to delay implementation of the 1983 tax cuts by an additional 3 months. Thus, we would have 3

months of 1982 collected at 1981 rates and 6 months of 1983 collected at 1982 rates

I know this will not please those who have been so strident in demands for large tax cuts now. But. Mr. Speaker, I believe it does give us a rational way to assist the President in achieving a balanced budget, and by so doing, regenerate confidence in our American economic system. This in turn will have the net result of reducing interest rates, stimulating the economy, and further bringing inflation under control. And I am not alone in this thinking. I am told that just yesterday the National Association of Realtors, which had supported the administration's tax reduction proposals, in a letter to the President formally proposed postponing next year's 10-percent individual tax reduction from to October, unless adequate spending cuts can be made to keep the fiscal year 1982 deficit to \$38 billion. This 3-month postponement coincides with my thinking-but we should also, as I have suggested, further delay the additional 10-percent reduction scheduled for 1983.

I ask my colleagues to give my proposal serious consideration.

CONFERENCE REPORT ON H.R.

Mr. BOLAND submitted the following conference report and statement on the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes.

CONFERENCE REPORT (H. REPT. 97-222)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 12, 15, 21, 24, 26, 31, 32, 33, 34, 36, 48, 49, 50, 51, 52, 58, and 59.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 6, 9, 17, 19, 20, 25, 30, 38, 44, 46, 47, 53, 54, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$916,233,800; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$17,939,370,000; and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$40,000,000,000; and the Senate agree to the same.

Amendment numbered 10.

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$68,250,000,000; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SOLAR ENERGY AND ENERGY CONSERVATION BANK

Assistance for Solar and Conservation Improvements

For financial assistance and other expenses, not otherwise provided for, to carry out the provisions of the Solar Energy and Conservation Bank Act of 1980 (12 U.S.C. 3601), \$25,000,000, to remain available until September 30, 1983.

And the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$225,000,000; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$23,000,000; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$181,250,700; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$4,973,100,000; and the Senate agree to the same.

Amendment numbered 29:

That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$99,800,000; and the Senate agree to the same.

Amendment numbered 37:

That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$1,040,000,000; and the Senate agree to the same.

Amendment numbered 39:

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$27,450,000; and the Senate agree to the same.

Amendment numbered 40:

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an

amendment, as follows:

In lieu of the sum proposed by said amendment insert \$14,450,000; and the

Senate agree to the same. Amendment numbered 41:

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

INVESTMENT IN NATIONAL CONSUMER COOPERATIVE BANK

For the purchase of class A stock issued y the National Consumer Cooperative by the National Consumer Cooperative Bank as authorized by section 104 of the National Consumer Cooperative Bank Act (12 U.S.C. 3014), \$47,000,000, to remain available until September 30, 1983.

And the Senate agree to the same. Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an

amendment, as follows:

In lieu of the sum proposed by said amendment insert \$12,881,600,000; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

Provided, That this appropriation is hereby reduced by \$19,700,000 through the elimination of payments for flight and correspond-ence training benefits, except for those per-sons enrolled in flight training on August 31, 1981, and correspondence training on September 30, 1981, and who remain continuously thereafter so enrolled and meet the applicable requirements of eligibility; and the Senate agree to the same.

Amendment numbered 45:

That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$150,699,000; and the Senate agree to the same.

Amendment numbered 55:

That the House recede from its disagreement to the amendment of the Senate numbered 55, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: 413; and the Senate agree to the same.

Amendment numbered 56:

That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: 414; and the Senate agree to the same.

Amendment numbered 57:

That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: 415; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 4, 5, 13, 22, 23, 28, and 35.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I-DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Amendment No. 1: Appropriates \$916,233,800 in annual contract authority for assisted housing, instead of \$987,436,250 as proposed by the House and \$891,500,000 as proposed by the Senate.

Amendment No. 2: Appropriates \$25,112,000 in annual contract authority for the Indian housing program as proposed by the Senate, instead of \$18,834,000 as proposed by the House.

Amendment No. 3: Appropriates \$17,939,370,000 in budget authority for annual contributions for assisted housing, instead of \$19,742,645,500 as proposed by the House and \$17,815,100,000 as proposed by the Senate.

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate

with an amendment as follows:

Provided further, That of the budget authority provided herein, \$2,354,400,000 shall be allocated for public housing new construction other than for low-income housing for Indian families.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Department estimates that the \$2,354,400,000 will support 16,000 new public

housing units. However, the committee of conference agrees that the limitation should not be interpreted as restricting local public housing authorities from allocating funding between Section 8 or low-income public housing projects on the basis of local requirements. Rather, the conferees intend that the amount requested for new public housing construction be fully allocated for use at local discretion.

The conference language deletes Senate language providing for the transfer of funds for payments for operation of low-income

housing projects.

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS-FISCAL YEAR 1981

For an additional amount for "Payments for operation of low-income housing projects", \$148,000,000 to remain available until December 31, 1981.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The committee of conference is extremely concerned with the deteriorating financial position of many public housing au-thorities. Previous 1981 appropriations will enable the Department to provide PHA's with approximately 90 percent of the amount requested for operating subsidies. This additional amount will provide significant assistance to many PHA's with rapidly diminishing reserves.

The conferees are aware of the claims being made which suggest that the amount requested for 1982 operating subsidies is insufficient to meet the demands of public housing authorities. In view of this, both the Department of Housing and Urban Development and the House Committee's Surveys and Investigations Staff have begun comprehensive reviews of the operating subsidy program which will be instrumental in determining 1982 requirements for this activity. Depending on the results of these studies, the conferees will sympathetically consider supporting additional resources in 1982.

The conference agreement deletes Senate language regarding the congregate services program.

Amendment No. 6: Appropriates \$4,000,000 for troubled projects operating subsidy as proposed by the Senate, instead of \$50,176,000 as proposed by the House.

Amendment No. 7: Deletes language proposed by the Senate providing for a \$75,960,000 temporary mortgage assistance payments program. The temporary mortgage assistance payments program was authorized in October of 1980. To date, a draft of the proposed regulations has not received departmental clearance. The Department has estimated that actual payments cannot be made prior to July of 1982. That schedule is slipping. While denying the request, the conferees expect HUD to continue implementation of this new program. Consideration will be given to providing the necessary authority next spring, after the regula-tions have been written and reviewed by the Committees on Appropriations.

Amendment No. 8: Establishes the limitation on additional Federal Housing Administration mortgage insurance commitments at \$40,000,000,000, instead of \$39,000,000,000 as proposed by the House and \$41,000,000,000

as proposed by the Senate.

Amendment No. 9: Establishes the limitation on mortgage purchase authority at \$1,973,000,000 as proposed by the Senate, instead of \$3,600,000,000 as proposed by the

The conferees urge the Department to continue to actively pursue the development and use of an adjustment factor which would increase the allowable Section 8 rents in order to compensate for the higher financing rates currently being experienced. The committee of conference understands that the Department will implement the program in such a manner as to compensate only for debt service increases and that applicants understand the use of the adjustment factor is subjected to the availability of budget and contract authority.

Amendment No. 10: Establishes the limitation on commitments for guarantees of mortgage-backed securities \$68,250,000,000, instead of \$67,000,000,000 as

proposed by the House and \$69,500,000,000 as proposed by the Senate.

Amendment No. 11: Restores language proposed by the House and stricken by the Senate amended to appropriate \$25,000,000 for assistance for solar and conservation improvements, instead of \$50,000,000 as proposed by the House. The conferees direct the Secretary of HUD to expedite all Bank implementation activities by moving rapidly to publish regulations, secure an agent, staff the Bank, and disburse loans and subsidies at the earliest possible date.

Amendment No. 12: Includes the descriptive language "a community development grant program" as proposed by the House, instead of "local community and economic development programs" as proposed by the

Senate.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment appropriating \$3,666,000,000 for community development grants, instead of \$3,800,000,000 as proposed by the House and \$4,166,000,000 as proposed

by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are agreed that within the total provided, \$2,000,000 from the Secretary's Discretionary Fund shall be devoted to the work study program to aid disadvantaged minority students.

Amendment No. 14: Limits total commitments to guarantee loans under Section 108 of the Housing and Community Development Act of 1974, as amended, to \$225,000,000, instead of \$200,000,000 as proposed by the House and \$250,000,000 as proposed by the Senate.

Amendment No. 15: Restores language

proposed by the House and stricken by the Senate appropriating \$500,000,000 for a separate urban development action grants ac-

count.

16: Amendment No. Appropriates \$23,000,000 for research and technology, instead of \$20,000,000 as proposed by the House and \$30,000,000 as proposed by the

TITLE II-INDEPENDENT AGENCIES ENVIRONMENTAL PROTECTION AGENCY

Amendment No. 17: Appropriates \$583,747,000 for salaries and expenses as proposed by the Senate, instead \$583,691,000 as proposed by the House. The conferees are in agreement with the recommendations contained in the report of the House with the following changes:

+\$500,000 in program direction for the Office of Air, Noise and Radiation;

+\$56,000 in program direction for the Office of Press Services;

+\$500,000 in Office of Planning and Management contract studies;

\$870,000 in rent, communications and utilities and

\$130,000 from the Office of Legislation.

The committee of conference had included \$994,000 for the Great Lakes program. This amount represents that level requested in the January 1981 budget submission. Additional amounts above the budget request have been included in the research and development and abatement, control and com-pliance accounts. The conferees strongly believe that the Great Lakes program should be maintained as a separate program element coordinated at the Large Lakes search Station in Grosse Ile, Michigan. The conferees reject the Administration's proposal to close the station and transfer certain functions to the Environmental Research Laboratory in Duluth, Minnesota. The Agency is directed to make available at least eight permanent full-time positions for the Grosse Ile facility.

The Administration's stated objective in closing the laboratory is to achieve monetary savings. However, according to Agency officials, closing the station will only result in savings of \$250,000 in 1982. The conferees believe the benefits of the facility in its current location far exceed that amount. In addition, Canadian officials have expressed concern that the laboratory closure may signal a retreat by the United States from the joint commitment to preserve the Great

Amendment 18: No. Appropriates \$181,250,700 for research and development instead of \$191,247,000 as proposed by the House and \$180,750,000 as proposed by the Senate.

The committee of conference is in agreement with the recommendations contained in the report of the Senate. In particular, the conferees emphasize their support for the suggestion contained in the Senate report that the EPA should work more closely with the water industry to improve water service. The report noted that a part of the Federal research investment should respond to municipal water industry prior-

Amendment No. 19: Deletes six research and development program limitations proposed by the House and stricken by the

Amendment No. 20: Appropriates \$421,840,500 for abatement, control and compliance as proposed by the Senate, instead of \$422,553,000 as proposed by the House. The conferees are in agreement with the recommendations contained in the report of the Senate with the following

\$3,000,000 in the Clean Lakes program;

+\$3,000,000 to be applied at the Agency's discretion in programs proposed for reduction by the Senate.

EXECUTIVE OFFICE OF THE PRESIDENT

Amendment No. 21: Appropriates \$1,044,000 for the Council on Environmen-tal Quality and Office of Environmental Quality as proposed by the House, instead of \$1,544,000 as proposed by the Senate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and

concur in the amendment of the Senate appropriating \$134,789,000 for State and local assistance as proposed by the Senate, instead of \$54,084,000 as proposed by House.

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amendment an appropriating \$65,456,000 for emergency planning and assistance, instead of \$29,010,000 as proposed by the House and \$67,456,000 as proposed by the Senate.

The managers of the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The committee of conference concurs with the recommendations contained in the report of the Senate with the following change:

-\$2,000,000 for earthquake hazard mitigation.

Amendment No. 24: Restores language proposed by the House and stricken by the Senate providing \$373,000,000 for the national flood insurance fund to be used to retire fund indebtedness. The conferees are concerned that premium income on flood insurance policies continues to fall short of program expenses. The Federal Government's contingent liability in the national flood insurance program will surpass \$100,000,000,000 in 1982. The Committee of Conference supports the Administration's efforts to place the Fund on a more actuarially sound basis.

Public Law 97-35 amended the National Flood Insurance Act by requiring that beginning in fiscal year 1982, payments from the National Flood Insurance Fund for other than claims must be approved in ap-

propriation acts.

In addition to payment of claims for flood losses, the Fund has paid for a contractor to operate the program, distribution of flood insurance maps and information, agents' fees and commissions, and interest on Treas-

ury borrowings.

The combined effect of the authorization and appropriation Acts limits the Fund availability to payment of operating expenses (\$34,927,000) and claims. The operating expenses limit carried in the appropriation bill will cover only payments to the contractor and map distribution expenses. The Committees on Appropriations do not intend to deny the Fund to be used to pay agents' commissions and interest on Treasury borrowings. The conferees have no objection if the Fund is used for these expenses in amounts not to exceed the budget estimates.

GENERAL SERVICES ADMINISTRATION

Amendment No. 25: Appropriates \$1,344,000 for the Consumer Information Center as proposed by the Senate, instead of \$1,314,000 as proposed by the House.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Amendment No. 26: Restores language proposed by the House and stricken by the Senate limiting certain programs to the budget request without the approval of the Committees on Appropriations.

Amendment No. 27: Appropriates \$4,973,100,000 for research and development, instead of \$4,938,100,000 as proposed by the House and \$4,994,500,000 as proposed

by the Senate.

The conferees agree to add \$70,000,000 above the request to be applied only for solar electric propulsion system, international solar polar mission, shuttle/spacelab payload development, upper atmospheric research satellites experiment, technology transfer, materials processing, search and rescue, technology utilization, aeronautical research and technology, and mid-level facility. In reaching this agreement, the conferees direct that additional funding be applied to each of these areas in such a manner and in such amounts as to bring about a meaningful programmatic enhancement of each of these programs.

Amendment No. 28: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that none of the funds shall be used to support the definition and development of techniques to analyze extraterrestrial radio signals for patterns that may be generated by intelligent source.

Amendment No. 29: Appropriates \$99,800,000 for construction of facilities, instead of \$95,800,000 as proposed by the House and \$104,800,000 as proposed by the Senate. The conferees agree that NASA should apply the reduction of \$5,000,000 at the discretion of the agency.

Amendment No. 30: Appropriates \$1,114,300,000 for research and program management as proposed by the Senate, instead of \$1,100,000,000 as proposed by the House

NATIONAL CONSUMER COOPERATIVE BANK

Amendment No. 31: Restores heading proposed by the House and stricken by the Senate.

Amendment No. 32: Restores language proposed by the House and stricken by the Senate appropriating \$5,000,000 for self-help development.

Amendment No. 33: Restores language proposed by the House and stricken by the Senate establishing a loan limitation of \$14,000,000 for self-help development.

Amendment No. 34: Restores language proposed by the House and stricken by the Senate establishing a loan limitation of \$260,000,000 for the National Consumer Cooperative Bank Fund and deletes language that restricts the Bank from making further loans as proposed by the Senate.

NATIONAL INSTITUTE OF BUILDING SCIENCES

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating \$1,500,000 for salaries and expenses, instead of \$500,000 as proposed by the House. The additional funding is to assure that the Institute is a viable entity, and is the final appropriation.

Amendment No. 36: Deletes language proposed by the Senate making the funds available upon enactment of the bill. The conferees agree that the funds should be apportioned during the fiscal year 1982.

NATIONAL SCIENCE FOUNDATION

Amendment No. 37: Appropriates \$1,040,000,000 for research and related activities, instead of \$1,065,000,000 as proposed by the House and \$1,024,100,000 as proposed by the Senate.

proposed by the Senate.

Amendment No. 38: Includes language proposed by the Senate limiting funding for biological, behavioral and social sciences to \$184,600,000.

Amendment No. 39: Appropriates \$27,450,000 for science education activities, instead of \$35,000,000 as proposed by the House and \$19,900,000 as proposed by the

NEIGHBORHOOD REINVESTMENT CORPORATION

Amendment No. 40: Appropriates \$14,450,000 for payment to the Neighborhood Reinvestment Corporation, instead of \$13,950,000 as proposed by the House and \$14,950,000 as proposed by the Senate.

DEPARTMENT OF THE TREASURY

Amendment No. 41: Restores language proposed by the House and stricken by the Senate amended to appropriate \$47,000,000 for investment in National Consumer Cooperative Bank, instead of \$58,000,000 as proposed by the House. The conferees are in agreement that the 1982 appropriations for the National Consumer Cooperative Bank are the final appropriations.

VETERANS ADMINISTRATION

Amendment No. 42: Appropriates \$12,881,600,000 for compensation and pensions instead of \$12,914,800,000 as proposed by the House and \$12,857,400,000 as proposed by the Senate.

posed by the Senate.

Amendment No. 43: Restores language proposed by the house and stricken by the Senate amended to exempt persons enrolled in flight training on August 31, 1981 and correspondence training on September 30, 1981, instead of eliminating payment for all flight and correspondence trainees as proposed by the House.

Amendment No. 44: Appropriates \$6,966,418,000 for medical care as proposed by the Senate, instead of \$6,964,661,000 as proposed by the House.

The committee of conference is in agreement with the following changes from the budget request:

+\$330,054,000 and 5,181 staff years to restore the reduction proposed in March;

+\$1,716,000 to treat 200 additional patients in community nursing homes;

-\$22,543,000 from activities other than personnel compensation and benefits and increases provided in the conference agreement; and

-\$17,700,000 related to legislation reducing the period of time in which former servicemen can receive free dental care.

Amendment No. 45: Appropriates \$150,699,000 for medical and prosthetic research, instead of \$153,699,000 as proposed by the House and \$145,699,000 as proposed by the Senate, The additional funding will support an average employment of 4,487, an increase of 194 staff years above the budget request.

Amendment No. 46: Appropriates \$62,400,000 for medical administration and miscellaneous operating expenses as proposed by the Senate, instead of \$62,572,000 as proposed by the House. The additional \$4,000,000 above the budget request is earmarked for the nurse scholarship program authorized by the Veterans Administration Health Care Personnel Act of 1980.

Amendment No. 47: Disapproves \$35,961,000 of the proposed deferral D81-98 relating to construction, major projects, as proposed by the Senate, instead of \$23,361,000 as proposed by the House. The deferred projects disapproved by this bill are the nursing home care and garage project a Washington, D.C., and the research and education addition at Long Beach. California.

The conferees are in agreement that the nursing home care construction projects at Ann Arbor, Fresno and Tampa be administered by the hospital directors. It is intended that the hospital directors be given discretion, including selecting the architect/engineer to design and/or supervise the construction. A pilot program of this type could

be beneficial to veterans and the government. The committee of conference urges the VA Central Office to support a fair test for these construction projects.

Amendment No. 48: Deletes language proposed by the Senate appropriating \$4,692,000 for construction and operation of garage and parking facilities. In denying this request, the conferees agree that the Veterans Administration should continue to fund such maintenance, construction and operational expenses from existing resources.

TITLE IV-GENERAL PROVISIONS

Amendment No. 49: Restores language proposed by the House and stricken by the Senate which prohibits the use of personnel compensation and benefits funds for other purposes without the approval of the Committees on Appropriations.

Amendment No. 50: Restores section number proposed by the House and modified by the Senate.

Amendment No. 51: Restores section number proposed by the House and modified by the Senate.

Amendment No. 52: Restores section number proposed by the House and modified by the Senate.

Amendment No. 53: Deletes language proposed by the House limiting funds amounts set forth in the budget estimates. The committee of conference continues to be concerned that procedures be developed which would establish guidelines for the reprogramming of funds from activities for which monies were requested in the budget documents. As such, the conferees restate by reference the specific procedures concerning reprogrammings for the National Aeronautics and Space Administration as set forth in the 1981 Senate Appropriations report. In addition, the Committee expects that all agencies will strictly adhere to the limitation of \$250,000 or 10 percent, whichever is less, on reprogrammings between programs or activities. That requirement is also contained in the Senate report. For purposes of definition, this limitation shall apply to all line items carried in the budget justifications for the agencies covered by the HUD-Independent Agencies Appropriation Bill. The conferees also direct that no new activity, program or project not specifically requested in the budget may be funded without the approval of the Committees on Appropriations. The Committee views the monitoring of reprogrammings integral to the appropriations process and directs that each agency covered in this bill shall report on the implementation of the above outlined procedures by December 31, 1981.

Amendment No. 54: Deletes provision proposed by the House and stricken by the Senate which would have prohibited overtime payments for employees above GS-9.

Amendment No. 55: Changes section number to 413, instead of 415 as proposed by the House and 412 as proposed by the Senate

Amendment No. 56: Changes section number 414, instead of 416 as proposed by the House and 413 as proposed by the Senate.

Amendment No. 57: Changes section number to 415, instead of 417 as proposed by the House and 414 as proposed by the Senate.

Amendment No. 58: Deletes provision proposed by the Senate which would prohibit the use of funds to pay for employee travel involving the taking of annual leave while away from the official duty station.

The conferees are deeply concerned about continuing travel abuses. However, the Senate provision has been deleted because this issue can more properly be addressed through agency regulations. Therefore, the Committee of Conference directs the Department and agencies covered by this Act to continue in effect or to reinstitute regulations promulgated pursuant to a directive contained in the Joint Explanatory State-ment of the Conferees set forth in House Report 96-409. The Committee of Conference further directs that the Department and each agency submit quarterly reports to the Appropriations Committees detailing waivers of annual leave restrictions based on economy fares. Each report should include a description of the reason for each trip, as well as the number of days spent in annual leave status and on official business. The conferees are particularly concerned about continuing problems within the Environmental Protection Agency and direct that agency to make a more aggressive effort to avoid improprieties in the use of annual leave in conjunction with official travel.

Amendment No. 59: Deletes provision proposed by the Senate which would prohibit the use of funds to assist beyond 30 days any unoccupied Section 8 housing unit. The conferees urge the Department to determine if savings are possible from more vigorous enforcement of existing legal authorities and regulations regarding assistance payments for vacant units. In addition, the Department is also urged to determine whether future contracts should include 30 day rather than 60 day limitation.

CONFERENCE TOTAL-WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

New budget (obligational) authority, fiscal year 1981	\$69,578,917,253
vear 1982 1	63.248.452.500
House bill, fiscal year 1982	62,599,958,500
Senate bill, fiscal year 1982	60,506,342,200
Conference agrement, fiscal year 1982	60,689,970,200
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981 Budget estimates of new (obligational) authority,	-8,888,947,053
fiscal year 1982	-2,558,482,300
House bill, fiscal year 1982	-1,909,988,300
Senate bill, fiscal year 1982	183,628,000

1 Includes \$125,658,000 of budget estimates not considered by the House.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Gingrich) to revise and extend their remarks and include extraneous material:)

Mr. Dannemeyer, for 30 minutes,

today.

Mr. GINGRICH, for 1 hour, today. Mr. GILMAN, for 5 minutes, today.

(The following Members (at the request of Mr. Hurro) to revise and extend their remarks and include extraneous material:)

Mr. Gonzalez, for 15 minutes, today. Mr. Annunzio, for 5 minutes, today. Mr. Crockett, for 5 minutes, today.

(The following Member (at the request of Mr. Anderson) to revise and extend his remarks and include extraneous material:)

Mr. Anderson, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. Gingrich) and to include extraneous matter:)

Mr. Dannemeyer.

Mr. LEE.

Mr. DERWINSKI in two instances.

Mr. FIELDS.

Mr. McClory.

(The following Members (at the request of Mr. HUTTO) and to include extraneous matter:)

Mr. SWIFT.

Mr. MILLER of California.

Mr. STARK.

Mr. SIMON.

ADJOURNMENT

Mr. ANDERSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 24 minutes a.m.), under its previous order, the House adjourned until Monday, September 14, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2159. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of September 1, 1981, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 97-91); to the Committee on Appropriations and ordered to be printed.

2160. A letter from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed

legislation to authorize the Superintendents of the service academies to place a cadet or, as the case may be, a midshipman on leave without pay; to the Committee on Armed Services.

2161. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf-stocking and custodial services function at Lackland Air Force Base, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2162. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistic), transmitting notice of the proposed conversion to contractor performance of the family housing maintenance function at March Air Force Base, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2163. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistic), transmitting notice of the proposed conversion to contractor performance of the family housing maintenance function at Griffiss Air Force Base, N.Y., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2164. A letter from the Secretary of Housing and Urban Development, transmitting an interim report on increased thermal requirements for the minimum property standards, pursuant to section 331(b) of Public Law 96-399; to the Committee on Banking, Finance and Urban Affairs.

2165. A letter from the Secretary of Education, transmitting proposed final regulations to govern the research programs of the National Institute of Handicapped Research, pursuant to section 431(d)(1) of the General Education Provisions Act; to the Committee on Education and Labor.

2166. A letter from the General Counsel, Department of Energy, transmitting notice of various meetings relating to the international energy program to be held in Houston, Tex., on September 9, 10, and 11, 1981; in New York, N.Y., on September 16 and 17, and in Paris, France, on September 30 and October 1 and 2; to the Committee on Energy and Commerce.

2167. A letter from the Plan Administrator, Farm Credit Banks of New Orleans, transmitting the annual report of the District's retirement plan for calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2168. A letter from the Administrator, Health Care Financing Administration, Department of Health and Human Services, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 522a(o); to the Committee on Government Operations.

2169. A letter from the Acting Commissioner, Department of Justice, transmitting copies of orders entered in the cases of certain aliens under the authority contained in section 13(b) of the act of September 11, 1957, pursuant to section 13(c) of the act; to the Committee on the Judiciary.

the Committee on the Judiciary.

2170. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a final supplemental to a final environmental impact statement and a final report for downstream measures on the Harry S. Truman Dam and Reservoir project, Missouri, pursuant to section 404(r) of the Fed-

eral Water Pollution Control Act; to the Committee on Public Works and Transportation.

2171. A letter from the Acting Comptroller General of the United States, transmitting a report on Navy management of shipboard supplies (PLRD-81-59, Sept. 11, 1981); jointly, to the Committees on Government Operations and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLU-TIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLAND: Committee of conference. Conference report on H.R. 4034 (Rept. No. 97-222). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DAUB:

H.R. 4465. A bill to reform the laws relating to the provision of Federal assistance in order to simplify and coordinate the management of Federal assistance programs and requirements, provide assistance recipients with greater flexibility, and minimize the

administrative burden and adverse economic impact of such programs and requirements; jointly, to the Committees on Government Operations and Rules

By Mr. GOLDWATER:

H.R. 4466. A bill to amend the Federal Water Pollution Control Act pertaining to permits which modify the requirements for discharging pollutants from publicly owned treatment works into the oceans, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. WHITTEN (for himself and

Mr. CONTE):

H.J. Res. 325. Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes; to the Committee on Appropriations.

By Mr. BROWN of Ohio:

H.J. Res 326. Joint resolution to designate October 7, 1981, as "National Guard Day"; to the Committee on Post Office and Civil Service.

By Mr. LEE:

H. Con. Res. 178. Concurrent resolution disapproving the Federal Trade Commission trade regulation rule relating to the sale of used motor vehicles; to the Committee on Energy and Commerce.

By Mr. BRINKLEY: H. Res. 211. Resolution to lower and stabilize interest rates; jointly to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. RANGEL: H. Res. 212. Resolution condemning South Africa for its recent invasion of Angola, and disapproving the veto by the United States of a resolution of the United Nations Security Council condemning South Africa for such invasion; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2372: Mr. MATTOX, Mr. MARTIN of New York, Mr. McClory, and Mr. Marri-

H.J. Res. 151: Mr. Bailey of Pennsylvania. Mr. Forsythe, Mr. Dwyer, Mr. Emerson,

H. Res. 167: Mr. LEACH of Iowa, Mr. MATSUI, Mr. WEISS, Mr. ANDERSON, and Mrs. ROUKEMA.

PETITIONS, ETC.

Under clause 1 of rule XXII petitions and papers were laid on the Clerk's desk and referred as follows:

188. By the SPEAKER: Petition of Charles E. Zufall, Los Angeles, Calif., et al., relative to enforcement of citizens' band radio regulations; to the Committee on Energy and Commerce.

189. Also, petition of Denver E. Willis, Anderson, Ind., et al., relative to enforcement of citizens' band radio regulations; to the Committee on Energy and Commerce.

SENATE-Friday, September 11, 1981

(Legislative day of Wednesday, September 9, 1981)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. Thurmond).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Almighty God, Sovereign Lord of history, Judge of all the Earth, we acknowledge our need of Thee. Thy Word declares that "there is no authority except from God, and the authorities that exist are appointed by God" (Romans 13: 1—KJV). All who rule do so at Thy good pleasure. All governments are accountable to Thee.

May we remember that Thou art the judge of all that is done here today; that we are accountable to Thee in our thoughts, our desires, our words, and our actions. We are accountable to Thee in our public life and in our private life.

Gracious God, help us to dispose of our duties in our homes and in all that we do that Thou will be honored and the Nation blessed.

We ask this in the name of Him who loved to His death all the peoples of the Earth. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that, following the time allocated to the two leaders under the standing order and the time allocated to the Senator from Wisconsin (Mr. Proxmire) under a special order, there be a period for the transaction of routine morning business, during which Senators may speak, and that the period not extend beyond 9:30 this morning.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I reserve the leadership time on this side. Does the Scnator from Wisconsin, who has a special order, wish to put his special order ahead of the leadership time on his side of the aisle?

Mr. PROXMIRE. Mr. President, I am informed that I may use some of the leadership time. I shall not use it all. I shall use my time first and then the leadership time and yield back the part of the leadership time that I do not use.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER (Mr. Gorton). The Senator from Wisconsin' is recognized.

WHY CONGRESS SHOULD NOT INCREASE THE DEBT LIMIT

Mr. PROXMIRE. Mr. President, what effective action can Congress take to bring down interest rates?

I propose to answer that question as the senior member of the Banking Committee. I have been on the Banking Committee in all of the 24-plus years that I have been in the Senate. I have been chairman of that committee for 6 years. I think I have sat and heard more testimony on interest rates than perhaps any other Member of the Senate.

I have served on the Joint Economic Committee for 20 years and have been chairman of that committee for 4 years. So I think I am in a position to give some response to the question as to what Congress can do, because I have thought about this a great deal and I have discussed it with many, many people. We have had some of the most outstanding witnesses in the world speaking on this issue, on all sides of it.

First of all, I think we should remember that under the Constitution, we, Congress, have the exclusive power and responsibility for money. Article I, section I, paragraph 8 specifies that Congress has the power to coin money and regulate the value thereof. We have delegated that power to the Federal Reserve. The Federal Reserve belongs to Congress. We created the Fed. We can abolish it, modify it, direct it, recreate it. You ask: How about the independence of the Federal Reserve? That independence stands strictly against the power of the executive.

The Federal Reserve Board is independent of the President of the United States. It is not in any sense and never was independent of Congress. The Constitution reserves money creation for Congress. Now what has all this got to do with interest rates? Interest rate changes come from the changes in money creation.

The Federal Reserve raises or lowers interest rates by the rate at which it increases or decreases the supply of money. But whatever the Fed does it does on our congressional behalf. On interest rates, we, Congress, cannot escape the buck. It stops with us. If Congress, and I mean both House and Senate, pass a joint resolution directing the Fed to follow a particular action, I have no doubt the Federal Reserve Board would do precisely what Congress required. If they did not, of course, we could abolish the Board—in effect firing all members—and create a new Board. Or we could simply abolish the Board and take over the whole mechanism of the Federal Reserve ourselves. We, Congress, could pour out credit so every borrower would have all he could use and at low interest rates. We could direct the purchase of the entire national debt or any portion of it if we wished to buy up.

As a matter of fact, I remember very well a former chairman of the Joint Economic Committee, Wright Patman, proposing that. He suggested that to the Federal Reserve Board Chairman at that time, William McChesny Martin. He said, "Why do we not just forget about having to pay interest on the national debt and have the Federal Reserve buy its?"

And Mr. Martin replied that would be the most inflationary kind of action he could conceive. He said: "If we bought up the debt, it would not be worth anything after we got it."

And, of course, that is correct, and that is the dilemma. If we bought enough of it we would flood the banks and the public with cash, hundreds of billions of dollars of cash. By buying the Treasury obligations and creating a mammoth demand for them we could and would drive their price up and in the process drive their interest rate yield down. With the banks loaded with cash available to lend out and with Treasury bill and bond rates falling interest rates would come down and come down swiftly and sharply, just as swiftly and sharply as we desired. And what would be the result for the economy? The answer to that is easy. The economy would suffer an inflation that could zoom right into triple digits. Prices might double in less than a year. Scare talk? No. Whether we like the idea or not inflation certainly results when we have too much money chasing too few goods. And if we flooded the country with cash, the value of that cash would drop, and that is another way of saying prices would rise.

This little fantasy I have gone through explains the dilemma of the Fed. No one in the Federal Reserve Board wants high-interest rates. The Fed members would become heroes if they could bring cerest rates down. Right now they are lains and they know it. But what can ey do? Again and again I have asked d critics to tell me what they would if they had all the powers of the Fed their hands. I have asked this of busissmen. I have asked this of Members Congress. I have asked this of others. Ley always draw a blank. They do not low what they would do. They cannot ve any alternatives. They say, "Well, e would act to bring interest rates byn."

Of course, I point out if they did that, nd in the way the Fed has to do it by creasing the money supply, the supply credit, what would happen is it would an inflationary clear signal that prices re going up and then the rise in inflaton would, of course, push up the interest rates and push them up rather

If any Senator sat in Paul Volcker's eat, what would he do? If he eased up n credit, bought a few billion more 'reasury bills than they currently plan, he would increase the available credit or banks and other financial institutions. Under those circumstances the banks would, in turn, make loans to oung people who want to buy homes but cannot afford them at present interest rates, and to car buyers who cannot afford them now, and to farmers to buy equipment they need but cannot afford the monthly payments required with present interest rates.

So you ask, well, why not make that credit available? The answer is that the surge in home buying and auto buying and sale of farm implements, as it consistently has in the past, would begin to drive prices, that have been rising more slowly, back up again at a faster rate, perhaps faster than ever. The slow progress the Nation has been making for the past few months in bringing down inflation would fade, and once again prices would start to climb faster.

Then what happens to interest rates? Interest rates would fall briefly, but only briefly. Inflation would once again push interest rates up as lenders would insist on the inflation premium that would be necessary to make lending reasonable. No lender in his right mind would lend if he expects to get less back in real dollars allowing fully for inflation than he lends. If the lender, with his cash available, is convinced prices will rise faster than interest rates, he simply invests in tangible property and rides along with the inflation.

Am I saying that there is no way out of this inflation dilemma except these cruelly high interest rates? No, indeed, we have a simple, logical, and for us in Congress a very painful way out of the inflation-high interest rate bind. It is called balancing the budget. We in Congress sit here like the fat man at the dinner table who has just consumed a huge roast and mammoth cake, swilled down with a half gallon of wine and a six-pack of beer, and pushed his chair back, pats his colossal stemach, and moans, "What can I do to lose weight? This flab is killing me."

What is driving up interest rates? Simple: 20 years of unrestrained congressional spending and 20 years of congressionally caused swelling deficits, building to an almost unbelievable trillion-dollar national debt that has an average maturity of less than a year. So the Federal Government, of course, is in the credit market and has to borrow that trillion dollars all over again every year. When we borrow that massive amount, we shove the home buyer, we shove the auto buyer, the farmer, and the small businessman right out of the credit market.

So how do we deal with inflation and high interest rates? We cut spending. We balance the budget. We stop off-budget net borrowing, and we stick with it for at least 10 years.

I think, Mr. President, few people realize how beautifully clear, how crystalline the logic, the arithmetic of the situation is. Last year out of \$100 of new savings, the Federal Government took \$17 to fund the deficit. It took another \$17 to fund the off-budget borrowing. So a fat one-third, a huge one-third, of all of the new savings in this country was absorbed because the Federal Government did not have a balance in its budget and did not have a balance in its off-budget borrowing.

If we could achieve that balance, that would enormously increase the funds available for borrowing in the private sector. Then it would mean you could in a constructive and long-term way bring down interest rates, help the private sector provide the jobs that are necessary, and do that while inflation was moderating

Mr. President, in the short run the Federal Reserve can indeed nudge down the prime rate. It can do something more than it is doing now, such as quietly jawboning the big banks which fix the prime and have pushed it to an excessive premium in the past few months.

There is a public conception that the discrepancy between the discount rate and the prime rate is excessive because the discount rate is 14 percent and the prime rate is 20 percent.

The fact is there is a premium, a surtax, in effect, that the big banks have to pay. They pay not 14 percent when they discount at the Fed; they pay 18 percent, and the big banks set the prime rate. But even that difference between 18 and 20 percent is perhaps somewhat excessive, and I think the Chairman of the Federal Reserve Board could, as he has done in the past with success—other Chairmen have done it with success—quietly talk to the banks and persuade them to ease that rate down.

We could also reduce the discount rate, the effective discount rate, to bring it into accordance with the Federal funds rate, which is the market rate. It is above that which the Federal Reserve is keeping the interest rates, somewhat above, marginally above, what the market would peg it at. So there is some kind of technical and marginal assistance which the Federal Reserve can give now, but it is very limited.

The fundamental answer, as I say, is for the Congress of the United States to do what is extraordinarily painful and difficult. We have agonized over it, it is very unpopular to cut spending, it is unpopular to increase taxes, but somehow we have to do this, and if we do not do it, we have only ourselves to blame.

Mr. President, there was an editorial in the New York Times this morning which I intend to put in the RECORD. I had it with me, but I see I do not have it in my papers at the present time. It pointed out how remarkable it is that two of the outstanding leaders of the Congress, ROBERT MICHEL in the House, and HOWARD BAKER, our very distinguished and extraordinarily able majority leader, had alleged or certainly implied that there is some kind of a conspiracy on Wall Street to drive up interest rates and that Wall Street had better buy that program because if they do not buy the program, we are going to look at some very severe action, such as taxing interest or something of that kind.

Mr. President, I was as astonished in reading that yesterday as the New York Times was. The New York Times pointed out the beautiful irony of that kind of charge by the Republicans who have taken great pride, and rightful pride in their confidence in the market. They point out that the only answer—and it was delightful to see the New York Times say this because they are not always on this side—was to cut spending and to balance the budget. That is the only long-term answer.

The argument that Wall Street is in some kind of a conspiracy, that Wall Street is trying to hold up interest rates, is ridiculous. We know the investors in Wall Street consist of literally thousands and thousands of people. There is no way they can get together without there being some kind of revelation that there is a conspiracy. I do not see how there possibly could be a conspiracy there. The big bond houses, whoever they are, are in competition, the big investors are in competition, and these people are betting their money-they are very able people, some of the ablest people in our country, brilliant people, and they have been tested by the toughest test in the world, which is the marketplace year after year-they are betting their money that this fiscal program of the administration is not going to work. To moderate interest rates can any reasonable person truly believe that they will invest their money in bonds and mortgages and bring interest rates down, if Members of Congress denounce these investors as conspirators? How silly. They will invest and bring down interest rates when they believe the President and Congress have a fiscal program that will work.

They do not believe it, they do not believe we are going to balance the budget in the foreseeable future. And for the present I happen to think they are right. It is not a matter of an investor conspiracy to extort higher interest rates. It is a matter of the Congress being able to restore confidence by adopting a policy of holding down spending and bringing in whatever revenue is necessary to balance the budget and get this giant Federal Government out of the credit market.

Mr. President, I ask unanimous con-

sent to have printed in the RECORD the New York Times editorial to which I referred.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

BIG BAD WALL STREET

So now there is a Republican conspiracy theory: the villain is Wall Street. It's that recently sacred Republican cow—The Market—that's been spreading the economic gloom. It's a cabal of Eastern financiers that is driving up interest rates and undermining the President's program.

"It's time indeed that the financial markets realize that they're playing a dangerous game," intones the Senate majority leader, Howard Baker, as his colleagues report on the voters' anxiety. "In 60 to 90 days something's got to give," says the House Republican leader, Robert Michel; if nothing gives, he warns, Congress may have to impose credit controls or a windfall profits tax on interest.

The Republican leaders, it seems, not only believe in The Market, they have given it humanoid form. And how ungrateful it is for recent tax favors done. How unmindful of the Republican debacles to come. Sockol

It's all very silly, of course, but understandable. After passing the largest tax and spending cuts in history a month ago, the Republicans were popping with pride and already counting next year's election victories. But the prospect of ever-larger budget deficits could not be hidden from investors. Now, with the financial markets depressed, inflationary expectations still high and interest rates threatening recession, the President's party is seized with panic. For the first time since Ronald Reagan entered the White House, the crisis of confidence has struck Washington itself.

But King Canute had more chance of stopping the tides than Howard Baker has of intimidating The Market. Wall Street is not a few people, acting out of some spiteful political interest. It is thousands of institutions and millions of people, acting out of an infinite variety of financial interests. As any good Republican should know, it is a huge, vital and efficient marketplace.

If long-term interest rates are soaring, it's because too many people don't trust the President's combination of tax cuts and defense spending increases. They won't bet their money without the promise of high return. And short-term rates remain high because the Administration and the Federal Reserve have no better answer for inflation than tight control over the money supply.

So the simplistic theories of summer will not be remedied by more simplicities in autumn. The threatened credit controls, for example, might reduce interest rates a bit if they are aimed at consumers. But that would erode demand and slow down economic growth just as much as high interest rates. What would be the gain?

A tax on interest would surely show Wall Street who's boss. But it would punish all savers, the objects of all those loving tax incentives last month.

And the Federal Reserve could be brought to heel by changing the laws under which it operates. But the Fed is now the only barrier against truly wild inflation. Just think of what tampering with its independence would do to confidence in The Market.

The way to earn Wall Street's confidence is to heed its message. Fight inflation with the budget and not just with tight money. That means spend less, much less, particularly on the military, and atone for last month's revenue giveaways by raising taxes, mainly on consumption. Wall Street—meaning America—would respond. If there's one thing The Market respects, it's courage.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my friend from Alaska.

Mr. STEVENS. I will say to the Senator from Wisconsin that we are not accusing the people of setting interest rates by means of a conspiracy yet, but I have been one of those who has suggested that perhaps the time has come to consider an excess profits tax on this very high interest syndrome which seems to persist. The interest on the national debt has gone up \$10 billion since the budget was submitted last January. I am referring to the interest alone on the national debt. Now, we are faced with the prospect of reduced funding for important programs. I sound like I belong on the other side of the aisle. The fact is, however, we have to take more money from all of these controllable programs to do what? The answer is quite simple: To pay interest. The interest rate today is much higher than a fair rate of return plus inflation.

The Senator from Wisconsin mentions inflation. We have inflation under control. It is annualized at 8 to 9 percent now, yet interest remains above 20 percent. You tell me why. It is just rent on the use of money. Would the Senator want to keep rent on money up that high? If the price of money is that high, it ought to come down. It ought to come down because it was so high in the past, we were told, because we had to have a fair rate of return in addition to inflation. We had 16 to 17 percent inflation, and the interest rate at that time was 20 percent. Now we have 8 to 9 percent inflation, and the interest rate is 21.5.

The Senator has a distinguished record on his committee, and as the ranking member and former chairman, he ought to be doing something about the interest rates set by these banks. These banks are going to destroy small business in this country, and those of us on this side of the aisle, who are warning the financial community that we are going to take action on interest rates are not threatening. We are quite serious. We are going to do it if something does not happen to bring those interest rates down.

I have just toured the West. Talk to a cattleman. He cannot borrow money to get cattle to put out on his range this year. Talk to a fisherman, he cannot borrow money to stock his boats to go fishing this year. There is not anyone who is dependent on a revolving line of credit who can survive on the interest rates being charged today.

The Senator says it will take 10 years to solve these problems. No one has said we are going to balance the budget, or reduce the total deficit overnight. I hope the day will come when we will have these problems solved, but the Senator implies that until we get the \$1 trillion down, interest is going to stay up. He really does not mean that, does he? Interest is going to stay up until we start reducing the national debt? This country has assets of far in excess of \$1 trillion. There is no reason why we cannot look at our assets and say we can afford

to borrow some money. The question is "what is the cost of borrowing that money?" The cost of borrowing that money has been allowed to go up and up and up, and the managers of our money under the last administration saw fit to change it from a long-term debt to a national debt of \$1 trillion having a maturity of less than a year. The Senator is correct in stating that we are borrowing \$1 trillion every year, and we need to have a long-term debt of 8 to 9 years. Now we are doing it annually, and that is what has put the money market into the business of the Government going into that money market and getting \$1 trillion every year.

Two things are going to happen: That national debt has to be stretched out again and the banks have to get the message that exorbitant rent on money has to stop because they will destroy the very people that support them, the small businessmen of this country. And I ask the Senator what can be done about excessively high interest rates unless a warning is given to the financial community in advance that if they do not bring them down we are going to take action to bring interest rates down?

I can think of several ways we can do it. One of the ways is an excess profits tax on excessively high interest. When the oil prices were high the Senator's side of the aisle jumped to put an excess profits tax on oil. Why would you not jump just as fast to put an excess profits tax that charges too high of a rent on the use of money by small businesses throughout the country?

Mr. PROXMIRE. Let me respond to my good friend, the acting majority leader, TED STEVENS. I agree, we should act and act now to bring interest rates down promptly. It is not going to do a lot for these homebuilders and auto dealers who are going to be out of business in a year if we take 10 years to do it. I say it is going to take 10 years before we can get inflation fully under control. But we have to start now, and continue on every appropriation bill that comes before us.

However, the difficulty is that the credit markets do not have any confidence that there is a program to bring the budget into balance ever—ever. The administration says that we will balance the budget in 1984. Well, good luck.

But every independent analyst says that we will not. They say we are going to have a deficit of over \$60 or \$70 billion each year for the next 3 or 4 years. We have to act, not talk, act to change that by cutting spending. If we had a credible fiscal policy that was moving toward a balanced budget decisively, then interest rates would begin to come down.

Now, let me go on to point out that the Senator is absolutely correct in his contention that we pay \$82.5 billion in interest on the national debt and buy nothing with it. And if we establish a proper fiscal policy, one of the ways we can balance the budget in the process of doing that is interest rates will begin to fall. With every 1 percent drop in the Treasury bill rate we have a \$3 billion reduc-

tion in spending. So if we can get the Treasury bill rate down to 10 percent, say, from 14 percent, we save \$12 billion right there. So that will help significantly in balancing the budget.

Now, the Senator said that we have inflation under control. I wish we did. I think that we had a very good report from the Producer Price Index. It was down 0.3 percent for August. That is good news. But I think that the most knowledgeable people who look at statistics say that you have to look at that not over 1 month but over the last quarter or over the last year. And you also have to look at what is likely to happen when this glut of oil begins to diminish and when food prices, which have been falling for the farmer, at least, and not rising very rapidly for the consumer, begin to rise, as people predict they are going to rise at an annual rate of 10 percent or more in the coming months.

When you put all that together, it appears that inflation is not under control. More than 70 percent of the cost of our economy is a wage cost. And there is no indication that there has been a moderation in wage increases. In fact, the wage settlements, including some by the Federal Government with the post office and so forth, have exceeded what they were last year. So I think people look at all of this and say that we do not have

inflation under control.

Mr. STEVENS. Will the Senator yield? Mr. PROXMIRE. If I may just finish. distinguished Senator from Alaska is correct in indicating we made some progress. But to say that we have inflation under control is being more optimistic than hardheaded, realistic investors have to be.

Now, the Senator concluded by asking for an excess profits tax. He says we should have an excess profits tax on interest. Well, how do you impose an excess profits tax? Where does it hit? Where is it cut off? An excess profits tax, We can do that on a big corporation because you can impose it only after they make a certain income. But the excess profits tax, even that imposed on industry, was not successful even in World War II.

The Senator talks about the windfall profit tax. That is an entirely different kind of tax. It is not an excess profits tax because the windfall profit tax is on old oil, as the Senator knows. He is an expert in this area. The old oil that was already found and discovered and the price of that old oil would go up as our decontrol of oil took us to the world price so there would without any effort by oil com-panies be a windfall profit there. So we tax a part of that, relatively one-quarter of that, with the windfall profits tax.

Now, to say that this constitutes an analogy to a tax on interest is ridiculous. Do you know what you do when you tax interest? You make it harder for the borrower. If I want to borrow money and you slap a tax on the interest the lender gets, what is going to happen to the interest I pay? Answer, clear and simple. It goes up. So the tax on interest will really punish the homebuilder and auto dealer and farmer, who borrow

money, exactly the people you want to help.

Mr. STEVENS. That is what you said about oil, too. But, in spite of the wind-fall profit tax, the price of oil has come down. And it was not one-quarter, it was 70 percent of the difference.

Mr. PROXMIRE. There is no connection there. The Senator would not argue the windfall profit tax brought the price

of oil down.

Mr. STEVENS. No.

Mr. PROXMIRE. Of course not.

Mr. STEVENS. What I am saying is it has nothing to do with the price.

Mr. PROXMIRE. In that case, maybe

Mr. STEVENS. At the time the only reason for the windfall profit tax on oil was to try to balance the budget of the Carter administration. But it did not work. Look at what is happening. One of the leading national economists of national banks says that we must accept the fact that the long-term financing for municipalities is over. Did the Senator see that report?
Mr. PROXMIRE. I certainly did.

Mr. STEVENS. It will change the whole concept of life in municipalities throughout the country because of an economist advising the banks and saying it is over. Why is it over? It is over because that old money they have tied up in bonds is now coming out and they want to get the money markets. They have no incentive, no incentive at all, to stay in the municipal markets. And why? Because of the short-term money policies in the Carter administration taking that from a long-term debt to a shortterm debt.

Mr. PROXMIRE. Mr. President, there is nobody I would rather have a little debate or discussion with than my good friend from Alaska. He is a real delight and a marvelous debater. But, Mr. Pres-

ident, I do have the floor.

I think we ought to recognize that the Senator from Alaska and the Senator from Wisconsin both agree that these high interest rates are deplorable. They are a scourge on our country. They are the cruelest cutting edge of inflation. They are undermining our homebuilders and our auto dealers and our farmers and the small businesses in this country.

Mr. President, the real difference between the Senator from Alaska and me is what do we do about high interest rates. I argue that the one action the Congress can take, as the New York Times says in this morning's lead editorial, is to cut spending and have a responsible fiscal policy. We can inveigh about fictitious conspiracies on Wall Street and we can pass an excess profits tax on interest rates. But everybody knows that is not going to bring interest rates down. This is not going to re-store confidence in the investors. It will undermine confidence.

What we have to do is recognize that we need a responsible fiscal policy. Maybe the tax cut was a mistake. I voted for it. But I think we should have had a much deeper spending cut. That is why this Senator has introduced amendments every year in the last 3 years to balance the budget in the following years. Each year it has been rejected by a majority on both sides. But this is the kind of path we have to follow.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. STEVENS, Mr. President, I ask unanimous consent that the period for routine morning business extend for another 20 minutes and that Senators may speak therein and that the bill that is scheduled to commence at 9:30 commence at the time morning business

The PRESIDING OFFICER. Without

objection, it is so ordered.

SEPTEMBER GOLDEN FLEECE GOES TO EDA FOR BUILDING MODEL OF PYRAMID AND GREAT WALL OF CHINA

Mr. PROXMIRE. Mr. President, I am giving my Golden Fleece of the Month Award for September to the Department of Commerce's Economic Development Administration for spending \$200,000 to build an 800-foot limestone replica of the Great Wall of China in Bedford, Ind., as a followup to its \$500,000 grant to that Hoosier community for building of a 10-story-high limestone model of the Great Pyramid of Egypt.

Mr. President, for the life of me I cannot understand why a taxpayer in Oshkosh, Wis., or a carpenter in Brooklyn, N.Y., should have to pay for building a limestone replica of the Great Pyramid or the Great Wall of China in Bedford, Ind. It does not make any sense. It is a

sheer waste.

BUILDING PYRAMID AND GREAT WALL WHILE CUTTING SOCIAL PROGRAMS

While there are sharp budget cuts being made in social programs from medical care to education of the disadvantaged, the EDA adds money for these make work memorials to the limestone industry. How can the EDA justify such an ironic and outrageous expenditure of public funds? How can there be a re-newed commitment to the private sector if the taxpayers are required to support the building of this local tourist attrac-

This project, initiated under the Carter administration, has now been expanded by the Reagan administration.

In November 1978 the Bedford Chamber of Commerce through its nonprofit Bedford Industrial Development Foundation proposed a public works project to the Economic Development Administration which was approved in March 1979.

The proposal's summary reads as fol-

This project consists of the construction of a Limestone Tourist and Demonstration Center. It would include a museum constructed in the shape of the Great Pyramid of Cheops in Egypt and scaled to one-fifth size of this pyramid. There will also be a camping area constructed, utilities, roads and other needed items.

The purpose of this project is to attract more tourists to this area and demonstrate the value of using limestone in the building industry. All of this would lead to more jobs for the unemployed residing in the area.

The limestone quarries in the area have tons and tons of commercially useless limestone which they donated to the project. The pyramid-building workers came from several different job training programs in the area and therefore the labor costs to the project were reduced considerably.

The major portion of the money from the Economic Development Administration went for equipment, hardware, and plumbing and electrical facilities.

PYRAMID BEHIND SCHEDULE AND COST OVERRUNS

By January 1981 only the base of the pyramid had been laid, work was seriously behind schedule and costs were rising. Therefore, the Bedford Industrial Development Foundation again turned to EDA for help. In addition to asking for more money (\$125,000), and time (18 months), the foundation added an ingenious method for spending more tax-payers' money by using the scrap materials remaining after the pyramid blocks were shaped.

The foundation's proposal suggested the following:

Inasmuch as this entire venture is being designed to memorialize mankind's use of stone throughout the centuries, we wish to construct a replica of an 800 ft. section of the Great Wall of China. The terraine (slc) in the northwest section of our property is ideally suited for the design of the towers and rolling wall, similar to the structure near Peking.

EDA APPROVED MORE MONEY AND TIME FOR

The Reagan administration, perhaps not wanting to be outdone by the previous administration's attempts to reproduce a manmade wonder of the ancient world, in March of this year approved spending \$200,000 more for the pyramiding costs and the construction of a small piece of the Great Wall of China in southern Indiana. The project was also extended for an additional 18 months.

Certainly some people will be attracted to Bedford, Ind., to visit the Pyramid and Wall and Bedford may yet become known as the ancient wonder limestone replication capital of America. Also a few people will get jobs selling miniature versions of the Great Wall of China and the Great Pyramid of Egypt.

NO OBJECTION IF PRIVATE MONEY USED

I have absolutely no objection to the Bedford community and the limestone industry building these structures with private money. Since private interests in Arizona were able to move the entire London Bridge to the United States without Federal funds, should not private funds be used to build pyramids and great walls in Indiana?

Perhaps the EDA will next pay for a scale model of the Eiffel Tower made out of steel to be placed in Pittsburgh, Pa. As the administration draws up its lists of additional budget cuts, it should start with the Great Wall of China public works boondoggle.

VON STADEN WRITES ABOUT DEATH CAMPS

Mr. PROXMIRE. Mr. President, I would like to call attention to an article by Lynn Darling entitled "Prisoner of Conscience" which appeared in the Washington Post on August 10. It tells the moving story of Wendelgard von Staden, a German diplomat who grew up near a concentration camp during the final years of the Third Reich.

Von Staden realized during the war that buildings on her family's property had been transformed into Camp Wiesengund, a death camp for Polish Jews. Together with her mother, von Staden worked desperately to keep the prisoners alive by arranging to have a detachment of prisoners come every day to their farm to help with the work needed to fill the camp's ration needs. When the Allies arrived, they discovered how desperate their struggle had been. Over 2,000 bodies were found buried in a mass grave.

Mrs. von Staden has told of her haunting experience in her book, "Darkness Over the Valley," which she originally wrote for her children. Writing the book has been a catharsis, she says. It was her chance to help the world remember the rows of graves marked only by identification numbers in her hometown. It was an opportunity to tell us how horrible Nazi genocide really was.

We are very grateful for such testimonies. They are not only a remembrance of those who suffered and died in the past, but also a reminder that we have a responsibility to our children. This literature is a legacy by which future generations can fully understand the atrocities of the past so that they will never be repeated.

Mr. President, the Senate must also leave a legacy for future Americans. The Genocide Convention would be an appropriate statement that our Nation recognizes genocide as the atrocious international crime it is. Further, our ratification of this treaty would provide our children a better stance in dealing with genocide should it ever appear again.

I ask my distinguished colleagues to consider our responsibility to those who will follow us. The best legacy we can leave our children is to accede to the Genocide Convention.

Mr. President, I yield the floor.

S. 884 IS A BAD BILL

Mr. MELCHER. Mr. President, I feel compelled to point out to the Senate that S. 884, the farm bill, is a bad bill. Some Members of this body will say that while it is not a very good farm bill, it is the best that could be obtained under the present budgetary constraints.

But that is not true.

Even though the overall structure of the bill is nearly identical to the 1977 act, the price and income assumptions made in this legislation will turn our economic clock back to the 1920's, an era of high interest rates, speculation, and a so-called free market agricultural system which led the Nation into a depression.

In 1938, Howard Ross Tolley wrote the following words for the Journal of Farm Economics. He said:

The people have determined for themselves that a planless agriculture is not consistent with the general welfare. They realize that the important goals of agricultural policy will not be achieved by leaving the individual farmer to his own resources. This is the verdict of experience. No amount of emotion will change the fact that in the decade of the Twenties, unlimited competition in agriculture adversely affected the whole economy. Without some mechanism for coordinating their labors, farmers mine the soil of its fertility at the expense of the future. They market alternative excessive and insufficient supplies. They undermine their own incomes to the disadvantage of all elements in the economy as well as themselves.

As we debate this bill, we will hear much about "free market agriculture," as if just reciting the term is the panacea for all of the problems of our farmers and ranchers. We will be told that all we have to do is leave the producers alone and they will provide all of the food we need at fair prices, and they will be suitably rewarded for their investment and labor in the marketplace.

That kind of thinking calls to mind a more recent quotation by economist John Kenneth Galbraith in Harpers magazine. He said:

We will have our next Depression when there aren't enough people around who remember the last one.

I think the Federal Reserve Board has forgotten the last depression, because they are pursuing the same monetary policies that got us into the depression of 1929.

I was very delighted to have listened to the debate this morning between the distinguished Senator from Wisconsin, Senator Proxmire, and the distinguished majority whip, Senator Stevens of Alaska, when they talked about the high interest rates in the economy. Both very pointedly and probably politely left out the function that the Federal Reserve Board has had in the last year in their monetary policies. That has deliberately held interest rates way up there despite the fact that the rate of inflation has leveled off and started to drop.

Chairman Volcker's idea is that if you have a wide margin between the rate of inflation and the prime rate, inflation is supposed to not only level off but continue to drop. Well, that is not working right now. The farmers and ranchers in this country are the first to recognize that it is not going to work.

I think there are those in American agriculture who have forgotten the last depression, because they want to lead us back to a time when American farmers and ranchers were "free." By freedom, they mean being at the mercy of other nations which subsidize the export of farm products at ridiculously low prices but erect barriers to the importation of American commodities.

In recent weeks, as we have cut one program after another, we have heard a lot of talk about safety nets, and protecting the poorest of the poor.

Mr. President, this bill was formulated without the slightest consideration of safety nets for farmers and ranchers. It took no account whatever of farm income in relation to the spiraling costs of producing our food and fiber.

The issues facing our farmers and ranchers do not change very much. They either produce too much, or they produce too little. There does not seem to be

a happy in between.

Because our farmers produce in such abundance for domestic consumption, the commodity supply situation has a marginal effect on American consumers and purchasers of our farm commodities overseas, but it always has an enormous impact on the farm families who keep us the best fed Nation in the world.

Yet, the debate in the Committee on Agriculture, Nutrition, and Forestry on this year's farm bill was different than in years past, because the question of farm income, and what the Government might do to affect that income, was never

raised.

If the food security of the United States and much of the world is to be protected, the question of farm and ranch income cannot be ignored.

The August index of farm prices went down 2.1 percent between July and August, pushing the parity index down to 61 percent. Parity for wheat is \$7.11 per bushel, yet the average national price in August was \$3.63, only 51 percent of parity.

I might add that the 61-percent parity price for all commodities is the lowest since the Great Depression. That is taking all farm commodities and looking at parity for the index and looking at historic prices. It is 61 percent of parity for all the agricultural commodities in this country. That is the lowest since the Great Depression.

Prices for feed grains and hay fell 8.2 percent during the month as corn prices dropped 32 cents a bushel, and hay went down \$1.98 a ton. Soybean prices were off 47 cents a bushel, and cattle brought \$1.40 less per hundredweight than in

July.

Prices for every single argicultural commodity are lower than they were a year ago. In the space of just 1 month, the Department of Agriculture has adjusted downward its estimate of farm income by \$2 billion—from \$24 billion to \$22 billion,—with the expectation that farm income will continue to go down.

I think there is a general assumption that farmers and ranchers will continue to produce no matter what the Government or the economy may do. But that could prove to be a false and very dan-

gerous assumption.

If the hard-working people who operate our magnificent agriculture plant cannot make a profit from their investment and labor—no matter how hard they try to maximize production—we cannot assume that they will continue to produce.

For example, 150,000 cattle feeders and beef producers mostly in feedlot operations have gone out of business since 1975. The economists will say that is all right, because the marketplace was just getting rid of the inefficient producers. But this year all cattle feeders have been losing \$60 to \$100 per head when they sold fat steers or heifers.

There have been no profits even for the most efficient in the cattle feedlots and now it looks like the cow-calf operators will take their losses as feeder calves are down \$12 per hundredweight from last year. That is 15 percent in the face of a 15-percent increase in operating costs.

It is a 15 percent lower figure for their product but yet the costs have gone up 15 percent for the year. They cannot make it on that kind of an operation. For the past several years inflation has been devastating American agriculture. Since 1972 gross farm income has risen by 58 percent but production costs have risen 115 percent.

As a result, using constant 1967 dollars, net farm income has gone from \$25.1 billion in 1971 to \$6.7 billion in the

first quarter of this year.

During the first quarter of 1981, net farm and ranch income fell \$4.2 billion from levels in the fourth quarter of 1980. In comparison, corporate income, because of inflation, rose 2 percent or \$4.2 billion.

The Department of Agriculture acknowledges that 1980 was not a good year for agricultural prices, but they predicted a brighter day in 1981. I do not see much sunshine in the numbers for this year.

There are those who will contend that the 1980's are not the 1920's, and that is true. We are entering into a period in which the discussion of world food supplies will not be on surpluses. But instead, we will be focusing on whether there is enough food to feed the world. Famine already exists in portions of Africa, and there is a great potential for more hunger to develop in some of the Third World countries.

Notwithstanding this coming shift in world food supplies, in the next 2 years surpluses and depressed farm prices will

continue to be a fact of life.

Now particularly with regard to wheat, 1981 and 1982 will be dominated by surpluses and low prices. That means that the aggressive efforts of the Reagan administration to stimulate wheat prices through increased exports will probably fail.

I do not mean to criticize the administration, but surpluses mean low grain prices. Furthermore, the increasing costs of money simply means that many countries cannot or will not buy from us.

We have had excellent wheat harvests in this country. Canada, Australia, France, and Argentina also expect good harvests next year.

The Department of Agriculture predicts that wheat exports will expand by 3 percent this year. Yet, our national supply of wheat will go up by nearly 12 percent.

With 360 million bushels of wheat already being held in reserve, we must do what is necessary to insure that the bottom does not drop out of wheat prices, as is now threatened.

Among the assumptions made with respect to this bill is that the Government will not have to pay a deficiency payment in any of its 4 years of life. But anyone who knows anything about world wheat stocks can tell you that the cash price of wheat is already very near the point where target prices will come into play this year.

And why will we have surpluses?

Are people eating less?

Of course not. Every year, millions more people are born into this world than die. These new people have to eat. But current monetary policies and the strengthening of the dollar may very well mean that many nations may not be able to buy American wheat—no matter how many hungry people they may have.

Now, how in the world can a strong dollar affect the sale of American goods

overseas?

When a country's currency falls in value in relation to the dollar, it takes more money to buy the dollars a nation must have to buy American grain.

Just as we have suffered economically because we have to import so much expensive foreign oil, other nations that are not as rich as we are are facing the same problem. But unlike the United States, many countries are nearing the point where they will have to make the choice between the purchase of imported oil or the purchase of American food.

There are many nations that are graduates of what I call the food for peace club. Nations like Korea started out by getting our agricultural commodities free, or at subsidized prices. Now, after more than 30 years, many of these nations have become cash or credit customers for these commodities.

Importing oil at high prices and strengthened U.S. dollars means some of our grain customers may reduce their purchases. At a time when grain producers have an added cost because of high interest rates, they are getting a double whammy.

Credit is not a discretionary thing with farming. Farmers and ranchers have to depend heavily on borrowed funds to finance the cost of production. Farm and ranch borrowing has increased from \$19 billion a year in 1950 to \$180.5 billion this year.

As prices for feed, seed, fuel, and fertilizer have increased, expenses on the farm have increased as a percentage of gross receipts to more than 85 percent.

Interest costs alone amounted to 13 percent of the cost of production in 1980 compared to 9.2 percent in 1977. Nonreal estate debt now averages 34 percent of nonreal estate assets.

Total interest payments on agricultural debt are forecast to be \$18.8 billion in 1981, up from \$16.7 billion in 1980 and \$8.3 billion in 1977.

Farm real estate interest rates payments are expected to total \$8.7 billion in 1981, compared to \$4.4 billion in 1977.

What do these figures mean in prac-

With other factors held constant, a change of just 1 percent in the average interest rate means a change for farmers and ranchers of \$960 million in operating debt; \$800 million in real estate

costs, and 1.2 percent in total farm operating costs.

On an average Illinois farm with 360 acres of corn, interest payments are \$5,777 annually, or 17 cents on a bushel of corn.

On an Arkansas farm with 600 acres of soybeans, interest payments are \$5,937 a year, or 62 cents per bushel of soybeans.

On a Montana wheat farm of 960 acres, interest payments are \$10,005 a year, or 46 cents per bushel of wheat.

On a Georgia farm with 275 acres of peanuts, interest payments are \$4,706 annually, or 86 cents per pound of pea-

On a 520-acre Nebraska grain sorghum farm, interest payments are \$5,404 a year, or 17 cents per bushel of sorghum.

On a Texas cotton farm of 680 acres, interest payments are \$8,111 a year, or 4 cents per pound of cotton.

Let us take a 520-acre California rice farm. The yearly interest being paid there on the average is \$11,551, or 37 cents per hundredweight.

What all of this means is that the high cost of money is eroding the value of these commodities to farmers and ranchers. At the same time consumers are buying more and more high-priced money rather than food when they go to

the grocery store. So where does all of this leave us? Because of the increasing costs of farm inputs-especially on petroleum products and the cost of money-inflation is eating our producers alive. On the other end of the scale the high interest rate boys are pricing our commodities out of the range of developing nations at the very time when we need to be exporting all of the American food products we

And that brings us to where we stand today.

Where is the safety net for the American farmer? Is it in this bill? You can bet your life that it is not.

This is a bad bill. This is a terrible

It is not a bill that will protect farmers and ranchers from the ups and downs of grain markets. It does not provide a fair safety net or floor price.

It is not a bill that will be used for control and management of production. FARM INCOME

In 1979, farm income set an alltime record, following very poor farm prices

in 1977 and 1978. However, in 1980. farm income dropped again. As I indicated earlier, the Department of Agriculture expected a rebound in prices this year, but that simply is not happening.

Using constant 1967 dollars, net farm income is the lowest that it has been in decades.

Yet this bill will cut farm income by \$2 billion below the measure that the Committee on Agriculture, Nutrition, and Forestry originally approved.

This bill guarantees that markets for basic commodities will be depressed.

The bill maintains the same loan rate for commodities for 4 years, totally discounting the probability of continuing double-digit inflation.

This bill makes it certain that most farmers will have to dump their grain on the market at harvest time so that they can pay their bills, rather than holding it until prices improve.

This bill tells family farmers and ranchers that prices for their products will probably remain low. That does not cut margins for the big grain companies, the commodity speculators, or foreign farmers, whose prices are assured by their governments.

Free market agriculture, as espoused in this bill, will mean that the fat cats dependent on volume and foreign products subsidized by their Government will survive

Let me show you what I mean, Mr. President.

The Department of Agriculture tells us that in 1982, it will cost a farmer \$5.32 to produce a bushel of wheat.

Yet the target price set forth in this bill does not come into play until the price of wheat averages \$4.20 over a 5-month period.

The loan rate for wheat in this bill is set at \$3.50 for all 4 years of the bill. That is more than \$2 below the cost of production.

And what is the fair, parity price going to be for wheat next year—the price that would assure producers of a reasonable return on their labor and investmentthe fair price for American wheat next year will be \$7.64.

The Department of Agriculture's own figures show that for 1983 through 1985, a 25-cent higher loan rate for wheat would be translated in the marketplace to a price at least 40 cents higher, and would result in an increase in the value of wheat production of up to \$1 billion.

The action by the committee to guarantee only 70 percent of parity for dairy products will most assuredly save the Government about \$350 million in outlays next year, but will also cost dairy producers as much as \$600 million in cash receipts.

The difference in farm income between this bill and the one originally presented to the committee will cut income for wheat producers by \$850 million; cut income to corn producers by \$315 million; and take \$390 million from dairy producers.

Mr. President, this is a bad bill. This is a bill that will assure virtually every farm family that when the administration boasts of how many tons of grain are being exported, it will be with the knowledge that the grain is being sold abroad at less than what it costs to produce.

We will hear a lot of talk about how we must control Federal spending, but I have to ask what is better? Do we provide income protection for Americans, or do we pass a money saving bill that will provide subsidies to the Soviet Union and our other trading customers?

THE FARM BILL AND FEDERAL SPENDING

During the course of the debate on S. 884, some reckless charges were made by the administration with respect to the cost of the various proposals before the committee.

Secretary Block estimated the cost of Senator Helms' modest bill at \$7.8 billion over its 4-year life. The Secretary

estimated the cost of my own bill, S. 480. at \$83.2 billion over 4 years.

It is important that the Senate and the public at large understand the nature of the commodity credit price support loans so that they will understand that these charges of high costs are not true, but merely distortions designed to frighten Members of Congress into following the administration line.

The administration's cost assumptions depict these price support loans for wheat and feed grains as if they were nonrecoverable outlays, when in fact they are loans that are repaid with interest.

Generally, price support loans are made on a small percent of the total production of farm commodities. Only 11 percent of the 1980 crop of feed grains, 12.6 percent of the 1980 wheat crop, and 20.3 percent of the cotton crop from that year were placed under the CCC loan.

Historically, the loan utilization percentage has not been high. The highest use of the loan program for wheat was 47.5 percent in 1953, a year of huge surpluses. For corn, the highest program use was in 1961 when 18.3 percent of the crop went into the loan program, and for cotton, 61.7 percent in 1959.

In the past 10 years, use of the loan program was the highest in 1977, when 29.7 percent of the wheat, 18.1 percent of the corn and 31.7 percent of the cotton was placed under loan.

The forfeiture of commodities in satisfaction of price support loans in the past 10 years has been minimal. Since 1971, approximately 72.4 million bushels of feed grains, 33 million bushels of wheat and less than 50,000 bales of cotton have been forfeited to the CCC.

The loan rates on farm commodities are considerably less than the cost of production, as are the target prices. In the case of wheat, this bill provides for a loan rate that is \$2 a bushel below what it costs to produce. Yet, administration cost estimates assume the worst possible case where markets collapse and the Federal Government is left with billions of bushels of grain. This, despite the Department of Agriculture's own estimates that the 1980's will be a period of shortage rather than surplus.

The commodity price support loans are a recoverable cost. A distinction should be made between these loans, which will be repaid with interest, and other Federal program outlays, which once expended never return to the Treasury.

To continue to calculate the cost of these programs on the basis of loan outlays in any given year, rather than the net cost of the loan program, vastly overestimates actual expenditures.

For that privilege, we are to sacrifice our soil, break our producers, and hurt the U.S. economy.

Yet when it reaches Japan or our customers, wheat is sold to foreign millers at four or five times the price that was paid for it in the United States.

Since the loans are almost always repaid in full, sometimes even a gain for the Government, increasing the loan rates is not a burden for the U.S. Treasury. Yet the administration bitterly opposes increased loan rates to forcefully reduce grain prices.

If we continue this practice, then we

can expect to continue to legislate farm programs which are far from the fair, well-reasoned programs our Nation's

producers deserve.

I also question the value of cost estimates, price projections and other data supplied to the committee. The Congressional Budget Office and the Department must rely upon a number of assumptions to make cost projections, but, clearly, it is impossible to make hard and fast estimates of market prices, crop sizes, and costs.

Nevertheless, it has seemed that some of the cost estimates supplied to committee members, and used as the basis for considering the various bills, have verged on statistical sleight-of-hand.

It is difficult, in the first place, to try to make projections for 3 or 4 years in advance, but when the assumptions used include projections for wheat and feed grain yields which diverge substantially from historical trends, the validity of the estimates must be questioned.

I am also concerned about other assumptions made in casting out the various proposals considered by the commit-

I do not believe it was the intention of any member of the committee to devise an expensive farm program. We expect the program to be operated in such a way as to maximize market prices and minimize costs. In estimating the costs of various proposals, however, it seemed the assumption was made to maximize costs and minimize market prices.

S. 884 affords the Secretary of Agriculture a great deal of latitude to operate farm and commodity price support programs. He has the authority to adjust target prices, loans and the farmer-

held reserve.

He has the authority to use acreage limitations and paid diversions to control

In short, the Secretary has been given a kit of tools which may be used to manage farm programs so as to minimize costs.

I am troubled that the Secretary has been given too much discretion in S. 884 and I am concerned that this discretion not be abused.

Farm programs do not have to be costly. If operated efficiently, commodity priced support programs need bankrupt neither the taxpayer nor the farmer.

The Secretary should use all of the discretionary tools given him in S. 884 to do right by the American farmer, and to operate farm programs in a cost-effective manner.

Supply and demand for agricultural products should be balanced to derive market prices at or above the cost of production and to limit Treasury outlays.

THE MARKET IS NOT FREE

As a Senator from a major wheat producing State, I am concerned that discriminatory and unfair trade practices are being used by the European Economic Community (EEC) to the detriment of this Nation and our farmers and ranchers. The matter of concern involves EEC wheat subsidies, which are in viola-tion of international trade agreements. The practice strikes U.S. grain producers and reduces their exports which are basic to the economic health of the Nation. As a matter of fact, the net contribution of U.S. agriculture to the economy is \$28 billion annually, which is enough to pay for more than one-third of U.S. oil imports.

When exports are reduced, however, inflation accelerates. Treasury costs rise, and individual Americans suffer the economic consequences. The EEC subsidies have widespread effects, and are not restricted to agriculture alone but impact the U.S. economy as a whole.

In order to understand the nature of the EEC export subsidies, it is important to briefly summarize the methodology involved in the EEC system. There are enormously complex policies and a variety of mechanisms used to steer and control agricultural production and trade in the EEC. These operate to disrupt the export economies of other nations.

A prime example of these difficulties is the system of variable levies and export subsidies in the common agricultural pol-

icy (CAP).

These variable import levies are a means of shielding farm prices in the Common Market from world supply and demand. The levies are set at the level necessary to protect the European domestic wheat from lower priced imports and to generate revenues for subsidies needed to lower EEC wheat export prices.

The system is "variable" because it is manipulated to undercut competition. For example, U.S. Dark Northern wheat was quoted in Rotterdam at \$186.75 per ton August 31, 1981, but with the import levies, the price rose to \$259.10 per ton before it could enter the Common Market.

Externally, EEC traders have sold 50,000 tons of wheat to Brazil at \$140 a metric ton, free on board French ports.

This was \$8.50 a metric ton less than the lowest U.S. offering on Soft Red Winter. The French sale was made possible by an EEC export subsidy of \$70 per metric ton and a French Government 3-year credit offering. Currently, 2,000 tons of Common Market wheat have been allocated for sale to Latin America.

From this brief explanation of the CAP levies and export subsidies, the disruptive trade practice of the EEC becomes clear. More importantly, these practices are contrary to both the general agreement on tariffs and trade (GATT), of which the United States and the EEC belong, as well as to the U.S. Trade Act of 1974.

First, article XVI of the GATT provides that parties to the GATT specifically requires that-

Such subsidy shall not be applied in a manner which results in that contracting party having more than an equitable share of world export trade in that product (article XVI 3)

It is to be noted that present GATT rules provide that any country maintaining a subsidy which operates directly or indirectly to increase exports must report on the nature and extent of the subsidy, its estimated effects, and the circumstances which make it necessary. Any other country whose interests are prejudiced by the measure must be consulted with a view to limiting the extent of the subsidization.

Little use has been made of these provisions, and reports by individual countries have been infrequent and inadequate. Nor has the Common Market used export subsidies merely to maintain its traditional market share—it has adopted a policy of aggressively using export subsidies to expand its wheat exports in important foreign markets for U.S. wheat. This has been demonstrated by the fact that significant volumes of subsidized EEC wheat exports have been sold to Egypt, Portugal, Morocco, and Brazil.

In addition to these actual sales, the Community has made available large subsidies for wheat exports to Poland, the People's Republic of China, and Finland.

Second, in terms of the United States, the Common Market subsidy on wheat exports is a type of unfair trade practice specifically identified in section 301 (A) (3) of the Trade Act of 1974. That section provides that when the President determines that a foreign country provides subsidies on its exports of products to foreign markets, which have the effect of substantially reducing sales of the competitive American product in those foreign markets, he shall take all appropriate and feasible steps within his power to obtain the elimination of such subsidies.

In the case of the Common Market subsidies, neither the fact of the EEC subsidies themselves nor the effect on American grain exports to foreign markets would appear to be subject to dispute according to the GATT and Trade Act.

U.S. wheat producers depend on export markets for their livelihood because 2 out of every 3 bushels produced must be exported to have a viable wheat economy.

American farmers and ranchers have assessed themselves to develop overseas markets, idled acreage to prevent a supply glut, and stored excess supplies in reserve to build an inventory for future

They have taken the necessary market-oriented steps to improve the supply/demand equation for wheat, and their ongoing effort ought not to be canceled by unfair competition in important foreign markets. Yet, the European Economic Community has actively invaded traditional U.S. markets with its subsidy program, and American farmers and ranchers have been forced to accept the ultimate burden of these lost sales.

As we stand by, debating a farm bill that does not protect American pro-ducers, the European Community is expanding its subsidy program to still more countries.

It continues to market its subsidized wheat by placing political pressures on various nations. India is one such targeted country; and in the past, Brazil has proven to be a successful customer for the European Economic Community. Incidentally, the sale of wheat to Brazil occurred after a short-lived period of "restraint" agreed upon by the Common Market after U.S. producers formally complained about unfairness and disruption of sales from the arbitrary and excessive European export

Moreover, just this August, the administration states its aim was for "free trade and the elimination of all surpluses and subsidies." It is well known in general and to the administration that all exporting countries operate some government programs to support farm income and most are involved somewhat in export trade, yet no other major wheat exporter besides the EEC maintains comparably high internal prices and uses general revenues funds, including import levies, to manipulate its export prices.

While export subsidization is disturbing in itself, the EEC practice causes particular concern because adverse market conditions are placed on American producers and undercuts their voluntary efforts. American wheat producers are prepared and eager to compete for wheat sales to all foreign markets. But, it is essential that such trade be conducted on the basis of fair and effective competition.

Competitive trade is not possible when the Common Market uses unfair export subsidies

With the capabilities of the American farmer to produce and our capacity to market more volume than ever, the impediments of EEC wheat subsidies should not be allowed to hamper our economy and trade any longer.

Given this background I think that many of my colleagues will agree with me that the U.S. Government should do more to defend U.S. export commodities from unfair competition in world trade. Right now, we are considering a 4-year farm bill that straightforwardly withdraws support from American farmers and ranchers and insures that they will be more vulnerable to the disruptive trade practices of other nations in the years ahead.

The farmers of this Nation deserve more, not less support from the American people, and I think that it is our job to provide this support. We cannot continue to accept policies which fail to provide our farmers a fair profit, and we should not continue to drain the Nation's wealth by selling our farm exports to the world's importers at prices below the cost of production.

U.S. Department of Agriculture estimates 1981 production costs for American wheat farmers at \$5.32 per bushel, and the market price is now well below \$3.50.

It makes no more sense to tolerate barriers to the marketing of our crops in overseas trade than it does to fashion a national economic recovery program that neglects the Nation's farmers.

Let us be frank. The European Community's wheat subsidy program is partially responsible for a good portion of the projected costs associated with the Senate Committee's farm bill.

As their perverted system lowers export prices to move surplus wheat into the world market, it takes money out of the hands of our farmers, and when income drops too far, Federal assistance is required.

I am pleased to hear the Reagan administration talk about stopping EEC

wheat subsidies. But we cannot abandon our farmers while we go on talking. We need a farm bill that gives our farmers protection when they need it. Our farmers cannot survive on illusory promises of better days.

CONCLUSION

Agriculture is our most basic industry, and it can lead this country back to a sound economy.

American agriculture can make a major contribution to controlling inflation, and make the United States a world leader for freedom and progress. But in order for that to happen, we must give our producers a decent farm bill.

Second, the cost of borrowing money must come down.

While we have just corrected our inheritance laws so that they no longer force farm families to sell out, we must continue to look at our tax laws to see how they can be used to further the needs and interests of farmers and ranchers.

Members of the Senate will hear from some that these kinds of things are inflationary—that they will increase Federal spending at a time when the budget must be balanced.

They will be told to forget about the notion that American consumers must have adequate supplies of food at fair prices, and that American farmers and ranchers must be protected from volatile market conditions that they cannot control.

We will be told to forget that 75 percent of the budget of the European Common Market goes for subsidies for agricultural products that compete with American producers in the world market, while only 4 percent of the European Community's gross national product is derived from farming.

We will be asked to forget that American wheat sold and delivered to Japan at \$5 a bushel is sold to millers at twice that price and is then retailed in that country for nearly \$30 a bushel as an encouragement to Japanese wheat farmers.

American consumers will be expected to ignore the fact that prime grade beef in Japan is selling for \$24.24 a pound. That chicken breasts cost nearly \$3 a pound—that hamburger costs \$5.05 a pound—and fresh milk costs \$3.24 a gallon.

We will be asked to ignore the fact that retail food prices have increased an average of 8.3 percent a year during the past 10 years. Yet, in 7 of those 10 years, marketing costs—transportation, packaging, et cetera—led the price increases, not farm prices.

Food retailers in 1980 had after tax profits of just under 1 cent per dollar of sales. But returns to stockholders' equity for food retailers was higher than the national average for retailers—13.7 percent, as compared to the national average for other retailers of 13.3 percent.

Food manufacturers' aftertax profits average 14.7 percent of stockholders' equity, as compared to 14 percent for all manufacturers.

Yet for the past 3 years, income for farmers and ranchers has been devastatingly low.

So where does that leave us? Every-

body—the Japanese, our European competitors, the retailers, the manufacturers, the railroads—everyone seems to be making a decent living off American agriculture except farmers and ranchers.

Tell me about the free market. Everyone up the line is able to set his own price except our farm and ranch families.

Free markets for American producers are only foreign buzzwords for domestic disaster.

And on the other side of the coin we allow the importation of subsidized foreign casein that is crippling our dairy industry and costing the Government \$300 million in additional price supports.

We are allowing the importation of Australian kangaroo meat and horsemeat, posing as beef, while American cattle producers are losing their shirts.

Tell me about the free market? This bill is mean and unfair.

It does not recognize that farm and ranch income is under terrible stress.

It does nothing to deal with the policy that claims we must have cheap food, no matter what the impact on American farmers and ranchers.

It does nothing to assure that we should not export American food at less than it costs to produce.

It does not recognize that American agriculture is the backbone of our economy.

Mr. President, I intend to oppose any amendment that will make this bill weaker.

But I do intend to offer a number of amendments that will strengthen it.

I will offer an amendment to provide a loan rate for wheat of \$4 a bushel, compared to the \$3.50 in the bill.

I will offer a resolution to memorialize the International Trade Commission that the Congress believes that the dairy industry is being harmed by casein imports.

I will offer an amendment that will permit the distribution of excess dairy products to the elderly.

I will offer an amendment whose purpose is to insure that the United States is not hornswoggled into importing kangaroo meat dressed up to look like beef.

garoo meat dressed up to look like beef.

I will offer an amendment to restore
the Wool Act to its present, useful status.

I will offer an amendment that requires the President to begin immediate consultations with the Federal Reserve Board to get interest rates lowered by at least 3 to 4 percent. This must be done in the next 60 to 90 days.

I will offer an amendment to insure that farmland can continue to be bought at below market interest rates when the seller agrees to finance the property. This amendment was recently approved by the Senate by a vote of 100 to nothing, but was subsequently watered down in a House/Senate conference.

There are Members of this body who will go home and tell their farmers and ranchers that this was the best bill that could be obtained, given the spending constraints now imposed on us by the budget reconciliation.

But if we cannot improve this bill, I am going home to Montana and tell my people that Melcher voted "no."

Mr. President, S. 884 is a bad bill. We are going to be debating this bill perhaps next week or the week after. It is important, I think, that the Senate understand that what has happened is that the inflationary impact on agriculture production has driven prices very high. Interest rates are part of that but not the only reason. At the same time, overproduction or abundant supplies have brought about lower prices in the marketplace for those commodities.

We are suffering pretty badly.

The conclusion of this is that our American agriculture is the basic economy underpinning all our American economy, and if we cannot straighten it out how are we going to straighten out the entire economy?

Mr. President, interest rates must come down. That is just part of it. But besides that, we have to have a bill that operates on the basis that we want to improve farm and ranch income, not one

that wants to cut it back.

We have been holding meetings in the last couple of days, very interesting meetings, among members of the Committee on Agriculture where we were urged by the Secretary of Agriculture, representing the administration, to cut back more and more on S. 884.

Mr. President, it was a bad bill when it came out of the committee. If we make it worse by bowing to what the Secretary of Agriculture is advising us, we are going to completely crucify the farmers and ranchers of this country and further aggravate a very serious economic situation in the country.

Mr. President, I yield the floor.

Mr. PROXMIRE. Mr. President, I was listening to the distinguished Senator from Montana speak about farm income. What he said is absolutely correct: farmers suffered very serious losses in the last couple of years. Last year was the worst in our history; as he said, the worst on a parity basis since 1932. The prospects for the farmer in the last year or two are very bad indeed. I spent 1 full day working on a dairy farm. Believe me, the hard work they do and the low rate of return is going to be a lesson for any Senator or anyone who does that.

Mr. President, I do want to refer to the editorial I spoke about, because it is a remarkable editorial. It is the lead editorial in today's New York Times. It

reads as follows:

BIG BAD WALL STREET

So now there is a Republican conspiracy theory: the villain is Wall Street. It's that recently sacred Republican cow-The Market—that's been spreading the economic gloom. It's a cabal of Eastern financiers that is driving up interest rates and undermining

the President's program.
"It's time indeed that the financial markets realize that they're playing a dangerous game," intones the Senate majority leader, Howard Baker, as his colleagues report on the voters' anxiety. "In 60 to 90 days some-thing's got to give," says the House Repub-lican leader, Robert Michel; if nothing gives, he warns, Congress may have to impose credit

controls or a windfall profits tax on interest.

The Republican leaders, it seems, not only believe in The Market, they have given it humanoid form. And how ungrateful it is for recent tax favors done. How unmindful of the Republican debacles to come. Socko!

It's all very silly, of course, but under-standable. After passing the largest tax and spending cuts in history a month ago, the

Republicans were popping with pride and already counting next year's election victories. But the prospect of ever-larger budget deficits could not be hidden from investors. Now, with the financial markets depressed, inflationary expectations still high and interest rates threatening recession, the President's party is seized with panic. For the first time since Ronald Reagan entered the White House, the crisis of confidence has struck Washington itself.

But King Canute had more chance of stopping the tides than Howard Baker has of intimidating The Market. Wall Street is not a few people, acting out of some spiteful political interest. It is thousands of institutions and millions of people, acting out of an infinite variety of financial interests. As any good Republican should know, it is a huge,

vital and efficient marketplace.

If long-term interest rates are soaring, it's because too many people don't trust the President's combination of tax cuts and defense spending increases. They won't bet their money without the promise of high return. And short-term rates remain high because the Administration and the Federal Reserve have no better answer for inflation than tight control over the money supply.

So the simplistic theories of summer will not be remedied by more simplicities in autumn. The threatened credit controls, for example, might reduce interest rates a bit if they are aimed at consumers. But that would erode demand and slow down economic growth just as much as high interest rates. What would be the gain?

A tax on interest would surely show Wall Street who's boss. But it would punish all savers, the objects of all those loving tax in-

centives last month.

And the Federal Reserve could be brought to heel by changing the laws under which it operates. But the Fed is now the only barrier against truly wild inflation. Just think of what tampering with its independence would do to confidence in The Market.

Then, Mr. President, a short paragraph that I hope every Senator will read and ponder. It says:

The way to earn Wall Street's confidence is to heed its message. Fight inflation with the budget and not just with tight money. That means spend less, much less, particularly on the military, and atone for last month's revenue giveaways by raising taxes, mainly on consumption. Wall Street-meaning America-would respond. If there's one thing The Market respects, it's courage.

Mr. President, I think that is one of the most significant editorials and a good answer to the kind of rhetoric we have been hearing on the floor of the Senate. Mr. President, I yield the floor.

ROY WILKINS REMEMBERED

Mr. DOLE, Mr. President, Roy Wilkins lived a life filled with accomplishment. Over fourscore years he made headlines and made history. When such a man dies, it may seem curious that a spirit of national mourning coexists with a sense of gratitude for the life.

But we do mourn Roy Wilkins, because we do know what we have lost. We will never stop needing men like him in American life. We can never spare his courage, his compassion, his commitment to making the old ideals we claim as our own a reality for all Americans. We can ill-afford to lose his lofty sense of the possible—or the brilliant realism that made the possible probable.

His leadership of the National Associa-

tion for the Advancement of Colored People coincided with the historic explosion of economic, social, and political justice for black Americans. Such explosions do not come about spontaneously. Roy Wilkins, as much as any man in this country, ignited the fuse and kept the powder dry through the long years of op-

His influence was rooted in the moral truth of his cause—and in the skillful way he convinced others of what he knew to be true. He was a friend to many in this body, a hero to everyone who believes in making the system work, an inspiration to millions of Americans whatever their color or politics.

He will be missed, as surely as he is mourned. But no good man, it has been said, ever really dies. Not as long as he bequeaths a legacy worthy of emulation. Not as long as he leaves an example, of words or deeds to move others. Roy Wilkins' bequest is enormous. He was there when we needed him, and our country is a better place because he lived. His life was triumphant-and perhaps his greatest achievement was in letting all of us share in that triumph.

RAYMOND LANE

Mr. PERCY. Mr. President, in July a tragic incident occurred in Glenview, Ill. Eleven-year-old Jimmy Larkin, while playing with friends in a playground, was severely burned on the upper half of his body by flaming gasoline from an ignited homemade flamethrower.

This terrible accident could have resulted in an even more tragic ending had it not been for the heroic actions of Jimmy's 13-year-old friend, Raymond Lane, who was visiting from Baltimore. Raymond rolled Jimmy in the grass, extinguishing the flames and enabling the two boys to run home for help. In so doing, Raymond himself suffered second degree burns on his thighs and arms.

Jimmy will be in Evanston Hospital for 12 weeks, undergoing special treatments such as skin grafts and tank therapy. The cost in terms of medical expenses and suffering to Jimmy and his family is staggering. An enthusiastic participant in football and hockey, Jimmy's plans for the upcoming season will have to be postponed. However, the quick-thinking and unselfish actions of Raymond Lane have saved the family from even greater despair. He is certainly a young man to be lauded for his courageous efforts. Perhaps, thanks to Raymond, young Jimmy will someday once again be out running across a football field or gliding across a hockey rink.

CUTBACKS IN BBC'S OVERSEAS BROADCASTING

Mr. PERCY. Mr. President, the information we have received that there may be cutbacks in the funding of the BBC's overseas broadcasting has caused concern among many of us who believe that international broadcasting by the Western democracies is very important in providing objective and comprehensive news coverage to the peoples of the world. While we understand the necessity to reduce government spending in Britain, as we seek to do the same in the United States, the proposal to cut the BBC budget for the seventh time in 8 years does not seem to take into account the immense value of BCC broadcasts both to Britain and other nations of the Western alliance.

In the United States, despite this year's significant reductions in Federal spending, we have given priority to the broadcasting of the Voice of America and expect to increase VOA funding. The Voice of America enjoys in our country the same admiration and respect that the BBC external service enjoys in Britain. I would hope that the proposal for cuts in the BBC budget might be reconsidered.

Mr. President, I ask unanimous consent to have printed in the Record various attachments to this statement.

There being no objection, the material was ordered to be printed in the Record, as follows:

JULY 2, 1981.

Senator CHARLES PERCY, U.S. Senate, Dirksen Senate Office Building,

Washington, D.C.

DEAR SENATOR PERCY: We were in touch in the autumn of 1979 when you very kindly drew attention to the implications of threatened economics within the BBC's External Services. The problem has returned again.

Proposals just announced by the British Government will, if implemented, stop BBC foreign language broadcasting to Somalia, Italy, France, Spain, Burma, Malta and Brazil. The total amount of money involved is less than six million dollars a year. The cuts are intended to be completed by April, 1982.

What happened in the autumn of 1979 was that after an international expression of alarm, the British Government decided not to close threatened broadcasting services but to save money by not spending on transmitters. Now the Government is stopping broadcasting to seven countries and restoring delayed investment in transmitters.

We believe there are good reasons why the

threatened services should continue. In general they are regarded as an unbiased source of news. In Somalia, for example, bus timetables are arranged so that passengers can alight at their destinations in time to hear the BBC news. In Spain, the BBC's service in Spanish was the only continuous service of information heard in the country during the recent attempted coup. The BBC's Burmese Service is the only Western voice heard in the closed community of Burma. Equally important, of course, is the BBC's voice in Europe. Every member country of the Warsaw Pact provides a service in Italian, each one substantially greater in volume than that provided by the BBC. China and Albania also broadcast extensively in Italian. There is, of course, a similar picture else-where in Europe with strong vernacular services from the Warsaw Pact broadcasting France, and with even Cuba broadcasting to Spain.

Some people will attempt to make a virtue of the fact that the BBC World Service is being maintained without economy. That proposition ignores two facts;

1. The World Service—only in Fnolish—cannot hope to command the attention of the widest cross section of a community. That is a fact readily understood by Warsaw Pact countries which have developed vernacular services while Britain proposes to contract foreign language broadcasting.

2. The World Service depends for much of

The World Service depends for much of its editorial strength on the BBC's news gathering and reporting expertise in all of the countries it serves. The ending of the seven threatened services would weaken the BBC's international reporting ability—as well as its world-wide reputation.

I enclose some background papers which I hope you will find interesting.

As you know, we were immensely grateful for your ready assistance eighteen months ago. We would be no less so for any help you feel you can give us now.

Yours sincerely,

MARSHALL STEWART.

[From the Sunday Times, June 28, 1981]
NATION SHALL SPEAK UNTO NATION?

The foreign language broadcasts of the BBC are one of the cheapest ways of getting the British message round the world. They are often the only way of getting it to people as well as governments. But the Foreign Office, which pays for these services, is imposing on the BBC cuts which will save little money and do much harm. Either it seriously underrates their value or it has bowed to Treasury pressures and prejudices.

bowed to Treasury pressures and prejudices. The saving is to be about £3 million. The costs include a service to Malta which costs a mere £10,000 a year; to Burma where it is the only trusted western voice addressing the Burmese in their own language; to Somalia where half the population stops work to listen to the BBC; and to Brazil where the saving will be minimal since broadcasting in Portuguese to Portugal is to continue.

All these cuts give some degree offence and so reduce goodwill for Britain. The last of them will have the disastrous consequence of suggesting that the largest country in Latin America—where Lord Carrington wants British exports to grow—is not worth talking to. The excision of the Maltese service comes on the eve of an election which may see a recrudescence in Libyan influence in opposition to ours. In Burma, which is beginning to emerge from a generation of sectusion, the silencer is being applied at a peculiarly inappropriate moment.

The government has already demonstrated its inept touch in this sphere. In 1979 it told the BBC to cut out its Turkish service, only to ask a year later for it to be enlarged. This is an area where government, heeding its own noninterventionist philosophy, should leave well alone.

[From the Sunday Times, June 28, 1981] THIS IS LONDON CALLING—PUT NOT, MAYBE,

FOR MUCH LONGER (By Kim Fletcher)

The BBC's Somali language service upheld the finest traditions of the corporation when it broadcast news of its own demise to thousands of listeners in the Horn of Africa. The news that the Foreign Office was to end Somali broadcasts took second place to an account of British defense cuts.

Abdullahi Maji, the senior producer, thought the news that the Somali service was to be cut was very important. "But we broadcast to Somalia in the sense that we are giving world news in Somali. British defence cuts was a more important world story."

Apart from the Somali service, the government plans to axe Italian, Burmese and Maltese programmes, too. Services for Portugese-speaking Brazilians and European broadcasts in French and Spanish will also be closed.

The government last week asked the BBC to save about £3 million a year from 1983. The Foreign Office has the responsibility of deciding where the cuts should be made. Cutting the Somali service would save £170,000. In return the government promised investment of about £100 million, aimed at improving the audiability of the external services.

BBC staff pointed out that proposed im-

provements such as new transmitters in the Seychelles would be of prime benefit to the threatened Somali service.

The seven members of the Somali team learned they were to lose their jobs when George Benett, head of the BBC's Africa Service, called a meeting of his 60 staff. Bush House, headquarters of the BBC's External Services, had been buzzing all morning after a report in The Times said that up to eight foreign language services were to go.

When the Somali journalists met in the canteen afterwards, their first concern was not for their jobs, but for the listeners in Somalia, Ethiopia, Kenya and the Arab states, who write about 500 letters each month to Bush House, and for whom the BBC's nightly bulletin in Somali is the only objective news service available.

The anger is echoed by Douglas Muggeridge, managing director of the BBC's External Services. "The cuts would greatly endanger the worldwide standing and effectiveness of the BBC's External Services," he said.

"The question is not one of a chop for six of us. Losing our jobs is not so important as the fact that people rely on this section to know what is happening in the world. To them it is an institution," said 35-year-old Mahamoud Hassan, who read the news the day the cuts were announced.

The proposed cuts have horrified the BBC. But there was a determination that no editorial comment should creep into the traditionally impartial foreign broadcasts. Somali listeners heard the news on Thursday night and it was not repeated the following evening. The cuts were the subject of a news commentary which followed Friday evening's news, but it was written with the Foreign Office and BBC viewpoints represented equally.

The Somali service will be 21 years old next year, at just about the time it is scheduled to close. What angers its staff is the knowledge that it serves an area of Africa where millions of illiterate people have no other accurate source of news.

Bush House was understandably anxious last week to point out the value of the service. Tim Llewelyn, the BBC's man in Nairobi, filed an account of the importance of the twice-nightly broadcasts to Somalis. Somali delegates at a Nairobi conference were said to have been stunned by the decision to cut the service. George Bennett and Abby Farrah, head of the Somali service, spent Friday lunchtime with the Somali ambass dor, and a member of the BBC's Swahili service came forward to describe how buses in his native northern Kenva had to arrange timetables around the 5:30 bulletins so that passengers and staff could tune in. The Somali staff attempted to carry on with their work last week as if nothing had happened, translating two news bulletins and news commentaries for each evening's broadcasting. Somali listeners tune in at 5:30 and 9 p.m.

Most staff are on renewable contracts of about three years. The BBC is anxious to keep a constant turnover of foreign staff to prevent its broadcasters getting out of touch with their own countries.

It is impossible to sav how many listeners tune in to Somali broadcasts. There has never been a census in Somalia, but it is known there are about 8 million Somali speakers. Visitors return with stories of whole villages sitting around the radio at 5:30, of the evening news being as important a ritual as the visit to the mosque.

There may vet be a reprieve for the Somali and other foreign services, In 1979 angry MPs managed to prevent planned cuts and already they are moving to do the same again. Three have already signed an all-party motion condemning the cuts and others have said they will do so.

[From the Sunday Telegraph, June 28, 1981] 100 MPs WILL FIGHT BBC CUTS

(By Norman Kirkham)

Determination among scores of backbench MPs to try to force the Government to reconsider proposed economies in foreign language broadcasting by the BBC was building up yesterday.

At least 100 of the protesters were expected

to sign an all-party motion attacking the cuts after BBC executives had described them as "disastrous and misguided."

The backbenchers were hoping to compel a full discussion in the House and to win substantial modification of the plan despite the apparent determination of the Foreign Office to go ahead.

The BBC Governors, whose chairman, Mr. George Howard, has made clear already his support for the criticisms, will meet on Thursday to consider a fresh approach, ask-

ing the Foreign Office to think again.
Under the proposals seven of the 39 languages services will be axed together with the transcription service supplying the best of British broadcasts to foreign radio stations.

While Britain lowers her voice, other major broadcasters are increasing their command of the air waves.

The British broadcasts will drop by 58

hours a week to 668 hours compared with 2,100 hours from Russia and 1,900 hours by the United States. Britain which had the most extensive

broadcasting system at the end of the 1939-45 war is now in fifth place among broadcasters and not far ahead of countries such as North Korea, Albania and Egypt.

Mr. Geoffrey Rippon, the former Conserva-tive Cabinet Minister, who is co-sponsoring the Commons motion, said yesterday that the proposed economies were absurd and he did not believe they could not be corrected.

SOURCE OF TRUTH

Mr. Greville Janer, Labour MP for Leicester West, who is also putting forward the resolution, added: "This is false economy on a grand scale. There is a massive following in the House for us that this is a most expensive way of losing good will."

The services to go in the £3 million worth of cuts will be French, Spanish and Italian for Europe; Portuguese for Brazil; Maltese,

Burmese and Somali.

In Brazil, critics of the rightwing government rely on the BBC as a check on the ac-curacy or truth of official statements. Somalia in an area of Africa threatened by spreading Soviet influence is likely to feel slighted.

Whitehall has countered the protests with promise that the economies will offset heavily by a future £100 million capital investment programme for transmitting, relay broadcasts and modernisation of Bush House, the BBC Overseas Services headquarters

Audience research figures available in London given for weekly international broad-casting recently were:

[From the Times, June 29, 1981] BBC EXTERNAL SERVICE CUTS (From Dr. Brendan Halpin)

Sir, for the best part of 1972 I was working in northern Somalia, during the period of maximum Soylet presence and influence. At certain times of the week it was impos-

sible to attract the attention of Somalis, whether in the normally bustling market of Hargeisa, in smaller villages or even in the tea-houses which are so characteristic a part of the Somali scene.

The reason for this temporary abstraction from work in hand was that all were gathered round their radios, drinking in every detail of the World News in Somali

from the BBC.
Faced with such a thirst for our programmes, we are contemplating stopping the Somali service! It seems to be an incredibly foolish thing to do!

Yours sincerely,

BRENDAN HALPIN.

[From the Guardian, June 29, 1981] MPS TRY TO SAVE FOREIGN SERVICES (By John Ezard)

Attempts will be made by MPs of all three major parties this week to save the BBC's seven threatened foreign language services. The aim of a strategy worked out over the weekend is to incite a substantial Conservative revolt against Mrs. Thatcher in the Commons.

Three senior MPs-the former Conservative Minister Mr. Geoffrey Rippon, Mr. Greville Janner (Labour), and Mr. Clement Freud (Liberal)—are sponsoring an early day motion as an immediate test of Commons opinion.

"I don't anticipate any difficulty in getting 100 signatures at the very least," Mr. Janner said last night. "I don't recall an occasion on which there was greater unanimity.'

They have also applied for an adjournment debate, which would get the broadcast-ing cuts raised on the floor of the House, and will try other ways of obtaining parliamentary time. Mr. Janner said: "We all believe this is false economy on a grand scale.

"It will throw away overnight the experience and international goodwill created ever since 1938, will be a disaster for foreign policy, and will erode one of the last remaining contributions which Britain makes to the peace of the world."

The £3 million cuts, announced on Thursday, could stop the BBC's French, Italian and Spanish broadcasts to Europe, its Portuguese transmissions to Brazil, and its services for Malta, Burma, and Somalia. The BBC's external services budget has been cut for seven years running, although an earlier parliamentary revolt with powerful Conser-vative support in 1979 saved some services.

The corporation's governors are due to meet on Thursday to discuss ways of putting pressure on the Government. Staff have pointed out that the French service has 2 million listeners, that the Spanish service was the only broadcasting source of information during the attempted coup in February, and the Somali transmissions are important at a time when Russia is trying to expand her influence in the Horn of Africa.

[From the Financial (Leader) Times, June 29, 1981]

BBC AND THE FOREIGN OFFICE

The external services of the BBC hold a peculiar place in the British heart. When government, and particularly a Tory Govern-ment, attacks Bush House it does so at considerable public relations risk. And yet this latest assault on the activities of the BBC in its role as the "voice of Britain" at least provides another opportunity to examine the objectives and costs of an aspect of the British Empire upon which the sun has yet to

It is essential to realise that the external services have a somewhat different relationship with government than do the domestic operations of the BBC. Programmes aimed at foreign audiences are paid for by the Foreign Office, which tends to regard Bush House as simply another contractor paid to do a job of work. The corporation retains editorial control but the Foreign Office pays the piper and expects to call the tune.

POSITION

This is not the way in which the BBC views the position. While the Foreign Office regards external services as an arm of Brit-ish foreign policy, the corporation looks upon them as the flagship of British culture and fair-mindedness which produces incidental benefits for the nation. Any policy on the external services' revenue, editorial policy or geographic distribution must start from a judgment about what these services are for.

If the Foreign Office view is accepted then the strengthening of transmission hardware, ensuring that the voice of Britain can at least be heard, and the concentration of that voice on those regions of the world which have least access to relatively free media is justified. Such activities as broadcasting to the French in their own language and ensuring that the Americans know the latest Test score become rather less important than making sure that the Poles, Afghans and Cubans have some idea of what is going on in the world.

The BBC argues that any concentration of services on nonfriendly territories would provide support for the view that external services are part of a British propaganda machine. The Government replies that when money is tight someone has to choose prior-

There is an uneasy relationship between the Foreign Office and the BBC which has worked quite well until now. As a result of worked quite well until now. As a result of the general pressure to cut government spending there has arisen a suspicion that the Foreign Office is trying to shorten the arms' length relationship it has with the BBC in this field—or possibly to offer a de-liberately unacceptable cut in its own budget to protect more vulnerable areas.

ARBITER

The position of the Foreign Office as final arbiter on BBC broadcasting to overseas audiences should not be in question. The corporation's performance in this field must be examined somewhere and the Foreign Of-fice is as good a place as any. The doubts arise over the degree of involvement. A touch on the tiller is one thing, the grabbing of the wheel is another.

In its external services Britain has something which is unique in international communications. Although financed by central government, the editorial activities of Bush House are independent of government. While it is impossible to quantify the benefits which the external services bring to the UK, whether in terms of exports or of foreign policy gains, there is no doubt that the quality of the service is widely appreciated throughout the world.

To be unique and precious is not, however,

to be insulated eternally from change, whether that change be forced by policy or economy. The key issues are, first, whether the financial arguments for cutting £3m off the external services' budget (out of a total expenditure of some £63m) are sufficiently compelling to offset the damage that will be caused, and, second, whether the delicate relationship between the Foreign Office and the BBC is being altered to the long-term detriment of the service. To sacrifice assorted vernacular services—three at least apparently chosen on the basis of one from each continent—seems arbitrary and ill-judged.

[From the Sunday Mirror, June 28, 1981]
(By Woodrow Wyatt)
THESE CUTS ARE MAD

Please will someone in the Government have some common sense?

Our most effective voice abroad is that of the BBC's foreign services. They give Britain enormous influence. As a result, they help mightly with our exports.

In combating Communist and Right-wing dictatorships, the BBC's broadcasts are worth more than the entire Royal Navy.

Yet some idiot has decided to save £2-3

million by slicing them.

For the axe are broadcasts in French, Spanish and Italian, Portuguese for Brazil, Maltese, Burmese and Somail.

The Kremlin will be delighted.

[From the Sunday (Leader) Times, June 28, 1981]

NATION SHALL SPEAK UNTO NATION?

The foreign language broadcasts of the BBC are one of the cheapest ways of getting the British message round the world. They are often the only way of getting it to people as well as governments. But the Foreign Office, which pays for these services, is imposing on the BBC cuts which will save little money and do much harm. Either it seriously underrates their value or it has bowed to Treasury pressures and prejudices. The saving is to be about £3 million. The

The saving is to be about £3 million. The costs include a service to Malta which costs a mere £10,000 a year; to Burma where it is the only trusted western voice addressing the Burmese in their own language; to Somalia where half the population stops work to listen to the BBC; and to Brazil where the saving will be minimal since broadcasting in Portuguese to Portugal is to continue.

All these cuts give some degree of offence and so reduce goodwill for Britain. The last of them will have the disastrous consequence of suggesting that the largest country in Latin America—where Lord Carrington wants British exports to grow—is not worth talking to. The excision of the Maltese service comes on the eve of an election which may see a recrudescence in Libyan influence in opposition to ours. In Burma, which is beginning to emerge from a generation of seclusion, the silencer is being applied at a peculiarly inappropriate moment.

The government has already demonstrated its inept touch in this sphere. In 1979 it told the BBC to cut out its Turkish service, only to ask a year later for it to be enlarged. This is an area where government, heeding its own noninterventionist philosophy, should leave well alone.

[From the Sunday Telegraph, June 28, 1981]

LOST LEADERS

The effects of the Government's proposal to save a comparatively small amount of money by abolishing seven of the BBC's foreign language services will be far-reaching and include a weakening of the World Service, which is heard and admired in Britain as well as overseas.

The Bush House services to go include the broadcasts in French and Spanish to Europe and in Portuguese to Brazil. A million or two pounds may be saved but what will be lost is incalculable. All must agree that the BBC helped as much as diplomatic organisations in the work of getting British aims and views understood.

It has been estimated in Europe that three million people listen regularly to the BBC broadcasts in French and Spanish. It must be doubted if these people could inform themselves anywhere about Britain except by listening to the BBC's broadcast, which are about to be taken away.

For residents in Britain, these economies would weaken the first-rate news and current affairs service now being put in the World Service. This service is to retain its present number of programmes, but the fact that there would be 200 fewer expert correspondents round the world (some are to receive notice to quit in a few weeks) to contribute to the news bulletins would amount to a noticeable dilution.

News programmes are the brightest ornament in the World Service's crown. Apart from quality of content, they are read in measured tones and all the words are so well pronounced that there is hardly ever a letter of complaint about the stress being put on the wrong part of such words as "research" and "protest." There are 17 of these news bulletins daily (amongst music and documentaries) and numerous current affairs programmes.

In Network UK, one of these current affairs programmes, I was horrified last week to hear of Belfast's hundreds of joyriders—young stealers of cars, some aged 11, who tear round in the cars at night, sometimes putting them back—but glad to hear of a private enterprise remedy; this consists of a children's car club where old bangers are allocated to members for repair, and driving is permitted on private ground.

In Meridian another World Service current affairs programme, I have heard reporting about the arts that is as lively as in Radio 4's "Kaleidoscope." And incidentally I was glad to note among the presenters of "Meridian" Gillian Reynolds, radio critic of the Daily Telegraph, and our own Peter Clayton.

[From the Observer, June 28, 1981] MPs PLAN TO FIGHT BBC CUTS (By Patrick Bishop)

Friends in Parliament of the BBC's beleaguered external services will meet tomorrow to plan their campaign to deflect the Government's proposed cuts in foreign-language broadcasts.

Tory MP Julian Critchley promised yesterday a repeat of the operation that prevented the extinction of seven services in 1979. 'There is no reason why we should not be successful again,' he said.

Anger at the news, coyly revealed during Thursday's defence announcement in the Commons, spreads across party lines.

Much of it has been aroused because the Foreign Office—which funds the external services—has chosen to make what is regarded as a trifling economy in one of its adjuncts rather than at the FO itself.

Seven foreign language transmissions are to be scrapped. They are the European French, Spanish and Italian services, Portuguese to Brazil and colloquial broadcasts to Malta, Burma and Somalia. The saving will be £3m out of an annual budget of £62m.

British embassy heads around the world are believed to have been asked which services they thought could be dispensed with. Mr. Critchley said yesterday: 'It should not be left to bureaucracies to decide.'

The authorities will not be dismayed. An official at the Somali Ministry of Information said yesterday they would not be unhappy to see the broadcasts end.

Closing the Somali service will deprive the country of its only source of untainted news. The Observer correspondent in Mogadishu, Bob Dietz, reports that outdoor radios there are tuned to the BBC and listened to by crowds of up to a hundred.

[From the Glasgow (Leader) Herald, June 27, 1981]

BAD RECEPTION

The last time that Mrs. Thatcher attempted to cut the BBC's overseas broadcasts she was said to be much surprised at the force of the opposition. This time she should at least be prepared for the outcry; indeed the surprising thing is that she should even consider trying again after the strong passions aroused last time on the Tory backbenches as well as elsewhere. Perhaps she thought to distract attention from the announcement by making it on the same day as the defense statement.

The service is, after all, a line of defense not in the sense that it is a propaganda machine but for precisely the opposite reason. What it uniquely offers the world is an overseas broadcasting service with freedom from State control, and it is its impartiality that gains it international respect and en-hances understanding of this country whether in the far corners of the earth or, sometimes just as necessary, across the Channel. The reports that Bush House rather than Moscow or Washington is the first choice of listeners in Afghanistan were sufficient vindication, if any were needed, of the decision 18 months ago to leave the services intact. It now appears that although the critics on that occasion won the day they did not make their case understood, for the same objections still apply with equal force and Mrs. Thatcher has not overcome them with the argument that "we think it better than some 33 language services should be properly heard rather than 40 languages improperly heard." The argument represents a false dilemma and a false economy. For £3m the BBC could have had its 40 languages properly heard, and that is a trifling price to pay for a service whose excellence is unmatched by the BBC's domestic broadcasts.

Instead the Government chose the day of the defense statement to signal to the world the low value it appears to place on international relations. The same message has already been conveyed by the increase in overseas students' fees.

[From the Scotsman (Leader), June 27, 1981]

There are not many cuts worth a mere £2,400,000 which guarantee the Government ferce, mocking or incredulous criticism from all the serious British newspapers, including the most Right-wing one; which arouse all-party protest, already taking shape, in Parlament; and which, after the expense of considerable political energy, may with luck be countermanded. We are of course writing our regular leader about plans to hack at the BBC's External Services, which are financed by the Foreign and Commonwealth Office. Seven times in the past eight years Governments of one kind or another have tried to cut the BBC's overseas broadcasts. Much of the demolition work has gone ahead, despite Britain's unbeatable reputation for providing the world with reliable radio news, and despite the vast expansion, over the same period, of other countries' foreign-language broadcasting services.

It is entirely mysterious why Mrs. Thatcher, who is not otherwise noted for her indifference to Soviet foreign policy and propaganda work, should cut what Russia builds up. It is

also very strange that she should be back again supporting proposals to trim the BBC's foreign-language services only 18 months after an almighty row when her Government tried to do this. At that time, the Greek and Turkish services were among the intended victims. Isn't the Foreign Office glad, as it looks at the current state of Greek and Turkish politics, that these services were among those reprieved last time around?

This time an 8 per cent cut would reduce the BBC's foreign-language output from 40 languages to 33. Burma and Somalia would lose their broadcasts from Britain, as if they were of no significance. So would Malta, which is not exactly brimming over with unprejudiced news sources of its own. It is almost unbelievable that the Government should want to cut the Portuguese service to Brazil, the most important nation of Latin America, and surely an independent British voice in French to France. in Spanish to Spain and in Italian would be worth preserving. All these cuts, mark you, are intended to save a piffling £2,400,000.

What is one to make of the mentality of a Government which stirs up so much irrita-tion among listeners abroad, and lays itself open to so much complaint from the friends of the BBC's external output at home? What the reasoning behind the closure of the BBC Transcription Service, which sells the best of British radio programmes abroad? And all this when the total budget for the BBC's External Services is only £62 million, or around £1 per person in the UK. Of course the answer is that it is the very same Government which pressed on regardless with its drastic raising of the fees in British universities for overseas students, regardless of the damage that this is now doing to Britain both at home and abroad. Politicians who don't seem to care how unpopular they make themselves in Britain and around the world are an entirely new phenomenon; but the official Opposition at Westminster is also in an unprecedented state.

BBC SOMALI SERVICE

For the past two decades, and especially during the last few years, the Horn of Africa has been in turmoil. There is the continuing dispute between Ethiopia and Somalia over the Ogaden issue as well as the guerrilla activities of the various liberation movements in Ethiopia such as the Western Somali Liberation Front; the Somali Abo Liberation Front; and the Eritrean, Oromo, and Tigre Liberation Movements.

There is a strong Soviet presence in Ethiopia along with 15,000 Cuban troops, mostly used to garrison the Ogaden region so as to release the Ethiopian armed forces for active service against the various libera-

tion movements.

In this vast area of the Horn, most people are illiterate and rely on the radio as their one source of news information for both internal and external events. This has meant that there is strong competition between various governments and political groups in the area to win over the minds of listeners through radio.

Since it began in July 1957, the BBC Somali Section has attained an importance in the Horn which is not commensurate with its comparatively short daily broadcasts to the area. The BBC Somali Section has built up a reputation for reliable and unbiased news reporting, so that the Somali-speaking listeners in Ethiopia, Somalia, Djibouti, East Africa, as well as the large communities liv-ing in the Middle East, rely on the BBC Somali broadcasts for confirmation of any major news events in both Africa and the rest of the world.

During the 1977-1978 Ogaden War between Somalia and Ethiopia, listeners relied on BBC Somali news more than on any other

radio stations, whether it be those broadcast in Somali from Moscow, Rome, Cairo, Addis Ababa, Nairobi, Mogadishu and Djibouti.

The Ogaden War was followed by the 1978-1980 drought and an exodus of over a million refugees from Ethiopia into Somalia. More than 30 refugee camps were set up and administered by personnel from the various international relief organizations in liaison with the Somali government.

The BBC Somali broadcasts have been pop ular in the refugee camps as well as throughout the Somali-speaking areas of East Africa and the Arabian Peninsula. Throughout the Somali-speaking world, Wednesday is known as BBC Day, because it is the day which is particularly devoted to broadcasting from London all the current events taking place in Africa, and particularly in the Horn.

In the past few years, a number of Somali dissident groups have been set up, including an Addis Ababa-based clandestine radio station (Radio Kulmis). All these groups have sought publicity over the BBC's Somali Service in order to enhance their own credibility. indicating how crucial the BBC Somali broadcasts are to the politics of the Horn of Africa

In the past year, President Hassen Guled of Djibouti and President Siyad Barre of Somalia have given exclusive interviews to the BBC Somali Service, both emphasising that in this way their message would get across not only to the Somalis in their own countries but to Somali-speaking people and exiles throughout the Horn of Africa.

Recent Soviet efforts to penetrate not only Africa but the oil producing countries of the Middle East, along with the resistance now being shown by the West, has given the strategic Somalia/Djibouti coast more promi-

The Somali Section is the main source for explaining to its listeners the political and economic views of successive British governments, and interpreting British viewpoints on Africa and their own region.

The closing down of the BBC Somali Section will not only disappoint the vast listen-ing audience built up over the years, but will delight the Soviet Union and its satellites by giving them a free hand to extend their own influence uncontested.

BBC BURMESE SERVICE

In winning and holding the attention of radio listeners in Burma, the BBC, which broadcasts in Burmese for one hour a day, competes with the greater volume of external broadcasting in Burmese from Peking and Moscow. Peking provides a daily service of 21/2 hours, Moscow 11/2 hours. Japan also has a Burmese service of half-an-hour a day, and India 11/2 hours.

As suspicions of Britain's imperial ambitions have faded, Burma has began to show a distinct partiality for British institutions and for British commercial contacts. The British Ambassador reported in 1977: "Our stock stands higher than that of most other European countries".

It is clearly in Britain's interests to exploit the commercial opportunities which appear to be opening up. It is in the interests of the West to help the Burmese to maintain their independence of China and Russia, to encourage stability in the region, and to keep open the lines of communication to Western attitudes and values. The BBC can play an important role in Burma, where normal em-bassy informational activities are strictly circumscribed, where few Burmese can travel to the West, and where the internal media are tightly controlled.

It is estimated that the number of radio sets in Burma is 1,100,000. While it has not been possible to conduct surveys in Burma there is substantial evidence that the BBC Burmese Service is widely heard and that the audience includes some of the most notable

and influential personalities, the profession-al classes, intellectuals, army officers and students. The Burmese President, U Ne Win, heads the list of important personalities who are known to be listeners. Visits to Burma by BBC staff members connected with the Bur-mese Service have been marked, in recent years by private dinner parties given by the president, at which other prominent guests, ministers, high officials and civil servants, have made it clear that they, too, are BBC listeners

British ambassadors in Rangoon have reported widespread and influential listening, even at times when, inevitably, the content of some broadcasts may be unpalatable to some Burmese. In his information report of June 1972, the ambassador wrote:

"... BBC broadcasts both in English and Burmese are widely listened to, the latter being virtually the only means we have left of reaching a wider public . . . The value of the BBC Burmese Service cannot be over-

estimated . . ."
The corresponding report of June 1973 confirmed this view:

". . . . We welcome the decision to retain the BBC's vernacular service to Burma . . ." In April 1975 the British ambassador again

stressed the importance of retaining the BBC Burmese Service and added that the knowledge of English in Burma was declining. In July 1975, the embassy's information report stated:
".... BBC broadcasts in both English and

Burmese are widely listened to . . television unlikely to be introduced for many years radio is an important medium .

In the autumn of 1977, the British embassy in Rangoon told the Foreign Office that the abolition of the BBC Burmese Service and the curtailment of the World Service would be seen as further evidence of declining British interest in Burma, and added that the BBC Burmese Service is regarded as providing a reputable window on the outside world for a closed society, and enjoying a

large appreciative audience.

BBC Burmese Service broadcasts are monitored by the Burmese Broadcasting Service and summaries are circulated to all government ministers, and to radio and news agency editors. Excerpts are frequently published in the press. Particular attention is paid to the dawn news transmission which, as the first comprehensive and trusted world news round-up of the day, seems to be regarded as particularly valuable in government ministries and newspaper offices. The BBC reporting on the demonstrations in Rangoon over the burial of U Thant, the late UN Secretary General, in December 1974, was the subject of a good deal of favorable comment from listeners, including Burmese government's director of information. He

. The BBC has scored very well with first-hand accounts, actualities and well balanced news during the riots here. Now almost everyone tunes in to the BBC-both the Burmese and the World Services. . .

During 1977, the BBC Burmese Service received 5,769 letters from listeners.

The following are typical:

". . . We tend to associate the BBC mainly with news and only those who listen completely to each transmission realise wealth of knowledge gained from programmes such as English by Radio Life in Britain, Science and Rural . . ." (Clerk, Bassein). ". . . I have been following the Medical

programme very closely and find the talks very useful, especially those concerning the development in research, prevention and treatment of diseases more common in our country . ." (Medical Student, Moulmein).

". . News broadcasts from the BBC are

always up to date and accurate. Our local radio station always gives distorted news and that is why most people in my town listen to the BBC ...

. . I was saddened by the announcement on 3rd August 1977 that the Burmese Service, among others, might have to close down as a result of some committee recommendations. We have always admired the way you handle the news with speed and accuracy, not to mention the wealth of knowledge gained from listening to programmes. We request you earnestly to continue the good work in giving us true facts without bias and prejudice . . . (Librarian, Taungdwingyi).

BBC ITALIAN SERVICE

Each member country of the Warsaw Pact has a longer service in Italian than the BBC. The USSR puts out 21 hours a week in Italsome of it in similar form to the BBC's Italian Service output and, on 256 metres, close to the medium wavelength of 251 metres used by the BBC. The output of the other Warsaw Pact countries is a further 94 hours. China has a weekly output in Italian of 7 hours for Europe (and a further 3½ hours for Africa), and Albania has 24½ hours. In contrast, the Western World, with the exception of Vatican City (16% hours a week), pays scant attention to Italy: the USA and France have no services in Italian, and Federal Germany's Deutschlandfunk broad-

casts in Italian for only 3½ hours a week.
A survey carried out in Italy in 1976 established that the BBC Italian Service had an audience of some 1,200,000 adults, including a regular audience, listening at least once a week, of about 500,000. The BBC Italian Service had the largest regular audience of the six external services mentioned in the survey.

A survey in Switzerland in 1973 revealed that the BBC Italian Service had about 120,-000 adult listeners there, of whom 40,000 were regular listeners.

The restless political situation in Italy is reflected in an upheaval in the field broadcasting. Private local radio and tele-vision stations have proliferated, notably since, in July 1976, Italy's Constitutional Court declared RAI's monopoly of local radio and television to be unconstitutional. Within RAI itself, there have been major changes linked in part with Communist demands for "more professionals and fewer political appointees". However, as the BBC's correspond-ent reported, "more, not less, political inter-ference seems to be the order of the day". In practice, as is now recognized semi-officially, the various RAI channels are separately controlled by the main political parties.

In addition to its direct listeners, the BBC

Italian Service reaches a large domestic audience in Italy and Switzerland through its regular programme contributions to RAI and the Italian language service of the Swiss Broadcasting Corporation. Since May 1980 items have also been sent regularly to Vatican Radio and a station in the USA has used ten editions of a science and technical programme. During 1980, 239 programme contributions were broadcast by RAI, including 130 current affairs talks and 11 longer features, and 52 editions of a weekly newsreel of dispatches from BBC corre-spondents throughout the world, introduced in the summer of 1977 under the title "Quadrante Internazionale".

In addition, since December 1977, the BBC Italian Service has been producing jointly with RAI a weekly programme entitled "Eu-rope 19—" and in 1980 39 editions were carried both by RAI and the BBC. The launching of these two programmes on the Italian in 1977 was given considerable press, radio and television publicity in Italy. An essay competition, on the theme "The Young Discover Europe", run fointly by the BBC and RAT as part of the "Europe 1981" series, has attracted much publicity in the Italian press as well as material help from the EEC. the European Parliament and a number of Italian official organisations. The ten top prize winners spent eight days in this country, where they were the guests of Sir Charles

Forte at the Cumberland Hotel and were entertained by the Foreign and Commonwealth Office. Another group of prizewinners were received in audience by President Pertini at the Quirinal in the presence of the BBC Italian Programme Organiser.

The Head of the South European Service has been awarded the Calabria prize, an award made by Italian press critics on radio and television, for his work in connection

with BBC Italian output.

RAI's third channel also carries the occasional major series prepared by the BBC's Italian Service. "Post Industrial Europe" and "The Cost of Sound Money" have already been broadcast. A further series, now in preparation, "America, Europe and the World"

Extracts from the weekly Science and Industry Programme are sent to RAI, to "Corriere Medico", an Italian medical journal, and to "L'Eco di Bergamo", a provincial daily.

Contact has been established with several private broadcasting stations, all of them members of the association ANTI. So far. a number of programmes on unusual aspects of Britain as well as English by Radio have been supplied, and the potential is considerable.

The Italian language service of the Swiss Broadcasting Corporation was similarly supplied with 106 programme contributions during 1980 and Vatican Radio with 34. Interviews with the Service have also been given by many distinguished Italians during the past few months. These include Giulio Andreotti, the then Prime Minister, Giovanni Marcora, the former Minister of Agriculture, Francesco Foschi, the then Minister of Labour and the writer Alberto Moravia.

During 1980, the BBC Italian Service received 1,668 letters from its listeners.

The threat to the BBC Italian Service posed by the CPRS Report in 1977, and the Gov-ernment's proposed economy measures in 1979, both provoked strong comment in the Italian press

'Il Resto del Carlino" carried a long article in November 1979 under the title "Goodbye to Radio Londra and to many memories" and which included the following passage:

'The disappearance of these threatened transmissions by the so-called 'government axe' will break a tradition and will place the foreign service of the BBC in the position of being under suspicion of being transformed into a propaganda station, broadcasting only to Communist and developing countries. Why deny daily contact between friendly Euro-pean countries? . . "
"La Stampa" carried a similar article while

the "Corrière della Sera" had this to say:

the decision to abolish programmes like "Quadrante Internazionale" a "Europa 79" (the first ever programme like its kind to be broadcast jointly by the BBC and Italian Radio) is, to say the least, strangely contradictory coming from a government which proclaims itself to be orientated towards Europe. . ."

And Mario Pinzauti, a leading RAI news

director, was moved to comment thus:

"For forty years the BBC foreign services have diffused over Europe the voice of democracy. Today they are an important contribution to European unity and a model of impartial information and quality. To suppress this contribution would be a political mistake for Britain and for Europe.

Italian officials' and listeners' reactions echoed these views and contained protests at the potential loss of reliable information. In a letter to the Managing Director of BBC External Broadcasting dated 12th September 1979, the Director General of Radio Vatican expressed "the utmost concern" at the fact that "the Italian programme is obviously threatened among others":

. . . The possibility that the BBC broad casts to Italy could cease seems to us a grave matter and we would like to think that the wide protests echoing around this proposal may induce those responsible to find other areas where 'trimming' is less

Over the past few years, the Service has suffered from an inadequate mediumwave signal from the VAO relay in Munich as the aerial there was not properly aligned. After lengthy negotiations, a special aerial is about to be installed aimed at the targe; area. When this is completed, the signal would be greatly improved and the impact of the BBC's Italian Service much enhance.

BBC SPANISH SERVICE

For many years, the Warsaw Pact countries have considered Spain to be a major target. The USSR contributes 21 hours of the 80 hours they broadcast in Spanish every week. Other Communist countries also recognize Spain's importance. Albania provides 24½ hours a week, Yugoslavia 10½ h China 14 hours and Cuba 43¾ hours. hours.

This compares with 7 hours by the BBC and by France and 101/2 hours by Federal

Germany.

A joint audience survey was carried out in 1976 for the BBC and Deutsche Welle by an independent Spanish research organisation. It was estimated that the BBC Spanish Serv ice had a regular audience of about 500,000 adults and a total audience, listening regularly or occasionally, of about 950,000 adults. The survey showed that the BBC audience had been increasing since a similar survey in 1971.

Results of a new survey are just being received and indicate that the audience is broadly similar to that in 1976.

In addition to the BBC Spanish Service's direct shortwave audience, the Service reaches the Spanish radio audience with programmes supplied to Spain's domestic radio services. During 1980, 752 programmes or programme items in Spanish were supplied to Spanish radio stations and a further 173 news or general contributions in Catalan were sent to Radio Nacional, Bar-celona. The Spanish programmes include: A fortnightly link-up programme, "Debate Europa", originated by the BBC and con-taining discussions on topics of European interest between British, Spanish, French, Italian and German radios, and a 30-minute weekly light magazine programme for young people, "Meridiano de Londres", it is us by about 40 stations in the SER network.

BBC Spanish Service transmissions are rebroadcast every day by Radio Gibraltar, and in addition 53 editions of "Semana In-glesa" were sent to Gibraltar for rebroadcasting during 1980. Radio Gibraltar can be heard by listeners on the adjacent Spanish mainland. The common problem of the future of Gibraltar has undoubtedly been clarified by the undistorted flow of informa-tion on Britain's and Gibraltar's own attitudes provided by the BBC's Spanish Service.

During 1980, the BBC Spanish Service received 2,344 letters from listeners, many of which were stimulated by the very successful DX programme, launched at the begin-ning of the year. Indeed this programme made such a mark that it received a high popularity vote outside its target area in a competition organized by the Buenos Aires DX Club ahead of many other well established DX programmes.

During the war, the Franco regime and the delicate period of transition to parliamentary democracy, the BBC Spanish Service built up a solid audience which relied on it for uncensored news; through the Service the views of Spain's own democratic politicians were available, views suppressed in Spain itself. Many of the listeners to London during those times are now in positions of power in Spain. Spain's application to join the EEC has focused particular attention and interest on pro-grammes dealing with the Common Market.

Another of Spain's preoccupations is with the problems of regionalisation. In 1980, Tarradellas, a father figure of Catalan Nationalism and past President of the Generalitat of Catalonia paid this tribute:

". . . the BBC has always been to all of us

hope for tomorrow . ."

Despite the political changes in Spain, listeners say that the BBC Spanish Service provides a more complete and credible news

service than Spain's own national media.

This criticism has been reflected in the British press. On 23rd February 1979, the "Spanish Daily Telegraph reported that "Spanish radio and television are receiving increasingly heavy criticism for their unequal coverage of the current general election cam-paign", and on 29th November 1978, the Financial Times recorded that "despite Spain's achievements in transforming itself from a dictatorship to a democracy, the powerful state-owned television service continues to act as a propaganda arm of the Government and ruling party .

More recently the Financial Times reported that the Director-General of RTVE had been removed from his post-and appointed Spanish Ambassador in London—because of grow ing protests over the Spanish TV's political bias. In February 1981, when Colonel Tejero of the Civil Guard, occupied the Spanish Parliament, the Spanish National Radio and Television stopped all news broadcasts.

A questionnaire sent to BBC contacts showed that these tuned to BBC Spanish broadcasts for the latest news. It can be assured that many more followed them.

On 30th August 1979, Radio Madrid in its European Service in Spanish, commented on the possible disappearance of the BBC's broadcasts in Spanish. For many years, the Service had been familiar to Spanish listeners "Searching for non-Sectarian news, free from any dogmatism and close to objectiv-The possible loss of the Service was bad news "which we would not wish to see definitely confirmed." The commentary paid tribute to those who had contributed for many years to the promotion of "a demo-cratic ideal." The BBC broadcasts had had a direction and feeling that converged with the aspirations of the Spanish people and "daily offered us a stimulating and natural image of Great Britain." The commentary concluded with the hope that the budgetary measures would be short lived "because we refuse to believe that the voice of the BBC in Spanish has been silenced for good.

The popularity of the BBC was very clearly demonstrated by attendance at two "BBC Week" exhibitions organized by the BBC in Madrid in April 1978 and in Barcelona in May. The event in Madrid, which was opened by the Mayor of the capital, was visited by some 4,000 people a day. The exhibition in Barcelona, which was opened by the President of the Catalam Regional Government, was seen by some 3,000 people a day. In 1979 the University of Pamplona organized "A Week with the BBC" which proved so successful that the authorities decided to extend the idea to coverage of other international

broadcasters

The leading Madrid newspaper El Pais car-ries daily the programme schedules of the BBC Spanish Service.

BBC BRAZILIAN SERVICE

Since March 1938, without interruption, the BBC has been broadcasting a daily serv ice in Portuguese to Brazil. Throughout this period a substantial number of people have acquired the habit of tuning in regularly to a service which provides them with, among other things, unbiased world news and comment based on unrivalled international network of sources and correspondents. In addition to the direct short wave transmission about eighty Brazilian stations receive recorded programmes which are broadcast reg-ularly on the local air.

The most recent independent surveys in Brazil measured the size of the BBC's audiences in Rio de Janeiro. São Paulo and five state capitals. The total audience to the BBC in Portuguese in these cities alone is some 865,000 adults of whom 180,000 listen regularly. The adult populations represented by the samples in all seven urban centres represent about a quarter of the adult popula-tion of Brazil, which with a total of 119 million has now the sixth largest population in the world.

The external broadcasting services of the Communist countries maintain a high volume of output in their Brazilian services Among Warsaw Pact countries, the USSR provides a Brazilian Service with an output of 23.30 hours a week; the remaining members of the Pact broadcast between them over 50 hours a week to Brazil. Also beamed to Brazil are 21 hours a week from Albania

and 14 from the Chinese P.R.
With its output of 15.45 hours a week, the BBC Brazilian Service is one of many Western voices competing for Brazil's attention. Included among the others are Federal Germany's Deutsche Welle, the Voice of America, Canada, the Netherlands, Portugal, Sweden, Switzerland, Japan, Italy, Greece and the Vatican.

The British Foreign Secretary's tour of Latin America in July last year-which took him first to Brazil and subsequently to Venezuela and Mexico-appeared to indicate the U.K.'s recognition of Brazil's growing importance, both as an economic power and as a leading Third World protagonist in the North-South dialog. In the United Nations Brazil vigorously deplored the Soviet occupation of Afghanistan.

For Britain to turn its back on the Brazil--while preserving a service to the Spanish-speaking countries of Latin America—is a policy statement which may

have unfortunate consequences

Times supplement on Brazil, issued in March 1978, ferfured an article headed "Broadcasting Informs the Masses Where Few Can Read" and commented: "...it is easier to find a Brazilian with a transistor pressed to his ear than with a newspaper under his arm. .

The article pointed out that only about 4 million out of a population (in 1978) of 115 million read a newspaper and that the real mass media in Brazil are radio and television. In April 1977 a full-page feature in the "Jornal do Brasil", one of the country's leading papers, on the inroads made in Brazil by ign broadcasting stations included various references to the BBC Brazilian Service. among them the following:

Promotion of national industry is stressed by some short-wave radio stations such as the BBC which broadcasts an indusprogramme with that specific purpose. Brazilian listeners are told of the latest technological advances in British industry and are even given addresses of firms to write to for fuller information or for importing a product.

In April 1978 the Finance Secretary of the State Government of Minas Gerais-an important industrial area-said in an inter-

"The BBC Brazilian Service is very influential not only in remote areas of the country, where people have less access to press, radio and TV, but also in the larger cities like Rio, São Paulo and Brasilia. I have heard a large number of people, both nalists and people not connected with the press, mention they heard a particular piece news or comment on the BBC. In my opinion, the BBC is not only extremely important for information, but also very influential as an opinion former.'

rn May 1980 the "Folha de São Paulo" headed an item on the BBC with the words: "The Foreign Station With the Largest Audience in Brazil".

In 1979 Brazilian listeners reacted with alarm to the news of possible cuts in the BBC's External Broadcasting activities. The following quotes are taken from letters received:

. . I have learned that the Brazilian Service might suner with the recently announced government cuts. I strongly protest against that decision. . . . I pray to God that the government will still change its mind as it would be a great loss if the Brazilian Service went, as I have learned a great deal, and am always learning, through its transmissions. . . ." (São Paulo).

". . If that happens, the most affected would not only be the BBC listeners but also the free world, as we all know the stations of the socialist countries are extending their programmes and frequencies. (Mato Grosso do Sul).

UNITED AIRLINES PILOTS APPROVE LANDMARK CONTRACT

Mr. PERCY. Mr. President, almost 4 years ago, Chicago-based United Airlines decided to break with the airline industry and support airline deregulation legislation. United courageously opted to fight to end the comfortable atmosphere of Federal regulation that limited competition. Instead, it wanted to be given the freedom of the marketplace; that is. the ability to add new routes, provide additional services, and price its product without Government interference. It was led by Ed Carlson, who is now chairman of UAL, Inc., and Richard Ferris, who is now chairman of United Airlines.

Without the support of United Airlines, and particularly, Monte Lazarus, who is now senior vice president for external affairs, I am afraid the struggle to pass deregulation legislation would have been much more difficult, if not impossible. Not only did United support the legislation, but it actively, vigorously and effectively delivered its message to

the Congress

Since the enactment of deregulation legislation in October 1978, a series of unforeseen and adverse events have overcome United and the rest of the aviation industry: Intractable fuel prices that continue their upward spiral, the grounding of the DC-10 fleet, a lengthy strike, a recession, high interest rates, and an illegal controllers strike.

Despite these negative events and new competition on many of its lucrative routes. United has remained supportive

of deregulation.

Finally, this commitment is beginning to pay dividends. Recently, United Airlines pilots approved a new labor contract that will reduce crew costs by 15 percent while guaranteeing job security for its pilots. The pilots have agreed to fiv twin-engine Boeing 737 aircraft with two crew members, instead of three. This should make United Airlines more competitive with the new entrants.

The contract should serve as a model for the airline industry on devising the best strategies to improve productivity without sacrificing job security.

As a result of the contract, United has announced a major expansion that will find it flying to such medium-size cities as Syracuse, Louisville, San Antonio, and Albuquerque, by October 1, 1981.

Additionally, it will institute low-fare

service along the west coast on the same

date called "Friendship Express."
Shortly, United Airlines is hoping to service Japan from the Pacific Northwest. It has waited many years for final approval of this new route, and it should not be subject to any further delays for any reason.

I would like to submit for the RECORD an explanation of United Airlines' new service as published in its Friendly Times newspaper of this month, and ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD as follows:

GOOD NEWS FOR EVERYONE: UNITED WILL GROW, NOT SHRINK

In an aggressive move to expand the airline, Chairman Dick Ferris says before year end United will:

Add four new cities to its routine system. Establish high-frequency, low-cost Friend-ship Expres service between both Los Angeles and San Francisco and several cities in Cali-

fornia and other Western states.

Expand service at three cities that got their first scheduled United flights less than

Increase capacity in scheduled service to

Las Vegas by 20 percent.

The new flights will be accommodated within the government's flight-level guide-

Ferris attributes the expansion to productivity gains resulting from a new pilot contract ratified August 13 and other cost efficiencies the company has achieved in the past 12 to 18 months. Without the cost savings, it would have been necessary to shrink the airline by 30 percent.

Although optimistic, Ferris says timing of the expansion hinges on airways capacity as a result of the strike by air traffic controllers.
United currently plans to start service

October 1 at Albuquerque, Louisville, San Antonio and Syracuse.

The company plans two daily round-trip flights between Albuquerque and both Chicago and Denver and one daily round trip to San Francisco. Louisville, San Antonio and Syracuse will have two daily round-trip flights to Chicago.

United's ability to provide more same-airline connections beyond the major cities will enable the company to compete effectively with other airlines that provide service in the markets.

Frequent, low-cost flights in high-density markets from both Los Angeles and San Francisco also will begin Oct. 1, if airways capacity is available. The new Friendship Express service is designed to enhance United's position in the two major California cities

Productivity gains made possible by the new pilot contract will allow United to compete on a cost basis. Ferris said this ability to compete on a cost basis also will allow United to re-enter several markets, including Los Angeles to Sacramento and San Jose and San Francisco to San Diego

At Los Angeles, Friendship Express will include five daily round-trip flights each to Las Vegas, Phoenix, Reno, San Jose and Sacramento, six daily round-trip flights to Portland and 16 round-trip flights to San Francisco. Some of the six daily Los Angeles-Seattle flights also will operate with allcoach aircraft.

Friendship Express at San Francisco will include new non-stop service to both Las Vegas and San Diego with four daily roundtrip flights each and one additional daily round-trip flight to current service levels in Portland, Phoenix and Reno. Service between San Francisco and Boise, Eugene, Spokane, Los Angeles, Medford, Santa Barbara, Seattle and Salt Lake City will remain at current levels, but will operate in all-coach aircraft.

Ferris said United plans to expand service at three cities-Oklahoma City, Tulsa and Houston-which a year ago were not on United's route map.

On Oct. 1, the company plans to add a daily flight between San Francisco and both Oklahoma City and Tulsa. On Oct. 25, United will expand substantially at Houston, again subject to the possible restraints of the air traffic control system. Plans are to add three daily round-trip flights to Los Angeles, two daily round-trip flights to New York's LaGuardia Airport and one round-

trip flight to Philadelphia.

Recognizing the price-sensitive, low-yield nature of the Las Vegas travel market United will increase substantially the number of seats available to Las Vegas beginning Sept 9. By replacing current equipment with high-density DC-8-61 and all-coach Boeing 727-200 aircraft to routes from key cities, the change can be accomplished without affecting the airways system.

The company plans additional flights later in the year, specifically new non-stop Mil-waukee-Las Vegas service and equipment changes for service between Las Vegas and Philadelphia, Detroit, Baltimore/Washington, Cleveland, Omaha and Denver,

"With improved cost efficiency, United will be able to grow," Ferris says. "In an extremely price-conscious environment, we cannot compete on price alone. An airline must be cost competitive or it will lose the game in time.

"The actions we've taken in the past few months have paved the way for the growth we expect to begin this fall," he said.

FERRIS: WE WILL BE A DIFFERENT AIRLINE We're going to be a different kind of airline than we ve been in the past.

We have to be.

Deregulation has opened the way for new, low-cost airlines to compete with us on our busy, profitable routes. But that same deregulation has freed us to compete as hard our own will and smarts will let us.

But to compete in the market as it is today, we can't keep on doing business the way we used to. Of course, it's one thing to we can't be the kind of airline we were in the days of tight regulation. It's another thing to be able to describe what kind of airline we're going to become. Our vision of the United of the future is still evolving, just as the shape of the competitive marketplace is still evolving.

But here are at least some of the features of the United of the future that I can see right now:

To compete with the new low-cost airlines, we're going to become a low-cost operator ourselves, where we have to be.

Travelers today are looking for the lowest price. While we've traditionally sold the Mercedes of air service, in some markets we're finding out we can make more money and serve more people by selling Pintos.

If the customers want a Pinto, we're not going to get anywhere trying to sell them a Mercedes, because the customers aren't going to buy it. So we're not going to try to sell them a Mercedes, just because selling high-grade service makes us feel so good and

We're going to be an airline that finds new ways to work with employees and unions, so we can keep on competing, growing and pro-

viding jobs and good pay.

The old confrontation game with unions is no good anymore.

Unlike other airlines, nobody here is asking employees to give up pay raises. Nobody is asking employees to give up those really important working conditions everyone has worked so hard to get.

But if we're going to be a low-cost operator wherever we have to be, we—all of us—have to work together to find out how we can do away with some practices that push our costs out of bounds without really improving the quality of employees' working conditions or their work life.

We're going to need everybody's help to keep the airline's costs in line, and still keep the things that are important to employees.
In any market, whether we're giving Mer-

cedes service or whether we're giving Pinto service, we're going to be the best-run airline in the business

We already have the best airline people in the business.

You can run a low-cost airline like the Friendship Express better than anybody in the business.

You can run a first-class service better than anybody in the business.

By finding new ways to work togethertogether-to improve our efficiency, we can beat the low-cost airlines at their own game. We already know we can beat our traditional competitors at their game. What it all adds up to is the most important feature of the United of the future.

We're going to grow.

ASSIGNMENT "BLUE SKIES" YIELDS UNIQUE DOCUMENT

A pivotal point in the history of United. That's what Chairman Dick Ferris calls the new pilots' contract.

"Depending on what the pilots did, this airline could have taken one of two very different roads," Ferris says. "We could have taken the low road. We could have been forced to abandon routes to low-cost airlines and get a lot smaller—up to 30 percent smaller. Or we could take the high road. We could be free to compete and grow."

The company's aggressive expansion plans for the fall make it clear that United's now committed to the high road.

To get on that road, the company and the pilots' union (ALPA) negotiated a new contract—a contract that's far from a warmed-over version of the pre-deregulation model. The brand-new contract, from scratch, is the product of some unusual negotiations.

Here's how the new contract came about: Shortly before the old contract was up, it became apparent that "normal" negotiations wouldn't produce enough changes to make United cost-competitive with low-cost airlines. So rather than negotiate against a tight deadline, the company and the union agreed to extend the old contract for six months (at a 6 percent pay raise for pilots). The extension gave both sides time to look at "Blue Skies."

"Blue Skies" was the term applied to a cooperative effort by the union and the comany to improve United's competitive position by writing an entirely new contract suited to today's environment, rather than trying to modify the old contract and its layers of age-hardened inflexibilities.

The union wanted proof that the company asn't crying "wolf" over its competitive wasn't crying "wolf" over its competitive problems and its need for relief on crew costs. So the company opened up its financial and marketing data to both the union negotiating committee and to an analysis and verification committee specially appointed by the union. The analysis and verification committee members were pilots chosen for their particularly strong business back-

The first step was to determine how much crew-cost saving was needed to allow United to compete against low-cost airlines on its current routes. Once that needed cost saving was known, the company and union agreed on adjustments to pay practices, work rules and crew complement that would make the saving possible.

The result was a contract that allows the pilots to be more productive on the days they work. But the contract essentially preserves the pilots' traditional work patterns and days off. And the company agreed not to furlough any pilots now on the payroll and assured it would employ at least 4,539 pilots through the contract term.

PILOT CONTRACT IS AN INDUSTRY PACESETTER The pilots' union has ratified a new contract that will help United compete head-

to-head with low-cost carriers.

The new contract will cut United's crew costs by 15 percent, while providing pilots a guarantee against any further furloughs and a pay raise-24 percent over 26 monthsthat keeps United pilots among the best

paid in the industry.

The savings for the company come from relaxing work rules or "duty rigs."

The new contract permits the company to schedule pilots to fly 81 hours a month, up from the 77½ hours provided by the old contract. In addition, the company can schedule pilots' duty hours more flexibly.

The pilots also agreed to fly the Boeing 737 with a two-member crew instead of a three-

member crew.

"I want to thank the pilots on behalf of all United employees for having the wisdom to choose a very positive course of action," said Chairman Dick Ferris. He called the company's plans to dramatically increase fly-ing in the fall "the direct result" of the pilots' agreement.

All other airlines-except Western Airlines—have had a crew-cost advantage over United in small jets, because other airlines fly 737s and McDonnell Douglas DC-9s with just two pilots in the cockpit, while United's contract has required three. Many of the new low-cost airlines—such as New York Air and Midway Airlines—fly only 737s or DC-9s with two-member cockpit crews

To specifically counter those low-cost airthe new contract reserves its most sweeping work-rules changes for United's

737 crews.

The contract eliminates all 737 duty rigs, except that the company has to provide 737 pilots 15 days off a month and can't schedule their flying in such a way that pilots are "away from home" more than 275 hours a month. ("Away from home" time is counted from an hour before a pilot reports for work until a half-hour after he returns). The object of those stipulations is to assure that will schedule the pilots company

productively.

For crews of United's other aircraft, the contract reduces the hours of flight time pilots are guaranteed for each hour they're "away from home." That provides the company more flexibility in scheduling.

The pilots also agreed to fly the new Boeing 767 with a two-member crew, if the Federal Aviation Administration certifies that aircraft for operation by two pilots. United will take delivery of its first 767 next year.

HIGH INTEREST RATES HURT OUR FARMERS

Mr. BOREN. Mr. President, rampant inflation, high interest rates and declining farm commodity prices have combined to create a disastrous situation in our country's farm economy today. Farmers are faced with increased production expenses due to soaring credit costs for production loans. As a result, the demand for farm capital loan investments is down substantially because of high interest rates.

Bankers throughout the Nation re-

port that farmers are making do with existing machinery where possible and holding off on major building and other capital improvements. This loan demand picture is a direct result of high interest rate levels being charged to farmers. Also, because of higher production costs the American farmer has less funds available for paying down his outstanding loans.

Because of the increasing cost of credit. many farmers and ranchers are finding it increasingly necessary to use farm land equity to meet their credit needs. This type of agricultural borrowing is a distressing indicator signaling that farmers and ranchers are desperately trying to cope with spiraling interest rates.

Many bankers around the country report that this year will be a "make or break" year for the marginal and highly leveraged farm operator. Also, across the Southern States, bankers have indicated a noticeable increase in the number of farm operators that are liquidating because high interest rates have raised their production costs above break-even

High interest rates have also been responsible for depressing farm commodity prices. According to the August 3 issue of the Wall Street Journal high interest rates have played a significant role in depressing commodity prices, because when rates are high, farmers and processors often reduce inventories to pay debt or to invest their money in higher yielding, money market securities.

Farm commodity prices continued to slide in July, dropping 0.7 percent from June. Since the start of the year the farm commodity price index has dropped over 2.8 percent. As a direct result, meat producers in the cattle and hog industry are operating at severe losses. The staggering effect of high interest rates and depressed commodity prices are forcing many meat producers out of business.

Mr. President, the messages we are receiving from our Nation's farm economy are loud and clear: High interest rates pose a serious threat to our Nation's producers of food and fiber, if high interest rates prevail American agriculture will suffer its worst setback since the Great Depression. The effects of such a setback, because of high interest rates, would be devastating for years to come not only to our Nation's farm sector but also to the rest of our Nation as well.

FEDERAL COURT LIBRARIES

Mr. HELMS. Mr. President, a highly significant publishing event that occurred July 31, when William S. Hein & Co., Inc., of Buffalo, N.Y., published a two-volume set, Federal Court Libraries, which was prepared by Raymond M. Taylor, a respected lawyer and internationally recognized authority on law libraries and the law information indus-

Most of the material in this 2,049-page set was prepared when Mr. Taylor was project director of the Federal Judicial Center Study of Federal Court Libraries during the time between January 20, 1976, and September 30, 1977. More than 1,000 Federal judges and court personnel participated in providing information for this study, and there were contributions by law publishers, architects, librarians, personnel specialists, and others who recognize the importance of this mammoth undertaking.

Indeed, the study by the Federal Judi-cial Center under Mr. Taylor's direction is perhaps the most all-encompassing study of law libraries and law research

ever done.

The study has significance from several standpoints. It tells about the books used by Federal judges and where those books are located. It tells also about where our Federal courts operate and how our judges do their work. It gives much insight, therefore, into our judicial system, including its achievements and its shortcomings.

Mr. Taylor wrote that the methods and facilities for law research within our Federal courts are examples of "waste, inefficiency, and false economy." Those unwelcomed findings are supported by the documents included in the set just published. That presents a challenge to the courts, the Congress, and the present administration, Mr. President, because every possible effort should be made to eliminate waste and inefficiency in all parts of the Federal Government.

By tracing the history of the development of law libraries for the Federal courts, Mr. Taylor points out many causes of inefficiency. Federal court buildings, he says, are designed in a way that results in wasteful duplication of books and discourages the sharing of research resources by our court personnel. After finding no current General Services Administration standards for the architectural design of court law libraries, Mr. Taylor's study makes suggestions for appropriate standards.

Perhaps most important among the study's recommendations, Mr. President, is that a coordinated nationwide law information system be established to serve all Federal judges wherever they are and whenever they need information on the law. Such a system would bring together the resources of hundreds of lawbook collections and use both modern technology and skilled specialists to help Federal judges do their work more efficiently. Until this study was done, the emphasis seemed to be upon "procurement and property control," that is, procedures for contracting to buy books and then keeping records of them, rather than upon devising the most efficient and economical ways of providing information, whether from books or computers.

Because the study was done in 1976 and 1977, the documents prepared then are of special importance today, Mr. President, as a basis for determining what improvements, if any, have been made as a result of these findings and recommendations. Also, the Congress will find help here in providing means for our courts to keep up with their work in the future, and to do so efficiently and economically.

The information in Federal Court Libraries has not been available in conveniently useful form before now, Mr. President, because it consisted of many separate documents, appendixes, tables, photographs, and other materials. As an example of the capabilities of the free enterprise system, this valuable material subsequently has been organized, indexed, and published without cost to the Government. Not only is the public given convenient access to valuable information formery availbale to only a few Government employees, and even then without an index, but the libraries, law firms, architects, and others who desire this material now may purchase it at a reasonable price.

Private enterprise is making a genuine contribution by publishing material of this kind so that it easily may be obtained by members of the public who desire it and are willing to pay a fair price for it. Such publishing ventures place no burden on the taxpayers and are a service to both the public and their Government. Publishing of this kind should be encouraged, Mr. President, and for that reason I am particularly pleased to bring to the Senate's attention the recent publication of Federal Court Libraries.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired.

UNIFORMED SERVICES PAY AND BENEFITS ACT OF 1981

The PRESIDING OFFICER. The Senate will resume consideration of the pending business, which the clerk will state.

The bill clerk read as follows:

A bill (S. 1181) to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. Under the previous order, the hour of 9:45 a.m. having arrived, the Senate will now proceed with the consideration of the Matsunaga-Hatfield amendment dealing with the comparability pay raise for en-

try-level military personnel, on which there shall be 3 hours of debate.

The Senator from Hawaii is recog-

UP AMENDMENT NO. 354

(To provide a comparability pay raise for entry level military personnel by reducing the pay raise provided to commissioned officers)

Mr. MATSUNAGA. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Hawaii (Mr. Matsunaga), for himself and Mr. Hatfield, proposes an unprinted amendment numbered 354.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 39, beginning with the table in line 4, strike out all through the end of the table on page 41 and insert in lied thereof the following new table:

COMMISSIONED OFFICERS

Pay grade	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26	Over 30

Mr. MATSUNAGA. Mr. President, the Senator from Oregon is required to be at another function where he is presiding. I yield to the Senator from Oregon for his opening remarks.

Mr. HATFIELD. Mr. President, I thank the Senator from Hawaii for accommodating me, as I do have this conflict of chairing a markup of the Committee on Appropriations, beginning at 10 o'clock.

Mr. President, it is a privilege to stand, once again, with my good friend, Senator Matsunaga, in defense of the All-Volunteer Force. No Senator has been more thorough in his approach or firm in his commitment to this cause than the Senator from Hawaii. The amendment we

propose today is simple, essentially noncontroversial, and designed to alter the pay bill to a minimal degree. Our amendment brings the pay bill in line with the studied conclusions of the Department of Defense regarding long-term manpower needs.

The issue, put simply, Mr. President and there is one issue only that we can really focus on today—is comparability. Military pay should be consistent with the level of purchasing power in the private sector which prevailed when we launched the All-Volunteer Forte in 1972. Obviously, we must target certain areas with larger increments in pay in order to enhance retention.

Every Senator in this Chamber knows that men and women do not enlist in the armed services to get rich. Rather, they enlist out of a sense of patriotic duty, to develop new vocational skills, or for other reasons. We are not discussing the pros and cons of extravagance; we are discussing basic commitment. Congress has a commitment to young people who are looking for assurances that their families will not bear the burden of military service. They want to know that congressional adherence to the principle of comparability is not a temporary aberration, but an unwavering act of confidence.

For the purpose of insuring that this debate goes to the heart of the issue, I recommend that we expose our biases immediately. My advocacy of the All-Volunteer Force and my abhorrence of compulsory military service is well-known and understood. But I suggest that if any Senator here today has already concluded that the All-Volunteer Force is unaffordable and that we cannot possibly hope to garner sufficient funds to pay the enlisted ranks a decent wage, that he clarify that position now. For this is, to some extent, a referendum on the All-Volunteer Force. I might say it is really a back-door opening to the draft. I hesitate to carry this line of thought too far, as I do not believe that most Members of this Chamber have given as much thought to this amendment as they have to the larger arguments of voluntarism versus coercion.

Mr. President, in my view, the Senate Armed Services Committee has done a creditable job of insuring that pay levels for senior enlisted personnel, technical experts, and career officers are substantial and appropriately targeted. But with all of this fine work, there exists an exception which I find curious. While middle and senior enlisted personnel will receive pay increases ranging from 13 to 22 percent and all officers average around 12 percent, entry-level personnel are slated to receive pay increases of only 7 and 8 percent.

I assume that we can trust their own documentation. Their documentation starts with the O-10 general level at 12 percent. That is their own documentation. If this is a charade and they are going to explain this documentation away as meaningless, then let them come forth with accurate documentation.

I have documentation here showing O-10 at 12 percent increase, O-9 at 12 percent, O-8 at 12 percent, and down the line. This is from the Armed Services Committee itself. Yet, they give entry pay increases of only 7 percent to 8 percent.

The administration has determined that a 9.1-percent increase is the minimum necessary to keep military pay comparable with private-sector purchasing power. In order to correct this inadequacy, only minor modifications

need to be made in pay levels at the career officer level. Looking at the pay scale chart in the Senate bill, the four highest grades will receive a 12-percent pay increase with only one exception, which is the O-6 grade officer having served 14 years, who will receive 17 percent.

Moving down the chart to the next three grades, the average increases are even larger, with some officers receiving increases as large as 16.5 percent. Only at the O-1 and O-2 level do we see officers receiving pay increases at the approximate comparability level. Similarly, increases for noncommissioned officers and enlisted personnel above the E-3 level range from 10 to 22 percent. The point here, Mr. President, is that there is ample room to add an additional 1 percent to those at the entry level without disrupting the essential objectives of the Senate pay bill.

Mr. President, the Secretary of Defense wrote me recently and asked that I support the concept of a nontargeted, across-the-board, 14.3-percent increase so that the Department of Defense could allocate the money on the basis of a scientific approach. The House Armed Services Committee concurred with this logic and has done just that. While I also favor this approach, Mr. President, I do not stand in disagreement with the essential thrust of the Senate bill. The below-comparability pay for the lowest enlistment levels is the only glaring flaw which I see in the bill.

I would add that the Department of Defense has clearly stated that officer re-enlistment does not now pose, nor is it expected to pose, great difficulty for the future. The retention of noncommissioned officers, which had previously been a severe problem for the Armed Forces, has improved markedly. There is every expectation that this situation will continue to improve in the years ahead.

I stress, however, that this does not mean that we can lapse into a sense of comfort with respect to these areas. We must continue on the course which was begun in October of last year to reestablish the pay levels which were envisioned when the All-Volunteer Force was first formed. That was started by Senator Armstrong and Senator Matsunaga on the floor, and the Armed Services Committee only dealt with this issue at a later date in order to get into the act.

I also emphasize—and this is critical—that our amendment will not take a single cent from any of the noncommissioned officers or technical people. Where cuts are made, they are miniscule and only affect those who are substantially above the comparability level.

Mr. President, because this debate occurs at a time in which calls for a return to the draft are frequent and widespread, I take this opportunity to point out how incredibly well the All-Volunteer Force is doing. It is important to stress that these improvements have accelerated since October 1980, when Congress enacted the first long-overdue major pay increase. Between October 1980 and March 1981, Active Force strength actually exceeded the objectives.

The Army exceeded its strength re-

quirement by the greatest margin of any of the services. Reenlistment is up sharply, as our measurable quality indicators. These improvements occurred despite the stringent quality standards imposed by the Armed Services Committee and Congress on the forces. One such requirement is the minimum 65 percent high school graduates for first-term Army enlistments. The Army is now getting 68 percent high school graduates and an 80 percent overall high school graduate level.

The Department of Defense projection of the future size of the career force indicates that, based on the most recent retention statistics, each service can meet its aggregate career force objective even with a total force size increase if pay levels remain reasonable. These projections, however, are based on an assumed 14.3-percent, across-the-board increase.

The Army is expected to exceed its objective by fiscal year 1982, assuming a 5-percent growth in force size. The Marine Corps will exceed its objective by fiscal year 1983, assuming a 10-percent growth in strength. The Air Force will exceed its objective by fiscal year 1982, also assuming a 10-percent growth in strength. The Navy will exceed its objectives by fiscal year 1985, assuming a 15-percent growth in strength.

We can meet these requirements and, indeed, exceed them, but it cannot be done without maintaining at least comparability before all.

Because of these stringent quality standards and the Administration's call for a substantial increase in force strength, there is a growing body of opinion, including the Department of Defense itself, which holds that quantitative requirements, rather than quality and career retention, will pose the greatest challenge for the volunteer force in the 1980's.

Mr. President, there are indications that the comparability level will be even higher than that which was originally envisioned. If this is so—and I believe it only prudent to operate on the side of caution—we are shortchanging the first-term enlistees to an even greater extent than we originally thought. We have an All-Volunteer Force. That is the policy.

There are those who yearn to a return to the draft, and they are entitled to their opinions. I am not questioning the integrity of those who genuinely believe that this would be a more advantageous road to take. But we cannot allow this desire to affect the judgments and policies we make under the present arrangement. Let us debate that issue in a separate context. For now, we are deciding whether or not we will respect the requirements of the voluntary force concept.

Mr. President, I have a letter from the Bureau of Labor Statistics indicating that the 9.1 comparability figure may turn out to be a 9.7 figure for the base upon which we are making these judgments. So that would make for even greater discrimination.

We are going to hear about compression pay. This amendment does not af-

fect that one bit. We will still have between the E-3 and E-4 the differential necessary to attack the compression pay problem.

We are going to hear about the enlistee being comparable to an apprentice in the commercial world. There is a comparison one can make; but in the matter of apprentices, they are above or at the minimum pay level, which is higher than these figures we are talking about, the E-1's, E-2's, and E-3's.

Mr. President, I cannot comprehend why there is such reluctance. I would have thought that the leadership, which has made an outstanding contribution to this comparability pay problem in bringing this matter to the floor from the committee, would be the first to cosponsor this proposal or would have handled this in the committee. Why the discrimination against the enlisted raise at E-1, E-2, and E-3? One percent only will bring them up to a 9.1-percent base of comparability, and that is not asking very much.

Therefore, when we offer this amendment, we are doing so not only in the name of comparability, to make it more accurate, but also, we are doing so with the least disturbance to the work of this committee in targeting pay at those middle areas we need to retain by attacking the problems of compression pay. We are doing the least in disturbing their overall program.

At the same time, we are bringing equity where there is discrimination; I believe, we are also striking a note for the volunteer system.

I do want to make the very strong commitment here today which we made in 1972. That is, when we went to the volunteer system, we made a commitment that we were going to maintain comparability. Recruiting is going to be the problem of the 1980's, and recruiting is the issue we are attacking here.

If we fail to adopt this amendment, we are opening the back door for the return to the draft. We are also being discriminatory against the E-1, E-2, and E-3. We are not maintaining our commitment that we made in 1972 for comparability.

So it is only to right an injustice, to right a glaring flaw in this bill, and I am very hopeful that by the end of the debate the leadership of the bill will join in accepting this amendment because it in no way distrubs their basic thrust.

I thank the Senator from Hawaii for his leadership on this matter. I am honored to be associated with him. I assure him that as soon as we finish the markup on this appropriation measure I will be back in the Chamber to join him in the battle for this.

(Mrs. KASSEBAUM assumed the

Mr. HATFIELD. Madam President. I ask unanimous consent to have printed in the Record the letter from the Bureau of Labor Statistics to which I have referred.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR,
BUREAU OF LABOR STATISTICS,
Washington, D.C., September 9, 1981.
Hon. Mark O. Hatfield,
U.S. Senate.

Washington, D.C.

DEAR SENATOR HATFIELD: In response to a September 8 telephone request from Mr. Rick Rolf of your staff to our Office of Wages and Industrial Relations, I am enclosing a copy of the June 26 release on white-collar salaries. The information is from the Bureau's annual survey of professional, administrative, technical, and clerical pay (the PATC survey) which is used to compare Federal white-collar salaries with those in private industry, as required by the Federal Pay Comparability Act of 1970.

The first page of the release indicates the average percentage increase in salaries between March 1980 and March 1981 for those occupations providing comparable data from both surveys. The combined average—9.7 percent—provides a general indication of how salaries increased for the survey jobs.

You may also be interested to know that the Bureau's Employment Cost Index (a broader measure of pay change in terms of industries and occupations) showed whitecollar salaries increasing 9.3 percent over the same 12-month period. (See enclosed release dated May 28.)

If I can be of further assistance, please let me know.

Sincerely yours.

JANET L. NORWOOD, Commissioner

Mr. MATSUNAGA. Madam President, I thank the Senator from Oregon for his contribution. Without his advice and counsel I would not have been able to get as far as I have on this matter and on matters pertaining to the All-Volunteer Force. I wish to thank the Senator from Oregon.

Madam President, the amendment which the Senator from Oregon (Mr. HATFIELD) and I are offering to the Uniformed Services Pay and Benefits Act of 1981 is designed to restore a full comparability pay increase for entry level military personnel. It is clear to us that the below-comparability pay raises provided in S. 1181, as reported by the committee, for the junior enlisted grades will have a disastrous effect on military recruiting efforts and will, in the long run, undermine the All-Volunteer Force and result in the return to a peacetime draft. And as night follows day the committee will come before this body and say the peacetime draft is necessary to maintain our military manpower.

As reported by the Senate Committee on Armed Services, S. 1181 provides middle- and senior-enlisted personnel with substantial, above comparability pay increases ranging from 13 to 22 percent and generous increases to most officers averaging above 12 percent. At the same time, however, the committee bill provides entry level personnel in grades E-1, E-2, and E-3 with pay increases of only 7 and 8 percent. These levels of increase are below the 9.1-percent increase determined by the Reagan administration as necessary to keep military pay comparable to private sector wages. They are also far below the 14.3-percent increase for first-term personnel recommended by the Reagan administration and approved by the House Armed Services Committee in its version of the military pay raise bill.

The Matsunaga-Hatfield amendment would increase the pay raise for E-1's, E-2's and E-3's from 7 to 8 percent to 9.1 percent, which, as I have earlier indicated, is the fiscal year 1982 comparability figure. The amendment would offset the cost of these increases by reducing the pay raises for commissioned and warrant officers by 1 percent or less, depending on grade. The pay raises provided to officers in grades O-5 through O-10 wou d be reduced under our amendment by 1 percent. The pay raises for officers in grades O-3 and O-4, many of whom are at the career decision point of 10 years of service, will be reduced by only one-half of 1 percent under our amendment. And those officers in grades O-1 and O-2 who are only receiving 9percent pay raises under S. 1181, as reported by the committee, would be increased to 9.1 percent, again the comparability figure.

Madam President, I emphasize the fact that our amendment has a zero cost impact on S. 1181. That is relative to cost. The cost of bringing the entry level grades up to comparability is offset by the relatively small decrease in officer pay raises which I have just described.

And mind you, Madam President, that we are not suggesting a decrease in the pay of officers. We are merely suggesting a less pay raise, a smaller pay raise than they would otherwise get and only by one-half to 1 percent less pay increase.

Madam President, there has been a considerable amount of discussion over whether or not the Matsunaga-Hatfield amendment would, in any way, affect the targeted pay raise concept embodied in S. 1181; so I wish to briefly comment on this issue.

At the outset, let me say, and I wish I could have the attention of the floor manager on this matter because I know it is of big concern to him. If I may have the attention of the Senator from Iowa on this one statement which I am making, I would deeply appreciate it because this, as I know, is a matter of great concern to the chairman of the Subcommittee on Manpower.

At the outset, let me say that, except for trying to improve it, I strongly support the committee bill, and do intend to ask the distinguished floor manager and chairman of the Armed Services Manpower Subcommittee, Senator JEPSEN, to add my name as a cosponsor. I deeply share the committee's concern about retention of the skilled middle and senior enlisted personnel and wholeheartedly endorse the substantial pay raises provided to them in this legislation. As many of my colleagues know, and as the chairman well knows, I have, in the past, supported across-the-board increases in military pay. In 1979, I joined the distinguished Senator from Colorado (Mr. Armstrong) in offering the first amendment to provide military personnel with full, across-the-board comparability increases in pay.

At that time, I believed very strongly that because of successive pay caps and lack of benefits increases—which in effect constituted a failure on the part of the President and Congress to keep faith with the basic All-Volunteer Force concept of maintaining pay comparability—military personnel needed a substantial increase in pay across the board. After two Armstrong-Matsunaga amendments on pay comparability were defeated by the Senate Armed Services Committee and the full Senate, Congress finally recognized the need for pay comparability and provided such an increase last year for all personnel.

This year, I believe that some targeting of the pay raise is necessary in order to address the serious problem of career personnel retention and pay compression among the enlisted ranks, as the Senator from Iowa has advocated.

I do not have to repeat how serious these problems are and what improved retention of these skilled personnel means to the readiness of our Armed

The Senator from Iowa and the distinguished ranking member of the Manpower Subcommittee, the Senator from Nebraska (Mr. Exon), made this very clear to the Senate during yesterday's debate on the bill.

In supporting the Jepsen-Exon targeted pay bill, I do have some reservations, however. First, I am convinced that the catch-up pay raise for all personnel recommended by the Reagan administration is necessary if the All-Volunteer Force is going to have any long-term chance of survival.

What I am referring to is the need to restore the comparable relationship between military pay and private sector wages of 1972 when the Congress established the All-Volunteer Force.

I am proud to say that I was one of the two fathers, original authors, of that measure, which created the AVF, along with the late Congressman Steiger, Bill Steiger, of Wisconsin.

Although some of this catch-up pay raise is included in S. 1181 for some rates, many others fall far short.

I am hopeful that the committee will, in deciding on pay raises in fiscal year 1983, take this into account and make every effort to restore military pay in all grades to levels competitive with the private sector.

Second, the Senator from Oregon (Mr. Hatfield) and I are very concerned that in attempting to target substantial pay increases to the NCO grades and generous increases to officers, the Armed Services Committee has produced an unbalanced bill because the targeting was accomplished at the expense of the entry-level grades.

The amendment we are offering is based on this concern. But before I go any further to offer the reasons for our amendment, let me make one point very clear. The Matsunaga-Hatfield amendment does not in any way, shape, or form change or reduce the pay increases provided to middle and senior enlisted personnel, as provided in S. 1181. The pay raises for the NCO grades are left unchanged under our amendment. We strongly support these increases, which we believe are essential to improving enlisted retention and strengthening our career force.

The Matsunaga-Hatfield amendment has nothing to do with across-the-board increases, and it does nothing whatso-ever to change the overall targeted approach contained in the committee bill. The targeting of the pay raise is only affected to the extent that our amendment raises the entry-level pay raise by 1 or 2 percentage points and decreases officer pay raises by 1 percent or less. The officers involved would still get pay raises, and the committee's targeted pay scale is left largely intact.

Madam President, we are offering this amendment for two very important reasons: First, we are extremely concerned, as is the Department of Defense—which, I would add, is opposed to the targeted concept of the bill—that the below-comparability pay raises for recruits provided in S. 1811, as reported from the committee, will have a disastrous effect on the efforts of the military services to recruit high quality personnel.

Second, we are very concerned that the Senate, if it adopts S. 1181 without the Matsunaga-Hatfield amendment, will be going on record in support of below-comparability increases for personnel in a few selected grades despite the commitment made to active servicemen and the American public only last year that we would adhere to the basic principle of the All-Volunteer Force, the maintenance of pay comparability for all personnel.

Now, much has been said in the past couple of years about the seriousness of the retention problem. Although the military services for the first time in the history of the all-volunteer service failed to reach their recruiting goals last fiscal year, recruiting—and I repeat, recruiting—has not been considered as serious a problem as retention. But that is changing according to the Department of Defense, and the Members of this body should be aware of it.

I think it may come as somewhat of a surprise to some Senators, but the Department of Defense has testified before Congress this year that the most pressing military manpower problem now facing the All-Volunteer Force, one that threatens its very existence, is the recruitment of sufficient numbers of high school graduates.

In a statement before the House Armed Services Committee on July 8 of this year, Assistant Secretary of Defense for Manpower Lawrence Korb talked about the current and projected manpower situation and expressed the deep concern of the Department of Defense over the recruiting outlook and the future of the All-Volunteer Force.

Dr. Korb said that the major military manpower problems we will confront over the next 5 years will be somewhat different from those we have inherited from the recent past. No longer will the retention of career personnel be the overriding concern of the All-Volunteer

With the population of 17- to 21-yearold males declining by 15 percent over the next 5 years, Dr. Korb warned that recruiting will become, if it has not already become so, a serious problem for the military services.

The Pentagon's manpower chief em-

phasized in his testimony to the House committee that we cannot be misled by the current success we have been having in meeting our recruiting goals. He indicated further that recruiting has been aided to some degree by an unusually high youth unemployment rate and a sluggish economy. It is reasonable to expect that the youth unemployment rate will decline somewhat during the next few years, thereby placing additional pressure on the military in its competition with the private sector for the recruitment of high quality individuals.

Dr. Korb also said that some economists predict that civilian wage rates for youths are likely to rise relative to the wage rates of the general population over the next several years, thereby raising the cost of enlistment into the military to the potential recruit.

In view of these circumstances, and the fact that the Congress last year mandated the military services to recruit far more high school graduates and far less category IV enlistments in order to improve the overall quality of the force, Dr. Korb made the following statement which we consider to be crucial as we consider how to target the pay increases contained in S. 1181:

As we look out over the next 5 years, there is little doubt that recruiting and, in particular, recruiting for the Army, will be our major military manpower problem. This problem, though challenging, is not insoluble. A key element to the solution is to maintain a competitive level of entry pay. Any plan for targeting the October pay raise that reallocates the raise away from personnel in their first term of service fails to satisfy this objective.

In response to Assistant Secretary Korb's testimony, which was in support, I might say, of the administration's proposed 14.3-percent across-the-board pay increase with accompanying reallocation authority, the House Armed Services Committee took the following position in its report on its version of the pay raise legislation:

It has been suggested that (military personnel) in the lower grades with fewer years of service should receive a lesser percentage (pay) increase and that those in the higher grades should receive a higher increase. . . . If the All-Volunteer Force is to have a realistic chance of succeeding, a reasonably adequate level of entry pay must be provided. To shortchange the pay for those initially entering military service runs counter to the effort to recruit volunteers for the Armed Forces. . . Additional compensation for selected categories (or military personnel) should not be funded at the expense of increases in compensation needed to provide adequate pay to enable recruiters to compete in the marketplace for qualified young people needed to man the All-Volunteer Force.

Madam President, the fact of the matter is that S. 1181, as reported by the Senate Armed Services Committee does exactly what the House Armed Services Committee and the Assistant Secretary for Manpower warned against. The bill funds substantial increases for NCO's and generous increases for officers at the expense of junior enlisted personnel.

And Senators must realize that there is a price to be paid for taking this money away from the entry level grades; let no one tell this body that this is not

so. The price will be paid in terms of the recruitment of less high school graduates—the very people whom the Senate Armed Services Committee has stated time and time again are so very necessary to man our Armed Forces and to maintain and operate the elaborate and technologically complex weapons systems of our modern military force. There should be no mistake about this, Madam President.

When the sponsors of S. 1181 say it will not adversely affect recruiting, they are speaking in direct contradiction to the official position of the Department of Defense and the Reagan administration.

The fact of the matter is that the below-comparability pay increases for recruits in S. 1181 will seriously damage the effort to recruit high school graduates next year and in the years thereafter. The Department of Defense has testified to this effect time and time again, this year. It is a matter of record, Madam President.

Madam President, I have in my hand a copy of a letter sent to the chairman of the Senate Armed Services Committee on June 18, 1981, by Secretary of Defense Caspar Weinberger in which the Secretary warns that a 14.3-percent increase in recruit pay as opposed to a basic comparability raise of 9.1 percent will permit the military services to recruit 8,000 more high school graduates in fiscal year 1982 and 44,000 more by fiscal year 1987. would point out that, with the recruit pay raises in S. 1181 set at only 7 and 8 percent, nearly 2,000 more high school graduates would be lost to the military services if the Senate bill is enacted, bringing the total loss of high-quality recruits in fiscal year 1982 to 10,000.

Clearly, Madam President, the loss of such a large number of high school graduates would be catastrophic for the All-Volunteer Force. It is interesting to note that in past years when the military services experienced high school graduate recruiting shortfalls of even less magnitude, which would result from S. 1181, certain critics of the All-Volunteer Force were more than quick and more than eager to pronounce the AVF a failure and propose a return to the peacetime draft as the only answer to our military manpower problem. I fully expect such a scenario to happen once again if this legislation is enacted without the Matsunaga-Hatfield amendment.

Unfortunately for the All-Volunteer Force, its critics this time will be able to say that they have pumped the All-Volunteer Force full of all kinds of pay raises, of all kinds of allowance and benefits increases, and, perhaps, provided it with a new GI bill, and the volunteer military was still unable to met its quantitative and qualitative manpower goals.

I wish to say again, Madam President, that I wholeheartedly support all provisions of S. 1181 with the exception of its recruit pay raises. With these below-comparability increases, this legislation is not a "balanced" approach to our military manpower problems as its sponsors have made it out to be. It is an unbalanced approach which may, in the long run, prove to be a blueprint for the peacetime draft.

Madam President, it just does not make sense that the Senate's military pay raise bill should provide below-comparability pay raises for recruits when the All-Volunteer Force is going to be faced with severe recruiting problems over the next several years.

It makes even less sense when we consider the more immediate reality that the Army has only a 50-50 chance of meeting its quality goals for fiscal year 1982 with the full 14.3 percent pay raise for recruits, and will probably fall short of its recruiting goals in fiscal year 1983.

It is vitally important that Senators not lose sight of the fact that it was below-comparability pay raises, such as that contained in S. 1181 for recruits, which caused the severe recruiting and retention problems experienced by the AVF in the late 1970's. We must not start down that road again. It will only lead to recruiting shortfalls and the eventual abandonment of the All-Volunteer Force.

Madam President, the Matsunaga-Hatfield amendment would give the committee bill the balanced approach to both retention and recruiting that is necessary to make it an acceptable solution to our manpower problems. And, as I have said, it will do so without making any significant changes in the basic thrust of S. 1181 or in its pay table.

Madam President, as my colleagues know, in a "Dear Colleague" letter distributed to Senators last week, Senators Jepsen and Exon argued that our amendment would somehow dilute the effect of S. 1181. This is just not the case.

As we understand it, the main thrust of the committee bill is, and I am quoting from the committee report on S. 1181, to "Enhance pay rates for middle and senior enlisted grades to provide greater incentives for * * * retention," and to "Relieve pay 'compression' by providing larger pay differentials between first term and career members to provide a positive career inducement."

Now, it is our view that the only way that an amendment to this bill could dilute its effect would be by first, reducing the above-comparability pay raises provided in the bill to middle and senior enlisted personnel and second, drastically reducing the pay differential between first-term grades and career enlisted grades.

Well, the simple truth is that the Matsunaga-Hatfield amendment does not seek to accomplish either of the above.

As I have emphasized repeatedly, our amendment does not reduce any of the substantial pay raises provided in the bill to the NCO grades. It, therefore, has no effect on the efforts to S. 1181 to improve career enlisted retention.

And with respect to pay compression, our proposal to increase E-3 pay raises from 8 and 9 percent to 9.1 percent will not make any significant difference in the pay differential between that entry level grade and E-4, which would be receiving 13- and 14-percent pay increases. Moreover, it is my understanding that the crucial point in the enlisted scale for pay compression was between E-4 and E-5. Our amendment does not modify in any way the pay increases provided to these two middle enlisted grades and

has no effect on the pay differential that exists there. Our amendment, therefore, has no effect on the efforts of S. 1181 to relieve enlisted pay compression.

Senators Jepsen and Exon also downplayed the improvement in recruiting of high school graduates that would be realized by the adoption of our amendment. They called the additional 1.800 high quality recruits which would be generated by our amendment insignificant. Admittedly, 1,800 out of a possible 183,-000 does not seem like a great deal of personnel. However, it is our understanding that these 1,800 high quality recruits could man two full Army infantry battalions. One could argue that the establishment of two new fighting battalions is not insignificant when we are trying desperately to improve the combat readiness of the Army and expand the number of our combat units.

I recall one battalion in World War II the 100th Infantry Battalion, of which? was a member. If you talk to some of the members of that battalion, had it not been for that battalion, the war probably would have been lost in Europe.

In order to get these 1,800 recruits, our amendment takes a small percentage of pay raise away from officers in the full colonel and general range who are now earning good salaries and who would be receiving above-comparability pay raises under S. 1181. These high-level officers would be 1 percent less happy with their generous pay raise and the military services would get nearly 2,000 more high school graduate recruits. If that is not a good deal, I do not know what is.

We have, as you know, no real retention problems at those high grades.

Madam President, one of the most interesting arguments made against our amendment is one which quotes Gen. Edward C. Meyer, Chief of Staff of the Army. General Meyer is quoted as saying that S. 1181 will not adversely affect recruiting; that the difference in the recruit pay increases between S. 1181 and the administration's proposed 14.3 percent across-the-board pay raise will not affect a young person's decision whether or not to join the Army.

In support of General Meyer's opinion, a youth attitude tracking study prepared for the Department of Defense last fall is also cited to the effect that most young people are not more likely to enlist for military service after learning that recruit pay is actually higher than they thought.

Well, first let me say that General Meyer's conclusion that S. 1181 will not have any effect on recruiting is seriously challenged by the Department of Defense. According to the Department, the most recent empirical evidence shows the very strong impact of increases in firstterm pay on the supply of quality recruits to the Army. The value of this socalled pay elasticity has been estimated as high as 2 for new high-quality recruits to the Army in a recent study conducted by the Center for Naval Anaylsis. This means that for every 1percent increase in military pay, the re-cruit supply to the Army is increased by 2 percent. The Department of Defense and the Congressional Budget Office use an elasticity value of 1 and the Gates Commission, in its original work on the All-Voluntary Force concept assumed a 1.25 value.

This is all to say that those research organizations which have done careful analytical studies on the relationship of pay to accessions, such as the Gates Commission, the Rand Corp., the Center for Naval Analysis and the Congressional Budget Office, all hold the position that pay has a definite effect on high-quality recruits. I would strongly emphasize that this is also the official position of the Department of Defense.

The bottom line is this, Madam President: If all other factors which motivate a young man or woman to think about enlisting in the Armed Forces are held constant—for example, patriotism, family advice, and so on—entry-level military pay will definitely get a response. I do not see how this can be denied. General Meyer surely would not oppose increases in recruit pay, for the Army is, in fact, in danger of not being able to meet its quality recruitment goals next year.

Moreover, the Department of Defense has indicated that there is the possibility that the Army may fall short of its quality recruitment goal by a full 5 percent. This takes into account new information received from the Bureau of Labor Statistics which shows that true pay comparability may require a 9.7-percent increase, instead of the 9.1-percent figure earlier predicted by the administration.

It is also very interesting to note, Madam President, that the Army itself is on record—I repeat, the Army itself is on record—as choosing to suppress growth of its career force well below the maximum level that it could sustain, given current compensation plus either the House or the Senate pay raise bill. According to the Department of Defense, the Army has justified its failure to capitalize on the career growth for which the Congress is willing to pay by emphasizing quality. The Army wants to be selective and to retain only the best in building up its NCO corps, presumably by raising its reenlistment qualification standards. This is, indeed, admirable.

However, with this scenario, pay raises targeted on the career force will not contribute either to a more experienced force overall nor to a reduction in the demand for new recruits compared to an across-the-board pay raise.

Besides boosting recruitment, Madam President, we believe that the adoption of our amendment is necessary for another very important reason. That is, that Congress must maintain pay comparability for all military personnel, not just a selected group. Under S. 1181, only the recruit grades receive below-comparability pay raises—an out-and-out discrimination, I would say.

The practical effect of the Matsunaga-Hatfield amendment is to insure that in S. 1181, each and every service member, no matter what grade or year of service, will receive at least—I repeat at least—a full comparability pay raise of 9.1 percent. We think this is very important for two reasons.

First, with a full comparability increase, recruit pay will not fall too far behind inflation and the cost of living. It must be kept in mind that when pay did erode to below comparability during the late 1970's, the military services began experiencing severe recruitment and retention problems and we saw thousands of servicemen and their families relying on food stamps and other forms of welfare assistance to make ends meet. I am certain that every Member of this body believes that this is totally unacceptable and I submit that we must not begin to go down that road again.

Second, active members of the Armed Forces must be sure of the commitment of Congress to keeping military pay competitive with the private sector. If we demonstrate our willingness to drop one segment of our manpower below comparability, the question will surely be raised as to the seriousness of Congress's future commitment to maintain pay comparability for all personnel. This perception on the part of active members may even have an impact on our current efforts to improve career retention.

Third, with respect to potential enlistees, we must not send a signal to the young people of this Nation that Congress does not believe that recruit pay must be competitive with the private sector. That is precisely what we will be doing if we adopt S. 1181 as reported by the committee. If there is any way to discourage enlistments, particularly of intelligent high school graduates, it is to depress first-term pay and create the impression that the recruit is a second-class citizen in our military force.

Madam President, I have repeated this many times and I shall say it again here today: It is vital to the survival of the All-Volunteer Force that Congress keep faith with the fundamental principle of the volunteer concept—the maintenance of military pay comparability with the private sector.

The Senator from Oregon (Mr. HATFIELD) and I are convinced that S. 1181, upon adoption of our amendment, would be a much more balanced pay initiative.

Madam President, the Reagan administration, the Department of Defense, and the House Armed Services Committee support full comparability pay for all military personnel, particularly recruits. Consequently, they would support any movement in the Senate bill in that direction. We, therefore, urge strong support of our bipartisan amendment to achieve this objective.

Madam President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Iowa has 19 minutes.

Mr. JEPSEN. Madam President, I ask unanimous consent that the names of the Senator from Rhode Island (Mr. Chafee) and the Senator from New York (Mr. MOYNIHAN) be added as cosponsors of S. 1181, the Uniformed Services Pay

and Benefits Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Madam President, I thank my colleagues, Senator HATFIELD

and Senator Matsunaga, for their amendment and for the opportunity to further present to this body, to the American people, and especially those in the Department of Defense and those men and women in the uniform of our country, a fuller explanation and a better perception of this entire proposal, S. 1181.

At no time during this discussion—neither before nor after this discussion—should anything I say be interpreted as being judgmental of this amendment. I would not attempt to judge what is in the hearts or the minds of the proponents of the amendment; because, like myself and Senator Exon, they have very distinguished careers of serving their country, not only in the U.S. Senate but also in the military service.

I point out, for general public consumption, that the U.S. Senate has many Members who have served their country with great distinction in time of war. In the next 60 to 90 days, there will be many critics in this country who will be pointing fingers and will be talking about warmongers and people who are pushing strong defense, as we debate this very frustrating, emotional, and agonizing problem of how to balance budgets and at the same time maintain the level of defense we need to keep the peace and to prevent war. But this debate and the comments and the actions that occur in this body will not be engaged in by people who do not know about war.

At the rear of the Senate Chamber is Senator Dole, who lay on his back for 3 years in a hospital because he was nearly cut in half by a machine gun while serving this country. On the Manpower and Personnel Subcommittee we have a new member, Senator Denton, who fought for his life every day for 7½ years, as a prisoner. Purple Hearts are worn on the lapels of many Members of this body.

I suggest, in advance, to those who would be critical of anything that comes up by way of discussion or debate or difference of opinion in this body in the next 60 to 90 days that folks think twice before they point the finger at anyone in this body and think they do not know what war is. There are few things worse than war, not many, but I point out that every one of those things comes with defeat.

Senator Matsunaga and Senator Hat-FIELD state that limiting pay raises for first-term enlisted personnel will run counter to military recruiting efforts. This assertion is based upon one study performed years ago by the Center for Naval Analysis utilizing Navy data only. This study is outdated, has never been validated and there is no evidence to suggest that it could apply to the Army or to any other service. That, primarily, is the basis upon which the Department of Defense is making a serious challenge to this bill. I repeat: This study is outdated and has never been validated, and there is no evidence to suggest that it could apply to the Army or to any other service. The Rand Corp. doubts its validity. On the other hand, the overwhelming weight of evidence indicates that entrylevel pay levels have far less influence in attracting personnel initially into the service than on the decision of skilled and experienced service members to make the military a career.

A recent youth attitude tracking study, a survey prepared for the Defense Department, of 10,000 service-age young people, found the average estimate of starting military pay to be only \$315. Even more startling, a full third of those questioned estimated entry-level pay to be only \$75 a month. In fact, a new recruit immediately starts earning \$501.30 in basic pay.

I point out at this point that, in many instances, certain 17-year-olds today can enter the service and in the first 3 months, working things just right, receive more pay and benefits than most corporate presidents in my State of Iowa—in the neighborhood of \$7,000 in the first 3 months. That includes base pay, allowances, educational benefits, and bonuses. That is not bad for 17-year-olds coming into the service or any other particular occupation, and that amounts to approximately \$2,400 a month. It is very good pay just for starters.

Is this misperception responsible for past difficulties in bringing young people into the military? Apparently not, since the vast majority of those surveyed responded that they would not be more likely to consider joining the military on the basis of actual starting pay. According to the survey, other incentives for military service, such as career pay, educational and training opportunities and patriotism and challenge, weigh more heavily on the career decisions of today's youth. This is not hard to understand when 71 percent of today's youth still rely upon their parents' advice when making a career decision.

There is absolutely no evidence to suggest, as the proponents of this amendment would have you believe, that last year's pay increase had anything to do with the dramatic increase in recruiting. If it did, I submit that it was because the services retained more highly motivated enlisted career NCO's. After months of manpower hearings and briefings, the Subcommittee on Manpower concluded that bonuses, a test educational program for new recruits, the economy and a growing positive attitude among our youth concerning the military are the primary reasons for the turnaround in recruiting.

The Congressional Budget Office, the Chief of Staff of the Army, and the commanders of the Army and Navy recruiting commands fully agree with these findings and have stated that targeting the pay raise as done in S. 1181 will allow the services to recruit virtually the same number of quality personnel over the next 5 years as a 14.3-percent across-the-board raise. In a letter to me dated August 20, 1981, Gen. Max Thurman, then the Chief of Army Recruiting, states:

The variance in starting pay differential (between S. 1181 and a 14.3-percent across-the-board increase) which you mention should not impact adversely on the Army's ability to attract quality youth. . . The Army should experience an increase of approximately 6,500 additional reenlistments over FY 81 levels as a result of the proposed target pay increases.

I should also point out to the Senate that the House Appropriations Committee is also convinced that the approach in S. 1181 is correct and has indicated that they will move to amend the House Armed Services Committee pay bill—that is, the Appropriations Committee in the House—with the pay tables contained in this bill.

The advocates of this amendment also have inadvertently, in my opinion, incorrectly represented and confused the issues of comparability and inflation. Let me first point out that comparability has nothing to do with inflation. Unfortunately, all of us, military and civilian, are subjected to inflation. Comparability pay increases are not designed or intended to overcome the effects of inflation, but rather, to keep military pay on a par with Federal civilian employee salaries. Federal civilian employee salaries, in turn, are annually compared to a private sector group known as PATCprofessional, administrative, technical, and clerical workers. This year the President has proposed that Federal employees salaries be capped at 4.8 percent.

However, because of the armed services' manpower problems, the committee felt that a higher increase for the military was justified. Senator Matsunaga and Senator HATFIELD are concerned, however, that the pay raises proposed for E-1's through E-3's are below comparability. In reaching this determination, they only consider basic pay and refer to the tables rather than the many items of military pay that make up regular military compensation (or RMC). The Department of Defense has always utilized regular military compensation in computing comparability for the lowest private and the highest general. Although most privates do not receive certain cash allowances, they do so in kind, in the form of quarters, meals, clothing, medical care, and so forth. Utilizing RMC, an E-1 under this bill would receive 9.1 percent.

And that is the way this entire bill was put together, and I might say put together with all of the cooperation and all of the expertise and all of the work of the research of all branches of the services. Under this the E-1 would receive 9.1 percent. That is the way the total picture has been figured.

It must also be noted that a young service member just entering the service would realize within 12 months of enlistment an 18-percent increase as a result of existing rapid promotion procedures to pay grade E-3.

Senator Matsunaga would also have us believe that recruiting is more of a problem than retention in the armed services, if I heard correctly. This is simply not factually correct. First of all, I point out to the Senate that Dr. Korb has said, and I am quoting not verbatim but from his own report and his recruiting summaries, that during the first 6 months of fiscal year 1981 the military services achieved 101 percent of the Department of Defense-wide recruiting objective as compared to 99 percent for the same period a year ago. A year ago it was not bad; this year 101 percent, and as of this quarter it is about 105 percent. The

Navy, Air Force, and Marine Corps met or exceeded their objective for the first half of fiscal year 1981. The Army achieved 99 percent of its overall objective.

But I suggest and point out to this august body that all the services are seriously short of skilled personnel.

Senator Matsunaga would also have us believe that retention in the armed services is not a problem. This is simply not factually correct. All the services are seriously short of skilled personnel. Some Army divisions have been rated "not combat ready" because of manpower shortfalls. The Navy is short 22,000 petty officers and must juggle crews in order to send ships to sea. Air Force maintenance personnel shortages reduce the number of planes we can put into the air. For example, the career portion of maintenance force in the military airlift command has declined 8 percent since 1976. Currently, the MAC maintenance force has 12.3-percent more first termers and 9-percent fewer career airmen. This has resulted in significantly reduced supervision and training ability. In the avionics field, maintenance and airplane general ratings, manning is at a critical

In its March 31, 1981 report to Congress, the General Accounting Office stated that:

As a result of declining retention rates for experienced NCO's, the Army is not only losing its experienced trainers but it is also forced to replace the NCO's with personnel who are less experienced and trained. It is the absence of just these kinds of people that has prompted the Army Chief of Staff to characterize his force as "hollow."

This problem is further evidenced by the fact that in fiscal year 1982 reenlistment bonuses alone will approach a cost of \$700 million. These bonuses are intended to meet critical shortages. In 1982, 80 percent of all reenlistees in the Navy will receive a bonus. In the Air Force the percentage has jumped 400 percent in 2 years. I would state that based upon these statistics we clearly have a very serious retention problem and one that is not being met by our antiquated pay tables. In fact, the bonuses are being used to address the very problems that S. 1181 is designed to correct.

It is not difficult to understand why qualified young men and women are not joining the military career force. The relationship between career and entry pay has significantly eroded over the years to the point that today a promotion to sergeant, the beginning of the career force, will gain an individual only \$20 a month in basic pay. In 1908 and 1941 the pay of a senior noncommissioned or chief petty officer earned respectively 6.6 and 4.2 times the pay of a recruit. Currently it stands at less than 2.5. An E-7 with 20 years of service receives only \$276 more each month than his E-6 subordinate with 10 years of service. That is not the way to convince a young person that the military can be a rewarding life.

The pay tables contained in S. 1181 were very carefully designed in cooperation with the various services. Their input was instrumental in the development

of the tables. Each pay cell was reviewed in detail and in depth over and over again and checked and rechecked with each and every service in order to make adjustments that would relieve pay "compression" by providing larger pay differentials between first term and career members in order to provide a positive career inducement. Further, enhanced pay rates for middle and senior enlisted grades will provide greater incentive for promotion, career advancement, and retention

Ironically enough, Senator Matsunaga's amendment would effectively restore some of the pay compression that S. 1181 is so carefully designed to alleviate. It is even more disturbing to realize that it would aggravate the existing compression problem by making across-the-board cuts in officer pay raises even though we do have a shortage of field grade officers in all branches of the services. Such an indiscriminate reduction would upset the bill's purpose to encourage mid-career officers to remain in the military.

Senator Marsunaga would cut 1 percent from the raises given grades O-5 through O-10 and reallocate the savings to E-2's and E-3's. However, there is one problem with that and it is that any pay raise due to the pay cap, that point is made on page 39 of the bill in footnote 1, part of the \$54 million in savings that is reallocated to the lower enlisted ranks simply does not exist. Therefore, it is incumbent upon the authors of this amendment to explain how they arrived at their cost estimates. In particular, they should inform their colleagues that contrary to their "Dear Colleague" letter, that the vast majority of generals and admirals will not receive a pay raise.

Now, Senator HATFIELD indicated that there is a charade going on here, that admirals and generals were getting a 12percent pay increase.

Well, the only charade—as it was alluded to by Senator Hatfield—I would suggest was a charade he verbally laid on the Senate this morning, one he would have us believe that generals and admirals are getting a 12-percent increase.

Everyone knows, as I hope does Senator Hatfield, that there is by law a pay cap, and this pay cap allows a zero increase, and even though the schedule for obvious planning reasons, that is, pay compression and other things down the line, shows a 12-percent allocation, you could take 12 percent of nothing today and 12 percent of nothing tomorrow and 12 percent of nothing through eternity and it is still going to be nothing.

I do not know where the charade is coming from. I repeat it is just a charade. They have been using the word comparability. Comparability, again I repeat, is composed of what we call regular military compensation. What is regular military compensation? It is base pay, allowances, and tax advantages associated with military pay, and that is what should be used when talking about pay comparability. This is used by the Department of Defense whether it is an E-1 or a general. In addition to all that, it is incorrect to claim that we are not meeting pay comparability.

It is also incorrect to say that recruiting goals were not made last year because, for the first time in many years, they were made. It is not the numbers with which we have a problem at the present time. I do not know to whom Senator Matsunaga or Senator Hatfield must be talking—it must be some of those new folks in civilian clothes over there who get their information from the think tanks and the Rand Corp.—because we have been talking with the veterans with 20 and 30 years of service who say that retention is the problem and who finally say "Amen, that S. 1181 is exactly what the doctor ordered, exactly what we need."

We designed the bill, I repeat that this bill has been carefully designed, so that the E-1 is getting a 9-percent increase in comparability pay. In fact, I again point out, that in 1 year with the new promotion policy it will be 18 percent.

Before I yield the floor I want to point out that in these times of financial crunch, and for the record I would say, Mr. President and Mr. Stockman and Mr. Secretary of Defense, please note that S. 1181 is \$0.5 billion less than the amount of money submitted by the administration in its proposed budget—\$0.5 billion less.

In addition to that, it is 100-percent supported by the military forces of our country and that, sir, is what the American people want, good money management on the one hand, and better morale and more resolve by our men and women in uniform at the same time. That is a pretty good deal.

Madam President, I would now yield to my distinguished colleague, the ranking member of the Manpower Subcommittee of the Armed Services Committee of the Senate, who has taken the lead in the development of what we are presenting here today. I say that unabashedly and not only with respect but with a great deal of thanks.

It is much easier to be the chairman of a committee and look like you are really making progress, when your righthand ranking member has already gone up front and is leading the way.

I appreciate that very much. I now yield the floor to my distinguished colleague from Nebraska, Senator Exon.

The PRESIDING OFFICER (Mr.

D'AMATO). The Senator from Nebraska.

Mr. EXON. Mr. President, I thank my
friend from Iowa for those remarks. The
fact of the matter is, and I would like to
keep the record straight, that the bill
that we are proud to report to the Senate was the joint work of both the majority and the minority, with excellent
staff work.

I just want to echo the thanks of those of us on this side of the aisle for the total and complete nonpartisan effort that went into the formulation of this bill after many hearings, after many hours of study, and a genuine belief that we had to do something to meet the primary needs of manpower in the Armed Forces. Certainly the chairman of the Manpower Subcommittee played a lead role in that endeavor, Mr. President, in reporting the bill before us to the Senate.

Mr. President, the basic argument, it seems to me, of those who propose the amendment to this bill is that they believe S. 1181 is anti-All-Volunteer Force. This is an emotional argument that might have great political appeal. But I hope the U.S. Senate will act by defeating their amendment and passing S. 1181 on the basis of fact and not emotion.

It is not a legitimate argument that S. 1181 is anti-All-Volunteer Force. This bill was reported from the Armed Services Subcommittee and to the Senate by the full Armed Services Committee in an attempt to address a problem that most people know exists in our manpower requirements as we face the future.

It is a fallacious contention for others to say that this was crafted in some way to destroy the All-Volunteer Force. The sponsors of the amendment seemingly wish to continue to play the numbers game of believing that we attract and keep the people whom we need in the military by baiting the trap early and generously. If we have learned one thing, Mr. President, with regard to upgrading our manpower in all of the services it is that that will not work.

Mr. President, when the Armed Services Committee reported out this military pay bill, all of us on the committee felt that this bill made a real beginning in addressing the serious problem of pay compression and restoring a sense of proportion to the military pay system. The amendment being offered here today undermines this very important concept.

This amendment would reallocate a portion of this pay raise from the basic pay of middle-grade officers to the basic pay for junior enlisted personnel in grades E-1, E-2, and E-3.

The sponsors of the amendment do not seem to understand the purpose of this bill or the way that all of the elements of military compensation are related to each other. The pay tables recommended in the committee bill represent a carefully crafted, balanced proposal. Amending even a small section of this proposal without considering the overall consequences can seriously undermine what the committee has tried to do. This amendment falls into that trap.

Let me give some examples, Mr. President. Basic pay is just one portion of regular military compensation, which is defined in law. The proponents of this amendment have not considered the fact that the committee has increased all of the elements of regular military compensation. Both the basic allowance for subsistence and the basic allowance for quarters increase by 14.3 percent for junior enlisted personnel. If we take an E-2, for example, the increase in his regular military compensation under the committee proposal will be 10.5 percent—well above the so-called comparability figure of 9.1 percent which the sponsors of this amendment think is so important. So, the 9.1 percent comparability figure with respect to basic pay alone, which is the foundation upon which this amendment has been constructed, is simply wrong standard of measure.

Another important point which the sponsors of this amendment have over-

looked is the relationship between promotion policies and military pay. An E-1 recruit does not stay an E-1 for very long. In the Army, for example, the E-1 recruit will be an E-2 within 6 months and an E-3 within a year.

What do these promotion policies mean in terms of pay raises? Let us suppose somebody enters the military service today. On October 1, he will get a 7-percent increase in basic pay. Over the next 12 months he will get two promotions which will give him a further increase in basic pay of 18 percent. Altogether the person who enlists today in the military will receive a 26 percent increase in basic pay during the next 12 months. Mr. President, while we stand here and bicker over a 2-percent difference between entry pay in the committee bill and the entry pay in the pending amendment, the important—and al-ways overlooked—fact is that a recruit joining the service today can expect a 26-percent increase in basic pay over the next 12 months. The increases in regular military compensation would be approximately the same. No matter how you calculate comparability or inflation. I suggest that that is a very large increase.

Mr. President, yesterday we discussed how the front-loading of first-term pay in recent years has led to the problem of pay compression. My colleague, the chairman of the Manpower Subcommittee, made a point of that in his remarks that were just heard on the Senate floor. Obviously, the proponents of amendment do not consider pay compression to be the problem that it is, since their proposal contributes to this problem. I think this is a serious mistake

The problem of pay compression is complicated and one that I recognized early on. There is an intricate relationship between a person's decision to remain in the service based on his perception of future benefits. When the steps along the promotion ladder are squeezed closer and closer together because of the irresponsible front-end loading of pay, the implications can be serious and the reverberations in the personnel system can be felt for years.

After getting tired of waiting for the Defense Department to tackle this problem, the Senate has finally taken the bull by the horns. While it is tempting to reduce officer pay and give that money to first-term people, the Matsunaga-Hatfield amendment would damage the committee's carefully balanced solution to a serious problem which has existed for

Mr. President, the sponsors of this amendment have charged that the committee's proposal will hurt the services recruiting efforts in fiscal year 1982. They make the statement that even with a 14.3 percent increase in recruit pay, the Army has only a 50-50 chance of meeting its quality recruiting goals in fiscal year 1982. Mr. President, that is certainly news to me. The Army has testified before the Manpower and Personnel Subcommittee that they should make their qualitative and quantitative recruiting goals in 1982 and the Congressional Budget Office agrees.

In the event that unforeseen recruiting difficulties do arise, S. 1181 increases the enlistment bonus for those in critical skills from \$5,000 to \$7,500. The Secretary of Defense can designate these critical skills. Today, for example, infantrymen are considered to be a critical skill. But even more important, our legislation, by significantly increasing retention in our career force, will do much more to relieve pressure on military recruiters than the extra 35 cents per day which the Matsunaga-Hatfield amendment would provide to a new recruit. Let us be realistic. Mr. President—the more people who stay in the service, the less we will have to recruit.

The Congressional Budget Office has concluded that S. 1181 will retain 19,000 more careerists over the next 5 years than the House bill containing a 14.3percent across-the-board raise for all personnel. This is the way to help recruiting and the All-Volunteer Force while at the same time improving the experience level of our career enlisted force.

Mr. President, we need to stop throwing money at our military manpower problems and take a sensible approach. S. 1181 is not some back-handed effort to undermine the All-Volunteer Force. I firmly believe that this bill will enhance the All-Volunteer Force by providing incentives all along the career path-from the beginning to the end.

Mr. President, it is time that we in the Congress and the leadership in the Pentagon wake up and realize that, whether the source of manpower for our Armed Forces is the voluntary approach or conscription, we need experienced, motivated people to serve as a cadre for whatever original source of manpower this Nation chooses. This cadre is lacking today and is vital whether we operate under an All-Volunteer Force or conscription. The committee's bill goes right to the heart of this problem. If the All-Volunteer Force will not work under S. 1181, it will not work at all.

I urge my colleagues to reject the Matsunaga-Hatfield amendment. It represents a percentage solution to a human problem. It is also reckless tinkering with a carefully-crafted product which has been the subject of extensive work by the Armed Services Committee, And, most of all, it represents a return to the business at usual approach, which has not served us well in the past.

Mr. JEPSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. JEPSEN. I ask unanimous consent to suggest the absence of a quorum and that the time not be allotted to either

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, I commend the chairman of the subcommittee (Mr. JEPSEN) and the ranking minority member (Mr. Exon) for an excellent job on a difficult subject. We have been strug-gling in the Armed Services Committee on this question of recruitment, retention, volunteer force, and incentive pay for 4 or 5 years. The struggle certainly is not over, but I think that these two Senators and their staffs have done a real service to the country by going into this in depth, by talking not just to the official witnesses from the Department of Defense or the services, but to many different individuals in the services to try to come up with a bill that gets the most for the money.

I strongly endorse their positions in the way they have allocated the pay. The targeting makes sense from any point of view. It makes sense from the point of view of retention; it makes sense from the point of view of the overall viability of continuing the volunteer effort. I am well known to be a skeptic on that subject, but I think if the volunteer force is going to survive, if it is going to work, it has to be beefed up by a great increase in retention.

That is what this bill does.

They have spent hours and hours, and their staffs have spent hours and hours, interviewing people at every level of the military. I have not attended every hearing they have had, but I have attended most of them. I have talked to many different people in uniform in the Navy, the Air Force, the Army, and the Marine Corps. Although opinion on this subject of whether to go across the board or whether to target is not unanimous, and I do not pretend it is unanimous, the overwhelming number of people in the service I have talked to believe that the approach that has been taken by this subcommittee and by the Armed Services Committee is the correct approach, and it is going to result in a much more beneficial pay package for the military than would an across-the-board in-

I know this is not the official view of the Department of Defense, but I think if you took any kind of off-the-record poll, you would find overwhelming numbers of people in the service agree with this approach.

So I commend the Senator from Iowa and the Senator from Nebraska, and their staffs, for doing a superb job on a difficult subject. I strongly urge that the Members of the Senate support this position, both in terms of voting against the pending amendment and in terms of final passage.

The Senator from Iowa made an excellent presentation a few moments ago. I was here for most of it and I listened to it. He has done a superb job of delving into this subject and other personnel subjects with a great deal of intensity, not just since he has been chairman, but when he was ranking minority member and I was chairman.

The Senator from Nebraska has been one of our most diligent members on the Armed Services Committee and the Subcommittee on Personnel. He is now ranking minority member. He has taken a real leadership position in this subcommittee. He is becoming a real expert in this area.

I would hope that the committee would be backed. I would hope that the subcommittee's amendments in this area would be recognized by the Senate and I urge my colleagues to stick with the committee's position. It is well founded and based on, I think, the best interests of the services, the best interests of men and women in the services, and certainly in the best interests of our national security.

The PRESIDING OFFICER. The Sen-

ator from Iowa.

Mr. JEPSEN. Mr. President, I thank my distinguished colleague for his fine remarks and for the trailblazing which was done under his leadership for many

years in this area.

As he indicated, this bill, S. 1181, is not just the result of many hours, many days, and many months of staff work and work by committee members this year; it has been the result totally of many years of research and work in hearings that were conducted under the very able and distinguished leadership of the former subcommittee chairman (Mr. Nunn). I thank him for his support and his remarks.

Mr. President, I suggest the absence

of a quorum.

The PRESIDING OFFICER. On whose

Mr. JEPSEN. I ask that it be on our time.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll. Mr. MATSUNAGA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER, Without objection, it is so ordered.

Mr. MATSUNAGA. Mr. President, several points were made by the floor manager and the ranking minority mem-ber with respect to the Matsunaga-Hatfield amendment.

One point is the contention that our amendment would go contrary to the two intended purposes of the committee bill: One, to improve retention in the careerenlisted ranks. We make no change in the proposal made by the committee with respect to the noncommissioned officers. So our amendment in no way would affect the retention purpose intended by the committee bill.

As I indicated earlier in my prepared statement, I fully support the committee bill except for the provision which would give less than comparable pay to the recruitment level. That is the only concern the Senator from Oregon and I

The other contention made by the floor manager is that we are concerned more about recruiting than about retention. That is not a correct statement. We are as much concerned about retention as about recruiting.

What I said was that the Department of Defense believes that in the next 5 years, recruitment will be a greater problem than retention. With the 11.7-percent raise we gave, which was targeted to the different levels, and the various benefits given by the 96th Congress, the retention problem has pretty much been licked, according to the Department of Defense, to the point where recruitment is going to be the major problem.

Pay compression was another issue brought up by the floor manager as well as by the ranking minority member of the subcommittee. I must say, also, that our amendment will have no effect upon compression pay, particularly with reference to the area in which the committee was most concerned—that is, between the E-3 and E-4. We do not touch

All we are doing is reducing the pay increases. We are not reducing the salary of any of the officers. We are merely reducing the pay increase, by 1 percent and less, of officers in grades O-3 through

The point also was made that we are playing with figures and not with facts: Because of the pay cap, those in grades O-9 and O-10 do not receive any increase under this bill. In fact, our proposal shows a saving of \$600,000, which would mean that even if we completely disregard the savings which would come from reducing the pay increase of the generals by 1 percent, that would be a mere \$530,000.

So what we are saying here is that the Matsunaga-Hatfield amendment would not in any way increase the cost of the bill. As a matter of fact, there would be

a saving.

I commend the Senator from Iowa for taking pride in reducing the cost of the bill below the amount proposed by the administration. I, too, take pride in the fact that our amendment will reduce the cost even further, by about \$60,000.

Those are some of the things that I believe needed to be brought out.

I put this question to either Senator: How does the committee explain away the argument of the Secretary of Defense that the committee bill will cause the loss of 10,000 high school graduates next year and 44,000 over the next 5 years, as compared to the administration bill?

I yield to the Senator from Nebraska for a response.

Mr. EXON. I will be glad to try to re-

The economic assumption made by the administration—the man in the administration to whom the Senator from Hawaii has referred—is an unproven economic theory.

In my remarks, I cited reports from the CBO and other groups that indicated that we were not going to have any serious problem with recruits.

Let us assume, for a moment, that the Senator from Hawaii is correct. He also agrees with me, I believe, that we are talking about only a 2-percent difference, or basically 35 cents a day.

I turn the question around and ask the Senator from Hawaii if he truly believes that we are going to get 10,000 more enlistees just by paying them 35 cents more per day? I suggest that that is a rather shortsighted unrealistic opinion whether it is stated by the Secretary of Defense

Mr. MATSUNAGA. I must say to the Senator from Nebraska that those are not my figures I quoted. I quoted the Secretary of Defense and, of course, he was then comparing the committee bill as reported by the Senate committee with the House bill and the difference, of course, between the committee bill and the Matsunaga-Hatfield amendment would be in much smaller proportion. That will be just about 2,000.

But then my biggest concern and really the only concern with the committee bill is that it fails in that one respect to give comparability to all levels and is discriminating against the recruit. The recruit is the only one who does not get a comparability pay increase. Every other officer and enlisted personnel gets a pay raise equal to or more than comparability. This is the thing that bothers

Of course, the only conclusion that we can arrive at is that perhaps the subcommittee and the committee members felt that it was not necessary to bring up the recruit level to comparability in order to recruit, but here we have the figures of the Department of Defense which say that as compared to the total of the administration, which was 14.3 percent across the board, the committee bill will mean 10,000 less recruits, and we are talking about high-level high school graduate recruits, and by 1987, 44,000 less high-quality recruits.

Mr. JEPSEN. Mr. President, will the

Senator yield?

Mr. MATSUNAGA. I am happy to yield to the Senator.

Mr. JEPSEN. Mr. President, the Department of Defense, according to all records and all information we can gather, has never consulted with their own services recruiting chiefs to ascertain the impact of S. 1181 on recruiting. If they had done so, they would have found out there would be no adverse effect on recruiting as a result of the entry-level pay proposed in S. 1181.

In a letter of July 27, 1981, and I am repeating myself, General Thurman, Chief of Army Recruiting, stated that S. 1181 will not adversely impact on the Army's ability to attract quality youth.

The Navy has indicated that S. 1181 will provide 11,000 additional reenlistees over a 5-year period. The Navy has also the most serious retention problem. The Congressional Budget Office has stated that under S. 1181 the services will be able to recruit virtually the same number of quality personnel over the next 5 years.

So whatever information is gathered, it is difficult to respond to a hypothetical question, and so therefore I will not.

I now yield to our distinguished colleague from Arizona, Senator Gold-WATER.

Mr. MATSUNAGA. Mr. President, I remind the Senator that I have the floor at this time. If the Senator wishes to yield, I will be happy to yield the floor so that the Senator may yield. I have about, I think, 10 minutes remaining.
Mr. JEPSEN. I have been talking on

the Senator's time?

Mr. MATSUNAGA. Yes.

I yield.

Mr. JEPSEN. I thank the Senator. Excuse me.

Mr. MATSUNAGA. So if the Senator will agree to yield equal time from his time, because the Senator does have much more time than I do, then I will be happy to yield.

Mr. JEPSEN. I yield full time to the

Senator from Arizona.

Mr. MATSUNAGA. I yield.

Mr. JEPSEN. I thank the Senator. Mr. GOLDWATER. Mr. President, I thank my friend and I hope to not take

The PRESIDING OFFICER. Senator from Arizona is recognized.

Mr. GOLDWATER. Mr. President, the bill which we are considering today is the best bill attacking the problems of military pay that has come before this body in many years.

We are constantly hearing this argument in support of comparability. I remind you, Mr. President, that comparability is an impossible point to achieve. If we are to look at ourselves, for example, and try to compare our salaries with the salaries of people with responsibilities less than 1/1000th of what we have, our pay is not comparable to the lowest paid bank president in this country.

When we talk about comparability of pay as being a solution in the military, I suggest, Mr. President, this is not the case. Our problem today in the military rests more with discipline and respect: How do you get this? It does not start with the lowest recruit. It starts with the highest ranking man in uniform and unless that man has served and served well, unless he has gained the respect of those people under him and those people, the people under them and down, down, down to where the lowest recruit has great pride in putting the uniform of the United States on, I do not care how much we pay them, we are not going to get them.

This is one of the problems I find as I go across this country of ours visiting military posts, Air Force bases, and naval installations, as I do most of my spare time. We have a lack of discipline down below. We have a lack of respect down below for those officers above them, and I suggest this amendment will actually decrease the pay of some of our officers when, if there is a lower paid group of people in this country, I do not know who they might be than the officers who

man our Armed Forces.
When I think of a four-star general, responsible for the expenditure of \$30 billion, making \$45,000 a year and looking at people hired by this Congress responsible for nothing making \$50,000 a year, I am proud of the man who wears those stars who is willing to wear his uniform out of pride, pride in serving his country.

And this amendment, Mr. President. does nothing, not one thing to help the dilemma that the Armed Forces now face through the lack of men willing to sign up.

I suggest we have to start at the right place. We have to recognize ability. We have to recompense reliability. We have to begin instilling respect for the uniform, respect of our flag, and respect of our country. Then when these young men come on duty they are going on duty like a lot of us did when we were young men with respect for those people above us and will serve as they will serve during the time they have to, and money is not going to enter into it, although it does have its place. Comparability cannot be achieved, and it will never help a bit in the lower recruiting levels.

I thank my friend from Iowa for

vielding.

Mr. JEPSEN. I thank my distinguished

colleague from Arizona.

I yield to the distinguished Senator from Illinois, Senator PERCY.

Mr. PERCY. Mr. President, if I may have just a minute to comment on Senator Goldwater's statement, I wish to say, first of all, that I think that every time the Senator goes to a military installation, and that goes also for Senator Tower, the chairman of the Armed Services Committee and its other members as well, every time they go it helps morale. It means a great deal to our servicemen.

I know every time the President speaks about the military service and builds pride in our military service he has done a tremendous amount of good. I have never seen the morale higher because of the backing and support that the President has given and the Armed Services Committee of the Senate have given to our military forces today.

It takes me back to the 1950's when through promoting better morale we tried to build up our school teaching

force in this country.

But we cannot always substitute morale for adequate pay. We cannot have good morale unless we pay adequately. We cannot indefinitely retain qualified people in a position, no matter how high that position, unless we pay them and compensate them fairly. We get in the end what we pay for.

What we have found with Federal judges is that we are losing them at a faster rate than we ever have before. If we look at the retirement benefits for Federal judges, they no longer can af-ford to stay on the bench. They cannot afford to die while serving on the bench. Their survivors have the lowest benefits I think of any Government employee. I think survivors of any employee in the Senate have higher benefits than the survivors of Federal judges. I have talked to Supreme Court Justices about this as well as the district court judges and commend the Senator for what he is doing in espousing this military pay bill.

The PRESIDING OFFICER (Mr.

QUAYLE). The Senator from Idaho.

Mr. JEPSEN. Mr. President, I yield to the Senator from Texas.

Mr. TOWER. Mr. President, I will be very brief. I want to commend Senator JEPSEN for the splendid job he has done as chairman of the subcommittee that has crafted this bill, and equal thanks and commendation to Senator Exon, the ranking minority member, both of whom have worked diligently on this issue, not just in this session of Congress, but in the last Congress as well.

This is a very, very carefully crafted bill, based on the experience the committee has had on the whole question of military pay. As a matter of fact, we

addressed ourselves to this last year as a congressional initiative, and the fact that we were able to get a pay raise that did favorably increase retention rates was because the Armed Services Committees of the Senate and the House took the initiative to make sure we got pay raises that did, in fact, aid us in maintaining or improving our retention rates.

I would say that the Committees on Armed Services of the two Houses, and particularly the Armed Services Committee of the Senate, have real long-term experience in this, more than the present leadership of the Defense Department. We understand what is nedeed for reten-

tion.

We all know that the professional military are virtually unanimously in support of this bill as it is, and I hope, because this is a carefully considered and crafted bill, that this amendment will be decisively rejected because it simply is a mischievous amendment.

The idea of taking money out of the officers' pockets and giving it to the enlisted men may have some demagogic appeal when, in fact, we need to retain officers and give some career incentive

to officers.

Even though this may not be much money out of the officers' pockets, it indicates that it is symbolic that we may not fund officers' pay raises or officers' pay at adequate levels.

In fact, senior officers of the military are faced now with the pay cap. The Chief of Naval Operations now does not make more than a captain of a nuclear

ballistic missile submarine.

So I think we should consider the bill as it has been drafted and crafted and approved by the committee; that we should reject this amendment, and go to conference with a good, strong bill that is designed to retain NCO's, not just in the 8- to 12-year bracket but the 16- to 20-year bracket as well. We need that senior experience. We need the middle management core of our junior officers, and this bill is the best means to achieve that end.

I urge the Senate, therefore, to reject the amendment offered by the Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, will the Senator from Texas yield, the chairman of the Armed Services Committee? Mr. TOWER. I am delighted to yield

on the Senator's time.

Mr. MATSUNAGA. Yes. Is it not true that the administration supports a 14.3-percent across-the-board increase and, in fact, that the Department of Defense is opposed to the bill as reported from the committee?

Mr. TOWER. Well, the Senator is right in asserting that the administration supports another version of the pay bill. But it has not been my experience that the Senate of the United States always goes blindly along with the administra-tion, especially on defense matters, and this is one Senator who respects the experience that has been vested in the members of the Senate Armed Services Committee over the years in this area. The past experience we have had and our experience dictates to us that the bill proffered to the Senate by the Senators

from Iowa and Nebraska is the best bill to achieve the kind of result we seek and, therefore, I thoroughly and totally endorse it.

Mr. MATSUNAGA. I must say that the Department of Defense is primarily concerned about the low recruitment, and they are not—

Mr. TOWER. Well, the professional recruiters do not find anything in this bill that they feel will adversely impact

on their ability to recruit.

I suggest to the Senator from Hawaii that he talk to some of the men in uniform who are responsible for recruitment. Recruitment is running at very high levels now not just in quantitative but in qualitative terms, and the biggest problem that we have, and the one we must address ourselves to, if we are going to maintain any standard of combat readiness, is retention, and this bill addresses itself to that problem and we should not monkey around with it here on the Senate floor.

Mr. MATSUNAGA. I must say that I have no argument with the Senator about retention. I am in full support of the retention provisions of the bill. I might point out to the chairman of the Armed Services Committee that according to the Department of Defense, recent empirical evidence shows, and I am quating now.

The very strong effect of increases in firstterm pay on the supply of quality recruits to the Army and the value of the so-called pay elasticity has been estimated as high as 2.0 for new quality recruits to the Army, in a recent study conducted by the Center for Naval Analysis.

This means that for every 1 percent increase in military pay the recruit supply to the Army is increased by 2 percent.

We cannot in the face of these facts deny that giving comparability to the recruit is not going to increase quality recruits.

Mr. TOWER. Mr. President, will the Senator permit me to respond to that? Mr. MATSUNAGA. Yes.

Mr. TOWER. What the Senator just recited is based on Rand Corp. data which are outdated and which have never been validated. It is based largely on old naval data and does not necessarily apply to the other services and therefore, I do not believe that what the Senator is reciting is authoritative. I think we had better proceed on the best judgment of the professional military and the Armed Services Committee in this matter and get on to the passage of the Jepsen-Exon bill.

Mr. MATSUNAGA. If I may ask, Mr. President, if the members of the committee feel that they cannot depend upon the figures cited by the Center for Naval Analysis or the Rand Corp., on what do they base their analysis? What is it that they are depending upon in quoting the figures they have been quoting?

Mr. JEPSEN. We base our figures on the statements of fact presented by the recruiting chiefs, presented by the Chief of Staff of the Army, and presented by those people who have served our country in uniform for many, many years. I point out to you that in a letter to Congressman Nichols, the Non-Commissioned Officers Association of the United States of America, which represents over 300,000 active duty members, said this:

Frankly, the association has but minimal faith in the Department of Defense. Its record over the past 8 to 10 years proves beyond a doubt its concern has not been with the career enlisted force. We believe the same pattern will continue if Defense is allowed to make its own decision in targeting the October 1, 1981, proposed pay increase.

The Non-Commissioned Officers Association

The Non-Commissioned Officers Association has no choice but to place its faith with Congress to do the right thing.

We have received across-the-board support from all people, all forces in the military, in the uniform of this country.

That is where we have been getting our information, not from some birdhatching, outdated think tank sort of analysis that is made not on across-theboard data that has never been validated. We repeat that time and time again—it is nearly a hypothetical case. It is a strawman they have put up and they keep using it to point to their reasons for wanting to have the across-the-board pay increase and that is they want to allocate the thing. They have not done it before but lead you to believe they would do it new.

Mr. EXON addressed the Chair. The PRESIDING OFFICER. Who yields time?

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. Who yields time to the Senator from Nebras-ka?

Mr. EXON. Mr. President, if I could get recognized, I would like to ask the Chair how much time is remaining on each side.

The PRESIDING OFFICER. We will give you recognition and tell you that Senator Jepsen has 22 minutes and 54 seconds remaining and Senator Matsunaga has 10 minutes and 1 second remaining.

Mr. EXON. Does the Senator from Nebraska have any time remaining?

The PRESIDING OFFICER. The Senator has no time.

Mr. JEPSEN. The Senator from Nebraska has 22 minutes. We are on the same time.

The PRESIDING OFFICER. Correction. The Senator from Iowa and the Senator from Nebraska have 22 minutes and 54 seconds.

Mr. EXON. I yield myself 5 minutes. The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I will try and summarize, because I am hopeful that we can come to a vote on this in the near future.

First, I would like to quote from a prepared statement by Senator Carl Levin, a very distinguished member of the Armed Services Committee. In a moment, I will ask that this be entered into the Record on behalf of Senator Levin.

But I want to read two or three paragraphs that I think are particularly important, since, during debate on this, this morning, there has been a thread

running through the debate that somehow this measure that came out of the Armed Services Committee is against the All-Volunteer Force. I will quote now from Senator Levin's statement.

Mr. President, today the Senate will consider and vote on the Matsunaga/Hatfield amendment to the Uniformed Pay and Benefits Act of 1981, S. 1181 as well as on final passage of this bill.

As a member of the Committee on Armed Services, I want to take this opportunity to urge my colleagues to reject this amendment and pass S. 1181 itself.

This amendment has a laudable purpose. It seeks to increase the pay of the three lowest enlisted ranks in an effort to attract more recruits into the armed services.

However, it is an unnecessary amendment, since the committee has addressed this issue already in S. 1181, and has also focused its efforts at what now appears to be a more immediate manpower problem for the All-Volunteer Force—retention of experienced, senior enlisted personnel.

Continuing to quote from Senator Levin's statement:

I think my colleagues know me well enough to feel secure that, as a member of the Armed Services Committee, I would not be a party to any legislation which paves the way for a return to conscription until I was convinced that the All Volunteer Force was a failure and that a draft is needed to meet our national security requirements.

Certainly, those of us who have worked with Senator Levin know if there is a proponent of the All-Volunteer Force on the Armed Services Committee it is Senator Levin.

Mr. President, if I might return and attempt to answer some of the arguments that have been made against this

First, I would like to say that I think one of the shortcomings of the arguments that have been made against the bill and for the amendment is that those who have offered that amendment seem to be preoccupied with the basic pay problem, with basic pay as it affects E-1's, E-2's, and E-3's. They are so preoccupied with that they fail to take a look at the overall picture.

I would first state, as I said in my prepared remarks earlier today, that if we take an E-2, for example, the increase in his regular military compensation under the committee proposal will be 10.5 percent, well above the so-called comparability figure that we have heard so much about here on the floor this morning, which is 9.1 percent, according to the sponsors of this amendment.

Mr. President, I would just like to say, once again, that if we start to become so preoccupied with basic pay, then we ignore the other considerations that the manpower subcommittee has given in this measure. For example, if we are going to have a shortfall in recruits, as has been hinted at this morning, then those who propose this amendment seem to be saying: "But we do not want to recognize that the Armed Services Committee has proposed an increase in bonuses to meet that very problem from \$5,000 last year to \$7,500 this year."

I would say to my friend from Hawaii that we have recognized this need. Cer-

tainly we feel that after talking with people in the armed services—and the Senator questioned on what our figures were based—after looking at the CBO reports, after listening to the Chief of Staff of the Army and other experts, we who have studied this long and very hard feel that we have put together a measure that is fair. And if there are those who are still truly concerned that we have not taken into consideration the E-1's, E-2's, and E-3's, let us look at the record once again that I established earlier this morning and that I want to recite once again.

In so doing, I want to remind those who do not agree with me on this—and I am sure they are well-intentioned, that they have not looked at the broad picture. If you simply look at the basic pay figure, you might be right. But you are wrong because you have not looked at the broad picture.

Let me quote once again what I said this morning:

Altogether the person who enlists today in the military will receive a 26 percent increase in basic pay during the next 12 months. Mr. President, while we stand here and bicker over a 2 percent difference between entry pay in the committee bill and the entry pay in the pending amendment, the important—and always overlooked—fact is that a recruit joining the service today can expect a 26 percent increase in basic pay over the next 12 months. The increases in Regular Military Compensation would be approximately the same. No matter how you calculate comparability or inflation, I suggest that that is a very large increase.

I think it is justified but I think it is adequate.

Mr. President, I reserve the remainder of the time on this side.

The PRESIDING OFFICER. Who yields time?

Mr. JEPSEN addressed the Chair. The PRESIDING OFFICER. The

Senator from Iowa.

Mr. JEPSEN Mr. President I would

Mr. JEPSEN. Mr. President, I would like to inquire of the amount of time remaining.

The PRESIDING OFFICER. Senator Jepsen and Senator Exon have 16 minutes and 7 seconds remaining; Senator Marsunaga has 10 minutes and 1 second remaining.

Mr. JEPSEN. Mr. President, I would say, in what I hope will be my closing remarks, that I share the sincere and genuine concern that the Senator from Hawaii, Senator Matsunaga, has for the level of defense that we must attain and maintain to keep the peace. In fact, all of the sophisticated weapons systems would be for naught if we did not have the individual soldiers, sailors, and pilots to man them and the fact that we must have as a lifeblood in developing and maintaining the All-Volunteer Force a steady flow of recruits.

As chairman of the Manpower and Personnel Subcommittee, I can assure the Senator from Hawaii that we have been, are, and will be most concerned and very vigilant by way of requesting monthly reports, by way of following this very, very closely and at any point in time that we see or feel that there is a move in a direction that would endanger that very necessary and continual flow

of new recruits, we would put top priority and the full force of staff research and whatever else necessary to rectify and correct that situation.

The facts are that, at the present time, with about 105 percent of the recruiting goal quota, with a very marked jump in quality, with everything pointing toward the momentum for that continuing, and that is by way of advice, counsel, reports from all branches of service, we feel that we are on target now with our built-in 9.1 comparability pay increase that exists in this Senate bill 1181.

I appreciate what the Senator is saying. I agree 100 percent with what he is saying. We have some disagreement at this given point in time as to what is sufficient to arrive at that goal, but I commend him for his diligence in pursuing and in verbalizing this. It is something which will remain in the record and be long remembered. It will serve a very important purpose.

I am ready to yield back the time remaining on our side, subject to agreement by the Senator from Nebraska. I wonder if the Senator from Oregon and the Senator from Hawaii are ready to yield back their remaining time.

The best way we express ourselves in this country is not by yelling but by voting.

Mr. EXON. Mr. President, I would generally agree with the statements which have been made by my colleague from Towa

At this time I know of no one on this side of the aisle who wishes to address the problem further.

I would merely pose the question to the Senator from Hawaii if he has any more statements from his side on this particular issue.

Mr. President, I reserve the remainder of our time.

Mr. HATFIELD addressed the Chair. The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. May I inquire how much time remains on our side?

The PRESIDING OFFICER. Ten minutes remain.

Mr. MATSUNAGA. Mr. President, I yield to the Senator from Oregon.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, once again I am sorry I was not able to be here during the opening comments. I was forced to preside over the markup of an appropriations measure.

I have been given an outline of some points which have been made by various speakers on this amendment. I would like to respond to some of those remarks.

First of all, I think we should understand clearly what this amendment does not do. In no way does it touch the carefully crafted bill, as it has been referred to, of the Armed Services Committee in reference to compression. I think we all recognize that as a problem. I want to emphasize that this does not in any way impinge upon that particular objective.

Second, it in no way inhibits the part of the committee bill that has addressed the career retention problem.

Third, in no way does it deemphasize the emphasis which has been placed on the noncommissioned officers and the way the committee has addressed that question.

I would like to merely say that if this bill is so precise and so carefully crafted, as has been claimed by the members of the committee, what is the committee going to do when we find that the comparability base is not 9.1 but 9.7? Having targeted only 7 and 8 percent for the enlistees there is going to be an even larger gap. It is going to lead to bigger problems for military recruitment.

I want to make one further observation about this matter because I do not think the track record of the committee has been very good in anticipating pay problems. I would only observe for the record that the committee had failed to recognize this problem and its October pay increase was initiated long ago from the floor by amendment process by two people who are not on the committee; namely Senator Armstrong and Senator Maysunaga, in which I joined.

This was the real origin of the pay increase. It did not come from the committee. The committee finally got on the pay increase bandwagon in order to release it as their initiative.

It was not the committee's initiative but it was a floor action. The committee has not had a good record of recognizing the need when it was already apparent. I only make that as a comment.

I think the committee is failing again to recognize the significance of the comparability base upon which they are crafting the rest of their program. I have the documentation of the 9.7 figure from the Department of Labor Statistics.

Mr. President, I ask unanimous consent to have printed in the Record a document dated September 9, 1981.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF LABOR, September 9, 1981.

Hon. Mark O. Hatfield, U.S. Senate, Washington, D.C.

DEAR SENATOR HATFIELD: In response to a September 8 telephone request from Mr. Rick Rolf of your staff to our Office of Wages and Industrial Relations, I am enclosing a copy of the June 26 release on white-collar salaries. The information is from the Bureau's annual survey of professional, administrative, technical, and clerical pay (the PATC survey) which is used to compare Federal white-collar salaries with those in private industry, as required by the Federal Pay Comparability Act of 1970.

The first page of the release indicates the average percentage increase in salaries between March 1980 and March 1981 for those occupations providing comparable data from both surveys. The combined average—9.7 percent—provides a general indication of how salaries increased for the survey jobs.

You may also be interested to know that the Bureau's Employment Cost Index (a broader measure of pay change in terms of industries and occupations) showed whitecollar salaries increasing 9.3 percent over the same 12-month period. (See enclosed release dated May 28.)

If I can be of further assistance, please let me know.

Sincerely yours,

JANET L. NORWOOD, Commissioner. particular, it has been determined that

the graduated pay increase for new per-

sonnel would not have any significant ad-

verse impact on recruiting. This conclu-

sion is fully supported by the Army, Navy,

of the fact that usually within 12 months

after enlistment the E-1 inductee has

risen to the E-3 pay level. This represents

an increase of over 18 percent in pay

Further, the Senate should be aware

and the Congressional Budget Office.

Mr. HATFIELD. I am absolutely appalled at the remark which I understand has been made on the floor that we cannot possibly achieve comparability. If that is the committee's lack of vision, then I think they ought to review their commitment, along with the other Members of this Congress, to the 1972 action of getting an all-volunteer service in which we committed ourselves to comparability.

I also say that those who claim that this is demagogic have certainly not carefully reviewed the intent of the two sponsors of this amendment, the historic record of support for pay increases. It is not demagogic. We are addressing dis-

crimination.

This discriminates against the enlistees at the E-1, E-2, and E-3 level. There is no way to create a smokescreen. It is discrimination.

The administration asked for 14.3 percent across the board. The committee adopted a targeted program rather than across the board and used a 9.1 base as

a comparability.

It is interesting how many people of the committee do favor the draft and have publicly expressed themselves. So I say that this is a back-door approach to the draft because of our failure to live up to the comparability compensation commitment that we made in 1972 under the all-volunteer services.

I feel very strongly, Mr. President, having been a member of the armed services for 3 years in World War II, that we have had too many years when we asked the armed services to subsidize their own service. And I also recall, and I do not think they have changed that much, the distinctions between enlisted and com-

missioned people.

I was a commissioned officer in the U.S. Navy and I know the pay that an ensign received and I also knew the pay that an apprentice seaman received. It is a caste system to begin with. I am not saying the military can be democratic, but I am saying that we are dealing with a caste system, and a caste system is more than just a matter of rank, title, and privilege that exists between commissioned and noncommissioned people in the military. We are adding further discrimination to an inherently discriminatory system by our failure to recognize the comparability requirement for the E-1. E-2. and E-3.

A slight adjustment is what we are

pleading for.

I cannot understand this overreaction from the committee as if, somehow, there is some major tampering going on here with their carefully crafted product, when we are only suggesting a 2 percent—2 percent, Mr. President—change in here in order to reach comparability for the E-1, E-2, and E-3.

Mr. President, I reserve the remainder of my time.

Mr. THURMOND. Mr. President, I rise in opposition to the pending amendment which would increase the current pay of E-1 through E-3 personnel by 9.1 percent, as opposed to the committee recommendation of 7 percent for E-1's, 8 percent for E-2's, and 9 percent for E-3's.

Mr. President, this bill has been care-

from the date of enlistment. Thus, within 1 year, if the servicemember has proven a satisfactory person, he or she will be getting the 9-percent raise that is proposed in this amendment. Another point

getting the 9-percent raise that is proposed in this amendment. Another point worthy of special attention by the Senate is the provision in S. 1181 which increases the maximum enlistment bonus from \$5,000 to \$7,000 for those qualified to serve in a critical skill. This increased bonus will enable the services to fill openings in a large number of critical skills. These numerous slots include infantry

assignments which are not easily filled. Mr. President, I urge that the Senate stand with the committee on this amend-

ment.

(By request of Mr. Exon the following statement was ordered to be printed in the RECORD.)

 Mr. LEVIN. Mr. President, today the Senate will consider and vote on the Matsunaga-Hatfield amendment to the Uniformed Pay and Benefits Act of 1981, S. 1181, as well as on final passage of this bill.

As a member of the Committee on Armed Services, I want to take this opportunity to urge my colleagues to reject this amendment and pass S. 1181 itself.

This amendment has a laudable purpose. It seeks to increase the pay of the three lowest enlisted ranks in an effort to attract more recruits into the armed services.

However, it is an unnecessary amendment, since the committee has addressed this issue already in S. 1181, and has also focused its efforts at what now appears to be a more immediate manpower problem for the All-Volunteer Force—retention of experienced, senior enlisted personnel.

Contrary to statements by supporters of the amendment, the most pressing problem facing the All-Volunteer Army of today is retention of these individuals—the senior sergeants and technical specialists whose skills, experience, and leadership are so important to our overall military capabilities.

Although the amendment's supporters cite testimony from the Defense Department to support their claim, it was only recently that the Army Chief of Staff, Gen. Edward C. Meyer, stated that retention, not recruiting, is his most serious manpower dilemma.

Our committee's bill directly attacks this problem by targeting significant pay raises for the senior enlisted ranks.

In so doing, the committee also has answered the contention of supporters of the amendment that this bill is an assault on the All-Volunteer Force and a blueprint for a return to the peacetime draft.

I think my colleagues know me well

enough to feel secure that, as a member of the Armed Services Committee, I would not be a party to any legislation which paves the way for a return to conscription until I was convinced that the All-Volunteer Force was a failure and that a draft is needed to meet our national security requirements.

I do not believe the All-Volunteer Force is a failure at this point. The evidence remains mixed. Nor do I believe that we only can meet our present national security requirements by returning to con-

scription.

On the contrary, I think that, at this point in time, the prospects for the viability of the All-Volunteer Force are enhanced rather than diminished by the pay, bonuses, and benefits increases embodied in S. 1181.

The retention increases projected from the targeted pay raises to senior enlisted personnel actually will contribute to the strength of the All-Volunteer Force by reducing the number of recruits required.

In addition, S. 1181 also contributes to improved recruiting by expanding enlistment bonuses from \$5,000 to \$7,500 and by initiating a 1-year test of a \$3,000 bonus for individuals enlisting for 3 years in critical skills.

The Matsunaga-Hatfield amendment, on the other hand, does not contribute significantly to recruitment, according to the Defense Department's own figures. DOD estimates that only 1,800 more recruits will enlist in fiscal 1982 if it passes.

The amendment's sponsors point to the importance of their small additional pay raises for the first three ranks to attracting new personnel to the Armed Forces. DOD's own position is that it is pay during a full first-term enlistment, not just when a recruit holds the ranks between E-1 and E-3, which is more important.

The committee's proposal raises E-4 pay between 10 to 14 percent, and most recruits achieve the E-4 rank in the Army in less than 2 years. They become E-3's by the end of the first year and are only E-1's for 4 to 6 months and E-2's for 6 to 8 months. The minuscule percentage raises that the amendment proposes—0.1 to 2.1 percent for these short periods of time—will have little impact on recruiting.

Lastly, the sponsors of this amendment contend that their amendment would maintain comparability between military and civilian wages for these lowest ranks in fiscal year 1982. They argue that the principle of comparability in wages which supports the All-Volunteer Force must not be weakened symbolically by any departures in the pay tables.

Yet this amendment does not restore the comparability to which the Defense Department refers when it talks about recruiting thousands more individuals in fiscal 1982. That comparability figure is 14.3 percent, because it includes a 5.3-percent wage increase to bridge the gap between the pay bill we passed last year and the 9.1-percent raise needed just for fiscal 1982.

Only restoring wages to 9.1 percent in the lowest ranks still is far short of comparability in an across-the-board sense, and thus, the amendment accomplishes little toward that standard. The committee, by targeting its pay raises between 7 and 22 percent has maintained an average comparability figure of 14.3 percent in its wage increases.

Mr. President, this bill is a good reconciliation between addressing concerns about recruiting and addressing concerns about retention. It is a constructive package of pay raises, increased special pays, expanded bonuses and additional benefits all designed to address the major manpower problems facing our armed services.

I urge my colleagues to support it and to reject the Matsunaga-Hatfield amendment.

The PRESIDING OFFICER. Who yields time?

Mr. MATSUNAGA. Mr. President, I had intended to ask for a record vote, but in view of assurance on the part of the chairman of the subcommittee in private conference that he will make every effort in conference to arrive at what we have tried to do here, I shall not ask for a record vote.

Also, in view of the fact that so many have been unable to be here today, who have had to leave for other commitments, if the floor manager, the chairman of the subcommittee, can give me some assurance that every effort will be made to strike some compromise in conference, which would bring the final bill somewhat closer to what we are advocating, then I shall not ask for a record vote.

Mr. EXON. Mr. President, I have been trying to move to a vote on this. There are some Senators who would like to vote. I just cannot agree to leave in the Record the statement that the Senator from Hawaii has just made with regard to an understanding with the chairman of the Manpower Subcommittee.

I know of no arrangement or agreement that we are going to take up this consideration in conference with the House. I object to having that go in. If it does and if that is the understanding, then I shall ask for a rollcall vote.

Mr. President, I think, since the matter has been raised by the Senator from Hawaii, I should like to ask my colleague and friend from Iowa whether or not there have been arrangements made as just outlined by the Senator from Hawaii?

Mr. MATSUNAGA. Mr. President, will the Senator take his own time on this? Mr. JEPSEN. I shall take my own time on this.

Mr. President, I think there has been some misunderstanding. In the discussions going on, four or five persons were here on the floor.

I tried to make my position explicit and very, very clear when, in my remarks, I indicated that I sympathize with Senator Matsunaga and what he is attempting to do. I am also very concerned about the continual failure to maintain the level of manpower we need in our voluntary force. But I also pointed out that at this particular point in time, the evidence and the facts are that we do not have the problems.

All the indications from the various branches of the service indicate that; we have memos saying they do not anticipate any problems there. Also, we disagree, feeling that we have a 9.1-percent comparability base when we consider everything by way of pay and benefits, which the Defense Department has always done.

So, being most sympathetic, being very complimentary—again, I extend congratulations to the Senator from Hawaii for his efforts—with that, that is my position. To go to a conference and compromise on something that we do not have anything to compromise on at this time, other than to assure the Senator that we, too, share his concern for the necessity for continued appropriate pay, we do not see it as a problem at this particular time.

With that understanding, we can now either have a rollcall vote or a voice vote.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. JEPSEN. I yield.

Mr. MATSUNAGA. The point I was trying to make is that what we had discussed was that, in the view of the chairman of the subcommittee, recruitment is as important as retention, just as the offerors of the amendment have conceded from the very beginning that retention is as important as recruitment; that we need a balanced bill; and that, in conference, the chairman of the subcommittee will take into consideration the importance of recruitment, just as he will take to the conference the thought of the importance of retention.

With that in mind, Mr. President, that the chairman will give equal consideration to recruitment as to retention and, with this thought in mind, going to conference and carefully—

The PRESIDING OFFICER. The Senator from Hawaii must be informed that

his time has expired.

Mr. JEPSEN. Mr. President, I yield the Senator what time he needs, hoping that we can wind this up.

Mr. MATSUNAGA. It is this assurance that I was hoping to put into the record.

Mr. JEPSEN. Mr. President, let me assure the Senator that we are equally concerned with all aspects of manpower—recruitment, retention, morale, esprit de corps.

Mr. MATSUNAGA. Unless the Senator from Oregon is—if the Senator will continue to yield.

Mr. JEPSEN. Mr. President, I shall not yield. We have gone over our time. I have yielded some of our time to the Senator. Unless the Senator from Oregon specifically requests a specific amount of time—

Mr. MATSUNAGA. Will the Senator from Iowa yield to me for a question that I shall put to the Senator from Oregon? That is, unless the Senator from Oregon or some other Senator insists on a record vote, I shall not at this time.

Mr. JEPSEN. Mr. President, how much time is remaining?

The PRESIDING OFFICER. The Senator from Iowa has 7 minutes and 24 seconds remaining. The Senator from Iowa has the floor.

Mr. HATFIELD. Mr. President, will the Senator yield to me?

Mr. JEPSEN. Yes, Mr. President. I

Mr. HATFIELD. There has been so much discussion, Mr. President, I was

not able to hear what the Senator from Hawaii was saying. Is the Senator willing to pull the amendment down on the basis of that assurance.

Mr. MATSUNAGA. That I shall not ask for a record vote. If the Senator will agree with me, I can even go to the extent of pulling the amendment down.

Mr. HATFIELD. With the assurances

Mr. HATFIELD. With the assurances given by the chairman of the subcommittee that this matter will be discussed in conference and also that he will raise the question of the new issue of a 9.7 comparability rate as indicated by the Bureau of Labor Statistics. I urge the Senator that that matter be incorporated.

Mr. JEPSEN. I assure the Senator from Oregon that all matters will be discussed in conference, including any new information

Mr. HATFIELD. With that, Mr. President, I urge my colleague at this time to withdraw and I shall withdraw our amendment.

Mr. MATSUNAGA addressed the

The PRESIDING OFFICER. The Senator from Iowa controls the time.

Mr. MATSUNAGA. If the Senator from Iowa will yield.

Mr. JEPSEN. I yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I shall agree to pulling the amendment down, but only with the understanding that no commitment has been made and no indication given that we are going into conference with the House agreeing to compromise on this basic issue.

I have been listening very carefully to the discussion, and I am fearful that the proponents of this amendment are fearful that they cannot win, but they want to get it into the record so that, when we go to conference, they can say, "Yes, but we agreed to consider this."

Mr. President, we shall agree to consider everything in conference, of course, but there is no implied concept that we shall cave in on this issue. If that is the understanding, Mr. President, I shall not agree to pull down the amendment.

Mr. HATFIELD. Mr. President, if the

Mr. HATFIELD. Mr. President, if the Senator will yield, I do not thing he has to give his agreement to pull the amendment down in the first place. We shall withdraw the amendment on our own without his support. But I do feel that anyone who has been here for any length of time recognizes that no one is committed in conference to an amendment or to the essence of an amendment that has been raised on the floor and then withdrawn.

I believe it may have served the purpose of bringing before the Senate some information that perhaps the committee did not have.

At this point, I suggest that we withdraw the amendment, with the assurances that the committee has not closed its mind to new information that it will be considered carefully in conference.

Mr. MATSUNAGA. Mr. President, will the Senator from Nebraska yield?

Mr. JEPSEN. Mr. President, has there been a request to withdraw the amendment?

Mr. MATSUNAGA. Yes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. JEPSEN. Mr. President, I ask for the yeas and nays on passage of S. 1181.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered. Mr. DOMENICI. Mr. President, will

Mr. DOMENICI. Mr. President, whithe Senator yield?

Mr. JEPSEN. I yield.

Mr. President, the Uniformed Services Pay and Benefits Act of 1981, legislation critical to the personnel problems faced by every branch of the armed services, needs to be enacted as soon as possible.

Critics of the all-volunteer military have called for a return to the draft to solve our critical manpower shortage. But the problems they point to, though varied in scope, can be summed up in these statements: Our armed services need to attract quality recruits, especially in areas of high technology, to serve their country and protect our national security. Furthermore, once trained. these highly valuable volunteers must be provided with incentives that encourage them to remain in the military. Too often we have lost quality personnel simply for the reason that better pay awaited them in the private sector.

S. 1811 aims to correct some of these current inequities with incentives that appeal to every member of our Armed Forces, especially those who have been trained in our newest technology. It aims to work from within, to encourage a longer term of service for volunteers, and from without, with more attractive enlistment terms for outstanding re-

cruits.

Some of these provisions include permission for nuclear qualified officers to execute new agreements to take advantage of higher continuation bonuses, increasing aviation career incentive pay for long-term officers, and suspension of 1 year of the linkage between military pay and the pay of Federal civil service employees.

Besides targeted pay raises aimed at those military groups with the most difficulty meeting manpower requirements, there will also be additional benefits for those persons with critical and hazardous duties, and compensation for those in the military who are required to resettle several times in the course of their duties. Allowances will be increased for dependents' travel and moving expenses, storage expenses, temporary lodging, and reimbursement for travel to family in the event of personal emergencies.

There is a twofold method in this legislation to attract more quality volunteers—those more likely to remain for a career of dedicated service in our Nation's defense. First, by improving the selection of candidates through the selective service registration and improving the administration of military justice, we will be better able to take care of those who faithfully serve our country and continue recruiting the same kind of volunteers that now distinguish themselves as top officers in the Armed Forces.

Second, and more important, are the incentives that will attract these quality recruits and keep our armed services the best and highest trained in the world. These include an increase in ROTC scholarships, and an increase in the maximum enlistment bonus for recruits, with some of the payment to be made on a periodic installment. This bill would also allow the Defense Department to collect high school directory information to determine the fitness of volunteers for the Armed Forces or special programs of the Armed Forces.

In short, Mr. President, this is a bill whose time has come. No longer can we stand on our past history of simply taking what we want. Today's Armed Forces are highly trained, quality personnel, and the cost of training replacements in our complex national defense is prohibitively high. Encouraging those already in the Armed Forces with incentives, salary increases, and allowances, and attracting a higher quality of volunteer to serve in the Armed Forces with enlistment bonuses and ROTC scholarships, is indeed a small price to pay for our national security. Though it does increase our defense spending, it is money well spent when the alternative is higher defense costs of constantly replacing and training new personnel.

• Mr. MITCHELL, Mr. President, I rise in strong support of S. 1181, the uniformed services pay and benefits bill.

Everyone who has discussed the problem of morale with members of our Armed Forces is aware of the tremendous problems which result from inadequate pay and substandard benefit packages.

We must reverse the present trends. Our military simply cannot withstand the present situation in which a substantial portion of our junior enlisted personnel earn an amount no more than the minimum wage, and many military families may be eligible for welfare assistance.

If we do not address our manpower difficulties, we run the risk that the men and women we have trained—at great expense—will leave. Who then will operate and maintain the sophisticated hardware that we continue to purchase?

While it remains necessary for our military services to possess high technology, state-of-the-art weapons systems, we cannot and must not continue to ignore the personal financial needs of the men and women who will operate these systems.

If our ships, aircraft, and Army vehicles are to remain "mission-ready," we will have to pay a decent wage to the mechanics charged with maintaining them. We cannot expect these technicians to remain in the service when they and their families may receive half again as much, or twice as much, outside the military.

S. 1181 goes a substantial distance toward correcting the pay and benefits difficiencies which presently exist. The bill also provides special incentive pay for those people who possess special talents and who now are being lured away from military service by private sector employment offers. This bill will also provide an inducement for the lower grade volunteers to join the Armed Forces and to remain after they have completed their initial tours of duty. Such an inducement is absolutely essential if the All-Volunteer Force concept is going to work. I believe that the AVF should be given such a chance.

Thank you, Mr. President.

• Mr. DENTON. Mr. President, I rise today in support of S. 1181, the Uniformed Services Pay and Benefits Act of 1981, as reported by the Armed Services Committee. I would also at this time like to commend Senator Jepsen, chairman of the Subcommittee on Manpower and Personnel, and Senator Exon, ranking minority member of that subcommittee for their tireless efforts in producing a comprehensive pay and benefits package, which directly addresses the demonstrated needs of our Nation's military personnel. As a member of the Manpower Subcommittee, I can attest to the responsible, conscientious, bipartisan deliberation that undergirds this legislation.

The pay and benefits package embodied in S. 1181, taken as a whole, addresses itself to the major, fundamental needs of the All-Volunteer Force. This legislation does not in any way neglect or shortchange any segment of military manpower. It does, however, give increased emphasis to a group that has been shortchanged in the past: career enlisted and middle grade officer personnel. While quality recruitment has in the past been, quite properly, the major thrust of All-Volunteer Force policy, we must recognize that retention of a career force, adequate in both numbers and skill levels, is paramount to national security.

The NCO corps and middle officer ranks are the keystone of unit level leadership and training. These individuals have made a career commitment, and it is the responsibility of this body to insure that this commitment is recognized. Any continued depletion of these ranks attributable to a lack of recognition for the service they perform is unconscionable.

It is also important to reiterate that S. 1181 does not neglect the adequate compensation of the junior enlisted ranks. While the percentage pay increase for these ranks is considerably lower than those in the career ratings, junior enlisted personnel will also benefit from the 14.3-percent increase in BAQshould they live off base—and a similar increase in BAS. Moreover, the issue of recruitment has been addressed by an increase in the enlistment bonus ceiling from \$5,000 to \$7,500. Individuals receiving this bonus will in their first year of service realize greater compensation than an E-5 with over 4 years of service. Along these same lines, it should be noted that an individual who enters the military and successfully completes basic and advanced individual training can expect promotion to E-3 within the first year, thus realizing a 25-percent increase in base pay.

Mr. President, if we have earned any-

thing in the past 9 months, it is the fact that the pie has finite limits. It is my firm belief that the Armed Services Committee has come to terms with this truth and reported a bill that is fiscally responsible, which at the same time successfully addresses the pressing needs of our Nation's military. It also puts renewed emphasis on the sound principle of increased compensation based on levels of achievement. This legislation does not send a "signal," it sends substance. The time for vacillation has passed. I urge my colleagues to join with me in voting for S. 1181 as reported by the Armed Services Committee.

• Mr. PRYOR. Mr. President, I rise in support of those provisions in the Uniformed Services and Benefits Act of 1981 dealing with special pay for unusually hazardous duty or duty performed under unusually severe working

conditions.

It is encouraging to see that the Committee on Armed Services in the Senate has added additional personnel categories eligible for special pay to those already authorized by title 37 of the United States Code. These cover personnel whose duties have been determined to be not only hazardous but also involving personal sacrifice and danger from such threats as toxic, lethal, or carcinogenic substances. Specifically, people included by the committee are those serving on aircraft or missiles with highly toxic fuels or propellants, flight deck personnel on air-capable ships other than aircraft carriers, and those exposed to highly toxic pesticides or viruses and bacteria in laboratories.

In addition, the committee recommends that the rate of hazardous duty incentive pay be increased by 50 percent for enlisted personnel, from \$55 per

month to \$83 per month.

The House Committee on Armed Services, in reporting its Armed Forces Pay Act of 1981, included a similar, although more general, provision allowing Secretaries of the various services to pay special pay to those determined to per-form unusually hazardous duties or duties performed under unusually severe working conditions. The House Committee provided that rates of pay would be the same as now authorized for other hazardous duty specifically identified in

Mr. President, legislation of this nature is necessary because it recognizes in substantial and material terms the extensive personal sacrifice made by uniformed service members whose daily duties place them in danger. In January of this year, I introduced legislation identical to the House-passed bill. My specific concern at that time was to compensate those who perform unsually hazardous duties on Titan II missiles. It implemented recommendations made in safety reports following a tragic explosion of a Titan II missile silo in Damascus, Ark.

In those reports, we found that safety is a major factor in the low reenlistment rate for the Titan career field. Of the 51 authorized positions in maintenance at the Little Rock Air Force Base, only 38 people were assigned to duty at the beginning of this year. And of these 38, people were decertified and ineligible for duty, leaving only 31 of the 51 positions active. In addition, only 4 of the 38 were serving in their initial tours of duty in the Air Force. Certainly experi-ence in this crucial field has been lacking.

In light of this situation, and of others involved in hazardous duty, it seems necessary that we provide incentives and encouragement for those we need on the job. The ultimate beneficiary, of course, is not only the armed service person and his family and dependents, but also the resident who lives near an air base or a

missile silo.

Mr. CHAFEE. Mr. President, as a cosponsor of S. 1181, I wholeheartedly support this military pay raise bill because it is designed to substantially improve the retention of high-quality officers and NCO's with the critical skills required for a strong national defense. Yet, it does so in a cost-effective manner by targeting those military grades where the retention problem is most severe.

Furthermore, it will ease recruitment through more attractive long-term career pay and by reducing the need for new recruits through improved retention.

In my view, this legislation offers solid solutions to our country's most pressing armed services manpower problems and I urge its passage.

Mr. PELL. Mr. President, in connection with the pending military pay raise bill, I would ask my colleagues to consider the serious personnel problems which are faced by the Coast Guard.

The Coast Guard, as the world's sixth largest ocean-going force, is a vital part of our Armed Forces, and is the Navy's right arm in times of war or national emergency. The Coast Guard has in place a large force of ships, aircraft, boats, and shore stations, which can be immediately and easily brought to bear in a military threat situation. In many ways, the Coast Guard is another kind of Rapid Deployment Force, a multimission organization with seagoing expertise and flexibility, ready to join the Navy at the command of the President or Secretary of Defense.

In my view, the military value of the Coast Guard has been greatly overlooked, and should receive greater emphasis by Congress.

Maintaining the expertise of the Coast Guard is a constant problem, as it is for the other services. And in the case of the Coast Guard, maintaining quality performance is especially difficult because of the many new tasks we in the Congress have haphazardly assigned to it-tasks that today are stretching the Coast Guard's limited resources to the very limit. The superior quality of personnel traditionally has been the hallmark of the Coast Guard. Today, however, the personnel problems of the other armed services are the Coast Guard's problems as well. They face the same recruiting outlook in terms of competing for more sophisticated and demanding skills from a shrinking pool of available young men and women.

Every bit as severe for the Coast Guard

is the retention problem-reenlistments have declined by 50 percent since 1976. and half of all Coast Guard enlisted personnel today have fewer than 2 years of experience. The retention problem has been especially critical for trained petty officers, where the lack of pay comparability has allowed the private sector to drain off scores of key, mid-level personnel in the midst of what should be promising lifetime careers in the Coast Guard. Poor retention directly affects the Coast Guard's operational capabilities and is a great obstacle to maintaining the high degree of professionalism demanded of the young men and women serving in today's Coast Guard.

Coast Guard members and their families, living in essentially the same environment as the other military services, are concerned with exactly the same issues-adequate pay and compensation, educational opportunities, medical benefits, fair evaluation and promotion systems, dealing with the economic sting of frequent transfers and costly housing, retirement security, special services privileges, and the challenge and adventure of different duty assignments.

I would hope that the committee will, in the future, keep in mind the unique military capabilities—and problemsfaced by a very important member of our Armed Forces. At a time of greater national emphasis on military preparedness, it would be foolish indeed to overlook the importance of the Coast Guard as a full partner in our seapower strength.

The PRESIDING OFFICER. Without objection, the committee amendment, as amended, is agreed to.

Is all time yielded back?

Mr. JEPSEN. All time is yielded back. The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. Abp-NOR), the Senator from Colorado (Mr. ARMSTRONG), the Senator from Missouri (Mr. Danforth), the Senator from Utah (Mr. HATCH), the Senator from Maryland (Mr. Mathias), the Senator from Oklahoma (Mr. Nickles), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Idaho (Mr. Symms) are necessarily absent.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH), would vote "aye."

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. BENT-SEN), the Senator from New Jersey (Mr. BRADLEY), the Senator from Nevada (Mr. Cannon), the Senator from California (Mr. CRANSTON), the Senator from Illinois (Mr. DIXON), the Senator from Connecticut (Mr. Dopp), the Sena-

tor from Kentucky (Mr. Ford), the Senator from Massachusetts (Mr. Ken-NEDY), the Senator from Tennessee (Mr. SASSER), the Senator from New Jersey (Mr. Williams), and the Senator from Nebraska (Mr. Zorinsky), are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. Cannon), the Senator from Illinois (Mr. Dixon), the Senator from Connecticut (Mr. Dopp), the Senator from Tennessee (Mr. Sasser), and the Senator from New Jersey (Mr. WILLIAMS), would each vote "yea."

The PRESIDING OFFICER (Mr. WARNER). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 81, nays 0, as follows:

[Rollcall Vote No. 253 Leg.]

So the bill (S. 1181) was passed, as follows:

S. 1181

An act to amend titles 10 and 37. United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Uniformed Services Pay and Benefits Act of 1981".

INCREASE IN BASIC PAY AND ALLOWANCES

SEC. 2. (a) In this section "uniformed services" has the same meaning given to that term by section 101(3) of title 37, United States Code.

(b) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective. Effective with the first pay period beginning after September 30, 1981, the rates for each element of compensation specified in section 1009(a) of such title shall be as provided in subsection (c) of this section.

(c) (1) The monthly basic pay authorized members of the uniformed services, based on years of service computed under section 205 of title 37, United States Code, shall be as

"1 Payable to a member without dependents who, under section 403(b) or (c) of title 37. United States Code, is not entitled to receive a basic allowance for quarters.".

MONTHLY PAY OF CADETS AND MIDSHIPMEN

SEC. 3. Section 203(c) (1) of title 37, United States Code, is amended by striking out and inserting in lieu thereof "\$313.20" "\$448.80".

SPECIAL PAY FOR CERTAIN HAZARDOUS DUTY SEC. 4. (a) Section 301(a) of title 37, United States Code, is amended—

(1) by striking out "or" at the end of clause (9); and

(2) by striking out clause (10) and inserting in lieu thereof the following:

"(10) involving frequent and regular participation in flight operations on the deck of an aircraft carrier or on a ship other than an aircraft carrier from which aircraft are launched:

"(11) involving frequent and regular exposure to highly toxic pesticides or involving laboratory work which utilizes live dangerous viruses or bacteria; or

"(12) involving the servicing of aircraft or missiles with highly toxic fuels or propellants."

(b) The table contained in section 301(b) of such title is amended to read as follows:

"ENLISTED MEMBERS

	Years of service computed under section 205													
"Pay grade	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 22	Over 26	Over 3
E-3	\$131 131 100 88 83 83 83 83 83 83	\$131 131 106 94 88 83 83 83 83	\$131 131 106 94 88 83 83 83 83	\$131 131 106 100 100 88 83 83 83	\$131 131 113 106 100 94 83 83 83	\$131 131 119 113 106 100 83 83 83	\$131 131 131 119 113 100 83 83 83 83	\$131 131 131 119 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83 83	\$131 131 131 125 119 100 83 83 83

- Section 301(c) of such title is amended-
- (1) by striking out "or (10)," and inserting in lieu thereof "(10), (11), or (12),"; and (2) by striking out "\$55" and inserting in

lieu thereof "\$83"

(b) (1) The tables in clause (1) of section 301a(b) of such title are amended to read as follows:

"PHASE I

"Years of aviation service (in-

cluding flight training) as an officer:	Month!
2 or less Over 2 Over 3 Over 4	- 156 - 188 - 206
Over 6 "Phase II	_ 400
"Years of service as an officer as com puted under section 205:	
Over 18	340

Over 25 (2) The table in clause (2) 301a(b) of such title is amended to read as

"Years of aviation service as an officer:	Monthly rate
2 or less	\$125
Over 2	156
Over 3	188
Over 4	206
Over 6	400"

YEARS OF SERVICE COMPUTATION FOR SUBMARINE DUTY INCENTIVE PAY

SEC. 6. Paragraphs (3) and (4) of section 301c(a) of title 37, United States Code, are amended by inserting ", not including, in the case of an officer, periods as an enlisted member prior to initial appointment as an of-" after "title", each place it appears.

SPECIAL PAY FOR DIVING DUTY

SEC. 7. Section 304 of title 37, United States Code, is amended to read as follows:

"§ 304. Special pay: diving duty

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay is entitled to special pay, in the amount set forth in subsection (b) of this section, for periods during which such member—

(1) is assigned by orders to the duty of

diving;

"(2) is required to maintain proficiency as a diver by frequent and regular dives; and "(3) actually performs diving duty.

"(b) Special pay payable under subsection (a) of this section shall be paid at the rate of not more than \$200 a month, in the case of an officer, and at the rate of not more than \$300 a month, in the case of an enlisted member.

"(c) A member may be paid special pay under his section and incentive pay under section 301 of this title for the same period of service only if that member is assigned by orders to a hazardous duty described in section 301(a) of this title in addition to a duty described in subsection (a) of this section. However, if a member is paid special pay under this section, that member is not entitled to more than one payment of incentive pay under section 301 of this title.".

ENLISTMENT BONUSES

SEC. 8. (a) Section 308(a) of title 37,

SEC. 8. (a) Section 308(a) of title 37, United States Code, is amended— (1) by striking out "\$5,000" and inserting in lieu thereof "\$7,500"; and (2) by striking out the second sentence and inserting in lieu thereof the following: "The bonus shall be paid in periodic installments.

as determined by the appropriate Secretary, except that the first installment may not exceed \$4,000 and the remainder shall be paid in equal periodic installments which may not be paid less frequently than once every 3 months.'

(b) (1) Chapter 5 of title 37, United States Code, is amended by inserting after section 308e the following new section: "§ 308f. Special pay: bonus for enlistment in

the Army "(a) Under regulations prescribed by the

Secretary of the Army, a person—
"(1) who is a high school graduate or has been awarded high school education equivalency credentials;

"(2) whose score on the Armed Forces Qualification Test is at or above the fiftleth percentile; and

"(3) who enlists in the Army for a period of at least 3 years in a skill designated as critical,

may be paid a bonus in an amount prescribed by the Secretary of the Army, but not more than \$3.000. The bonus may be paid in a lump sum or in equal periodic install-ments, as determined by the Secretary of the Army.

"(b) (1) Under regulations prescribed by the Secretary of the Army, a person who voluntarily, or because of his misconduct, does not complete the term of enlistment for which a bonus was paid to him under this section or a person who is not technically qualified in the skill for which a bonus was paid to him under this section (other than a person who is not qualified because of injury, illness, or other impairment not the result of his own misconduct) shall refund to the United States that percentage of the bonus that the unexpired part of his enlist-

ment period for which the bonus was paid.
"(2) An obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt owed

to the United States.

"(3) A discharge in bankruptcy under title 11 that is entered less than 5 years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981.

"(c) No bonus may be paid under this section with respect to any enlistment in the Army made after September 30, 1982."

(2) The table of sections at the beginning such chapter is amended by inserting after the item relating to section 308e the following new item:

"308f. Special pay: bonus for enlistment in the Army.".

(c) The amendments made by this section shall apply to enlistments or reenlistments made after September 30, 1981.

ACTIVE-SERVICE AGREEMENTS FOR NUCLEAR QUALIFIED OFFICERS

SEC. 9. Notwithstanding subsections (a) and (b) of section 312 of title 37, United States Code, and under regulations prescribed by the Secretary of the Navy, the Secretary may permit an officer of the naval service who is performing obligated service as the result of an active service agreement executed un-der such section before January 1, 1981, to cancel that active-service agreement effective on the day before any anniversary of the day on which that agreement was executed and execute a new active-service agreement under such section for one period of not more than four years. Any such cancellation of an existing agreement and execution of a new agreement may be effective on the day before an anniversary date occurring on or after January 1, 1981.

TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 10. (a) (1) Section 404 of title 37, United States Code, is amended by striking out "Under regulations prescribed by the Secretaries concerned" in subsection (a) and inserting in lieu thereof "Except as provided in subsection (f) of this section and under regulations prescribed by the Secretaries concerned".

(2) Subsection (c) of such section is amended-

(A) by inserting "(1)" after "(c)";

(B) by redesignating clauses (1) and (2) as (A) and (B), respectively;

(C) by inserting "and as provided in paragraph (2)" before ", select his home"; and

(D) by adding at the end thereof the fol-

- lowing new paragraph:

 "(2) A member described in paragraph
 (1) of this subsection may select as his home
- "(A) any place within the United States;
 "(B) the place outside the United States from which such member was called or ordered to active duty to his first duty sta-

"(C) any other place.

However, if a member selects as his home a place described in clause (C) of the preced-ing sentence, the travel and transportation allowances authorized by subsection (a) of this section may not exceed the allowances which would be payable if the place selected as his home were in the United States (other than Hawaii or Alaska).".

(3) Subsection (f) of such section is amended to read as follows:

"(f)(1) The travel and transportation allowances authorized under this section may be paid or provided to a member upon his separation from the service or release from active duty for travel which is actually performed and only if-

"(A) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the Secretary concerned.

"(2) Clauses (A) and (B) of paragraph (1) of this subsection shall not apply to any member-

"(A) described in subsection (c)(1) of this section;

"(B) discharged under section 1173 of title 10; or

"(C) separated from the service or re-leased from active duty under unusual circumstances, as determined by the Secretary concerned.".

(b) (1) Subsection (a) of section 406 of title 37. United States Code, is amended—(A) by inserting "(1)" after "(a)";
(B) by inserting "paragraph (2) of this subsection and" before "subsection (1) of this section"; and

(C) by adding at the end thereof the following new paragraphs:

The transportation and allowances authorized under paragraph (1) of this sub-section may be paid or provided to a member upon his separation from the service or release from active duty only if-

"(A) the member, on the date of his sepa ration from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve: and

"(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the

Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subsection (g)(1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circumstances, as determined by the Secretary concerned.

(3) The allowances authorized under this subsection may be paid in advance."

(2) Subsection (b) of such section is

amended-

(A) by inserting "(1)" after "(b)";(B) by striking out "In" and inserting in lieu thereof "Except as provided in para-graph (2) of this subsection, in";

(C) by adding at the end of paragraph (1), as designated by clause (A) of this paragraph, the following new sentences: "Temporary storage in excess of 180 days may be authorized. In those cases of permanent change of station in which the Secretary concerned has authorized transportation under section 2634 of title 10 of one motor vehicle owned by the member or his dependents and for the personal use of the member or his dependents, the member is entitled to transportation of that motor vehicle to the point at which transportation auhorized under section 2634 of title 10 commences and from the point at which transportation authorized under such section terminates, or to reimbursement therefor.": and

(D) by adding at the end thereof the following new paragraph:

"(2)(A) The transportation and allowauthorized under paragraph this subsection may be paid or provided to a member upon his separation from the service or release from active duty only if—

"(1) the transportation (including the packing, crating, drayage, temporary storage, and unpacking) is commenced not later than 90 days after the date of such separation from the service or release from active

"(ii) the member, on the date of his sepaation from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(iii) the member's separation from the service or release from active duty is under honorable conditions, as determined by the

Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subction (g) (1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circumstances, as deter-

mined by the Secretary concerned.

"(B) If nontemporary storage is authorized under subsection (d) of this section for a member to whom subparagraph (A) of this paragraph applies, the 90-day period pro-vided for in clause (1) of such subparagraph shall not begin until such authorization for nontemporary storage expires."

(3) Subsection (g) of such section is

amended-

(A) by inserting "(1)" after "(g)"; (B) by redesignating clauses (1) and (2)

(A) and (B), respectively; and (C) by striking out all after the second

sentence and inserting in lieu thereof the following new paragraphs:

"(2) If a shipment is made to a home described in section 404(c)(2)(C) of this title or to a location other than the home selected by the member and the cost of such shipment is in excess of that which would have been incurred if the shipment had been made to a location in the United States (other than Hawaii or Alaska), the member

shall pay that excess cost.

"(3) If a member authorized to select a home under section 404(c) of this title accrues that right or any entitlement under this subsection but dies before he exercises it, that right or entitlement accrues to and may be exercised by his surviving dependents, or his baggage and household effects may be shipped to the home of the person legally entitled thereto if there are no surviving de-pendents. However, if a shipment is made under circumstances described in paragraph (2) of this subsection in which the member would have been required to pay the excess cost of such shipment, the surviving dependents or the person legally entitled to the baggage and household effects, as the case may be, shall pay that excess cost.

"(4) Subsection (h) of such section is amended by striking out "and for this or his dependent's personal use" in clause (2) and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents.".

(c) (1) Except as provided in paragraphs (2), (3), and (4) of this subsection, all amendments made by this section shall take effect on October 1, 1981, and shall apply to members who are separated from the service or released from active duty on or after October 1, 1981.

(2) The amendments made by subsection (b) (1) (C) which add a new paragraph (3) to section 406(a) of title 37, United States Code, shall take effect on the date of enactment of this Act.

(3) The amendments made by subsection (a) (2) and subsection (b) (3) of this section shall take effect on October 1, 1981, and shall apply to members who are retired, placed on the temporary disability retired list, discharged, or involuntarily released on or after October 1, 1981, except that such amendments shall not apply to any member who before October 1, 1981, had completed eighteen years of active service.

(4) The amendments made by subsection (b) (2) (C) of this section shall take effect on the date of enactment of this Act.

TEMPORARY LODGING EXPENSES

SEC. 11. (a) (1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

"§ 404a. Travel and transportation allowances: temporary lodging expenses

"(a) Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is ordered to make a change of permanent station from any duty station to a duty station in the United States (other than Hawaii or Alaska) may be paid or reimbursed for subsistence expenses actually incurred by the member and the member's dependents during a period not exceed-ing four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are located. However, a member may not be paid or reimbursed more than \$110 a day under this section."

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 404 the following new item:

"§ 404a. Travel and transportation allowances: temporary lodging expenses.".

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF EVACUATION ALLOWANCES

SEC. 12. Section 405(a) of title 37, United States Code, is amended by inserting after the second sentence the following new sen-"Such allowances may be paid in advance.".

ADVANCE PAYMENT OF DISLOCATION ALLOWANCE

SEC. 13. Section 407(a) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVER-SEAS

SEC. 14. Section 411b(a) of title 37, United States Code, is amended-

- (1) by inserting "(1)" after "(a)";
 (2) by inserting "who is ordered to a consecutive tour of duty at the same duty station or" after "District of Columbia" the first time it appears; and
- (3) by adding at the end thereof the follow new paragraph:
- "(2) If, because of military necessity, a member authorized travel and transportation allowances under this subsection is denied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.".

ENVIRONMENTAL AND EMERGENCY TRAVEL

SEC. 15. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

"§ 411c. Travel and transportation allowances: travel performed in con-nection with leave from certain stations in foreign countries

"(a) Under uniform regulations prescribed by the Secretaires concerned, a member of a uniformed service, while serving at a duty station outside the United States in an area specifically designated for purposes of this section by the Secretary concerned, and each dependent of such member authorized to reside at his duty station, may be paid for or provided transportation—

"(1) to another location outside the United States having different social, cli-matic, or environmental conditions than those at the duty station at which the member is serving; or

(2) to a location in the United States. "(b) The transportation authorized by this section is limited to transportation of the member and each dependent of the member for one roundtrip during any continuous two-year tour and two roundtrips

during any continuous three-year tour. "§ 411d. Travel and transportation allowances: transportation incident to certain emergencies for members stationed abroad

"(a) Under uniform regulations prescribed by the Secretaries concerned, transportation for a member of a uniformed service stationed outside the United States (other than Hawaii and Alaska) may be provided from the area of the member's duty station to the United States, Puerto Rico, the Virgin Islands, or the possessions of the United States, incident to a personal emergency of the member.

"(b) Transportation under this section may be authorized only upon a determina-tion that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Governmentprocured commercial air travel from the international airport nearest the location of the member at the time notification of the personal emergency is received or the international airport nearest the member's duty station-

"(1) to the international airport within United States (other than Hawaii and Alaska) closest to the international airport from which the member departed; or

"(2) to an airport in Alaska, Hawaii, Puerto Rico, the Virgin Islands, or the possessions of the United States, as determined by the Secretary concerned,

and return to either the international airport from which the member departed or to international airport nearest the duty station of the member.

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of-

"(1) the spouse of the member;

"(2) a child of the member (including a stepchild, an adopted child, or an illegitimate child whose alleged member-parent has been judicially decreed to be the parent of the child or judicially ordered to contribute to the child's support, or whose parentage has been admitted in writing by the member):

"(3) a parent of the member (including a stepparent, parent by adoption, or any person, including a former stepparent, who has stood in loco parentls to the member at any time for a continuous period of at least five years before the member became 21 years of age); or

"(4) a brother or sister of the member (including a stepbrother or stepsister, a half brother or half sister, or a brother or sister through adoption).

"§ 411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty

"(a) Under uniform regulations prescribed the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station or is assigned to a ship or unit operating away from its home port may be provided transportation in kind, reimbursement therefor, or a monetary allowance at the rate prescribed in such regulations, from his place of temporary duty or his ship or unit to his permanent duty station, the home port of the ship or unit, or any other location, and return (if applicable), incident to a personal emergency of the member.

"(b) Transportation under this section

may be authorized only upon a determination

that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Governmentprocured commercial air travel from the member's place of temporary duty or ship or unit to the member's permanent duty station or the home port of the ship or unit, and return (if applicable).

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of a dependent of

the member."

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

"411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allowances: transportation incident to certain emergencies for members stationed abroad.

"411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty.".

UNIFORM ALLOWANCES AND ADVANCE PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

SEC. 16. (a) Subsection (a) of section 415 of title 37, United States Code, is amended-(1) by striking out "or" at the end of paragraph (2):

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof ; and

(3) by adding at the end thereof the fol-

lowing new paragraph:

"(4) upon reporting for the first period of active duty required by section 2121(c) of title 10 as a member of the Armed Forces Health Professions Scholarship program."

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship program upon reporting for a period of active duty required by section 2121(c) of title 10."

MILITARY JUSTICE AMENDMENTS

SEC. 17. (a) Chapter 40 of title 10, United States Code, is amended-

(1) in section 701(a)-

(A) by striking out "and" at the end of clause (2);

(B) by striking out the period at the end of clause (3) and inserting in lieu thereof "; and"; and

(C) by adding after clause (3) the following new clause:

"(4) involuntary leave required to be taken under section 706 of this title.";

(2) by adding at the end thereof the following new sections:

"§ 706. Involuntary leave: appellate review of certain court-martial convictions

"(a) Under regulations prescribed by the Secretary concerned, a member of an armed force who has been sentenced by courtmartial may be required to take leave pending completion of action under subchapter IX of chapter 47 of this title if the sentence, as approved by the officer exercising general court-martial jurisdiction under section 864 or 865 of this title, includes an unsuspended dismissal or dishonorable or bad-conduct discharge. The member may be required to begin such involuntary leave at any time on or after the date on which such sentence is approved by the officer exercising general court-martial jurisdiction. Such leave may

be continued until any time on or before the date on which action is completed under sub-chapter IX of chapter 47 of this title.

"(b) Any period of leave required to be taken under this section shall be charged first against any accrued leave to the member's credit on the day before the day such involuntary leave begins, unless the mem-ber elects to be paid for such accrued leave under subsection (c). If a member does not elect to be paid for such accrued leave under subsection (c) or does not have sufficient accrued leave to his credit to cover the total period of involuntary leave, the leave not covered by accrued leave shall be charged as excess leave. If a member elects to be paid for accrued leave under subsection (c), the total period of involuntary leave shall be charged as excess leave.

"(c) (1) A member who is required to take leave under this section and who has ac-crued leave to his credit on the day before the day such leave begins may elect to be paid for such accrued leave on the basis of the basic pay to which he was entitled on the day before the day such involuntary leave begins or, if he does not so elect, is entitled to pay and allowances during any period of such accrued leave required to be

taken under this section.

"(2) Except as provided in paragraph (1) and in section 707 of this title, a member shall not accrue or receive any pay or allowances during any period of involuntary leave required to be taken under this section.

- "(d) No member required to take leave under this section shall become entitled to any right or benefit under section 2021 of title 38, United States Code, solely because of any employment during such leave.
- "(e) The provisions of section 974 of this title shall not apply to any member required to take involuntary leave under this section during any period of such involuntary leave. "\$ 707. Payment for excess leave: disapproval

of certain court-martial sentences "(a) A member-

"(1) who is required to take involuntary leave under section 706 of this title, any period of which is charged as excess leave; and

"(2) whose sentence by court-martial to dismissal or dishonorable or bad-conduct discharge is set aside or disapproved by a Court of Military Review under section 866 of this title or by the United States Court of Military Appeals under section 867 of this title, shall be paid, as provided in subsection (b), for the period of leave charged as excess leave, unless a rehearing or new trial is ordered and a dismissal or dishonorable or badconduct discharge is included in the result of the rehearing or new trial and such dismissal or discharge is later executed.

"(b) A member entitled to be paid under this section shall be deemed, for purposes of this section, to have accrued pay and allowances on each day of involuntary leave charged as excess leave (except days of accrued leave for which the member has been paid under section 706(c)(1) of this title and which have been charged as excess leave). Such pay and allowances shall be deemed to have accrued in the lower of the pay grade held by the member on the day before the date his court-martial sentence was approved by the convening authority, or any lower pay grade to which the member was reduced as a result of the court-martial sentence (including any reduction under section 858a of this title) if such reduction has not been set aside, disapproved, or otherwise vacated. Such a member shall be paid the amount of pay and allowances which he is deemed to have accrued, reduced by the total amount of his gross earnings from wages, salaries, tips, other personal service income, or unemployment or other public assistance benefits from any government agency during the period such member is deemed to have accrued pay and allowances

under this subsection. Except as provided in the following sentence, when a member's sentence by court-martial to dismissal or dishonorable or bad-conduct discharge has been ordered set aside or disapproved-

"(1) payment shall be made within two months from the date of such order if no rehearing or new trial has been ordered;

(2) payment shall be made within six months from the date of such order if a rehearing or new trial has been ordered but charges have not been referred to a rehearing or new trial within four months from the date of such order;

"(3) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is not included in the result of such rehearing or new trial, payment shall be made within two months of the announcement of the result of such re-

hearing or new trial; or

(4) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is included in the result of such rehearing or new trial, but such dismissal or discharge is not later executed, payment shall be made within two months of the order which set aside, disapproved, or otherwise vacated such dismissal or dis-

If a member is entitled to be paid under this section but fails to provide sufficient information in a timely manner regarding his gross earnings received from wages, salaries, tips, other personal service income, and unemployment or other public assistance benefits from any government agency when such information is requested under regulations prescribed under subsection (c) the periods of time established in the preceding sentence shall be extended until one month after the member provides such requested informa-

"(c) This section shall be administered under uniform regulations prescribed by the Secretaries concerned. Such regulations may provide for the method of determining a member's gross earnings during any period such member is deemed to have accrued pay and allowances, including a requirement that the member provide income tax returns and other documentation to verify the amount of his earnings."; and

(3) by adding in the table of sections at the beginning of such chapter after the item relating to section 705 the following new items:

"706. Involuntary leave: appellate review of certain court-martial convictions.

"707. Payment for excess leave: disapproval of certain court-martial sentences.

(b) Section 813 (article 13) of such title is amended-

(1) by striking out "Subject to section 857 of this title (article 57), no" and insert-ing in lieu thereof "No"; and (2) by striking out "or the result of trial".

(c) Section 832(b) (article 32(b)) of such title is amended by striking out the second sentence and inserting in lieu thereof "The accused has the right to be represented at that investigation as provided in section 838 of this title (article 38) and in regulations prescribed under that section.'

(d) Section 838(b) (article 38(b)) of such

title is amended to read as follows "(b) The accused has the right to be represented in his defense before a general or special court-martial or at an investigation under section 832 of this title (article 32) as follows:

(1) The accused may be represented by

civilian counsel if provided by him.

"(2) Subject to paragraphs (3) through
(6), the accused may be represented by—

"(A) military counsel detailed under sec-

tion 827 of this title (article 27); or

"(B) military counsel of his own selection if that military counsel is reasonably avail-

"(3) When the accused is represented by civilian counsel, military counsel detailed or selected under paragraph (2) shall act as associate counsel unless excused at the request of the accused.

"(4) When the accused is represented by military counsel of his own selection under paragraph (2) (B), any military counsel de-tailed under paragraph (2) (A) shall, subject

to paragraph (5), be excused.

"(5) An accused is not entitled to be represented in his defense by more than one military counsel. However, a convening authority may, in his sole discretion—

(A) detail additional military counsel as

assistant defense counsel; and

'(B) approve a request from the accused that military counsel detailed under paragraph (2) (A) act as associate defense counsel when the accused is represented by mili-

tary counsel of his own selection.

(6) The Secretary concerned may, by regulations, define 'reasonably available' and may, under such regulations, establish procedures for determining whether military counsel selected by an accused under paragraph (2) (B) is reasonably available. Such regulations shall establish uniform policies to the fullest extent practicable, recognizing the differences in the circumstances and needs of the armed forces and shall be reported to the Committees on Armed Services of both Houses of the Congress.'

(e) Subsection (c) of section 867 (article 67(c)) of such title is amended to read as

follows:

"(c) The accused may petition the Court of Military Appeals for review of a decision of a Court of Military Review within 60 days from the earlier of-

"(1) the date on which the accused is notified of such decision of a Court of Mili-

tary Review; or

(2) the date on which a copy of such decision of a Court of Military Review, after being served on appellate counsel of record for the accused (if any), is deposited in the United States mails for delivery by first class certified mail to the accused at an address provided by the accused or, if no such address has been provided by the accused, at the latest address listed for the accused in the accused's official service record.

The Court of Military Appeals shall act upon such a petition promptly in accordance with

the rules of the court."

(f) Section 869 (article 69) of such title is amended by adding at the end thereof the following sentence: "When such a case is considered upon application of the accused, the application must be filed in the Office of the Judge Advocate General by the accused-

- "(1) on or before October 1, 1983; or
 "(2) within two years after the date the
 sentence is approved by the convening authority or, in a special court-martial which requires action under section 865(b) of this title (article 65(b)), the officer exercising general court-martial jurisdiction, whichever is later, unless the accused estab-lishes good cause for failure to file within that time.".
- (g) (1) The amendments made by this section shall become effective 60 days after the date of enactment of this Act.
- (2) (A) The amendments made by subsection (a) shall apply to members whose sentences by court-martial are approved by the officer exercising general court-martial jurisdiction under section 854 or 865 (article 64 or 65) of title 10, United States Code, on or after the effective date of this section.

(B) The amendments made by subsection
(b) shall apply to all persons held as the result of a court-martial sentence announced on or after the effective date of this section.

(C) The amendments made by subsection (c) shall apply to investigations under sec tion 832 (article 32) of title 10, United States Code, which commence on or after the effective date of this section.

(D) The amendments made by subsection (d) shall apply to trials by courts-martial in which all charges are referred to trial on or after the effective date of this section.

(E) The amendments made by subsection (e) shall apply to any accused with respect to a Court of Military Review decision which is dated on or after the effective date of this section.

(F) The amendments made by subsection (f) shall apply to applications received in the Office of the Judge Advocate General on or after the effective date of this section.

MILITARY RECRUITING INFORMATION

SEC. 18. (a) The Congress finds and declares that in order for the Congress to carry out effectively its constitutional authority to raise and support armies, it is essential—

 that the Secretary of Defense obtain and compile directory information pertaining to students enrolled in secondary schools throughout the United States; and

(2) that such directory information be used only for military recruiting purposes and be retained in the case of each person with respect to whom such information is obtained and compiled for a limited period of time.

(b) Section 503 of title 10, United States Code, relating to enlistments, is amended—

(1) by inserting "(a)" before "The Secretary"; and

(2) by adding at the end thereof the following new subsection:

"(b) (1) The Secretary of Defense is authorized to collect and compile directory information pertaining to each student who is seventeen years of age or older, or who is in the eleventh grade (or its equivalent) or higher regardless of age, and who is enrolled in a secondary school in the United States, its territories, possessions, or the Commonwealth of Puerto Rico.

"(2) Directory information collected and compiled by the Secretary of Defense under this subsection may be made available to the armed forces for military recruiting purposes

only.

"(3) Directory information pertaining to any person may not be maintained for more than three years after the date the information pertaining to such person is first collected and compiled by the Secretary of Defense under this subsection.

"(4) Directory information collected and compiled under this subsection shall be confidential and no person who has had access to such information may disclose such information except for the purposes described

in paragraph (2).

"(5) The Secretary of Defense shall prescribe regulations necessary to carry out the provisions of this subsection and may authorize each Secretary concerned to issue further implementing regulations necessary to administer the program established under this subsection. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress. Any regulations issued by the Secretaries concerned shall be as uniform as practicable.

"(6) In this subsection, 'directory informa-

"(6) In this subsection, 'directory information' means, with respect to a student, the student's name, address, telephone listing, date and place of birth, level of education, degrees received, academic grades and class standing, and the most recent previous educational agency or institution attended by

the student.".

(c) (1) The heading of section 503 of such title is amended to read as follows:

"§ 503. Enlistments: recruiting campaigns; compilation of directory information"

(2) The item in the table of sections at the beginning of chapter 31 of such title relating to section 503 is amended to read as follows:

"503. Enlistments: recruiting campaigns; compilation of directory information.".

(d) (1) Chapter 31 of title 10, United States Code, relating to enlistments, is amended by adding at the end thereof the following new section:

"§ 520. Criminal history information for military recruiting purposes

"(a) Each State and each unit of general local government of a State is requested to make available, upon request, to the Secretary concerned any criminal history information maintained by or available to such State or unit of General local government which pertains to (1) any person who, within 90 days before the date on which such information was requested, has made application for enlistment in the armed forces, or (2) any person who, within 90 days before the date on which such information was requested, has in connection with an application for enlistment also has made application for participation in a program of the armed forces which requires a determination of trustworthiness of persons who participate in such program.

"(b) In this section, 'criminal history in-

"(b) In this section, 'criminal history information' means the following information with respect to any juvenile or adult arrest, charge, citation, or conviction of any person referred to in subsection (a): (1) offense; (2) date; (3) place; (4) age; (5) disposi-

tion; and (6) court.

"(c) Criminal history information received under this section shall be confidential and no person who has had access to any information received under this section may disclose such information except to facilitate military recentification.

military recruiting.

"(d) The Secretaries concerned shall prescribe regulations necessary to carry out the provisions of this section, which shall be as uniform as practicable. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress."

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"520. Criminal history information for military recruiting purposes.".

COMPUTING AUTHORIZED DAILY AVERAGE NUM-BER OF ENLISTED MEMBERS IN PAY GRADES E-8 AND E-9

SEC. 19. Section 517(a) of title 10, United States Code, is amended—

(1) by inserting "the combined" before "pay grades"; and

(2) by striking out "2 percent and 1 percent, respectively," and inserting in lieu thereof "3 percent, but not to exceed 1 percent in pay grade E-9,".

INCREASE IN RESERVE OFFICERS' TRAINING CORPS
SCHOLARSHIPS

SEC. 20. Section 2107(h) of title 10, United States Code, is amended by striking out "6,000" and "6,500" and inserting in lieu thereof "8,000" and "9,500", respectively.

CLARIFICATION OF AUTHORITY TO TRANSPORT CERTAIN MOTOR VEHICLES

Sec. 21. Section 2634(a) of title 10, United States Code, is amended—

- (1) by striking out "and for his personal use or the use of his dependents" in the first sentence and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents"; and
- (2) by inserting "or his dependents" in the second sentence after "motor vehicle of the member".

NOMINATIONS BY THE SUPERINTENDENTS OF THE SERVICE ACADEMIES

SEC. 22. (a) Section 4342 of title 10, United States Code, is amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7). (9). or (10) of subsection (a) and may not cause the total strength of the Corps of Cadets to exceed that authorized by sub-

sections (a) and (b).".

(b) (1) Chapter 403 of such title, relating to the Military Academy, is amended by inserting after section 4341 the following new section:

"§ 4341a. Cadets: appointment by the President

"Cadets at the Academy shall be appointed by the President alone. An appointment is conditional until the cadet is admitted.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 4341 the following new item:

"4341a. Cadets: appointment by the President.".

(c) (1) Section 6953 of title 10. United States Code, relating to appointment of midshipmen at the United States Naval Academy, is amended by adding at the end thereof the following new sentence: "An appointment is conditional until a midshipman is admitted."

(2) Section 6954 of title 10, United States Code, relating to appointment of midshipmen at the United States Naval Academy, is

amended-

(A) by redesignating subsections (d) and
(e) as subsections (e) and (f), respectively;
(B) by inserting after subsection (c) the following new subsection:

- "(d) (1) Subject to paragraph (2), the Superintendent of the Naval Academy may nominate persons for appointment as midshipmen at the Naval Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.
- "(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of midshipmen at the Naval Academy to exceed that authorized by subsections (a) and (b)."; and
- (C) by striking out "Effective beginning with nominations for appointment to the Academy in the calendar year 1964, the" in subsection (f) (as redesignated by clause (A)) and by inserting in lieu thereof "The".
- (d) Section 9342 of title 10, United States Code, relating to the appointment of cadets at the United States Air Force Academy, is amended by striking out subsection (d) and inserting in lieu thereof the following:
- "(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.
- "(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of the Air Force cadets to exceed that authorized by subsections (a) and (b)."
- (e) (1) Chapter 403 of such title, relating to the Air Force Academy, is amended by inserting after section 9341 the following new section:

"§ 9341a. Cadets: appointment by the President

"Cadets at the Academy shall be appointed by the President alone. An appointment is conditional until the cadet is admitted.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 9341 the following new item:

"9341a. Cadets: appointment by the President.".

(f) The amendments made by this section shall apply to nominations for appointment to the first class admitted to each Academy after the date of enactment of this Act.

COMPANY COMMANDERS AT THE UNITED STATES MILITARY ACADEMY

SEC. 23. Section 4349(a) of title 10, United States Code, is amended by inserting ", Navy Air Force, or Marine Corps" after "Army". AUTHORITY OF THE SECRETARY OF THE NAVY TO ISSUE REGULATIONS

SEC. 24. (a) (1) Section 5031 of title 10, United States Code, is amended by adding a the end thereof the following new subsec-

"(d) The Secretary of the Navy may pre-scribe regulations to carry out his functions, powers, and duties under this title. The au-thority of the Secretary under the preceding sentence is in addition to the authority of the Secretary under section 6011 of this title.".

(2) Section 6011 of such title is amended by striking out "with the approval of the President"

(b) United States Navy regulations issued under section 6011 of such title before the effective date of this section shall remain in effect in accordance with their terms until amended or revoked by the Secretary of the

PER DIEM FOR MEMBERS OF THE NAVAL RESEARCH ADVISORY COMMITTEE

SEC. 25. Section 5153 of title 10, United States Code, is amended by striking out subsection (c) and redesignating subsection (d) as subsection (c).

ELIMINATING DATE FOR NOMINATIONS TO THE NAVAL ACADEMY

SEC. 26. Section 6956 of title 10, United States Code, is amended by striking out sub-sections (b) and (c) and redesignating subsections (d), (e), and (f) as (b), (c), and (d), respectively.

REIMBURSEMENT FOR ACCOMMODATIONS IN PLACE OF QUARTERS FOR MEMBERS ON SEA DUTY

SEC. 27. (a) Section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982."

(b) Section 7572(b) of title 10, United States Code, as amended by section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended to read as follows:

"(b) Under such regulations as the Secretary prescribes, any member of a uniformed service on sea duty who is deprived of quarters on board ship because of repairs or because of other conditions that make the member's quarters uninhabitable and for whom it is impracticable to furnish accommodations under subsection (a), may be reimbursed for expenses incurred in obtaining quarters in an amount not more than the total of-

"(1) the basic allowance for quarters of member of the same pay grade without

dependents; and

"(2) a variable housing allowance which could be paid to a member of the same pay grade under section 403 of title 37 at the location where the member is deprived of quarters on board ship.

A member entitled to receipt of basic allowance for quarters may not be reimbursed for expenses under this subsection when deprived of quarters on board ship at a location at which the member can reside with such member's dependents. The total amount of such reimbursement may not exceed \$9,000,000 for the fiscal year ending September 30, 1981, and may not exceed \$6,300,000 for the fiscal year ending September 30, 1982.".

LIMITATIONS ON AMOUNTS PAYABLE TO AVIATION CAREER OFFICERS

SEC. 28. (a) (1) An officer who receives special pay for any period under an agreement executed and accepted under section 301b of title 37, United States Code, shall not be entitled to aviation career incentive pay under section 301a of such title during such period at a rate which exceeds the rate in effect on the day before the effective date of the increase in the rate of aviation career incentive pay provided for by section 5 of this Act.

(2) From the date of enactment of this Act until September 30, 1982, only agreements executed by officers of the Navy or Marine Corps under such section 301b may be accepted.

(b) Section 301b of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

(e) Special pay may be paid under this section only for agreements accepted before October 1, 1982.".

(c) This section shall become effective on the date of enactment of this Act.

\$3,000 ACCESSION BONUS FOR SURFACE NUCLEAR POWER APPLICANTS

SEC. 29. Section 312b of title 37, United States Code, as amended by the Uniformed Services Pay and Allowances Benefits Act of 1980, is amended by striking out "submarine" in paragraph (a) (1).

SEA PAY TO MEMBERS OF TWO-CREW VESSELS SEC. 30. Section 305a of title 37, United States Code, relating to career sea pay, as amended by the Military Pay and Allowances Benefits Act of 1980, is amended by inserting "such service to include periods as a member of the off crew of a two-crewed submarine" after "underway" in paragraph (d)(1).

AMENDMENTS TO THE MILITARY SELECTIVE SERV-ICE ACT TO PERMIT PERSONS OVER 65 YEARS OF AGE TO SERVE ON LOCAL DRAFT BOARDS

SEC. 31. Section 10(b)(3) of the Military Selective Service Act (50 U.S.C. App. 460(b)(3)) is amended by striking out "who has attained the age of 65 or" in the sixth complete sentence thereof.

EFFECTIVE DATES

SEC. 32. (a) Except as provided in subsection (b) and otherwise in this Act, the amendments made by this Act shall take effect on October 1, 1981.

(b) (1) The amendments made by section 11 shall take effect on April 1, 1982.

(2) The amendments made by sections 6, 9, 12, 13, 14, 16, 19, 21, 22, 23, 24, 29, 30, and 31 shall take effect on the date of enactment of this Act.

Mr. JEPSEN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I ask unanimous consent that I be added as a cosponsor to S. 1181.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. Mr. President, very briefly, I wish to express by gratitude to all those on the Armed Services Committee staff and all those on the various liaison groups from the various branches of the services who assisted the Armed Services Committee staff, the ranking member, all of the members of the Armed Services Committee who worked so hard and so long to prepare this justpassed military pay bill.

Finally, Mr. President, I would like to express gratitude to the entire Senate which voted on an 81 to 0 basis.

Mr. President, I ask unanimous con-sent that Senator Warner be listed as a cosponsor of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JEPSEN. I thank the Chair.

ERADICATION OF PLANT PEST AND CONTAGIOUS OR INFECTIOUS ANIMAL AND POULTRY DISEASES

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 4416, an act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases. I ask unanimous consent that the measure be deemed to have been read the first and second times.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will

state the bill by title.

Mr. ROBERT C. BYRD addressed the Chair.

PRESIDING OFFICER. The Chair states that the request by the Senator from California is to proceed to the consideration of H.R. 4416, and before the Chair rules, the Chair will entertain a statement by the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair.

I have no objection, but I will reserve the right to object merely to say for the record that the taking up of this measure has been cleared with the Committee on Agriculture and with the senior Senator from California (Mr. CRAN-STON), Mr. HUDDLESTON, and Mr. CHILES. The

PRESIDING OFFICER. The clerk will state the bill by title. The legislative clerk read as follows:

A bill (H.R. 4416) to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry

There being no objection, the Senate proceeded to consider the bill.

Mr. HAYAKAWA. Mr. President, the battle to control the Mediterranean fruit fly in California continues to be a concern of primary importance for myself and all of California agriculture. Currently, all or part of seven counties are under State and Federal quarantine. More than 3.000 square miles are regulated in the State and 1,200 square miles are being sprayed from the air to eliminate the fly.

The Medfly infestation in California is a concern of national importance. Over 50 percent of our Nation's fruits and vegetables come from the Golden State. If in fact the fly is not contained and eradicated the possibility of a state-

wide quarantine is very real. Such a quarantine would be a tremendous hardship on the farmers of California and consumers across the Nation. Short supplies of essential fruits and vegetables would cause grocery prices to skyrocket. The resulting effect on the Consumer Price Index would be disastrous.

I think I can add at this point that California provides 25 percent of the fruits and vegetables consumed within

the United States.

The U.S. Department of Agriculture has wisely chosen to participate jointly with the California Department of Food and Agriculture in many of the efforts aimed at eradicating the fly. The USDA has also committed itself to funding 50 percent of the joint eradication efforts. Indeed a significant but warranted expenditure in light of the national implications of an uncontrolled Medfly in-

festation in our country.

The legislation before us today is of great importance in the Medfly fight. Specifically it will authorize the Secretary of Agriculture to transfer funds within the Department's budget for use in emergency pest situations. The Secretary must be able to respond swiftly and effectively to plant pest outbreaks which threaten our Nation's primary industry-agriculture. A quick response requires that the Secretary have not only the authority to marshal needed resources to the battle zone but also the dollars to fund eradication efforts.

Our efforts to rid the State of the Mediterranean fruit fly are long from over. We have no assurance that more flies will not be found. In fact, given our past success with eradication-we should anticipate further infestations. It pains me to say this but we must be realistic. I would like to take a minute to look back on the battle from where we stand

The history of the Medfly infestation in California in scientific and political terms is an interesting study. What started out as a matter of man versus insect degenerated into a battle between agriculture and environmental extremists.

The mismanagement of the project by the California Department of Food and Agriculture from the start has been an embarrassment for all of us working for the public good. Governor Brown in his efforts to resist the aerial application of malathion brought the level of battle to politician versus politician. Mr. Brown was attacked viciously by members of both political parties-all quite appro-

His efforts to continue along the path of using integrated pest management practices to control the fly were without scientific basis. But there was a political basis indeed—and by putting politics before problem solving, he did something that a responsible public servant should not have done.

Integrated pest management is a valuable tool in agriculture but it is simply not effective in controlling the Medfly. Several months after initiating the integrated pest management program of fruit stripping and ground spraying, \$25 million and a hundred fly finds later—virtually everyone agreed that the integrated pest management experiment was a failure. Why did the Governor resist spraying and continue down the ineffectual path of integrated pest management? The answer is simply politics. We must be grateful that Secretary Block, with his tremendous commitment to our Nation's agriculture was able to provide the leverage needed to get the spray program off the ground.

Governor Brown has attempted to blame the mistaken release of fertile Peruvian Medflies for the continued growth of the infestation. This is a highly questionable assertion. At best it is a poor

excuse.

Let me give you some facts about the Peruvian flies. They were released over 10 grid areas in San Jose. Larval infestations were found later in 47 grid areas a far greater area than that in which the Peruvian flies were released. These flies are the sterile flies which mate and nothing results. If nothing results over two or three generations, you have got them licked. To date, checks of over 2,000 Peruvian flies released at the same time have turned up only two fertile flies-a ratio of more than 1,000 to 1. This ratio far exceeds the 100 to 1 ratio ordinarily used to eradicate the Medfly. So this argument that fertile Peruvian flies have been released simply does not hold up. The infestation has spread to a far greater area than would have been expected if such a theory had been correct.

Mr. President, the measure now before the Senate is vitally needed by USDA to facilitate their dollar support of the eradication program in California. It is difficult, if not impossible to determine at this point just what the total costs of eradication will be in the case of the Medfly. It is easy to recognize that the costs of eradication will be minimal when compared to the alternative of economic devastation for the farmers and skyhigh produce costs for consumers if we are not successful in destroying the

Medfly.

For those Senators who might be reluctant to vote for this measure for fear of giving the Secretary a "blank check," I would say to them, "you can rest at ease." The Secretary has had similar authorities in dealing with animal disease problems for the last 20 years. Over all these years the Secretary has exercised his authority in only one instance—that was in the case of an outbreak of exotic Newcastle disease in poultry. USDA has a proven record of responsibility in dealing with plant pest infestations and animal epidemics.

The emphasis of our eradication efforts to date has been mainly defensive. This is regrettable. In order to stop the fly it is my opinion that we must take the offensive in the battle. To sit and wait until we find fertile flies in our traps means we are committing ourselves to a course of reactive management instead of taking defense. This I find totally unacceptable. We must initiate a program of preventative spraying in areas of likely infestation and expand and perfect our trapping programs.

Swift consideration and passage of this measure will guarantee that the con-

trol efforts will continue with all due speed.

I thank the Chair.

Mr. HELMS. Will the Senator yield? Mr. HAYAKAWA. I yield to the distinguished Senator from North Carolina.

The PRESIDING OFFICER. The Chair recognizes the distinguished Sen-

ator from North Carolina.

Mr. HELMS. Mr. President, the people of the great State of California, indeed, the people of this Nation, owe a debt of gratitude to the able Senator from California for his efforts in this connection. He has eloquently stated the case for speedy approval of the legislation.

know that the able Senator from California, with whom I have the privilege of serving as a member of the Agriculture Committee, is and has been particularly concerned that this legislation be rapidly approved. As he indicated, H.R. 4416 would allow the Secretary of Agriculture to transfer funds from agencies or corporations of the Department of Agriculture for use only in emergency situations for the eradication of plant pests or contagious animal diseases.

This authority is of critical importance. The Mediterranean fruit fly outbreak in California now poses a grave threat not only to the fruit and vegetable industry in that State, but to the produce

of every State in the Nation.

I understand that the administration strongly supports this legislation. The Department of Agriculture has already committed itself to sharing expenditures with the State of California in its efforts to eradicate the Medfly, however, all funds available within the Department for this purpose are almost exhausted. It is imperative that eradication efforts not stop now.

It is my understanding that a provision similar to H.R. 4416 has also been incorporated into the House-passed agriculture appropriations bill. The Senate has not yet taken action on that matter. The provision in that bill would extend for 1 year the authority which the Department has had for some time now to transfer funds for emergency use in animal disease eradication. It would also extend this authority to plant pests. H.R. 4416, which we are now debating, would make both of these authorities perma-

Mr. President, it is crucial that this legislation be speedily approved. It does not call for additional appropriations of money. It merely provides transfer authority. We cannot afford any further delays in the current California eradication efforts. Moreover, we need this transfer authority in the event of future emergency situations.

Mr. President, I thank the able Senator from California for yielding to me.

Again, I commend him.

 Mr. CRANSTON. Mr. President, as Members of this body are aware, there is a serious infestation of the Mediterranean fruit fly in California. This out-break directly threatens California's \$14 billion fruit and vegetable industry and is of great concern to growers in other States and consumers as well.

Since the Medfly was discovered in California in June 1980, the U.S. Depart-

ment of Agriculture has been working closely with the State of California on a cooperative project to eradicate this highly destructive pest. The Federal Government has agreed to pay for 50 percent of the eradication project costs. This includes reimbursement for past and future costs of spraying, trapping and monitoring, and quarantine and detection efforts. To date, USDA has paid for less than its full share. I understand that for September 1981 alone USDA's half may amount to \$6 million. However, the Department of Agriculture advises that it will run out of available funds in just a few days. It is critical that there be no interruption in Federal assistance at this point if the program is to be successful and that USDA be able to meet the commitment made earlier this year to share half the costs of the project.

Under current law, the Secretary of Agriculture has the authority to transfer funds from other sources available to USDA in emergencies to combat outbreaks of animal diseases. But there is no similar authority to transfer funds to combat outbreaks of plant pests like the Mediterranean fruit fly. This bill before us today, H.R. 4416, would retain the current authority re animal diseases and extend it to cover emergencies involving eradication of plant pests. I want to make it clear that the legislation does not provide for increased funding. But it gives the Secretary of Agriculture the needed flexibility to deal with this urgent problem or any future plant pest threat to our food supply.

Mr. President, any moneys spent under this authority would be a national investment to insure that the Mediterranean fruit fly is controlled and eradicated in those locations where it is now found in the continental United States. While the cost is in the millions of dollars, these sums are much less than would be incurred by American farmers and consumers if the Medfly were not eradicated.

I greatly appreciate the cooperation of the majority leader and the Senate Agriculture Committee in permitting this bill to be brought up at this time. It is important to the people of California and the Nation. I urge this bill's adoption.

Mr. HUDDLESTON. Mr. President, I am pleased to support H.R. 4416, a bill that would give the Secretary of Agriculture authority to transfer Agriculture Department funds for use in emergency pest control situations such as the Mediterranean fruit fly outbreak in California.

As I am sure my colleagues will agree, this emergency measure is vitally important to our producers and consumers. If the Mediterranean fruit fly is not eradicated as soon as possible, other States will suffer the same costly consequences as California.

The proposal to give the Secretary authority to transfer Department funds for emergency situations has been used for the arrest and eradication of infectious or contagious diseases of animals or poultry. This legislation would extend his authority to cover the emergency arrest or eradication of plant pests as well.

It is my understanding that the administration strongly supports the adop-

tion of this legislation. I urge my colleagues to join me in supporting this bill.

Mr. HATFIELD. Mr. President, I support the passage of this bill. It will address a very troubling problem which arises from the establishment of new or unanticipated emergency plant pest infestations which threaten American agriculture, by granting the Secretary of Agriculture limited authority to transfer funds within the Department to arrest or eradicate the pest.

This is identical to authority which currently exists in the Department for the control of animal diseases, an authority which the administration has been very prudent in exercising. The emergency authority is used when a new plant or animal pest problem is identified which requires immediate action to control or eliminate. The cost of undertaking these control efforts can be considerable, but without swift action, the ultimate cost to agricultural producers and to the consumers can be enormous.

The Nation is currently confronted with a typical example of the circumstances in which this authority is needed: The infestation of the Mediterranean fruit fly in California. Early this summer, the U.S. Department of Agriculture was almost forced to terminate its participation in the eradication effort because all available reserve and contingency funding was exhausted. Fortunately Congress was considering a supplemental appropriations bill at the time, and additional funds were provided in time to continue the program. Had Congress been out of session, or occupied with other legislation at that time, the Federal Government would have had no alternative but to halt its spray program.

Mr. President, as a general rule, I do not favor the granting of discretionary authority to obligate funds without prior specific appropriations by the Congress. In this case, however, I recognize that there are good and compelling reasons why a limited exception to this rule should be granted. It should be made clear that Congress will continue to exercise its oversight responsibilities, including the requirement that prior to the exercise of this emergency authority that the Appropriations Committees of the Congress be notified for their concurrence.

With these safeguards and limitations I believe that the bill should be adopted.

Mr. HAYAKAWA. Mr. President, there is no objection from the other side of the aisle. I have been informed that the senior Senator from California (Mr. Cranston) approves of this measure and has no objection to it. I believe the same is true of the Democratic members of the Agriculture Committee. I request that we submit this to a voice vote since there does not seem to be enough objection to it.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4416) was ordered to a third reading, was read the third time, and passed.

Mr. HELMS. Mr. President, I move to

reconsider the vote by which the bill was passed.

Mr. HAYAKAWA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HIGH INTEREST RATES AND THE NATIONAL DEBT

Mr. HARRY F. BYRD, JR. Mr. President, the Treasury Department this morning testified before the Subcommittee on Taxation and Debt Management of the Committee on Finance. The Treasury and the administration say that it will need an increase in the current debt ceiling, which is now \$985 billion. It will need an increase to \$1,079,000,000,000. That represents an increase in the debt of roughly \$90 billion during the fiscal year 1982. The current debt is now \$985 billion. The proposal is to increase the debt ceiling, the amount of debt permitted, to \$1,079,000,000,000 for the upcoming fiscal year.

Under questioning by me, the Department of the Treasury stated that the rollover of present debt during the new fiscal year will be \$252 billion. Another way of saying that is that Treasury must go into the money market to the extent of \$252 billion to refinance existing debt. On top of that, it will need to go into the money markets for a minimum of \$60 billion for new debt.

The reason I say a minimum of \$62 billion, Mr. President, is the Treasury Department said it would be approximately \$60 billion of new debt that would need to be financed during fiscal 1982, but the figures that are submitted show that it will be approximately \$90 billion, somewhere between \$85 billion and \$90 billion of new funds that will be needed. The Office of Management and Budget has submitted figures showing that the Federal funds deficit for the new fiscal year will be, in round figures, \$68 billion. On top of that, there are off-budget debts of \$18 billion. So, when you add those two together, you come up with a Federal funds deficit, as differentiated from a unified budget deficit, of \$86 billion.

In estimating the amount of money that will be needed and the new debt ceiling that will be needed for fiscal year 1982, Treasury assumed, I was told this morning at the committee hearing, an interest rate of between 11 and 12.5 percent. Mr. President, the Treasury is now paying between 15 and 16 percent for money, so the assumption may be very optimistic at 11 to 12.5 percent. My guess is that it is too optimistic. But if the interest rates continue anywhere near what they are now, then, for every percentage point above that 11 to 12.5 percent. it will add \$4 billion, the Treasury testified today, to the cost of servicing the debt.

The cost of servicing the debt, the committee was told today by the Treasury, for fiscal year 1982 will be \$108 billion. So, Mr. President, I think our Government is in a very serious financial position. The business community and the stock market and the investment funds recognize this and have recognized

it. It has had an extremely undesirable effect on the economy. President Reagan, I think, recognizes it, also. I have not talked with him personally, but, judging from the news accounts, the White House is prepared to ask for additional reductions in spending over and above the reductions that Congress already has agreed to.

Mr. President, I hope the President does ask for additional reductions in spending. If he does, I plan to support him. Although great strides have been made, I admit, although significant reductions have been made by this Congress, I think further reductions need to be made if we are to get interest rates

Over the weekend, Mr. President, prominent Members of Congress have said that if interest rates do not come down within x number of days, something must be done about it. Well, what can be done about it? Does anybody believe we can legislate a reduction in interest rates? I do not know of anyone who believes that. I do not know of any economist who believes that. There may be politicians who believe it.

Mr. LONG. Will the Senator yield at that point?

Mr. HARRY F. BYRD, JR. Yes, Mr. President, I yield.

Mr. LONG. Is not the Senator aware the Chairman of the Federal Reserve Board is using his influence to keep the interest rates high and the chairman is keeping the money supply as tight as possible? Does that not make interest

rates high?

Mr. HARRY F. BYRD, JR. The Federal Reserve Board is attempting to cool the tremendous inflation that is eating into the pay check of every man and woman. That is what the Federal Reserve Board is trying to do, curb inflation.

Mr. LONG. If one wants to cooperate with the Manhattan bankers making the interest rate as high as it can go, that is the way to do it, to make money as tight as possible. The ability to protect the economy from further high interest rates is in the power of the Congress. It is in the lawmaking process, which is Congress and the President. Previous Congresses created the Federal Reserve Board. That is an act of the Congress. It is not a part of the Constitution. That act can be amended or re-

pealed entirely.

If anybody is going to do anything about high interest rates, it should be this Government, acting on behalf of the people of the country, who are the borrowers and who have to borrow money. Some people would have us believe that these big banks are eleemosynary institutions, that they are in the charity business. If you believe that, just read that corporate charter. It says banks are in business to make money. They are

making money very well indeed. I think the Senator knows the long-

term interest rate tends to be 3 points above inflation. Right now, it is 8 points above inflation. This Government should

do something about it.

I hope the Senator is not going to defend these high interest rates, because the President is not defending them. All I am saying is that the President should do something about them.

Mr. HARRY F. BYRD, JR. The Senator from Virginia has been condemning high interest rates perhaps longer than any other Member of the Senate. I have been condemning high interest rates for a long time, and I have said we have them because of the irresponsibility of the Congress of the United States, over a period of years, in squandering and spending the money of the American taxpayers. That is why we have these high interest rates and this high inflation—because of the irresponsibility of Congress.

If anyone in Congress has plans for legislation that can bring down interest rates, fine. But I do not know of any legislation that can bring down interest rates. The way to bring down interest rates is what the President is trying to do and what Congress has reluctantly followed him in doing-namely, to reduce the huge increase in the cost of Government.

I wish to pay tribute to the President for the initiative and the leadership and the determination he has shown, during the short time he has been in office, in bringing down the tremendous increase in the cost of Government.

This year, Congress approved a \$35 billion reduction. The Senator from Louisiana and the Senator from Virginia voted for that program. Both of us feel that we do need to reduce Government spending, and that is what the President is trying to do. So I applaud and defend the President in his efforts to reduce Government expenditures. That is the way, as I see it, in the long run, to get interest rates down. I believe these interest rates are absolutely devastating.

Mr. LONG. Mr. President, one of the principal reasons we do not have a balanced budget and are not going to have one-and have no hope of having oneis high interest rates.

The Senator from Virginia seems to think that the way to do that would be to balance the Federal books. The Federal books will never be balanced with interest rates so high.

I do not believe that we are going to solve this problem merely by making conditions attractive for the Wall Street bankers and the big money interests in America. These money lenders represent less than 1 percent of the people of this country. I do not believe it is in our power to make the economic conditions so attractive that interest rates will come down.

In my judgment, to bring down interest rates, you will have to look at the kinds of things Presidents Franklin D. Roosevelt and Harry Truman did when they used the powers that were given the Federal Government by the Constitution to create money and to regulate the value of it. You will have to use those powers for the benefit of the 99 percent of the people in this country who happen to be the money borrowers.

If interest rates continue to be kept high with the approval of this White House and the approval of the administration so far, then those Wall Street bankers can write their own tickets. This is exactly what has happened.

I suggest that the President talk to the money lenders the way he talked to the air traffic controllers. He should say: "I appreciate your help in getting me in office, but after all, I represent more than you. I have responsibility to all 223 million in this country. If you think you can continue to take advantage of this situation the way you have been, I'll have to take the side of the 99 percent of the people who are getting the worst of it."

I believe that if a vote were to be taken on Wall Street right now, the majority there would be in favor of bringing down these interest rates and using the power of the Government, if need be, to do it. They know that is the only way it can

be done.

Mr. HARRY F. BYRD, JR. Will the Senator elaborate on how the Government should or could bring down the interest rates?

Mr. LONG. I am not the President. I am frank to say that nobody is going to become excited about the Senator from Louisiana (Mr. Long) saying anything about that. They will say, "He is just reverting to form. He came here as a populist, to begin with."

However, the President of the United States says he is concerned about this matter. Our friends on the other side of the aisle and the Senator from Virginia are expressing concern about these high interest rates. The President should say, "Enough."

I know that the Senator from Virginia does not believe in the Reconstruction Finance Corporation, but, to a large degree, the money is the people's money. The money is coming from the Federal Government in rediscounting these notes, and the credit is the people's credit. We may have to find some other ways of doing business in order to use the people's credit to the benefit of the majority of the people. We may have to recreate the Reconstruction Finance Corporation to make some of these loans that money lenders do not want to make, except at 25 percent interest.

Mr. HARRY F. BYRD, JR. The Government itself is paying 16 percent for short-term money. So it is not just the

I do not defend the bankers. As a matter of fact, during the time I have been in the Senate, I believe I have been more critical of them than any other Member of the Senate. I do not know of anyone who wants these high interest rates. There may be some people who do, but I do not know who they are. It hurts everybody.

Mr. LONG. I am not happy about it, but the natural gas industry has had to live with price controls for more than 30 years. It is not fair; it is not right. They have had to suffer from price controls for more than 30 years.

Mr. HARRY F. BYRD. JR. There is quite a difference. As the Senator knows, every State in the Union had a usury law. I voted for it when I was in the Virginia Senate—a usury law for the State of Virginia, by which no one could lend money above a certain rate. But in the last few years, Congress got into the act and said, in effect, "You must set

aside all your usury laws, because if you don't, there won't be any economic activity." There is no way you can force anyone to lend money at a particular

Mr. LONG. The Senator from Virginia is making the argument that nothing except balancing the Federal budget will lower interest rates. Many things have been done to lower interest rates under Presidents who had the will to act, and I refer to Franklin D. Roosevelt and Harry Truman. They were criticized severely for using the powers of this Government to benefit the people.

Mr. HARRY F. BYRD, JR. They did not have anything similar to what we face today, nothing whatsoever, with regard to the interest rates we face today. They did not have anything in regard to the accumulated deficits and huge deficits we have today. It was an entirely

different situation.

Mr. LONG. Mr. President, I thank my dear friend from Virginia for yielding to me. He knows I love him devoutly.

Mr. HARRY F. BYRD, JR. It is mutual. Mr. LONG. He is a great Senator. I will trespass on his time no further, except to express my admiration for him; and I reserve my right, as a very dear friend, to have a different opinion about this matter.

Mr. HARRY F. BYRD, JR. The Senator from Louisiana and the Senator from Virginia very seldom have a difference of opinion. I am not sure that we have a difference of opinion in this matter. Both of us feel that interest rates are too high. Both of us feel that interest rates must be brought down. Both of us want to do whatever is reasonable and possible. It is just a question of how it can be done. There might be some difference of opinion on that.

The Senator from Louisiana, as the chairman of the Senate Finance Committee for many years, showed an ability and a dedication that few persons in the history of the Senate have shown, and I have great admiration for him. Perhaps by talking to each other, we can find some proposal we can make which will bring down interest rates at an early date.

I must say that I am very doubtful that any proposal that Congress could makeor, for that matter, that the administration could make-could bring about a reduction in interest rates in a very short time, unless we want to run the risk and probability of stimulating inflation simultaneously.

Mr. LONG. I thank the Senator for his courtesy. He is always generous and kind. It is a great pleasure for me to work with the Senator from Virginia. I am happy to say that in working with the Senator on the Finance Committee, many times we started out with a divergence of views and managed to arrive at a conclusion we could support, and I hope we can do so at this time.

I thank the Senator.

Mr. HARRY F. BYRD, JR. I thank the Senator from Louisiana

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, at the request of the distinguished majority leader, I ask unanimous consent that there be a period for the transaction of routine morning business, for not to exceed 1 hour, and that Senators may speak therein.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

THE UNITED STATES SENATE

Mr. ROBERT C. BYRD. Mr. President, on Friday, July 31, I spoke on the early history of Senate committees, and today I continue my series of statements on the United States Senate, it being a time when the Senate is not engaged in the transaction of business and with no other Senator seeking the floor.

I wish at this time to elaborate a bit on the evolution of the Senate committee system and certain Senate rules, and in this regard may I express appreciation to Judy Schneider who is in the Government Division of the Library of Congress, Congressional Research Service, and also to Dr. Floyd Riddick, Parliamentarian Emeritus of the United States Senate.

Efforts to secure changes in organization and procedure have been a continuing trend in the history of Congress, Even in an institution such as the Senate, with a high regard for the role of tradition, organizational and procedural changes have occurred throughout its development. In the 96th Congress, Senate attention was drawn to efforts to improve legislative efficiency, to increase the public accountability of the Senate, and to enhance its institutional stature.

In many ways, the modern Senate is much like the Senate of the 18th and 19th centuries. Traditions of extended debate and of collegiality in decision-making have remained influential to the present day. In other respects, the Senate has seen fit to modify its practices. In recent years, efforts have been undertaken to modify the seniority system, to open Senate committee meetings to the public, to increase the availability of staff assistance for Members, and to require the disclosure of information about Senators' personal finances. Other efforts have been directed toward reasserting the role of Congress in formulating national policy.

The modern Senate committee system dates from the passage of the Legislative Reorganization Act of 1946, which marked the culmination of efforts by a Joint Committee on the Organization of Congress. Hearings by a second such joint committee in 1965-66 led to the enactment of the 1970 Legislative Reorganization Act, which focused primarily on congressional information and analytic resources, committee staffing, and congressional procedure. The Congressional Budget Act and Impoundment Control Act of 1974 established Senate and House Budget Committees, a Congressional Budget Office, and a process to achieve more coordinated congressional action in fiscal policy making.

Several additional changes were made in Senate committee operations during the 94th Congress. The previous requirement that Senate committee meetings be open to the public was extended to conference committee meetings unless a majority of the House or Senate conferees voted otherwise. Senators who previously had not been able to appoint committee staff were permitted to name staff to aid them with committee business. The Senate Democratic Conference voted to provide that, beginning in 1977, one-fifth of the Democratic Senators could anonymously request a secret vote of the Conference on any prospective committee chairman nominated by the Democratic Steering Committee. Republican committee leaders are chosen by their party colleagues on each committee, subject to Republican Conference approval.

Early in the 95th Congress, the Senate approved a major revision in its committee system. In 1976, a Temporary Select Committee to Study the Senate Committee System had been appointed. Under the leadership of Sen. Adlai Stevenson and co-chairman, Sen. Bill Brock, the committee recommended reorganization and consolidation of the Senate's committee. The committee re-forms, as embodied in S. Res. 4 of the 95th Congress, were considered and amended during four days of Senate debate, and were approved by the Senate on Feb. 4, 1977. Among the provisions of S. Res. 4 were:

Reduction in the number of Senate standing committees from 18 to 15;

Adjustments in committee jurisdic-

Limitations on Senators' committee and subcommittee assignments:

Increased committee staff assistance for minority party members;

Recommendations that duties of joint committees be transferred to Senate standing committees wherever possible;

Establishment of procedures to secure referral of legislation to more than one committee; and

Establishment of a permanent Select Committee on Aging, and of a Select Committee on Indian Affairs for the 95th Congress.

Subsequent to passage of S. Res. action was taken to abolish the Joint Committee on Defense Production and the Joint Committee on Congressional Operations. The Joint Economic Committee and the Joint Committee on Taxation were retained, as were Joint Committees on the Library and on Printing. At the end of the 95th Congress, the Senate acted to continue the Select Committee on Indian Affairs for an additional two years.

The Senate acted to implement additional provisions of its committee reform resolution during the 96th Congress. Additional committee and subcommittee assignment limitations became effective with the start of the new Congress. Some Senators were forced to relinquish committee assignments they held in preceding Congresses. By 1979, the Senate also came half-way (from a 1977 base) toward achieving a one-third minority party committee staffing ratio.

Delay of business on the Senate floor remained an issue of continuing concern. Changes in the cloture rule (Rule XXII) by which debate on the Senate floor is terminated have been suggested for several years. In 1975, the Senate revised its rule to permit cloture if three-fifths of its Members vote to bring debate on legislation to a close; previously, the support of two-thirds of the Senators present and voting had been necessary. In the 94th Congress, a record number of 14 successful cloture votes were taken. During the 95th Congress, opponents of measures delayed Senate business for substantial periods of time even after cloture was invoked. A resolution (S. Res. 9. 1977) to eliminate or to reduce the impact of these "post-cloture filibusters" failed to gain passage after four days of Senate debate. In October 1977, a series of parliamentary rulings by the Vice President, sustained by the Senate, partially limited the impact of post-cloture filibusters. Additional efforts to modify the Senate cloture rule were begun in the 96th Congress.

During the 95th Congress, several proposals were considered to revise the administrative operations of the Senate. At the end of 1976, the Commission on the Operation of the Senate, appointed the previous year, issued its final report. The Commission recommended the appointment of an Administrator of the Senate responsible for routine management functions; the reallocation of space for Senators, committees, and administrative units; more efficient use of time through early organizational meetings, computerized scheduling of committee meetings and designation of days exclusively for committee or floor business: experimentation with broadcasting of floor proceedings; and public financial disclosure for Senators and key administrative staff.

A resolution (S. Res. 166, 1977) embodying most of the Commission's recommendations was considered in committee, but not reported to the full Senate. Some of the Commission's recommendations were implemented, however. Computerized scheduling of committee meetings began during the 95th Congress and Senate debates on the Panama Canal treaties were broadcast by public radio.

The Senate also acted in the 95th Congress to increase accountability of Senators for their personal finances. S. Res. 110, adopted Apr. 1, 1977, established a more comprehensive financial disclosure requirement for Senators and senior staff, proscribed the receipt of gifts valued in excess of \$100 from foreign nationals or from persons with a direct interest in legislation, limited most sources of Senators' outside earned income to no more than 15% of their Senate salaries, limited the use of the congressional frank, prohibited foreign travel by "lame duck" Senators, prohibited the establishment of unofficial office accounts, and added language to the Senate rules prohibiting discrimination in the hiring and promotion of staff.

Enforcement and oversight responsibilities for the Code of Conduct were assigned to the Select Committee on Ethics. Some modifications in the code were subsequently adopted by the Senate, and many of the Code's provisions (especially the financial disclosures requirements) were subsequently incorporated into the Ethics in Government Act, P.L. 95–521, which was signed into law on Oct. 26, 1978.

Proposals were also made to enhance the non-discrimination portion of the ethics code by establishing a Senate Fair Employment Relations Board to receive and screen complaints, and to offer appropriate remedies. No final action was taken on the proposal during the 95th Congress.

96TH CONGRESS

On Jan. 15, 1979, introduced S. Res. 9, a proposal to expedite Senate consideration of legislation. The resolution, as introduced, contained the following provisions:

 a. Offering of non-debatable motions to approve or correct the Journal would be permitted;

 b. Debate on motions to proceed to consider a particular bill would be limited to 30 minutes;

c. Demands for the reading of an amendment would not be in order if copies of the amendment were available in printed form;

d. The offering of non-debatable motions requiring three-fifths vote to enforce rule of germaneness of future amendments to a bill would be allowed;

e. Post-cloture debate time would be limited to 100 hours, with time for quorum calls, votes, and parliamentary rulings and appeals counted against the 100 hours:

f. Post-cloture debate time could be extended or reduced, but not below ten hours, by a three-fifths vote of the full Senate;

g. After Sept. 1 of each year, a cloture motion could be brought to a vote the same day as introduced, after a maximum of five hours of debate;

h. The demand to read a conference report in full could not be entertained, if printed copies of the report were available:

i. "Three-day rule" for availability of committee reports would be changed to a "two day rule," with Saturdays, Sundays, and holidays included; and

j. The Committee on Rules and Administration would be directed to provide for the installation of an electronic voting system in the Senate.

The respective party leaderships appointed committees to study the Byrd resolution and to report their recommendations to the party conferences. The Republican committee was chaired by Sen. Ted Stevens and the Democratic committee was chaired by Sen. Gaylord Nelson. The committees met individually and jointly with the party leaders in an effort to devise an acceptable compromise.

On Feb. 7, 1979, the Senate agreed to a unanimous consent request by me to limit consideration only to those portions of his resolution dealing with post-cloture regulations. An alternate resolution, S. Res. 61, embodying points (e) and (f) above, was made in order for purposes of amendment. Under terms of the agreement, S. Res. 61 became the pending order of business. If a final vote on the disposition of the new resolution did not occur by 6 p.m. on Feb. 22, 1979, the original language of S. Res. 9 would again become the pending business before the Senate.

During its consideration of S. Res. 9 and S. Res. 61, the Senate recessed rather than adjourned at the end of each day's session. This was done maintain the procedural fiction that the Senate was still in its first day of business. It has been maintained that the Senate is not bound by rules adopted by the Senate in previous Congresses, and that a majority of Senators can vote to end debate on rules changes on the first day of a new Congress. This ruling was temporarily upheld by the Senate in 1975, but later was overturned as part of the cloture rule reform compromise of that year. However, continuation of the Senate in its first legislative day maintained the possibility that this contention could have been used to end prolonged debate on cloture rule reform.

On Feb. 22, 1979, the Senate agreed to S. Res. 61 by a vote of 78-16. As finally approved, the resolution establishes a cap of 100 hours of consideration once cloture has been invoked on a measure. At the expiration of the time limit, the Senate would proceed to the final disposition of the measure: no amendments then not pending would be in order. A motion to table, a motion to reconsider, and motions necessary to establish a quorum would be in order, however. The Senate may, by a three-fifths vote, increase the amount of post-cloture time, with the additional time to be equally divided and controlled by the Majority and Minority Leaders, or their designees.

Under the resolution, each Senator is entitled to one hour of time. Senators may yield their time to the majority or minority floor managers of the bill, or to the Majority or Minority Leaders. None of the designated four Senators may have more than two additional hours yielded to him or her. These Senators, in turn, may yield their time to other Senators so requesting. If all available time expires, a Senator who has not yielded time and who has not yet spoken on the matter on which cloture has been invoked, may be recognized for ten minutes for the sole purpose of debate.

The resolution provides that no Senator shall call up more than two amendments until every other Senator has had the opportunity to call up two amendments. The Chair is directed to recognize Senators who have not called up two amendments, and who wish to do so, in preference to a Senator seeking recognition to call up a third amendment.

After cloture is invoked, the resolution stipulates that the reading of the Journal shall be dispensed with and that the Journal shall be approved automatically for the duration of post-cloture consideration of a measure. Similarly, after cloture is invoked, the reading of

amendments available in printed form will be dispensed with routinely.

The former cloture rule made in order amendments introduced prior to the completion of the cloture vote. S. Res. 61 would make in order first degree amendments-amendments to a bill-submitted by 1 p.m. of the day following submission of a cloture motion; second degree amendments-amendments to amendments-would be in order if submitted in writing 1 hour prior to the cloture vote.

After the Senate passed S. Res. 61, it agreed to place S. Res. 9 on the Senate calendar. The Senate also adjourned, thus completing the first legislative day of the 96th Congress. As I explained, this action would guarantee that if the Senate resumed consideration of S. Res. 9, a two-thirds vote would be required to invoke cloture on the measure, a two-thirds vote being necessary because the measure involved changes in the Senate rules.

On Mar. 8, 1979, the Senate adopted S. Res. 93, postponing from Jan. 1, 1979, until Jan. 1, 1983, the effective date for limitations on the outside earned income of Senators and certain senior Senate staff members. The limit on earned income (15% of a Senator's or staffer's salary) was adopted in 1977 as part of the Senate's Code of Official Conduct. S. Res. 93 was introduced on Mar. 7, 1979, and was made the pending order of business by unanimous consent. There was no roll-call vote on final passage. Senators are still limited by statute to honoraria fees of \$2,000 per appearance. and a total of \$25,000 per annum from such fees.

On Oct. 31, 1979, the Senate adopted S. Res. 271 which eliminated certain congressional class requirements for membership on the Select Committee on Ethics.

On Nov. 14, 1979, the Senate adopted S. Res. 274, Revised Standing Rules of

On Dec. 13, 1979, the Committee on Rules and Administration reported S. Res. 281 and S. 2018, a package to revise committee funding procedures by requiring all standing committees to submit one comprehensive funding resolution to incorporate all operating expenses for the year. The resolution, which becomes effective in the 97th Congress, passed the Senate Mar. 11, 1980, by voice vote.

On Dec. 11, 1980, the Senate passed S. Res. 448, as amended, which extended the life of the Select Committee on Indian Affairs until 1984.

THE 1969 CREDIT CONTROL ACT

Mr. ROBERT C. BYRD. Mr. President, the 1969 Credit Control Act gives the President extremely broad powers to use the Federal Reserve Board to lower interest rates, among other things. The 96th Congress voted to terminate the act as of June 30, 1982.

The act is brief and to the point, say-

Whenever the President determines that such action is necessary or appropriate for

the purpose of preventing or controlling inflation generated by the extension of credit in excessive volume, the President may authorize the Board to regulate and control any or all extensions of credit.

The powers of the Federal Reserve Board, upon being authorized by the President, are many, but include the ability to:

Prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extensions

The act has been invoked only once, by President Carter in March 1980. A major debacle resulted, and the economy shrank dramatically. Unfortunately, Congress terminated the act. Nothing in the act required the President or the Federal Reserve to act in the particular way they did-some form of credit control powers are an important stand-by function of the Government.

If one suggested that the President invoke the act, his advisers might rely on the peculiar phrasing of the act and respond that excessive credit is not causing current inflation; therefore, no justification exists for the invocation of the

One might respond that excessive credit is being extended to large corporations for speculative takeovers, and to wealthy individuals for speculation on money markets and in commodities, while insufficient affordable credit is available to the small businessmen who provide the vast majority of jobs in this country.

Mr. President, I ask unanimous consent that a copy of the Credit Control Act be printed in the RECORD.

There being no objection, the act was ordered to be printed in the RECORD, as follows:

CHAPTER 20-CREDIT CONTROL

1901. Definitions.

1902. Rules and regulations by the Board of Governors of the Federal Reserve System.

1903. Interest.

1904. Credit controls. 1905. Extent of control.

1906. Reports; production of records.

1907. Injunctions for compliance.

1908. Civil penalties.

1909. Criminal penalty.

§ 1901. Definitions.

(a) The definitions and rules of construction set forth in this section apply to the

provisions of this chapter.

(b) The term "Board" refers to the Board of Governors of the Federal Reserve System.
(c) The term "organization" means a corporation, government or governmental sub-

division or agency, trust, estate, partnership,

cooperative, or association.
(d) The term "person" means a natural

person or an organization.

(e) The term "credit" means the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.

The term "creditor" refers to any person who extends, or arranges for the extension of, credit, whether in connection with loan, a sale of property or services, or otherwise.

The term "credit sale" refers to any sale with respect to which credit is extended or arranged by the seller. The term includes

any rental-purchase contract and any contract or arrangement for the bailing or leasing of property when used as a financing device.

(h) The terms "extension of credit" and "credit transaction" include loans, credit sales, the supplying of funds through the underwriting, distribution, or acquisition of securities, the making or assisting in the making of a direct practice, or otherwise participating in the offering, distribution, or acquisition of securities.

(i) The term "borrower" includes any per-

son to whom credit is extended.

(i) The term "loan" includes any type of credit, including credit extended in connection with a credit sale.

The term "State" refers to any State, the Commonwealth of Puerto Rico, the District of Columbia, and any territory or possession of the United States.

(1) Any reference to any requirement imposed under this chapter of any provision thereof includes reference to the regulations of the Board under this chapter or the provision thereof in question.

(Pub. L. 91-151, title II, § 202, Dec. 23, 1969, 83 Stat. 376.)

SHORT TITLE

Section 201 of Pub. L. 91-151 provided that: "This title [enacting this chapter] may be cited as the 'Credit Control Act'."

§ 1902. Rules and regulations by the Board of Governors of the Federal Reserve System

The Board shall prescribe regulations to carry out the purposes of this chapter. These regulations may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of transactions, as in the judgment of the Board are necessary or proper to effectuate the purposes of this chapter, to prevent circumvention or evasion thereof, or to facilitate compliance there-

(Pub. L. 91-151, title II, § 203, Dec. 23, 1969, 83 Stat. 376.)

§ 1903. Interest

Except as otherwise provided by the Board, the amount of the interest charge in connection with any credit transaction shall be determined under the regulations of the Board as the sum of all charges payable directly or indirectly to the person by whom the credit is extended in consideration of the extension of credit.

(Pub. L. 91-151, title II, § 204, Dec. 23, 1969, 83 Stat. 377.)

§ 1904. Credit controls

(a) Whenever the President determines that such action is necessary or appropriate for the purpose of preventing or controlling inflation generated by the extension of credit in an excessive volume, the President may authorize the Board to regulate and control any or all extensions of credit.

(b) The Board may, in administering this Act, utilize the services of the Federal Reserve banks, and any other agencies, Federal or State, which are available and appropriate.

(Pub. L. 91-151, title II, § 205, Dec. 23, 1969, 83 Stat. 377.)

§ 1905. Extent of control

The Board, upon being authorized by the President under section 1904 of this title and for such period of time as he may determine, may by regulation

(1) require transactions or persons or classes of either to be registered or licensed.

(2) prescribe appropriate limitations, terms, and conditions for any such registration or license.

(3) provide for suspension of any such

registration or license for violation of any provision thereof or of any regulation, rule, or order prescribed under this Act.

(4) prescribe appropriate requirements as to the keeping of records and as to the form, contents, or substantive provisions of contracts, liens, or any relevant documents.

(5) prohibit solicitations by creditors which would encourage evasion or avoidance of the requirements of any regulation, license, or registration under this Act.

(6) prescribe the maximum amount of credit which may be extended on, or in connection with, any loan, purchase, or other extension of credit.

(7) prescribe the maximum rate of interest, maximum maturity, minimum periodic payment, maximum period between payments, and any other specification or limitation of the terms and conditions of any extension of credit.

(8) prescribe the methods of determining purchase prices or market values or other bases for computing permissible extensions of credit or required downpayment.

(9) prescribe special or different terms, conditions, or exemptions with respect to new or used goods, minimum original cash payments, temporary credits which are merely incidental to cash purchases, payment or deposits usable to liquidate credits, and other adjustments or special situations.

(10) prescribe maximum ratios, applicable to any class of either creditors or borrowers or both, of loans, of one or more types or of

all types.

(A) to deposits of one or more types or of all types.

(B) to assets of one or more types or of all types.

(11) prohibit or limit any extensions of credit under any circumstances the Board deems appropriate.

(Pub. L. 91-151, title II, § 206, Dec. 23, 1969, 83 Stat. 377.)

REFERENCES IN TEXT

This Act, referred to in pars. (3) and (5), is Pub. L. 91–151, Dec. 23, 1969, 83 Stat. 377, which is classified generally to this chapter. For complete classification of this Act to the Code, see Tables volume.

§ 1906. Reports; production of records

Reports concerning the kinds, amounts, and characteristics of any extensions of credit subject to this chapter, or concerning circumstances related to such extensions of credit, shall be filed on such forms, under oath or otherwise, at such times and from time to time, and by such persons, as the Board may prescribe by regulation or order as necessary or appropriate for enabling the Board to perform its functions under this chapter. The Board may require any person to furnish, under oath or otherwise, complete information relative to any transaction within the scope of this chapter including the production of any books of account, contracts, letters, or other papers, in connection therewith in the custody or control of such person.

(Pub. L. 91-151, title II, § 207, Dec. 23, 1969, 83 Stat. 378.)

§ 1907. Injunctions for compliance

Whenever it appears to the Board that any person has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of any regulation under this chapter, it may in its discretion bring an action, in the proper district court of the United States or the proper United States court of any territory or other place subject to the jurisdiction of the United States, to enjoin such acts or practices, and upon a proper showing a permanent or temporary injunction or restraining order shall be granted without bond. Upon application of the Board, any such court may also issue mandatory injunctions commanding any

person to comply with any regulation of the Board under this chapter.

(Pub. L. 91-151, title II, § 208, Dec. 23 1969, 83 Stat. 378.)

§ 1908. Civil penalties.

(a) For each willful violation of any regulation under this chapter, the Board may assess upon any person to which the regulation applies, and upon any partner, director, officer, or employee thereof who willfully participates in the violation, a civil penalty not exceeding \$1,000.

(b) In the event of the failure of any person to pay any penalty assessed under this section, a civil action for the recovery thereof may, in the discretion of the Board, be brought in the name of the United States.

(Pub. L. 91-151, title II, § 209, Dec. 23, 1969, 83 Stat. 378.)

§ 1909. Criminal penalty

Whoever willfully violates any regulation under this chapter shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

(Pub. L. 91-151, title II, § 210, Dec. 23, 1969, 83 Stat. 378.)

ENERGY INSECURITY

Mr. ROBERT C. BYRD. Mr. President, the major energy story of the day would appear to be news of an oil glut. This summer there has been a plentiful supply of gasoline and the price has even slipped several cents a gallon. Foreign oil imports in the first 6 months of this year have declined by 20 percent, to an average of 5.9 million barrels a day. For the first time since the Arab oil embargo of 1973, domestic oil production actually increased slightly during the months of June and July. Prodded by higher prices resulting from decontrol, drilling activity has reached an all-time high.

So with all of this encouraging news,

where are we going wrong?

First, it appears that the Reagan administration has determined that no energy policy is the best energy policy. This goes beyond the decontrol of domestic crude oil prices and the accompanving curtailment of a complex regulatory scheme. Unlike Presidents Nixon, Ford, and Carter, the Reagan administration apparently does not see energy as an urgent problem requiring Federal action. Rather, market forces are now deemed to be the panacea for our energy ills. Despite warnings by the most informed experts that the current oil surplus is only temporary, there has been no effort to devise a workable response to a cutoff of Persian Gulf imports. In contrast to the optimistic statistics, the United States continues to import approximately 12 percent of its total oil supplies from Arab OPEC nations. There seems to be little recognition of the economic and foreign policy consequences of this continued energy vulnerability.

The shortsightedness of this nonpolicy has been noted by Daniel Yergin, the kell-known Harvard professor. In a recent New York Times book review. Yergin wrote that the Reagan administration "seems to have made a sharp and potentially dangerous distinction between energy policy, which it more or less seems to want to forget, and foreign and security policies, about which it is quite concerned." Given the high probability of further disruptions in oil

supplies before the decade is out, the tendency to separate security and energy policies may prove most unwise. Citing our enormous expenditures on military equipment, Yergin notes that the probability of Soviet tanks rolling across the North German plain is much lower than the likelihood of an interruption of oil supplies stemming from various conflicts in the Middle East. But we are far less prepared for a severe energy emergency than a military attack.

At the end of this month, the Emergency Petroleum Allocation Act will expire. This legislation empowers the Federal Government to impose oil price and allocation controls in the event of a severe supply shortfall. A variety of alternatives have been proposed, including an emergency energy tax to insure that the drastically higher prices that would result from a shortage do not unduly benefit OPEC or the oil companies. There must also be some mechanism to assure that essential defense, police, medical, and agricultural activities are adequately supplied. The need for emergency safeguards to ease the economic dislocation of a severe oil supply disruption has been recognized on both sides of the aisle. But so far, the administration has failed to submit its recommendations on what new authority the Government should have.

Ever since President Nixon launched Project Independence in response to the 1973 Arab oil embargo, successive administrations and Congress have repeatedly supported efforts to reduce oil imports through the development of alternate energy technologies. However, the Reagan administration now contends that continued dependence on oil imports may be acceptable in lieu of the development of more expensive energy sources. The National Energy Policy Plan, submitted by the Department of Energy to Congress in July, actually states:

A low level of U.S. oil imports at any cost is not a proper criterion for the nation's energy security and economic health The Nation would be remiss if it did not press the search for less expensive domestic alternatives. Yet its vision would be equally narrow if market forces were distorted through indiscriminate subsidies for alternatives that cost more than imported oil now . . .

This philosophy has translated into lukewarm support by the Reagan administration for the Federal synthetic fuels program and the repudiation of policies to mandate or encourage energy conservation—policies enacted with overwhelming bipartisan support during the 96th Congress. Promising energy research and development programs, such as coal liquefaction, advanced solar technologies and cogeneration, have suffered drastic budget cuts. The administration has terminated four synfuel demonstration projects, including SRC II. and funding for the remaining SRC I project is at a minimal level. The Synthetic Fuels Corporation is not even operational because all of the six members of the board of directors have not been appointed. As a result, decisions on funding for most synfuels projects have been inordinately delayed.

The oil glut psychology may afford the Nation the temporary luxury of imagining that it is possible to return to the good old days when oil was cheap and abundant, but the statistics belie this hope.

Production of oil in the United States is still declining, albeit, for the moment, at a slower rate. Many experts predict that the current frantic drilling pace will not be sustained in the long run, as promising fields are played out. Virtually every respectable energy forecast predicts that the level of U.S. oil production has begun an irreversible decline. This is in contrast to the unsubstantiated claims of Secretary Edwards that "somewhere along the way, we're going to find some big, big fields."

Even with the current market surplus, the oil companies are now saying that declining profits may demand increases in the price of gasoline of as much as 6 cents per gallon. The onset of the winter heating season, combined with announced cutbacks in OPEC production, may soon spell the end of the oil price respite that Americans have enjoyed for the last several months. Oil price hikes will almost certainly add heat to the inflation fires, causing the Consumer Price Index to soar once again.

The wrenching experiences of the past decade, with two recessions and unprecedented inflation resulting from oil shortages, should have caused us to recognize that oil supply interruptions are probable, if not inevitable. The shortterm price stability we are now experiencing does not reflect a corresponding political stability in the ever-volatile Persian Gulf region. Surely the economic and political dislocations which would result from a severe oil shock mandate the development of reasoned and responsible energy policies, rather than strict adherence to an economic philosophy of unproven reliability.

Some tough decisions lie ahead. Will nuclear power be promoted at the expense of the increased use of coal and the development of new energy technologies? How quickly should Federal lands be developed and is the energy to be found worth the attendant environmental risks? How do we provide for our industrialized allies, who will remain dependent on OPEC oil? And finally, how will we adjust for the transfer of wealth which is taking place within the economy and among regions of the country between producers and consumers of energy?

These are difficult questions for which no easy answers are forthcoming. It is easy to be distracted by small savings in price or production that can create a glut or a shortfall in world oil markets almost overnight. The Nation's economic and national security demand a balanced energy policy based on fact rather than unfounded speculation. We need an energy policy geared to improving the Nation's long-term security while preparing for sudden crises. Continued dependence on OPEC oil, at a cost of \$65 billion, \$70 billion or more a year, will not provide the basis for economic recovery and sustained growth. Moreover, our national defense will be undermined.

Mr. President, I yield the floor.

Mr. MATSUNAGA addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

THE APPOINTMENT OF A NEW NATIVE HAWAIIANS STUDY COMMISSION

Mr. MATSUNAGA. Mr. President, I am happy to announce that President Ronald Reagan today appointed a new Native Hawaiians Study Commission. My colleagues will no doubt recall that legislation providing for a study of the needs and concerns of native Hawaiians passed the Senate unanimously on two different occasions before it was finally enacted into law in December 1980. A ninemember study commission appointed by President Carter in January of this year was summarily dismissed by President Reagan in March, and the commission has since remained without members.

A General Accounting Office report, provided at my request in April, revealed that the study commission's primary mission is legislative in that it is required to report its findings and recommendations to the Congress. The GAO observed that the authority of the President of the United States to fire a commission that is primarily legislative and not an executive agency is limited. The Hawaii congressional delegation subsequently wrote to President Reagan, enclosing a copy of the GAO report and urging him to appoint a new commission. An indication that the President was preparing to comply with this request became evident when his political adviser, Lyn Nofziger, observed in Honolulu last month that the Native Hawaiians Study Commission was established by the Congress for legislative purposes and could not be unilaterally abolished by the Pres'dent.

Mr. President, I wish to congratulate and commend President Reagan for proceeding to aproint a new Native Hawaiians Study Commission. The native Hawaiian people are the only native Americans whose historic claims have not yet been considered by the Federal Government. They have waited nearly 90 years to present their case, and I am confident that the study authorized by Congress will shed light on the overthrow of the Hawaiian Monarchy in 1893 and recommend an equitable resolution of the claims of the native Hawaiian people.

The eight members of the Commission named today by President Reagan are:

First. Vice Chairman: Stephen Shipley, of Littleton, Colorado, an Executive Assistant to the Secretary of the Interior;

Second. Winouce Beamer, of Honolulu, Hawaii;

Third. H. Rodger Betts, of Makawao, Hawaii;

Fourth. Carol Dinkins, of Houston, Tex., the Assistant Attornev General for Land and Natural Resources, U.S. Department of Justice;

Fifth James Handley, of Springfield, Ill., a Special Assistant to the Secretary of Agriculture;

Sixth. Kina'u Boyd Kamali'i, of Honolulu, Hawaii;

Seventh. Diane Morales, of Houston, Tex., Deputy Assistant Secretary for Policy, Territorial and International Affairs, U.S. Department of the Interior; and Eighth. Glenn Schleede, of Potomac, Md., the Executive Associate Director of the Office of Management and Budget.

As a principal cosponsor and introducer of the resolution which created the Commission, I thank President Reagan in behalf of the people I represent in the Congress.

CONSUMPTION TAX

Mr. HART. Mr. President, given the deteriorating conditions in financial markets and the related bleak prospects for future deficits and interest rates, it is essential that the magnitude and timing of the personal income tax cuts be reconsidered. But the debate on our tax system should not stop there. The Reagan-Kemp-Roth cut in personal income taxes may be significant in dollar terms, but it is only an attempt to patch up a system that is basically flawed. The country's future economic health depends on genuine reform of the tax structure.

A principal element of that reform is to replace the current personal income tax code with a consumption tax. For several years, I have proposed we undertake this basic and essential reform. I am working on legislation which I intend to introduce this year, and I hope it will serve to stimulate debate on genuine tax reform.

A consumption tax system would impose a tax only on income that is consumed, and not on income saved or invested. Expenditures on consumption would be calculated indirectly as the difference between income and net saving. Net saving would be determined as the difference between the amount saved or invested in assets and the amount borrowed during the same period. The tax rate could be proportional or progressive, and would not be imposed on a subsistence amount of income (perhaps the first \$10,000) to allow for necessities and to protect the poor. The rate structure and the exemptions would be indexed to inflation.

A personal tax system based on consumption, which could be implemented within 5 years, has many advantages over our current tax code:

It encourages saving and investment. Savers pay no taxes on income directed into savings and investment until such funds are used for consumption. By exempting from taxes all income put into savings rather than just the income from savings as we do now, there are greater incentives to save and invest.

It is simpler. A household could easily report its income, plus changes in qualified assets—including financial assets, land, homes, and durable goods—and borrowing. We can do away with special forms and itemized deductions on expenses, tax shelters, "unearned" income, and so forth.

It is more equitable and removes inefficiencies and distortions in capital markets. The current tax code is littered with special preferences for tax-sheltered investments in oil wells, cattle herds, real estate, and so forth. These tax-shelter schemes increase after-tax incomes for those rich enough to afford them, but have almost no effect on gen-

erating new oil reserves, more beef, or a greater stock of rental housing. These distortionary tax preferences will be substantially reduced under the simplified list of assets qualifying as saving. Moreover, all saving will be treated equally.

As with major new ideas, there are unanswered questions and details which need to be resolved with this concept. We need to insure it will raise adequate revenues and not put a greater burden on working people than the current system does. There are also problems remaining in determining a fair, complete set of assets to be included as saving.

But it is clear our current complicated tax code needs a comprehensive overhaul. Patchwork and quick-fix schemes such as Reagan-Kemp-Roth may be very expensive but do not serve the long-term needs of this Nation. They only serve political expediency. If we are to recapture our role as world leaders in the 1980's, we must address our present problems with boldness, not bandaids.

Mr. ROBERT C. BYRD, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 3 P.M.

Mr. BAKER. Mr. President, there may be other business to be transacted by the Senate this afternoon. I do not expect, however, that any major item of legislation or other matter will be presented to the Senate. Indeed, there will be no more

votes today.

However, while we examine the prospect of other business to be conducted today, and perhaps an announcement about the schedule on Monday, I ask unanimous consent that the Senate now stand in recess until the hour of 3 p.m.

There being no objection, the Senate, at 2:37 p.m., recessed until 3 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HAYAKAWA)

The PRESIDING OFFICER. The Senate will come to order.

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate pro-

ceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that he had approved and signed the following acts and joint resolutions:

On August 4, 1981:

S.J. Res. 28. Joint resolution designating the week beginning March 7, 1982, as "Women's History Week'

On August 6, 1981:

S. 1040. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized as the Federal payment to the District of Columbia; and

S.J. Res. 64. Joint resolution designating August 13, 1981, as "National Blinded Veterans Recognition Day

On August 7, 1981:

S. 1104. An act to amend the International Investment Survey Act of 1976 to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes.

On August 14, 1981:

S. 547. An act to enable the Secretary of the Interior to erect permanent improve-ments on land acquired for the Confederated Tribes of Siletz Indians of Oregon;

S. 640. An act to amend the District of Columbia Self-Government and Governmental Reorganiztaion Act to extend the authority of the Mayor to accept certain interim loans from the United States and to extend the authority of the Secretary of the Treasury to

make such loans; S. 694. An act to authorize supplemental appropriations for fiscal year 1981 for the Armed Forces for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation, to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for such fiscal year, to authorize supplemen-tal appropriations for such fiscal year for construction at certain military installations, and for other purposes

S. 875. An act to authorize the generation of electrical power at Palo Verde Irrigation

District Diversion Dam, California, and S. 1278. An act entitled the "Saccharin Study and Labeling Act Amendment of 1981".

On August 20, 1981:

S.J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1879. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Eforts To 'mprove School Lunch Programs-Are They Paying Off"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1880. A communication from the Secretary of Agriculture, transmitting, pursuant to law, an evaluation of the Economic Emergency loan program; to the Committee on Agriculture, Nutrition, and Forestry. EC-1881. A communication from the Act-

ing Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Review of Financial Statements of Commodity Credit Corporation"; to the Committee on Agriculture, Nutrition, and For-

EC-1882. A communication from the Clerk of the United States Court of Claims, transmitting, pursuant to law, a certified copy of the Court's judgment in the case "Blackfeet Tribe of Indians v. the United States of America"; to the Committee on Appropria-

EC-1883. A communication from the Director of the Defense Security Assistance Agency. transmitting, pursuant to law, a report the Department of the Army's proposed letter of offer to Turkey for defense articles estimated to cost in excess of \$25 million; to the Committee on Armed Services.

EC-1884. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to the United Arab Emi-rates for defense articles estimated to cost in excess of \$25 million; to the Committee on Armed Services.

EC-1885. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a re-port concerning the Department of the Navy's proposed letter of offer to Saudi Arabia for defense articles estimated to cost in excess of \$25 million; to the Committee on Armed Services.

EC-1886. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Navy's proposed letter of offer to Saudi Arabia for defense articles estimated to cost in excess of \$25 million; to the Committee on Armed Services

EC-1887. A communication from th Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Saudi Arabia for defense articles estimated to cost in excess of \$25 million; to the Committee on Armed

EC-1888. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Air Force's proposed letter of offer to Oman for defense articles estimated to cost in excess of million; to the Committee on Armed Services.

EC-1889. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Less Costly Ways To Budget And Provision Spares For New Weeapon Systems Should Be Used"; to the Committee on Armed Services.

EC-1890. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to eliminate general or flag officer grade requirements from certain statutory positions. and for other purposes; to the Committee on Armed Services.

EC-1891. A communication from the Acting Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report with respect to converting the Dare County Bomb Range Operations functions at Seymour Johnson Air Force Base, N.C., and the decision that performance under contract is the most cost-offentian method. the most cost-effective method of accom-plishment; to the Committee on Armed

EC-1892. A communication from the Secretary of Commerce, transmitting, pursuant to law, the semiannual report on the extent of known and estimated compliance with the provisions of the Magnuson Fishery Con-servation and Management Act of 1976; to the Committee on Commerce, Science, and Transportation.

EC-1893 A communication from the Secretary of Transportation, transmitting, pursuant to law, the calendar year 1980 report on the activities of the Coast Guard under section 5 of the Port and Tanker Safety Act of 1978; to the Committee on Commerce, Science, and Transportation.

EC-1894. A communication from the Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, reports on the proposed use of certain NASA funds for two new 34-meter antennas; to the Committee on Commerce, Science, and Transportation.

EC-1895. A communication from the Secretary of the Interior, transmitting, pursuant to law, a notice on leasing systems for the Oil and Gas Lease Sale No. 60, Lower Cook Inlet/Shelikof Strait; to the Committee on Energy and Natural Resources

EC-1896. A communication from the Secretary of the Interior, transmitting, pursuant to law, the annual report of the U.S. Govern-ment Comptroller for the Virgin Islands on the Financial Condition of the Government of the Virgin Islands of the United States for the transition quarter and fiscal year 1979; to the Committee on Energy and Natural Resource

EC-1897. A communication from the Under Secretary of the Interior, transmitting, pursuant to law, five applications for refunds of excess royalty payments; to the Committee on Energy and Natural Resources. EC-1898. A communication from the Dep-

uty Secretary of Commerce, transmitting, pursuant to law, his comments and proposed actions to meet the budget level authorized for the Economic Development Administra-tion; to the Committee on Environment and

EC-1899. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "U.S. Laws And Regulations Applicable To Imports From Nonmarket Economies Could Be Improved"; to the Committee on Finance

EC-1900. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the statistical appendix to the annual report of the Secretary of the Treasury on the state of the finances fiscal year 1980; to the Committee Finance

EC-1901. REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HEINZ, from the Committee on Banking, Housing, and Urban Affairs: with amendments:

S. 868. A bill to amend the Export-Import

Bank Act of 1945 to authorize the Bank to engage in the use of extraordinary measures of export finance to counter and ultimately discourage the use of such measures by other major trading countries (together with additional views) (Rept. No. 97-188).

EXECUTIVE REPORTS OF COMMITTEES

following executive reports of comm!ttees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources

Robert P. Hunter, of Virginia, to be a member of the National Labor Relations Board for the term of 5 years expiring August 27, 1985.

(The above nomination was reported from the Committee on Labor and Human Resources with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Sen-

REFERRAL OF S. 1598

The bill (S. 1598) to establish a National Commission on Interest Rates, introduced by Mr. STENNIS (for himself and Mr. SASSER), on September 9, 1981, and held at the desk by unanimous consent, was read twice, and referred to the Committee on Banking, Housing, and Urban Affairs.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PERCY (by request):

S. 1611. A bill to amend Public Law 90-553, to authorize the transfer, conveyance, lease and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes; to the Committee on Foreign Relations.

By Mr. EAGLETON: 1612. A bill to establish a trust fund which is financed from revenues from the windfall profit tax and which is used as a reserve for the Social Security Trust Fund, and for other purposes; to the Committee on Finance.

By Mr. DECONCINI:

S. 1613. A bill to confer jurisdiction on the United States Court of Claims with re-spect to certain claims of the Navajo Indian Tribe; to the Select Committee on Intelli-

By Mr. INOUYE: S. 1614. A bill for the relief of Drs. Benja-min C. and Paulita M. Mahilum; to the Committee on the Judiciary.

By Mr. HART:

S. 1615. A bill to provide that the individual income tax rate reductions provided by the Economic Recovery Tax Act of 1981 shall not take effect until the Federal budget

is balanced; to the Committee on Finance. By Mr. HAYAKAWA (for himself, Mr. INOUYE, Mr. SPECTER, Mrs. HAWKINS,

and Mr. CRANSTON):

S. 1616. A bill to enable producers and importers of flowers and plants to establish, finance, and carry out a coordinated program of research, producer and consumer information, and promotion to improve, maintain, and develop markets for flowers and plants; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY (by request):

1611. A bill to amend Public Law 90-553, to authorize the transfer, conveyance, lease, and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes; to the Committee on Foreign Relations.

INTERNATIONAL CENTER ACT

o Mr. PERCY. Mr. President, by request, I introduce for appropriate reference a bill to amend the International Center Act which would expand and bring to completion the planned International Diplomatic Center.

This legislation has been requested by the Department of State and I am introducing the proposed legislation in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD, together with the letter from the Assistant Secretary of State for Congressional Relations to the President of the Senate dated August 25, 1981.

There being no objection, the bill and letter were ordered to be printed in the

RECORD, as follows:

8. 1611

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first section of the Act approved October 8, 1968 (Public Law 90-553, 82 Stat. 958), is amended-

(1) in the first sentence by striking out "sell or lease" and inserting in lieu thereof: "develop in coordination with the Administrator of General Services for, or to sell, ex-

change, or lease,";
(2) by striking out "Van Ness Street, Reno Road, and Tilden Street" and inserting in lieu thereof: "Yuma Street, 36th Street, Reno Road, and Tilden Street, except that portion of lot 802 in square 1964, the jurisdiction over which was transferred to the District of Columbia for use as an educational facility"; and

(3) by striking out "he" and inserting "the

Sec. 2. Section 2 of such Act of October 8, 1968 (Public Law 90-553), is amended to read as follows:

"SEC. 2. Upon the request of any foreign overnment or international organization government and with funds provided by such govern-ment or organization in advance, the Administrator of General Services is author-ized to design, construct, and equip a headquarters building or legation building or related facilities on property conveyed pur-suant to the first section of this Act".

SEC. 3. Section 3 of such Act of October 8, 1968 (Public Law 90-553), is deleted, and sections 4 to 6 of such Act, inclusive, are renumbered as sections 3 to 5, including references thereto. The first sentence of re-

numbered section 3 is amended to read as follows "The Act of June 20, 1938 (DC Code, secs. 5-413 to 5-428), shall not apply to buildings constructed on property transferred or conveyed pursuant to this Act including section 3 of this Act as in effect January 1, 1980.".

Sec. 4. Section 4 of such Act of October 8,

1968 (Public Law 90-553), as renumbered by

this Act is amended by—

(1) inserting "demolition or removal of existing structures, site preparation, and the" immediately after "The";
(2) striking out "and" immediately before

"(d)";
(3) inserting "(e) other utilities, and (f) plish the purposes of this Act," immediately after "the fire alarm system,"; and

inserting "or contiguous to" after

SEC. 5. Section 5 of such Act of October 8, 1968 (Public Law 90-553), as renumbered by this Act is amended by-

(1) inserting ", exchange," after "sale" in the first sentence, and by inserting ", exchanges," after "sales" in the second sentence thereof; and

(2) adding at the end thereof the follow-

ing:
"The Secretary may retain therefrom a reserve for maintenance and security of those public improvements authorized by this Act which have not been conveyed to a government or international organization under the first section of this Act, and for surveys and plans related to development of additional areas within the Nation's Capital for chancery and diplomatic purposes. Amounts in the reserve will be available only to the extent and in such amounts as provided in advance in appropriations Acts."

SEC. 6. The Act of October 8, 1968 (Public Law 90-553), is further amended by adding at the end thereof the following new section:

"Sec. 6. This Act may be cited as the 'International Center Act'".

DEPARTMENT OF STATE Washington, D.C., August 25, 1981. Hon. George Bush,

President of the Senate. Washington, D.C.

DEAR Mr. PRESIDENT: Enclosed for your consideration and appropriate reference is a legislative proposal to amend the International Center Act (Public Law 90-553, enacted on October 9, 1968) which would expand and bring to completion the planned Interna-tional Diplomatic Center within the fed-erally-owned Bureau of Standards site at Van Ness Street and Connecticut Avenue in northwest Washington, D.C. This project. with the amendments proposed herein, will be con:pleted without cost to the American taxpayer.

This legislation was previously introduced in the House (H.R. 6550) and the Senate (S. 2302) during the 96th Congress, and was passed by the House with amendments (House Report 96–1208, July 30, 1980). Senate action, however, was unable to be completed before the end of the last session. The legislation proposed herein is the same as the Bill passed by the House, with an additional amendment to extend the time in which project-related costs can be funded from surplus lease proceeds, to the extent provided

for in appropriations acts.

The need for this legislation has become pressing. The United States Government, as part of its international obligations, is required to assist foreign governments to obtain suitable premises for chanceries in the nation's capital. Of equal importance, there is a growing need for reciprocity involving the substantial problems of the United States missions overseas. The Department of State is currently unable to meet its obligations due to the unavailability of suitable chancery sites in Washington because of security, costs, and restrictive zoning problems. This situation has created an adverse impact on our national security interests and the ability of the United States to support our needs abroad.

The planned Diplomatic Center is intended to partially alleviate the critical shortage of suitable space for location of chanceries and related facilities of foreign governments in the nation's capital. The project is currently under development, and sites for ten governments have been completed by the General Services Administration. It is anticipated that all presently available space for chanceries at the Center will be reserved by the end of 1982.

The Department urges your support of the legislation and requests that consideration be given to its expeditious passage.

The Office of Management and Budget has advised the Department that there is no objection to the submission of this proposal to the Congress, and its enactment would be consistent with the Administration's objec-

Yours sincerely,

RICHARD FAIRBANKS. Assistant Secretary for Congressional Relations.

By Mr. EAGLETON:

S. 1612. A bill to establish a trust fund which is financed from revenues from the windfall profit tax and which is used as a reserve for the social security trust fund, and for other purposes; to the Committee on Finance.

SOCIAL SECURITY RESERVE TRUST FUND

Mr. EAGLETON. Mr. President, I am introducing today a bill to earmark \$50 billion of the revenues from the oil windfall profits tax to serve as a social security reserve trust fund.

The purpose of this fund will be to serve as a cushion for the three social security programs against unforeseen economic adversities of the kind which created the system's present short-term difficulties.

Frankly, I do not anticipate that much, if any, of this windfall reserve will be needed to finance current expenditures, assuming authorization of in-terfund borrowing. Nevertheless, given the untried and highly suspect nature of this administration's economic recovery program, I think it is prudent to prepare against every eventuality.

My bill provides that such part of the reserve as is not required to cover benefit outlays be invested in the highestyielding Government or Governmentbacked securities. In this regard, the reserve should prove to be a valuable source of income for the social security trusts.

Mr. President, as is apparent, the bill am introducing provides for a form of general revenue sharing with the social security system. I am not persuaded in the least by arguments that such an approach would depart from the original purpose of social security which was to establish a self-financed old age retire-ment system. That argument should have been made in 1956, when we grafted onto the retirement purpose of the system the disability program and in 1965, when we added medicare. Clearly, those add-on programs are needed, but provisions should have been made at the time for offset financing from general revenues.

Having acknowledged the similarities with other general revenue proposals, I want to underscore the important differences between my bill and others.

First, the most common objection to using general revenues to assist social security is that the same wage earner pays both social security and general taxes. In effect, using general revenues is a back door way of raising payroll

That objection does not apply to the use of windfall tax revenues. That tax is paid only by oil producers and, given the ceiling price enforced by OPEC competition, the tax is not and cannot be

passed on to the consumer.

Second, unlike other taxes, the windfall tax expires by law in 10 years, or when \$227 billion has been collected. Thus, my proposal involves only a temporary infusion of outside funds and is not a permanent departure from the goal of making social security a self-

sufficient system.

Finally, Mr. President, the real choice we face regarding the windfall tax revenues is not whether we use some part of them for social security but whether we use them at all-whether we do not simply give them back to the oil companies. That seems to be the inclination of this administration and its allies in Congress. The last tax bill saw \$33 billion in tax breaks for oil companies which hardly meet the test of "truly needy." During Senate debate, an amendment was offered to phase out or repeal the windfall tax for new oil, heavy oil, and certain other kinds of oil. The total price tag was estimated at between \$40 and \$50 billion. That amendment actually had a majority on a test vote but was withdrawn for tactical reasons. I have no doubt, however, that efforts to kill this tax will be renewed.

Mr. President, originally the windfall tax revenues were to be earmarked for specific purposes related to conservation and development of new energy resources. In fact, the funds have never been earmarked. They are separately accounted for by the Treasury but, after that, go into general revenues for gen-

eral purposes

My bill will assure that about 20 percent of these revenues go for the specific objective of firming up the social security system. I find this an entirely fitting and even ironic use of the oil tax funds, given the role of runaway energy prices in creating the stagflation which has impacted so heavily on the budgets of re-tired citizens and on the financial health of the social security system itself.

Mr President, I am convinced that the bill I am introducing today, taken to-gether with interfund borrowing, will erase the short-term problems of the social security trusts. As opposed to the radical benefit cuts advocated by some in this administration, I believe my bill will have the overwhelming support of those covered by the social security

I ask that the text of the bill I now send to the desk be printed at this point in my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SOCIAL SECURITY RESERVE TRUST FUND.

Title II of the Social Security Act is amended by inserting after section 201 the following new section:

"SOCIAL SECURITY RESERVE TRUST FUND

"SEC. 201A. (a) There is established in the Treasury of the United States a trust fund to be known as the Social Security Reserve Trust Fund (hereinafter in this section referred to as the 'Trust Fund') which shall consist of amounts transferred to the Trust

Fund under this section.

"(b)(1) There is appropriated to the Trust Fund for each fiscal year an amount equal to 25 per centum of the taxes imposed by section 4986 of the Internal Revenue Code of 1954 for such fiscal year, except that the aggregate amount appropriated to the Trust Fund under this paragraph for all fiscal years shall not exceed \$50,000,000,000.

The amount appropriated paragraph (1) shall be transferred to the Trust Fund by the Secretary of the Treasury at least quarterly on the basis of estimates made by the Secretary. Proper adjustment shall be made in the amounts subsequently transferred to the extent prior estimates were not equal to the amounts required to be transferred.

"(c) There is created a body to be known as the Board of Trustees of the Trust Fund (hereinafter in this section called the 'Board of Trustees') the members, Managing Trusand Secretary of which shall be the individuals serving as members, Managing Trustee, and Secretary of the Board of Trustees created under section 201(c). The Board of Trustees shall meet at least once each calendar year. It shall be the duty of the Board of Trustees to-

(1) hold the Trust Fund;

"(2) report to the Congress not later than the first day of April of each year on the operation and status of the Trust Fund during the preceding fiscal year and on its expected operation and status during the next five fiscal years;

"(3) report immediately to the Congress whenever the Board of Trustees is of the opinion that the amount of the Trust Fund

is unduly small; and

"(4) review the general policies followed in managing the Trust Fund, and recommend changes in such policies, including necessary changes in the provisions of the law which govern the way in which the Trust Fund is to be managed.

The report provided for in paragraph (2) shall include a statement of the assets of, and the disbursements made from, the Trust Fund during the preceding fiscal year, an estimate of the expected payments to, and disbursements from, the Trust Fund during each of the next five fiscal years, and a statement of the actuarial status of the Trust Fund. Such report shall be printed as a House document of the session of the Congress in which the report is made.

"(d)(1)(A) It shall be the duty of the Managing Trustee to invest such portion of the Trust Fund as is not, in his judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible interest yield, commensurate with the safety of the Trust Fund. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose such obligations may be acquired (i) on original issue at the issue price, or (ii) by purchase of outstanding obligations at the market price.

(B) The purposes for which obligations of a United States may be issued under the

Second Liberty Bond Act, as amended, are hereby extended to authorize the issuance at par of public-debt obligations for purchase the Trust Fund. Such obligations issued for purchase by the Trust Fund shall have maturities fixed with due regard for the needs of the Trust Fund and shall bear interest at a rate equal to the average market yield (computed by the Managing Trustee on the basis of market quotations as of the end of the calendar month next preceding the date of such issue) on-

"(i) all marketable interest-bearing obligations of the United States then forming

a part of the public debt,

"(ii) all marketable interest-bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United

"(iii) all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States;

except that where such average market yield is not a multiple of one-eighth of 1 per centum, the rate of interest of such obligations shall be the multiple of one-eighth of 1 per centum nearest such market yield.

"(C) The Managing Trustee may purchase other interest-bearing obligations of the United States or obligations guaranteed as to both principal and interest by the United States, on original issue or at the market price, where he determines that such purchase is necessary to secure the maximum possible interest yield, commensurate with the safety of the Trust Fund, and that such purchase is in the public interest.

"(D) The Managing Trustee shall secure such equipment and enlist the services of such experts as may be necessary for purpose of allowing the Board to make investments which will secure the maximum

possible interest yield.

"(2) Any obligations acquired Trust Fund (except public-debt obligations issued exclusively to the Trust Fund) may be sold by the Managing Trustee at the market price, and such public-debt obliga-tions may be redeemed at par plus accrued interest.

The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall credited to and form a part of the Trust Fund.

"(e) The Secretary shall transfer, out of any amounts in the Trust Fund, to the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, and the Federal Hospital Insurance Fund such amounts as may be provided by appropriation Acts.".

SEC. 2. APPLICATION WITH CRUDE OIL WIND-FALL PROFIT TAX ACT OF 1980.

Subparagraph (B) of section 102(c)(1) of the Crude Oil Windfall Profit Tax Act of 1980 is amended-

(1) by striking out the period at the end of clause (ii) and inserting in lieu thereof ". plus", and

(2) by inserting immediately after clause

(ii) the following new clause:

"(iii) any amount appropriated to the Social Security Reserve Trust Fund under section 201A(b)(1) of the Social Security

SEC. 3. APPLICATION WITH SOCIAL SECURITY ACT.

SEC. 201. (a) Section 201 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(1) There shall be transferred to the Federal Old-Age and Survivors Insurance Trust Fund and to the Federal Disability Insurance Trust Fund such amounts as may be appropriated for such purpose from the Social Security Reserve Trust Fund.".

(b) Section 1817 of the Social Security Act is amended by adding at the end thereof

the following new subsection:

"(j) There shall be transferred to the Trust Fund such amounts as may be appropriated for such purpose from the Social Security Reserve Trust Fund.".

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply to fiscal years beginning after September 30, 1981.

By Mr. DECONCINI:

S. 1613. A bill to confer jurisdiction on the U.S. Court of Claims with respect to the claims of the Navajo Indian Tribe; to the Select Committee on Indian Affairs.

JURISDICTION OVER CERTAIN NAVAJO

INDIAN CLAIMS

• Mr. Deconcini. Mr. President, the proposed legislation that I am introducing will require the U.S. Court of Claims to hear the merits of a group of claims against the United States filed in 1950 by the Navajo Tribe. These claims were filed pursuant to the Indian Claims Commission Act of 1946, alleging that the United States breached its legal and treaty obligations, as well as its general responsibility to deal fairly and honorably with the Navajo Tribe. The Navajo laims include allegations of mismanagement of tribal resources and specific breaches of the treaty.

Jurisdiction over the claims was accepted when they were filed in 1950, reaffirmed by the Indian Claims Commission in 1975 and at the trial level of the Court of Claims in 1978, following their transfer to that court under Public Law 95–69. Ultimately, the claims were dismissed on a further appeal by the Government, without reaching trial on the merits, when the Court of Claims in May 1979 decided on purely technical grounds that its jurisdiction was barred.

The technical dismissal was based on the purported withdrawal in 1969 of seven claims by a former claims attorney for the tribe. Even if the withdrawal occurred its validity is questionable because neither the Navajo Tribal Council nor the Secretary of the Interior approved it, which was a requirement in the claims attorney contract.

The Indian Claims Commission in 1975 permitted the seven claims to be put back in the petition by the present claims counsel because the factual allegations "which were the substance of those claims" had never been withdrawn. After the case was transfered to the Court of Claims, the trial judge to whom it was referred upheld the action by the Commission.

However, on June 13, 1979, the Court of Claims overturned the two previous decisions and held that the tribe was bound by its former counsel's voluntary dismissal of the seven claims 10 years previously.

The primary purpose of the Indian Claims Commission Act was to provide a forum where old claims by Indian tribes could be heard on their merits without regard to technical legal restrictions or jurisdiction. The Department of the Interior in recommending passage of the act urged that if those claims were ever

to be put to rest, the act must confer jurisdiction broad enough to avoid the lack of finality attending dismissal of a case by the Court of Claims on technical legal grounds without consideration of the claim on its merit. The Department therefore urged passage of the act to overcome the defect in the present system under which many of the claims of the Indians are precluded from a hearing on the merits, on technical legal grounds, even though the claims may be such as would challenge the conscience of a court of equity.

The Navajo Tribe was forced to wait nearly 100 years to present its claims to the Indian Claims Commission for a fair hearing. Now after 30 years of litigation, a fair hearing on a group of those claims has been denied. This bill merely carries out the intent of the Indian Claims Commission Act by insuring that these duly filed claims, like those of other Indian tribes, will have the hearing contemplated by the act.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1613

Be it enacted by the Senate and House of Be it enacted by the Sellett States of Representatives of the United States of Congress assembled, That not withstanding sections 2401 and 2501 of title 28, United States Code, or section 12 of the of August 13, 1946 (60 Stat. 1052; 25 U.S.C. 70k), jurisdiction is hereby conferred upon the United States Court of Claims to hear, determine, and render judgment on the claims of the Navajo Indian Tribe against the United States which were timely presented under section 2 of the Act of August 13, 1946 (60 Stat. 1050; 25 U.S.C. 70a) and later withdrawn without authority with respect to claims that (1) Navajo reservation lands were taken by the United States or disposed of to others without payment of adequate compensation; (2) the United States failed to fulfill Article 6 of the Treaty of June 1, 1868, 15 Stat. 667, and to deal fairly and honorably with the Tribe in providing educational facilities and services through August 13, 1946, and (3) that the United States mismanaged the lands and resources of the Tribe: Provided, that jurisdiction is conferred only with respect to claims accruing on or before August 13, 1946, and all such claims must be filed within six months after the date of the enactment of this Act.

By Mr. HART:

S. 1615. A bill to provide that the individual income tax rate reductions provided by the Economic Recovery Act of 1981 shall not take effect until the Federal budget is balanced; to the Committee on Finance.

LEGISLATION MAKING THE INDIVIDUAL INCOME
TAX CUTS CONTINGENT UPON BALANCING THE
FEDERAL BURGET

Mr. HART. Mr. President, the legislation I am introducing today, designed to address this Nation's rapidly deteriorating economic situation, would defer the massive personal income tax cuts passed by Congress earlier this year until the Federal budget is in balance.

Mr. President, it has been slightly more than 1 month since the Congress passed the administration's tax cut bill. Since then, interest rates have risen to record levels, bond prices have hit record lows, and stock values have dropped substant.ally. The impact of the adoption of the administration's tax cut bill is becoming only too clear.

Responsible observers have said for years that our first order of business should be to reduce the Federal deficit, then to cut taxes once the budget was in greater balance. This has been my position—a position first articulated in 1978 to make any future tax cuts contingent on sufficient cuts in Federal spending.

Based on the theory of "supply-side spending," however, this administration claimed such a cautious approach to controlling inflation was not necessary. Administration experts claimed that cutting taxes would not increase the deficit, but would, instead, actually create additional revenues and restore the health of our troubled economy.

We are now seeing that even the President does not believe this will be the case. Less than a month after hailing the passage of his budget and tax cut proposals, the President is now forced to admit more work needs to be done, and he is seeking further cuts in social programs or defense spending.

With the help of Congress, this administration has painted the Nation's economy into a corner. The options it is considering—large cuts in defense spending, reductions in social security benefits, a deficit higher than any we have seen in the last decade—are all unacceptable.

The only sensible solution is to delay the implementation of the so-called Kemp-Roth personal income tax cuts until the budget is balanced, and I am introducing legislation today for that purpose. Unless we delay the revenue loss of these tax cuts—projected to be \$26.9 billion in fiscal year 1982 alone—we only invite continued high deficits, high interest rates, and high inflation.

Mr. President, this is not only the concern of Democrats and those who opposed the President's plan. There is wide-ranging concern about the President's program from Wall Street, from his supporters in Congress, and from the public. Let me cite a few examples:

In the September 7, 1981, issue of Business Week, it was reported that:

The stock market and money markets are sending a message to the Administration that its program is not expected to work. The money markets are clearly saying that inflation will be worse than the government believes, while the stock market is also worrying about recession and its impact on earnings.

Secretary of Defense Caspar Weinberger commented in the September 14, 1981, issue of Newsweek that:

A lot of recognition that many of the (budgetary) estimates given to the President earlier are turning out to be wrong.

The Wall Street Journal reported today that:

Since Concress passed the tax bill, the Dow Jones industrial average has plunged more than 80 points, and bond prices have hit record lows.

The article also said that many on Wall Street now regret their role in helping the tax cut get passed.

Of greatest concern, of course, is the anticipated continuation of steep interest rates. Without a dramatic reduction in interest rates, there is the very real possibility that thousands of farms and businesses will go into bankruptcy in the near future. Few Americans can buy even an average-priced home at the interest rates we have seen this year, and the effects on the housing and automobile industries have been devastating.

How can we reverse the trend toward even higher interest rates and other negative indicators in the economy? We must reduce the Federal deficit in 1982. The Congressional Budget Office is now projecting a deficit next year of about \$65 billion, but that projection assumed somewhat brighter forecasts for interest rates, unemployment, and the rise in GNP than other, private forecasters have predicted.

I reject the administration's apparent view that the only way to tackle this deficit is to cut billions more from already hard-pressed domestic programs, or social security, or reduce our defense capabilities. The more direct—and more responsible—approach would be to delay the personal income tax cuts Congress passed earlier this summer.

We all know that a deficit caused by a tax cut damages the economy no less than a deficit caused by executive Government spending. As the financial experts point out, both kinds of deficits force the Government to compete for money that would otherwise be available to the private sector for business expansion, home buyers, and farmers and drives up interest rates.

Most Americans know that the tax cut is no bargain if it leads to record high deficits and interest rates. A tax cut of \$500 or \$1,000 will not do much for the potential homebuyer who is facing mortgage rates of close to 20 percent. A tax cut of \$500 will not do much for a farmer who cannot afford the cost of borrowing to keep his farm in operation.

Postponing the personal income tax cuts so soon after they were passed may be an unusual step, but I believe it is completely warranted given our current economic situation. I urge the administration to support this proposal and make it clear to the Nation that it is committed to restraining the Federal deficit and bringing down interest rates.

By Mr. HAYAKAWA (for himself, Mr. INOUYE, Mr. SPECTER, Mrs. HAWKINS, and Mr. CRANSTON):

S. 1616. A bill to enable producers and importers of flowers and plants to establish, finance, and carry out a coordinated program of research, producer and consumer information, and promotion to improve, maintain, and develop markets for flowers and plants; to the Committee on Agriculture, Nutrition, and Forestry.

FLORAL RESEARCH AND CONSUMER INFORMATION ACT

• Mr. HAYAKAWA. Mr. President, flowers and plants are an integral part of the American lifestyle. They contribute natural beauty, especially in urban areas, to what is an increasingly manmade, artificial environment. I feel very

fortunate to represent California, our Nation's No. 1 flower-producing State.

Today I am introducing a bill which would allow the floral industry to establish a promotion, research, consumer education, and marketing program. I do this with the hope that American growers will be allowed to decide if they wish to follow in the direction of other agricultural groups which have successfully utilized similar research and promotion programs.

Known as the "Floral Research and Consumer Information Act," or "Floraboard," my bill comes from the need of the industry to stimulate consumer demand for floral products. While floricultural production capability and product quality have both steadily increased, our domestic flower and plant industry continues to fall short of its potential in the marketplace. In fact, demand for flowers has remained constant for the past 6 years.

Yet other agricultural commodity groups have had similar problems. The egg, wheat, wool, cotton, and potato industries all faced trends of declining demand for their products. For these industries, research and promotion programs have been instrumental in reversing these trends.

I believe that my legislation will likewise provide the necessary assistance to the many small and medium-sized businesses that make up our domestic flower industry—at no cost to the taxpayer. Through "Floraboard," these businesses could pool their resources and accomplish together what they cannot do individually. The program would be financed by an assessment paid by producers.

The "Floraboard" is a program conceived, created, and directed by the industry. Because of a refund provision, this bill does not in any way force participation. Flowers and plants imported from other countries will not be limited. They will be assessed in the same manner as the domestic products and will share the benefits of the program.

The maintenance and expansion of existing markets and the development of new or improved ones is vital to all who work in, or are affected by, the floral industry. It is willing to use its own resources, both personal and monetary, to increase the demand for its products. The Floral Research and Consumer Information Act which I am introducing today will enable producers to band together for this purpose, and in this way, assure that the American public will have continued access to an adequate and affordable supply of quality plants and fresh flowers.

ADDITIONAL COSPONSORS

S. 52

At the request of Mr. HAYAKAWA, the Senator from Pennsylvania (Mr. Heinz) was added as a cosponsor of S. 52, a bill to amend the Clean Air Act to repeal the requirement that State implementation plans provide for periodic inspection and testing of motor vehicles.

S. 450

At the request of Mr. Matsunaga, the Senator from Maryland (Mr. Mathias) was added as a cosponsor of S. 450, a bill

to amend the Internal Revenue Code of 195½ to provide that the investment tax credit shall apply to the acquisition of work and breeding horses to the extent that the cost of such horses does not exceed \$100,000 for the taxable year.

At the request of Mr. Chafee, the Senator from New York (Mr. Moynihan) the Senator from Vermont (Mr. Leahy), the Senator from New York (Mr. D'Amato), and the Senator from Delaware (Mr. Biden) were added as cosponsors of S. 1018, a bill to protect and conserve fish and wildlife resources, and for other purposes.

S. 1096

At the request of Mr. Kasten, the Senator from Pennsylvania (Mr. HEINZ), the Senator from Illinois (Mr. FERCY), the Senator from Vermont (Mr. LEAHY). the Senator from Georgia (Mr. NUNN). the Senator from Ohio (Mr. METZEN-BAUM), the Senator from Tennessee (Mr. SASSER), the Senator from Illinois (Mr. Dixon), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from South Dakota (Mr. AbdNor) were added as cosponsors of S. 1098, a bill to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes.

S. 1181

At the request of Mr. Heinz, h's name was added as a cosponsor of S. 1181, a bill to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

At the request of Mr. Jepsen, the Senator from New York (Mr. MOYNIHAN), the Senator from Virginia (Mr. Warner), and the Senator from Phode Island (Mr. CHAFEE) were added as cosponsors of S. 1181, supra.

S. 1485

At the request of Mr. Roth, the Senator from North Carolina (Mr. Helms) was added as a cosponsor of S. 1485, a bill to amend section 21 of the act of February 25. 1920. commonly known as the Mineral Leasing Act.

SENATE JOINT RESOLUTION 59

At the request of Mr. ROBERT C. BYRD, the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Wisconsin (Mr. PROXMITE), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of Senate Joint Resolution 59, a joint resolution designating the square dance as the "National Folk Dance of the United States."

SENATE JOINT RESOLUTION 83

At the request of Mr. Chaffee, the Senator from Michigan (Mr. Levin), the Senator from Washington (Mr. Jackson), and the Senator from Minnesota (Mr. Durenberger) were added as cosponsors of Senate Joint Resolution 83, a joint resolution to authorize and request the President to call a White House Conference on Education not later than January 15, 1982, and for other purposes.

At the request of Mr. Hayakawa, the Senator from North Carolina (Mr. East),

and the Senator from New York (Mr. D'AMATO) were added as cosponsors of Senate Joint Resolution 93, a joint resolution to clarify that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services.

SENATE JOINT RESOLUTION 104

At the request of Mr. MELCHER, the Senator from Nevada (Mr. CANNON), the Senator from Michigan (Mr. Riegle), the Senator from Oklahoma (Mr. BOREN), the Senator from South Dakota (Mr. PRESSLER), the Senator from Kentucky (Mr. Huddleston), the Senator from Tennessee (Mr. Sasser), the Senator from Maryland (Mr. Sarbanes), the Senator from North Dakota (Mr. An-DREWS), the Senator from Alabama (Mr. HEFLIN), and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of Senate Joint Resolution 104, a joint resolution directing the President to consult with the Governors of the Federal Reserve System for the purpose of substantially reducing interest rates within the next 90 days.

SENATE JOINT RESOLUTION 106

At the request of Mr. ROBERT C. BYRD, the Senator from Arizona (Mr. Goldwater) was added as a cosponsor of Senate Joint Resolution 106, a joint resolution to authorize and request the President to designate June 20, 1981, as "Bicentennial Emblem Day."

SENATE CONCURRENT RESOLUTION 29

At the request of Mr. Hollings, the Senator from California (Mr. Cranston) was added as a cosponsor of Senate Concurrent Resolution 29, a concurrent resolution disapproving certain coastal zone management Federal consistency regulations.

SENATE RESOLUTION 198

At the request of Mr. Percy, the Senator from Michigan (Mr. Levin), the Senator from Michigan (Mr. Riggle), and the Senator from New Mexico (Mr. Domenici) were added as cosponsors of Senate Resolution 198, a resolution expressing the sense of the Senate that Benedict Scott (Vytautas Skuodis) be released from imprisonment in the Soviet Union.

SENATE RESOLUTION 200

At the request of Mr. Hollings, the Senator from Wyoming (Mr. Wallop) and the Senator from Utah (Mr. Garn) were added as cosponsors of Senate Resolution 200, a resolution expressing the sense of the Senate with respect to the scheduled meeting of the Interparliamentary Union in Havana, Cuba, in September 1981.

SENATE RESOLUTION 207

At the request of Mr. Denton, the Senator from South Carolina (Mr. Thurmond) was added as a cosponsor of Senate Resolution 207. a resolution to disapprove of District of Columbia Act 4-69, relating to the reform of the sexual assault laws of the District of Columbia, and for other purposes.

SENATE RESOLUTION 209—RESOLUTION RELATING TO SELECTION AND REPRESENTATION ON THE BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Mr. JEPSEN (for himself and Mr. Garn) submitted the following resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. RES. 209

Whereas the Board of Governors of the Federal Reserve System directly oversees the growth of the monetary aggregates, the availability of credit and monetary policy generally, all of which substantially affect every sector of the national economy:

Whereas the Federal Reserve Act of 1913, as amended, decrees that not more than one Governor shall be selected from any one Federal Reserve District, and that due regard shall be given to a fair representation of financial. arricultural, industrial, and commercial interests, and geographical divisions of the country:

Whereas the present composition of the Board does not conform to the spirit of these statutory provisions and no President since 1959 has appointed an individual from either the agricultural or commercial sector to the Board of Governors:

Whereas the impact of Federal Reserve policy is particularly significant on those constituencies which by law are to be represented on the Board:

Whereas small businesses constitute the largest part of the agricultural and commercial sectors of the economy;

Whereas the problem lies not with the statutory language of the Federal Reserve Act:

Whereas the United States Senate, in Senate Resolution 434, 96th Congress has already expressed its concern about past insensitivities to the requirements of the Federal Reserve Act; and

Whereas the next vacancy on the Board of Governors of the Federal Reserve System will occur January 31, 1982, and preparations for the nominations will commence soon; Now, therefore, be it

Resolved, that in recognition of the fair representation provision in the Federal Reserve Act of 1913, as amended, the President of the United States, the United States Senate and the Senate Committee on Banking, Housing, and Urban Affairs should assure that the specific provisions of the Federal Reserve Act providing for agricultural, commercial (including small business) and broad regional representation on the Board of Governors are, henceforth, followed.

Mr. JEPSEN. Mr. President, today I rise to submit a resolution which expresses the sense of the Senate that the President of the United States, the U.S. Senate, and the Senate Committee on Banking, Housing, and Urban Affairs, should pay careful deference to the specific provisions of the Federal Reserve Act that require diverse economic and regional representation on the Board of Governors of the Federal Reserve System, in considering nominees to that Board.

This measure, if adopted, will put the agricultural and commercial sectors, which play such a vital role in the economic life of our country, on notice that they will not be ignored when the next

vacancy on the Board of Governors occurs less than 4 months from today.

I cannot think of a more timely moment for the submission of this resolution. All of us in the Senate heard the same thing when we were back home over the recess: If interest rates do not come down, there will be serious repercussions by the end of the year. Failed businesses, people out of work, and general uncertainty about the economy will not be a cakewalk for any of us. We need to send a signal to the American people that we are doing something. Suggesting the nomination to the Board of Governors of the Federal Reserve of an agricultural or small business representative is an excellent first step. After all, these two groups currently have no say in the monetary policies which are affecting them more dramatically than any other group. It appears a good idea to give them that say.

Congress specifically acknowledged the contribution of those sectors in section 10 of the Federal Reserve Act of 1913, as amended. At the same time, it also recognized the need for regional diversity of the Board. The language of the original legislation is precise and unambiguous.

In selecting members to the board ... the President shall give due regard to a fair representation of financial, agricultural, industrial and commercial interests and the geographical divisions of the country.

That reads rather clear to me. The agricultural and commercial sectors have a statutory right to representation on the Board of Governors of the Federal Reserve System as do the different regions in the United States. That law has been consistently ignored. This is not a question of interpretation, but of fact.

Of the 60 individuals who have served on the Board of Governors longer than 6 months, only 7 can claim agricultural experience. In over 20 years, not one appointee has come from a farming background.

Since 1959, 23 individuals have been appointed to the Board of Governors. Four have had business experience; only one could legitimately point to a connection with American small business.

The consistent disregard of geographical divisions within the country is equally indisputable. Although many appointments over the years have technically conformed to section 10 of the Federal Reserve Act through place of birth, education or limited residence in diverse areas of the United States, the detailed biographies of past and present Governors supplied by the Federal Reserve paint a far different picture. Since 1959, almost half of the Board of Governors have been from the east coastthis judgment is made according to residence during the majority of each individual's professional life. A quarter can be called midwesterners, slightly less were from the South. Only 2 of 23 came from the Far West.

What this data tells us is plain enough. The Governors of the Federal Reserve System have traditionally been picked from the same vine. Approximately 13 of the last 23 members were educated at Ivy League schools-nine at Harvard University. Sixteen were either economists or bankers in their professional lives; three others were Government workers. The overwhelming majority lived on the east coast: The West was hardly represented at all. In other words, the intent of Congress has been ignored. We owe this change to the two groups who feel the impact of monetary policy most immediately-farmers and small businessmen.

How significant a role do they play in our economic life? The facts speak for themselves.

According to the Small Business Administration, 98 percent of American commercial businesses are classified as "small" enterprises. These 10.8-million individual businesses produce almost 40 percent of our gross national product and provide over 66 percent of all new jobs created each year in the United States.

Agriculture is an equally significant partner in the national economy. There are 3.4-million farmers in America. The sector directly employs 3.7-million people or 3.4 percent of the work force. An additional 19.2-million workers are employed in related fields—farm machinery, chemical fertilizer, natural fibers, food processing, and transportation—and depend almost exclusively on the farming community for their jobs. In 1980, agricultural production contributed 5.5 percent of the gross national product.

To summarize, farming and small commercial enterprises are directly responsible for almost half of the aggregate national income and some 53 percent of national employment. These are not small numbers. Agriculture and small business define the success or failure of our economic system. That success or failure is in turn closely tied to monetary aggregates and monetary policy generally. In the absence of credit, a farmer cannot plant a crop, a car dealer may have to cease operating, and a retailer depletes inventories.

With the highest interest rates in the history of our country threatening the survival of America's heartland, it is important that the Senate demonstrate a commitment to letting agriculture and small business have a say in the proceedings which determine those levels. I want to clarify exactly what the resolution does and also what it does not do.

It makes the statement that the U.S. Senate recognizes that the language of the Federal Reserve Act has not been strictly adhered to in the past and alerts those previously ignored groups that we want their active input in future formulations of monetary policy. Most importantly, it honors the role of agriculture and small business in the economy.

What the resolution does not do is equally important. It is not a statement

of monetary policy. It merely addresses an abuse of congressional intent. Nor does it in any way restrict the President's prerogative of nominating whom he chooses. It emphasizes only that the Senate feels certain regions and backgrounds have been ignored for too long. Neither does the resolution impinge on the jurisdiction of the Committee on Banking, Housing, and Urban Affairs. Again, legislative prerogative is respected.

Finally, the measure does not wed the Senate as a whole to any particular course of action. It puts us on record as wanting to correct inequities of the past—nothing more. It is a sense of the Senate resolution, not a binding legislative directive.

Last May, the Senate adopted Senate Resolution 434. Its intent was very similar to the one I am submitting today. Several events prompted my reconsideration of the issue. This is far from a redundant gesture.

To begin with, we have both a new President and a new Senate. It seems appropriate to reaffirm that at least on this issue the Senate has not changed its position dramatically. It is also proper to invite the participation of the many new Members who were not with us last May.

Second, I do not believe that the previous resolution was either as strong or as precise as it might have been. At a time when agriculture and small business are suffering more directly than other groups from monetary variables in the economy, it is important to give them a clear message of support.

Third, economic policy appears to lead the national agenda. Monetary questions, therefore, need to be addressed.

Finally, the issue is a timely one. In Business Week, it was reported that the administration has been discussing a replacement for the outgoing member for sometime now. Four months is not as far away as we might wish.

As a senior agricultural advisor to the President's transition team and as co-chairman of the Reagan-Bush Congressional Advisory Committee on Agriculture, I cannot deny a partisan interest in this subject. But that is not why I have submitted this measure. I have introduced it for the simple reason that the law provides for fair representation on the Board of Governors of the Federal Reserve System and that law has been ignored. It is not a monetary policy recommendation but simply a reaffirmation of what technically is already law.

If the Federal Reserve Act did not provide for the fair representation of financial, agricultural, commercial, and industrial interests and the geographical divisions of the country, neither Senator Garn nor myself wou'd be introducing this resolution. But that, in fact, is the language of the law and it should be respected. When four of five specific provisions in a statute show historical neglect, as in this case, it is time for the Senate to act. I ask my colleagues to join the Senator from Utah and myself in support of this resolution.

SENATE RESOLUTION 210—RESOLUTION TO COMPILE AND PRINT A HISTORY OF THE COMMITTEE ON THE JUDICIARY

Mr. THURMOND submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 210

Resolved, That a compilation of materials relating to the history of the Committee on the Judiciary be printed, with illustrations, as a Senate document, and that there be printed such additional copies not to exceed \$1,200 in cost of such document for the use of the Committee.

AMENDMENTS SUBMITTED FOR PRINTING

AGRICULTURE AND FOOD ACT OF 1981

AMENDMENT NO. 530

(Ordered to be printed and to lie on the table.)

Mr. MELCHER submitted an amendment intended to be proposed by him to the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

SURPLUS COMMODITIES TO NUTRITION PROJECTS

Mr. MELCHER. Mr. President, I am submitting an amendment today to provide surplus commodities to nutrition projects operating under the authority of the Older Americans Act and the schools. It would be an amendment that would be attached to the farm bill.

Very briefly, Mr. President, the amendment would provide that surplus commodities that we have in storage would be available for schools and senior citizens centers for their nutrition programs under a bonus situation.

I think it is a very timely type of amendment to offer at this time when we are cutting back on most of the Federal participation in school lunch programs and trying to hold, under the Older Americans Act, the appropriations for that program.

For the past 3 years USDA has provided bonus dairy commodities to schools serving school lunches free of charge—save for transportation costs—the schools can have all they can use without waste. OMB has been pressing to cease the bonus.

The Melcher amendment requires USDA to make bonus commodities available to schools and extends the bonus program to the elderly and expands the bonus program to all 416 price support commodities.

The amendment is important because: Schools need assurances of receiving bonus commodities. Currently the program is on a yearly basis. Schools are in a tight position financially. Deep budget cuts have resulted in losses in revenue at the local level. The 40 percent cut in per lunch assistance to 21½ cents jeopardizes the child nutrition programs. Bonus commodities will help schools

cope with cuts and keep their lunch programs in operation while helping farmers at the same time.

The elderly program will not be served by bonus unless required by legislation.

The elderly program provision includes a take home of cheese, nonfat dry milk, and butter. Legislation is needed to allow this without violating food stamp law.

The bonus program will operate only when there is a surplus.

American School Food Service Association supports and welcomes the amendment. Commodity distribution of dairy products is greatly increased by the bonus program. The National Milk Producers Federation supports and welcomes the amendment.

Mr. President, I ask unanimous consent that an editorial in today's Washington Post be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

SCRIMPING ON SCHOOL LUNCHES

The Agriculture Department proposed a regulation last week that was supposed to be helpful to the 94,000 or so schools now providing free or reduced-price meals to their students. With the budget cuts scheduled for Cctober, these schools will lose about \$1 billion in federal support for the school meal program.

Under the new law, some of this loss could be passed on to students by requiring those from families with yearly incomes of more than \$10,990 to pay somewhat more for their lunches. Current Agriculture Department regulations, however, require school meals to meet general nutritional standards. The price of food and labor costs being what they are these days, this means the schools would have to make up most of the reduced federal subsidy out of their own budgets—an alarming prospect to states and localities facing multi-billion-dollar losses in other forms of federal aid.

The Agriculture Department now proposes to ease this concern by the simple expedient of allowing the schools to provide poorer meals. While each school sets its own menus, the program's guidelines now aim to provide about one-third of a child's daily nutritional needs—a modest enough goal since the school lunch is the main meal for many children. Translating this nutritional standard into edible meals was never easy, and when you realize that schools now pay between \$1.30 and \$1.65 per meal—including costs of preparation and serving—you will see what they are up against.

Now comes the new regulation. Its main effect would be to reduce the minimum required quantities of each food group—less meat, vegetables and so on. Schools would also be given more flexibility in planning menus, and paper work would be cut. These changes, the administration estimates, would save schools about \$350 million a year.

The possibility of the new diets coming up a little short on this vitamin or that doesn't worry us as much as it probably should—we always suspected the school lunchroom's clientele left the Brussels sprouts on the plate anyway. And it seems sensible to try to simplify the thankless job of attempting to feed reasonably palatable and sustaining meals to hordes of youngsters whose palates have been trained on a diet of fast food. It was when we got down to the specified food quantities that we came to harbor the gravest doubts. We'll give you one example.

For the average kindergarten child the new daily menu would require only the following: four ounces of milk (that's half an average glass), one-half a piece of bread (not allowing for the part that ends up on the floor), one-half cup of fruit or vegetable, and one ounce of meat (a quarter of a modest-sized hamburger). We don't know what would happen if the little ingrates had the temerity to ask for more.

Of course, as the administration hastens to add, the schools wouldn't have to be this chintzy. They could maintain their standards and make up the difference from their own pockets. Some schools, however, would surely cut back, and these are likely to be in areas where local budgets are most limited and poverty is most entrenched. We know that balancing the budget won't be easy, but surely the nation—awash in government-supported surpluses of grain and dairy products—can afford a full glass of milk and a whole piece of bread for every child.

Mr. MELCHER. Mr. President, I ask unanimous consent that the amendment be printed in the Record.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 136, between lines 9 and 10, insert the following new section 107:

"DISTRIBUTION OF SURPLUS COMMODITIES"

"Sec. 107. Notwithstanding any other provision of law, whenever government stocks of surplus commodities acquired under the price support programs under sections 210 and 416 of the Agricultural Act of 1949 exceed amounts needed to fulfill requirements for distribution to domestic commodity programs and commitments for food aid under the Agricultural Trade Development and Assistance Act of 1954, and amounts anticipated to be purchased by the commercial trade under the Commodity Credit Corporation's unrestricted resale program, such commodities shall be made available without charge or credit to nutrition projects under the authority of the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.) and to schools providing food service. Such distribution may include bulk distribution to congregate nutrition sites and to providers of home delivered meals under the Older Americans Act. The Commodity Credit Corthe Older poration is authorized to use available funds to operate the program under this section and to further process products to facilitate bonus commodity use."

AMENDMENTS NOS. 531 THROUGH 533

(Ordered to be printed and to lie on the table.)

Mr. GRASSLEY submitted three amendments intended to be proposed by him to the bill S. 884, supra.

NOTICES OF HEARINGS

SUBCOMMITTEE ON FEDERAL EXPENDITURES, RESEARCH, AND RULES

Mr. DANFORTH. Mr. President, the Subcommittee on Federal Expenditures, Research, and Rules of the Committee on Governmental Affairs will hold a hearing on Friday, September 18, 1981, to consider S. 719, the Consultant Reform and Disclosure Act of 1981. The hearing is scheduled to begin at 9:30 a.m. in room 3302 of the Dirksen Senate Office Building. The hearing was previously scheduled for September 17.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. DOMENICI. Mr. President, I would like to announce for the information of the Senate and the public the

scheduling of public hearings before the Subcommittee on Energy Research and Development.

On Monday, September 21, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the Subcommittee will hold a hearing to consider the Department of Energy's photovoltaic program.

On Friday, September 25, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the Subcommittee will hold a hearing to consider the viability of the domestic uranium mining and milling industry.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Research and Development, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510. For further information regarding

For further information regarding these hearings you may wish to contact Mr. Paul Gilman of the Subcommittee staff at 224-4431.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, that S. 1605 has been added to the agenda of the subcommittee hearing scheduled for Thursday, September 17 at 10 a.m. in room 3110 of the Dirksen Senate Office Building. S. 1605 provides for the reinstatement and validation of U.S. oil and gas lease numbered E.S. 20644.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224–4236.

Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy and Mineral Resources.

The subcommittee will continue consideration of S. 1542, a bill to amend the Mineral Lands Leasing Act of 1920, on Thursday, October 1, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy and Mineral Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224-4236.

Mr. President, I would like to announce for the information of the Senate and the public that the subcommittee hearing previously scheduled for Tuesday, September 15 at 10 a.m. to consider S. 1516, to amend the Geothermal Steam Act of 1970, has been postponed until a later date.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce for the information of the Senate and the public that the Senate Small Business Committee will hold a second day of hearings on interest rates and business credit needs on Thursday, September 24, 1981. The first day of hearing on this subject will be held on Wednesday, September 23, 1981.

The hearings will convene on both days at 9:30 a.m. in room 424 of the Russell Senate Office Building. Senator

WEICKER will chair.

For additional information please contact Jim O'Connell of the committee staff at 224-5175.

SUBCOMMITTEE ON ENERGY REGULATION

HUMPHREY. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Subcommittee on Energy Regulation. These oversight hearings to consider the implementation of title I of the Natural Gas Policy Act of 1978 will be held on Monday, November 2 and Tuesday, November 3, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, Subcommittee on Energy Regulation, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. Howard Useem or Ms. Marilyn Burkhardt of the subcommittee staff at 224-

5205.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Environment and Public Works Committee be permitted to meet during the session of the Senate today, September 11, for a markup on the Clean Water Act Amendments of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Energy and Natural Resources Committee be authorized to meet during the session of the Senate on Friday, September 11, to hold a hearing of S. 1542, to repeal section 2C of the mineral leasing act of 1920.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE FEDERAL RESERVE BOARD

• Mrs. HAWKINS. Mr. President, interest rates are at record levels at least in

part because of policies of the Federal Reserve. It is time for a change.

Let me give you some history on the Federal Feserve. It was established by Woodrow Wilson in December 1913 under the Federal Reserve Act to contribute to the attainment of U.S. economic and financial goals through its ability to influence the availability and cost of credit in the economy.

The Federal Reserve is the Nation's central bank. As such, its major role is to assure that money and credit growth over the long run is sufficient to provide for an improving standard of living for all Americans. In the short run, Federal Reserve policies aim at combating inflation or deflation.

The Board of Governors is at the apex of the Federal Reserve System. The Board formulates monetary policy and supervises and regulates some banks. Currently, the seven-member Board is appointed by the President, on approval of the Senate, to staggered 14-year terms. The Chairman is appointed for a 4-year term. Recently, however, Congress required confirmation of the Chairman as Chairman and the Vice Chairman as Vice Chairman.

That is the current structure: however, under the original act, the President appointed five members to the Board and two of these were the Secretary of the Treasury and the Comptroller of the Currency. In the 1930's, an attempt was made to make the Federal Reserve more "independent" of the President and more responsive to Congress.

The restructuring which occurred in the 1930's saw both the Secretary of the Treasury and the Comptroller of the Currency dropped from the Board, and its size increased from five to seven members. Terms for members were lengthened, and Senate confirmation was required.

A main question is whether the monetary authority should be responsive to the President and the President's policies, or should be apart from or independent of, the President. We must have a stable currency and that cannot occur with interest rates at their now impossible levels.

It is time for a change in the structure of the monetary authority of the United States.

That is why today I am calling for immediate and positive legislative action to restructure the Federal Reserve Board. I am calling for an increase in the size of the Board and a shortening of the length of their terms

My proposal to restructure the Federal Reserve includes increasing the number of members to insure that the broad cross-section of America's economy is represented. For too long the Federal Reserve has been responsive only to Wall Street. It is time it listened to those of us on main street.

At the same time, I strongly support the need for a full inquiry into the structure and workings of monetary authority. The aim of the inquiry would be to strengthen the institutional ability to

manage the money supply of the United States.

GEORGETOWN, DEL., ALL STARS MAKE A WORLD-CHAMPION COMMUNITY

Mr. BIDEN. Mr. President, on August 22, 1931, the Georgetown, Del., senior little all stars—the first Delaware team to compete in the Senior Little League Basebail World Series-gave Delaware its first world championship by winning the series playoffs in Gary, Ind.

The people of Georgetown-a town of 1,710 which is the county seat of Sussex County, the southernmost of Delaware's counties-are understandably three proud of the victory of their all-star team. The young members of the team themselves deserve the pride they feel in their hard-won accomplishment. They have won the acclaim of all of the people of Delaware.

But, Mr. President, as impressive as it is for a small, essentially rural community like Georgetown and as small a State as Delaware to win a world championship, I believe that victory represents something more than a good day on the playing field for a baseball team.

It represents, in the first place, the willingness of a group of youngsters and their coaches and managers to dedicate themselves to the time-consuming hard work that results in a championship performance in a highly competitive enter-prise. The record of the Georgetown all stars reminds us that there are not shortcuts to excellence-and that excellence is within the reach of any community, large or small, that will make the investment required to achieve it.

We should not forget, Mr. President, that to a significant degree such a victory represents the involvement of an entire community—not only of the young players who brought the world championship home to Delaware, but also of their families, their coaches and the people of Georgetown who supported them so warmly throughout the competition.

In a time when the headlines seem to focus only on the problems our young people face, it is more important than ever to provide youth with the constructive challenges that develop character and self-discipline and with the opportunity to learn that those values are deservedly a permanent American heritage. Strong, healthy individuals who become good citizens are the product, most of all, of their own families and communities. If we expect our young people to compete successfully in all of life's arenas, we must do everything within our power to cultivate and support the families and communities that are the backbone of America.

I believe, Mr. President, that in this light the Georgetown senior little league all star baseball team, their families and coaches, and all of the people of the Georgetown community are world champions and an example all Americans can treasure and admire. They have reas-sured us that the traditional American values still survive and succeed among

RIPPLES AND WAVES IN THE NATIONAL SECURITY TIDAL BASIN

 Mr. GOLDWATER. Mr. President, the August 1981 issue of the Armed Forces Journal contains an excellent article by the editor of Armed Forces Journal, Mr. Benjamin Schemmer. We are now making an effort to put this Nation's military forces back on their feet but a recent television production by CBS and a new book on national defense by James Fallows would have you believe that the effort is completely misdirected. Ben Schemmer has stirred up a few hornet's nests around this town and I hope that he gets some attention with this article. He makes good sense and points out clearly that Fallows, CBS, and others have provided: "A simplistic view of an enormously complicated problem in a world that is uncertain, uneasy and unpredictable."

Mr. President, I urge that every Senator take the time to read this clear-cut, hard-hitting article written by someone who really knows the defense business and who does his homework. I ask that the full text of Mr. Schemmer's article be printed in the Record.

The article is as follows:

RIPPLES AND WAVES IN THE NATIONAL SECURITY
TIDAL BASIN

(By Benjamin F. Schemmer)

The hot topic in American journalism today is "national defense." As Ronald Reagan and Defense Secretary Caspar Weinberger begin to "rearm America," our TV sets, newspaper op-ed pages, and favorite magazines warn us that the trillion and a half dollars they plan to spend defending us over the next five years won't buy much more security because the Pentagon inevitably will foul things up.

That's true. Just like our lawyers, our stockholders, and (less occasionally) our doctors. (I'm still trying not to pay for a set of chest X-rays which a local hospital took when I went to the emergency ward one day for a bad gash in my knee.) A trillion and a half dollars is a lot of money, and it makes good copy at a time when the public wonders if new tanks will come only at the expense of social security and welfare checks; it makes even better copy when the tanks and planes and submarines don't quite work as advertised, but cost from a million to a billion dollars each.

Defense has become such a popular topic that CBS TV News late in June devoted an unprecedented five consecutive, prime-time, one-hour specials to the subject.

Regretfully, many of the pundits bringing you all this insight into how well the President and his generals are going to defend you don't know their ass from their elbow. Take Dan Rather's "hype" on CBS TV Evening News on Wednesday, June 17th for Richard Threikeld's "complete investigation" of the military/industrial complex that CBS aired at 10 o'clock that night. He showed a dramatic clip of the Air Force's F-16 fighter with this voice-over: "The planes used by the Israelis to bomb Iraq were US F-16s, developed by General Dynamics. They are widely acknowledged to be the world's best fighter-bombers; they are also the most expensive, technologically sophisticated and requiring massive maintenance."

Airmen the world over must be wondering whom CBS polled to conclude that the F-16 is the "world's best fighter-bomber"—good though it is. Dispassionate pilots debate such issues to no end, and even General Dynamics has never flaunted such a claim

for the F-16—although it may now that Dan Rather has pronounced it Gospel.

CBS VERSUS THE FACTS

But while that description of the F-16 is debatable, CBS' first statement that it is also the world's "most expensive" fighter-bomber is not: it is just plain wrong. In fact, the F-16 may be the world's cheapest fighter-bomber. (Northrop's F-5 costs us less, but the US doesn't use it except in small numbers to simulate Soviet Mig-21s for realistic air-to-air training.) An F-16 bought in this year's defense budget costs about \$14-million in so-called fly-away prices (without spare parts or amortizing research and development costs); an Air Force F-15 costs about \$28-million; the Navy's F-18 costs about \$34-million; the British-German Tornado (its embassies here claim) costs about \$23-million.

CBS must have worked hard to make that error; ones that far off base don't come easy. I can't think of anyone anywhere in the world who would call the F-16 the world's "most expensive" fighter-bomber.

CBS was right on, however, when it said the F-16 is "technologically sophisticated." That's one reason it performs so well. Every time it (and the F-15 and F-18) flew at the Paris Air Show in June (usually just before or after the French demonstrated their new Mirage 2000 and Mirage 4000 delta-wing fighters), the president of Dassault Aviation must have turned to his chief engineer and asked him, "What's wrong with you?" (As Time magazine's aerospace specialist, Jerry Hannifin, said of the Mirage when we watched it mush around in wide, high-speed turns one day, "I think the French have finally perfected the F-102." Hannifin was referring to the delta-wing US interceptor which first flew in 1953 but is now being used for target practice.)

As for the F-16's "massive maintenance," the plane had the third lowest maintenance man hours per flight hour of all eight USAF first line fighters or bombers last year. And that was its first year of operational use. Its design goal is 25 maintenance man hours per flight hour—once the plane and its spare parts pipeline are "mature": in its first year of operational use ending last September 30th, the F-16 beat that goal by 17 percent.

So why did CBS use the description, "massive maintenance"? Was it to back up Dan Rather's contention, when he introduced Threlkeld's "complete investigation" that what is "disturbing" about the "one-point-three trillion dollars" we will spend to defend ourselves in the next five years, "besides the cost, is that many of the weapons we're already building don't work as well as they're supposed to"?

THE JAIL CELL DOGFIGHTS

Later in the broadcast, Threlkeld cited results of the Air Force/Navy "ACEVAL" tests at Nellis Air Force Base, NV, six years ago to contend that "high technology is not much help" in the air-to-air combat arena, suggesting that we should be aiming for "quantity over quality." He called ACEVAL "the most realistic dogfight in American history."

That's not what the pilots flying those tests said of it. The final chart of their briefing said simply, "ACEVAL Bottom Line: The tests did not achieve the objective of quantifying the influence of numbers versus performance on the outcome of the engagements." In fact, the pilots objected repeatedly and strenuously that the dogfights were limited to day-only visual flight rules, thus

¹Even adding inflation projected for the years ahead, the cost of the US planes will decrease from 23 percent to 50 percent because of "learning curve" effects as more are built and, in some cases, more efficient production rates are achieved.

totally negating the impact of all-weather radar and weaponry which the "technologically sophisticated" F-15, F-14, and F-18 carry, and which the F-16 will. (At no time in the tests, for instance, was the F-14 ever allowed to use the full capability of its longrange radar, around which the plane is designed; or even turn it on until it got within the "ring" for close-in engagements. Thus, its long-range Phoenix missiles [which account for much of the plane's unique capabilities and cost] were of no advantage whatsoever. To the contrary, they became dead weight, degrading the plane's ACEVAL performance.)

The ACEVAL pilots also objected because they were not allowed to "engage" their opponents until the "enemy" had been visually identified (a rule of engagement that Robert McNamara and Lyndon Johnson imposed on US aircrews flying over North Vietnam, and one reason the US spent three years, 22-billion dollars, and 3,091 lives—after the Paris peace talks began—to oring home 566 American prisoners of war from the dungeons of Hanoi.) The visual identification requirement further nullified any advantage of the technology that differentiates planes like the F-14, F-15, and F-16 from ones like the F-5 and Mirage 2000: their radars were blinded and their long-range missiles rendered inert by the very rules under which the planes were tested against "small, simple, and cheap" ones like the F-5.

Finally, Threlkeld falled or forgot to note, the Nellis tests were flown literally over the runways from which the planes took off—thus the extra range built into America's "sophisticated" fighter-bombers counted for naught.

THE JAIL CELL TESTS

"The most realistic dog fight in American history"? I doubt that CBS could produce one pilot who flew those tests who would do much more than puke at the statement. The most common way they describe ACEVAL is that it was like trying to evaluate a pistol against a rifle by firing them within the confines of a jail cell.

CBS' widely touted in-depth study of your national security rates about a B+ for theater, a D for journalism, and an F for accuracy. (Time magazine said it got 30 percent of the viewing audience, "a virtually unheard of performance for a documentary." It hailed the CBS series as "thoughtful" and "incisive." That's cause for concern, since a separate Time article in the same issue noted that "more people [71 percent] believe that network television does a better job of providing accurate, unblased news than anyone else." and that "a sizable portion of the television-news audience reads no newspapers or magazines and learns what little it knows of events from television alone.")

Toward the close of Richard Threlkeld's "investigation" that evening into horror stories about the way the Pentagon buys weapons, he told us, "But we couldn't find a single instance of the Pentagon ever recommending canceling one of its programs!"

THEY COULDN'T FIND WHAT?

Who does CBS use for "investigators"? Doesn't the network have anyone run even a superficial check of its "facts"? (CBS' own regular Pentagon correspondent, Ike Pappas, a knowledgeable reporter, never even appeared in the series.) One phone call from Threlkeld or his writers to even the most Threlkeld or his writers to even the most obvious sources would have produced a top-of-the-head list of scores of major programs the Pentagon has canceled in recent years (on its own, not just because of Congressional or White House objections)—the Army's Cheyenne helicopter, its IMAAWS Infantry Manportable Anti-Tank Assault Weapons System (right after contracts to develop it were awarded last fall), its Roland air de-

fense missile (a decision Harold Brown made last fall, but which Caspar Weinberger has since reversed); the Navy's F-111B. Captor mine (another Brown decision reversed by Weinberger), and the Marine Corps' AV-8B jump jet (a Brown decision which Congress overruled three years running); the Air Force's B-1 (Brown recommended that Carter kill it in favor of air launched cruise missiles), Medium Range Mobile Ballistic Missile, Manned Orbiting Laboratory, KC-10 cargo tankers (a Brown decision overruled by Weinberger), or A-10 close support planes (a Brown decision overruled by Congress and later by Weinberger).

CBS could have done an entire program on the money the Pentagon has spent developing weapons which it later decided to cancel outright or quit buying far earlier than expected. That subject would have been worthy of comment: One reason defense costs so much is that under tight defense budgets, there has been little "constancy of purpose" in the way we buy things. Even when weapons work as advertised (the F-16, Roland, KC-10, our nuclear subs, and the AV-8B are but a few examples), we buy so few of them at such low production rates or abort the projects so prematurely that the individual cost of what few weapons do reach the field soars higher than the apogee of some sat-ellites.

CBS' special series on "Defense of the US" was unprecedented: Never has a network invested so much prime time to ruin its own reputation. To some, it was ironic that CBS set its new standard for defense reporting right after naming former Defense Secretary Harold Brown to its board of directors: to others, it was poetic justice. He must be catatoric

THE NEW GURUS ON NATIONAL DEFENSE

But CBS has no monopoly on bum dope. You'll be reading a lot of it about national defense in the months ahead: and some of the worst dope will come from people who know better, but are just as loose with their "facts."

Retiring Comptroller General Elmer Staats said in a widely quoted swan song early this year that the Army's new M-1 Abrams tank was to have cost \$507.000 in 1972, but "now costs \$2.8-million." Priced on the same basis as the 1972 number, the M-1 now costs \$568,-900 per tank. Staats was off by a factor of five—and he was Congress' "watchdog" on government procurement! (When he announced with great fanfare some years ago a new "uniform cost accounting system" for government contractors, we asked Staats what it would cost to implement the system, and what it would save the taxpayer. Neither he nor his staff had an answer to either question: apparently they never considered those issues.)

Former CIA Director Stansfield Turner wrote in the New York Times Magazine recently on "Why We Shouldn't Build the M-X." It was a provocative, thoughtful piece, well written—and punctuated with gross errors. Turner said, for example, that building bases for the M-X would "require, according to some estimates, 40 percent of the country's total cement production for three years." He must have gotten his numbers from the same sources who persuaded him in mid-1978 that the Shah of Iran would remain in power for another decade. Turner was off by a factor of eighty. The largest number I can track down that anyone has ever estimated for M-X cement needs is about one half of one percent of US production. Turner is writing a book, the Times told us, on "military strategy." It ought to be hilarious.

But the subject is not funny.

President Jimmy Carter's chief speech writer has just come out with a widely quoted and now best-selling book called National Defense. Like so much of the rash of "reporting" now making print on national security matters, James Fallows fails to heed an admonition which Joe Califano cites in his book, Governing America, to those who would try to understand American politics. Califano cautions: "Try to tell the difference between tides, waves and ripples."

Most of Fallows' book is about a lot of ripples. His horror stories of how the Pentagon screwed up its last five or six two-car funerals (the M-16 rifie, F-16 fighter, etc.) are fascinating, engagingly written—but not new, or even that important.

TIDES AND WAVES VS. RIPPLES

It's the tides and waves that should concern America.

How can we get our allies to contribute a proportionate share of their national treasures to their own defense in Western Europe? If Japan refuses to increase its defense spending above nine-tenths of one percent of its gross national product, while we spend over five percent of ours helping guarantee Japan's petroleum lifeline, would Japan consider an alternative? Like investing 4 percent of its gross national product finding a way to gasify or liquefy coal economically (something Congress has authorized \$81-billion in capital investment for us to try doing, and for which it's already appropriated \$19-billion). Japan could then use all those empty ships returning from delivering millions of Datsuns to America to haul coal back to Japan—so we can buy it back as synthetic coal liquids. If the US really wants to sell China arms so it can continue tying down 47 Soviet divisions along its border, but without risk of having Sinkiang Province bumped off one night, why not ask China-as friendly quid quo—to recognize South Korea—and thus let us redeploy some of the forces now tied down there to where they could better protect our Persian Gulf oil supplies?

Those are the kinds of national defense issues we should expect Presidential speech writers to be addressing; those are the kinds of strategic initiatives which could ease our defense burdens by multi-billions of dollars. Fallows doesn't touch on them; instead, he assaults us with relative trivia—for which his publisher wants you to pay six cents a page.

Fallows' indictment of the "ripples" which is the Pentagon's way of doing business has cau-ed in our national defense (valid though much of it is) would ring truer had he given equal time to the tidal waves which micromanagement by the White House and Congress have caused (and continue to cause) in national security affairs. A President should be concerned about multi-billion dollar issues like MX vs. Trident subs, or the B-1 vs. cruise missile—issues where survival is at stake. But Fallows doesn't tell us of the years his boss, Jimmy Carter, spent micro-managing a \$6½-million defense issue into a \$40-million international flap—all over a little commercial air terminal in Iceland. Accounts vary, even among those closest to the flasco, but they add up to a story like this:

CARTER'S ICELANDIC DIPLOMACY

Soon after Carter took office and asked NATO's 15 nations to contribute more to their common defense. Carter turned down a .6½-million Pentagon request to build a civil air terminal at Keflavik, Iceland—so that nation's civil air carrier, Icelandic Airways, wouldn't have to process its passengers through the small (and slightly dingy) U.S. Navy terminal there. The Icelanders, he objected, could build their own terminal or continue using ours: If it was good enough for the U.S. Navy, it ought to be good enough for the Icelanders.

Carter scoffed at arguments that the Icelanders have a deep-rooted and strong dis-

inclination, to say the least, to things military; couldn't afford the air terminal out of their meager \$600-million annual govern-ment budget; represented one of NATO's most critical allies (because of its location right in the center of the Greenland-Iceland-United Kingdom gap, through which Russia's Northern Fleet and Backfire bombers would have to pass before they could interdict the trans-Atlantic resupply of NATO); and had not asked for U.S. aid in a long, long time. Pentagon and State Department planners considered the \$61/2-million air terminal a bargain in international good will, and a way of demonstrating to the Icelandthat their reluctant membership in NATO had its peacetime dividends too. (Not inconsequentially, it would also let the Navy improve security at Keflavik, which was about to become an increasingly sensitive base. NATO's first AWACS Airborne ing and Control System planes would be deployed there, and scores of long range antisubmarine patrol planes would be operating from Keflavik in periods of tension.)

Defense Secretary Harold Brown almost a year and then appealed to Carter to let the civil air terminal go ahead; its cost, he reported painfully, would now be \$111/2 million: the Icelanders had come up with a better design, or whatever, Carter wrote on this appeal something like, "I've already said No!" Brown's NATO advisors persuaded Brown to go back to the President still again; by the time he did, the terminal's cost was up to \$23-million. Carter reacted quickly: "No!" During Carter's last months in office, Brown resubmitted the proposal for a fourth time; the cost had grown to almost \$40-million. To the Pentagon's surprise, Carter approved the project with a hand-scrawled "OK," signed, "JC." But he told one of his military assistants: "Make sure Harold understands that I'm still against this. The only reason I'm approving it is that he's never argued with me four times on the same issue before, so I guess it must be important to him.'

That's a weird way to decide important national security issues. Writing so rejoratively about the way the Pentagon handles them, Fallows might have shared with his readers some insight on what happens when those decisions reached the desk of the President he served as chief speech writer.

THE OAKLAND RAIDERS AUDITORS

Like CBS, Fallows spends a lot of time indicting the F-16 for its sophistication and complexity, along with its F-15 "high cost" Air Force counterpart and its sister fighters in the Navy, the F-14 and F-18. Fallows relies openly (as CBS seems to have done, without saying so) for much of his insight into the complex problem of tactical air warfare on a Pentagon document prepared by a Defense Department analyst named Franklin C. Spinney, formally entitled "Defense Facts of Life"—a 56-page single-spaced tome, with 87 briefing charts attached, whose thesis is summarized: "The evidence presented reveals that:

Our strategy of pursuing ever increasing technical complexity and sophistication has made high technology solutions and combat readiness mutually exclusive."

Fallows apparently never asked Spinney's Pentagon boss for his view of all Spinney's "facts": Former Assistant Defense Secretary Russell Murray II might have told Fallows that one of the big mistakes he made between 1917 and early 1981 was not heeding the advice of a deputy who told him he ought to listen to the briefing Spinney was giving on his behalf throughout the Pentagon to (as Spinney himself put it) "anyone who would listen." A few weeks before he left office, Murray now acknowledges, he finally listened to Spinney's briefing. He was lightly chagrined. Many, perhaps most, of Spinney's facts were solid; but a great many of them.

Murray says, were "irrelevant"; some of them didn't support the conclusions drawn; other equally important facts might have sup-

ported dramatically different conclusions.

Spinney gave his briefing a few weeks ago to the four star officer who commands the US Air Force Tactical Air Command, General Wilbur Creech. Creech told him that the four-hour briefing was fascinating and contained lots of useful data; but, Creech said, he wasn't quite sure how it related to his real world problem of trying to field a fighter-bomber force that could cope with a Soviet air threat which out-numbers NATO Europe 2,800 to 1,500 in combat airplanes rapidly becoming as modern as ours. Spinney or a control of the c

To Air Force generals, comments like that aren't very funny. If they could buy combat aircraft as fast as the Soviets have been producing them in recent years (one every 10 hours, compared with a new Air Force plane once every 70 hours), they could reequip the United States Air Force in Europe every seven months, or completely modernize their entire active inventory every 18

Creech cites an analogy to the Spinney report: cost analysts looking at the Oakland Raiders football team. They would tell the coach and owner: "I am not responsible for war-fighting strategy; you are. I am telling you, these are the cost trends." Cost analysta looking at the Raiders would likely say to the owner, "Get rid of your quarterback and wide receivers, and buy more guards." the owner to answer, as might be expected. "But I can't win in this league with more guards," an analyst would tell him: "Don't bother me with those kinds of details; you ought to get rid of the quarterback and your wide receivers—they cost too much and break too often."

"SIMPLE" VS. "COMPLEX"

But whatever Spinney's prescription is, Fallows would have the United States design its fighter forces around it—simple, cheap, non-radar carrying planes like the Korean War F-86, planes the US could buy in vast quantities and fly often because they are simple to maintain and thus generate more combat flights than "hangar queens" like the F-15.

Spinney and Fallows ought to read a little more history. The F-86 had an accident rate which varied from eight to 26 times higher than today's F-15: In its first seven years of use, the Air Force lost 1,972 of them—just in accidents. (The "complex" F-15, which incidentally has 188 fewer "black boxes" than the plane it is replacing, has the lowest accident rate of any fighter ever produced, and the "sophisticated" F-16 has the lowest accident rate of any single engine fighter ever produced.) In one single year, 1954, the Air Force lost 437 F-86s—one and a half a day— because pilots couldn't bring the simple little Mother down to a safe landing: that's onethird of all the F-16s and about half of all the F-15s the Air Force hopes to buy, ever. That year the F-86 had an accident rate of 61 planes lost for every 100,000 hours flown; the F-15 averages 5.18. (For three years in a row, the Air Force lost more than one F-86 a day in major accidents.)

As for "sortie rates" (how many missions any one plane can fly in a given day or month), Spinney and Fallows (and the other "fighter Mafia" analysts they both quote widely, like former Pentagon whiz kid Pierre Sprey) would really have the Air Force go back to World War II's propeller-driven P-47 Thunderbolts or P-51 Mustangs, not even the Korean War F-86 jet. A fascinating thesis simple is good, more simple is better. fact is that F-15s regularly fly two to three sorties per plan per day in realistic wartime

'surge' exercises in Germany, in weather that grounds \$45-million civil air liners. The highest World War II sortie rate which Europe's 9th Tactical Air Force P-51s and P-47s ever attained was less than one mission per plane per day. During the Battle of the Bulge, when Omar Bradley and George Patton prayed for all the air support they could get, 9th Air Force averaged only about one half a sortie per plane per day. At one juncture, the planes didn't get off the of a sortie per plane per day; at another juncture, the planes didn't get off the ground for nine days in a row.

One reason those simple planes flew so few sorties is that the weather was bad; the P-51s and P-47s couldn't take off, couldn't find their targets, or couldn't return safely to base. Bad weather rendered them inert. Spinney and Sprey and Fallows forget one thing that "sophisticated" airplanes have going for them: their radars and complex avionics let them take off, land, and attack targets when the weather is bad. The battlefields of western Europe (and, as Desert One proved, even ones in the Persian Gulf) are not noted for their idyllic climates: few Germans sport sunburns; most Iranians have complexions scarred by desert wind and dust or savage winters.

UBIQUITOUS JOURNALISM

Like plasmodial slime mold, the impressions created by all of this new defense "reporting" will stick around for a long time. Borne of the same kind of fictional alchemy that created the monster Frankenstein, Turner's cement estimate, for instance, already taking on a life of its own. An article in the June 22nd issue of New York maga-zine, "\$1.5 Trillion for Defense?" reads like a seven-page summary of Fallows' book, with a few new facts. One of them reads in full. Construction of the MX complex would tie up 40 percent of the nation's concrete capacity for three years." What the hell: if Stans field Turner said so, it must be true. (Not that many Americans, after all, are aware that Turner's four years as CIA Director almost made the phrase "American intelli-gence" the biggest contradiction in the English language.) New York didn't credit Turner with the cement estimate; so investigative reporters looking into the Pentagon's corner on the cement market now have two hard sources to cite. The Washington Post sometimes doesn't even require one.

The New York article, like a similar Texas Monthly June feature on the F-16 ("The Plan the Pentagon Couldn't Stop"), reads straight Fallows. It's very attractively laid out. A big sell line across one two-page spread tells you, ". . The top military brass likes sophisticated weapons, but technology has become the new Maginot line . . ." Someone names Michael Kramer by-lined the New York piece; a Michael Ennis wrote the Texas Monthly one. Neither magazine identified who they are, but their articles read as if Fallows has cloned himself. Fallows is ubiquitous. A big interview in a recent issue of People magazine ("Is the Reagan Defense Boom a Bust? It's flying too high on Tech-nology, warns Jim Fallows"); a feature article in the Boston Globe excerpts his book: Atlantic Monthly ("America's High Tech Weap-onry") and Washington Monthly—all have helped turn his modest work into the Holy Writ. (Fallows is Washington editor of the former and a contributing editor to the latter.) The only thing surer now than getting your IRS 1040 form on time is that, like it or not, James Fallows' National Defense is going to be quoted for a long time. It just made the best-seller list.

I've never met the man, but I wish my publisher would hire him as an ad salesman: the guy really knows how to hype books. (Guess what's first on the New York "Defense (Guess what's first on the New York "Defense Reading List" that ends its June 22nd fea-ture? You got it: "The very best overall critique of America's defense posture is National

Defense by James Fallows . . . ")

Fallows isn't the only new Moses of the defense world whose tablets you'll be reading for months to come. Former Pentagon analyst Pierre Sprey, father of the simple little air-plane (the lightweight fighter that became the "complex" F-16) and mastermind of the close support A-10 (which the Air Force is now trying to fix so it can operate in bad weather), was quoted eight times in the New York article and 19 times in Texas Monthly.

AND NOW, AN OBJECTIVE VIEW

Editors who don't have time to bog down in all those facts that Fallows, Turner et al. are throwing at them will owe a special debt to the Center for Defense Information, a tax exempt project of the "Fund for Peace." It's just what the need if they want to editorialize about all this money Reagan is stacking up on top of Ground Zero (Turner used all the cement, so we'll have to make the National Military Command Center in-National Military Command Center in-vulnerable by hiding it underneath a mil-lion dollar bills). A 12-page newsletter it circulated late in June had this headline across the front page: "Military Budget Up \$80 Billion in Two Years." Just below that was a box summarizing the facts inside. "The first paragraph [bulleted, to get your attention] read in full: "The Department of Defense is embarking on a vast spending spree of over \$1.5-Trillion in the next five years. Most of this money will not be spent on the defense of the U.S." Although I haven't read every word of the newsletter yet (I'm out of No-Doz), I honestly could not find, after scanning it carefully three times, what the Center for Defense Information thinks the Pentagon will spend that money for. But the boxes on its inside pages give you a culck feel for its analysis "Frightening Waste in Defense" and "Runway Costs" decorate page three; "Vast Opportunities for Savings" tops page 5; CDI's List of for Savings" tops page 5; CDI's List of Unjustified Nuclear Weapons Programs" grabs you on page 7 (a modest \$12.5 bil-"Future Economic Dangers," Wrong King of Navy," Damaging the Economy" and "Need for Arms Limitation" round out the analysis.

If Ben Bradlee repackages the thing right, he could have another Pulitzer Prize on his hands. The only thing I could find missing from the document was one digit about how Russian forces have changed in the past decade.

Today's "production lead times" mean that it now takes from 18 months to two years, once an order is placed, to get the first new simple weapon off the assembly line and on its way to the troops. But long new Reagan defense budgets before the produce their first new bolt, CBS and Fallows are creating the subconscious impression that Caspar Weinberger ordered the wrong one, too many of them, and has run warehouses to store the ones sent him last week. Americans are likely to soon wonder, "We've spent all this money beefing up our armed forces. Isn't it time to throw out money down some other rat hole?" Your daily newspapers really haven't told you that the first new money Wein-berger as d for last January, a \$3.04 billion "supplemental" for the Fiscal Year 1981 defense budget now underway, still hasn't been fully approved by Congress.

Stanfield Turner, Pierre Elmer Staats. and James Fallows are just a few of the "authorities" reporting to you today on national defense issues who would have you believe that war now boils down an issue of quantity versus quality, and that to win one now, we have only to buy more less expensive weapons.

They don't tell you where we will find or how we will pay all the extra pilots needed to fly all those extra simple airplanes, or where we will find the airfields to park them in Western Europe, or that bachelor quarters for an F-86 pilot costs just as much as for

an F-15 pilot.

They tell you horror tales of the F-15's and F-16's engine reliability and mainteand F-10's engine reliability and mainte-nance problems; they don't tell you that those problems with the "complex" F-100 have been reduced by a factor of two to 10 in the past two years. (The F-100 engine is complex: but at eight-to-one, it has the highest thrust-to-weight ratio of any aircraft engine in the world, one reason the planes it powers perform so well.) They tell you that on an average day in 1978, 44 percent of the Air Force's F-15s were not fully ready for combat. They don't tell you that under the tight defense budgets of recent years, no one budgeted enough spare parts for them, while Congress cut much of the spares support which the Air Force did request; they don't tell you that today, F-15s are fully mission capable over 64 percent of the time, or that only one Air Force plane now has a higher combat readiness rate, or that the F-15 is now more combat ready than the fighter it replaces.

They don't tell you that one reason Navy officers prefer to hunt Soviet submarines with the costly DD-963 destroyer is that the much simpler little FFG-7 frigate can't carry a sonar big enough to do much more than locate schools of fish. They don't tell you that nuclear ballistic missile submarines cost a lot, for one thing, because the 41 boats were built to last; they just finished their 2,000th combat patrol, almost 50 each totaling more than 100,000 days—275 years—under water since 1961. They don't tell you that many skippers of those boats will tell you they have never been detected by a Soviet submarine, surface ship, or aircraft; their boats cost a lot because they are also very quiet, virtually undetectable; their Russian counterparts don't cost as much to build, but trail "signatures" about as silent or invisible as four-alarm fires.

Fallows, Turner, and CBS give you a simplistic view of an enormously complicated problem in a world that is uncertain, uneasy, and unpredictable. When confronted by ex-Aristotle once wrote, the prudent man chooses the middle ground.

CBS, Turner, and Fallows have not.

You deserve to be better informed on trillion and a half dollar issues like national defense.

DEATH OF ROY WILKINS

• Mr. KENNEDY. Mr. President, with the passing of Roy Wilkins, America has lost a lion in the fight for human dignity and a leader in the struggle to overcome the prejudice of the past and the dis-crimination that still blights our present day. The patient, persistent prodding of our national conscience by Roy Wilkins led us far on the road toward equal justice under law for all our people. President Kennedy looked to Roy Wilkins during the civil rights struggle of the 1960's. In my own life Roy Wilkins has been a trusted adviser, a voice of hope, and a steadfast colleague in countless battles for equality.

Those in our society who are poor or disadvantaged or discriminated against have lost a strong advocate with the death of Roy Wilkins. But in a larger sense, all Americans will feel the loss of his voice and the stilling of this powerful force for reason and human dignity.

Mr. President, I ask that the articles on Roy Wilkins that appeared in the Boston Globe, the New York Times, and

the Washington Post may be printed in the RECORD.

The articles follow:

[From the Boston Globe, Sept. 9, 1981]

ROY WILKINS IS DEAD AT 80

(By Lee May)

New York.—Roy Wilkins, who carved into an art form the strategy of using the federal courts to attack racial discrimination on all fronts, died of kidney failure yesterday in New York University Medical Center. He was

Mr. Wilkins, who headed the National Assn. for the Advancement of Colored Peo-(NAACP) for 22 years, was admitted to the hospital Aug. 18 with a cardiac condition and several other medical problems complicated by the kidney problem. He had a history of heart trouble.

From the White House, President Ronald

Reagan led the tributes.

"Roy Wilkins worked for equality, spoke for freedom and marched for justice. His quiet and unassuming manner masked his tremendous passion for civil and human

rights.
"He once said, "The heritage of a man of peace will endure and shine into the darkness of this world.' Although Roy's death darkens our day, the accomplishments of his life will continue to endure and shine forth."

Rev. Joseph Lowery, president of the Southern Christian Leadership Conference, lauded Mr. Wilkins as "a statesman, scholar and servant in the area of civil rights.

"He served during the toughest of periods," said Rev. Lowery. "He served when there were lynchings. He watched the white pri-Ithe exclusion of blacks from votingl fade into history and he lived to see the crumbling of the wall of official segregation."

Mr. Wilkins successor, Benjamin Hooks, at his Memphis, Tenn., home, said: "I'm shocked at the passing of a man who meant so much to the civil-rights movement and, for that matter, to America."

Mr. Wilkins devoted his life to turning his knowledge of the governmental system into an armful of legislation benefiting minor-

Among the bills Mr. Wilkins' strategies guided through Congress were the Civil Rights Acts of 1957, 1960 and 1964 and the Voting Rights Act of 1965.

As a young man, he traveled from New York to the Deep South, posing as an indi-gent to conduct an undercover investigation of the treatment of blacks working on flood-control projects along the Mississippi River.

During the 1930s, that foray easily could have meant death for a black, but Mr. Wilkins lived to detail the injustices he found. His published report led to a congressional investigation and legislation against unequal pay and exploitation by employers.

But it was the 1954 US Supreme Court

decision directing public schools to desegregate that Mr. Wilkins called his greatest

victory.

The desegregation suit, filed by the NAACP, embodied Mr. Wilkins' deep-rooted belief in integration as the route to black progress in America, a belief that sometimes put him at odds with other rights activists.

Mr. Wilkins, grandson of a slave, was born Aug. 30, 1901, in St. Louis. His mother died when he was 4, and his father sent him and his younger sister and brother to St. Paul, Minn., where they lived with an aunt and

Mr. Wilkins majored in sociology at the University of Minnesota and was night editor of the school paper. That helped him land a job after graduation in 1923 at the

Kansas City Call, a black weekly newspaper.
Preferring quiet diplomacy to tablepounding, Mr. Wilkins, in one of earliest

campaigns, crusaded against the lynching of blacks, using the NAACP as a forum. He left Kansas City and began work in New York with the nation's oldest civil-rights organization in 1931 as an assistant executive secretary. He later added the job of editor of the Crisis, the NAACP official publication. He was named executive secretary in 1955. Later, the title was changed to executive director.

While he was better known as the man behind negotiations, Mr. Wilkins also could found on the front lines, marching on Washington in 1963 and on Selma in 1965. Like other demonstrators, he was occasionally arrested, the first time in Washington in 1932.

Mr. Wilkins, a frugal man of immaculate yet conservative dress, was, like other legend-ary rights leaders, a valued adviser to presidents. He helped Harry S. Truman end segregation in the armed forces. And, wellknown to White House switchboard operators and secretaries, he could pick up his tele-phone and talk with John F. Kennedy and Lyndon B. Johnson almost at will.

Richard M. Nixon was another matter.

Referring to the Nixon Administation's announcement that it intended to allow some schools to slip past a deadline on desegrega-tion, Mr. Wilkins said, "It's almost enough to make you vomit."

While Nixon was poking thorns in Mr.
Wilkins' right side, some black activists were

driving nails into his left. Many in the rights movement claimed he was too moderate, too slow and too accommodating with whites. But it was to Mr. Wilkins that whites often

turned for explanations of black rage that led to urban riots during the 1960s. He appeared on NBC's "Meet the Press" in July 1987 soon after the Newark, N.J., disturbances, and was asked by an interviewer how

the riots could have been prevented.

Mr. Wilkins' answer: "Jobs and better housing and better schools and better treatment" by police. On the same program he re-jected "black power" because "the essence of it is separatism," which he would disdain until the end.

Ten years later, on July 31, 1977, he retired after weathering an intense battle to oust him because of his age and questions about his ability to lead the troubled NAACP out of its problems, including declining membership.

Mr. Wilkins and his wife Aminda (Bedeau), whom he married in 1929, lived in Jamaica, Queens, and would have celebrated their 52d anniversary next Tuesday. They had no children.

A funeral service will be held Friday at 11 a.m. in the Community Church of New York.

[Editorial] ROY WILKINS

He was, quite simply, one of the outstanding figures of 20th century America, one of the giants of the civil rights struggle.

Roy Wilkins, who died yesterday, served quarter century as executive director of the National Association for the Advancement of Colored People. During his tenure blacks scored advancements in their acceptance into American society unprecedented since the end of the Civil War. The NAACP was at the center of the push for those achievements.

The days when blacks were routinely excluded from restaurants and overtly ex-cluded from neighborhoods are, if not gone considerably less frequent than they just 20 years ago. Few deserve more credit for that, for the enactment of the laws that did change the hearts and minds of Americans, than Roy Wilkins.

Even his most notable achievement, the challenge to segregated education, is now

almost universally accepted; only the means to that end remain debated.

In the 1960s Wilkins was routinely criticized for being too moderate, for being too close to "the white establishment." However, when more militant blacks had made their run and retired to the sidelines, Wilkins remained solidly in the center of the struggle. "It's just a name," Wilkins said of the "Uncle Tom" label occasionally affixed to him. "All you have to do is look around at what has been accomplished—at great odds and they were great—to realize that name-calling is just an exercise."

Wilkins did not take the civil rights battlefield for the exercise. He participated in the struggle to achieve results. He succeeded.

"We do not cry out bitterly that we love another land better than our own or another people better than than ours," Wilkins told an NAACP convention 30 years ago in a speech that embodied his life-long view and set him apart from those advocating black separatism. "This is our land, This is our nation. We helped to build it. We have defended it from Boston Common to Iwo Jima."

It would be a disservice to his memory to portray Roy Wilkins as a black leader. He was an American leader who was black.

[From the New York Times, Sept. 9, 1981]
ROY WILKINS IS DEAD AT AGE OF 80; LED CIVIL
RIGHTS FIGHT FOR 50 YEARS

(By Albin Krebs)

Roy Wilkins, leader of the National Association for the Advancement of Colored People and an activist in the cause of civil rights for more than 50 years, died yesterday at the age of 80.

The cause of Mr. Wilkins' death, at New York University Medical Center, was uremia, or kidney failure. He was admitted to the hospital Aug. 18 with a heart problem; the kidney complications developed later.

In a half-century devoted to improving the social, political, and economic status of his fellow blacks, Roy Wilkins, the grandson of a Mississippi slave, became a skilled politician as well as statesman.

LED N.A.A.C.P. FOR 2 DECADES

His singular dedication to the cause of civil rights began when he was still in college and culminated in his forceful and productive leadership of the N.A.A.C.P. during the turbulent two decades that followed the Supreme Court school desegregation decision of 1954. He retired in 1977 after his health began to fail.

Leading the tributes to Mr. Wilkins was President Reagan, who said at the White House: "Roy Wilkins worked for equality, spoke for freedom and marched for justice. His quiet and unassuming manner masked his tremendous passion for civil and human rights. Although Roy's death darkens our day, the accomplishments of his life will continue to endure and shine forth."

Vice President Bush said: "Our nation has suffered a great loss with the death of Roy Wilkins. His dedication to the poor, to those bypassed by our society and to those threatened by discrimination and hate were based upon a deep and burning conviction that all Americans must be guaranteed equality and opportunity."

A CALM AND REASONED MAN

Mayor Koch said of Mr. Wilkins: "The special ingredient he had was an ability to convey a spirit of cooperation, affection, reasonableness, intelligence and courage. He will be missed by whites, blacks, Hispanics, everybody in this country who is decent and dedicated to better racial relationships."

A calm and reasoning man, Mr. Wilkins did not avoid the limelight, and Presidents and governors sought his counsel on racial matters. But Mr. Wilkins did avoid "both"

words and deeds that would seem to cast him in the role of a firebrand.

Because he believed in a racially integrated America, he fought the doctrine of separatism espoused by black militants with the same zeal that he had brought earlier to his battles with the dogmas of segregation and white supremacy.

LEGALISTIC APPROACH STRESSED

He was the chief planner of the legal battle that resulted in the 1954 Supreme Court decision outlawing "separate but equal" public schools.

He did not hesitate, when he thought it would do any good, to take the civil rights cause into the streets. He was first arrested in a demonstration in 1934, and in later years he was a leader of sometimes violently resisted rights marches in Washington; Selma and Montgomery, Ala.; Jackson, Miss., Memphis and other cities.

But under his leadership, the N.A.A.C.P. chose a predominantly legalistic approach, using legislation and the courts as its chief weapons in the struggle for equality and constitutional rights. The Wilkins way was to work within the law, within the system, to achieve voting rights, integrated schools, fair housing laws, increased job opportunities and many other goals.

and many other goals.

Less patient blacks, in later years, condemned that approach, made militant demands for black power and accused Mr. Wilkins of Uncle Tomism. Mr. Wilkins firmly rejected the concept of black power, saying, "We of the N.A.A.C.P. will have none of this; it shall not now poison our forward march."

ARGUED WITHOUT BOMBAST

In the process of guiding the N.A.A.C.P., Mr. Wilkins traveled more than half of each year, visiting branches of the organization and giving lectures in which he espoused civil rights causes.

His sparse gray hair and gray mustache and his slim figure clad in conservative suits were familiar to millions of Americans who saw him on television as he argued, literately and eloquently but without bombast, for the emancination of his people

emancipation of his people.

During his tenure as a top official of the N.A.A.C.P., membership rose from about 25.000 in 1931 to more than 400,000 in July 1977, when he retired as the organization's executive director. Annual income increased from about \$80.000 to \$3.6 million, and the number of N.A.A.C.P. branches rose from 690 in 1931 to about 1,700 in 1977.

Roy Wilkins was born Aug. 30, 1901, in St. Louis. His father, William, and mother, the former Mavfield Edmondson, had moved there from Holly Springs, Miss. William Wilkins was a college graduate and a Methodist minister but was forced to earn a living tending a brick kiln.

INFLUENCED BY HIS UNCLE

When he was 4 years old, Roy Wilkins' mother died of tuberculosis, and he and his younger brother and sister were sent to live with an uncle and aunt. Mr. and Mrs. Samuel Williams, in St. Paul. His uncle instilled in the youth the idea that in America blacks could get ahead but that to do so it was necessary for them to adopt middle-class white attifudes, which included getting a good education and living in a state of moral rectifude.

Perhaps because there were few blacks in St. Paul, Mr. Wilkins suffered no blatant discrimination. He attended the integrated Mechanic Arts High School and edited the school newspaper.

At the University of Minnesota, from which he was graduated in 1923, he malored in sociology and minored in jouralism while supporting himself as a redcap, a slaughterhouse worker and, in summers, a Pullman car waiter.

Busy as he was, Mr. Wilkins found time

to serve as night editor of the university's Minnesota Daily, to edit The St. Paul Appeal, a black weekly, and to take an active part in the N.A.A.C.P. branch.

While at Minnesota, Mr. Wilkins became incensed over the lynching of a black in Duluth and entered the university oratorical contest to deliver an impassioned antilynching speech, which won first prize. By graduation time, he had vowed to take part directly in the fight for black rights.

MET JIM CROW IN KANSAS CITY

"I needed a means of expressing my views," he said years later, "and so I applied for a job on an influential Negro weekly, Chester A. Franklin's Kansas City Call. I got the job. In those days there weren't many young Negroes trained for newspaper work, and since I was, I suppose that's why I soon found myself managing editor."

It was in Kansas City that Mr. Wilkins first met widespread segregation. "Kansas City ate my heart out," he said. "It wasn't any one melodramatic thing. It was a slow accumulation of humiliations and grievances. I was constantly exposed to Jim Crow in the schools, movies, downtown hotels and restaurants."

The crusading young editor used the columns of The Call to urge blacks to assert their strength at the polls, voting out of office any politicians considered white supremacists. Blacks constituted a sizable minority in Missouri, and in 1930 enough of them heeded the advice of The Call and Mr. Wilkins to vote against, and defeat, United States Senator Henry J. Allen, described by Mr. Wilkins as "a militant racist."

The campaign brought Mr. Wilkins to the attention of Walter White, executive secretary of the N.A.A.C.P., who brought him to New York in 1931 as his chief assistant.

"One of my first jobs was to go South to investigate conditions among Negroes who were working to rebuild the levees on the Mississippi River," Mr. Wilkins said. "They made 10 cents an hour. I lived in the camps and earned 10 cents an hour. We tried to sneak pictures of the work. You didn't say you were from the N.A.A.C.P. It would have meant being lynched."

SLAVE LABOR REPORT PRAISED

The experience, which, Mr. Wilkins said, "took all the theory out of the race relations business for me and put it on a realistic basis," resulted in his widely publicized 1932 report entitled "Mississippi Slave Labor." It was credited with bringing Congressional action that improved wage and working conditions for blacks in the levee labor camps.

In 1934 he led the first of his dozens of demonstrations for civil rights, the picketing of the United States Attorney General's office in Washington. The picketing, undertaken because the Attorney General, Homer S. Cummings, had not included lynching on the agenda of a national conference on crime, resulted in Mr. Wilkins's first arrest for civil rights activities.

The same year Mr. Wilkins succeeded W.E.B. Du Bois as editor of The Crisis, the official N.A.A.C.P. magazine, while continuing as a writer, lecturer and organizer for the association. In 1949 his mentor, Mr. White, took a year's leave and Mr. Wilkins became acting executive secretary. On Mr. White's return, Mr. Wilkins became administrator of internal affairs, a post he held until Mr. White died in 1955. At that time the N.A.A.C.P. board voted unanimously to make Mr. Wilkins executive secretary, a title later changed to executive director.

From then, Mr. Wilkins was to serve as the guiding force behind an organization that was founded in 1909 to obtain the constitutional rights of blacks and to push for full equality of the races. (The N.A.A.C.P. grew out of a memorandum issued by a

group of blacks and such prominent whites as John Dewy, Rabbi Stephen S. Wise and Lincoln Steffens, who had become outraged by the widespread passage of Jim Crow leg-islation, denial of voting rights to blacks in the South and the rise in the number of lynchings.)

LYNCHINGS BECAME CHIEF TARGET

Lynchings, which occurred at a rate of about 35 a year in the early 1930's when Mr. Wilkins went to work for the N.A.A.C.P., were the chief targets of the organization at that time. "We had to provide physical security first," he said.

Mr. Wilkins never won passage of the significant signi Wilkins never won passage of one of bill, but, in no small part because of the educational and propaganda activities of the N.A.A.C.P., lynchings became uncommon as

the years passed.

Mr. Wilkins and the N.A.A.C.P. membership could then focus their efforts on a wide variety of ills, such as discrimination in housing, segregated schools, disfranchise-ment and bias in employment. He once explained his approach in attacking those in-

equities:

The Negro has to be a superb diplomat and a great strategist. He has to parlay what actual power he has along with the good will of the white majority. He has to devise and pursue those philosophies and activities which will least alienate the white majority opinion, and that doesn't mean that the Negro has to indulge in bootlicking. But he must gain the sympathy of the large ma-jority of the American public. He must also seek to make an identification with the American tradition."

With these tenets in mind, Mr. Wilkins became the chief exponent of the use of constitutional means to achieve black civil rights. He sought to involve Presidents, governors, mayors, legislatures and the courts in the legislative framework for integration.

HIS GREATEST SATISFACTION

He was the architect of the legal assault on school segregation that culminated in a monument to the Wilkins method, the historic 1954 Supreme Court decision that over-turned the doctrine of "separate but equal" facilities in public education.

The integration case was argued before the Supreme Court by the N.A.A.C.P.'s general counsel, Thurgood Marshall, who later became an Associate Justice of the Court. Mr. Wilkins said the decision gave him his greatest satisfaction because it reaffirmed the constitutional rights of Negroes as equal citizens and was the greatest document since Abraham Lincoln's Emancipation Proclamation.'

Mr. Wilkins was one of the of most able and articulate spokesmen for blacks, and often conferred with Presidents, gave his views on civil rights matters to Congressional committees and stumped the country to persuade his fellow Americans, in his quiet but firm way, to accept one another on equal terms.

He was an optimist who counseled blacks to be proud to be Americans, "We do not cry out bitterly that we love another land better than our own or another recoile better than our own." he told the N.A.A.C.P. na-tional convention in 1949. "This is our land. This is our nation. We helped to build it. We have defended it from Boston Common to Iwo Jima."

A MORE MILITANT CALL

Those were comforting and comfortable sentiments, but in later decades, with the burgeoning of the civil rights movement, with the procession of events from Mont-gomery's bus boycott, the lunch counter sitins in the South, the marches in Selma and the assassination of the Rev. Dr. Martin Luther King Jr. in Memphis, Roy Wilkins sounded a progressively militant call.

"We condemn the propaganda that Negro citizens must 'earn' their rights through good behavior," he said on one occasion. Good behavior wins the respect of our fellow citizens, which we value and seek, but no American is required to 'earn' his rights as a citizen. His human rights come from God and his citizenship rights come from the Constitution.'

On another occasion he said, "Negroes want in in American society, and they want the ways opened now." And, testifying in 1963 in support of the public accommodations section of President Kennedy's civil rights bill, Mr. Wilkins said bluntly:

The players in this drama of frustration and indignity are not commas or semicolons in a legislative thesis. They are people, human beings, citizens. They are in a mood to wait no longer, at least not to wait patiently and silently and inactively."

The rhetoric was militant, yet, Mr. Wilkins continued to adhere to his belief that social justice could best be won by constitutional means. That attitude, in the late 1960's, angered some young black militants.

UNGRATEFUL AND FORGETFUL

He reacted with cool disdain, calling his

attackers "unfair, ungrateful and forgetful."
".n my youth, gcddamn it," he said in an interview in 1969. "there were no demonstrations and parades. Who the hell did it? Who got them to allow the demonstrations? What is allowed today is affected by today's climate—the opportunities opened up for the kids by the people taking part in the civil rights fight 20 years ago. It used to be that picketing, except for a labor cause, was against the law. We went to court over that and won the right for these kids to march and picket now. I understand their impatience. I share it, but they should have some idea what it has taken to get them their right to raise hell."

Having spent all his adult life battling for racial integration, Mr. Wilkins opposed the young militants' demand for separatism. He denounced black students for carrying guns on the Cornell University campus and threatened to challenge in the courts the concept espoused by some black students of separate courses of black studies and segregated black dormitories.

"If the country gives racial control to a dormitory or an art center," he said, "finally everything in the country will be racially controlled and we'll be right back at the point where we started."

He condemned the concept of "black power" as "the father of hatred and the mother of violence," and added: "Black power, in the quick, uncritical and highly emotional adoption it has received from some segments of a beleaguered people, can mean only black death. Even if it should be enthroned briefly, the human spirit would die a little."

A MAN OF STAMINA

Mr. Wilkins enjoyed the constant controversy he seemed to be in, partly, he once said, because "I retain remarkable stamina even when in hot water up to my second chin." In 1946 he underwent surgery for cancer of the stomach but managed to snap back to health, although he had to give up his chain-smoking of cigars and the occasional bourbon and water he enjoyed. He gave so much time to his job that he had no hobbles except driving his high-powered sports car.

In the 1970's Mr. Wilkins was critical of both the Nixon and Ford Administrations. He was one of several N.A.A.C.P. officials to assert that President Nixon had "turned back the clock on racial progress" with his appointment of "strict constructionists" to the Supreme Court, "separationist" education policies and "weakening" of the enforcement of civil rights laws.

Mr. Wilkins was in the forefront of the successful effort to persuade the Ford Administration not to use the Boston school busing case in 1976 as a vehicle for seeking reconsideration by the Supreme Court of busing as a means of integration. And the N.A.A.C.P. chief later lamblasted President Ford for proposing legislation to restrict the power of the courts to order busing as a remedy for segregated schools. He criticized the proposals as a "craven, cowardly, despi-cable retreat."

Nor did Mr. Wilkins countenance what he regarded as oppression by blacks. He was one of a number of black American leaders who jointly castigated then President Idi Amin of Uganda for his "savage" repression of human rights.

RESISTED OUSTER MOVES

By the early 1970's Mr. Wilkins had to beat back several attempts within the N.A.A.C.P. to wrest leadership from him. Some younger members charged that he had failed to change within the times and had outlived his usefulness in the movement, leaving the association adrift. But Mr. Wilkins insisted on retaining the reins of the N.A.A.C.P., saying that he had the experience "to move our people forward."

After acrimonious and sometimes public feuding over the organization's policies and management and its financial and membership problems, as well as the timing of his departure, the ailing Mr. Wilkins retired after the 68th annual convention in July 1977. He had served the association 46 years, 22 as the man in charge of the N.A.A.C.P. in St. Louis.

Wilkins was succeeded by the Rev. Benjamin L. Hooks, who resigned from the Federal Communications Commission to take the post. But few observers of civil rights organizations expect that Mr. Hooks or any other individual will again hold the unquestioned power within the N.A.A.C.P. that was wielded by Mr. Wilkins in earlier decades.

Mr. Hooks said yesterday: "Mr. Wilkins was a towering figure in American history and during the time he headed the N.A.A.C.P. It was during this crucial period that the association was faced with some of its most serious challenges and the whole landscape of the black condition in America was changed, radically, for the better."

Vernon E. Jordan, president of the Na-tional Urban League, said: "Roy Wilkins was a giant whose contributions over a lifetime of dedicated service to the cause of equality leaves us all in debt. He led the N.A.A.C.P through a period of national change and kept it in the forefront of the struggle to integrate our society."

INSPIRED AND INSPIRING LEADER

In Chicago, the Rev. Jesse Jackson Jr. of Operation PUSH praised Mr. Wilkins as a man of integrity, intelligence and courage who, with his broad shoulders, bore more than his share of responsibility for our and the nation's advancement."

Bertram H. Gold, executive vice president of the American Jewish Committee, called Mr. Wilkins "an inspired and inspiring leader, whose aspirations of yesterday today's realities."

Ramsey Clark, a former Attorney General of the United States, praised Mr. Wilkins as "a man of gentleness and integrity who en-riched all our lives with justice." He added, We have to hope from his example that new generation can find inspiration in

a new generation can find inspiration in the principles to which he devoted his life."

On behalf of the National Conference of Christians and Jews, Dr. David Hyatt, its president, said of Mr. Wilkins: "He had a diplomat's skill and he had the respect of our nation's citizenry, from governmental and business leaders to the man and woman in the community. in the community. His contributions to America are immeasurable."

HONORED BY QUEENS COLLEGE

Mr. Wilkins was awarded an honorary doctor's degree by Queens College in 1978. The citation accompanying the degree said his "strength and stability" were "in inspiration to the world." And he was among 17 elderly blacks honored by President Carter at a White House luncheon.

"You have helped to write history," Mr. Carter told his guests, "and you have proved that the strength of the human spirit can achieve excellence even in the face of extraordinary obstacles.

Mr. Wilkins lived in Queens Village with his wife, the former Aminda Badeau, a social worker he met in St. Louis and married in 1929. They had no children.

A funeral service will be held Friday at 11 a.m. at the Community Church of New York, 40 East 35th Street.

ROY WILKINS: A COOL, SOLID AND RESPECTED

(By Paul Delaney)

When the question was asked, it did not bother him. It had been brought up, in general by younger blacks, at nearly every convention of the National Association for the Advancement of Colored People since the civil rights movement spawned the black power movement.

"Mr. Wilkins, why does the N.A.A.C.P. still use the word 'Colored' in its name?"

Once again, Roy Wilkins patiently explained that he had no problem with the word and that it included all "people of color in the world, not just black people."

Keeping his cool was one virtue that made

Keeping his cool was one virtue that made Mr. Wilkins the pre-eminent civil rights leader of his day. He did not possess the charlsma or preaching ability of a Martin Luther King Jr. He was not a militant of the James Farmer mold. Alliteration did not roll off his tongue in the style of a Jesse Jackson Jr.

But Mr. Wilkins was regarded as a solid leader, consistent, stable and thoughtful. He was respected by Presidents and workingclass blacks alike. His manner seemed something out of Kipling: He kept his head when

all about him were losing theirs.

He ran the organization in that fashion, and neither Young Turks inside the association who disagreed with his leadership style nor young militants outside who were frustrated with the moderate rhetoric and pace of the N.A.A.C.P. could shake his belief that his and the organization's stance was the correct one.

Intellectually, he was far ahead of some other leaders in grasping the dynamics of the times and in his knowledge of the country, its institutions and how to exploit them for the welfare of his constituency. He was also far more familiar with his opponents than some of his colleagues in the leadership

His most difficult period was in the days of the civil rights movement. He had weathered the Communist infiltration campaign of the 1950's and the challenge to his leadership by younger members who wanted to take the association further to the left than Mr. Wilkins wanted. But at the height of the civil rights movement he and the association were regarded by many blacks as being out of step with the reigning philosophy and direct action tactics of the day. The thousands of students who protested and picketed and sat in and were arrested were the combat troops in the war against Jim Crow, and the vast majority were not members of the N.A.A.C.P.

MAINTAINING ALLEGIANCES

But in the end, when they landed in jail and needed legal counsel to see their cases through the criminal justice system or through the civil process, it was the battery of lawyers from the association, among others, who were called upon. And the association's tactics of quiet confrontation were proven correct.

In that struggle, Mr. Wilkins had to maintain the allegiance of nearly half a million members, his black working supporters. This he did with his steady abilities and firm control of the reins of leadership, demanding the strong support of the board of directors, which in his day was almost 50 percent white and more middle-class and liberal than the rank and file.

After the deaths of Dr. King and Whitney M. Young, Jr., director of the National Urban League, Mr. Wilkins became the old man of the movement. In a rather tragic development, he refused for some time to give up leadership of the N.A.A.C.P., even when he became too ill to function adequately. Although it appeared vain at the time, his resistance might have been prophetic: There was no one to succeed him.

THE NEW BLACK AND WHITE ISSUES

The times have changed, the struggle is different and maybe Mr. Wilkins himself would have been confused by the problems of infiation and unemployment, lack of housing, resurgence of conservatism and cooling of interest in minority rights, as against simpler black and white issues.

His successor, the Rev. Benjamin L. Hooks, is still suffering because the problems have changed and because the organization is still trying to get over the influence of Mr. Wilkins.

Mr. Wilkins was so strong and he so dominated his board of directors that some members vowed not to allow another director such a role. And the movement is still looking for a leader of such stature.

[Editorial]

RACISM WAS THE ENEMY

Roy Wilkins made history, and made America a more just and decent place, for whites as well as blacks.

In his 46 years with the National Association for the Advancement of Colored People, he held steadfastly to a belief in the power of reason and the rule of law rather than force. Racism was the enemy, whether by intolerant whites or impatient blacks.

Though he saw the value of peaceful picketing, he preferred the path of litigation and legislation, fearing that victories resulting from confrontation would prove transitory. He assessed his extraordinary achievements with a modest comment: "We did what we could do when we could do it." It was a shrewd formula for success.

Through the years that the N.A.A.C.P. grew from 25,000 members to a national organization of half a million, Roy Wilkins combined unwavering commitment to principle with careful pragmatism. When he joined the organization in the 1930's, night riders commonly terrorized blacks. An aggressive N.A.A.C.P. campaign led to state anti-lynching legislation; it was the first of many legislative victories that would eventually mark the organization as the secretariat and chief lobbvist for the civil rights movement.

lobbyist for the civil rights movement. It was Roy Wilkins's painstakingly orchestrated legal strategy that ultimately persuaded the Supreme Court in 1954 to outlaw school segregation. And he was a leader in the civil rights coalition that cajoled and pressed and persevered until Congress finally banned discrimination in the great civil rights enactments of the 1960's.

He hardly had time to savor those triumphs, however, before being challenged by disgruntled black activists who disavowed nonviolence and called for black power.

Roy Wilkins understood how cheap—and chic—militant talk could be. Eloquently, he denounced black separatism. Even if black power should be enshrived briefly, he warned, "the human spirit, which knows no color or geography or time, would die a little, leaving for wiser and stronger and more compassionate men the painful beating back to the upper trail."

Racism was blatant and legal when he began his career. It is neither of these now, thanks in large part to his leadership. What a monument to one man.

[From the Washington Post, Sept. 9, 1981] U.S. Civil Rights Leader Roy Wilkins Dies at Age of 80

(By Warren Brown)

Roy Wilkins, 80, a Mississippi slave's grandson who helped shape many of the most important moments in U.S. civil rights history as executive director of the National Association for the Advancement of Colored People, died of uremia yesterday at New York University Medical Center in New York City.

He was hospitalized Aug. 18 for treatment

of heart and kidney ailments.

Mr. Wilkins guided the NAACP, the nation's largest and oldest civil rights group, through its time of greatest growth and prestige. He also presided over what many regard as the beginning of the NAACP's political and financial decline.

From 1931, when he joined the organization's staff as assistant secretary, until 1977, when he retired as executive director after 22 years in that post, Mr. Wilkins and the NAACP were one. He and the association were at the forefront of the drive for antilynching laws in the 1930s, when lynching was a familiar occurrence in backward reaches of the South and Midwest.

He was the administrator of the NAACP in 19 4 when it won the historic Brown vs. Board of Education decision in the U.S. Supreme Court. The ruling overturned the court's 1896 decision in Plessy vs. Ferguson which, under its "separate but equal" doctrine, had provided the legal jurisdiction for racial segregation in the United States.

Mr. Wilkins was a key supporter and organizer of the March on Washington on Aug. 28, 1963. That dynamic lobbying effort brought nearly 250,000 people to the nation's capital. Largely influenced by the march, the assassination of President John F. Kennedy on Nov. 22, 1963, and consultation with Mr. Wilkins throughout those events, President Lyndon B. Johnson pushed for and won approval of the landmark 1964 Civil Rights Act. This made support for voting rights, equal employment and equal access to public accommodations a matter of federal law.

Many who remember the 1963 event place another famous civil rights leader, the Rev. Dr. Martin Luther King, Jr., at its center. A gifted orator, Dr. King "stole the show," as many blacks said, with his "I Have a Dream" speech. Five years later, on April 4, 1968, Dr. King was assassinated on a balcony of the Lorraine Motel in Memphis, Tenn.

But the role of Mr. Wilkins in organizing

But the role of Mr. Wilkins in organizing the demonstration was enormous. To the chagrin of friends such as Joseph L. Rauh, a Washington lawyer who has been active in behalf of civil rights and civil liberties all his professional life, the public and the media often made comparisons between Dr. King and Mr. Wilkins, contrasting their styles and commenting on their effectiveness.

"I hated that. But you were always driven to make those comparisons," Rauh said. "I guess you can say Martin was the front man who changed public opinion. But Roy was the one who was able to use that shift in public opinion to bring about legislation and legal rulings that benefited blacks, as well as any number of other people."

Mr. Wilkins and Dr. King "complemented one another, but not in an intentional way." Rauh said, adding, as others have, that there was some style-based "antipathy between the two men."

"Rauh said."

On the death of Mr. Wilkins, President

Reagan and other leaders hailed not only what he did in his life, but the way he did

it and what he stood for.
The president said that Mr. Wilkins "worked for equality, spoke for freedom and marched for justice. His quiet and unassuming manner masked his tremendous passion for civil and human rights."

Vice President Bush said that the dedication of Mr. Wilkins "to the poor, to those bypassed by our society and to those threatened by discrimination and hate were based on a deep and burning conviction that all Americans must be guaranteed equality and opportunity."

Benjamin Hooks, the current NAACP exe cutive director, said Mr. Wilkins was "a towering figure in American history. His name will stand on top of the list of those His who loved their country and did their best to make it better."

Carl Holman, the president of the National Urban Coalition, said that "Roy was the last of a very special breed of black leader who saw himself as a kind of quiet militant very much concerned about—and devoted to—his people. And he was just as much a convinced patriot who believed his country could never be all that it was meant to be as long as it denied some of its people their rights.

Mayor Marion Barry of Washington said, Wilkins was a personal inspiration to me and countless other young people in the civil rights movement" who "left behind a legacy of achievement, of cooperation and of

progress."

The Rev. Jesse Jackson, the head of Operation PUSH, said Mr. Wilkins "bore more than his share of his responsibility for the nation's advancement."

The Wilkins way of getting things done usually was a slow, studied process, often involving expensive legal fights. Progress and setbacks frequently walked hand-in-hand, a frustrating fact to those who did not share his dedication to working within the system.

Frustration led to anger among many blacks; and anger led to the urban riots that set the 1960s ablaze on American soil.

In those turbulent days, Mr. Wilkins would remind his usually young and militant critics that he and his organization were working for civil rights long before they joined the cause. But NAACP membership rolls continued to decline, from a high of more than

500,000 in the 1960s to about 400,000 today.
Ironically, both Mr. Wilkins and his organization were victims of their own success. In many cities, black and white children go to school together today as if they had always been allowed to do so. Though a disproportionate number of blacks are in the nation's lower economic strata, a new generation of middle class blacks, largely beneficiaries of the battles fought by Mr. Wilkins, enjoys education, job and housing privileges once withheld from many of their parents.

In Marshall, Tex., for example, a black father recently told this reporter that once he "couldn't believe" that his children would ever be allowed to attend the formerly allwhite, now integrated, Marshall High School.

"But, damn, my girl is going to be teaching there this year," the man said. "Can you believe that? We used to walk way around that school when I was here," said the man, who taught at the formerly all-black Pemberton High School (now an integrated inter-mediate school) in Marshall, but who now works for the federal government in Los Angeles. "Things really have changed."

The man's daughter is in her early 20s. She knows about Roy Wilkins and his fight for civil rights because her parents taught her about the man and his work. But many of her black peers in Marshall say they never heard of Roy Wilkins, or have little knowledge of who he was.

"That's not only the case in places like Marshall. There are blacks in many cities

who knows little or nothing of Roy Wilkins and the NAACP," said Nathaniel Jones, who was the chief counsel of the NAACP for 10 years and now is a judge on the 6th U.S. Circuit Court of Appeals in Cincinnati.

"Roy used to say that the NAACP is in business to go out of business," the judge said. "Many of the people who don't know anything about him are where they are today because of his work."

Mr. Wilkins was a complicated man, ac-cording to those who knew him. Behind the doors of his New York City office, "he might explode" over a staff flub, one friend and associate said. "But he would never explode in public combat. He was a very smooth, uncompromising strategist in that the friend said.

The Wilkins manner was evident during the racial discord that erupted in Boston in 1974 and 1975 as a result of a school desegregation program requiring busing. The incumbent administration of President Gerald Ford, eyeing the upcoming 1976 election, critics say, indicated that it might side with antibusing forces led by the Boston School Committee. Vocally militant civil rights leaders such as the Rev. Jackson strongly attacked the Ford administration's approach to the Boston busing problem.

But Mr. Wilkins worked behind the scenes, urging his civil rights, business and labor allies to talk to Ford and Attorney General Edward H. Levi. The administration, which was leaning toward supporting the committee's request to delay implementation of the busing order, backed off.

Style can carry a lobbyist a long way in the corridors of Washington power, as Mr. Wilkins discovered in his relationship with

the late President Johnson.

Never were two men more different, Mr. Wilkins was the urbane scholar and editor he had worked as managing editor of the black Kansas City Call and had edited The Crisis, the NAACP magazine, from 1934 to 1949-who had spent more of his young adult life in an integrated neighborhood in St. Paul, Min. Johnson was the archetypical Texan, a political gute-fighter up from South Central Texas who twisted legislative arms with all the grace of a cowboy branding

With the civil rights cauldron coming to full boil in the mid-1960s, President Johnson needed an influential black he could trust much as Mr. Wilkins needed the power of the presidency to push civil rights programs through Congress. Mr. Johnson was attracted to Mr. Wilkins' penchant for thoroughly researching issues and options, his understanding of the uses of power, and his lack of an appetite for the limelight.

Roger Wilkins, an assistant attorney general in the Johnson administration, a jour alist and a nephew of Roy Wilkins, recalled that his uncle and Mr. Johnson "were always talking to one another, checking with each other.

The younger Wilkins said that he met Mr. Johnson at a reception in New York City six months before the former president died of a heart attack on Jan. 22, 1973.

"He asked me what I was doing, and I told him," Roger Wilkins said. "Then, I asked him what he was doing. He said he had left the presidency and was looking for work. So I told him that, as a private citizen,

he should speak up for civil rights.
"He said, 'That sounds like a good idea, but who can I talk to about it?' I told him he should speak to someone he knows and trusts, my uncle. He said, 'Of course, you're right about that.'"

A month before he died, after having talked with Roy Wilkins, Mr. Johnson addressed a civil rights conference at the Lyndon Baines Johnson Library in Austin, Texas, and "gave one of the best, goddamndest civil rights speeches you ever heard," Roger Wilkins said.

Roy Wilkins was born Aug. 30, 1901, in St. Louis, His parents were William D. Wilkins and Mayfield Edmondson Wilkins. His mother died of tuberculosis when he was 3. His father, alone and unable to care for Mr. Wilkins and his younger brother and sister, sent the three children to live with

an aunt and uncle in St. Paul.

The neighborhood in St. Paul where Mr. Wilkins lived was poor, but ethnically diverse, affording him an early opportunity to experience other cultures. He attended the city's nonsegregated schools, edited his high school newspaper and, in 1919, enrolled in the University of Minnesota, where he studied journalism and sociology.

Then as now, and even at a public institu-tion, college was expensive for the poor. Mr. Wilkins paid for his education by out stockyards and working as a dining car waiter and redcap, while holding down a position as night editor of the school news-

paper, the Minnesota Daily.

After receiving his bachelor's degree in 1923, Mr. Wilkins joined the staff of the Kansas City (Missouri) Call, one of a number of newspapers then exclusively dedi-cated to the interests of black Americans. He quickly became managing editor of the newspaper. But more than that, he developed a sense of moral outrage, largely because of the strick racial segregation that

existed in Kansas City.

"He came from a place which was relatively free of racial prejudice, for the times," said Lucille Bluford, a longtime friend of Wilkins who worked with him on The Call. "Black people couldn't go to certain places, live in certain places or do certain things in Kansas City then, and that really

got on Roy's nerves."

In addition to his writing, Mr. Wilkins began to work for the Kansas City branch of the NAACP. His efforts attracted the attention of NAACP national secretary Walter White, then the association's top official. White brought Mr. Wilkins to New York to work for the national organization.

To continue his education about what it was like to be a black in the Deep South in those days, Mr. Wilkins would disguise him-self as a laborer and travel through the region. On one of these trips, he and a black companion tried to get work on a federally funded construction project in Mississippi. Both got hired and both experienced poor

reatment on the job. The fact that Mr. Wilkins had no callouses on his hands aroused suspicion among white foremen that he was no ordinary field hand. Mr. Wilkins said he had been working lately as an elevator operator. His reports to the NAACP about his experiences led to a Congressional inquiry into racial discrimination on federal projects.

"Roy really loved his job," said Henry Lee Moon, who spent most of his adult life working as Mr. Wilkins' press secretary. "He was reluctant to leave office, and some people criticized him for trying to hold on to the position too long. But he was kind of that

This was his life's work," Moon said. "He was dedicated to it. It really meant a lot to

Mr. Wilkins is survived by his wife of 51 years, the former Aminda (Minnie) Badeau of Jamaica, Queens, N.Y.

THE JOY AND THE POWER-REMEMBERING ROY WILKINS' STUBBORN STRUGGLE

(By Roger Wilkins)

There is a picture downstairs in the family room in our house of a tall black man holding a little black baby. It was taken about 49 years ago on the day when my Uncle Roy and I were getting acquainted.

My mother, father and I lived in Kansas City then and Uncle Roy had just gone to New York to work for the great black scholar W. E. B. DuBols, at the NAACP magazine, The Crisis. During those years, my father,

Uncle Roy's younger brother, was very sick and my uncle would come from New York to visit us as often as he could. He was the tallest and handsomest man I knew and he would hang his pants on the closet door. I thought that was wonderful and so when I got tall enough, to my mother's dismay, I too, would hang my pants on the closet door.

Roy Wilkins wasn't famous in those days, and when he came to Kansas City for my father's funeral 40 years ago, he was just my kind uncle from New York. He took care of both Grandpa and me at the funeral and when they read thanatosis for Daddy, he touched my hand while Grandpa was ing. I didn't cry because Uncle Roy had told me that little men weren't supposed to do that.

As the years passed and my uncle became more prominent, I saw him through a double lens. He was the closet thing I had to my father, so I would watch him closely for hints of what my father might have been. And then when I grew up and went to the Justice Department, working on the northern urban riots, though he still hung his pants on the closet door, he was also my senior colleague in the civil rights move ment. He didn't want the world to think that he had created me and I didn't want the world to think I had a special pipeline to him. In fact, he hadn't and I didn't, but kept our distance so the appearance

would match the reality.

But there would be Christmas dinners when Uncle Roy would carve the turkey and slice the ham and Aunt Minnie would tell my children and me wonderful stories about my father and grandfather. Uncle Roy and I would talk baseball. He was a Dodger fan long before Jackie Robinson came into the league and he would use those long, graceful hands of his to show me how Pee Wee Reese

used to lay down a bunt.

Those long, graceful hands almost got him killed once. Thurgood Marshall told me that in the '30's, when he and Uncle Roy disguised themselves as sharecroppers and went to Mississippi to investigate conditions there, a white storekeeper in a little town noticed those hands and knew they were not a field

man's hands.
"Come on, Roy, let's get the hell out of here," Justice Marshall recalls saying.

So the two of them escaped, but Thurgood says they had been there long enough to get

what they were after anyway

Before he went to the NAACP, Uncle Roy edited a black weekly paper in Kansas City. He always loved the English language and through his years at the NAACP he kept an old battered Underwood next to his desk on which he would compose elegant statements and send or take them out to do the battle for justice to which his life was committed. He did other things in the movement, of course. He marched in demonstrations, he orchestrated the March on Washington in 1963, he met in rooms from battered in Alabama to the Oval Office on Pennsylvania Avenue to help shape strategies to secure more justice for Americans.

But it was the word he loved and used with joy and power in his life's fight.

In the '60s, people in the Kennedy administration would tell me that he was the civil rights professional on whom they relied. After that, he and Lyndon Johnson grew to love each other. They were men of the same generation, and both of moderate origins. Those associations enabled Uncle Roy to translate the turbulence in the streets into visions of future that were comprehensible to Washington policy-makers. In that way, Uncle Roy and Martin Luther King were closer partners than either of them ever acknowledged. They had different ways of pursuing freedom, you see, because Martin usually fought with the masses behind him on the streets, and Uncle usually fought behind closed doors. They didn't always

understand each other's way.
Uncle's hand was large in the Civil Rights Act of 1964, the Voting Rights Act of 1965 and the Fair Housing Act of 1968. And so was Martin's. They were opposite sides of an honorable coin. And they did support each other. I ran into Uncle Roy one day in the mid-'60s at the shuttle terminal at a did dia Airport. "Where you going?" I asked. mid-'60s at the shuttle terminal at La Guar-"Down to see [J. Edgar] Hoover," he replied,
"to try to get him off of Martin's back."
A couple of weeks later I saw Martin at a meeting where young militants were calling my uncle an "Uncle Tom" because of his rce belief in integration.
"Tell Roy I'm with him," Martin said.

Uncle Roy won a lot of honors, the greatest of which was the love and the trust of the people in the NAACP who could afford only to pay \$2 for their memberships. Some of my most vivid memories of him were in airports with redcaps shaking his hand and thanking him earnestly for the work he was doing. He loved that because he had once been a redcap himself.

He always had time for the longest local NAACP chapter meetings and then for the last person in the room who wanted to talk to him after that. When I was a kid in Harlem, he would sometimes take me to nearby meetings and when I would come home hours later, I would tell my mother: "Uncle Roy stayed to talk to the last old lady again."

And he was stubborn. Once when he was down at the LBJ Ranch, near the end of the president's life, Uncle Roy decided that he was tired and started up to bed. President Johnson told him it wasn't time to go to bed because the late news hadn't come on yet.
"Mr. President," Uncle Roy replied, "no-

body has told me what time to go to bed since my mother died, and that was a long time And then he went to bed with the same dogged stubbornness which he had brought

dogged stubbornness which he had brought to the civil rights struggle. We were very different, Uncle and I, but we loved each other very much. Now he has gone to his final rest and the family is gathering. So it is time for me to get my pants

down from the closet door and go.

[Editorial] ROY WILKINS

Today's young Americans of all races may read with a certain understandable detachment about life in this country 50 years ago, when Roy Wilkins began his distinguished career with the National Association for the Advancement of Colored People, Lynch law and Jim Crow were teamed in a cruel reign through southern and border states that slammed doors and gates in the faces blacks. Restaurants, hotels, theaters, drinking fountains, beaches, pools and entire neighborhoods were blatantly segregated— and heaven help any Negro objector because the law certainly wouldn't. Mr. Wilkins, who died yesterday at the age of 80, had more than a routine role in all that has changed

Through those dangerous days down South and on into the years of more subtle but persistent discrimination in all regions of the country, Mr. Wilkins kept up the battles for equal justice under the law. In the courts, in the legislatures, in the city halls and in the schools, this ardent and idealistic man approached each of these challenges with intelligence, unshakeable faith, grace, rage and plenty of research.

Because Roy Wilkins chose not to rail but. to persuade, not to tear down but to con-struct, not to shoot from the hip but to and resources, there were some in the civil rights movements of the '60s and '70s who became impatient with his style and pace. But for the most part, they still respected Mr. Wilkins for his incalculable contributions during so many of the most important moments in U.S. civil rights history-and for the fact that he guided the country's oldest civil rights organization through its greatst growth and period of prestige.

It was the successes of this pioneer, in fact, that made the issues confronting the NAACP and other newer organizations that much more complex and the views of black Americans that much more diverse. The days are past when the NAACP could set directions almost by itself. And if Mr. Wilkins could not comprehend or countenance some of the methods and directions of certain of those groups in his later years, he nevertheless spoke out for freedom and understanding: "All dedicated hands are needed and welcome in this fight," he once said, the NAACP would be less than human if it did not take a special pride not only in what it has done but in what it is doing today."

There is no question that this is a better country for those deeds-and for the guid-

ing hand of Roy Wilkins.

OIL DEREGULATION PROVES FREE MARKET IS BEST SOLUTION

Mr. McCLURE. Mr. President, I want to bring to the attention of all my colleagues a front page story that appeared in the New York Times on Tuesday, September 8

Headlined, "Economic Gains Tied to Ending Oil Price Curbs," the article by Douglas Martin deals with the many benefits which have resulted from the Executive order issued by President Reagan on January 28, 1981, removing price controls on crude oil.

One sentence from the story succinctly sums up its findings:

Interviews with more than 40 Government officials, industry leaders, economists and analysts clearly suggest that removal of crude oil controls, in place since 1971, has helped improve the United States' energy and economic picture.

Benefits linked to decontrol include a decrease in the demand for gasoline and other petroleum products, a decrease in oil imports, an improvement in the Nation's balance of trade and a lessening of the decline in U.S. domestic oil production.

These facts are particularly significant because when the President removed controls, many voices were raised denouncing the move and issuing dire predictions of economic chaos. In fact, none of those warnings, issued with such certainty and buttressed with learned studies and econometric models from some of our leading financial and economic institutions, have proven to be correct, including the assertion that decontrol would result in an immediate and astronomical jump in the price of gasoline. Mr. Martin states that the average price of a gallon of gas in July, the latest available figures, is identical to what it was in February immediately after decontrol.

Besides improving our total energy picture, the results of decontrol over the past 7 months prove once again that the free market mechanism is a far better alternative than a falsely manipulated economy with stringent price controls or cinillar adjustments.

That is the most important lesson to be learned from this experience and one which I hope will be borne in mind by

my colleagues as we confront our other economic problems.

The entire news article follows:

ECONOMIC GAINS TIED TO ENDING OIL PRICE
CURBS

(By Douglas Martin)

Since the Reagan Administration removed controls on crude oil prices more than seven months ago, Americans have substantially curbed their demand for petroleum, oil imports have fallen by a fifth and evidence is mounting that decontrol may help stem the long decline in United States oil production.

As a result, the White House now boasts that oil decontrol—greeted with storms of disapproval when it was announced on Jan. 27—may be the Administration's third-biggest victory, trailing only Congress's approvals of its budget and tax proposals.

The response has been terrific," Secretary of Energy James B. Edwards said in an interview. "We're not free yet, but we're certainly moving in the right direction."

ANALYSTS ARE OPTIMISTIC

"If we had predicted all these gains in January, everyone would have said we were just a bunch of crazy right-wingers," said a White House official who declined to be identified

Some consumer groups complain that oil companies are reaping huge profits at a time when many people will be hurt both by price increases and cutbacks in social welfare programs. But the White House's enthusiasm over oil decontrol is shared by others.

Interviews with more than 40 Government officials, industry leaders, economists and analysts clearly suggest that removal of crude oil controls, in place since 1971, has helped improve the United States's energy and economic picture.

In particular, some economists argue that the nation's balance of trade has been aided by the oil import reduction, that this has helped to strengthen the dollar and that inflation has therefore been somewhat less than it otherwise would have been.

Moreover, these benefits have occurred with relatively little of the consumer pain many predicted when the President lifted controls. Gasoline and heating oil price rises have not exceeded the general inflation rate, and energy experts are convinced that the ending of price controls has helped put the brakes on world oil prices.

To be sure, President Reagan's decision to end oil controls simply accelerated a program President Carter began on June 1, 1979. Without Presidential action, controls would have expired on Sept. 30, when a gradual phaseout of controls would have moved prices to the world level.

The policy has not been without critics. Consumer groups, which adamantly fought the Carter Administration's initial policy, assert that the cost far outweighs the benefits. Critics also charge that oil companies are reaping huge undeserved profits, that with the Administration cutting "safety-net" social welfare programs, poor people will be severely hurt this winter and that there is not much oil to be found in this country regardless of price.

"CHARGING EXTORTION PRICES"

"What we have is a handful of companies charging extortion prices," said Ellen Berman, executive director of the Consumer Energy Council.

In any case, what some economists and others see as the apparent success of decontrol is partly a matter of some long-range rends prodded by the elevenfold increase in prices since 1973. Americans had already begun to use less gasoline, heating oll and other petroleum products, while oil executives have followed the lure of higher prices to look for oil in more difficult surroundings.

One result is that analysts agree there could scarcely have been a more propitious

moment for decontrol. Currently, worldwide oil inventories are at near-record highs, oil demand in the United States is down 7 percent this year following an 8 percent drop last year and output by members of the Organization of Petroleum Exporting Countries has dropped by a third in just two years.

"Decontrol was a desirable thing to do, but the Administration has been frightfully lucky," James R. Schlesinger, a former Secretary of Energy, said in an interview.

Perhaps the most cheering news is on the price front. After shooting up by more than 10 cents a gallon immediately after decontrol, pump prices have dropped and lagged behind the infiation rate over recent months. The Energy Information Agency reports that the national average gasoline price in July, the latest figure available, slipped to \$1.35 a gallon, the same average price as in February.

FIERCE COMPETITION CITED

Industry analysts attribute the weakness in gasoline prices to fierce competition among refiners and marketers, who have been unable to pass on more than half of the 20-cent-a-gallon increase in the cost of crude

Consumers are also being helped by the tough posture United States oil companies have begun taking in price negotiations with producing nations. In large part, this results from the end of a feature of the controls program that required refiners of low-cost domestic oil to reimburse refiners of high-cost foreign oil in an attempt to equalize all crude oil acquisition costs in the United States.

Oil analysts trace the companies' hardnosed bargaining with Nigeria, which recently cut its oil prices by \$4 a 42-gallon barrel, to this change.

Moreover, a number of experts contend controls had the perverse effect of actually increasing consumer prices, rather than holding them down. An analysis by William C. Lane, former head of the Energy Department's Office of Competition, found that, in the \$15 price runup that accompanied the Iranian revolution in 1979, price controls in this country may have been responsible for more than \$6 of the increase in world prices.

Among other things, Mr. Lane argues that price controls artificially increased demand in this country, spurring United States oil companies to bid up prices on the spot, or noncontract, market early in the crisis. In turn, OPEC members quickly raised their official prices to the spot level.

Economists thus suggest that the removal of oil price controls is actually contributing to the fight against inflation. "We would have been better off to have done it earlier," said Otto Eckstein, the president of Data Resources Inc., who once opposed decontrol because of fears of its inflationary potential.

The import reduction, partly the result of reduced demand caused by decontrol, has been dramatic. The American Petroleum Institute reports that imports in the first six months of this year plunged 20 percent, to an average of 5.9 million barrels a day. That follows a 25 percent drop in 1980, when controls were being phased out.

This sharply lower demand, which has been accelerated by a worldwide recession, is cutting into OPEC's output. Its production has dropped by a third over the last two years, to around 20 million barrels a day. "Demand for OPEC oil is going to be lower, and there will be less room for OPEC to dictate prices," said Lawrence Goldstein, research director of the Petroleum Industry Research Foundation.

Not all the apparent good news is on the production side. Evidence is building that the United States may be on the way to at least partly stemming the steady decline in its oil reserves that has persisted for more than a decade. Prodded by higher prices resulting from decontrol, some 4,194 drilling

rigs, the most in history, were boring holes in the ground on Aug. 31.

Moreover, the Petroleum Information Corporation, an A. C. Nielsen subsidiary that follows industry trends, reports that the number of new field wildcats, those wells most likely to discover big new finds, increased 32.5 percent in the first six months of 1981, leading optimists to predict the United States may ultimately be able to produce more oil each year than it uses, something that has not happened since 1970.

FIRST TWO-MONTH INCREASE

This hope is buttressed by the fact that, in both June and July, domestic oil output increased compared with levels of a year earlier, the first two-month increase since the Arab oil embargo of 1973.

"Somewhere along the way, we're going to find some big, big fields," Energy Secretary Edwards said.

Nonetheless, production of oil in this country is still declining, albeit at a slower rate. The American Petroleum Institute reports that the rate of decline in the first six months of this year was 50,000 barrels a day, compared with an average 300,000 barrels a day in each year of the 1970's.

Skeptics suggest this apparent turnaround does not mean more oil is being found. Rather, they argue, fields are simply being produced faster in response to higher prices.

"We're still headed down, and we're going to be headed down for a long, long time to come." John F. O'Leary, Deputy Energy Secretary in the Carter Administration, said. He further predicts that the industry will not be able to sustain its frantic drilling pace, and that activity will subside in about a year.

Just as ample world oil supplies have so far cushioned the impact of decontrol, energy experts point out that the new free-market energy environment has not yet been tested in the winter months, when oil use historically increases by some four million barrels a day.

"The human cost in the summer is that people drive a little bit less," said Dennis Hayes, until recently director of the Solar Energy Research Institute. "The human cost in the winter is cold rooms."

The oil industry is not wholly enthusiastic about every aspect of decontrol. In particular, oil executives lambast the so-called windfall profits tax, which takes about 80 cents of each additional dollar they make from decontrol, garnering for the Federal Treasury more than \$16.7 billion this year alone. The tax has been weakened by Congress.

"What we have is pseudo decontrol," John K. McKinley, chairman and chief executive officer of Texaco Inc., said. He added that, in the second quarter of 1981, Texaco paid \$320 million in "windfall profits" taxes, surpassing its total earnings in the United States by more than \$100 million. Texaco's worldwide second-quarter earnings were \$555.7 million.

The refining industry has particularly suffered under decontrol. Consumer demand has softened unusually while crude oil costs have been allowed to rise. The result is that about 50 refineries, with a capacity of processing about one million barrels dally, have closed or suspended operations this year.

Accordingly, the Oil and Gas Journal predicts that oil company profits will only increase 2.8 percent this year, compared with increases of 28.2 percent in 1980 and 73.4 percent in 1979.

"It obviously has not been a bed of roses for the oil industry," Charles DiBona, the petroleum institute's president, said. Nonetheless, nobody disputes that the oil industry has benefited tremendously from the enormous runup in oil prices since 1973. Oil companies—many of which were struggling in the 1960's—now account for about a third of corporate profits.

KARL G. SMITH, FRIEND OF THE SOUTH CAROLINA FARMER

• Mr. HOLLINGS. Mr. President, I would like to take this opportunity to say a few words about a friend who has contributed greatly to the State of South Carolina and in public service to our country. I refer to Karl G. Smith of Lake City, S.C., the director of South Carolina's Farmers Home Administration

programs from 1977 to 1981.

Better known by his friends as "K. G.." Mr. Smith, an amiable, hard-working man, became a proven friend of the South Carolina farmer during his tenure with Farmers Home. Due to his experience in running a tobacco, corn, soybean, and cotton farm and a farm equipment sales and services company, which in-cludes seed, feed, and mobile feedmill functions, K. G. came to Farmers Home with a keen insight into the needs of farmers and with an understanding of the technological innovations necessary to make farms more productive. As the Farmers Home Administration's chief administrator in South Carolina, he showed that he did not only know the farmer but he knew how to make Farmers Home work more efficiently and effectively to serve the farmers and South Carolina's rural communities.

Under K. G., the Farmers Home Administration in South Carolina made a record number of loans, improved reachout and communications with the farming community, and streamlined its own management. From 1977 to 1981 over 22,000 loans amounting to nearly \$1 billion were made. In 1980 alone, 5,516 loans amounting to \$303.2 million were made to farmers and farm-related businesses. Seventy-five of the loans in 1980 went to rural businesses and industries creating nearly 1,000 new jobs. The Farmers Home Administration, also during this period, provided a record number of housing and farming loans to minorities. Forty-two percent of all housing loans in 1980, 1,209 of 2,873, went to minorities and an additional 318 farming loans were made to minorities in that same year. And still further, K. G. Smith's efforts with the rural health initiative loans became a model for the Nation making loans of \$8,160,000 in 1979 and 1980 to develop comprehensive planning for rural development.

I know in some respects these facts and figures may be difficult to comprehend but the farmers of South Carolina are comprehending them every day. As a result of K. G. Smith's effective leadership at the Farmers Home Administration, the South Carolina farmer is doing better and will continue to do better for years to come. I thank him for his dutiful public service and his dedication to

South Carolina's farmers.

OLDER AMERICANS EMPLOYMENT OPPORTUNITY WEEK

• Mr. HAYAKAWA. Mr. President, as Robert Browning said: "Grow old with me; the best is yet to be."

September 6-12 is a special week in the lives of American senior citizens. I was especially pleased to sponsor Senate Joint Resolution 92, which officially declared this week "Older Americans Employment Opportunity Week." I began my fourth career at age 70 when I was elected to the U.S. Senate. I would like to examine the valuable role of older workers throughout our history and encourage employers to take advantage of the great untapped potential of the older worker's tremendous experience and knowledge.

Older Americans' employment is not a new idea in the United States. Many of our Founding Fathers fought for independence and shaped a new government during their senior years. Benjamin Franklin was 70 years old when he was appointed to the committee that wrote the Declaration of Independence, and he pursuaded France to recognize the United States as a country when he was 72. Probably his greatest contribution to this country came when he was 81 years That is when he almost singlehandedly convinced the factions of Congress, and of course we know there are always factions, to compromise on our Constitution. It is a good thing he stayed in the labor force past 65. We might not have a Constitution or a country today.

Thomas Jefferson founded the University of Virginia when he was 76. Thomas Alva Edison kept inventing long after his 65th birthday. George C. Marshall was 67 when he designed the European recovery program, for which he received the Nobel Prize. In many other parts of the world people hold their elder statesmen in high esteem. Winston Churchill and Chancellor Adenauer served their countries and the world for many years while a prejudice was growing in the United States toward more youthful elected officials. I am glad to say that this prejudice has been greatly reduced in recent years. Our President is managing our country beautifully at age 70. Certainly for him the best is yet to be.

There is always something new to tryand we only have one life in which to try it. To the surprise of some of my acquaintances, I have taken up scuba diving, and am now fully certified. I found beginning dives both exhilerating and frightening. I find it extremely exhilerating that I am doing this, and I do not find any difference in my sensations under these circumstances that I would be experiencing if I were 25, 50, or 60. It is just an exciting thing to do. It is also frightening. But if you cease to do the frightening, then you become old. You might as well retire. I, personally, am not ready to retire. There is scuba diving, and not only that, there is the U.S. Senate, which is one tremendous learning

I have had several careers as a semanticist, teacher, and university president. I am currently in my fifth year of my first term as a Senator, and actively campaigning for election to my second. After all, my mother is 97 years old, and still doing quite well. My father died at age 91. I will be well into my fourth Senate term when I reach 90. Think of the great Japanese painter, Hokusai. When he was about 96 years old he was still a productive painter. He said:

If God only grants me to live until I'm 100, maybe I'll learn to draw.

This idea of the years beyond the age of 70 being years of fulfillment and challenge and excitement, these are things, I think, that come from the inside. It comes your cultivation throughout your whole life.

My own father is an example of the potential contributions of employed older Americans. He made a decision to get busy, after his entire business in Japan was wiped out by the Second World War. After the war he went to work for others, which was very difficult for him. In 1950, he decided to start all over again and reincorporate his own firm. He was a real free-enterpriser. I was at that time teaching in Chicago. He wrote to me about his decision, and I was very impressed, that at the age of 66, he would want to start his own company. He asked me, "What do you suggest I call this company?'

I remembered a slogan of his since he was in international trade, and I suggested to him, because of the slogan, "World Unity Through World Trade," and I said, "Why don't you call your company Unifast Trading Co.," and he thought that was a very fine idea.

He started out. He died in 1976 at the age of 91. The company—he was an old fashioned importer, and did not share in the export boom, but he did manage to put together a company that survived. It still is in existence, although he retired from it about 8 years ago.

I remembered that time, and I told myself that I should never let the matter of age stand in the way, and that has been a very inspiring example to me.

I reached the age of 65 while I was still at San Francisco State as president, and because of the system they had there, there was no mandatory retirement, but after 65 we were appointed on 1-year terms. So, I stayed until I was 66. Then in 1973 I accepted retirement, and I think my students and my colleagues

gave a great sigh of relief. When you are 65, you have proved yourself already or you have not. It does not matter any more. You have proved yourself as much as you can. So in a very important sense, those of us who are past the age of 65, we are no longer on the make. We are no longer the kind of opportunitist we were at 40. In a very important sense, it seems to me we are not as prone to succumb to temptations of power, influence and money, as we might have been after 25 or 30 years of living. But we bring something else to the job that the 40-year-old cannot bring, and that is a perspective, shall I say wisdom, from not only having lived through other things, being alive through many things that young people have read only in text books, but were actually happening when we were alive. The New Deal is not something we read about in text books. We lived through that.

Therefore, political life, and whatever else, it seems to me, to be something which we can contribute a lot simply because we can devote our tasks to different attractions.

There are certain people who work who have proved to me to be a constant inspiration. I am a student and collector of art, and so I will just take some examples from that. But if you look at something you realize that that artist got past all of his inhibitions, and arrived at a freedom of expression.

If you look at Picasso's career, at a very late age he picked up ceramics for the first time, and everything he touched he turned to magic, and he went on and on and there was a whole series of little periods in Picasso's artistic career. As he got to be 80 or 85, new things were beginning to happen constantly in Picasso's life.

So why have an Older Americans Employment Opportunity Week? It recognizes older workers as capable individuals who have contributed much to our society through their services to others. Only one person in five over age 60 is now employed, but millions more older Americans would like full or part-time work. It is my hope that the national recognition provided will help to break down the stereotyping and discrimination that too often influences employers' attitudes toward the older worker.

For all senior citizens who want a first, second, or third career the best is yet to

be.

THE VOTING RIGHTS ACT

• Mr. HART. Mr. President, yesterday the U.S. Commission on Civil Rights issued an important report adding weight to a growing consensus that Congress must extend the full force of the Voting Rights Act for 10 more years.

The report, based on an extensive review of court cases, Justice Department files, and interviews provides ample evidence that minorities in this country continue to face substantial barriers to full political participation. The Voting Rights Act has not outlived its usefulness, as some would suggest. It is working, but its goal is not yet fulfilled.

The Civil Rights Commission is an independent, bipartisan agency established by Congress to, among other things, appraise Federal laws with respect to discrimination. Its findings concerning the Voting Rights Act deserve our careful attention. I urge my colleagues to study these findings, and join the effort to insure this historic act is extended and enforced until its promise is permanently realized.

I ask that the findings of the Commission be reprinted in the RECORD, at this

point.

The findings follow:
THE VOTING RIGHTS ACT: UNFULFILLED
GOALS

(A Report of the United States Commission on Civil Rights, September 1981)

FINDINGS

Results of the Voting Rights Act

- The number of minorities who have been elected to public office has increased since the Voting Rights Act was extended in 1975.
- a. In 1974, 964 blacks held public office in the six States, plus North Carolina that were subject to preclearance in 1965 and 1970. In July 1980, 2,042, blacks served as elected officials in these states.
- b. In 1979-80, 1,138 Hispanics had been elected to public office in Arizona and Texas, the two States made subject to preclearance by the 1975 amendments to the Voting Rights Act.

Despite considerable progress, however, minorities continue to constitute a small percentage of elected officials in virtually all states covered under the preclearance provisions. Blacks constitute no more than 8 percent of all elected officials in Alabama, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Texas and Virginia. Hispanics constitute 13 percent of all elected officials in Arizona and 6 percent in Texas. Most minority elected officials are in local positions, such as school board members. Few minorities have been elected to the U.S. Congress, to State senates, to county governing boards, or to law enforcement positions, such as sheriff or county judge.

as sheriff or county judge. 2. The number of minorities who have registered since the initial passage of the Voting Rights Act has been substantial. For example, 7 percent of voting age blacks in Mississippi were registered immediately prior to the passage of the Act. Within two years, 60 percent of voting age blacks in Mississippi were registered. Registration rates for minorities continue to lag well behind the rates for whites, however. According to a 1976 Bureau of the Census survey of registration in jurisdictions covered by the preclearance provisions of the Voting Rights Act, between 63 and 78 percent of whites were registered in these jurisdictions, contrasted with between 44 and 69 percent of minorities. Only two States under statewide preclearance cov-erage (Louisiana and South Carolina) and North Carolina maintain registration data by race. In two of these States-Louisiana and North Carolina-black registration rates in 1980 continued to be substantially lower than white registration rates. In Louisiana. South Carolina, and North Carolina the white registration rates were 76 percent, 62 percent, and 72 percent; in contrast, the black registration rates were 61 percent, 56 percent, and

55 percent.

Continuing problems in registration

3. In the Commission's study of voting problems in 70 jurisdictions covered by the preclearance provisions, some minorities found registration officials discourteous or openly hostile and intimidating when they attempted to register. Requests for unnecessary personal information by officials also were found to intimidate minorities. Building on the blatant and pervasive discrimination against them in the past, the present attitudes of registrars deter minorities from registering.

4. Registration in the jurisdictions studied often took place in locations (e.g., county courthouses) or at times that were particularly inconvenient for minorities, a disproportionate number of whom are poor and live in rural areas unserved by public trans-

portation.

- 5. Alternative registration procedures, including the use of deputy registrars and satellite registration offices in minority communities, could result in substantial increases in minority registration. Minority organizations, however, have had a difficult time convincing registration officials of the need for such alternative procedures. Some have had to appeal to State legislators or to other officials or organizations to obtain more accessible registration.
- 6. In two instances the section 5 preclearance process prevented the implementation of purging and reregistration procedures that could have had a negative effect on the number of minorities who were registered to vote.

Continuing problems in voting

- 7. In several jurisdictions studied, all polling places were located in predominantly white communities or in buildings that housed all-white organizations or were in areas not served by public transportation. Such locations deter minorities from voting.
- 8. Two States, Louisiana and Mississippi, enacted legislation restricting assistance to

illiterates. The Department of Justice objected to the legislation submitted by Mississippi, but not to that from Louisiana. Commission interviews in Louisiana indicated that some blacks in that State who needed assistance at the polls were unable to vote as a result of this legislation.

9. Minorities continued to be harassed or

Minorities continued to be harassed or intimidated by election officials when they

attempted to vote.

Continuing problems in fair representation

10. In jurisdictions subject to preclearance that were included in the Commission study, minorities faced numerous barriers to electing the candidates of their choice. These barriers included the following:

riers included the following:

a. Minorities have rarely been able to win elections in the large number of jurisdictions subject to preclearance that have at-large election systems and where racial bloc voting exists. The use of at-large election systems severely limits the ability of minority communities to elect the candidates of their choice.

b. Numerous voting rules continue to limit the ability of minorities to be elected to public office. These rules, which dilute minority voting strength, include majority vote requirements, anti-single-shot voting rules, numbered posts, residency requirements, and staggered terms. These rules often are coupled with at-large election systems. The result is that minority voting strength is substantially weakened in jurisdictions where racial bloc voting continues to be the predominant political pattern, and minority candidates have little or no opportunity to win election.

little or no opportunity to win election.

c. Annexations and consolidations have had a negative effect on minority voting strength. Some jurisdictions have attempted to annex predominantly white areas or areas zoned for middle income housing, thereby decreasing minority voting strength in the annexing jurisdiction. Other jurisdictions have refused to annex predominantly minority areas even though these areas have sought annexation.

- d. Jurisdictions have drawn boundaries with the purpose or effect of diluting minority voting strength. They have split areas with a high concentration of minorities into several districts, so that minorities do not represent a substantial proportion of the population in any district. They also have created redistricting plans in which minority voting strength in the new districts is less than that in existing districts.
- e. Some minorities who attempt to run for political office are intimidated, harassed, or threatened. Often they do not have the same access to all voters as do white candidates because predominantly white civic and partisan organizations do not support their candidacies.

Preclearance and noncompliance

- 11. The Department of Justice issued objections to over 700 proposed changes submitted by jurisdictions subject to preclearance between 1975 and 1980. Most of these proposed changes involved election rules which, if they had been implemented, would have diluted minority voting strength. The largest number of proposed changes involved attempts to annex predominantly white areas or areas zoned for middle-income housing. Other changes to which the Department of Justice frequently objected included changes to at-large election systems and to the use of the majority vote rule, which requires winning candidates to receive a majority of the votes cast rather than a plurality.
- 12. Although covered jurisdictions are required to preclear all proposed changes in election rules which with the Department of Justice or the U.S. District Court for the District of Columbia, this requirement is sometimes violated. Moreover, some jurisdictions have enforced changes to which the Department of Justice has interposed objections without obtaining the required declaratory judgment of nondiscrimination from the U.S.

District Court for the District of Columbia, in violation of section 5 of the Voting Rights Act.

Minority language provisions

13. Lack of bilingual voter education services, bilingual oral assistance for registering and voting, and the lack of publicity about the availability of bilingual election services severely hampers the effectiveness of the minority language provisions and limits the ability of language minorities to register and vote.

14. There has been minimal enforcement of the minority language provisions by most of the 8 U.S. Attorneys interviewed.

THE POLITICAL MOVEMENT OF THE NEW RIGHT

Mr. GOLDWATER. Mr. President, during the past 18 months to 2 years, the so-called New Right has proclaimed itself to be a fundamentally moral force to enhance the Biblical concepts in our everyday lives. There is nothing wrong with a strong dose of Biblical morality in our lives, a concept which I agree with, but, I do object to the idea of using religion as a political force. And this is precisely what these new religionists have decided to do. Just a few blocks from this building is an office set up by these people as a leadership training center established to show men and women of this supposedly religious movement how to register, organize, and mobilize the voters.

Mr. President, in a recent article in one of their own magazines the political aspirations of these people is clearly laid out. And, after reading the article it is pretty clear that we should call a spade a spade and put the accurate label of a political movement on these people. If we continue to mislabel them as religious factions then we will only delude ourselves into a trap that we may not be able to get out of.

Mr. President, I ask that this article be entered on the Record, for this is the best way that we can learn, from their own words, exactly what they have in mind.

The article follows:

WORLD EVANGELISM—MORAL MAJORITY: HERE TO STAY

"Moral Majority is not an election year phenomenon," declared Dr. Ronald Godwin, vice president and chief operations officer as he addressed a cadre of leaders from all 50 states during a summit meeting in Lynchburg, Virginia. "We are gearing up for the long haul," he continued. "We're here to stay!"

After the clear, concise conservative victory in the November election, much of the media credited such organizations as the Moral Majority and the Round-table for creating the dramatic upheaval in the presidential landslide and radical change in the make-up of the Senate. But, these organizations are not claiming credit.

"Isn't it funny that the media has never given God any credit for the election turnaround?" asked Dr. Charles Stanley, pastor of First Baptist Church, Atlanta, and a member of the board of directors of Moral Majority. "The Bible clearly states that He rules in the affairs of men," he continued.

Eighteen months ago, a group of religious leaders headed by Dr. Jerry Falwell became alarmed at the declining morals in our country. Together with Falwell, Dr. Greg Dixon, pastor, Indianapolis Baptist Temple, Dr. Tim

LaHaye, founder of Christian Heritage College, El Cajon, Calif., Alan Dye, tax attorney, Dr. Bob Billings, past president of Hyles-Anderson College, Dr. Charles Stanley, pastor, First Baptist, Atlanta, and Dr. James Kennedy, pastor of Coral Ridge Presbyterian Church, Ft. Lauderdale, Fla., organized Moral Majority.

"Despite the moral sickness which pervades our soc.ety," Falwell said, "God is not finished with us as a nation. America has more God-fearing citizens per capita than any other nation on earth. There are millions of Americans who love God, and decrease and Bible morality." he helicros.

any other hation on earth. There are linilions of Americans who love God, and decency, and Bible morality," he believes.

During its first year of operation, Moral
Majority emphasized voter registration and
the acquiring of name recognition. "These
goals have been met several times over," says
vice president Ronald Godwin. "Three million plus taxpayers have been influenced by
the Moral Majority to register. The Moral
Majority and its product, the swelling tide of
evangelical political activits, have been the
in subject for the national media."

One of the top priorites of the Moral Majority national office, located only a few blocks from the nations capitol in Washington, is in leadership training. Their goal will be to develop men and women to know how to register, organize and mobilize previously passive voters. This leadership cadre will be taught how to raise funds for their state affiliate, how to work with the press, radio and television, how to inform the electorate about key legislative issues, how to work with incumbents, how to conduct successful training seminars and rallies on the state and local levels and many other immediately practical political skills.

Beginning in January, Moral Majority, Inc. will hold a series of regional conferences for state chairmen, board members, executive directors, key pastors and lay supporters of the movement. The conferences will feature a series of outstanding workshops, panel discussions, and debates. Television, radio, and press interviews will be demonstrated by Mr. Cal Thomas, Vice President of Communications for Moral Majority, and Mr. Harry Covert, Editor of the Moral Majority Rejort. Conference attendess will practice conducting press conferences and interviews via the use of closed circuit color television equipment.

Pastors and professional and lay leaders will profit from the political expertise and wisdom of a blue ribbon panel of seminar speakers. Of course, Dr. Jerry Falwell, president of Moral Majority, will often be the featured speaker.

In conjunction with regional conferences and training seminars, Moral Majority, Inc., plans to immediately begin producing literature and material for educating and informing the great volunteer army across America. Every pastor, every school principal, and every concerned layman will be encouraged to develop a personal library of political awareness materials.

"We are engaged in a battle for the minds of men." said Ron Godwin. "The citizen leader who wants to be effective must accept the responsibility for his own education. The problem is that the information and the training that the concerned citizen needs is not available in any college or high school classroom in America. Therefore, the Moral Majority, Inc. will make available to its constituents a wide variety of reliable books, tapes and materials."

Beginning this summer, Moral Majority, Inc., in concert with Liberty Baptist College, plans to sponsor the most successful candidate training program in America. Their goal is to raise the moral conscience of this nation and to create the climate necessary to successfully provide moral leadership. Any goal less ambitious is not worthy of the movement. "It is not enough for us to simply op-

pose liberals and bad government. We must elect moral leaders," Godwin believes.

In order to dramatically prove the ability of their Washington office to react to fast-breaking legislative events, they plan to install a phone bank there. The phone bank will give the Washington staff the capability of phoning legislative alerts to their constituency in any or all 50 states at an hour's notice.

When incumbents on the Hill learn that the Moral Majority not only has 50 strong, viable affiliates in every state in America but also has the latest tools for communicating with and activating that vast volunteer army of moral citizens, their task of creating a climate in which it is easier for politicians to vote right than wrong will be much enhanced.

ADDRESS BY DR. DAVID ABSHIRE AT JAPANESE-U.S. OCEAN FORUM

O Mr. Deconcini. Mr. President, during the August recess, in addition to several trips to Arizona, I had the pleasure of being asked to participate in the Japanese-United States Ocean Forum held in Tokyo, Japan, August 29-September 2. The trip was not funded at Government expense. During this forum a number of outstanding speeches were delivered, including one by Senator Sam Nunn.

The Chairman of the Georgetown University Center for Strategic and International Studies, Dr. David Abshire, delivered to the full delegation and other observers an outstanding dissertation which I commend to my colleagues. Mr. President, I ask that Dr. Abshire's statement entitled "Speech for Maritime League" be printed in the RECORD.

The statement follows:

DAVID ABSHIRE: SPEECH FOR MARITIME LEAGUE

Ten years ago we began our program of collaboration on maritime and security issues. For our part, from the beginning, we have felt that, aside from the high quality of our mutual exchanges, we have had the opportunity to exchange views, to understand each other better, and, above all, to become better friends.

Aside from our long-term relationship, we have had another unusual element in our dealings with each other. That has been our willingness to sit down at the same table, to discuss matters of concern to both sides, even if those subjects might go beyond maritime or military issues to include discussions of the future shape of the Japanese-American alliance relationship itself. In a way this bilateral forum has been ahead of many others, in that we have sought from the beginning to place our mutual ties in a broader context—on a level which reflects the changed and more complex nature of the new US—Japan relationship. In fact, our joint institutional perspective on US—Japan affairs may well have stimulated others to energe in similar programs.

engage in similar programs.

Beyond that, our long association gives our meetings a special significance, in that we might be able to look at our bilateral relations from a broader perspective. The Center has been seeking to engage in its programs a variety of people, to draw on a variety of viewpoints, and to appeal to a variety of audiences that will enable us to fill a key role in influencing American policy

toward Japan.

In addition to our many programs at the Center, we have augmented our staff and have stimulated our programs over the past decade on the energy and security areas. Recently we have engaged three senior people at our Center—Henry Kissinger, James

Schlesinger, and Zbigniew Brezinski-in discussions on key foreign affairs questions, especially on Japan and the United States.

We have started a new program on U.S.-Japan relations. Dr. Michael Blaker, who has been a senior research associate at Columbia University's East Asian Institute and director of a U.S.-Japan project at the Council on Foreign Relations, will now be directing Japan-related programs at the Georgetown Center.

At the moment our plan is to focus on four key dimensions of the evolving U.S .-Japan security relationship, with "security" defined in the broadest sense: energy politics, approaches toward Asia, military-defense, and styles of diplomatic communicaand interaction. Each of these facets of the relationship, in turn, will be linked, and examined against a background of the emerging directions of U.S.-Japan relations, the persistent problems encountered in the two countries' interactions, and the feasibility of proposed approaches aimed at improving the quality of their dealings with each other.

We expect that the association of both Dr Blaker and Mr. Okazaki, Director General for Foreign Relations at the Defence Agency of Japan who will be in residence at the Center during 81-82, will help CSIS to play a prominent role in the process of improv-

U.S.-Japanese relations.

Just ten months have passed since Ronald Reagan was elected by a landslide to be President of the United States. Only a year and three months have elapsed since your Prime Minister Zenko Suzuki was selected after a conservative electoral landslide to lead the Japanese government. Obviously, this is a very short period of time upon which to make judgments about either of our countries' policies, or the future shape of our bilateral alliance—and here, I might add, as a private citizen I am going to use the word "alliance" freely.

While there has been a changing of the

guard in both our countries, Japan and the United States continue to confront the same thorny problems as before—on energy, trade, foreign aid, as well as on just keeping our bilateral security relations on an even keel. On these subjects we have many views in common, of course, and this should not be surprising because our countries are deeply committed to democratic ideals, free trade, global and regional stability, and a healthy bilateral security relationship founded upon our Mutual Security Treaty. But our viewpoints on these matters also differ in some respects, and this, too, should be understandable in light of our differing cultures, historical backgrounds, and geographical situations

The differences we have, stem in part, from different perceptions. Particularly since the end of the Pacific War, the United States has loomed large to the Japanese. Even after its defeat in the war, and even after the Occupation era had passed, Japan decided to cast its fortunes in the security area with those of the United States. To paraphrase your first very great postwar statesman Shigeru Yoshida, "If you like the shade, find yourself a big tree." Well, even though we were a "big tree" at that time, since then another "big tree"—the Soviet Union—has appeared, and a forest of third world "trees' has grown. The forest environment, in short, has changed and, for any of us, find-ing the shade is a difficult task indeed. In fact, from an American perspective, some feel that we are scarcely able to take care of ourselves, much less to protect others. I am happy to say that this is not the view of the Reagan Administration.

For most Japanese, however, it seems to me the perception of the United States as the "big tree" or "the big brother" in the

relationship between our countries continues to prevail. But looking from the perspective of the US, we are not a "big tree," and

Japan looks bigger every day.

Japan is taken seriously in the United States, and American expectations of Japan are high, not only because of the high quality of Japan's manufactured goods, its high level of productivity, its intense competi-tiveness, and huge amounts of spending on foreign investment. Our expectations high also because we are confident that Japanese economic successes will continue, that the yen will continue to be strong, that Japan's products will continue to proliferate global markets, and that its domestic economy will continue to flourish. Americans—again unlike many Japanese I have met—believe very profoundly that Japan can and should play a larger political and diplomatic role than it has played in the past—a role reflecting its hard-won position as an economic superpower. We feel that Japan already is moving in that direction, and are confident that it has the ability to assume the responsibilities, take the initiatives, and accept the burdens that its enlarged international role will require.

Where we-that is, American and Japanese-differ is on two points-first of all, how vigorously Japan should be pressed into assuming a larger role than it is playing at the moment in security affairs and, second, how much of Japan's new international responsibilities should encompass or contain

a military dimension.

On the first point, it seems that there is a good deal of confusion as to the value of exerting pressure on Japan to do more in the defense area. The record seems to show that changes in Japanese defense spending, and force structures, have not resulted from shifts in the domestic Japanese political climate, nor from alterations in Japan's regional strategic environment, nor even from variations in Japanese perceptions about the depth of America's commitment to defend Japan. Instead, in the past, these changes have stemmed from American urging. American Pressure on Japan, in other words, has worked.

This manner of interaction-which has vorked in the past and may well work in the short-run future in achieving some immediate goal—may be in the long run, un-helpful to the development of a mature Japanese-American relationship. It is for this reason that the Reagan Administration, in dealing with Japan on defense-related questions, has chosen not to resort to at-tempting to wring concessions from Tokyo by public blandishment and exhortation.

The present Administration, instead, has quite consciously adopted an approach to-ward Japan—as well as toward our other al--which seeks to avoid falling into public haggling over the precise percentage of GNP being allocated for defense, or the exact percentage increase year-to-year in defense expenditures.

This sort of street-vendor-style haggling, in any case, ignores the main question of what higher Japanese defense expenditures will be used for, and to some degree may have diverted Japan from formulating and articulating its own concept of security and its own preferred policies in the security

In saying this, however, let me make it clear that the expectations of this Administration remain high for Japan in the security field.

We want to hear your views, to cooperate with you in translating those views into meaningful policy action, while we—for our part—try to clarify our own centinuing com-mitments to Japanese and East Asian peace and security. Despite those commitments, as I am sure you are all aware, we are stretched very thin militarily, and our state of readiness to respond to the dramatic rise in Soviet capability in Asia requires reinforcement.

in short, the first question is how can the United States and Japan work cooperatively and most effectively to assure that their responses to shifting internal and external conditions proceed in an intelligent and sensible fashion, without jeopardizing our many shared interests through unnecessary crises, "shocks", and friction.

The second key issue in current US-Japan security relations concerns the degree of Japan's commitment to increasing its defense expenditures and its involvement in military operations. First, let me say that the United States does not wish Japan to become a major military power, or change its constitution. United States does not want Japan to acquire nuclear weapons. The United States has no desire that Japan abandon its present reliance on the American nuclear umbrella and the Mutual Security Treaty and go its own way in the area of defense.

Americans recognize the many constraints that influence Japan's defense efforts: continuing pacifist sentiments among the Japanese people, your intense sense of vulnera--as a resource-poor nation—to possible limits or curtailment of external markets or scurces of supply, your "no war" Constitu-tion, and particularly Article IX of that document, the slow process of consensus building in Japan, the "non-nuclear principle" articulated by recent Japanese administrations, and—above all—your desire to remain a peaceful nation closely allied with the United States, dedicated to maintaining the peace and stability of East Asia.

Most knowledgeable Americans recognize these deeply rooted Japanese feelings, and realize how significantly they affect Japan's role in the defense area. Still, from our per-spective, Japan's overall self defense efforts are overly modest. Our wishes, if spelled out in specific terms, would be that you-

Improve your defense chair of command; Increase your share of expenditures for the support of American forces in Japan;

Raise your stockpiles of conventional weapons and ammunition:

Increase your anti-submarines warfare cap-

Promote defense cooperation with the

United States in such operations as the RIMPAC exercises of last year;
Develop your capacity to take responsiover time for defense of the Soga, Tsugaru, and Tsushima Straits;

Expand somewhat your defense perimeters to take the pressure off the U.S. Navy in the Pacific; and

At bottom, take upon yourselves the basic responsibility for your own defense, both of the Japanese islands and the surrounding

On the American side, our direction is toward increasing awareness of the limits of American capability in Asia and a related concern about pressing Japan to shoulder a larger portion of the responsibility for its defense. Japan's global economic ascedence has raised expectations abroad that it should arsume an enlarged political role, particularly in Asia, and has aroused an enhanced Jap-anese awareness that its economic accomplishments themselves are not enough either to quell foreign dissatisfaction with Japan's contributions, or to assure the protection of its national security interests. Despite an immense amount of attention devoted to the defense question in both countries, a mutually acceptable accommodation has yet to be reached.

The problem for our political leaders in both countries is how to gain the public support needed to sustain the security of both our nations. To gain this support in the future, perhaps we must develop an entirely new concept of national security.

In the past, national security was perceived only in military terms—nuclear deterrence and defense of national borders. Today, this kind of security problem is more critical than ever before, given the Soviet Unions' excessive military buildup and its search for strategic superiority.

Since 1973, however, another dimension of national security has been added to the picture-energy. Nations can now be brought to their knees by oil outoffs. Even a temporary interruption of oil supplies can lower employment and standards of living. Japan is

especially vulnerable.

These are happenings that politicians can communicate to the people. As a response, Japan's "comprehensive security" program certainly fits into this category. Your aid to such countries as Pakistan, Oman, and Turkey is critical to the stability of the Middle East and the oil-producing countries.

By the same token, most of our immediate

\$38 billion upsurge in our defense spending is going for conventional forces, especially shipbuilding—which will help keep open our energy sealanes—and your energy sealanes

as well.

Thus, in the economic-energy dimension of national security, both "comprehensive" and national security conventional forces are absolutely essential. Otherwise, you will lose your standard of living and unemployment will rise.

If such a new concept of national security can be conveyed to the people of Japan, perhaps they will better realize why it is so ssential to Japan's standard of living that it do more in building its own conventional defense capacity, so that that expanded conventional capability can be complemented by US forces in keeping open the sea lanes, and in providing a Western military presence in Southeast and Southwest Asia which will contribute to the peace and stability of those regions.

I should point out that at our Center, in our new program on Japanese affairs, we will be addressing the major issues I mentioned earlier-defense, trade, energy, development assistance and methods of bilateral diplomatic interaction. I emphasize the final topic, because in dealing with other problems, both Japan and the United States must in the future be more sensitive to matters of "style" in their diplomatic interactions. Throughout the post-Occupaperiod in US-Japan relations, though disagreements on such diverse issue as steel, textiles, automobiles, nuclear energy, and defense spending were largely resolved, the processes by which controversial issues settled have created resentments—on both sides. Despite the many shared interest of our two countries, and our long history of bilateral interaction, the basic question has remained: are Japan and the US dealing with each other more effectively than, say, ten or twenty years ago?

Part of the problem is a tendency on the part of the Japanese to see themselves as the weaker side, and they use this as an apology for what they cannot give. This reduces their credibility, for they often seem to be "crying wolf." And when the inevitable crisis is reached in our dealings—whether on tariffs, defense spending, or boycotting the Olympics—it also tempts the Americans to try to bully Japan. In the end, Japan submits, but only after an intense, sometimes frantic search for some way of salvaging the heart of the Japanese position without major concessions. The approach, in any case, leaves Americans with the impression that Japan is disinterested in reaching fair agreements. unwilling to appreciate another party's viewpoint, and incapable of having a truly international sense of responsibility.

For their part, it has seemed to me that the Japanese are often puzzled by American inconsistencies and surprise shifts in policies affecting Japan, resentful at apparent U.S. discrimination against Japan (say, for instance, on nuclear fuel supplies under the Carter Administration), and bewildered at American missionary zeal in pursuing goals that tend to strike Japanese as dubious, risky, and quixotic. Above all, Japanese are angered at the habitual U.S. resort to pressure factics in order to wring concessions sure tactics in order to wring concessions from them. In short, how the two countries have dealt with each other over the years has often generated distrust and ill-will on both sides, with each feeling the other as failing to be a forthcoming, reliable, or supportive ally.

In my judgment, we must, to make our relationship more healthy, make adjustments and give ground on both sides. We need to move towards a more equal partnership that reflects Japan's growing strength. While we Americans must be sensitive to style, our Japanese friends, I submit, must be more willing to shoulder the responsibilities that

partnership implies.
You may have noted that I have not been very specific in suggesting change for Japapolicy-either on defense, energy, foreign development assistance, or trade questions. I have purposefully refrained from offering such concrete recommendations because I believe that a truly mature alliance relationship between our two countries will require that the U.S. side listen more carefully than in the past to what Japan desires in the security area. Japan, after all, for a variety of reasons, has tended to seek out and react to American advice—advice which, as will not surprise anyone in this room, Americans have been only too eager and willing to provide. But the time has come for Americans to ask Japanese what they think, what they want and what they wish of us, on all of the key issues facing us in our current alliance

I thank you for your attention and for the opportunity to tall with you this morning on these topics-and I might add that these are subjects that concern me deeply. Put I would like to say in conclusion that despite the fact that our two countries' opinions occasionally differing, at the same time our common viewpoints and interests are so extensive that our relationships will surely continue to be strong and healthy. Neither of us can afford that it be otherwise.

Thank you, my dear friends of the Maritime League.o

IMPOUNDMENT

. Mr. HART. Mr. President, the recently reported proposal to give the President impoundment authority is ill-conceived and dangerous public policy from both a budgetary and constitutional point of

Under the spending clause of the Constitution, Congress is given the power and responsibility to appropriate and spend Federal money. To share that power or abdicate a portion of it to another branch of government seriously weakens our institution and completely undermines the congressional budget process which those of us on the Budget Committee among others have worked so hard to establish. Congress, as the people's representative, must be directly accountable for the way Federal dollars are spent or not spent. Presidential impoundment authority dilutes such congressional accountability.

It is particularly ironic that this impoundment proposal has been put forward at this time. So far the congressional budget process has given the President exactly what he wanted by rapidly adopting the level of budget cuts which he proposed. Proponents of the impoundment proposal now apparently feel that the President should get exactly what he wants without even having to ask Congress.

Even if Congress had not cooperated with the President on reducing Federal spending, impoundment would still be a bad idea. Congress constitutional authority over Federal spending does not depend upon the executive's satisfaction. Presidential impoundment has less to do with the budget than with the separation of powers. In 1969, William Rehnquist then at the Department of Justice. advised the White House on the constitutional authority for impoundment:

With respect to the suggestion that the President has a Constitutional power to decline to spend appropriated funds, we must conclude that the existence of such a broad power is supported by neither reason nor precedent." He found it difficult, he added, "to formulate a Constitutional theory to justify a refusal by the President to comply with a Congressional directive to spend.

During the congressional debate over impoundment in 1973 Senator Sam Ervin also discussed the constitutional issues at stake in allowing the President to withhold appropriated funds:

I do not believe that we should allow him to nullify acts of Congress by Executive fiat. There is not one syllable in the Constitution which authorizes the President to exercise such powers.

I urge my colleagues to oppose any impoundment proposals which would undermine the congressional budget process. If we allow a President to use impoundment to modify or even nullify laws passed by the legislative branch, we give up a policymaking function reserved exclusively to the Congress. This institution should stand united against such a massive transfer of its constitutional power to another branch of government.

PROPOSED ARMS SALES

 Mr. PERCY. Mr. President, section 36 (b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of \$25 million or, in the case of major defense equipment as defined in the act, those in excess of \$7 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. Any portion which is classified information has been deleted for publication, but is available to Senators in the office of the Foreign Relations Committee, room 4229, Dirk-

sen Building.
The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., June 30, 1981. Hon. CHARLES H. PERCY,

Chairman, Committee on Foreign Relations,

U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding under separate cover Transmittal No. 81-59, concerning the Department of the Army's proposed Letter of Offer to Japan for defense articles and services estimated to cost in excess of \$25 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely.

ERNEST GRAVES, Director.

[Transmittal No. 81-59]

- (viii) Date report delivered to Congress: July 1, 1981.

POLICY JUSTIFICATION

Japan-C-130H aircraft and support

The Government of Japan has requested the purchase of two C-130H aircraft with initial spares, support, and training at an estimated cost of \$54 million.

Japan is one of the major political and economic powers in East Asia and the Western Pacific and a key partner of the United States in ensuring the peace and stability of that region. It is vital to the U.S. national interest to assist Japan in developing and maintaining a strong and ready self-defense capability which will contribute to an acceptable military balance in the area. This sale is consistent with these U.S. objectives and the 1960 U.S.-Japan Treaty of Mutual Cooperation and Security.

These C-130H aircraft will be used in a transport role in support of the Japan Self Defense Force.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Lockheed Corporation of Marietta, Georgia.

Implementation of this sale will require the assignment of approximately one additional U.S. Government and three U.S. contractor personnel to Japan for a minimum

There will be no adverse impact on U.S. defense readiness as a result of this sale.

> DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., July 6, 1981.

* As included in the U.S. Munitions List, a part of the International Traffic in Arms Regulations (ITAR).

- (iii) Description of Articles or Services Offered: This sale will provide the telecommunications equipment, automated data processing equipment, and hardware items required for the Royal Saudi Naval Forces Command, Control, and Communications (C³) system. The equipment is to be in-stalled in facilities which were designed and constructed under previously approved sales agreements.
- (iv) Military department: Army (HAQ, Notice No. 6).

(v) Sales commission, fee, etc. paid, offered or agreed to be paid: None.(vi) Sensitivity of technology contained

the defense articles or defense services

proposed to be sold: None.

(vii) Section 28 report: Case not included

in Section 28 report.

(viii) Date report delivered to Congress: July 6, 1981.

POLICY JUSTIFICATION

Saudi Arabia-Communications and data processing equipment

The Government of Saudi Arabia has requested amendment of an existing sales agreement to include the purchase of shorebased telecommunications equipment, automated data processing equipment, and hardware items for the Royal Saudi Naval Forces (RSNF) Command, Control, and Communications (C3) system at an estimated cost of \$60 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to pro-vide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to im-prove the security of the country through modernization of Saudi naval forces. In a regional context, enhancement of the defen-sive capabilities of Saudi Arabia will also contribute to overall Middle East security.

Saudi Arabia is in the process of enlarging and improving its naval assets and operations through its Saudi Naval Expansion Program (SNEP) with the United States. The SNEP includes the purchase of 29 ships and craft, shore facilities, equipment, and training. This sale will provide the telecommunications and data processing equipment for a U.S.-designed C³ system which is essential for the effective operations of Saudi naval forces. This sale will not introduce a new military capability into the region since neighboring countries have C3 systems with similar capabilities.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be Science Applications, Incorporated of Arlington, Vir-

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., July 8, 1981. Hon. CHARLES H. PERCY,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-64, concerning the Department of the Army's proposed Letter of Offer to Tunisia for defense articles and services estimated to cost \$92 million. Shortly after this letter is delivered to your office, we plan to notify the news media. Sincerely,

ERNEST GRAVES, Director.

[Transmittal No. 81-64]

(vii) Section 28 report: Included in report for quarter ending 31 March 1981.

(viii) Date report delivered to Congress: July 8, 1981.

POLICY JUSTIFICATION

Tunisia-M60A3 tanks

The Government of Tunisia has requested the purchase of 54 M60A3 tanks with support equipment and services at an estimated cost of \$92 million.

This sale supports the foreign policy objectives of the United States by helping to provide a friendly country with the means to maintain its own defense.

The incorporation of these tanks into the Tunisian inventory will enhance its capability to protect itself from the Libyan tank threat. Libya's hostile intent toward Tunisia was amply demonstrated by the Libyan-backed dissident attack on the Tunisian city of Gafsa in January 1980. Tunisia's armed forces are currently equipped with outmoded weaponry and are inadequate to meet the growing threat from neighboring Libya. The purchase of these tanks will be one of the first steps in Tunisia's current five year pro-gram to upgrade its defense establishments.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Chrysler Corporation of Warren, Michigan.

Implementation of this sale will require the assignment of the following U.S. Government personnel: 12 for 15 days as a Quality Assurance Team, 12 for 180 days as a Technical Assistance Team, and eight for 120 days as a Training Team.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., July 6, 1981. Hon. CHARLES H. PERCY,

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-65, concerning the Department of the Navy's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost \$255 million. Shortly after this letter is delivered to your office, we plan to notify the news media. Sincerely,

ERNEST GRAVES, Director.

for quarter ending 31 March 1981.

(viii) Date report delivered to Congress: July 6, 1981.

POLICY JUSTIFICATION

Saudi Arabia-Management support and assistance

The Government of Saudi Arabia has requested continuation of U.S. Navy project management support, supply support assistance, engineering and technical services, and feasibility and technical studies for the Saudi Naval Expansion Program (SNEP) through 1985 at an estimated cost of \$255 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of Saudi naval forces. In addition, enhancement of the defensive capabilities of Saudi Arabia in a regional context will also contribute to overall Middle East security.

Saudi Arabia is in the process of enlarging and improving its naval assets and opera-tions through its SNEP with the United States. This program started in 1972 and is scheduled to be completed in the mid-1980's. The SNEP includes the purchase of 29 ships and craft, shore facilities, equipment, and

training. This sale will provide for the continuation of the management and technical assistance required to ensure the SNEP progresses to an orderly and successful completion.

The sale of this support will not affect the

basic military balance in the region.

The support services purchased under this agreement will be provided by U.S. military and civilian personnel and employees of various commercial firms in the United States.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE, Washington, D.C., July 8, 1981.

Hon. CHARLES H. PERCY.

Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHARRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-66. concerning the Department of the Air Force's proposed Letter of Offer to Saudi Arabia for defense articles and services estimated to cost \$75 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely.

ERNEST GRAVES, Director

POLICY JUSTIFICATION

Saudi Arabia-AN/TPS-43G(V) radar system

The Government of Saudi Arabia has requested the purchase of one AN/TPS-43G (V) radar, modification of three previously pur chased AN/TPS-43 radar units to the 43G (V) configuration, and the associated equipment to permit remote operation of the radar units at an estimated cost of \$75 million.

This sale is consistent with stated U.S. policy of assisting other nations to provide for their self-defense by allowing the transfer of reasonable amounts of defense articles

and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of the Saudi Armed Forces.

A May 1979 survey report, prepared by the U.S. Air Force for the Government of Saudi Arabia, identified inadequacies in existing Saudi radar coverage, and recommended in-stallation of the requested type of equipment to provide more responsive and timely information for air defense operations. This sale will not provide a new capability in the region since AN/TPS-43 or comparable radar systems are presently in the inventory of most of the countries in the region.

The sale of this equipment and support will not affect the basic military balance in the

region.

The prime contractor will be the Westinghouse Defense and Electronics System Center of Baltimore, Maryland.

Implementation of this sale will not re quire the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., July 8, 1981.

Hon. CHARLES H. PERCY, Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81-67, concerning the Department of the Navy's proposed Letter of Offer to Portugal for defense articles and services estimated to cost \$29 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

ERNEST GRAVES, Director.

[Transmittal No. 81-67]

(viii) Date report delivered to Congress: July 8, 1981.

POLICY JUSTIFICATION

Portugal-Support for A-7P Squadron

The Government of Portugal has requested the purchase of additional initial spare parts, ground support equipment, and equipment staging associated with the support of one A-7P squadron increasing the cost of this case from \$20 million to an estimated cost of \$29 million.

This sale will contribute to the foreign policy and national security objectives of the

United States by improving the military ca-pabilities of Portugal; furthering NATO ra-tionalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

This sale is part of a total program of \$103 million involving the acquisition of twenty A-7P aircraft and other support equipment. The A-7P program is part of the NATO Military Committee plan to improve the capability of the Portuguese armed forces in the collective defense of the Alliance. This sale will support the squadron until an indigenous capability is developed.

The sale of this equipment and support will not affect the basic military balance in

the region.

The prime contractor will be the Vought

Corporation of Dallas, Texas.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Por-

POLICY JUSTIFICATION

United Kingdom-155mm ammunition

The Government of the United Kingdom has requested the purchase of eighteen thousand rounds of 155mm ammunition at an estimated cost of \$16 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of the United Kingdom; further-NATO rationalization, Standardization, and interoperability; and enhancing the defenses of the Western Alliance.

The United Kingdom needs this ammunition to replenish its stocks and maintain its military capability.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be determined by competitive bidding.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to the United Kingdom.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY, Washington, D.C., July 8, 1981.

Hon. Charles H. Percy, Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the re-porting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 81–70, concerning the Department of the Army's proposed Letter of Offer to Jordan for defense articles and services estimated to cost \$60 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely.

ERNEST GRAVES. Director.

POLICY JUSTIFICATION

Jordan-M60A3 tank conversion kits

The Government of Jordan (GOJ) has requested the purchase of 118 M60A3 tank conversion kits at an estimated cost of \$60 million.

The sale will further U.S. foreign policy objectives by assisting a friendly country to deter hostilities and defend itself in a region where it is vital to U.S. interests to reduce the probability of open conflict and to promote peace and stability. The sale will assist the GOJ in meeting its legitimate defense requirements and reaffirm to the Jordanian military and political leadership that the United States is responsive to the priority modernization objectives of the Jordanian Armed Forces. This modernization effort is consistent with U.S. views on Jordanian security needs, the regional military balance, and long-range peace and stability in the region.

The sale of M60A3 tank conversion kits will upgrade and standardize Jordan's existing inventory of M60 series tanks. Each conversion kit includes improvements for the tank automotive and fire control systems.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor is unknown at this

Implementation of this sale will require the assignment of three additional U.S. Government personnel to Jordan for 30 days.

There will be no adverse impact on U.S.

defense readiness as a result of this sale.

DEFENSE SECURITY ASSISTANCE AGENCY, Washington. D.C., July 8, 1981.

(Million) \$ 0 Major defense equipment*____ 30

* As included in the U.S. Munitions List, a part of the International Traffic in Arms

Regulations (ITAR).

(iii) Description of articles or services offered: Cooperative logistics supply support for major items of equipment provided to the Saudi Arabian Land Forces (SALF) under previous FMS agreements.

(iv) Military department: Army (KHU). (v) Sales commission, fee, etc. paid, offered

or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 31 March 1981.
(viii) Date report delivered to Congress:

July 8, 1981.

POLICY JUSTIFICATION

Saudi Arabia-Cooperative logistics supply support agreement

The Government of Saudi Arabia has requested the purchase of follow-on repair parts support for major items of equipment provided to the Saudi Arabian Land Forces (SALF) under previous FMS agreements at an estimated cost of \$30 million.

This sale is consistent with the stated U.S. policy of assisting other nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support Saudi Arabia by providing the materiel required to maintain SALF equipment in an operational status.

This sale will provide the Saudi Arabian Ordnance Corps the capability to obtain the repair parts required to maintain major items of equipment previously provided to the SALF by requisitioning directly against U.S. Army inventories during the period 26 November 1981-25 November 1982. The sale does not introduce a new weapons capability into the region.

The sale of this equipment and support will not affect the basic military balance in the region.

Procurement of these items and services will be from the many contractors who provide these items to the U.S. forces.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to Saudi Arabia.

There will be no adverse impact on U.S defense readiness as a result of this sale since a companion sales agreement provides the funds necessary to increase Army inventories to the level required to support this

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

• Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of \$25 million, or in the case of major defense equipment as defined in the act, those in excess of \$7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that eight such notifications have been received.

Interested Senators may inquire as to the details of these prel'minary notifications at the office of the Committee on Foreign Relations, room 4229 Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY. Washington, D.C., June 24, 1981. Dr. Hans Binnendijk,

H'MONG REFUGEES

• Mr. DURENBERGER. Mr. President, Minnesota is home to some 9,000 H'mong, a distinct ethnic group whose members originally came from the mountains of Laos. The H'mong, better known to many Americans as the "Meo," have come to the United States not as immigrants but as refugees fleeing the most brutal sort of terror and mass murder. At a time when we have become numbed to stories of systematic extermination campaigns, whether carried out in Cambodia, Afghanistan, or elsewhere, it is worthwhile to recount the story of the H'mong.

The H'mong were caught up in the conflict in Indochina, and they fought with distinction in Laos against North Vietnamese and Pathet Lao forces in support of our war effort. In the course of this fighting, which went on for the better part of a decade, the H'mong suffered enormous casualties. While precise figures can perhaps never be known, most estimates indicate that more than 30,000 H'mong—nearly 10 percent of their entire population—died in combat.

The war in Indochina remains a subject of bitter controversy to most Americans. But no American can feel anything except gratitude for a people who, at great personal risk, routinely went deep into Communist-controlled territory to rescue downed American pilots. Like our prisoners of war, the H'mong remind us that, in the midst of tragedy and warfare, individuals can and do conduct themselves with dignity and courage. But unlike our prisoners of war, the H'mong have largely been forgotten by the United States. When we withdrew our forces from Southeast Asia, the H'mong were left to their own fate despite their service in a cause which our Government had promoted.

As we know, the American withdrawal from Vietnam did not mark the end of the war. The killing only intensified. Entire populations, such as the Cambodians, were killed either directly by fanatic barbarians or indirectly through disease, starvation, exposure, and neglect. The H'mong appear to be suffering the same fate. And they are suffering for the simple reason that they believed in and sup-

ported the United States.

As Dr. Jane Hamilton-Merritt, a noted journalist, has written in a recent Reader's Digest article, the total H'mong population in 1960 was estimated at 500,000. Today, 100,000 H'mong reside outside of Laos, either in squalid refugee camps in Thailand, where some 55,000 people are now housed, or in various Western countries. The United States has taken in roughly 45,000 of these refugees. With 100,000 H'mong now living outside of Laos, and with some 30,000 killed in combat, one would expect that some 370,-000 H'mong-or more, allowing for population growth since 1960-would thus remain in Laos. But refugee reports indicate that as few as 100,000 H'mong are now alive in Laos.

Even allowing for unreliable figures, the point is clear: Tens of thousands of H'mong have simply disappeared. And the reason is not hard to determine. The Laotian Government, assisted by its Vietnamese allies, has sought out and killed an entire ethnic group in a campaign which borders on genocide. As Dr. Hamilton-Merritt notes in an article published in the New York Times on September 4, 1979, those H'mong who wish to flee Laos rather than being forcibly relocated from their tribal homelands, are systematically followed and killed by Laotian and Vietnamese forces. Perhaps worst of all, there have been repeated stories that lethal chemical weapons-weapons which are uniquely appropriate for a campaign of mass extermination against unprotected civilbeen used against ians—have H'mong.

But what Dr. Hamilton-Merritt has referred to as this "tragic legacy" has not ended for those H'mong who have endured and moved to the United States. Once here, they face a set of challenges ranging from culture shock to unique and fatal health problems. For instance, many H'mong have literally dropped dead in their tracks, vict'ms of a mysterious sudden death syndrome which is baffling our authorities at the Centers for

Disease Control in Georgia. And many others suffer from chronic and potentially lethal respiratory problems deriving from their exposure to chemical weapons. Tragically, however, the Centers for Disease Control have been unable to notify physicians around the United States to examine H'mong patients for such respiratory problems, for the U.S. Government has thus far been unable to obtain what it considers incontrovertible evidence of the use of chemical weapons in Laos.

Perhaps just as important, many physicians who might wish to examine H'mong patients on their own initiative—physicians who, for instance, have read press accounts of the gas warfare—often cannot do so because, like many Americans, they do not know how to identify a refugee as a H'mong rather than as, for instance, a Vietnamese or Cambodian. Far too little is known by most Americans about the unique story of the H'mong. In the mass exocus from Indochina over the past few years, the H'mong have gotten lost in the shuffle.

Indeed, it is ironic that many H'mong refugees, who have spent years in camps throughout Thailand, have been given a lower visa preference than the boat people from Vietnam who have become refugees more recently. I am not suggesting, of course, that we can or should attempt to measure suffering with such precision that we somehow establish a "misery-quota" for refugees. But it is nonetheless tragic that people who have been homeless for years must remain so because we are not aware that they are a distinct people with distinct problems.

Fortunately, more information will become available to the public about the H'mong in the future. As Senator Chafee has already noted, the Roger Williams Park Museum of Natural History in Providence, R.I., is about to open a center for H'mong lore. I am proud to announce to my colleagues that the St. Paul Science Museum will undertake a comparable program early next year. The museum will draw upon the substantial H'mong community in Minnesota for exhibits of H'mong folk art, music and so forth. I am delighted that through the efforts of these museums the entire Nation will come to appreciate the richness and uniqueness of this proud, ancient and little-understood culture.

Mr. President, I ask that the articles which I have referred to, and a recent article in Time magazine concerning Soviet production and distribution of chemical weapons, be printed in the Recent

The material follows:

[From the August Reader's Digest]

TRAGIC LEGACY FROM LAOS (By Jane Hamilton-Merritt)

No longer can the gassing of the H'mong be considered a faraway problem in Southeast Asia. Now the problem is here, on our own doorstep, among the H'mong refugees who have settled throughout the United

States.

In the five years I reported on refugees in northern Thailand, I heard countless detailed accounts of poison-gas attacks by the Soviet-backed Lao-Vietnamese regime on H'mong villages—and of the deadly results.

In 1960, there were an estimated 500,000 H'mong in Laos. Today, some 100,000 are either in Thai refugee camps or resettled in Western countries, including about 40,000 who have come to the United States since 1976. A number of refugees experts fear that fewer than 100,000 are alive in Laos. Many died of starvation, but thousands were killed by gas attacks, which still continue. I crisscrossed America recently, inter-

I crisscrossed America recently, interviewing H'mong refugees, and I discovered a new dimension to their story of terror.

One H'mong leader estimates that of those who have arrived here, about 20,000 may have been exposed to the "poisonous rains" of chemical warfare. Many are chronically -because of the gassings, they believe They complain of pulmonary problems, constant headaches, painful muscles and joints, eye and hearing disorders. Medical and public-health personnel who have worked with the H'mong are persuaded that their infantmortality rate is high and that a large percentage suffer from cancer. More frighten-ing, in the last few years in the United States, at least 35 young H'mong men and women have succumbed to a mysterious sudden death that occurs during sleep. The Centers for Disease Control in Atlanta have confirmed that 20 of these deaths are indeed unexplainable. (The other 15 were insufficiently documented.) Studies made in Portland, Ore., a large H'mong resettlement area, show the H'mong death rate to be five times that of the non-Lao population.

Some of the heartbreaking cases I have witnessed:

A woman on the West Coast, age 49, suffers from constant, terrible headaches. Her husband has pain in all his muscles. They have three children. The other eight were killed in gas attacks or in fighting.

killed in gas attacks or in fighting.

A 33-year-old man lives in a rundown apartment in a Midwest city. He moves slow-ly and has obvious difficulty breathing. "If I stand up or sit down fast, I faint," he says.

In a housing project, also in the Midwest, a 24-year-old man suffers from heavy coughing and shortness of breath, and complains, "After the gassing, my mind is slower."

These are the survivors, the lucky ones, but also the pathetic, lonely victims of chemical warfare. "Few Americans know who we are, what we did for the United States during the Vietnam war," says one young H'mong man. "Many think we are Vietnamese or boat people. Many of us still suffer from being gassed, but American doctors either don't believe us when we try to tell them or never ask us about our life in Laos."

"Why aren't Americans concerned about the gassing?" the H'mong ask. The answer, in large part, lies with the U.S. State Department's position that no "conclusive evidence" exists that gassing is occurring in Laos.

Consider the State Department's response under both the Carter and Reagan administrations to those who have asked about the gassing of the H'mong. The letter, still being mailed out as this article went to press, falls to acknowledge the H'mong as U.S. allies. It presents instead the Pathet Lao (communist) government's propaganda, without comment or explanation:

"The Lao government has used a combination of persuasion and force to bring the H'mong out of their highland homes to new settlements in the lowlands. The Lao government argues that the H'mong method of agriculture destroys valuable hardwood forests, Laos' principal natural resource. The Lao also argue that, by bringing the H'mong population to the lowlands, the government can better limit the production of oplum, a principal H'mong crop which supplies the heroin markets of the world through illicit channels."

Those unfamiliar with Laos could infer from this official letter that the H'mong were wretched traffickers of heroin and conclude that gassing might be their just deserts. To be sure, the H'mong did grow opium popples—opium has long been used medicinally by many tribal groups in Southeast Asia. But H'mong tribespeople do not convert poppy sap into heroin or traffic it through the illicit drug channels of the world.

Anyone who has studied the H'mong, from U.S. Drug Enforcement Agency investigators to on-the-scene diplomats, knows that these people are not involved in the heroin business. "Associating the H'mong with heroin is a part of the Big Lie," says former U.S. ambassador to Laos G. McMurtie Godley.

The State Department letter continues: "By 1978, the United States had enough information to bring the matter (of chemical warfare) to the attention of the government of Laos, which denied the validity of the reports. We received the same response when we asked the Soviet and Vietnamese governments to look into the reports and end the practice if true."

Did our government really expect the Lao, Vietnamese or Soviet governments to acknowledge the use of chemical warfare—a practice banned by international treaty and abhorred by most of the world?

EYEWITNESS TESTIMONY

A 1980 State Department publication, "Country Reports on Human Rights Practices," says of Laos: "During the past three years, there has been limited improvement in some aspects of human rights. There is no evidence that the government is seeking to destroy any particular ethnic group, per se, such as the H'mong. There have been numerous refugee accounts of attacks using lethal chemical agents against the H'mong.

This charge has been denied by the Lao government." That is the only reference to the use of chemical agents in the entire section on Laos.

Not surprisingly, Gen. Vang Pao and other leaders of the H'mong community in this country are appalled by the report. "There has been overwhelming eridence of the gassing of men, women and children in Laos for years." says the general. "Yet the State Department not only avoids the subject but doesn't recognize the fact that my people are being eliminated because we were the U.S. allies in Laos."

While the State Department keeps telling the inquiring public, including members of Congress, that there is no "conclusive evidence," it fails to mention its own recently prepared report, which records the testimony of scores of eyewitnesses to chemical attacks in Laos, documenting over 13,000 dead from gassing.

And if that were not enough, evidence is now available from the communist side itself. For example, last November, a Pathet Lao pilot who defected to Thailand admitted flying numerous gas missions between 1976 and 1978 to "cause the H'mong people to die out completely." He adds that pilots flying these missions were granted special privileges and were closely monitored by doctors and nurses after each mission.

Will the Reagan Administration continue to honor the avoid-the-H'mong policy generated during the Carter years? In a meeting with several members of the foreign diplomatic corps, John Holdridge, newly appointed Assistant Secretary of State for Asian and Pacific Affairs, said that the United States has no evidence to bring to "court" on

Yet, human and moral considerations aside, the chemical agents used against the defenseless H'mong should be of considerable national-security concern to the United States. The fact is we don't know what these agents are. Even Defense Department experts are baffled. Victims suffer from profuse bleed-

ing from the nose, throat, eyes, stomach and intestines—resulting in death by hemorrhaging.

Recently, I spoke with Col. Charles W. Lewis, M.D., a member of the Department of Army Surgeon General's team sent to Thailand in 1979 to interview survivors of chemical attacks in Laos. I asked what chemicals he thought could be causing such profuse bleeding. "That's what I want to know," he said. "I hope someone is working on finding out. Nerve agents don't cause hemorrhaging. These are all new symptoms. When I returned from this investigation, I talked to people in the chemical-warfare business and no one knew. Everyone was surprised. We had better find out in order to be able to defend against them."

In early December 1980, the U.N. General Assembly by a vote of 78-17 adopted a resolution calling for a U.N. investigation into the use of chemical warfare in various parts of the world. Among those voting against the resolution were Laos, Vietnam, Afghanistan, the Soviet Union and Cuba. However, the project appears to be on the back burner, and in any case, Laos can reject U.N. requests for on-site investigations.

SUDDEN DEATH

Meanwhile, the gassing attacks against the H'mong continue. H'mong who crossed into Thailand in February 1981 reported that between January 6 and 20, 1981, Soviet-made helicopters flew 20 chemical missions, killing 1260 H'mong friendly to the Pathet Lao. On April 2, 1981, a Soviet M-17 dropped yellow chemicals on Ban Thong Hak, killing 24 H'mong outright, including 11 children. Two weeks later, a H'mong party reached Thailand with samples of the chemical residue gathered from stones, ground and leaves. The samples were given to U.S. authorities on April 23 but didn't arrive in the United States until the second week of May.

Under the best of circumstances, a chemical analysis is difficult. Experts say that, since gas disappears into the atmosphere, samples gathered from an exposed area may not contain any identifiable lethal properties. Incredibly, there is no U.S. team of chemical-warfare experts in Thailand to conduct on-the-spot analysis.

The H'mong in this country continue to suffer as well. In early 1981, the U.S. press picked up on the mysterious "sudden death" syndrome, and some public-health personnel became interested. But the interest is limited only to the sudden deaths. According to the Centers for Disease Control, there is no nationally coordinated plan to study the problem of the chronically ill H'mong who believe they are sick because of the gassings.

On the other hand, Richard Harruff, a doctor with special training in pathology who spent six months last year in a H'mong refugee camp in Thailand, is concerned about the long-range effects of the lethal agents used on the H'mong. According to Dr. Harruff's research on survivors who were exposed, "Males complain of impotence, and females report a high rate of spontaneous abortions. Infants born to exposed mothers are often very weak and lethargic, and die within a few days to months of apparent respiratory failure. These victims of unknown poisons need special care." Harruff is outraged that no one in the U.S. health conmunity has systematically investigated the medical condition of those H'mong exposed to chemical agents.

What is the answer? What can—what must—be done?

First, public hearings should be held before all relevant committees in the House and in the Senate, presenting the situation in its totality.

Second. Secretary of Health and Human Services Richard Schweiker should designate an agency to alert all doctors to the potential H'mong health problems, to establish guide-

¹ All population figures are approximate, as precise information is unavailable.

lines for conducting appropriate biopsies and treatments, and to establish a way for the H'mong exposed to the chemicals to report their problems.

Third, the United Nations should be used as a forum to keep the issue of poison gas before the international community until it

Fourth, our government should tie any arms-control negotiations with the Soviets to their curtailment of chemical warfare by client regimes.

Fifth, the Administration should assign the highest priority to the identification of these lethal agents. This is crucial in developing strategic defenses and medical treatment for those exposed.

For too many years, the United States has swept the gassing in Laos under a cover of words. Now, the problem is our responsibility and we must deal with it. "There is no place to hide from the poisonous rains." This H'mong saying has become our harsh reality.

GAS WARFARE IN LAOS: COMMUNISM'S DRIVE TO ANNIHILATE A PEOPLE

(By Jane Hamilton-Merritt)

The place is not a pretty sight. I.V.s drip fluid into skinny arms. Doctors and nurses scurry from one wooden-slab bed to another, responding to pleas for help. I am at Ban Vinai, a refugee camp along the Mekong River just inside northern Thailand. It is populated by some 35,000 H'mong (pro-nounced Mong) tribal refugees from the mountains of Laos. They suffer from severe malnutrition, malaria, amoebic dysentery. tuberculosis, pneumonia and a host of parasites. For many there is a tragic complication: they have been gassed.

One of them is a friend of mine; yet I don't recognize him, although I have passed his pallet at least 20 times. Finally, through his pain, he recognizes me and sends a rela-

tive to bring me to him.

Nhia Yang Vang, about 40, had once been vigorous, energetic. Now he is a skeleton with sunken, haunted eyes. In a weak voice he tells me he had returned to Laos after I saw him in January. Concerned about relatives, he had gone back there with a party of 19 men for three months. During that time, he says, his team had been in areas sprayed by poisonous chemicals nine times.

Every few minutes his talk is broken by a racking cough that nearly strangles him. He spits bloody sputum into a tin can. A H'mong nurse tells me that he has chest pains, finds breathing difficult, cannot eat

Nhia continues: "They hit us at the end of May at Nam Khing with the yellow chemicals. It was a white plane like a Soviet helicopter—low enough so that I could see the figures of two pilots. Immediately when they dropped the gas I fell to the ground vomiting blood. My eyes burned; I could not see. I have the 'red' diarrhea.

"It was a powder. When it touched my skin it became sticky, like an ointment, and when water is put on it, it becomes liquid." He stops for another bout of coughing. "You know, after a rain the chemicals will get into the water and poison it. Now that it is the rainy season, it will be so easy to poison us

JUST LIKE THE JEWS

In 1960, there were at least 500.000 H'mong in Laos. Today, perhaps 70,000 are still alive there, many of them sick or dying of malnutrition. Another 50.000 are in Thai refugee camps, and some 35,000 have been re-settled in Western countries. The H'mong survivors in Laos now face a terrible future, for they are the targets of a deliberate, cal-

culated policy of extermination.

This policy is the tragic heritage of the H'mong commitment to America's effort to prevent a communist takeover in Vietnam and Laos. The United States, unwilling to send its own troops into Laos, opted for an-

other kind of army—a guerrilla army re-cruited mostly from the H'mong, but also from other Laotian tribes, such as the Yao. Lahu, Lao Teung. Trained by the U.S. military and the CIA, the H'mong formed the backbone of the resistance against the communist forces in Laos that were supported by North Vietnam, China and the U.S.S.R. They sabotaged war supplies moving south along the Ho Chi Minh Trail, and rescued American pilots shot down in Laos. They proved adept at intelligence work, gathering vital information on troop, tank and supply movements.

Gen. Vang Pao, who commanded the H'mong forces and now lives in the United States, told me recently that his forces destroyed millions of dollars' worth of military equipment, medical and food supplies moving down the Ho Chi Minh Trail into South Vietnam between 1962 and 1975. "To do Vietnam between 1962 and 1975. that," he said, "my people gave 12,000 lives. All of that was secret, but now I want the American people to know."

When the Americans pulled out of Vietnam and Laos, the H'mong-and the sacrifices they had made-remained largely unknown. But the Vietnamese and Pathet Lao did not forget. Li Chai, who now lives in Denver, Colo., and is a leader of the H'mong refugee group there, tells why: "The communists know that we were the Americans' hands, arms, feet and mouths. That's why they believe they must kill all H'mong—soldiers, farmers, children. We suffer and die just like the Jews in World War II, but the world ignores us."

HIDE IN THE CAVES

Gen. Vang Pao says, "Communist gassing of the H'mong people began in August 1975, at Mung Om and Nam Fen, south of Phu Bia, where 17,000 men, women and children were killed. I learned from a Pathet Lao defector that from 1975 to 1978 the gassing had killed 50,000 H mong in the Phu Bia area alone. During that time some 45,000 died from starvation and disease, or were shot trying to escape to Thailand."

Today, in tribal refugee camps in northrotay, in tribat refugee camps in north-ern Thalland, H'mong refugees tell of star-vation, rape, the crippling of children whose fathers worked for the United States, of massacres. But what frightens them most are the poisons, which they call "rain," "gas," or "smoke," for they cannot hide from the chemicals that poison them, their water,

animals, plants and fields.

Survivors speak of several kinds of "rain." Yellow and red are very serious, and a direct hit means sure death. Green and bluegreen rains are not as immediately lethal. small bit of opium often enables victims to survive, but they suffer vomiting, bloody diarrhea, fever, bleeding through the nose, and dizziness.1

Recently, still another chemical, a lightyellow powder, has been dropped by fourengine planes or by helicopters. The latter, a U.S. military spokesman tells me, resemble Soviet MI-4s or MI-8s.

A H'mong farmer, looking much older than his 40 years, says "For two years they attack my area in Laos. The planes cover us with red smoke, and the people and animals die. We cannot grow rice or farm. We must hide

"They drop poison on us 200 times in 1978 and 1979. The first time five people die immediately. Red smoke rolls over the area and everyone is sick. It smells like burning rubber. I swallowed a bit of opium, but slide to the ground unable to move. In about an hour I can get up, but I cannot eat or drink. I become very skinny. Twelve more people in my village die of being skinny."

CHRONICLE OF HORROR

The stories are countless. One man sits before me in Ban Vinai refugee camp in Thailand carrying "evidence" of the continued gassing in Laos. Trained by the Americans in intelligence in the 1970s, this former H'mong lieutenant had crossed the Mekong River to Thailand on June 6. From a miniature dairy that he miraculously managed to

bring, he quietly reads:
"On 15 May 1980, two Soviet helicopters dropped yellow powder on a H'mong village of 200 at coordinate TF 9376. Thirty-five died within seven days; the remaining are very

He recites another attack. Then, carefully turning the tattered pages of his diary to check dates, figures and locations, he chroni-cles what happened to him after the American withdrawal from Laos in April 1975:

"The first gas attack was in October 1975. The communists couldn't take our village by fighting, but they came back with airplanes. One carried red gas, another yellow. Those near where the chemical rockets exploded fell unconscious, with bleeding from the mouth and nose. Many died. Soon afterward, a yellow water flowed from their bodies.

They hit us with gas for three days. Seventy-five people died immediately. Five hundred more died within a short time. I was lucky, for I was not in the village at the

"For three years we were constantly attacked like this. We must live in the jungle like animals. Since early 1980, people are so hungry that they eat leaves exposed to the chemicals, and 715 people have died in my area. I dig in the ground for roots and water, but many are too weak to do this. We have no cloth to cover our bodies from mosquitoes. so we all have malaria. We have no medicine, so we are all sick."

SHOT IN THE ARM

On a visit to Thailand in January, my friend Nhia Vang, who had just escaped from a Vietnamese prison camp in Laos, told me a story not only of genocide, but of an added horror: medically supervised experimentation that uses chemical agents on imprisoned H'mong men, women and children:

"In November 1978, a Vietnamese force of 3500 captured about 1200 H'mong men, women, and children-including mine-in the jungle where the red and yellow smoke had forced us to live. We were taken to a camp called Tong Mien, which held 2000 H'mong prisoners. We were given only a small portion of rice every 15 days, and many of my people were shot trying to get to the forest for

'Then, on March 25, two MiG jets flew low over our prison camp and sprayed us with white rain. One hundred people died immediately. The rest of us had diarrhea for 20 days, then fever; we cannot walk or raise our arms. Many more people die.

"In May, four Pathet Lao medics gave injections in the arm to 30 H'mong, including me. It was the color of water. I immediately became dizzy and could not breathe. Blood spurted from my nose and I fell to the ground unconscious. A relative blew opium smoke over me for several hours and finally the bleeding stopped. In 12 hours I could see again and by the next day I could walk.

'The next day four new medics came. This time they had injections and pills for 40 gassing victims. Some medics gave my people injections and green pills, others injections and white pills. Nothing happened for 12 hours; then they have trouble seeing, can't speak and black out. Fifteen died; the rest are very sick for a long time. The medics wrote reports on the people given medicine.

What has been the response of the United States to these atrocities? In my view, it has been appallingly weak and ineffectual.

The House Subcommittee on Asian and Pacific Affairs has taken testimony on the

¹ Opium has for centuries been used medicinally for severe gastro-intestinal disturbances.

gassings. And the State Department and Department of Defense have made their own investigations. But they and other U.S. officials, including those in the White House, refuse to acknowledge that the evidence is conclusive.

After listening to testimony at the subcommittee hearings in April, Congressman
Jim Leach (R., Iowa) stated: "I personally
interviewed these refugees. I read State Department and Defense Department reports
which are so numerous and so persuasive
that they cannot be denied. No one in the
White House ever saw a person being gassed
in Auschwitz, but we know it occurred. I
think this Administration has a moral responsibility to tell the people of the world
what is happening."

URGENT MISSION

What government agencies want for "conclusive evidence" is a body for autopsy. But there are serious logistical difficulties in obtaining recently gassed victims and fresh chemicals because the gassing occurs in the remote mountains of Laos, many days' walk through enemy territory to the Thai border. One H'mong found a dispensed gas canister, wrapped it heavily in old clothes, and started to walk it out of Laos to Thailand. The chemical residue in the canister killed him before he reached the Mekong.

I asked Vang Neng, H'mong chief at Ban Vinai, about the U.S. insistence on having a body for autopsy. In a voice of frustration and anger, he said, "Yes, I have bodies for autopsy. I learned yesterday that the communists gassed a village on May 14, killing ten immediately. This is many days' walk from the Mekong. By the time we carry one

body out, it will be spoiled."

Last fall, a step in the right direction was made when a team from the office of the Army Surgeon General was sent to Thailand to investigate the gassing allegations. They interviewed 40 men, two women and a 12year-old girl, all of whom were witnesses to, and survivors of, gassing attacks in Laos, and concluded in a report withheld from the public that chemical agents had been used against the H'mong. Two recommendations were: to "develop a plan whereby blood, tissue or other specimens may be rapidly transported from the suspect area to the Bio medical Laboratory for analysis, and to establish a medical team, on a standby basis, prepared to travel to the site of future allegations to conduct interviews/examinations." final recommendation read: "From a military defense position, it would seem to be an extremely urgent mission to initiate every effort possible to identify the chemical agents that have been used and to develop appropriate countermeasures, antidotes, etc.

Unfortunately—indeed, unbelievably—those recommendations have been ignored. On June 30, 1980, I reported to the U.S. embassy in Bangkok that I had located two men in a refugee-camp hospital who reported being gassed in the latter part of May. The timing for testing was within the six-week limit recommended by the Surgeon General. After 14 days of evasive and false information by the embassy and other U.S. officials in Thailand, I returned to the camp myself to speak directly to the two men recently gassed and to the camp medical personnel.

Only then did I learn that medical experts familiar with gassing had not conducted the investigations. We had sent a Thai nurse and an American public-health worker, who admitted he was a "novice" with regard to chemical warfare and, in his own words, had "very little" instruction even in how to collect samples. When I left Bangkok on July 18, the specimens were still there.

WILL YOU HELP?

While the West refuses to acknowledge the use of lethal chemical agents by the Soviet-backed regimes of Hanoi and the Pathet Lao.

the Vietnamese government applauds its army's chemical-warfare branch by awarding it a Ho Chi Minh medal. According to Hanoi radio monitored in Thailand in April 1980, Gen. Le Trong Tan told the unit: "Chemical weapons contributed to winning the great victory in the great anti-U.S. salvation resistance struggle" and in "tasks in the new situation." The "new situation" undoubtedly refers to Laos, Cambodia—and possibly to Afghanistan.

The State Department calls evidence suggesting a Soviet role "circumstantial," but it is more than that. Independent intelligence sources have confirmed the presence of Soviet Gen. V. K. Pikolov's chemical-warfare forces in Laos—and subsequently in Kabul, Afghanistan. In addition, Soviet chemical-warfare experts are said to have visited several cities and areas in Laos to inspect "chemical explosives"—artillery shells, bombs, rockets. In sum, it is hard to escape the conclusion that the Soviets are involved, certainly in the production and distribution of chemical agents, and probably in on-site surveillance and medical experimentation.

Meanwhile, the H'mong continue to die. A H'mong leader who is responsible for almost 30,000 civilians in Laos recently crossed into Thalland. His words haunt me: "I have come to see if anyone has food, clothing or medicine to protect us from the gassing. Someone must help, soon, or we will all die. We are friends of the Americans. We fought for freedom. Will you help?

Will we? How?

First, a fully publicized Congressional hearing—both Senate and House—into the gassing of the H'mong should be held. This would inform the U.S. people and attract world-press coverage of the atrocity. And the U.S. government should make communist gas warfare a major issue before the United Nations and every international forum.

Second, direct pressure should be applied on Hanol by Free World industrial nations on whom Hanol greatly relies for the technology and financial aid to rebuild Vietnam. This must be done at the highest private "hot-line" leader-to-leader level. Hanol should be told that this inhuman policy must stop or aid will be halted.

Finally, since Vietnam is a client state of the Soviets (apparently the source of the lethal chemicals), the United States should inform the Soviets that any discussion of other issues will be put off until we are satisfied that chemical warfare in Laos has ceased.

At Ban Vinai camp. Vang Chue, an 18-year-old boy who has been gassed, is carried into the hospital. His chest heaves with erratic contractions and he struggles to breathe. His face is heavy with sweat and I see a tear looming—the first H'mong-soldier tear that I have ever seen. I lean down to talk with him.

"I'm so sorry that my country is dying." he says in a voice of pain, "Please do something."

[From the New York Times, Sept. 4, 1979] FLIGHT FROM LAOS

(By Jane Hamilton-Merritt)

The plight of the H'mong, a hill-tribe people in Laos—or Meo, as the people are known in the Western press—is one of desperation. Little news about these people who fought so long for the Americans in Laos reaches that press. Meo refugee camps in Thailand are remote and inaccessible.

July 27, 1979.—The river and freedom are in sight. A group of 189 Meo—30 men and 159 women and children—have endured a two-month trek through the mountainous high jungles of Laos, running from the Pathet Lao and Vietnamese soldiers.

Tonight, they sit by the edge of the Mekong River waiting for darkness to provide cover for a crossing into Thailand—the final

obstacle to freedom. Adults have not eaten for many days to preserve food for the children. Small amounts of the remaining rice are forced into mouths of children—many only skeletons. Afraid to light fires for fear of detection by enemy soldiers, they wait in the monsoon darkness. Children are given more opium to keep them quiet: Any noise may alert soldiers known to patrol the banks of the Mekong searching for Meo trying to escape.

Meo who have escaped Laos tell of Pathet Lao and Vietnamese soldiers killing children for nothing, women for their silver necklaces, men because they are soldiers. They say that enemy soldiers take their rice, chickens and buffalo; that poisonous gases are dropped from planes on their villages and that their people die. They are convinced that the soldiers intend to kill all the Meo. Yet these Meo continue to fight the Communists in Laos although they have few weapons left and no meaningful support from outside.

July 28, 1979.—At the darkest time of night, they cross the Mekong, only to discover as the dawn mists lift that they have miscalculated and have crossed at a very wide part of the river. They land on a long river island and still far from the Thai banks. Hurriedly the Meo gather vines to weave into ropes to attach to mounds of sand and patches of river reeds to make a link to shore and safety. There is so little time, for the river is rising noticeably and storm clouds hang over the mountains to the north. They could all drown if the river suddenly rose. Now that they believe themselves off Lactian territory and safe, they build fires to boil water in United States Army canteens. Women take off their blouses and, with sticks for frames, make shelters for the sick, babies, and old women.

Many Thai soldiers appear on the Thai bank along with a machine gun mounted on a jeep. Soon a patrol in two boats lands on the island to inform the Meo leader that the Meo must go back to Laos—they cannot cross into Thailand. The Meo tell the Thai soldiers that they will build bamboo rafts and leave during the night. Since the Thai side of the island is lower than the Laotian side, the Meo huddle on the lower side hoping that enemy soldiers from Laos will not see them.

Men and women cut bamboo from small clusters on the island while others continue to make survival ropes. In the afternoon, Thai soldiers in boats cut the vines, the Meo lifelines to freedom. Night falls and the Meo take up guard. They have no food and the river is rising.

river is rising.

July 29, 1979.—Day breaks and they continue to build rafts, but not, as the Thai soldiers want, to cross back to Laos, but to continue downstream in hope of passing undiscovered into Thailand. All the Meo are convinced that if they are forced back to Laos they will be killed—including the chil-

About midday, another American journalist manages to obtain a wooden boat from a Thai villager upstream and paddles to the island. The Meo leader gives him a note to take to Vong, Yee, chief of the Meo residing in a nearby refugee camp, Ban Vinai. The note tells of their location and that the Thai soldiers will not allow them to go to the Thai police station (a standard debriefing procedure for new arrivals before allowing them to enter refugee camps), and requests urgent assistance from the chief at the camp to obtain permission for them to enter Thailand.

July 30, 1979.—The day is hot and there are many who are sick and starving. They eat grass and drink boiled water. That soldiers come again and insist that they leave tonight. The Meo explain they don't have enough rafts to ferry all the people, but the Thai insist.

July 31, 1979.—The situation remains the same.

Aug. 1, 1979.—Morning brings signs of another torrid day. The Mekong continues to rise. Thai soldiers remain vigilant. Many rafts have been built. The stranded Meo believe that Vong Yee will send help soon.

As I stood watching the Meo marooned on the island, I remembered the stories of so many Meo who, like those out there, had fled Laos under the most terrifying circumstances. Drumming in my mind were the words of one young Meo: "I feel sad for my wife. Her clothes are shreds and she's sick with malaria, yet she cares for my brother's five chil-dren. The youngest is four and he's so weak he can not stand alone; she must carry him. My brother and his wife are dead. His wife disappeared while searching for food. I often think of my American friends. They gave me their addresses but I've lost them. It seems so long ago that the Americans left-maybe four years, and now the fighting is even more difficult, with so few weapons and no one to We Meo are all so tired. So many Meo are dead. We Meo people are so pitiful."

The Meo who fought under Gen. Vang Pao

for the Americans in Laos against the munists since the early 1960's find it difficult to accept that no one cares about them, hardly anyone writes about their tragedy, no

American friends seek to help.

Aug. 2, 1979.—A group of 30 to 40 Pathet Lao land on the island. Shooting breaks out and the Meo are massacred. It is not known whether there were any survivors. These 189 brave Meo men, women and children did not know that the island on which they had landed was Laotian territory.

After so long a struggle, freedom never

came.

As Vong Yee, the Meo chief said to me: "We Meo fight, work like buffalo, run, starve and die-and no one knows.'

[From Time magazine, Sept., 1981] YELLOW RAIN-SOVIET CHEMICAL WARFARE

American intelligence experts have long suspected that chemical poisons developed in the Soviet Union have been used in military operations in Afghanistan, Laos and Cambodia. Eyewitnesses in all three countries have reported seeing "yellow rain" fall from the skies. Shortly afterward, victims on the ground have suffered burning sensations, convulsions and massive internal bleeding. Many have died painful deaths. Still, there had never been scientific evidence that the poison came from the Soviet Union. So the U.S. has withheld any official accusation of Soviet violations of a 56-year-old interna-tional agreement banning chemical weapons.

Time has learned that in at least one instance, the use of a Soviet chemical agent has been proved beyond any scientific doubt. The site of the offense, by Vietnamese troops, was in Cambodia. Military patrols from Thailand gathered samples of foliage, soil and water from Cambodia and sent them to the U.S for analysis. The State Department, in turn, sent the samples to private American laboratories without revealing the source of the evidence or why it was to be examined. The civilian scientists found that the samples contained the chemical agent trichothecene toxin, known as T₂. Soviet scientists have published articles on how to mass pro-To, which occurs naturally in grain molds common in the Soviet Union.

The T2 connection was first made by writer Sterling Seagrave, who presents a persuasive circumstantial case for the Soviet violations in his forthcoming book "Yellow Rain." Seagrave interviewed victims of chemical attacks in Southeast Asia, Yemen and Afghanistan, as well as the doctors who treated them. In Afghanistan soldiers fighting the Soviet invaders told him about being attacked by rockets fired from helicopters.

The rockets released a "yellowish-brown" cloud that caused victims to "die quickly, vomiting blood and fouling their clothes." The State Department is still reluctant to level public accusations at the Soviet Union. Some officials would like to do so on the humane grounds that public disclosure might prevent further use of the poison and avoid more such deaths in both Southeast Asia and Afghanistan. More cautious U.S. officials prefer to await similar verification that the chemical has been used in both Laos and Afghanistan.

That may not be long in coming. At least three more samples of the yellow powder produced by the "yellow rain" are under study in private U.S. laboratories. If those tests lead to the same conclusions, the State Department presumably will make the de-tails public and then make more formal charges against the Soviet Union.

RECESS UNTIL 3:45 P.M.

Mr. BAKER. Mr. President, it appears that the next items of business to be transacted by the Senate are not yet ready and the principals involved are not yet ready. I ask unanimous consent that the Senate stand in recess until the hour of 3:45 p.m. today.

There being no objection, the Senate, at 3:26 p.m., recessed until 3:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer

(Mr. HAYAKAWA).

The PRESIDING OFFICER. In my capacity as Senator from California, I suggest the absence of a quorum. The clerk will call the roll.

The bill clerk proceeded to call the roll. Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so

ordered.

PROGRAM

Mr. BAKER. Mr. President, I have a number of housekeeping details to proceed with. Before I do that, however, I might advise the Senate of the plans of the leadership for the business to be presented to the Senate on next week.

Shortly I will dispose of these routine matters and ask the Senate to recess over until Monday. On Monday, it is my intention, at about 1 o'clock in the afternoon, to ask the Senate to proceed to the consideration of the farm bill. I hope that at that time we can arrange a unanimous-consent agreement to facilitate the disposition of that measure by limiting time on amendments and perhaps on the bill itself. I will not make that request at this time, but I wish to put Senators on notice that we will attempt to arrange such unanimous-consent request for presentation shortly after we convene on Monday.

Mr. President, in addition to that, after the farm bill is disposed of, or perhaps earlier, in any event when it is available to the Senate and qualifies, I hope the Senate will agree to go into executive session to consider the nomination of Judge O'Connor to be an Associate Justice of the Supreme Court of the United States.

That is as much as I can preview for the business of the Senate next week, but I wish to make that statement at this time so Senators can be aware of the intention of the leadership to attempt to proceed to the consideration of the farm bill and to take up the O'Connor nomination as it becomes available.

Other matters will be dealt with as they become available. One other matter in particular that I had hoped we might be able to proceed to today but certainly should be an item of legislative consideration next week is the Interior appropriation bill. I would not expect the Interior appropriation bill to be presented to the Senate before the middle of the week, but I will have a further announcement to make on that after conferring with certain Senators who have a special interest in that matter on Monday.

ORDER FOR RECESS UNTIL MON-DAY, SEPTEMBER 14, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12 noon on Monday.

The PRESIDING OFFICER, Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR PROXMIRE ON MONDAY, SEPTEMBER 14, 1981

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order on Monday, the distinguished Senator from Wisconsin (Mr. PROXMIRE) be recognized under a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without

objection, it is so ordered.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, there are certain items on the Executive Calendar that are cleared on our side. I would invite the attention of the distinguished minority leader to four names appearing on page 2 of today's Executive Calendar under New Reports, U.S. Synthetic Fuels Corporation, and inquire if he is in a position to clear those nominations for consideration at this time.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed with the nominations under New Reports.

Mr. BAKER. I thank the distinguished minority leader.

Mr. President. I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations appearing under New Reports on page 2 of the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

U.S. SYNTHETIC FUELS CORPORATION

The assistant legislative clerk read the nomination of Robert A. G. Monks, of Maine, to be a member of the Board of

The PRESIDING OFFICER. Without

objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was

agreed to.

The assistant legislative clerk read the nomination of Victor M. Thompson, Jr., of Oklahoma, to be a member of the Board of Directors.

BOREN. Mr. President, I commend President Reagan for nominating my fellow Oklahoman, Victor M. Thompson, Jr., as a Director of the U.S. Synthetic Fuels Corporation.

Victor was born and raised in Thomas. Okla. He served his country in the South Pacific with distinction as a corporal in the U.S. Marine Corps Reserve, First Marine Division during the Second World War. Upon his return to Oklahoma, he attended the University of Oklahoma where he graduated with a B.S. in finance and economics.

Vic Thompson has spent his professional life in the banking business and he is well known and respected throughout the financial community in Oklahoma and beyond. He is president and chief executive officer of the Utica National Bank, one of our States major financial institutions. He is a man of deep moral character and personal integrity, a man who is a great credit to his profession, his community and his country.

Victor Thompson's service to charitable, civic and religious organizations is far too extensive to detail to you today. I will list but a few. He is deacon in the First Baptist Church of Tulsa, a member of the board of directors of the National Conference of Christians and Jews, the Oklahoma State Chamber of Commerce, the Higher Education Alumni Council of Oklahoma, a member of the American Legion, and a member of the Tulsa Psychiatric Center Board of Trustees.

As Governor of Oklahoma and now as Senator, I have called upon Vic Thompson often for his counsel and advice. I have constantly been impressed by the breadth of his knowledge and by his ability to apply sound commonsense in approaching the solution to a problem.

Vic's 30-plus years in banking and finance should prove an invaluable asset to the Synfuels Corporation. His experience, insight and judgment should contribute enormously to the effective functioning of this fledgling organization and the success of the project it assists.

I cannot think of a person more qualified to serve as a Director on the Board of the U.S. Synthetic Fuels Corporation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The assistant legislative clerk read the nomination of C. Howard Wilkins, of Kansas, to be a member of the Board of Directors.

Mr. DOLE. Mr. President, I rise today in support of the nomination to the Board of Directors of the U.S. Synthetic Fuels Corporation of a fellow Kansan of outstanding character and accomplishment, my good friend, Howard Wilkins.

Howard will bring the Synthetic Fuels Corporation board a proven record of business accomplishment and substantial financial experience. By the time Howard was 30 years old he had already built, owned, and operated 13 Pizza Hut franchises in the State of Kentucky and acted as president of Pizza Huts of Louisville, Inc. Within 6 years through brilliant entrepreneurship he parlayed this into a \$50 million corporation that merged with Pizza Hut, Inc. In September of 1974 and served, at the age of 37, as vice chairman of the board of Pizza Hut, Inc., the largest pizza restaurant chain in the world.

Howard has also been active in community and civic affairs, serving on the Yale Alumni Fund, the Yale Class Council, and the Young President's organization. Additionally, Howard served as chairman of the Kansas Economic Development Commission from 1974 to 1978. During that time Kansas ranked fourth in the Nation in new jobs and had one of the lowest unemployment rates in the country. I might also mention that he has done an amazing job as finance chairman of the Republican Senatorial Campaign Committee over the past 4 years.

Mr. President, in my opinion, Howard Wilkins is precisely the type of individual we need to involve in the operations of Government. He is young, aggressive, innovative, and successful. His understanding of the unique problems of business start-ups and considerable financial sophistication will be a tremendous asset to the development of a synthetic fuels industry in America. I am confident that he will well and truly serve the Synfuels Corporation, and the country, and encourage all Senators to support his nomination.

The PRESIDING OFFICER. Without objection, the nomination is confirmed. Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, move to lay that motion on the table. The motion to lay on the table was agreed to.

The assistant legislative clerk read the nomination of Victor A. Schroeder, of Georgia, to be a member of the Board of Directors.

The PRESIDING OFFICER. Without objection, the nomination is confirmed. Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, move to lay that motion on the table. The motion to lay on the table was agreed to.

STATEMENT ON THE NOMINATIONS TO THE BOARD OF DIRECTORS OF THE U.S. SYNTHETIC FUELS CORPORATION

• Mr. McCLURE. Mr. President, on September 10, 1981, the Committee on Energy and Natural Resources favorably reported four Presidential nominations to the Board of Directors of the U.S. Synthetic Fuels Corporation. The nominees are Victor A. Schroeder, C. Howard Wilkins, Victor M. Thompson, Jr., and Robert A. G. Monks. The committee's vote on each nominee was 19 to 0. The votes followed a nomination hearing held on the same date.

The legislative and programmatic foundations for the Synthetic Fuels Corporation were laid in the Congress and in the executive branch over a 7year period beginning in 1974 with President Nixon's proposed project independence, followed by President Ford's 1975 state of the Union message, and Vice President Rockefeller's proposal in 1975 for establishment of the Energy Independence Authority.

What was new, during the 96th Congress, was bipartisan congressional support for creation of a special purpose Federal entity that would provide sufficient financial incentives to private industry to expedite commercial development of a synthetic fuel production capability in the United States. This support, spurred on by the 1979 cutoff of Iranian oil, led to congressional establishment of the Synthetic Fuels Corporation by the enactment on June 30, 1980, of the Energy Security Act. This action represents an unprecedented national commitment to the energy future of the United States.

However, following enactment there developed a basic disagreement between Senate Republican leadership and the Carter White House on how best to proceed with the appointments to the board of directors. Consequently, 4 months transpired before the recess appointment of the initial Board of Directors.

But more importantly, 14 months have transpired since enactment of the Energy Security Act. And due to various events, including a national election, the Synthetic Fuels Corporation still is in the throes of initial start-up. There has yet to be a Senate-confirmed Board of Directors and for the last 7 months there has been no Board of Directors at

We have lost valuable time in this effort to increase our national security by reducing the threat of economic disruption from oil supply interruptions. The Synthetic Fuels Corporation was created to demonstrate at the earliest practicable time the practicality of commercial production of synthetic fuels in the United States. That is still our objective.

President Reagan recognized the important role that synthetic fuels must serve as future energy supplies when he recently approved the award of financial assistance to three synthetic fuels projects under the current interim program. His action followed extensive Cabinet review of national synthetic fuels policies.

We must now turn our attention to full implementation and operation of the Synthetic Fuels Corporation. The Energy Security Act concisely sets forth the goals and objectives for the Synthetic Fuels Corporation as a special purpose Federal entity. And the Congress provided the Corporation with the powers necessary to carry out its defined mission. Similarly, the Congress identified areas in which the Corporation was not

to become involved. In some instances, explicit limitations were imposed on the powers and authorities of the Corporation.

The standard by which this Board of Directors will, and indeed must, be judged will be whether there is an expeditious, but responsive, implementation of the Energy Security Act. This will require the Board to act early on the currently outstanding solicitation and award financial assistance to a diversity of technologies so that national energy policy can benefit from the activities of the Synthetic Fuels Corporation.

This will be the first Board of Directors to be confirmed by the Senate and, as such, these appointments take on special significance.

Mr. President, I submit the biographical statements of the four nominees and ask that they be printed in the RECORD at this point in my remarks.

The biographical statements follow:
BIOGRAPHICAL STATEMENTS OF THE NOMINEES
TO THE BOARD OF DIRECTORS OF THE U.S.
SYNTHETIC FUELS CORPORATION

Victor Schroeder has been Manager of Development for the Atlanta Apparel Mart and Executive Director of the Peachtree Center since 1978. He has also been President and Chief Executive Officer of Aplomb, Inc., consulting in real estate analysis, planning, leasing, operating, management and building of real estate development. In 1975-78 he a consultant and contract manager to various business clients. In 1971-74 Mr. Schroeder was Senior Vice President for Development of the Phipps Land Company. In 1970-71 he was President of Resort Properties, Jasper, Georgia. Mr. Schroeder attended Oklahoma State University and graduated from Officer Candidate School at Fort Benning, Georgia. He is married, has five children, and resides in Atlanta, Georgia. Mr. Schroeder was born in Rosedale, Kansas, on

C. Howard Wilkins is Founder and Managing Partner of the Maverick Company. In 1966 he built, owned and operated 13 Pizza Hut Restaurants in the State of Kentucky and acted as President of Pizza Huts of Louisville, Inc. Later, he merged his Kentucky-based Pizza Hut franchises into Pizza Corporation of America, a 50 million dollar corporation that eventually became Pizza Hut, Inc., in September 1974. He served as Vice Chairman of the Board of Pizza Huts, Inc., until leaving to found the Maverick Company. Mr. Wilkins was graduated from Yale University (1960). He is married, has five children, and resides in Wichita, Kansas. He was born in Wichita on February 19, 1938.

V. M. Thompson, Jr. is Chairman of the Board of Chief Executive Officers of Utica National Bank & Trust Company and Utica Bankshares Corporation, Tulsa, Oklahoma. He was President and Chief Executive Officer of Utica National Bank & Trust Company in 1970-77. In 1973-77 Mr. Thompson was Vice Chairman of the Board, First National Bank & Trust Company, Stillwater, Oklahoma. In 1957-73 he was President and Chief Executive Officer. He recently served on the Oklahoma City branch of the Federal Reserve Board. Mr. Thompson was graduated from the University of Oklahoma (1948) and served in the U.S. Marine Corps in 1942-46. He is married, has three children, and resides in Tulsa, Oklahoma. He was in Thomas, Oklahoma, on November born

12, 1924.

Robert A. G. Monks has been Chairman of the Board of Directors, of the Boston Company, Inc., Boston, Massachusetts, since

1975. In 1975-76 he was President of the Maine Wood Fuel Company, Portland, Maine. He has been President of Ram & Company, a real estate investment firm since 1972. In 1967-71 Mr. Monks was President of C. H. Sprague & Son Company, a coal and oil distribution firm in Boston. During 1967-71 Mr. Monks held directorships with Westmoreland Coal Company, Imperial Smoke-less Coal Company, Winding Gulf Coal Comand Penn-Virginia Corporation. In 1973-76 he was Chairman of the Finance Committee of Sulpetro of Canada, Ltd., a natural gas company. Mr. Monks was graduated from Harvard College (1954) and Harvard Law School (1958). He is married, has two children, and resides in Cape Elizabeth. Maine, and Boston, Massachusetts. He was born in Boston on December 4, 1933.

Mr. McCLURE. Mr. President, during the hearings on these nominees, I was pleased to receive the assurance of Mr. Schroeder and the other nominees regarding the policies and practices of the Synthetic Fuels Corporation in several areas. The matters involved issues which have arisen since enactment of the Energy Security Act.

These areas include: First, with regard to the interim fast start program of the Department of Energy pursuant to the Federal Nonnuclear Energy Research Development Act, the committee received the assurances from the nominees that the Board of Directors would not support transfer of the contract for the Great Plains coal-gasification project from the Department of Energy to the Synthetic Fuels Corporation. This is consistent with existing law provided in the Supplemental Appropriations Act of 1980. It is also consistent with the clarifying amendment included in the Interior and Appropriations bill that will shortly be considered by the Senate.

Second, with regard to the two awards made by the Department of Energy pursuant to the Defense Production Act, the committee received assurances from the nominees that should the Board of Directors decide in favor of transfer of the two projects involved from the Department of Energy to the Corporation, as provided by the Supplemental Appropriations Act of 1980, that every effort would be made to assure early finalization of these contracts.

Third, when the Congress enacted the Energy Security Act it carefully fashioned the Corporation powers to carry out its defined mission. The act closely restricts the powers of the Corporation to the provision of financial assistance to synthetic fuels projects. Enforcement of the act is provided by means of suits by the Attorney General or Comptroller General. Both criminal as well as civil sanctions against Directors, officers, and employees of the Corporation are provided where there is a violation of the provisions of the act.

The nominees are aware of these provisions and the important role their inclusion in the act served in achieving the ultimate congressional compromise creating a Corporation.

In this regard the committee received assurances from the nominees that the new Board of Directors would not enter into certain types of activities which were initiated by the previous Board of

Directors, prior to the appointment of Chairman Noble. The activities of concern relate to earlier attempts by the Corporation to enter into energy mobilization type activities for which statutory authority does not exist in the Energy Security Act.

The earlier Board also entertained various requests to the Corporation for grant assistance to fund such activities as the analysis of individual State regulatory programs and the development of regional energy development plans, for example, in the Rocky Mountain area. Funding such activities clearly would violate the statutory prohibitions in the Energy Security Act.

The nominees assured the committee that the Corporation would not engage in such activities in the future. However, this would not preclude the Corporation from cooperating with the States and project sponsors regarding permitting and licensing requirements associated with projects awarded financial assistance, provided any cooperative activities are consistent with the limitations in the Energy Security Act.

Fourth, the committee also received assurances from the nominees that the Board of Directors would turn early attention to proceeding with the award of financial assistance pursuant to last year's initial solicitation by the Corporation. It is the committee's judgment that the initial solicitation was conducted by the Corporation consistent with the provisions of the statute and congressional intent.

Additionally the committee received the assurance of the nominees that should any decision be made to undertake either a supplementary solicitation. or an amended solicitation, the Board of Directors would carefully tailor such action so as to preserve the validity of the initial solicitation and the standing of the 63 proposals currently pending before the Corporation. The committee and the nominees share the concern that any delay in the solicitation could equate to undermining the program. In this regard the committee received assurance from the nominees that the Board would move as fast as reasonably possible to complete the initial solicitation and award financial assistance.

Finally, the committee received assurances from the nominees that there would be a continuing dialog with the committee on the formulation of the Corporation's policies and practices. In particular the Corporation will consult with the committee on such matters as proposed project selection criteria, en-vironmental and socioeconomic issues, organization of the Corporation, establishment of officers (including the possibility of a new chief operating officer) salaries for officers and employees, and administrative issues. Through such advance consultation it is anticipated that we can avoid the types of problems that arose due to some of the policies and practices of the previous Board of Directors.

Mr. President, during the hearings the nominees demonstrated to the committee their commitment to the goals and objectives of the Synthetic Fuels Corpo-

ration. On behalf of the Committee on Energy and Natural Resources, I am pleased to recommend Senate approval of the Presidential nominations of Victor A. Schroeder, C. Howard Wilkins, Victor M. Thompson, Jr., and Robert A. G. Monks to the Board of Directors of the U.S. Synthetic Fuels Corporation. I hope that immediately following confirmation and appointment of the Board of Directors, the Corporation can be declared fully operational.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nomina-

THE PRESIDING OFFICER. Without objection, it is so ordered.

PRODUCT LIABILITY RISK RETENTION ACT OF 1981

Mr. BAKER. Mr. President, I have another item on the legislative calendar cleared for action on this side. I inquire of the minority leader if he is in the position to proceed to the consideration of S. 1096, the Product Liability Risk Retention Act of 1981.

Mr. ROBERT C. BYRD. Mr. President, the minority is ready to proceed.

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 239, S. 1096.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1096) to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation with amendments, as

On page 3, line 19, strike "until", and insert "before";

On page 6, line 1, after "process", insert the following: and, upon request, furnish such commissioner a copy of any financial report submitted by the risk retention group to the commissioner of the chartering or licensing jurisdiction;

On page 6, line 20, strike "within 30 days": and

On page 10, strike line 7, through and including line 11, and insert the following:

SEC. 5. (a) The ownership interests of members in a risk retention group shall be-

- (1) considered to be exempted securities for purposes of section 5 of the Securities Act of 1933 and for other purposes of section 12 of the Securities Exchange Act of 1934;
- (2) considered to be securities for purposes of the provisions of section 17 of the Securities Act of 1933 and the provisions of section 10 of the Securities Exchange Act of 1934.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Product Liability Risk Retention Act of 1981".

DEFINITIONS

SEC. 2. (a) As used in this Act-

(1) "completed operations liability" means liability arising out of the installation, main-tenance, or repair of any product at a site which is not owned or controlled by-

(A) any person who performs that work:

(B) any person who hires an independent contractor to perform that work;

but shall include liability for activities which are completed or abandoned before the date

of the occurrence giving rise to the liability,
(2) "insurance" means primary insurance,
excess insurance, reinsurance, surplus lines insurance, and any other arrangements for shifting and distributing risk which is determined to be insurance under applicable State or Federal law:

(3) "product liability" means liability for damages because of any personal injury, death, emotional harm, consequential economic damage, or property damage (including damages resulting from the loss of use of property) arising out of the manufacture, design, importation, distribution, packaging, labeling, lease, or sale of a product, but does not include the liability of any person for those damages if the product involved was in the possession of such a person when the incident giving rise to the claim occurred;

(4) "risk retention group" means any corporation or other limited liability associameans any tion taxable as a corporation, or as an insurance company, formed under the laws of any State, Bermuda, or the Cayman Islands-

(A) whose primary activity consists of assuming and spreading all, or any portion, of the product liability or completed operations liability risk exposure of its group members;
(B) which is organized for the primary

purpose of conducting the activity described

under subparagraph (A);

(C) which is authorized to engage in the business of insurance either through chartering or by being licensed under the laws of any State or, before January 1, 1985, Bermuda or the Cayman Islands: Provided, That a group subpoised in Bornate. That a group authorized in Bermuda or the Cayman slands must also certify to the in-surance commissioner of at least one State that it has met the capitalization require-

ments of such State;
(D) which does not exclude any person from membership in the group solely to provide for members of such a group a competitive advantage over such a person; and

(E) which is composed of members each of whose principal activity consists of the manufacture, design, importation, distribution, packaging, labeling, lease or sale of a product or products;

(5) "purchasing group" means any group of persons which has as one of its purposes the purchase of product liability or com-pleted operations insurance on a group basis;

(6) "State" means any State of the United

States or the District of Columbia.

(b) The definition of "product liability" in paragraph (4) of subsection (a) of this section shall not be construed to affect either the tort law or the law governing the interpretation of insurance contracts of any

RISK RETENTION GROUPS

Sec. 3. (a) Except as provided in this section a risk retention group is exempt from any State law, rule, regulation, or order to the extent that such law, rule, regulation, or order would-

(1) make unlawful or regulate, directly or indirectly, the operation of a risk retention group except that the jurisdiction in which it is chartered may regulate the formulation and operation of such a group and any State may require such a group to-

(A) comply with the unfair claim settlement practices law of the State;

(B) pay, on a nondiscriminatory basis, applicable premium and other taxes which are levied on admitted insurers and surplus lines insurers, brokers, or policyholders under the laws of the State;

(C) participate, on a nondiscriminatory basis, in any mechanism established or au-thorized under the law of the State for the equitable apportionment among insurers of product liability or completed operations insurance losses and expenses incurred on policies written through such mechanism;

(D) submit to the appropriate authority reports and other information required of licensed insurers under the laws of a State relating solely to product liability or completed operations insurance losses and ex-

penses;

(E) register with and designate the State insurance commissioner as its agent solely for the purpose of receiving service of legal documents or process and, upon request, furnish such commissioner a copy of any financial report submitted by the risk retention group to the commissioner of the chartering or licensing jurisdiction;

(F) submit to an examination by the State insurance commissioner in any State in which the group is doing business to determine the group's financial condition, if-

(i) the commissioner has reason to believe the risk retention group is in a financially impaired condition; and

(ii) the commissioner of the jurisdiction in which the group is chartered has not begun or has refused to initiate an examination of the group; and

(G) comply with a lawful order issued in a delinquency proceeding commenced by the State insurance commissioner if the commissioner of the jurisdiction in which the group is chartered has failed to initiate such a proceeding after notice of a finding of financial impairment under subparagraph (F) of this subsection.

(2) require or permit a risk retention group to participate in any insurance insolvency association to which an insurer licensed in the State is required to belong.

(3) require any insurance policy issued to a risk retention group or any member of the group to be countersigned by an insurance agent or broker residing in that State; or

(4) otherwise discriminate against a risk retention group or any of its members: Provided, however, That nothing in this section shall be construed to affect the applicability of State laws generally applicable to persons or corporations.

(b) The exemptions specified in subsec-

tion (a) apply to

(1) product liability or completed opera-tions insurance coverage provided to—

(A) a risk retention group; or

- (B) any person who is a member of a risk retention group; and
 - (2) any person who provides-
- (A) product liability or completed opera-tions insurance coverage;
 - (B) insurance related services; or

(C) management services

to a risk retention group or member of the group.

(c) A state may require that a person acting, or offering to act, as an agent or broker for a risk retention group obtain a license from the State, except that a State may not impose any qualifications or require-ment which discriminates against a nonresident agent or broker.

PURCHASING GROUPS

SEC. 4. (a) Except as provided in this section, a purchasing group is exempt from any State law, rule, regulation, or order to the extent that such law, rule, regulation, or order would-

(1) prohibit the establishment of a pur-

chasing group:

(2) make it unlawful for an insurer to provide or offer to provide insurance on a basis providing, to a purchasing group or its members, advantages, based on their loss and expense experience, not afforded to other persons with respect to rates, policy forms, coverages, or other matters;

(3) prohibit a purchasing group or its members from purchasing insurance on the group basis described in paragraph (2) of

this subsection;

(4) prohibit a purchasing group from obtaining insurance on a group basis because the group has not been in existence for a minimum period of time or because member has not belonged to the group for a minimum period of time;

(5) require that a purchasing group must have minimum number of members, common ownership or affiliation, or a certain legal

(6) require that a certain percentage of a purchasing group must obtain insurance on a group basis;

- (7) require that any insurance policy issued to a purchasing group or any members of the group be countersigned by an insurance agent or broker residing in that State;
- (8) otherwise discriminate against a purchasing group or any of its members.

(b) The exemptions specified in subsection (a) apply to-

(1) product liability or completed opera-tions insurance, and comprehensive general liability insurance which includes either of these coverages, provided to-

(A) a purchasing group; or (B) any person who is a member of a purchasing group; and

(2) any person who provides

(A) product liability or completed operaliability coverage;

(B) insurance related services; or

(C) management services to a purchasing

group or member of the group.

(c) A State may require that a person acting, or offering to act, as an agent or broker for a purchasing group obtain a license from that State, except that a State may not impose any qualification or requirement which discriminates against a nonresident agent or

APPLICABILITY OF SECURITIES LAWS

SEC. 5. (a) The ownership interests of members in a risk retention group shall be-

(1) considered to be exempted securities for purposes of section 5 of the Securities Act of 1933 and for other purposes of section 12 of the Securities Exchange Act of 1934; and (2) considered to be securities for purposes

of the provisions of section 17 of the Securities Act of 1933 and the provisions of section 10 of the Securities Exchange Act of 1934.

A risk retention group shall not be considered to be an investment company for purposes of the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.).

Mr. KASTEN. Mr. President, the Senate is now considering S. 1096, the Product Liability Risk Retention Act. On May 4, 1981, Senator Packwood and I introduced this bill. Senator Cannon introduced an earlier revision of this legislation, S. 69, in January of this year.

The Risk Retention Act would facilitate the ability of manufacturers, wholesalers, distributors, and other product sellers to form self-insurance cooperatives. It accomplishes this goal by eliminating multistate insurance regulations

that are directed at large commercial insurers and are inappropriate for product seller self-insurance groups. Under the act, a group chartered or licensed in a State, Bermuda, or the Cayman Islands, can do business in all other States. The groups do not have to contend with multistate capitalization and other requirements.

On the other hand, the act protects the interest of the nonchartering States; it permits those States to collect revenue taxes and to protect the rights of claimants. The act also helps assure that the groups are adequately capitalized and engage in fair competition with commercial insurers.

Apart from facilitating the formation of product seller self-insurance cooperatives, the act enables product sellers to band together and purchase commercial product liability insurance on a group basis. That practice is currently forbidden in a number of States due to anticompetitive legislation called fict:tious group laws.

Mr. President, this legislation involves no new Federal bureaucracy or expenditures.

The legislation does provide busi-esses—particularly smaller ones—with nessesalternative means for insuring product liability risks. It will help assure that product liability rates and premiums are competitive. It will also help protect smaller and medium size businesses against a highly cyclical insurance marketplace. In the past, the marketplace has produced some erratic pricing and unavailability of coverage. This, in turn, has forced many businesses to go "bare" on product liability coverage.

From a policy standpoint, a dependable insurance mechanism is vital to the interests of both product users and sellers. This legislation resulted from an intensive study of the product liability problem by a Federal interagency task force chaired by the Department of Commerce. During the 96th Congress both the House and Senate held intensive hearings on the subject. The result of those hearings was to refine and develop the Risk Retention Act.

To date, over 200 organizations interested in the product liability, problem, including product sellers, consumer groups, and trial lawyers, strongly support this legislation.

With the inclusion of certain language in S. 1096 modifying the period of time during which Bermuda and the Cayman Islands can charter groups, almost all remaining insurer opposition to the enactment of the bill has been withdrawn.

Mr. President, this bill is a good example of bipartisan cooperation. I want to thank the chairman of the Commerce Committee, Senator Packwood for his scheduling this bill for early consideration by the committee. Also, I want to acknowledge the assistance given to me by the Senator from Nevada (Mr. CAN-NON) who has worked long and hard for passage of this legislation.

Finally, Mr. President, I want to thank Marilyn Richmond and Cindy Douglas of the Commerce Committee staff for their help. In particular, though, I want

to express my appreciation to Mike Mullen and Steve Halloway whose tireless efforts during the past 2 years helped make this legislation a reality.

In closing, Mr. President, let me say that this legislation is the first step in our efforts to achieve balance and equity in product liability. The Consumer Sub-committee which I chair, has already begun work on product liability law reform legislation—the next and, I hope, final step to achieving a resolution of this problem.

Mr. NUNN. Mr. President, today I rise to join Senators Kasten, Packwood, Cannon, East, and Riegle in support of the Product Liability Risk Retention Act,

S. 1096.

I, too, have joined in cosponsorship of this bipartisan effort to provide product sellers with relief from the high costs and uncertainties associated with the pur-chase of product liability insurance.

As ranking minority member of the Small Business Committee, I am pleased to add my name to this bill. I am confident its passage will benefit thousands of small- and medium-sized businesses which have been the hardest hit by the product liability insurance problem.

During the mid-to-late 1970's manufacturers, wholesaler-distributors, and other product sellers were confronted with difficult and uncertain insurance market conditions in the product liability area. Many were faced with substantial premium increases or policy terminations, while some could not obtain such insurance at any price.

The Senate and House Small Business Committee, both conducted lengthy hearings on this problem when it first developed. Due to the cyclical nature of the property-casualty insurance market, a return of these difficult conditions

is probable.

The Risk Retention Act will make a substantial contribution to reducing the impact of changing market conditions on small- and medium-sized businesses. It will provide additional market underwriting capacity and encourage greater competition, insuring ample availability and realistic pricing of this crucial insurance protection.

Keeping in step with the times, the Risk Retention Act is a deregulatory solution. It requires no expenditure of Federal funds or unnecessary Federal intrusion, and eliminates the application of specific insurance laws and regulations where they are clearly not needed. Simply put, S. 1096 will provide the States with a framework for encouraging the formation of product liability group selfinsurance or purchasing entities. The concept, when enacted, will be a highly attractive alternative insurance mechanism for small business.

Passage of this legislation by the Senate represents over 2 years of effort by product seller groups to develop a fair and equitable bill to all parties concerned. Special credit goes to Senators KASTEN. PACKWOOD, and CANNON for their efforts on the Senate Commerce Committee to develop this fine legislation. Their initiatives underscore their deep sensitivity to the needs and concerns of small business.

Their staffs also deserve mention for the many hours they have spent in refining S. 1096.

As a result of these collective efforts over 200 organizations representing over 1 million businesses now support S. 1096. Of these, most notably the National Association of Wholesaler-Distributors, the National Machine Tool Builders Association, the American Mining Congress, the National Association of Manufacturers, and the National Federation of Independent Business should be acknowledged for their determination to see this legislation through to its enactment.

The American Insurance Association, the National Association of Casualty and Surety Agents, and the Alliance of American Insurers must also be thanked for their constructive contributions to the development of a balanced bill. Finally, the National Association of Insurance Brokers, the Insurance Company of North America, and the Crum and Forster Insurance Companies should be congratulated for their early recognition of the value and need for this legislation.

It should also be added that the administration strongly supports S. 1096. Trial attorneys and consumer groups have also lent their support to this worthwhile legislation.

In summary, this legislation is an ideal beginning to resolving the product liability problem. The House has already passed the companion version of this legislation, H.R. 2120. All that remains is this vote. I commend this legislation to my colleagues and urge unanimous support.

Mr. CANNON. Mr. President, I am pleased to speak in support of S. 1096 today. As a sponsor of S. 69, the first risk retention bill introduced in the 97th Congress, I fully support S. 1096 which incorporates all of the elements of S. 69. as well as an additional provision limiting the authority to obtain offshore charters in Bermuda and the Cayman Islands to the groups who have obtained charters before January 1, 1985.

This is appropriate. It will allow the States time to consider amending their laws.

I also support the committee amendments which will increase the authority of State insurance commissioners to monitor these groups' solvency and deter fraudulent activities which are helpful amendments that have been suggested by the incurance industry and other witnesses. I think they improve the bill.

Mr. President, when it was first considered last year, the bill provided for Federal chartering and Federal regulation of these groups. As I said then to a group of manufacturers, I was sympathetic to the need for creating new insurance options for product sellers. I was reluctant to create any new Federal regulatory authority or Federal expenditure if the need could be met some other way.

The bill we are considering today is totally consistent with my view that we avoid any new Federal regulation or expenditure and rely on existing State regulation, streamlined to address the spe-

cific needs for regulating these self-insurance groups.

This bill provides a much needed alternative solution to an immediate problem facing all product sellers today—the opportunity to secure protection against product liability loss at competitive rates.

Adoption by the State courts of new and expanded theories of liability has imposed a disproportionate legal burden on small businesses who find themselves exposed to enormous risk of loss with little or no means of obtaining competitively priced insurance protection against that risk of loss.

Sudden and dramatic increases in premium rates, inconsistently applied, have created a crisis for product sellers today insofar as their ability to absorb such increases. The alternatives heretofore available to the product seller have indeed been very bleak. One alternative, forced upon far too many product sellers, has been to do business without insurance protection. The consequences of such an alternative, both as to injured parties and as to product sellers, are so severe as to make this a totally unacceptable alternative.

Nevertheless, the product seller faces a significant availability problem with respect to obtaining protection against risk of loss. The real issue is not whether the product seller can obtain any insurance protection at all—but rather it is whether such insurance protection is competitively affordable.

Nonaffordability translates into non-availability for the product seller, especially the small businessman who has neither the resources to absorb the prohibitive costs of insurance protection nor the ability to pass these costs on in a competitive manner.

The Product Liability Risk Retention Act of 1981 provides an acceptable alternative to the affordability problem that is immediately available to those who need it most. It provides an opportunity for product sellers of all sizes to participate in a form of self-insurance on a group basis that will result in more competitive insurance protection costs that are more closely related to their particular form of operation and risk of loss.

The hills and valleys created by panic pricing and by inconsistent applications of ratemaking criterion will dissipate as competitive forces in the marketplace return. Product sellers will be assured of objective evaluations of risk and commensurate premium rates based on such evaluations.

S. 1096 is supported by over 200 national business organizations, including the National Association of Wholesaler-Distributors, the National Association of Manufacturers, the National Machines Tool Builders Association, the National Federation of Independent Businesses, and the Small Business Legislative Council.

The bill accomplishes its purposes without creating any new regulatory agency by utilizing the existing mechanisms of the State insurance departments.

This does not change under the Product Liability Risk Retention Act of 1981.

However, today a self-insuring group is required to comply with various State countersignature laws and to utilize a fronting company to do business in other States where requirements of minimum business longevity exist. Thus, such self-insurers must comply with the same regulation as a full line insurance company selling to the public. But, these self-insuring groups are not full line insurance companies selling to the public at large. Exacerbating the problem is that self-insuring groups composed of a small number of small businesses find it economically unfeasible to pool their resources because of this unnecessary regulation.

Instead, such companies that make up a self-insuring group are utilizing a mechanism for pooling their resources to meet a possible loss from a particular type of risk—product liability. In doing so, these companies are protecting not only their own resources, but also the rights of wrongfully injured parties to compensation. Under this bill, unnecessary regulation is removed, but necessary State regulation of the domicile is retained, and an opportunity is afforded for small companies to secure risk protection not consistently available to them on a competitive basis.

The small businesses who have been impacted so severely by the product liability problem need the immediate relief this bill can give them. I urge you all to support this proposal so as to provide that relief.

Mr. President, I would like to mention one other point. Section 3a(1) of the Product Liability Risk Retention Act of 1981 contemplates that State regulations applicable to association captives prohibiting a group from exposing itself to any loss on any one risk in excess of a certain percentage of its surplus will apply to risk retention groups. The control of the financial condition of the group is within the jurisdiction of the State insurance commissioner. This is consistent with the laws, regulations, practices, and procedures of the great majority of States.

Also a risk retention group is not authorized or permitted to participate in any State guaranty fund.

Finally, Mr. President, I want to express my appreciation to Senator Kasten for recognizing the importance of this issue.

The House passed a virtually identical bill this week by voice vote with no apparent opposition. I hope it will receive the same strong support and approval by the full Senate. Many manufacturer, wholesaler, distributor, and retailer groups have worked with the insurance industry to perfect this bill. All of this effort has been helpful in developing a very good bill which has a broad consensus of support.

I urge its approval.

Mr. BAKER. Mr. President, I ask unanimous consent to indefinitely postpone Calendar Order No. 239 in order to take up the identical House bill which is at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I ask

that the Chair lay before the Senate the House measure

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as

follows:

A bill (H.R. 2120) to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes.

Mr. BAKER. Mr. President, I ask that the bill be considered as having been read the first and second time and that the Senate proceed to the consideration of the measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 2120) was ordered to a third reading, and was read the third

time, and passed.

Mr. BAKER, Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table. The motion to lay on the table was agreed to.

BICENTENNIAL OF WASHINGTON COLLEGE

Mr. BAKER. Mr. President, there is a resolution that I am prepared to ask the Senate to consider. I invite the attention of the minority leader to Senate Resolution 206, a Senate resolution marking the bicentennial of Washington College, I will inquire if the minority is prepared to proceed.

Mr. ROBERT C. BYRD. The minority

is prepared to proceed.

Mr. BAKER. I thank the minority

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 206, the resolution marking the bicentennial of Washington College.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 206) to mark the bicentennial of Washington College.

There being no objection, the Senate

proceeded to consider the resolution. The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 206) agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 206

Whereas Washington College is the first chartered college in the State of Maryland and the tenth chartered college in the United States: and

Whereas the Maryland Provincial Assembly did authorize the establishment of the Kent County Free School by law in 1723, creating the visitors to supervise and operate such school; and

Whereas the Reverend Doctor William Smith, noted educator and clergyman, did become master of the Kent County School in 1780: and

Whereas by his energy and dedication did succeed in advancing the stature of that school thereby causing its student body to increase in numbers to such a degree that he encouraged the visitors of the Kent County School to petition the Maryland General Assembly to grant a collegiate charter to the

Kent County School; and Whereas General George Washington, Commander in Chief of the American Army, from his headquarters in Newburgh, New York, did give his consent to name the new seminary of learning Washington College; and

Whereas the Maryland General Assembly, on May 24, 1782, did enact legislation granting a charter to the visitors of the Kent County School, in the name of Washington College, in honorable and perpetual memory of His Excellency General George Washing-ton, the illustrious and virtuous Commander in Chief of the Armies of the United States;

Whereas George Washington did contribute the sum of fifty guineas as an earnest of his wishes for the prosperity of the seminary;

Whereas George Washington did visit the college in 1784 at which time he signed his name as a visitor and governor of the college and in 1789 did accept the honorary degree of doctor of laws conferred upon him by the college; and

Whereas the college during its long history has been proud to bear the name of the founder of this country; and

Whereas through the years the college has prepared many men and women who later distinguished themselves in government, the ministry, business, law, medicine, and educa-

Whereas three Presidents of the United States in addition to George Washington have honored the college with visits to the campus, namely Franklin Delano Roosevelt, Harry S Truman, and Dwight D. Eisenhower; and

Whereas numerous Governors, Senators, and Representatives of Congress have similarly honored the college; and

Whereas the visitors and governors of Washington College will set aside the aca-demic year 1981 through 1982 to commemorate their two centuries of service to the State and Nation: Now, therefore, be it

Resolved, That this body pay tribute to Washington College and congratulate the visitors and governors, the president and administration, the faculty and students, the alumni and all friends of the college for their long, devoted, and faithful commitment to excellence in American higher edu-

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECORD OPEN UNTIL 5 P.M. TODAY

Mr. BAKER. Mr. President, I ask unanimous consent that the Record remain open today until the hour of 5 p.m. for the insertion of statements and the introduction of bills and resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, SEPTEMBER 14, 1981

Mr. BAKER. Mr. President, I have no other business that I believe the Senate can transact today. I will inquire of the minority leader if he has other business that he wishes to present.

Mr. ROBERT C. BYRD. I thank the leader for his kindness, majority thoughtfulness, and courtesy. I have

nothing.

Mr. BAKER. In view of that, Mr. President. I move, under the order previously entered, that the Senate stand in recess until the hour of 12 noon on Monday.

The motion was agreed to, and, at 4:37 p.m., the Senate recessed until Monday, September 14, 1981, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate September 11, 1981:

DEPARTMENT OF STATE

Langhorne A. Motley, of Alaska, to be Ambassador Extracrdinary and Plenipotentiary of the United States of America to Brazil.

Richard F. Staar, of California, for the rank of Ambassador during his tenure of service as representative of the United States of America for Mutual and Balanced Force Reductions Negotiations.

OFFICE OF PERSONNEL MANAGEMENT

Loretta Cornelius, of Virginia, to be Deputy Director of the Office of Personnel Management, vice Jule M. Sugarman, resigned.

DEPARTMENT OF DEFENSE

James F. Goodrich, of Maine, to be Under Secretary of the Navy, vice Robert J. Murray, resigned.

IN THE AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be general

Lt. Gen. James V. Hartinger xxx-xx-xxxx FR, U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. James Arthur Williams, xxx-xx-x... Army of the United States (brigadier general, U.S. Army).

IN THE MARINE CORPS

The following-named temporary officers of the Marine Corps for permanent promotion to the grade of major general, pursuant to title 10, United States Code, sections 5780 and 5791, or section 611(a) of the Defense Officer Personnel Management Act (Pub. L. 96-513) and title 10, United States Code, section 624 as added by the same act, as applicable subject to qualifications therefor as provided by law:

James L. Day David B. Barker George B. Crist D'Wayne Gray

Richard A. Kuci Thomas R. Morgan Ernest C. Cheatham, Jr.

John V. Cox John Phillips Wesley H. Rice Gregory A. Corliss Harold G. Glasgow

The following-named temporary officers of the Marine Corps for permanent promotion to the grade of brigadier general, pursuant to title 10, United States Code, sections 5780 and 5791, or section 611(a) of the Defense Officer Personnel Management Act (Pub. I. 96-513) and title 10, United States Code, section 624 as added by the same act, as applicable subject to qualifications therefor as provided by law:

Donald J. Fulham Joseph E. Hopkins William H. J. Tiernan Eugene B. Russell Walter D. Fillmore John I. Hudson Anthony Lukeman Jacob W. Moore James R. Vandenelzen

William R. Etnyre Donald L. Humphrey William A. Bloomer Paul D. Slack George H. Leach Hugh T. Kerr Joseph B. Knotts William G. Carson, Jr. John H. Gary III

Edwin J. Godfrey

Lloyd W. Smith, Jr. The following-named officers of the Marine Corps Reserve for permanent appointment to the grade of major general under the provisions of title 10, United States Code, section 5902:

Kenneth W. Weir John B. Hirt The following-named officers of the Marine Corps Reserve for permanent appointment to the grade of brigadier general under the provisions of title 10, United States Code, section 5902:

John J. Krasovich Ronald K. Nelson John J. Salesses

Constantine Sangalis William H. Gossell

IN THE NAVY

The following-named temporary officers of the U.S. Navy for permanent promotion to the grade of commander in the line and various staff corps, as indicated, pursuant to title 10, United States Code, sections 5780, 5782, and 5791, or section 611(a) of the Defense Officer Personnel Management Act (Pub. L. 96-513) and title 10, United States Code, section 624 as added by the same act, as applicable subject to qualifications therefor as provided by law:

CONFIRMATIONS

Executive nominations confirmed by the Senate September 11, 1981:

U.S. SYNTHETIC FUELS CORPORATION

Robert A. G. Monks, of Maine, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 3 years, vice Frank Savage, resigned.

Victor M. Thompson, Jr., of Oklahoma, to

be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 4 years (new position).

C. Howard Wilkins, of Kansas, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 5 years, vice Joseph Lane Kirkland, resigned.

Victor A. Schroeder, of Georgia, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 6 years (new position).

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSION OF REMARKS

THE PROPOSED LEGISLATION WOULD WEAKEN EXISTING FEDERAL GUN CONTROL LAWS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1981

• MR. McCLORY. Mr. Speaker, last year, I expressed grave concern to my colleagues about proposed legislation which would substantially weaken existing Federal gun control laws in several respects. Such legislation, the Federal Firearms Reform Act (H.R. 3300), has been reintroduced in this Congress, with some changes. For the benefit of my colleagues in their consideration of these proposals, I am submitting today an evaluation of some of the key provisions of H.R. 3300 by the law firm of Wilmer, Cutler, and Pickering:

I. THE BILL WOULD WEAKEN EXISTING CONTROLS ON ILLEGAL TRANSFERS OF FIREARMS

Foremost among the changes are the provisions that would allow any person who meets minimum federal eligibility requirements to purchase a firearm in any state and would allow persons other than federally licensed manufacturers, importers, dealers and collectors to make the transfer, as long as it did not violate the state and local law at the place of residence of the transferee and at the place of transfer. These provisions would eviscerate the current system of ederal controls on illegal trafficking in firearms, would increase the likelihood that criminals and other ineligible persons could own firearms, and would hamper the effective operation of state and local gun control laws.

II. THE BILL WOULD INTERPERE WITH STATE LAWS GOVERNING THE TRANSPORTATION OF FIREARMS WITHIN STATE BORDERS

The bill would establish a new mandatory federal standard governing the transportation of firearms that would require states to allow the transportation of firearms within their borders under conditions inconsistent with the requirements of their own gun control laws. This federal standard represents an intrusion into the rights of states to control illegal and dangerous gun traffic.

III. THE BILL WOULD REDUCE PENALTIES FOR FEDERAL FIREARMS LAW VIOLATORS

Although the asserted purpose of the bill is to strengthen criminal penalties, it would actually reduce, and in some cases eliminate, the additional penalties established under current law for use of a firearm in connection with a felony. In addition, the bill provides a substantial exception to the mandatory penalty section by allowing relief in the event of the use of a firearm for self-defense or to protect another person or property. To the extent use of the firearm is justified for self-defense or to protect another, that justification constitutes a defense to the offense itself and should not be allowed to be raised in connection with sen-

tencing. Moreover, under well-settled law, the use of deadly force to protect property is not justified except when defending one's home; when not justified, it should not be a basis for limiting the criminal penalty.

IV. THE BILL WOULD MAKE IT EASIER FOR CON-VICTED FELONS AND OTHERS TO OBTAIN FIRE-ARMS

The bill weakens the procedure by which persons prohibited from firearm ownership (e.g., convicted felons, fugitives from justice, drug users) may obtain relief from such restrictions. It would have the effect of giving such persons an absolute right to obtain relief from the prohibition unless the Secretary of the Treasury could affirmatively prove that they were a threat to public safety.

V. THE BILL WOULD WEAKEN THE ENFORCEMENT OF FEDERAL FIREARMS CONTROLS

The bill contains many provisions aimed at controlling, either directly or indirectly, the ability of the Bureau of Alcohol, Tobacco and Firearms [BATF] to implement and enforce the federal firearms laws. These provisions would hamper the effective operation of that agency. For example, the bill would prevent the BATF from employing one of its most effective enforcement tools—the routine inspections necessary to determine whether federal licensees are complying with the law.

VI. THE BILL IS PREMISED ON A MISUNDERSTANDING OF THE CONSTITUTION

The preamble to the bill suggests that individual citizens have a constitutional right to keep and bear arms. In fact, the courts have repeatedly concluded that the Second Amendment does not guarantee that right to individuals.

In assessing the consequences of enacting this legislation, one must also consider the compound effect of the various provisions taken as a whole. Thus, for example, the effect of the provisions that weaken existing law governing firearms transfers is compounded by the provisions restricting the ability of the BATF to enforce the remaining standards and further by the provisions restricting the opportunities for the states to step in and ensure that tougher standards apply within their own borders and to their own citizens. Similarly, the effect of the bill's provisions making it easier for criminals to obtain relief from firearms ownership restrictions is magnified by the provisions that increase the likelihood that even those remaining in the prohibited catewill have less difficulty obtaining access to firearms.

I. THE BILL WOULD WEAKEN EXISTING CONTROLS ON ILLEGAL TRANSFERS OF FIREARMS A. Interstate transfers by persons other than Federal licenses

The centerpiece of the current federal system to control illicit trafficking in firearms is the general prohibition against out-of-state firearms purchase by, or sales to, individuals other than federally licensed manufacturers, importers, dealers and collectors. Only federal licensees are permitted to transport firearms in interstate commerce. 18 U.S.C. §§ 922(a) (1)-(2). Individuals may not receive or transport into their home state firearms purchased in another state,

18 U.S.C. § 922(a)(3), nor may an individual or a federal licensee sell to an individual from another state. 18 U.S.C. §§ 922 (a)(5), (b)(3). These prohibitions, which are subject only to certain narrow exceptions, seek to ensure that only persons who have undergone a federal eligibility check through the licensing process and are subject to continuing federal oversight are permitted to purchase and sell firearms outside of their home state.

The bill, assertedly in furtherance of the goal of administrative simplicity, would dismantle this system. It would permit any person meeting minimum federal eligibility standards to purchase a firearm in any state, subject to the requirement that the person could not receive or transport the firearm into his home state if the purchase would violate the state or local law at his place of residence or the place of purchase. § 102(c). Further, it would permit any person to transfer a firearm to a federally eligible person from any other state as long as the transferor did not know or have reasonable grounds to believe it would violate the transferee's state or local law or the law at the place of purchase. § 102(d).

These changes would virtually eliminate federal control over illegal interstate commerce in firearms and would greatly increase the likelihood that persons ineligible under federal or state law could purchase guns. These provisions would also undermine the ability of law enforcement authorities to trace guns used in crimes because interstate transfers between non-licensees would not be subject to recordkeeping requirements of the kind imposed on licensees.

The bill would substitute for existing law a system that is essentially unworkable. It is obviously unrealistic to expect transferors in, for example, California, particularly nonlicensed individuals without comprehensive

knowledge of state and local gun control laws, to know whether a transfer to a Delaware resident violates state and local law in Delaware. Yet they are under no obligation to ascertain whether the transfer is permitted under Delaware law. As long as they do not "know [] or [have] reasonable cause to believe" the transfer is improper, they are free to sell 1 As a practical matter, this suggested provision is unlikely to be enforced effectively, thereby subverting the bill's purpose of having the lawfulness of interstate firearms transfers determined principally by state law.

Moreover, a system that allowed nationwide purchases by individuals who also inhibit effective enforcement of federal firearms eligibility standards. Section 102(f) of the bill prohibits persons from selling to someone they know or have reasonable

¹ Indeed, a major inconsistency in the bill is created by the addition of new section 102(d) in conjunction with the retention of old section 922(b)(2). Under the latter, a licensee is not permitted to sell in violation of the state or local law at the place of transfer unless he knows or has reason to believe the sale is lawful. Section 102(d) undercuts this affirmative obligation to ensure compliance, however, by permitting the licensee (like any other person) to sell unless he has reason to believe the sale is unlawful.

cause to believe does not meet the minimum federal eligibility requirements (i.e., a person convicted of a felony, an illegal alien, etc.). Under current law, where federally licensed dealers, importers, manufacturers and collectors are subject to that standard with respect to sales to persons within their state, there is at least some possibility that the federal licensee may know or have reasonable cause to believe that the person is ineligible. See 18 U.S.C. § 922(d). Under the new proposal, however, where the potential customer can be from any state and the transferor can be a person without any federal responsibilities, the effectiveness of this prohibition is virtually eliminated.

B. The 'lawful" purpose exception

As shown above, the bill permits non-licensed persons to provide a firearm to another person, subject to the requirement that the transferor does not know or have reasonable grounds to believe that the transferee would violate a law in his home state by acquiring the gun. The bill creates an exception to this requirement, however, for the loan or rental of a firearm for temporary use for "lawful" purposes. § 102(d).

The new "lawful purposes" loan provision bears a superficial resemblance to the "lawful sporting purposes" loan provision of existing law. One exception to the present prohibition on out-of-state transfers of firearms to nonlicensees is that a gun may be loaned or rented for "lawful sporting" purposes. 18 U.S.C. §§ 922 (a)(5)(B), (b)(3)(B). This limited exception applies to permit a sportsman to make temporary use of a gun in another state, a type of "transfer" that does not interfere with the purposes of the general prohibition against the interstate transfer of firearms to unlicensed persons.

The new exception for out-of-state loans, however, has no rational purpose in the proposed system where out-of-state transfers are already permitted. The implication of the exception is that a Maryland resident may provide a gun to a Virginia resident even if the transferor knows the recipient is prohibited by either Virginia or Maryland law from such receipt, as long as it is intended to be a temporary loan for a "lawful purpose." Obviously, if someone is properly prohibited by state or local law from receiving a gun, there should not be a broad exception in federal law to permit such receipt, even as a temporary loan.

Even if some exception for loans is desirable the expansion of the exception from "lawful sporting" purposes to "lawful" pur-poses creates a substantial potential for abuse. Congress wisely limited the exceptions in sections 922 (a)(5) and (b)(3) when it passed the original statute in 1968, fearful of the potential abuses that broader exceptions might engender. In contrast to these narrower exceptions, the "lawful purposes" formulation is subject to varying interpretations. For example, it could permit virtually free transfers between persons in the form of "loans" for the avowed purpose of self-defense, regardless of whether such transfers are consistent with state law. There is no legitimate federal interest in allowing an otherwise unlawful loan of a gun to a person

II. THE BILL WOULD INTERFERE WITH STATE LAWS GOVERNING THE TRANSPORTATION OF FIREARMS WITHIN STATE BORDERS

who intends to roam the streets of New York City carrying the gun with the "lawful

purpose" of "protecting" himself and his

fellow citizens.

Another provision of the proposed legislation that could give rise to illegal gun traffic

is the suggested change to 18 U.S.C. § 927. This section now provides that Congress does not intend to preempt state firearms law unless the particular state and federal provisions directly conflict and cannot be reconciled. Section 107 of the bill, however, specifically preempts any state law prohibiting the transfer of an unloaded, inaccessible gun through that state.

Such a provision would clearly fly in the face of the rights of states to limit the gun traffic within their borders. To take a single extreme example, a state may wish to regulate or prevent the shipment through its ports of crates of guns that may be destined for either domestic or international terrorist groups. Such guns could very easily qualify under the proposed legislation as unloaded and inaccessible, yet Congress surely has little interest in insisting that a state provide a staging ground for the shipment of such weapons.

III. THE BILL WOULD REDUCE PENALTIES FOR FIREARMS LAW VIOLATORS

The bill purports to represent an effort to stiffen federal penalties for firearms crimes. In fact, it will have the opposite effect, Under current law anyone who uses a firearm to commit a felony is sentenced to a one- to ten-year term in addition to the punishment for the felony. 18 U.S.C. § 924(c). Section 104(b) of the bill deletes this provision. Moreover, the proposed legislation provides no prison sentence for firearms felonies that are not within the exclusive jurisdiction of the federal courts. Thus, criminals who commit crimes over which both state and federal courts have jurisdiction, such as extortion while using a handgun or using a machine gun during a robbery. would not receive the more severe sentences that current federal law now mandates.

The bill also gives felons a new opportunity to avoid the stiffer sentences associated with firearm use. Under section 104(b) a felon is given the chance to convince the court that he should not receive the increased sentence because he acted to protect property from conduct constituting felony. This notion is seriously flawed. It is settled law that, except in defending one's home, deadly force is not permitted in the defense of property. LaFave & Scott, "Criminal Law" 400-01 (1972). This bill flies in the face of this established principle and would mean, for example, that a person could shoot someone stealing his mail,3 yet seek to pursuade a judge not to impose the increased sentence otherwise mandated by current law. If the felon had lawfully used deadly force to protect person or property, he would have had a valid defense that would have resulted in his acquittal; giving a convicted felon the chance to convince a judge at sentencing of the merit of a defense that failed at trial serves no legitimate purpose.

DR. RANDOLPH L. BRAHAM, AUTHOR OF UNPRECEDENTED HOLOCAUST STUDY

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1981

Mr. LANTOS. Mr. Speaker, the distinguished scholar Randolph L.
 Braham has just published the second volume of his definitive work, "The Politics of Genocide: The Holocaust in Hungary."

Professor Braham, who is chairman of the department of political science at the City College of the City University of New York, has written a gripping and scholarly account of the destruction of Hungarian Jewry by the Nazis and their Hungarian accomplices. His unprecedented study details the ultimate barbarity of the Nazi extermination program in Hungary.

Professor Braham is the author, coauthor or editor of more than 20 books, including the acclaimed threevolume "Hungarian-Jewish Studies." His latest work combines his traditional high level of historical scholarship with a commitment to teaching future generations the meaning of the final solution.

I strongly commend "The Politics of Genocide: The Holocaust in Hungary" to my colleagues, and congratulate Professor Braham for his exemplary achievements.

EASING OF HAZARDOUS EXPORTS STUDIED

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

 Mr. MILLER of California. Mr. Speaker, I was shocked to read in yesterday's paper that the Reagan administration is considering the elimination of efforts to notify foreign companies of dangerous products imported from the United States.

Coming on the heels of the outrageous vote by this administration in the United Nations in support of the irresponsible distribution of infant formula to developing nations—the only such vote in the entire General Assembly—the new proposal raises the ugly specter of a total disregard for the health and safety of hundreds of millions of people throughout the world.

This is not an imagined threat. Products which have been determined to be too dangerous for domestic use have been dumped in unsuspecting nations for years with tragic results. In 1976, over 160 million pounds of unregistered pesticides were dumped abroad, and there were reports of 500,000 poi-

² A person committing extortion in the District of Columbia, for example, could be prosecuted under D.C. law, 22 D.C. Code § 2306, or federal law, 18 U.S.C. § 1951. Use of a machine gun during a robbery would be punishable under 22 D.C. Code § 3202 or 18 U.S.C. § 924(c).

³ Pursuant to 18 U.S.C. § 1708 (1976), stealing mail is a felony.

sonings and 5,000 deaths from these pesticides.

There were 2½ million pieces of Tris-treated childrens' sleepwear, 450,000 infant pacifiers, and 400,000 faulty IUD's sold abroad after they were determined to be too dangerous for use in our own country.

Is this administration so desperate for an economic revival that it will rebuild the American economy on the graves of unsuspecting foreign custom-

ers?

Only last week we learned that the National Institute for Occupational Safety and Health has concealed severe occupational hazards from millions of innocent American workers.

Is this administration so single minded that it will reindustrialize our Nation on the unsuspecting American

worker?

It is not too early to begin to ask whether these policies together indicate a shocking disregard for human life by an administration which is all consumed by economics.

[From the Washington Post. Sept. 10, 1981]

Easing of Hazardous Exports Studied

(By Caroline E. Mayer)

The Reagan administration is drafting plans to ease the way for U.S. companies to export hazardous goods that have been banned or restricted in this country.

In a draft policy statement obtained by The Washington Post, high ranking officials at the State and Commerce departments are proposing the elimination of almost all rules that now require manufacturers to notify foreign governments before they ship goods abroad that have been deemed too dangerous for widespread use in the United States.

The types of products and materials that may be affected by the new policy range from such tightly regulated chemicals as PCBs (polychlorinated biphenyls) and chlorofluorocarbons to banned pesticides such as DDT, lindane and endrin. Consumer products that also have been banned, such as children's sleepwear treated with the flame retardant chemical Tris, may also be

According to the draft statement, a policy change is needed because the current preexport notification rules "have placed U.S. exports at a competitive disadvantage."

Noting that the United States is "the only country currently requiring notification of the export of hazardous substances," the draft concludes that such rules should be replaced by a broader information and educa-

tion campaign.

Instead of notifying foreign governments at least once a year when a shipment of banned or restricted goods is to be exported, the Reagan officials propose simply providing "brief summary information" to either foreign governments or international organizations when U.S. Government agencies ban or restrict a product's use, even though that notice may be years before that product is exported to another country.

uct is exported to another country.

"In the long run, international information sharing will have more beneficial results for the U.S. than procedures requiring specific export notifications . . . A unified, international approach will provide a more comprehensive basis for importing nations to make decisions without jeopardizing the competitive position of U.S. exporters."

The proposed policy change may require some amendments to existing laws, according to the draft report.

State and Commerce Department officials, upset that the draft report had become public, cautioned that the policy is only a draft and could be changed before it is sent to President Reagan. Commerce Department officials said they hope to complete the report within a month.

One official involved in writing the report said there was a great deal of internal debate in both agencies over the proposed policy, with several staff members arguing that it does not protect the public's health and safety and the environment.

The two departments themselves are locked in a dispute over just who should be notified about U.S. regulatory actions to

ban a product.

State Department officials argue that they should notify individual governments about each action, while Commerce officials contend that such information should go only to international organizations, such as the United Nations.

Commerce argues that it is not the U.S. Government's role to keep all other foreign governments informed about hazardous products; instead, it is up to the United States merely to furnish the information to an agency so any interested government

would be able to obtain it.

The policy recommendations on hazardous exports was requested by Reagan last
February when he struck down an executive
order issued by President Carter just five
days before he left office. That order sharply restricted the export of products that
either have been banned or whose use has
been restricted in this country. Among
other things, the order would require
anyone exporting such products to obtain
an export license from the Commerce Department before such goods were shipped
abroad.

Despite the revocation, exporters are still required in many cases to notify U.S. Government agencies before they export tightly regulated chemicals, banned products, pesticides that are not registered in the United States and medical devices that do not comply with U.S. standards. In turn, these agencies proceed to notify the officials in the foreign country for which these products are destined, either directly or through the State Department.

"In no case can it be documented under the existing shipment specific notification system that a foreign government has taken specific regulatory action in response to notification of a U.S. export," the draft report says in explaining why the current rules

should be dropped.

LOWER SPENDING EQUALS LOWER INTEREST RATES

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. GINGRICH. Mr. Speaker, we in Congress must do something about the interest rates. The current double digit rates will cripple the economy if we do not act immediately.

In the next 5 weeks, we have got to show the American people we recognize their pain, that we are going to do something about it. We must take the

steps necessary to get the prime rate down to 9 percent by next summer.

The benefits of our progrowth approach we successfully argued and voted for earlier this session will be realized—in time. But these benefits will mean nothing to the people if they cannot survive the present interest rates long enough to reach them.

We have four alternative routes we can take to achieve that 9-percent target. First, we can just live with the high interest rates and hope they go away-and hope the economy does not collapse in the meantime. Eisenhower tried this approach in 1958 and suffered the consequences. Second, we can implement wage and price controls. We already know their dismal historical track record. From ancient times to Richard Nixon's, wage and price controls have been tried and have failed. Third, we can pressure the Fed to expand the money supply. We would get lower interest rates in the short run-and higher inflation in the long run.

The fourth prescription—and the one I recommend we follow—is to cut Federal spending further, get the Government out of the money markets and thereby stop crowding out the private sector. The historical record shows that is the way for us to go.

I suggest that instead of stumbling into a big deficit and then figuring out what that means for the prime rate, we ought to instead set a prime rate target first. And then we can set the deficit figure necessary to hit that target. I am suggesting we set a 9-percent prime rate target for the third quarter of next year.

Furthermore, we must turn the debate into a fight between those of us who favor lower spending and lower interest rates and those who want higher spending and higher interest rates. Our aim must be to force those who favor higher spending to stand up and communicate to the American people that they are for higher interest rates.

In the process we can illustrate that Republicans are compassionate, that we have compassion for those Americans who want a better America. Our message must be that, in the long run, compassion for working Americans will strengthen the economy and will thus help the poor far more than compassion for the poor at the expense of working Americans.

So we are faced with a choice. We can approach the upcoming budget cuts fight as an opportunity to show the people we are on their side for lower interest rates and a stronger economy. Or we can approach the battle negatively, and let the liberals label us as the side of higher interest rates and unnecessary budget cuts—while they evade the steps necessary

to solve the American people's prob- me about his community and I will

TRIBUTE TO A NEWSPAPERMAN

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. RATCHFORD. Mr. Speaker, it is with great sadness that I rise to report to this body the recent death of fine newspaperman and a rare human being, August L. Loeb.

Al, as he was known to his hundreds of friends, was editor and publisher of the Cheshire Herald, a sophisticated small weekly in my district, when he died suddenly on August 21 at the age of 72. He had guided the Herald for 18 years-a student of people, government, and the arts who never tired of the lessons he learned and conveyed each week in the pages of his paper. Because of Al Loeb, the Herald was, and is, a smart, thorough, highly literate journal-a reflection of the extraordinary qualities of the man in

And because of the Herald, the town of Cheshire was enriched. Its people saw themselves and their neighbors and officials through the eyes of Al and his staff, and they improved for that image. Cheshire, the town he loved, is better for his work-immeasurably better.

Al's career was as diverse as his interests. Before he ran the Herald, he edited and published the Southington News and the Plainville News. Before that, he worked for the Associated Press and the New York Times, and for Forbes magazine-a 40-year career that took him from Shreveport, La., where he worked for the local daily Times, to Connecticut by way of schools and journalism jobs in Pennsylvania and New York, and a stint overseas in the Second World War that had him editing the Italian edition of Yank magazine and writing for Stars and Stripes from Egypt.

Al was a nimble writer and a scholarly editorialist-but he was never dogmatic, never preachy, never pretentious. In a career that sometimes forms calluses and toughens gentle souls, Al Loeb had the unique ability to remain true to a rare humility, an unusual concern for the problems of his fellow inhabitants of this Earth. He had a kindness too seldom seen in the newsroom-or the boardroom or clubhouse.

I spent hours and hours with Al over the years, talking over national poli-

tics, talking about Connecticut, talking the way politicians and newspapermen talk when they know each other well and long. I will miss those conversations with this gifted and gentle man-I will miss what he was able to teach

miss his humor and his friendship. His passing strips my State of yet another public servant, yet another warm and rare human being.

MAGNUSON-MOSS ACT

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. LEE. Mr. Speaker, in December 1974, Congress passed the Magnuson-Moss Warranty Federal Trade Commission Improvement Act. Section 109(b) of that act directed the Commission to initiate a rulemaking proceeding dealing with warranties and warranty practices in connection with the sale of used motor vehicles.

In response to this mandate, the Commission initiated a rulemaking proceeding in this matter by publishing its proposed rule. As originally proposed in December 1975, the rule would have required a window sticker disclosure on used vehicles offered for sale by a dealer. The original rule would have further required a mandatory inspection of the vehicle, disclosure of inspection results and creation of an express warranty and use of a specified inspection procedure.

Following a review of the Commission's proposal the House Commerce Committee, through its report on 'The Federal Trade Commission Improvements Act of 1979," expressed concern that the proposal was not in compliance with the letter of the law or with the intent of Congress as expressed in the legislative history. The concerns were expressed in greater detail in additional views signed by 21 members of the committee, which briefly restated the intent of Congress regarding section 109(b) of the Magnuson-Moss Act.

A fair and impartial reading of the Magnuson-Moss Act and the legislative history accompanying it would require a clear and concise disclosure that a used motor vehicle was being sold without any warranty, if such was the case, and if a warranty were given, further, disclosure as to the nature, extent, and limitations of such warranty.

The Senate also addressed this question in its companion bill and adopted a provision expressly prohibiting the mandating of inspections and/or warranties

In response to congressional concerns, the Commission altered its rule and on May 16, 1980, the Commission tentatively adopted what was termed an "optional inspection" rule, with only three of the five Commissioners voting for the rule.

Under the "optional inspection" rule, published for technical comments on August 7, 1980, the "Buyers Guide" window sticker contained a requirement for disclosure of any warranty coverage and a list of 14 automotive systems, such as frame and body, engine, electrical system, and the like. The dealer would have been required to check one of the following for each automotive system: "OK," "Not OK" or "We Don't Know."

Notwithstanding some improvement in form, the Commission again failed to comply with the intent of Congress. In response, 51 U.S. Senators, in correspondence to FTC Chairman Pertschuk dated September 25, 1980, expressed grave concerns over the substance and burdensome nature of the rule. Subsequently, additional correspondence from various individual Senators and Congressmen urged the Commission to reject the optional inspection rule.

On April 14, 1981, the Commission met to consider final adoption of an optional inspection rule. Due to the lack of a second to a motion for final adoption, the optional inspection rule was rejected by the Commission.

In place of the rejected rule, however, the Commission on August 14, 1981, issued a final rule in this matter. Despite repeated expressions of concern by both the House and Senate Committees on Commerce, as well as expressions of concern by a number of individual Senators and Congressmen, the Commission once again decided to issue a rule which clearly fails to comply with the congressional intent in this matter.

The Commission did include in its rule a warranty disclosure provision which does comply with the clearly expressed congressional intent. However, it also included provisions which clearly are outside of, and circumvent, the congressional direction given to the Commission. These provisions require dealers to disclose known defective components through a sticker on the window of the vehicle.

My concern regarding this proposal is with the requirement to disclose known defects. First, neither the Magnuson-Moss Act nor the legislative history authorizes the Commission to promulgate any known defect disclosure rule for dealer sales of used motor vehicles. The clear intent of the act is to require warranty disclosure.

Second, the Commission has circumvented the clearly stated congressional intent prohibiting any provision that would directly or indirectly require an inspection of the vehicle. Despite the representations of the Commission that the rule only requires a disclosure of known defects, the direct language of the rule provides that a dealer or his agent or employee has knowledge of a defect if they have "obtained facts or information about the condition of a vehicle which would lead a reasonable person in similar circumstances to believe that the car contained one or more defects as defined in section 455.6 of the rule."

In many cases this puts a dealer back into a position of having to dismantle the vehicle in order to discover the specific defect. For example, if the dealer has a used vehicle that leans to one side when viewed from the front, it is obvious to anyone that a defect exists in the vehicle, but this condition could be caused by a number of different things. It could be caused by any the following defects included within the 52 listed in the rule or by other things such as: spring broken; frame damage; shock broken; wrong tire size; and structural part bent or damaged.

The only possible way for the dealer to know which defect is causing the car to lean is to inspect the vehicle. He cannot just state that the car leans to one side. He must find the precise cause of the defect and list it. If he does not he is subject to a \$10,000 fine.

The Commerce Committee report. through the additional views referred to above, clearly directed the Commission on this point. It stated:

Congress never intended to give the Commission authority under the provisions of Public Law 93-637 or any other provision of law to require inspections of vehicles or to require that any used motor vehicle or any of its components be warranted.

This is without question a case of the Federal Trade Commission totally ignoring the instructions of the Congress and openly circumventing the clearly expressed intent of Congress in this matter.

Therefore, in order to allow Congress to address this issue as provided by law I am introducing a concurrent resolution which would disapprove of the Federal Trade Commission's used car rule. I would encourage my colleagues to review carefully this matter and to support House concurrent resolution.

DENNI HLASATEL NEWSPAPER CELEBRATES 90TH YEAR

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1981

• Mr. DERWINSKI. Mr. Speaker, recently the well-respected newspaper, the Denni Hlasatel, the only daily Czechoslovak newspaper in the free world, commemorated its 90th year of existence. Its leadership in the Czechoslovak-American community and its especially progressive and spirited reporting of the news has made the Denni Hlasatel the largest foreign language daily newspaper in the United States.

On numerous occasions, I have spoken out on the floor of the House, directing attention to the continued suppression that exists in CzechoslovaEXTENSIONS OF REMARKS

kia Throughout their struggle to remove the chains of Soviet oppression, the Czechoslovak people have effectively maintained their nationalistic spirit and religious faith against consistent repression by the Communist Government. This undaunted determination demonstrates their heroic struggle to resist russification.

It is especially appropriate and meaningful that in the United States, the Czechoslovak Americans have demonstrated the same ability to maintain the culture, language, and unique talents of their homeland. The Denni Hlasatel has been a driving force and a great asset in the Czechoslovak community. I am especially pleased to join in commemorating this important milestone and to honor the many contributions that have been made in this country by our Czechoslovak community

I wish Denni Hlasatel many more successful years of reporting the news for our Czechoslovak community and in preserving the heritage and culture of their people. I am hopeful that one day freedom will be restored to their homeland of Czechoslovakia.

In closing, I wish to insert an article which appeared in the Suburban Life newspaper, serving the southwest suburban area of Chicago, telling of the history of the Denni Hlasatel, and in addition a copy of a resolution introduced by Illinois State Representative Judy Barr Topinka in honor of this special commemoration:

DENNI HLASATEL PAPER CELEBRATES 90TH YEAR

(By Ethel Carrako)

Hailed as the largest foreign language daily newspaper in the United States, and the only Czechoslovak daily newspaper in the free world, the Denni Hlasatel (Czechoslovak Daily Herald), now based in Cicero, is currently celebrating its 90th year of exist-

Founded in Chicago in 1891 as a result of a printer's strike which caused the folding of the Chicagske Listy (Chicago reporter) and opened the way for a new paper, the Denni Hlasatel launched its career in offices on Chicago's West Side at the corner of Racine Avenue and 19th Street.

The continued migration of Czechs to the Chicago area assured good readership for the new publication. Several other Czech dailies were started, including the Svornost, but the Hlasatel remained among the lead-

ing publications.

In 1900, a new building designed by architect Frank Randak became the home for the publication at 18th Street and Ashland Avenue. The Hlasatel remained there until March of 1979

The original founding fathers included people from all walks of life. Among them were Dr. Edwin Hare, Frank Sirovatka, Frank Stejskal and Vladimir Spatny Sr., the first president. Their relatives are still actively involved with the paper today. The late Vladimir Spatny Jr. was president during the 1950s.

NOTED SUBSCRIBERS

Over the years the Hlasatel's contributors and subscribers included such noted citizens as Cook County Treasurer John Toman: Gov. Otto Kerner; Chicago Mayor Anton J. Cermak; Cook County House of Corrections director Edward Denemark; Dr. Andrew Toman; and U.S. Rep. Adolf Sabath.

The Denni Hlasatel also operated a radio station

On the occasion of the paper's 50th anniversary in 1941, the directors noted it was a time of "thanksgiving, and we are grateful for the opportunity to be in a free land of democracy where we have the right to freedom of workship and free speech and press. And on this day we have hope that soon the world will be at peace again, where all peoples will be free and able to determine their own destinies as we here in America.

The aim of the Hlasatel today, according to a paper spokesman, is to present the news, but also to propogate a rich Czechoslovak heritage and culture and to assist in the struggle for freedom in communistruled Czechoslovakia, a once prosperous and progressive eastern European nation with a proud history.

State Rep. Judy Baar Topinka (R.,7th) presented a resolution to the House of Representatives, in Springfield which was adopted May 21 calling attention to the paper's modest beginning and its rise to over 100,000 in circulation during the two World Wars.

Its reputation for excellence and outstanding service to the Czechoslovak community is being continued today, the resolution noted, by the dedication and energy of Frantisek Hrala, circulation manager; Martin Podhrazsky, assistant circulation manager, Rose Kucera, advertising manager; Erich Jaksch, managing editor; Vladimir sky, expedition; Dagmar Meixner, Dana Hoffman and Marie Cermak, graphics; and other dedicated members of the staff and board of directors

COPY PRESENTED

A copy of the resolution was presented to the Denni Hlasatel signed by George H. Ryan, speaker of the House, and Anthony J. Leone Jr., clerk of the House.

Members of the board of directors of the paper include Josef Kucera Jr., president; Karel Samal, vice president; Frantisek Hrala, treasurer; Ella Tollefson, secretary, and Antonin Slovacek, Josef Kucera Sr., and Josef Krninsky, board members.

The Denni Hlasatel also publishes a condensed weekly version of the daily paper. Its history and many of its papers are on file in the University of Chicago archives of Czechs and Slovaks abroad.

STATE OF ILLINOIS, EIGHTY-SECOND GENERAL ASSEMBLY, House of Representatives Resolution No. 326—Offered by Representative Topinka

Whereas, May 1, 1981 marked the 90th anniversary of the founding of the Denni Hlasatel (Czechoslovak Daily Herald), the only Czechoslovak daily newspaper in the free world: and

Whereas, Ever since its founding in 1891 as a result of a printer strike which caused the folding of another Czechoslovak newspaper, the Denni Hlasatel, which presently operates out of Cicero, Illinois in the heart of the Czechoslovak community, has been a Chicago institution and a dependable source of information as well as a forum for discussion of issues important to the Czechoslovak community, and

Whereas, The original founders of the newspaper included Dr. Edwin Hare, Frank Sirovatka, Frank Stejskal and Vladimir Spatny Sr., whose relatives are still actively involved with the newspaper; and

Whereas, Although the Denni Hlasatel had a modest beginning, its circulation rose to over 100,000 during the period between the two World Wars and by the late 1960's could be proclaimed the largest foreign language daily newspaper in the United States; and

Whereas, Over the years its contributors and subscribers have included such noted citizens as Governor Otto Kerner, Chicago Mayor Anton Cermak, Cook County Treasurer John Toman, Cook County House of Corrections directors Edward Denemark, Dr. Andrew Toman and Congressman Adolf Sabath; and

Whereas, Besides fulfilling the function of presenting the news, the Denni Hlasatel has been a highly effective instrument for propagating the rich Czechoslovak heritage and culture as well as assisting in the struggle for freedom in the Communist-ruled Czechoslovakia; and

Whereas, Its reputation for excellence and outstanding service to the Czechoslovak community is being continued today by the dedication and energy of the Circulation Manager Frantisek Hrala, Assistant Circulation Manager Martin Podhrazsky, Advertising Manager Rose Kucera, Managing Editor Erich Jaksch, Expedition Manager Vladimir Lasky and the many dedicated members of the staff as well as the members of the board of director; therefore, be it

Resolved, by the House of Representatives of the Eighty-Second General Assembly of the State of Illinois, That we join the friends and supporters of the Denni Hlasatel in celebrating its 90th anniversary; that we congratulate all those who had a role in making this celebration a reality; that we commend the newspaper for 90 years of outstanding service to the Czechoslovak community as well as to the general public; and be it further

Resolved, That a suitable copy of this preamble and resolution be presented to Denni Hlasatel, with the best wishes of the people of Illinois and the members of the House.

Adopted by the House of Representatives on May 21, 1981.

GEORGE H. RYAN,

Speaker of the House.

Anthony J. Leone, Jr.,

Clerk of the House.

DEFICIT SPENDING STEALS MONEY FROM SMALL COMPANIES

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Friday. September 11, 1981

• Mr. DANNEMEYER. Mr. Speaker, the latest news reports indicate that the administration's official estimate of the fiscal year 1982 budget deficit may be significantly short of what the deficit is likely to be next year. Even if the administration is correct, the Federal Government will be forced to borrow \$42.5 billion in the Nation's credit markets. If interest rates are higher than presently assumed in the deficit forecast and if economic recovery is slower as a result, the deficit will exceed \$42.5 billion as Federal reve-

nues shrink below the target level and Federal spending increased in economic-sensitive categories. Economists are now not discounting the possibility of an onbudget deficit in the \$60 to \$70 billion range. All of this despite the cuts made through the reconciliation process.

As the debate on the budget deficit continues, let us not lose sight of the reasons for concern over budget deficits. Our preoccupation with the deficit itself, while justified, tends to obscure the real economic impact that the deficit has on the very people we are here to represent. The deficit is not just of interest as an accounting designation or an academic exercise. As the following article outlines, the deficit chokes off money for small businesses. Small business operations are important because they frequently contribute a disproportionately large percentage of new job opportunities and technological innovation. If a huge budget deficit, and the high interest rates which result from Federal borrowing to cover the deficit, choke off small businesses, then they also restrict jobs and productivity. Such a situation cannot be tolerated both for its impact on people directly and because of the adverse economic impact.

The article in question is entitled, "Deficit Spending Steals Money From Small Companies." It appeared in the August 1981 issue of INC. magazine and was written by Robert E. Berney, a professor at Washington State University. The policy prescription to the problem posed by Professor Berney, and a solution which he endorses in the article, is a balanced Federal budget. While I do not agree with every sentence in the article, I commend it to my colleagues for their consideration, at this point in the Record:

DEFICIT SPENDING STEALS MONEY FROM SMALL COMPANIES

Republicans have always paid lip service to the idea that federal budget deficits are inflationary. But what's this new tune the Reagan team is whistling? Deficits are okay, they say, just so long as the Federal Reserve keeps the money supply in check.

Really? Does this mean you can shuck your worries about a growing federal debt? Not if you're a small business owner, Even if the Reagan Administration achieves its basic economic objectives—slower monetary growth, lower spending, lower tax rates, and reduced regulation—an unbalanced federal budget will be bad news for small companies.

The federal deficit during this fiscal year is expected to approach \$55 billion. The deficits in fiscal years '82 and '83 will depend upon how much of the Reagan economic program Congress finally adopts, but the Administration itself has projected a \$45-billion shortfall next year. It could be higher. In any case, the Federal Reserve has just two options, and the first one is clearly inflationary.

The Fed could, as it has done in the past, monetize portions of the debt, which amounts to printing money. The Fed buys government securities held by banks, thus

increasing the banks' cash reserves. The banks use the reserves to create loans, leading to a multiple expansion of the country's money supply. All this would boost inflation, and interest rates would rise along with expectations of still more inflation. You could then expect the Fed to respond with a set of tight money policies similar to those imposed twice in the last two years. If you have any doubt about the effect of tight money to interest rates and on the small business sector, check the increases in bankruptcy filings that followed the Fed's moves in October 1979 and March 1980.

Of course the deficit doesn't have to be monetized. By not making offsetting debt purchases from banks, the Fed can force the government to compete for credit with private borrowers. Who do you think will come off best in that competition?

As conservative economists correctly reminded earlier Democratic administrations, the government will always crowd private borrowers out of a tight credit market. Big companies can still raise capital by issuing stock. Or they can tap the Eurodollar market, insurance companies, trust and pension funds, or commercial credit instruments. Small companies will still have to go to the bank, where interest rates will probably be setting new record highs and where adequate credit supplies probably will not be available at any price.

For small companies, therefore, there is but one basic difference between the two policies. Credit supplies will dry up more quickly if the Fed does not monetize the federal deficit. If it does, they'll still dry up, but not as soon. In either case, the economic effects of the Administration's supply-side policies will be swamped by the size of the federal budget deficit.

The problem could be avoided without dramatically altering Reagan's economic plan. Since cuts in the personal income tax rate are less effective in stimulating additional output than are accelerated depreciation or other business tax cuts, the first cuts in personal tax rates should be delayed at least until January 1982. Then the 30 percent reduction should be spread over five years instead of three. This gradual approach to cutting personal taxes would still generate the incentives to work harder and save more, but it would avoid the problems associated with large budget deficits. In addition, Congress would be under pressure to continue to reduce the size and spending burden of government.

How quickly and how thoroughly supplyside adjustments operate depends upon the competitiveness of the economy. The more dynamic the small business sector, the more dynamic the small business sector, the more rapidly innovations and productivity increases will spread throughout the economy. Small and rapidly growing businesses, however, benefit most from adequate supplies of capital and credit and a rapidly growing, noninflationary, free-market economy. That is why balancing the budget is still as important as reducing regulation, slowing monetary growth, cutting taxes that restrain entrepreneurial activity, and cutting the level of government expenditures.

Republicans should not be so eager to abandon their belief in the value of a balanced budget, now that they have the clout to balance one.

EFFECTS OF HIGH INTEREST RATES

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. SWIFT. Mr. Speaker, the loggers in the Northwest have not worked in months. High interest rates stole their jobs.

You see, where I come from timber still makes up a big part of the economy. So when interest rates soar, our people not only hurt in the homebuilding field and in real estate, but it backs up right through the lumber-yards to the mills and into the woods. We get a double and triple whammy.

But the viciousness of high interest rates does not stop with the wood products industry. Everyone is hurting. Savings and Loans, auto dealers, consumers, farmers, everyone.

But especially, the small businessman is being killed. There he sits, the forgotten giant of our economy. While Mr. Volcker of the Federal Reserve tells us we must bear a little pain, that small businessman is in agony. All of them are in difficult times, many are facing bankruptcy. Too many have lost that battle already.

Yet, the small businessman is the backbone of our free enterprise system. He provides more jobs than all of the big businesses combined. He provides our best opportunity for the economic growth our Nation needs. Yet is is being strangled by high inter-

est rates.

If interest rates of 20 percent were something totally out of our control, it would be easier to understand why nothing is done about them. But to a very major degree, interest rates are adjustable by the Federal Reserve. And after years of demonstrating clearly that such a high interest rate policy has not and will not reduce inflation—but, rather, adds to it—the Fed still persists in damaging our economy with that failed and misguided policy.

And where is the President? Awfully silent these days. But we can still hear the echo of his last statement—a ringing endorsement of this policy that seems to say we'll beat inflation by bankrupting America's housing industry, the wood products industry, the automobile industry—dealers and all—and by driving out of the marketplace thousands upon thousands of small businessmen all over America.

It is time for President Reagan to demonstrate his ability to change policy without blinking an eye and sit down with Chairman Volcker and talk as tough to him about high interest rates as he did with Robert Poli about wage increases for the air traffic controllers. The silence from the White House on this issue must end.

EXTENSIONS OF REMARKS

And the Congress cannot sit idly by either. The Federal Reserve Board is an independent agency. It was designed that way, in order to protect it from the whimsy of political influence. But that protection can also be used—abused, in fact—as a defense against commonsense policy being urged upon it by millions of Americans.

Congress can reduce that degree of independence. And if the Fed will not listen to reason we may have to do just that. One would hope we would not be irresponsible and go too far. But some-

thing has to happen.

I do not know where Mr. Volcker was during August. We know where the President was: Isolated on his ranch. Would that both of them had been with us—in our districts—talking to people who are sinking in the quagmire created by the policies of Volcker and enthusiastically supported by the White House. If they had met these people face to face, they might well see the light—and give the American people some relief from this awful, awful policy of slow economic death by suffocation from high interest rates.

DR. GOLDBERG'S REMARKS ON A KEY PROBLEM

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. SIMON. Mr. Speaker, this week the Subcommittee on Postsecondary Education which I chair, completed hearings on teacher preparation and retention. It is an issue of prime importance to the future of our Nation, but one which is rarely addressed beyond recent media headlines crying "Public Schools Are Flunking," and "Help! Teachers Cannot Teach."

A veterinarian receives twice the postsecondary schooling as a teacher, and is paid far more than twice as much on the average. My dog is treated by a more highly educated and more highly paid professional than the professionals who teach my children. In Florida, a barber must complete more specialized courses than a candidate for a teaching degree. Our best young people are not attracted to teaching-a profession that is poorly paid, highly stressful, often physically dangerous, and unstable in terms of career growth and retention. It is no wonder students choose to pursue fields of computer science, law, or veterinary medicine when they see the lack of reward and career drawbacks in teaching.

Dr. Milton Goldberg, Acting Director of the National Institute of Education, summed up the problem and possible direction of improving teacher skills and the attractiveness of the

profession of teaching. I am placing Dr. Goldberg's remarks made before the subcommittee in the Record, and commend my colleagues to examine a problem which can effect our Nation for generations to come.

Dr. Goldberg's statement follows:

STATEMENT OF MILTON GOLDBERG, ACTING DIRECTOR, NATIONAL INSTITUTE OF EDUCATION

Mr. Chairman, members of the subcommittee, I am Milton Goldberg, Acting Director of the National Institute of Education, and I appreciate the opportunity to participate in these important hearings on the status of teachers today, including their preparation and retention.

As a teacher and administrator in the public school system in Philadelphia for 25 years, I experience first-hand both the joys and frustrations of teaching, and it is a truism to state that on the shoulders of teachers rest both heavy burdens and great

opportunities.

Yet teachers, the first line in our effort to improve the quality of education in this society, are under attack now as never before. In June of last year, Time magazine's cover read "Help! Teacher Can't Teach." This April's Newsweek focused on teachers in its cover story, "Public Schools are Flunking." And in April, also, the Washington Post published a lengthy piece entitled "Faulty Teaching Fails Children."

It is perhaps, inevitable that the public has come to view the teaching profession and its membership with increasing skepticism and that the crisis of confidence in American education has been laid at the

teacher's door.

Concerns about test score decline, school discipline problems, and the lack of motivation in young people, are frequently attributed to teachers who are often derided as bureaucratic, tenured, union activists, unwilling to discard demonstrably weak practices in favor or promising new techniques.

But before we accept that picture, I think it wise to remind ourselves that each of us probably had the benefit of at least one exceptional teacher during our time in school, and that there are still many outstanding teachers going to extraordinary lengths to motivate classes, often in the face of nearly overwhelming difficulties and frustrations.

I want today to focus upon three con-

A portrait of the average teacher today, including the conditions under which they

Then I want to touch upon what we know about the quality of those now planning on entering the teaching profession as well as those leaving it:

Finally, I want to briefly mention proposals to improve both pre- and in-service teacher education.

THE TEACHER TODAY

Last year, the National Center for Educational Statistics estimated that there are 2,430,000 classroom teachers in our Nation's elementary and secondary schools, with slightly over 10 percent of that total in nonpublic institutions.

Contrary to the popular accounts, they are an extremely hard-working group: elementary school instructors average 44 hours each week, and secondary school teachers, 48 hours, in activities directly related to instruction, that is to say, teaching before a classroom, preparing lesson plans, and correcting homework. In addition, teachers are expected to help monitor lunchrooms,

attend teacher meetings, and lead activities such as chorus and the yearbook.

They are well prepared in terms of academic backgrounds. Sixty-two percent possess the bachelor's degree, and 34 percent the master's degree.

The average teacher today is 37 years old, has been teaching for eight years, and earns \$11,800 on average at the elementary level and \$12,196 at the secondary level for the 9-month school year, Not to put too fine a point on the issue: those are hardly generous salaries for individuals with 5 to 6 years of training beyond high school and 5 to 10 years experience.

Teachers today have a much different job than the one I undertook three decades ago when I stood in front of my first classroom.

I do not want to overstress the differences because the basic teaching function has not changed greatly in the last generation.

That is to say that schools today are organized much as they have always been: age-graded, self-contained classrooms, with individual teachers instructing groups of children. The textbook and the blackboard continue to be the primary technology of teaching, and instruction is still largely teacher-centered and teacher-dominated.

Nevertheless, the environment for teaching has changed in significant ways.

Declining enrollments undercut the job security once offered in the teaching profession. Last week's Washington Post carried a story of the insecurity local teachers experience as they receive annual notices that their contracts may not be renewed for the following year. One eight-year veteran of the Arlington County schools—by all indications, an extremely competent teacher recently elected president of the teacher's association—described the anxiety she experienced with the arrival of this notice each Spring, and stated that she was getting out of teaching.

Additional tasks have been added to both the curriculum and the miscellaneous activities expected of teachers. Not only are they expected to transmit the "traditional" curriculum which most of us encountered, but also to deal with new concerns such as metric education, environmental issues, drug and alcohol abuse, and other new problems in society. Moreover, these demands come on top of more severe requirements in terms of additional paperwork and increased assessment and evaluation of students.

Schools mirror society and the crisis of authority in our homes and communities has its counterpart in the schools. According to NIE's Safe Schools, Violent Schools, each month one out of four teachers is either threatened, assaulted, or robbed in the school. When I started teaching, the teacher's authority in the classroom, with few exceptions, was unquestioned. Today, it is openly questioned by students who regularly challenge, defy, or ignore it.

The school population has changed in ways that most of us would agree is for the better, in terms of increased diversity. Nevertheless, the traditional teaching force has been poorly trained to cope with changes such as those required by desegregation, mainstreaming of handicapped children, and the addition of new groups of children, and the addition of new groups of children, students who were earlier suspended or expelled—discipline problems, or pregnant teenagers—now assert their rights to continue to receive services from the public schools, and quite rightly, they are receiving

Mr. Chairman, I cite these statistics on what we know about the typical teachers, and the conditions under which they perform their task, not because there is anything startling or novel about this information. Most of us are vaguely aware of the changes in the condition of teaching, as well as the fact that teacher's salaries are not, on average, what they might be, and that there is a middle-aged bulge in the teaching profession.

I cite them because I have been asked to discuss the quality of those planning on entering teaching as well as those who are leaving it. On both sides of that equation there is some disquieting news: on average, those entering are not terribly promising, and those leaving it are amongst the best in the profession. But I want to suggest that the fault may lie not in the profession, but in the rewards available to those in it.

The salary averages I quoted at the outset are certainly not an incentive to enter teaching, much less stay in it.

The psychological satisfaction a teacher enjoyed as a respected member of the community, whose voice was unchallenged in the classroom, is simply a thing of the past.

Job prospects do not encourage young high school graduates to aspire to be teachers, and even established teachers worry each Spring about the prospects for the following year. It may be true that none of us can expect much in the way of job security these days. But I believe the point I am trying to make still possesses some merit: job security was once one of the advantages of teaching: it no longer is.

THE ASPIRING TEACHER

Mr. Chairman, the evidence of NIE has collected in the last year on the quality of those entering and planning to enter teaching is sobering. Put briefly, the academic ability of education majors is both low and declining, and teaching appears to be attracting the least academically able students.

To take, first, those high school graduates planning to major education as undergraduates:

Between 1972 and 1980, average verbal scores on the Scholastic Aptitude Test (SAT) among entering education majors, declined from 418 to 339; average SAT math scores fell from 449 to 418—both declines steeper than the average drop of 20 points in both verbal and math scores experienced overall by all majors;

Of 19 fields of study for entering college freshmen analyzed by the American College Testing Service (which provides a testing service similar to the SAT) education was tied for 17th place in math scores and 14th place in English scores;

A National Longitudinal Study sample of graduating high school seniors in the class to 1976 indicates that prospective education majors were 14th out of 16 fields of study in SAT verbal scores, and 15th out of 16 in mathematics.

The picture is equally bleak at the end of four undergraduate years;

Verbal and nonverbal scores on the Graduate Record Examination have declined significantly since 1970:

Scores on the Educational Testing Service's National Teacher Examination—an eight hour test of general knowledge, specific subject matter, and teaching techniques—declined between 1970 and 1975; and

In 1975, Graduate Record Examination results for education majors were lower than those of eight other professional fields compared.

Mr. Chairman, before I turn my attention to the evidence we have on the quality of those leaving teaching, I do want to make the point that a large part, if not all, of the decline in the quality of those high school seniors planning on entering teaching can be accounted for by distinguishing between male and female high school graduates.

Most of the decline is found among the young women planning on entering teaching. That does not mean that the SAT results of women, in general, have declined precipitously; what it does mean is that talented young women who used to plan on entering teaching are now turning increasingly to other fields in which opportunities have opened up to them in the past decade: law, medicine, business, and the sciences. To put it another way: academically-able young women who once contributed to raising the average scores of entering education majors are now entering other fields.

TEACHER DROPOUTS

The evidence we have available on the quality of those leaving teaching is very slim, but it does seem to indicate that the teaching profession is losing some of its most capable members.

We have available only one recent study examining the quality of those leaving teaching.

A recent study examined the attrition rates of all North Carolina teachers between 1973 and 1980. On average, the findings were the following: (1) only one-half of those who had started teaching 7 years before were still teaching in 1980; and (2) two-thirds of those in the bottom 10 percent of the NTE test were still teaching after 7 years, compared with only one-third of those in the top ten percent. With regard to the second finding, the results were remarkably consistent: regardless of race or sex, the higher the NTE score when the teacher began teaching, the less likely that teacher was to be in the classroom seven years later.

You might well ask where these classroom teachers are going. I suspect that many of term are following the traditional route of teachers out of the classroom, that is, they are going into administration at the school and school district level.

But in the last 15 to 20 years, new opportunities have also opened up for teachers: the transition to community college instruction is relatively easy for highly academically-trained secondary school teachers, careers are available in administration of colleges and universities, research and development centers, and in service and sales occupations in the private sector.

In addition, the corporate world is attractive to teachers trained in mathematics and science and may in part account for the severe shortage of such teachers at the secondary school level.

OTHER ISSUES

Before suggesting some possible remedies for the problems I have been outlining, I do want to mention a few other teacher workforce issues that appear significant.

First, although there is a general oversupply of teachers, that is not true in all areas and all fields.

Communities in the West and Southwest witnessing burgeoning growth as a result of oil and energy development, are experiencing serious teacher shortages in all subjects.

Second, school districts find certain teachers almost impossible to hire: mathematicians, scientists, bilingual teachers, and experts in certain areas of special education.

Third, today's oversupply may well turn to a shortage in ten years as the result of a decline in the past decade in the number of students completing teacher education programs; over the last ten years the numbers of education majors completing college has fallen by 50 percent.

Fourth, because fewer new teachers are being trained, and even fewer are able to find jobs, our teaching force is aging, with the result that it is more expensive since teachers are tenured and at the top of the

salary scale.

Finally, I want to point out that those districts most in need of excellent teachers are having the hardest time finding them. Urban areas, with the highest concentrations of low income, disadvantaged youngsters, find that teachers are transferring out of their schools, because suburban schools are able to offer better salaries and working conditions.

NEW DIRECTIONS

Mr. Chairman, it seems to me that there are two issues in this entire situation of concern to the teaching profession and those interested in improving it. The first has to do with the preparation and training of teachers in their undergraduate and graduate programs-what professionals in this field call pre-service training. The second has to do with the continuous upgrading and renewal of the skills of the 2.4 million

teachers already in the classroom.

With regard to pre-service training, the issues involved here, including the qualifications of those entering schools of education, the quality of the training provided to them, and their certification as competent to teach in the classroom, are almost entirely issues in the hands of the institutions themselves, or of state and local educational agencies and national accrediting bodies.

State leaders, deans of colleges of education, and professionals concerned with the quality of teacher preparation, have suggested a number of ways to which teacher education and credentialing might be improved ranging from requiring successful passage of entry-level qualifying examinations, to completing a one-year internship for the new teacher, similar to the training a physician receives, in effect, adding an additional year to the aspiring teacher's training. Entry level examinations involve testing either before students receive their degree, or before they are hired. Two types of tests are frequently suggested: (1) tests of basic subject matter competence; e.g., mathematics; (2) tests of skill in teaching. At least 15 states now require some form of teacher competency testing and six of those require the National Teachers Examination.

With respect to such tests, it does not seem to me unreasonable to expect new teachers to demonstrate mastery of the subject-matter they are expected to teach. In the past two years, two widely reported examinations of teachers in Texas caused

great public concern.

Half of a sample of first-year teachers in Dallas failed a test of verbal ability, and half of Houston's teacher applicants scored lower than the average high school junior in mathematics.

I am not, however, convinced that we know what skills to look for in a prospective teacher, much less how to test for them.

Perhaps one of the most promising developments in pre-service education today is teacher education institutions and schools both realize that they must do a better job in training teachers, We are, therefore, seeing more and more instances

of school districts and schools of education cooperatively planning undergraduate courses of study including practical experience in classrooms, so that beginning teachers can be better prepared for the day-today problems they will experience as they begin their careers.

Turning to the nearly two and one-half million teachers already in our classrooms, there is a great deal that can be done with

in-service education.

I am well aware that many teachers look upon in-service programs with ill-disguised contempt. Such programs have been, frequently, served up with little sensitivity to what teachers needed, or to the real problems and issues facing them in their schools and classrooms.

Nevertheless, new possibilities for staff development have recently been opened up by a body of research published in the last year or two, and I want to take just a moment to

explain its significance.

The research has been supported at NIE on the two general questions of "what makes an effective school?" and "what constitutes effective teaching?" The results of these two lines of inquiry run along similar lines and I want to concentrate on the characteristics of effective teaching. To summarize these findings, which may appear annoyingly self-evident, they are the follow-

Keep the students enagaged in academic

tasks;
Use highly structured questions in order to elicit a relatively high rate of correct answers from students;

Provide immediate, academically oriented feedback to students, encouraging correct answers and exploring incorrect ones

Accurately diagnose student skill levels, monitor student performance with frequent assessments, and individualize these assessments:

Expect that students will do well and let them know of those expectations

I want to take just the first of those characteristics-keep the students engaged in academic tasks-because as obvious as it appears, we don't seem to be doing it very well in our schools.

We have been supporting a major multivear study in California for the California Teacher Licensing Commission which began as an effort to identify desirable teacher characteristics so that the Commission, at whose request the study began, could look for those characteristics in new teachers.

It quickly became apparent that teacher behaviors in the classroom varied so widely that the search for desirable characteristics should be abandoned in favor of simply trying to describe what the typical teacher actually does.

A finding emerged which so surprises most teachers that they initially refuse to believe it: it is possible for one student to receive five times as much instruction as another in topics such as reading comprehension even though both are in the same school, at the same grade level, and supposedly, following the same curriculum.

How does this come about? First, only about 50 to 60 percent of the limited time available in a school day is devoted to academic subjects, reading, social studies, mathematics and science. The rest, in elementary schools, is devoted to music and art, storytelling, and sharing, along with lunch, recess, classroom changes and so on.

Of the time available for academic subjects, individual teachers vary enormously in the amount of that time actually engaged in academic work. Taking roll, moving from one activity in the same class to another, getting out books, preventing students from talking and day dreaming-all of these things eat into the few minutes available to the teacher. Good teachers keep students engaged; the less successful teachers are busy coping with disruptions.

This study found that some 5th grade students receive, over the course of an academic year, 5,000 minutes of instruction in reading comprehension, compared with other classes, supposedly following the same texts and curriculum, receiving less than 1,000.

The practical significance of this is that it is relatively straightfoward to provide training so that teachers actually devote more time in the classroom to academic work than they had previously.

We have now in hand four studies which compared the achievement of students in two kinds of classes: (1) classes with teachers who received training in how to increase academic learning time; and (2) classes with teachers who did not receive the training.

In all four, teachers with the training increased the amount of engaged learning time for their students and student achievement increased.

In another staff development exercise, the Austin, Texas school district, knowing of the results of this academic time on task research, verified that the California experience was also true in Austin. After overcoming widespread disbelief on the part of the faculty regarding the accuracy of the findings, the District mounted a district-wide program to help schools and teachers increase the amount of time actually allocated for learning as well as the amount of engaged learning time.

Both the enagaged learning time and student achievement increased. The Austin schools estimate they have added \$4 million worth of instructional time for Austin's Title I children without spending one additional dollar or lengthening the school day.

To conclude, Mr. Chairman, it seems to me clear that teachers are now facing a more difficult assignment than at any time before in the history of our schools. And I think we are properly concerned about the quality of those planning on entering the teaching force.

But I also believe that the most important issue facing us today with respect to the teaching force is the question of improving and maintaining the skills of the millions of men and women already in our schools

That may involve upgrading their skills in specific subjects such as science and mathematics which are changing rapidly.

It may also require specialized efforts to ensure that teachers are acquainted with new technologies which are likely to play a greater role in education in the years ahead. Quite evidently, they are destined to play a greater role in our society.

But I also like to think that organizations such as the National Institute of Education can play a significant role to encourage teachers to make the most of what they have in time and material for teaching.

For I am convinced that the time on task research, and the practical training activities which have been developed from it, have the potential to significantly increase the quality of education in our schools and ultimately the satisfaction teachers derive from their jobs as well as the respect they receive in the community.

I will be pleased to answer any questions you might have.

SAUDI ARMS PACKAGE MUST BE BLOCKED

HON. JONATHAN BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Friday, September 11, 1981

• Mr. BINGHAM. Mr. Speaker, I testified this afternoon before the Subcommittee on Foreign Operations of the House Appropriations Committee, chaired by the Honorable CLARENCE Long, in opposition to the proposed sale of \$8.5 billion in airplanes, radar, and equipment to Saudi Arabia. As this issue will be the center of controversy for the next 6 weeks, I thought other Members might be interested in my remarks:

STATEMENT BY THE HONORABLE JONATHAN BINGHAM

Mr. Chairman, thank you for this opportunity to testify before this subcommittee on the proposed sale of airborne and ground radar, fighter airplane equipment and tankers to Saudi Arabia. I compliment you on the speed with which you have arranged this hearing, underlining the urgency and seriousness of the issues involved in this \$8.5 billion sale of some of the free world's most sophisticated military equipment.

I share your opposition to this sale and am proud to have cosponsored your resolution of disapproval which demonstrated the strength of the opposition in Congress. only wish the administration had heeded this warning.

In this testimony, let me make just a few

brief points:

(1) The proposed sales constitute a major threat to Israel. The Israelis have time and again demonstrated their courage and their willingness to take on all comers in the Arab world in the face of overwhelming numerical odds. So when the Israeli defense experts say that the F-15s beefed up with additional fuel capacity and improved Sidewinder missiles and the five super-sophisticated AWACS planes would constitute a major threat to their security we ought to pay attention to them. Given the Saudis implacable hostility to Israel, their commitment of forces on the Arab side in 3 of the last 4 wars against Israel, and their active opposition to the peace process begun between Israel and Egypt, the alarms being sounded in Jerusalem over this sale are understandable. Israel is clearly and indubitably our closest and most precious ally in the Middle East, and we ought not to countenance a grave threat to its security without overwhelming reasons to the contrary. Are there such overwhelming reasons in this

(2) The military justification for the sales weak. The Administration has simply failed to make a convincing case that the beefed up F-15s and the AWACS planes are essential to Saudi Arabia's security from external threats. In the first place, it is never clear from the Administration's presentation just what kind of an external threat is being talked about. There are vague references to Iraq, Iran and South Yemen as potential attackers, but no discussion of the likelihood of such attack or the reality of any such danger. Underneath there always the implication that the Saudis need the new planes as a deterrent against Soviet aggression, but again there is no attempt to discuss the reality of the situation: the fact that the risk of global conflict operates as an infinitely more powerful deterrent to the Soviets than the addition of some capacity to the Royal Saudi Air Force, and the fact that there is no way the Saudi forces could be strengthened to the point where they could cope with a Soviet attack

The Administration's briefing book in support of the sales is full of weaknesses and contradictions. For example, the AWACS planes are said to be needed to protect oil installations along the Persian Gulf from air attack because conventional ground radars can't give enough warning time. No mention is made of the fact that the 62 F-15s we have already agreed to supply to the Royal Saudi Air Force will be equipped with superb "look-down" radars of their own with a range of 100 miles. And the administration's own briefing books claim only a 150 mile range for the AWACS against lowflying aircraft, which hardly seems to warrant an expenditure by the Saudis of \$5.8 billion for the AWACS radar. Again, the Administration dismisses Israel's fears by claiming the Saudis would be foolish to deploy the new planes against so superior a

lieve that they will be deployed against possible Soviet threats in the region. This kind be of logical inconsistency can found throughout the case being made for this sale. The command, control and communications capabilities of the AWACS are praised when discussing imagined threats from Iraq. Iran or Yemen but pooh-poohed

foe as Israel, yet they would also have us be-

when discussing Israel's concerns.

The real justification for these proposed sales is political: the Saudis insist. Saudi Arabia is important to us, for a number of reasons; there is no question about that. But does that mean that we have to say yes to whatever fancy modern weapons and facilities the Saudis decide they would like to have? What if they were to ask to buy a nuclear aircraft carrier, fully equipped with aircraft and accompanied by the necessary escort vessels, and made the purchase a matter of pride and a test of our friendship? Would we have to say yes?

To ask the question is to answer it. The United States has every right to interpose its own judgment as to the types of military sales to Saudi Arabia that make military sense and do not pose a serious threat to our

closest ally in the region.

(4) The proposed sale puts some of our most sophisticated aircraft and equipment at risk of Soviet acquisition. probably hope these sales go through, providing them with opportunities for getting their hands on our top of the line hardware and computer technology. After our disastrous experience with Iran, I don't see how anyone can be confident that the security of this sensitive equipment is assured. Saudi Arabia is a feudal monarchy lurching into the 20th Century and undergoing tremendous economic, social and political strains. Its economy depends on huge numbers of foreign laborers, including tens of thouof Palestinians, whose lovalties cannot be assumed to mirror the pro-western views of the royal family. The stability of this sprawling sheikdom is an open question, and the tens of billions being spent on military bases and hardware will not help in the short or long run.

is wishful thinking to suppose that arms sales of this magnitude and sophistication will serve to moderate Saudi Arabia's policies or ensure her security and stability.

(5) The Congress is duty-bound to exercise its own judgment in this matter and not simply rubber-stamp the President's decision. Recently in the Washington Post the distinguished former counsel to the President, Lloyd N. Cutler argued that the whole procedure of Congressional vetoes is improper, and that, particularly in a case such as the AWACS sale, the Congress should not undertake to overrule a Presidential decision

While I have the greatest respect for Mr. Cutler, I would suggest that his point of view reflects his recent service as a close adviser to a President.

In effect what Mr. Cutler is saying is that the President's decisions in the field of foreign policy should be automatically supported by the Congress. Not many Members of Congress would agree with that. Every argument Mr. Cutler makes for letting the President have his way could be made with equal validity for ratification of every negotiated treaty or for providing the funds to support a program of military or economic assistance that a President has agreed to.

A little background as to the present Congressional veto procedure may be in order. In 1973 a number of us in the Congress became concerned that the control the Congress had been able to exercise over military assistance programs through the authorization and appropriation process was being eroded by President Nixon through increasing use of the FMS, or foreign military Accordingly, Senator procedure. Nelson proposed in the Senate and I proposed in the House an amendment to the Arms Export Control Act, which would give the Congress a degree of control over large and significant military sales. The amendment was adopted as Sec. 32B and the amended Act was signed into law by the President on December 30, 1974.

As a result of this procedure being in place, Executive Branch consultation with the Congress on proposed arms sales has been much closer than would otherwise have been the case and the character of some sales, notably the sale of advanced Hawk missiles to Jordan in 1975, was modified to meet strong Congressional objec-

In the case before us, the Administration, in the face of known widespread opposition to the AWACS sale, as well as to the additions to the F-15s, the Administration has stubbornly gone ahead.

If the 32B procedure is to have any meaning and if Congress is not to be simply a rubber stamp for the President in matters of this kind, members of the Congress must vote as they believe the national interest demands.

The Administration's attitude may be summed up in the phrase "Poppa knows best"—and Mr. Cuter appears to support that point of view, regardless of who the President is, and perhaps that is natural for one who has served in the White House.

What is more surprising, for a person of Lloyd Cutler's sophistication and discernment, is his effort to dismiss the AWACS deal as the sale of just "five aircraft", as if it were a routine matter. Obviously, these are not run-of-the-mill aircraft. For their significance to the military equation in the Middle East, I submit we have to listen to the Israeli defense experts who insist that the proposed sales pose a grave danger to Israel's security. True, the Saudis insist the aircraft are not intended to be used against Israel, but in the world of the military it is not intentions, but capability that counts.

HIGH INTEREST RATES

HON, ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1981

• Mr. DYSON. Mr. Speaker, high interest rates are crippling the U.S. economy. News reports are constantly pointing to the difficulties encountered by all segments of the population due to the pressures of interest rates. In the first three quarters of 1981 over 10,000 businesses have failed and closed their doors—a 41-percent increase over 1980 figures. Housing starts are far below normal. Estimates of new home construction are expected to reach only 1.1 million this year.

Deficit spending is a major cause of inflation. Government borrowing is a major cause of high interest rates. In Maryland, those interest rates, reflected in above average mortgage rates, are crippling housing markets. The dreams of the First District's future homeowners have been shattered because interest rates have eliminated that possibility.

Mr. Speaker, I am an ardent advocate of a balanced budget. I also am very aware of the necessity of the tax cut we enacted in late July. Even so, with interest rates remaining at their current level, businesses in the First District are suffering severely.

This past week the Coastal Board of Realtors sponsored Interest Rate Crisis Week. During this week I have received hundreds of letters and telephone calls requesting that immediate action be taken to ease interest rates. The First District is very conscious of damage being done by high interest

In closing, I would like to submit a letter from Mr. R. Hursey Porter, Jr., president of the Maryland Association of Realtors, Inc., and a factsheet on the value of the all-savers certificate to the housing markets.

MARYLAND ASSOCIATION OF REALTORS, INC., September 9, 1981.

Hon. Roy Dyson, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN DYSON: In order to bring down mortgage interest rates it is crucial that you adhere to the commitment of your First Concurrent Budget Resolution to hold 1982 budget spending to no more than \$695 billion and a deficit of no more than \$38 billion.

We urge you to take appropriate action in the coming weeks as the Congress completes its actions on the Second Concurrent Budget Resolution and the major appropriations bills.

We are also concerned with the actions of the Federal Reserved Board in tightening the money supply excessively. We urge you to encourage the Fed to ease the overly re-

EXTENSIONS OF REMARKS

strictive actions which are crippling the interest-sensitive housing market.

Respectfully,

R. HURSEY PORTER, Jr., President.

NATIONAL ASSOCIATION OF REALTORS

On August 13, 1981, President Ronald Reagan signed into law the tax bill.

It has many provisions which affect the real estate industry but in the short term one component stands out as having the widest effects and that is the All Savers Certificate.

On October 1, 1981, savings and loans, mutual savings banks, credit unions and various other depository institutions will be authorized to issue the certificates, referred to by some as the tax exempt savers certificate.

The one-year certificate can be sold between October 1 this year and December 31, 1982. Purchasers will be able to exclude up to \$1,000 in interest on an individual's tax return, and \$2,000 on a joint return.

Interest rates would be up to 70 percent of the yield rate on the latest auction of 52week Treasury Bills (at recent rates a certificate could bear 10 to 11 percent interest).

When Congress gave its approval to the All Savers proposal, it specifically required that 75 percent of the net proceeds of the deposited funds would go for residential mortgages and agricultural loans.

During the first full year of the certificate's use it is anticipated that gross flows could be \$170 billion, but some of these funds would be transfers from other accounts within the depository institutions. However, net new inflow could exceed \$35 billion, about one-third of new mortgage funds needed in 1982.

Fact—Housing has borne the brunt of poor federal fiscal and economic policy: high deficit spending and excessively slow money growth.

Fact—Residential housing has declined both in new production and total sales to a point where the shelter needs of new families is in jeopardy. Shortages are already evident which will cause housing inflation in the future.

Fact—Existing single-family home sales have declined 47 percent in two years, making it the largest and longest drop in our lifetime.

Fact—Mortgage interest rates are currently 16 to 17 percent, creating an affordability problem for million of Americans making it impossible for most people to be eligible for their first home and making it unattractive for current homeowners to leave the lower interest of their currently inadequate home.

Fact—Savings outflows at all thrifts and mutual savings banks surpassed deposits by \$11 billion in the last six months.

Fact—The Congress has cleared the way for depository institutions to help themselves, to assist savers and to make more affordable mortgage funds available.

Fact—There is a 15-month period for issuing these certificates and any attempts to extend the certificates will be measured by our industry on the strength of its use in the manner mandated by the Congress.

It is essential that local depository insitutions make available these certificates of deposit and do so promptly. Congress intends that 75 percent of the net proceeds from the certificates be earmarked for residential mortgages and agricultural loans.

It is imperative that they active by market the certificates, make available additional mortgage funds and fully take advantage of

the lower cost money by offering the mortgage funds at reduced rates.

Savings and loans and other depository institutions issuing the certificates will be obtaining funds at a cost to them which will enable issuance of mortgage loans 2 to 3 percentage points below current market levels, and still improve their profitability.

Government officials actions needed are:
(1) The Federal Home Loan Bank Board must take swift action to implement the full authority of the bill in the spirit in which it was passed by the Congress and approved by the President.

(2) The Federal Reserve Board, the Comptroller of the Currency and the National Credit Union administration should likewise act to assure prompt and full utilization of the authority.

(3) All key public officials should identify the importance of the utilization of the certificates to help both the troubled savings and housing industries and as a way to save with safety at an attractive yield. This should include the President, Governors, Mayor and county officials.

THE UNITED STATES OLYMPIC DEVELOPMENT FUND CHECK-OFF ACT

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1981

• Mr. FIELDS. Mr. Speaker, it is with great pleasure that I introduce the United States Olympic Development Fund Checkoff Act of 1981.

As the 1984 Olympics approach, the U.S. Olympic Committee has found it increasingly difficult to raise the necessary funds to train American athletes.

In a recent letter, the executive director of the U.S. Olympic Committee, F. Don Miller, wrote that:

As a result of our nonparticipation in the 1980 Olympic games in Moscow, public contributions were severely curtailed, leaving us with a deficit of nearly \$1.5 million. This, coupled with the increased budgetary requirements necessary to field what we know will be the best Olympic team in our history for the 1984 games in Los Angeles, requires that every effort must be made to seek new sources of income.

While several of our colleagues have suggested the minting and selling of, special commemorative coins, I believe a more direct and efficient approach would be to allow taxpayers to check off, on their yearly tax form, a \$1 or \$2 contribution to the U.S. Olympic Committee.

By giving taxpayers this opportunity, the U.S. Olympic Committee would receive vital financial support to supplement its traditional sources of income.

At the same time, the cost to the Federal Government would be minimal. For, according to the Treasury Department, the current checkoff system for Presidential campaigns has resulted in an increase in neither the

Department's processing time nor administrative costs.

What has resulted, however, is over 25 million taxpayers, in 1979 alone, choosing to contribute a total of \$38.8 million to the Presidential campaign fund. In fact, since the checkoff program was initiated in 1972, \$246 million has been donated to the fund.

I would like to duplicate that kind of success for our Olympic Committee so American Olympic teams can make us all proud to be Americans.

Unfortunately, the financial burden has become too great on those individuals who finance our future Olympic stars. While as a nation we have learned to expect excellence from our Olympic athletes; the realities are that training, travel, and other expenses have become prohibitive.

For instance, such costs for a competitive swimmer may total \$3,000 a year. For an individual gymnast, these costs may run as high as \$10,000 annually, and a world class figure skater may require as much as \$15,000 to \$20,000 a year in order to train properly. Because of these ever-increasing costs, many potential Olympians are given three difficult choices: To undergo and make due with inferior, but more affordable, training; to spend their own and friends' and families' money for their training; or to watch the Olympics on television from their homes.

Clearly, if we desire to continue to excel in Olympic competition, we must give the American people this opportunity to contribute to the U.S. Olympic Committee through the use of this checkoff plan.

Mr. Speaker, as a child growing up in Texas, I remember vividly watching television coverage of past Olympics and feeling a deep sense of pride from those magic moments when our national anthem was played to commemorate achievements of our athletes.

Who can ever forget that memorable moment at Lake Placid when our underrated hockey team defeated the highly favored Soviet team, thereby reinstilling universal pride and patriotism among our people?

Mr. Speaker, I fear that these magic moments may be threatened in the future unless we get the American public actively involved in the Olympic program.

I believe one way we can do this is to give Americans an opportunity to give of themselves to these dedicated young men and women who represent us at the Olympics. This is indeed a painless way to demonstrate our support for their many long hours of lonely preparation for international competition.

I urge the adoption of this most important legislation.

Thank you, Mr. Speaker.

DEFENSE SPENDING

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, September 11, 1984

 Mr. STARK. Mr. Speaker, during our August recess an editorial appeared in the Oakland Tribune that I would like to share with my colleagues.

When President Reagan took office he began cutting the budget with a vengeance. He slashed funding, eliminated programs, and "reduced waste," all in the name of a balanced budget. We have yet to see that balanced budget, and now Mr. Reagan is being forced to consider cuts in an area that has, up until now, remained sacrosanct—the defense budget.

But thus far the President has approached his budget cutting with his eyes closed. No one has ever seen, or been able to piece together, a clear-cut plan. Programs were cut with no regard to their importance, or the impact their reductions might have. There was never a game plan.

And now we will be asked to cut the defense budget the same way—arbitrarily. The administration has not studied our needs, in war or in peacetime. We are going ahead with the production of a missile that we cannot even decide where to locate.

I am tired of being asked to back programs or budget cuts with no sense of the impact my actions may have. It is like removing a healthy organ with no regard as to its need or the impact its elimination may have.

Americans must be told where we are going, and why. It is fine for our symbol of justice to be blindfolded, but I would prefer our President was not.

Spending No Guarantee of Security (By Tom Wicker)

New York.—The Reagan administration's difficulty in deciding what to do about the MX missile is symptomatic of a larger problem—that a decision has been made to spend hundreds of billions of dollars in a vast military buildup without a comprehensive study of what the money is most needed for, and how best to meet those needs.

Close examination of the MX apparently suggests, even to this military-minded administration that its high cost will not buy much, if any, additional security. Similarly, unless all those other billions—a 7 percent increase in military spending in each of the next five years—are specifically targeted upon real needs, they may not add as much security as the dizzying numbers suggest.

Spending does not, in short, necessarily produce security. And before the administration gets too far into the former, it needs a clearer idea of what constitutes the latter. Here, for example, are some of the critical problems confronting Mr. Reagan and Secretary Weinberger, decisions on which will profoundly affect both spending and securi-

Whether to develop, modify or abandon the MX missile, or to blend it and Trident II into a "common" missile, and how to base and launch any new missile. At root, this is a question whether ANY new land-based missile is needed.

Whether a given decision on the missile question would require development of an anti-ballistic missile defense system and, if so, whether abrogating the ABM treaty with the Soviets and forcing them into an ABM program would add or subtract from national security.

national security.

How to proceed on modernizing the allied missile force in Europe in the face of growing political opposition there and European insistence on including the subject in a new round of arms control talks with the Soviet Union.

Whether overall arms control talks should wait on a specific level of military strength or be an intergral part of a continuing search for added security, through negotitation as well as arming.

When and if to deploy in Europe the neutron warhead just ordered into production. How does that decision affect the theater missile question? Is the neutron possibly to be used elsewhere?

What to do about a new manned bomber—the old B-1, the new Stealth, both, or something else? And what about "Big Bird," the proposed airbrone alternative to a landbased MX?

With money appropriated for nine Trident submarines, are more needed?

Note that these are primarily weapons questions, not touching on such matters as the volunteer force vs. conscription, or to what degree military spending decisions ought to be influenced by budgetary questions and the nation's economic health, or how military developments serve foreign policy objectives.

It's no reflection on the Reagan administration to suggest that such complex matters almost demand calm and judicious appraisal by relatively disinterested but authoritative persons, capable of seeing the whole problem as well as its individual parts. For that purpose, Reagan might well serve the nation's security and foreign policy interests and his own budget problems by appointing a bipartisan study commission, composed of former service chiefs, former secretaries of defense and perhaps others who command respect on military matters.

General Maxwell D. Taylor, formerly Army chief of staff and chairman of the joint chiefs, has proposed a similar study—not necessarly by a special commission—to determine (1) the principal dangers and threats that may require military force to deter or resist them, (2) armed forces tasks and missions arising from these threats, and (3) the force levels and weapons systems required by the agreed-upon tasks and missions.

This has never really been done, with the result that presidents could not be sure how much military strength was enough, and the armed services could seldom be sure what was required of them. Taylor pointed out, for instance, that the Pentagon is still scrambling to give military credibility to President Carter's political decision to defend the Persian Gulf region.

Participants like Taylor, former secretaries of Defense Clark Clifford and James Schlesinger, and other military and civilian figures of like stature would lend great credibility to such a study. Without specific service or administrative responsibilities,

EXTENSIONS OF REMARKS

they could approach it with impartial public spirit and provide Reagan, Weinberger and Congress with something like a "master plan" for national security.

offer experienced judgment and sound guidance; above all, such respected figures could approach the task more objectively and comprehensively than any administration, with its annual budgetary problems and political interests on the three courses. That plan would not necessarily have to be followed in every detail, but it would litical interests, or the three services, with

their built-in rivalries and biases. They might even save the taxpayers a lot of money, while adding to national security.

[Note. Tom Wicker writes for The New York Times.]

HOUSE OF REPRESENTATIVES-Monday, September 14, 1981

The House met at 12 o'clock noon.
The Chaplain, Rev. James David
Ford, D.D., offered the following
prayer:

O God Almighty, Creator of Heaven and Earth, may Your breath of life touch and stengthen all who turn to You for sustenance. May Your Spirit lift us when we fail, forgive us when we transgress, encourage us to do right, and accompany us through all the moments of good times and bad. Though we admit we too often turn away from Your truth and leading, You never turn from us. For this continued love and renewal that we experience each new day, we offer this our word of praise and thanksgiving. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 2120. An act to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes; and

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 859. An act to amend mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

HOUSE CONCURRENT RESOLU-TION 163, NATIONAL STRATE-GY OF PEACE THROUGH STRENGTH

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, I rise to speak in favor of House Concurrent Resolution 163 which asks the Congress to adopt a national strategy of peace through strength. This statement reminds the world of the U.S. resolve to live in genuine peace while preserving the integrity of the free world. Seven State legislatures have adopted this resolution, including my home State of Kansas.

Mr. Speaker, it is important for the United States as the leader of the free world to demonstrate a real willingness to oppose Soviet expansionism throughout the globe. Soviet leadership has continually flaunted international law in recent years with direct and indirect intervention in Afghanistan, the Horn of Africa, Indochina, Central America, and the Middle East. The Soviet military buildup, which has reached record proportions, threatens all free people militarily, politically, and economically. This activity must be halted.

I urge my colleagues to support House Concurrent Resolution 163.

INTEREST RATES

(Mr. McCURDY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCURDY. Mr. Speaker, yesterday, the interest rate on home loans issued by both the Farmers Home Administration and the Veterans' Administration rose to an incredible 17½ percent. That represents a 4-percent increase since the beginning of the year.

It also represents the final clamp on the housing industry in my district and surely, those of my colleagues. High interest rates have closed down the construction of new homes all across the country.

More importantly, the prospect of young people ever securing a home loan has become a distant dream much like the President's distant dream of 8.9-percent interest rates in 1982.

Those homebuilders and potential homebuyers were among the small businessmen, farmers, and Government employees I spoke with during a visit to my district last March. I asked each of them if they believed, like the President, that the prime interest rate would drop to 8.9 percent by early 1982.

Almost unanimously, they rejected such a forecast as too unbelievable.

I would like to suggest today that these hard-working Americans showed more economic savvy in the early days of this administration than the President's closest advisers. Perhaps Mr. Stockman would do well to walk a few Main Streets in Oklahoma.

REVOLUTION NEEDED IN DEFENSE THINKING

(Mr. GINGRICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGRICH. Mr. Speaker, we need a revolution in defense thinking even greater than the Reagan revolution in defense rhetoric and defense spending. The weekend decision to avoid internal defense budget cutting is an even bigger mistake than the earlier social security proposals. If President Reagan and Secretary Weinberger will not cut the defense budget decisively, then the Congress will have to do that job for them.

The current Pentagon proposals for defense budget cuts represent the same tired old game. We currently cannot win any major war with the Soviet Union on the Eurasian Continent. None of the current increases in defense spending change that reality.

Secretary Weinberger's plan, in fact, simply makes defeat slower and more expensive.

It is vital that we send a message from the House and from the other body that this Congress will demand a revolution in defense structure, defense planning, and defense thinking, as well as an increase in defense spending.

PERFORMANCE OF SECRETARY WATT

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, since the appointment of James Watt as Secretary of the Interior Department, it has become increasingly obvious that Mr. Watt does not plan to take what I like to call the "balanced approach" to resource management.

As president and chief legal officer for the Mountain States Legal Foundation, Mr. Watt established a reputation as a spokesman for development interests and his firm intervened in a number of cases involving leasing and exploitation of wilderness areas.

Mr. Watt has moved quickly to dispel hopes for moderation at Interior. He has stated that he intends to allow oil and gas production in wildlife

[☐] This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

[•] This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

refuges and wilderness areas; he opposes the acquisition of additional parklands; and he has opened offshore areas to oil and gas leasing that the previous administration had wisely excluded, including tracts off the coast of California.

Mr. Watt's apparent disregard for the interests of future generations is not compatible with the long-time U.S. policy of effective land management. I urge President Reagan to curtail Mr. Watt's environmentally wasteful habits and balance America's resource budget.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. McCurdy). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on the motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall vote, if postponed, will be taken on Tuesday, September 15, 1981.

AUTHORIZING A BUST OR STATUE OF MARTIN LUTHER KING, JR., TO BE PLACED IN THE CAPITOL

Mr. HAWKINS. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 153) authorizing a bust or statue of Dr. Martin Luther King, Jr., to be placed in the Capitol.

The Clerk read as follows:

H. CON. RES. 153

Resolved by the House of Representatives (the Senate concurring), That the Joint Committee on the Library is authorized and directed to procure a bust or statue of Dr. Martin Luther King, Jr., and to cause such sculpture to be placed in a suitable location in the Capitol as determined by the Joint Committee on the Library.

SEC. 2. Expenses incurred by the Joint Committee on the Library in carrying out this concurrent resolution, which shall not exceed \$25,000, shall be paid out of the contingent fund of the House on vouchers approved by the chairman of the joint committee.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. Hawkins) will be recognized for 20 minutes, and the gentleman from Georgia (Mr. Gingrich) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 153 authorizes a bust or statue of Dr. Martin Luther King, Jr., to be placed in the U.S. Capitol Building.

As many of you know, the proposal for a memorial honoring Dr. King is not a new one. Congressman Jonathan Bingham first introduced legislation in the 92d Congress with 61 cosponsors and has reintroduced the bill in each successive Congress, with increasing numbers of cosponsors each time. House Concurrent Resolution 153, reintroduced in the 97th Congress, has 144 sponsors.

The legislation was passed by both the House and Senate during the 94th Congress, but because Senate passage was immediately prior to adjournment, the House was unable to consider the resolution as amended in the Senate. The resolution was passed again by the House in the 95th and 96th Congresses.

House Concurrent Resolution 153 would authorize the Joint Committee on the Library to procure a bust or statue of Dr. Martin Luther King, Jr. The statuary will be placed in the U.S. Capitol in a suitable location as determined by the joint committee, in consultation with the Architect of the Capitol. The final format of the artistic design will necessarily influence the site for such a memorial in the Capitol. The expenses in carrying out the resolution shall not exceed \$25,000, a modest sum, which will be paid out of the contingent fund of the House.

It is indeed fitting to honor Dr. Martin Luther King, Jr., in this manner, as well to honor the varied and rich contributions by black citizens to our Nation's history and heritage. At this time, no work of art displayed in the Capitol memorializes a black American.

This bill has wide, bipartisan support. It has the support of all the Members of the Congressional Black Caucus. It has passed the House of Representatives in the three preceding Congresses. I strongly urge passage of this legislation.

Mr. BINGHAM. Mr. Speaker, will

the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from New York (Mr. Bingham), who I think has been perhaps the most outstanding individual in the House in behalf of this legislation. I wish to commend him on the great contribution that he has made and the very persistent support which he has given in providing the leadership in this issue.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I thank the distinguished chairman for violding

Mr. Speaker, the resolution before us, House Concurrent Resolution 153, authorizes the placement of a bust or statue of Dr. Martin Luther King, Jr., in the Capitol Building at a cost not to exceed \$25,000.

I would like to express my appreciation to the gentleman from California (Mr. Hawkins), chairman of the Committee on House Administration, and to the members of the committee for bringing this resolution before us today.

House Concurrent Resolution 153, which I introduced on June 23, 1981, and which I first introduced in 1972, has a total of 144 cosponsors, including Members of both political parties and all the members of the Congressional Black Caucus. A list of their names follows this statement.

It is altogether fitting that we so honor Dr. King. He was a man who might have lived out a worthwhile but obscure life as a minister. Instead, he was beckoned by the challenge to win equality for all the people in this country.

On December 1, 1955, Mrs. Rosa Parks, a seamstress with tired feet, was arrested in Montgomery, Ala., for refusing to give up her seat on a local bus to a white man. Her arrest triggered the first great civil rights test of power, and launched Dr. King's quest for equality. Dr. King, then an unknown minister in Alabama, led the Montgomery black community that year. Mrs. Parks' arrest ended 382 days later with the capitulation of the Montgomery busline to the doctrine of racial equality. Dr. King had begun his march.

In the years that followed, Dr. King's influence grew. He set out to correct specific injustices, but also to educate our country and win the hearts and minds of our people. His marches awakened our country and aroused our sympathy.

Who will ever forget that horrible spectacle in 1963 when Dr. King and his marchers, dressed in their Sunday clothes, met fire hoses, truncheons, and police dogs in Birmingham. A few months later, in his famous "I Have A Dream" speech, Dr. King addressed thousands of people gathered at the Lincoln Memorial, and said:

When we let freedom ring, we will speed the day when all God's children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing the words of the old Negro spiritual: "Free at last/Free at last/Thank God Almighty, we're free at last."

In 1964 Dr. King became the 14th American and the youngest person ever to win the Nobel Peace Prize.

A firm believer in Christian ideals and Gandhi's principle of peaceful nonviolent protest, Dr. King set out to fulfill a dream to give life to this country's highest ideals. He spoke of "getting to the mountaintop" and "reaching the Promised Land". He was indeed one of the truly great figures of our American history.

But there are other reasons why this memorial should be authorized for placement in the U.S. Capitol Build-

Of all the black Americans who have contributed to our country's greatness, not one is featured among the 681 works of art in the Halls of the Capitol. Is it any wonder that, in the absence of any such recognition, so few black families are to be seen among the millions of tourists who flock to our Capitol Building each year? Is it not distressing that a nation, striving to set right the wrongs of the past, has blotted out, here at the very seat of government, any recognition of the role of black people in building this great country?

This memorial to Dr. King would present a perfect opportunity to begin to correct this injustice. This civil rights leader deserves to receive this official recognition and appreciation.

Although Dr. King's violent death is a tragic blot on our recent history, his life is a shining example for us all. He had the courage of his convictions, and for over a decade his hopes and his dreams guided the Nation in the struggle for equal justice, equal opportunity, and basic rights. He carried that struggle as far as any man or woman in this century.

A permanent memorial to Dr. King in the U.S. Capitol Building would remind America and the rest of the world, over the years to come, of the inspiring leadership of this great man.

I want to say for the record that this resolution is in no way a substitute for H.R. 800, introduced by the gentleman from Michigan (Mr. Conyers) which would designate January 15, the birthday of Dr. King, as a national holiday. I strongly support Mr. Conyers' bill and I urge my colleagues to do so. Certainly the accomplishments and contributions of Dr. King are worthy of commemoration by the passage of both pieces of legislation.

I appreciate the action of the Speaker in placing this resolution on the suspension calendar. This will be the fourth time that the House has passed such a resolution. A similar version was passed by the Senate in the 94th Congress. but Congress recessed before the differences (only minor ones) could be resolved in conference. While it was not considered by the full Senate in the last Congress, the Senate Committee on Rules did report it favorably.

In the past there has been some question as to whether or not there are certain restrictions on the erection of memorials on the Senate side after the death of the subject. The memorandum from the Congressional Research Service (CRS) included here should clear up this matter once and for all. As will be seen, there are no restrictions which would preclude the erection of such a memorial to Dr. King.

The list of cosponsors of House Concurrent Resolution 153, and the CRS memorandum, follow:

COSPONSORS OF MARTIN LUTHER KING STATUE RESOLUTION

Mr. Addabbo, Mr. Akaka, Mr. Barnes, Mr. Bedell, Mr. Beilenson, Mr. Benjamin, Mrs. Boggs, Mr. Boland, Mr. Bolling, Mr. Bonior, Mrs. Bouquard, Mr. Brodhead, Mr. Brown of Ohio, Mr. Brown of California, Mr. Phil Burton. Mrs. Chisholm, Mr. Clay. Coelho.

Mrs. Collins of Illinois, Mr. Conte, Mr. Conyers, Mr. Corrada, Mr. Cotter, Mr. Courter, Mr. James Coyne of Pennsylvania, Mr. Crockett, Mr. Daub, Mr. Dellums, Mr. de Lugo, Mr. DeNardis, Mr. Derwinski, Mr. Dixon, Mr. Downey, Mr. Duncan, Mr. Dwyer, Mr. Dymally.

Mr. Edgar, Mr. Edwards of California, Mr. Ertel, Mr. Fascell, Mr. Fauntroy, Mr. Fazio, Mrs. Fenwick, Mr. Findley, Mr. Fish, Mr. Ford of Tennessee, Mr. Forsythe, Mr. Fowler, Mr. Frank, Mr. Frenzel, Mr. Frost, Mr. Gejdenson, Mr. Gibbons, Mr. Gilman.

Mr. Gingrich, Mr. Ginn, Mr. Gore, Mr. Gradison, Mr. Gray, Mr. Green, Mr. Guarini, Mr. Hall of Ohio, Mr. Hawkins, Mrs. Holt, Mr. Howard, Mr. Hughes, Mr. Jacobs, Mr. Kastenmeier, Mr. Kemp, Mr. Kildee,

Mr. Kastenmeier, Mr. Kemp, Mr. Kildee, Mr. Kogovsek, Mr. LaFalce. Mr. Lederer, Mr. Leland, Mr. Long of Maryland, Mr. Lowry of Washington, Mr. Luken, Mr. Markey, Mr. Marks, Mr. Mattox, Mr. Mavroules, Mr. Mazzoli, Mr. McCloskey, Mr. McHugh, Mr. McKinney, Ms. Mikulski, Miller of California, Mr. Mineta, Mr. Mitchell of Maryland, Mr. Moffett.

Mr. Mollohan, Mr. Neal, Mr. Nowak, Mr. Oberstar, Mr. O'Brien, Mr. Ottinger, Mr. Panetta, Mr. Patterson, Mr. Pepper, Mr. Peyser, Mr. Price, Mr. Pritchard, Mr. Rahall, Mr. Rangel, Mr. Ratchford, Mr. Reuss, Mr. Richmond, Mr. Rodino.

CONGRESSIONAL RESEARCH SERVICE Washington, D.C., July 16, 1981. To: House Administration Committee. Attn:

Ms. Cindy Szady. From: American Law Division.

Subject: Time limitations on the raising of memorials to private citizens in the Cap-

Reference is made to your request for information about a possible 21 year limitation on the erection of memorials in the Capitol after the death of the subject.

There is no limitation on the House side nor in statuary hall.

There is no statutory limitation.

There is no Senate Rule adopted by the Senate as a whole containing a limitation.

The Senate Commission on Arts and Antiquities, created by Senate Resolution in 1968, has adopted a policy that no permanent memorial acquired by the Commission (i.e., marble, bronze, oil painting etc.) will be erected in the Senate wing of the Capitol former Senator unless twenty-one years have elapsed since the service of the Member or as respects distinguished nonmembers, unless twenty-one years have elapsed since the death or retirement of such persons. There is an exception for Vice-Presidents. This policy applies only to acquisitions by the Commission. It does not apply to memorials authorized by joint action of both Houses.

Concurrent resolutions authorizing the erection of memorials to persons such as the Reverend Martin Luther King can be considered in both Houses and, as noted, in such instances there is no time limitation that must be observed before the authorization is enacted. In the 94th Congress, the House passed H. Con. Res. 96, authorizing the erection of a bust of the Reverend King, on January 20, 1976. The resolution was referred to the Senate Committee on Rules and Administration which reported it out favorably without amendment on September 29, 1976 (S. Rept. 96-1370). The resolution was, however, amended on the floor of the Senate by the adoption of a provision authorizing the Senate Commission on Arts and Antiquities to provide for a sculpture of former Senator Carl Hayden, of Arizona who retired on January 2, 1969, to be placed in the Senate wing or in a Senate office building (the sculpture of the Reverend King would have been placed in the House wing). No action occurred thereafter on the resolution

In the 96th Congress, the House, on July 30, 1979, passed H. Con. Res. 80, authorizing a similar sculpture respecting the Reverend King. The resolution was referred to the Senate Rules and Administration Committee which reported it out, without amendment, on December 29, 1979 (S. Rept. 96-543). No action was taken on the resolution.

Incompletion of the legislative process in both of these instances was not due to any time limitation.

ROBERT L. TIENKEN. Senior Specialist in American Public Law

Mr. GINGRICH. Mr. Speaker, I yield 5 minutes to my good friend and colleague, the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK, Mr. Speaker, I just want the record to show that there is one Member here who opposes this legislation and will vote against it. I do not anticipate that my remarks this afternoon will have a great deal of effect on the final outcome. The last time we debated this measure, in 1979, only one Member-this Memberspoke in opposition. The vote was 408 to 11. Nevertheless, I think it is important for the record to show that support for this ill-advised resolution is not unanimous.

I am certain that some of the liberal interest groups and some of the civil rights groups will use the vote today as a test vote of some kind, as a civil rights vote. It is not. We are not debating civil rights here today. We are deciding whether or not to honor the late Martin Luther King, Jr., with a statue in the U.S. Capitol. I submit that M. L. King is not worthy of such an honor. I have studied his record as extensively as has any other Member of Congress and I can say without reservation that an affirmative vote on this measure is a mistake.

Most Government records on M. L. King have been sealed in the Archives by court order. If they are ever opened, and we are still around, I have no doubt that my colleagues will regret the vote they cast today. I am certain.

I would say to my colleagues that if they do nothing else, they study Dr. King's 1967 speech at the Riverside Church in New York City. It was one of the most vicious, ruthless, dishonest speeches in modern times. King, in that inflammatory speech, went so far as to accuse the United States of conducting a napalm war in Peru. Even the ultraliberal Washington Post chastised him in an editorial following those remarks. Proponents of this legislation cite a part of his record to justify a bust. I only suggest his whole record be considered. Let us wait until his sealed record is made public.

Mr. Speaker, in the past, supporters of this legislation have argued that it is needed because no black American is honored in Statuary Hall. Like those Members, I am dismayed that the Congress has not taken action to honor black American patriots in such a manner. But I am also dismayed that the House is voting today to bestow this high honor on a man who, in my opinion, was not a patriot. He was a man who repeatedly voiced anti-American sentiments. He was a man who repeatedly sought to divide this Nation with his inflammatory rhetoric during one of the most tumultuous periods in our history.

Mr. Speaker, I oppose this legislation and I urge my colleagues to defeat it.

□ 1215

Mr. GINGRICH. Mr. Speaker, I yield myself such time as I may consume

I think the central issue is not Martin Luther King, Jr. I think the central issue is the right of millions of Americans to have designated clearly beyond question the symbol they would like to have in the U.S. Capitol. For too long it has been possible for American schoolchildren who happen to be black to walk through a building in which they could see many white Americans honored, some Indians honored, even a Hawaiian chief honored, but despite black Americans who died in World War II, in Korea, in Vietnam and earlier wars, despite the commitment of black citizenry to make this a country in which freedom can stand, they have not been able to see anyone in this Capitol stand for them.

Whatever we may think in detail of Martin Luther King's excesses, and all leaders of great movements share in excess, all leaders have moments which in history look dubious, the reality is that for black Americans Martin Luther King, Jr., is unequivocally the symbolic spokesman, the moment in history, the representation

of the change from segregation to integration.

For any other figure to be imposed upon black Americans as the symbol white American decided to put in the Capitol would make a mockery of that symbol. Indeed, I suspect most black American leaders would say if the only choice we can have in the Capitol for black America is the white man's choice, let us have no statue at all.

Martin Luther King, Jr., is dead. Whatever excesses on occasion he may have engaged in are long gone. The reality is in my State of Georgia black Americans vote who did not, black Americans now eat in restaurants who could not, black Americans have jobs who were not eligible, and black American young people are educated in schools they could not get into. In many, many ways that would not be true had it not been for Martin Luther King, Jr. That in the end is why he, rather than any other figure, is the symbolic choice of the black community, and why, if we are to have any sense of integrity in putting any statues or bust in the Capitol to represent our commitment to the black community, it has to be their choice, and not ours.

Thank you, Mr. Speaker.

Mr. HAWKINS. Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. McDonald).

Mr. McDONALD. I thank the chairman for yielding me this time.

Mr. Speaker, I rise in opposition to House Concurrent Resolution 153, a resolution authorizing a statue of Martin Luther King, Jr., to be placed in the U.S. Capitol. At best, Martin Luther King's prior associations and activities are questionable. Until all information is available, passage of this measure could prove an embarrassment to this Congress and the American people.

Under court order in 1977, the FBI's surveillance records and tapes on Reverend King were sealed in the National Archives for 50 years or until the year 2027. The supporters of this resolution might want to ask themselves why this action was taken? Before acting prematurely, we should either request that the records be made available or delay consideration until the information is released. At this point in time we should not authorize putting a statue of Martin Luther King, Jr., in a place of honor in our Nation's Capitol until all the facts are before us.

Rev. Martin Luther King, Jr., who professed nonviolence, in fact was wedded to violence. He sought out violence; he courted and provoked violence against his followers and by his followers because he believed violence was necessary to the achievement of his ends. Reverend King said as much in an article he wrote for the Saturday Review of April 3, 1965.

In this article he wrote:

The goal of the demonstrations in Selma, as elsewhere, is to dramatize the existence of injustice and to bring about the presence of justice by methods of nonviolence.

He continued by writing that that goal can be achieved when four things occur:

- 1. Nonviolent demonstrators go into the streets to exercise their constitutional rights.
- 2. Racists resist them by unleashing violence against them.
- 3. Americans of conscience in the name of decency demand federal intervention and legislation.
- 4. The Administration, under mass pressure, initiates measures of immediate intervention and remedial legislation.

In other words, the demonstrations were a staged media event, a dramatization to attract the newspaper reporters and television cameramen and make a local event into a national issue. But the second necessary ingredient for Reverend King's scenario was violence.

In communities where ad hoc gangs of thugs did not appear to attack demonstrators, night marches were staged to lure out nightriders. And when all else failed to provoke violence, demonstrators led by Reverend King and his Southern Christian Leadership Conference deliberately violated the laws by holding marches and parades without permits, violating court injunction and provoking police officers. In some areas such as Birmingham and Selma, Reverend King was successful in provoking the violence he felt was necessary for him to win his goals.

During the Albany, Ga., protests in 1962, where the law enforcement authorities avoided confrontation despite provocations, King generated little publicity. When he was eventually arrested leading an illegal demonstration in July, Reverend King refused to pay the fine so that he could remain in jail as a so-called martyr. After a black man paid Reverend King's fine and he had to leave jail, he called the event having been "kicked out of jail."

In Birmingham, Reverend King welcomed truant students from high schools and even younger into the demonstrations although they were in great danger. Let us remember what he said after the murder of four young girls attending Sunday school in a bomb explosion and after two teenaged boys were shot to death during the riot that followed. In the Nation of March 9, 1964, Reverend King wrote:

The keys to victory in Birmingham were the refusal to be intimidated; the indomitable spirit of Negroes to endure; their willingness to fill the jails; their ability to love their children—and take them by the hand into battle; to leave on that battlefield six murdered Negro children, to suffer the grief, and resist demoralization and provocation to violence.

And so for Reverend King, "six murdered Negro children" were "keys to victory." In other words, martyrs helped him achieve his ends and he saw this, and he deliberately continued to court violence.

In his book, "Why We Can't Wait,"

Reverend King wrote:

Looking back, it is clear that the introduction of Birmingham's children into the campaign was one of the wisest moves we made.

But the New York Times editorially disagreed, stating that—

The presence of hundreds of children among the marchers made all these marches especially perilous adventures in brinksmanship.

It is also appropriate to question whether or not Rev. Martin L. King, Jr., really found racism repugnant in light of his support of discrimination in jobs and housing so long as the discrimination was in favor of blacks; in light of the formation in February 1966, in Chicago of what Reverend King called a common front with the violence-oriented, virulently racist Nation of Islam (NOI) or Black Muslims; and in light of the statements of some of Reverend King's closest aides such as Rev. James Bevel.

During the 1963 Birmingham disorders, Reverend Bevel told students:

We need an army of captains and sergeants and privates to fight the white man this summer. I want captains to march whole schools to jail after graduation.

While Reverend King did not advocate race hatred, he did not bar alliances with racists and he did not keep them from his personal staff.

In 1966 during the Chicago housing campaign, the association of Reverend King and his Southern Christian Leadership Conference with violence was even more open. With Reverend King's knowledge, his aide, Reverend Bevel, showed films of the violence during the Watts riots in Los Angeles to Chicago residents being recruited to participate in his equal housing campaign. Among those particularly singled out for contacts and for those film showings were the leaders and members of Chicago's notoriously violent criminal youth gangs.

Reverend King told newsmen that the film showings had been intended "to show the negative results of rioting" and to demonstrate that rioters who destroyed their own communities accomplished nothing. But that is not how the Chicago street gangs interpreted the films. Whenever the film showed a black rioter attacking a police officer, they cheered. And whenever law enforcement officers were shown, they hissed and booed. In fact, Reverend Bevel's film shows for youth gang members were nothing other than audiovisual seminars in mayhem.

One might have expected after the riot that Rev. Martin L. King, the noted advocate of nonviolence, would

have broken all contact between SCLC and the gangs; but that is not what happened. Instead Reverend King and SCLC executive director Rev. Andrew J. Young met with the gang leaders for several hours. The gang leaders pledged a truce and said they would "try nonviolence." The truce did not last till the end of that day. Five young men were shot and violence increased to include 2 deaths and 13 wounded so that a State curfew was imposed 2 weeks after the truce.

As one of Rev. Martin L. King, Jr.'s, critics, Dr. Joseph Harrison Jackson, then president of the National Baptist Convention, noted at the time:

There is a danger of using nonviolence in such a way that it will create violence.

One of these ways is to teach the young contempt for the law. Reverend King's "nonviolent civil disobedience" taught that any law an individual personally and subjectively disagrees with or feels is unjustly restrictive can be arbitrarily broken at will.

This is not the lesson we should teach young Americans, but it is the lesson we would teach them by making a hero of Rev. Martin L. King, Jr., and by placing a statue of him in our Nation's Capitol.

COMMUNIST MANIPULATION OF REVEREND KING AND HIS MOVEMENT

The Communist Party, U.S.A., has attempted to use virtually every real or imagined grievance of every segment of American society—the young, the old, women, American Indians, blacks, Latinos, and European ethnic groups—to develop and exacerbate divisions among us. The Communists made the most of the opportunity to stir up race hatred provided by the civil rights movement, and the man around whom the Moscow-line Communists collected was Rev. Martin L. King.

The whole range of Communist Party members, sympathizers, and front groups were mobilized to aid Reverend King's campaigns.

Some of the support was via the former Highlander Folk School, now the Highlander Research and Education Center. In sworn testimony before the Senate Internal Security Subcommittee in 1954, Paul Crouch, a former CPUSA official and organizer described Highlander as being run "ostensibly as an independent labor school, but actually working in close cooperation with the Communist Party." Prominent among Highlander's supporters was the old International Union of Mine, Mill & Smelter Workers, now merged with the United Steelworkers of America. Mine-Mill was found by the Subversive Activities Control Board to be Communist-infiltrated.

Reverend King, in a very famous photograph, is shown attending a 1957 Labor Day weekend seminar at the Highlander Folk School. The man sitting next to Reverend King in the photograph, Abner W. Berry, a top official of the CPUSA, wrote in the Daily Worker that the seminar had enabled those attending to reestablish communications with each other "that had been disconnected during the past few years." The disconnection had taken place after the Civil Rights Congress disbanded rather than register as a Communist Party front.

Reverend King's support of Highlander goes beyond attendance at one seminar. In its 1958-59 27th Annual Report of the Highlander Folk School quoted Reverend King as saying:

You have given the South some of its most responsible leaders in this great period of transition.

Two years later, Highlander and Reverend King's Southern Christian Leadership Conference ran joint training programs for civil rights activists.

One of Reverend King's closest SCLC aides was Jack H. O'Dell, now with Rev. Jesse Jackson's Operation PUSH. Under the name, Hunter Pitts O'Dell, Jack O'Dell had been one of the Communist Party's top organizers in the South. When his affiliation with this totalitarian party became known, Reverend King, under pressure, fired O'Dell. The controversy was reopened when it was discovered that O'Dell had been rehired by Reverend King's New York SCLC chapter.

The important point is not that a Communist Party organizer had penetrated Reverend King's confidence, because a Communist could sneak into almost any organization. What is important is that when this man was exposed to Reverend King as a member of an organization that proposes to impose a systematic totalitarian regime on this country, that has been repeatedly demonstrated to be controlled by the Soviet Union, a dictatorship whose troops only a few years earlier in 1956 had slaughtered Hungarian freedom fighters; with all this, Rev. Martin L. King fired O'Dell only because his continued presence would give ammunition to segregationists and race-baiters.

But then, he had O'Dell rehired in New York. And their association continued. O'Dell, who is still an editor of Freedomways magazines, the Communist Party's propaganda arm directed at blacks, appeared with Reverend King at a Freedomways affair in Carnegie Hall in February 1968.

That Freedomways magazine affair was to celebrate the 100th anniversary of the birth of W. E. B. DuBois who in his senility married a young Communist and joined the CPUSA. In his prime, W. E. B. DuBois understood how the Marxist-Leninists wanted to use black people. He wrote in 1931:

The Communists, seizing leadership of the poorest and most ignorant blacks head them toward inevitable slaughter and jail-slavery,

while they hide safely in Chattanooga and Harlem.

DuBois responded to the Communists'

American Negroes do not propose to be the shock troops of the Communist Revolution, driven out in front to death, cruelty and humiliation in order to win victories for white workers.

DuBois pointed out further that the Communists only pretend to speak for white workers and actually serve to polarize tensions between black and white workers.

DuBois denounced the American Commu-

DuBois denounced the American Communists for being the mouthpiece of Moscow, and went on to say:

Unfortunately, American Communists are neither wise nor intelligent.

In his keynote speech that evening, Reverend King said:

So many would like to ignore the fact that Dubois was a Communist in his last years.

And he went on to denounce anticommunism as "irrational" and "obsessive."

A key point of Reverend King's speech was to attach U.S. support for the South Vietnamese against Communist aggression. The struggle against the Vietcong he termed a "senseless, cruel unjust war." For the record, it should be noted that it is the Vietnamese Communists who have proved to be senseless and cruel. In May 1979, more than 80 persons, organized by entertainer Joan Baez, most of whom had once opposed U.S. participation in the Vietnamese war, published an advertisement charging that the Communist conquerors of Vietnam held 200,000 political prisoners, that they starved and tortured prisoners and that some were used as living mine detectors, clearing minefields with their hands and feet.

Reverend King had more Communist agents than merely Jack O'Dell in his entourage. King's long-term adviser was New York attorney Stanley Levison, who FBI investigations revealed to be a "Communist agent." Levison says he was not a party member, but that is not what the FBI found him to be. You do not have to be a party member to be an agent, and you do not have to be working for the Russians to be a Communist agent.

After the FBI produced for King the evidence that Levison was a Communist agent, acting for a foreign power, he declined to separate himself from this adviser.

Communists other than those in the CPUSA were involved with Reverend King's activities. His wife, for example, was active with Women Strike for Peace in the early 1960's. In hearings before the House Committee on Un-American Activities, Women Strike for Peace was shown to be an affiliate of the Women's International Democratic Federation (WIDF), an internationally active Communist front controlled by the International Department of the Soviet Communist Party Central Committee. And starting with the marches in Selma in 1963, King had

active support from a number of disarmament and ban-the-bomb groups who worked with the World Peace Council (WPC), like the WIDF which is virtually its women's auxiliary controlled by the KGB and the Soviet Communist Party Central Committee. A more detailed report on those international Soviet fronts by the Central Intelligence Agency was published in the House Intelligence Committee's hearing, "The CIA and the Media," in 1978.

It is not without significance that in 1971, when the East German regime welcomed Rev. Ralph D. Abernathy, whom they identified as Reverend King's successor, the GDR's propaganda brochure said:

The GDR was on the side of Martin Luther King and Ralph Abernathy in the 1950's when they organized the historic boycott of the omnibuses of Birmingham * * *.

For these and other reasons in the public record, I urge rejection of this ill-conceived resolution.

I yield back the balance of my time. Mr. HAWKINS, Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. Seiberling).

Mr. SEIBERLING. Mr. Speaker, I strongly support this resolution. I had not intended to speak on it, but after hearing such deplorable vituperation, it does seem to me that somebody needs to put things back into proper perspective.

The gentleman from Georgia (Mr. McDonald) who just spoke blamed one of the great Americans of our time and a leading advocate of nonviolence, Martin Luther King, for the violent response of those who reacted against his peaceful protest. That is like accusing Martin Luther King of violence because he was assassinated by James Earl Ray, or accusing the early Christians of violence because the Romans put them in the arena and threw them to the lions.

Surely logic has been turned upside down in the kind of argument we have just heard.

But even more insidious, because are obviously specious arguments, is the sort of anonymous, baseless innuendo implying that maybe if some unknown records are someday in the far distant future disclosed we might have a different opinion of Martin Luther King. The world has known for some time that J. Edgar Hoover had the FBI bug Dr. King, invade his privacy, try to find out anything that they could to discredit him. Evidently they did not find anything of significance, because if they had, they certainly would have tried to use it. Nevertheless, this kind of slanderous statement that somewhere, somehow, there may be something that would discredit Dr. King, is a pitiful effort to diminish the standing in history of this great American.

The effort will fail, whatever Dr. King's detractors may dig up. It will fail because, for tens of millions of Americans, of every race, religion, and political persuasion, as well as for hundreds of millions around the world, including the Nobel Peace Committee, Martin Luther King was the living embodiment of the great human rights ideals emblazoned in our history, in the Declaration of Independence, in the Bill of Rights, and in the long record of our struggle as a nation to see that, in truth and in law and in deed, all men are created equal.

I suggest to any that may have been misled by the colloquy that has just taken place here to refresh their recollection of this great man by reading the speech of Martin Luther King before the Washington Monument at the time of the great civil rights march on Washington.

Martin Luther King's dream was not his alone. It was and is a dream shared by all men and women of good will. Because he lived, our Nation is measurably closer to making that dream a reality. We need to commemorate his life in many ways, so that he may continue to inspire us to complete his unfinished work. Yes; we should place his bust in the Capitol, if only because it will help us keep his ideals in our hearts.

I thank the gentleman for yielding. Mr. HAWKINS. Mr. Speaker, I yield

3 minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. I thank the distinguished chairman for yielding to me.

Mr. Speaker, I rise in support of the resolution, I wanted to speak to my colleague from Georgia who rose in support of the resolution. The gentleman and I differ significantly, I am sure, in terms of political ideology, but it seems to me that the gentleman's statement on the floor today is the kind of statement that would give hope to all Americans, because here we have a gentleman, Mr. GINGRICH from Georgia, who has wiped away the blindfold of racism and prejudice and who, in a very objective manner, attempts to delineate a problem and offer a solution. I am grateful to my colleague.

I think the gentleman's testimony, his statement, stands in such sharp contradistinction to the other two Members who spoke against this resolution, but I also think his statement will be remembered; the other two statements will be spurned by America, as they should be.

We have made great strides in this country. There is no question about it. I travel all over the country—Mississippi, North Carolina, Florida, Georgia—and it is a remarkable feeling now to be able to travel around this Nation knowing that in most places where I

go I can get a hotel room, I can eat a meal, I can use any facility. That would not have happened to me prior

to the King movement.

The story has been so well told many, many times. Blacks who traveled at that time had to pick the spots where they would stop to stay overnight, with relatives, because no hotel would admit us. We had to try to find a black restaurant, or a black church to feed us, because no restaurant would feed us. I think it is because of the work of Dr. King that enormous strides have been made, and, therefore, it is fitting that we honor him with this bust.

On the other hand, I would seek something else in this resolution. I would hope that this resolution would become a symbol for those decent Americans who are proud of the progress that we have made, a symbol for them to rededicate themselves to the effort of ending discrimination and ending prejudice and ending

racism in this Nation.

After all the great steps that we have taken, now suddenly all around the Nation and in its Capitol, in this Congress, we hear the voices of those who would turn back the clock, who would destroy civil rights legislation, who speak out against affirmative action.

□ 1230

We hear the voices of those who are really, in my opinion, alien to America, if America stands for equal justice for all people. Their voices are alien when they start talking about destruction of affirmative action, ending voting rights, and doing all of the things that would turn back the clock on blacks and other minorities.

so, Mr. Speaker, I would urge support for this resolution. I think it will pass overwhelmingly, but as it passes, as we vote tomorrow on this, I would hope that we would take just a moment to rededicate ourselves to the propositions that Martin Luther King

spoke for.

The SPEAKER pro tempore. The time of the gentleman from Maryland has expired

Mr. ĤAWKINS. Mr. Speaker, I yield 1 additional minute to the gentleman

from Maryland.

Mr. MITCHELL of Maryland. I was not a personal friend of Dr. King. I heard him speak many times. He always inspired me. I know most of his speeches, and he made a speech in which he quoted a little poem. I want to refer to that poem and I want Members to try to remember it as they vote tomorrow.

Dr. King said:

I have only got a minute Sixty seconds in it Forced upon me, Can't refuse it Didn't seek it Didn't choose it But I know that I must use it I will suffer if I lose it Pay account if I abuse it Just a tiny little minute But eternity is in it.

I would translate that just a bit by saying:

I have only got a minute
Sixty seconds in it
Forced upon me,
Can't refuse it
Didn't seek it
Didn't choose it
But I know that I must use it
I will suffer if I lose it
Pay account if I abuse it
Just a tiny little minute
But the fate of this Nation,
The future of this Nation, is in it.

Bear that in mind tomorrow as we vote overwhelmingly for this resolution.

Mr. GINGRICH. Mr. Speaker, I yield myself such time as I may use.

At the risk of imposing upon my two good friends in responding to the gentleman from Maryland's overly kind comments, let me suggest a tack radically different than the one my col-

league just suggested.

Martin Luther King faced a series of problems in the mid-1950's which were not solvable by the NAACP's quite successful tradition of legalism, and beginning with Martin Luther King and up to the Student Non-Violent Coordinating Committees, there was a cycle of innovation and invention, new avenues, striking out in ways one had not thought of. Those solutions allow my good friend from Maryland to now stay at the Marriott or the Hilton.

I would like to suggest that while those of us who are white and those of us who are white and those of us who are conservative do in fact need to remember our concern for equality and for justice, that equally tomorrow as the Black Caucus votes on the Martin Luther King statue, that it would be useful for my good friends who are members of the Black Caucus to think of striking out in new directions, to think of opening up new opportunities, to consider new avenues of approach; to ask themselves not simply, how do we live out the rhetoric of the 1950's, but how in fact do we invent the avenues of the 1980's and 1990's.

I would look forward very much to joining such distinguished pioneers as the gentleman from California and the gentleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to the gen-

tleman from Maryland.

Mr. MITCHELL of Maryland. Mr. Speaker, I thank the gentleman for yielding. I have been a civil rights activist; I will be one again in the future, but since I have been in this Congress, I have placed the majority of my emphasis on economic empowerment; development of minority businesses, economic empowerment. Even there,

though that is a legitimate approach, totally consonant with the way the Nation wants to go and I would think with the way the administration wants to go, there are attacks against even that, so I would suggest to the gentleman that he would join with me in trying to protect the very significant steps we have made in a new approach, such as minority enterprise, minority economic development approach, which I think offers a great future to all of us.

Mr. GINGRICH. I look forward to working with the gentleman.

Mr. Speaker, I yield back the balance of my time.

Mr. HAWKINS. Mr. Speaker, may I, without indulging in rhetoric, merely suggest that this resolution, which unfortunately has had two expressions of opposition, has been before the House of Representatives since the 92d Congress, and has been considered in every Congress since then: in the 93d, the 94th, the 95th, the 96th, and the current Congress.

This resolution has been thoroughly discussed and debated; it passed both Houses in the 94th Congress and failed merely because of technical reasons. The present opposition has had plenty of opportunity to present its views to the committee. I am proud, as a friend of Dr. King, to be chairman of the committee that referred this resolution to the floor without one single note of opposition. In conducting hearings on the resolution, the committee sought to have any individuals who opposed the resolution present their views. I doubt seriously that the 144 consponsors of this resolution in the House are being misguided, are being somehow deceived; they are thoroughly acquainted with the facts in this case. I suspect that even the Nobel Prize Commission, which awarded the peace prize to Dr. King, heard the same type of opposition that has unfortunately been expressed today.

This resolution provides an opportunity for this House to pay tribute to a great American. I was one of three Congressmen who visited Dr. Martin Luther King when he was in the Birmingham jail; jailed not because of any criminal activity on his part but because he was advocating nonviolence. I am told by reliable Government agency sources that there were those in the State at that time who had some design to inflict injury on those Congressmen who visited Dr. King. I think the violence was on the other side.

I know as one who has traveled throughout the Deep South in the days before the Civil Rights Act that I had grave difficulties as a black American. A sign was sometimes moved to accommodate me because of my complexion but the experience created fear in my soul because I knew that

the opportunity for black Americans to enjoy equal opportunities was

rather fragile.

I think that atmosphere has improved with the emergence of such outstanding leaders as the gentleman from Georgia (Mr. GINGRICH) who represents a new breed of southerners who have created indeed a marked difference in the South and by the continued support of liberals in the House from the North. So, I think this is more than just a memorial to Dr. King.

Twenty-five thousand dollars, from a strictly economic point of view which seems to prevail in this House lately, is not a great deal to spend. In fact, I fear that it will not buy anything more than perhaps a bust, and not a statue, but I think that the sentiment behind this resolution is substantial. I think the spirit which the resolution represents is so overwhelming that its passage through both Houses of the Congress in this enlightened session is a foregone conclusion.

I am delighted, certainly as a friend of Dr. King, but even more so as one who appreciated the great nonviolent civil rights movement that he headed and the work that it accomplished, to be one of those supporting the resolution in this instance.

Mr. FAUNTROY. Mr. Speaker, will

the gentleman yield?

Mr. HAWKINS. I yield to the Delegate from the District of Columbia.

Mr. FAUNTROY. Mr. Speaker, it is an honor for me to rise this afternoon in support of House Concurrent Resolution 153, a measure to authorize the Joint Committee on the Library to procure a bust or statue of Dr. Martin Luther King, Jr., for placement in our Capitol Building.

As I walk the corridors of the Capitol, whether it be in Statuary Hall or elsewhere, I often pause and reflect on the lives of those great men and women who are called to our attention through the artistry of sculpture.

It was a privilege for me to have worked closely with Martin during the 1960's; and his vision of equality and social justice, along with his compassion for all people, is certainly worthy

of permanent record.

We gathered here this afternoon to remember Dr. King; we know the principles for which he stood and the battles he fought to see them achieved. It is important, too, that posterity—that the hundreds of thousands of citizens who will traverse these corridors long after we have departed—are also given the opportunity to reflect on the life of the greatest humanitarian this century has known, the Reverend Dr. Martin Luther King, Jr.

Mr. MARKEY. Mr. Speaker, I consider it my privilege and duty to pronounce my support of the resolution in commemoration of one of our most important national leaders in history.

I strongly urge my colleagues to support this symbolic bipartisan resolution.

Martin Luther King, Jr., was a man who preached and practiced the ideals on which our freedom is based. His memory represents a tribute to our country's civil enlightenment. Mr. King's success in bringing about a peaceful social revolution for human rights came about at a time when controversy over our country's social and political ideals was at its height. This resolution serves to affirm our Nation's basic acknowledgment of, and profound desire to achieve, the visions of our Founding Fathers.

Honoring Martin Luther King, Jr., will serve to remind our country that such an honor knows no bounds of race, color, or creed and that it can be bestowed in the name of all those once denied true equality. Martin Luther King, Jr., gave his life for a cause that is part of our Nation's foundation.

This honor to Martin Luther King, Jr., will help to emphasize our appreciation for his dedication and devotion to the cause of human and civil rights. This honor is long overdue.

 Mr. RODINO. Mr. Speaker, today we have an opportunity to correct a great injustice and to establish a lasting reminder of our Nation's commitment to basic human rights.

I have joined Congressman BINGHAM in sponsoring this resolution which would authorize a sculpture of Dr. Martin Luther King, Jr., to be placed in the Capitol because our Nation's most important building should not be without a monument to one of our greatest leaders.

Black Americans have made countless contributions to the cultural development and progress of our Nation. Yet, of the 681 statues and other works of art in the U.S. Capitol, not one depicts a black American. I can think of no more fitting person to be the first black American honored in our Capitol Building than Martin Luther King.

A sculpture of Dr. King would be more than a memorial to this extraordinary American who awakened the conscience of our country with his courage and his commitment to nonviolent social change.

This sculpture would be a constant reminder to the millions of American citizens and foreign visitors who tour the Capitol each year that America remains committed to the principles which are the foundation of our Republic—equality, justice, and freedom. These are the ideals which Martin Luther King fought for, and which he died for.

Thirteen years have passed since Martin Luther King was murdered in Memphis, but still there is no memorial to him in our Capitol. This is an injustice that must be corrected. He was still a young man—only 39—when he was killed. The assassin deprived Martin Luther King of the great and good years of what we call middle age. That loss is no less sad in light of his willingness—often expressed—to risk death in the struggle for freedom and justice. It is equally sad that the Nation and the world have been deprived, all these years, of the presence, the voice, and the wisdom of Martin Luther King.

As one person, I sorely miss his voice of inspired leadership that led Martin Luther King to become the youngest person ever to receive the Nobel Peace Prize. But his contributions have a life of their own.

As I told the Southern Christian Leadership Conference 6 years ago: "They shot down the man—and they snuffed out his life—and the man died. But they could not shoot down his dream. For his dream was stronger than life and more powerful than death. And the dream lives on."

Let us pass this resolution and memorialize Dr. King's dream in our Capitol for all humanity.

• Mr. REUSS. Mr. Speaker, more than 13 years ago, Dr. Martin Luther King, Jr., was felled by an assassin's bullet. This happened at a time when our Nation was undergoing a serious reexamination of its direction and principles—a reexamination which Dr. King helped set in motion.

As winner of the 1964 Nobel Peace Prize for his nonviolent activism, Dr. King was widely eulogized both at home and abroad, yet Congress has done pathetically little to acknowledge his great contribution to our Nation. We have not memorialized him with a statue in the Capitol, nor have we made a national holiday of his birthday.

More than 15 million people have toured our Nation's Capitol since Dr. King's death, but no memorial to him is in place. What does this say to children who have learned about Dr. King in school, to foreign visitors who admired this great leader, or to any American citizen believing in the ideals of equality and social justice?

Dr. King's contributions to our society shall forever inspire us as we struggle to achieve his vision of an ideal Nation based on love, justice, peace, and equality. The lack of congressional tribute to one of our greatest leaders is inexcusable. I call upon my colleagues to join me in supporting House Concurrent Resolution 153, to provide for a statue or bust of Dr. Martin Luther King, Jr., to be placed in the U.S. Capitol.

• Ms. COLLINS of Illinois. Mr. Speaker, it is a great honor for me to stand here before my colleagues today expressing support for House Concurrent Resolution 153, a resolution directing a statue of Dr. Martin Luther

King, Jr., to be placed in the U.S. Cap-

As a cosponsor of this resolution, I am proud that the U.S. Capitol, the embodiment of ideals and history of this great Nation, will receive a new addition to enhance its majestic beauty and historical acclaim. Millions of visitors to the Capitol will now be able to view for the first time, the statue of a man, a black man, known the world over as a man for all seasons, for all peoples; for brotherhood and nonviolence.

Dr. Martin Luther King, Jr., was felled by an assassin's bullet on April 4, 1968, but he did not die because he left us with a legacy, a new direction and most important he left us with his dream. He knew that one day everyone would realize that the progress of America is reflected in the progress of

the people within it.

Placing a bust of this compassionate, learned man serves to help commemorate his struggle to achieve equality and justice for all Americans. This is surely a positive step in the direction of enacting a full national holiday honoring the birth date of Martin Luther King, Jr.-the voice and instrument of the second American revolution.

• Mr. GILMAN. Mr. Speaker, I rise in support of House Concurrent Resolution 153, to provide that a bust or statue of the Reverend Dr. Martin Luther King, Jr., be placed in the Capitol Building.

I am proud to be an original cosponsor of this legislation, which I have cosponsored in past Congresses, as well. While it is regrettable that this proposal has become so controversial, I am confident that the House will see

fit to pass this resolution.

Mr. Speaker, permit me to pay tribute to two of our colleagues who have worked long and hard to bring this measure before us today. The distinguished gentleman from New York (Mr. BINGHAM), the able chairman of the Subcommittee on International Economic Affairs on which I serve, and the gentleman from California (Mr. HAWKINS), the able and distinguished chairman of the Committee on House Administration, have shepherded this bill to the floor today.

Mr. Speaker, it is difficult, even after many years have passed since the death of Martin Luther King, Jr., to fully appreciate his impact on American society. Martin Luther King, Jr., was a leader in the effort to bring dignity to all American citizens, and in that sense, he was a leader not of any race or class, but of the entire

Nation.

We have only to think back to the days of the early 1960's, when racial issues threatened to polarize our society, to realize that while we still have a long way to go, we have come very far indeed. We have struck down the legal barriers to equality of opportunity that offended the soul of every sensitive person; we are now engaged in an effort to make certain that every person regardless of race is able to take full advantage of the opportunities that have been opened up by the legislation of the sixties.

Dr. King's image in the Capitol Building will help us concentrate on that goal, will remind us of a great humanitarian whose life was cut tragically short by an assassin's bullet, and will serve to show black Americans that their struggles and contributions to this Nation are honored and remembered in this, the Capitol of all the people.

 Mr. WEISS. Mr. Speaker, the turbulence of the sixties awakened many Americans to the injustices perpetrated against minorities in this country. Equality of opportunity in education, in employment, and in society in general, has been denied to many people on the basis of color, race, sex, creed, and religion.

By pointing out the injustice of discrimination, Martin Luther King, Jr., raised the consciousness level of the American public and increased the dignity and self-esteem of blacks and other minorities in America. Since that time, government has made laws and policies to discourage many discriminatory practices, and society has better accepted those fellow Americans whom it had spurned so many times before.

Because of Martin Luther King, Jr.'s strong push for civil rights, minorities have better opportunities in society than ever before. Although we have made progress in the fight against discrimination, we should remember that it still haunts us, and we must continue to discourage it. By dedicating a bust or statue in the Capitol to the memory of Martin Luther King, Jr., we will reaffirm the American ideal of equality for all people.

I strongly support House Concurrent Resolution 153, which would dedicate a bust or statue to this late great leader, which will serve as a daily reminder of his vital work in the field of civil rights and our need to continue his efforts.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. HAWKINS) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 153).

The question was taken.

Mr. ASHBROOK, Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the concurrent resolution (H. Con. Res. 153).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

ARMED FORCES PAY ACT OF 1981

Mr. NICHOLS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3380) to increase the pay and allowances of members of the Armed Forces.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. NICHOLS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill. H.R. 3380, with Mr. BINGHAM in the chair

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Alabama (Mr. Nichols) will be recognized for 30 minutes; the gentleman from New York (Mr. MITCHELL) will be recognized for 30 minutes; the gentleman from Washington (Mr. Dicks) will be recognized for 30 minutes, and the gentleman from Alabama (Mr. Ep-WARDS) will be recognized for 30 minutes.

At this time the Chair recognizes the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Chairman, I yield myself such time as I may consume. Mr. Chairman, on behalf of the Committee on Armed Services, I am pleased to bring to the House for consideration, H.R. 3380, a bill to increase the pay and allowances for members of the Armed Forces.

This bill, the product of thorough hearings and deliberation by the Subcommittee on Military Personnel and Compensation, was approved over-whelmingly by both the subcommittee and the full House Armed Services Committee.

The purpose of H.R. 3380 is threefold. First, the bill would authorize a 14.3-percent increase in basic pay and in quarters and subsistence allowances for all personnel in the uniformed services. Second, it would provide certain increases in special pay and bonuses that are designed to assist in attracting and retaining individuals in critical skills in the uniformed services. Third, it would provide certain travel and transportation allowances that are designed to assist in alleviating hardships and financial irritants occasioned by military service.

Last year many Members of the House expressed to me and other members of the committee their profound concern about the deteriorating state of military manpower. The number and, equally important, the quality of recruits was declining. Skilled career personnel were leaving the services to take lucrative jobs on the outside-jobs that not only paid more money, but also did not involve the rigorous demands of military life.

The Congress reacted swiftly and affirmatively last year with a landmark package of pay and benefit increases. The 11.7-percent pay increase partially offset the adverse impact of repeated pay caps in the mid and late 1970's. A variety of special pays for arduous duty-sea and submarine pay, for example-were increased to more realistic levels. All the improvements were catchup measures to counteract years of benign neglect.

I am pleased to tell the Members of this House that this investment is paying off. Recruitment and retention rates are up. The exact magnitude of this increase has not yet been determined; we have only part of a year's worth of statistics. To date the statistics look good, but they must stabilize before we can form specific conclusions. Further, the strict quality standards for new recruits established by Congress last year are being met. We would make a serious mistake, however, if we allow ourselves to be lulled into a sense of complacency again.

The recruiting market will become tighter in the future as fewer young people reach recruiting age. At the same time, the military force is expected to grow. As the civilian job market for young people improves, the competition for high quality recruits will become increasingly tough. The benefits proposed by H.R. 3380-particularly the 14.3-percent pay increase-are essential if we expect to fulfill the future demand for military

personnel.

The Armed Services Committee believes the basic pay and allowance system to be the cornerstone of military compensation. In order to compete with the private sector, pay rates must remain competitive; the 14.3-percent increase incorporated in H.R. 3380 represents the final installment needed to make military pay again comparable with civilian pay, as Congress mandated when the All-Volunteer Force was established in 1972. In addition to basic pay, there is a flexible system of special and incentive pays and bonuses to address specific manning problems in particular skills

or groups of personnel that may arise from time to time. These problem areas change over time, as does the emphasis of the special pays.

The President recently announced the establishment of a defense manpower task force to review the entire spectrum of military manpower and compensation issues. H.R. 3380 affords the President the flexibility to implement the findings of the task force before the October 1 pay raise. Under existing statute, up to 25 percent of the October basic pay increase may be reallocated by grades and years of service. Should the President determine that some grades and years of service require the infusion of additional funds, and that others can afford to receive a lesser increase, he make that recommendation. Under H.R. 3380, as approved by the Armed Services Committee, his hands will not be tied by a congressionally mandated pay table that attempts to address the perceived needs of one service, while potentially ignoring the requirements of another.

H.R. 3380 is a sound investment in the future of our military manpower system. I urge its adoption as recommended by the House Committee on Armed Services.

□ 1245

Mr. MITCHELL of New York. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 3380, the Nichols-Mitchell bill, the House version of the method by which we should increase pay to our service personnel.

Our 14.3 percent merely represents comparability. In 1972 the Congress promised the people in the military that they would pay them comparable to people working in the civilian sector. The Congress did not promise them that they would serve without danger or that they would serve without family separation or that they would serve without great turbulence in their lives, but the Congress did promise them there would be pay comparability.

Congress has not kept its word, and the results show it. There has been a shortfall in recruitment. We have an exodus of highly skilled people in our services, and there has been a decline in the quality of our people in the Armed Forces. We must increase the pay by 14.3 percent, in my estimation, to preserve the integrity of the Congress, we must do it to send a clear signal to the people in the services that we do care about the sacrifices they make, but in addition to the integrity of the Congress and in addition to the fact that we made this promise, there are several other reasons why we should support an across-the-board 14.3-percent increase.

One of them is that they are expecting it. It has been ballyhooed far and wide that they were about to receive something comparable to what the civilian sector receives. Some of them, I am sure, Mr. Chairman, have spent the money already.

I have found through my years of service on the Subcommittee on Military Personnel and Compensation that our biggest obstacle to retention in the services, to getting the people we want and keeping them, ties in with the concept or the argument of "erosion of benefits" or "breach of contract"— the argument that says Congress really does not care an awful lot about people in the armed services.

Congress continues to provide less than we have promised them on recruitment. If we provide less than 14.3 percent this year, I am sure it will be viewed by many in the services as simply one more broken promise. It will negatively affect recruitment; it will negatively affect retention.

In the Senate version two-thirds of the people in the services will receive less than 14.3 percent. Two-thirds of them will get less than what they expected to get or what they feel they were promised by Congress in 1972 with the pledge of comparability.

With last year's pay bill, which totaled more than \$5 billion, we began to turn this situation around where we could not get the people we want and could not keep them as long as we want. Both requirement and retention have improved markedly.

There have been some dramatic changes. We have been building momentum. We have developed an enthusiasm for young people to serve their country in the armed services. A 14.3 percent, across-the-board pay increase will help to keep that momentum building. Anything less, as I see it, will slow down this momentum.

Mr. SKELTON. Mr. Chairman, will the gentleman yield at that point?

Mr. MITCHELL of New York. Yes; I yield to my friend, the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, I wish to associate myself with the remarks of the gentleman from New York (Mr. MITCHELL) regarding the 14 percent, across-the-board pay increase.

I might point out that I had the opportunity to visit some nine military bases in Europe in 9 days in the first part of August, and the morale there was excellent. A good part of it was based upon the fact that last year they received a substantial pay increase. They think the people back home are paying attention to their

I also felt that they are anticipating this substantial pay increase this year. This is not just for morale purposes, but I think this year we are still trying to play catchup football, as we say

back in Missouri, on the pay for the military.

So, Mr. Chairman, I do associate myself with the remarks of the gentleman from New York (Mr. MITCHELL), and I commend him on his stand.

Mr. MITCHELL of New York. Mr. Chairman, I thank the gentleman from Missouri (Mr. Skelton) for his contribution.

Do I understand that the perception is there that the people are going to receive the 14.3-percent increase?

Mr. SKELTON. In my opinion, there is no question about it that the perception is there. They feel that this was a pledge made to them quite some time ago, and I certainly hope we can fulfill that expectation.

Mr. MITCHELL of New York. Mr. Chairman, I thank the gentleman from Missouri (Mr. Skelton). I agree that anything less would tend to slow down this momentum we have got building, and the preception would be that once again Congress is losing interest in the armed services.

The prime virtue of the Senate bill is that there is a targeting provision, and that provision would be a policy of paying more to certain grades to encourage people to stay in our services and to strengthen retention at certain levels in the military. That is a good concept generally, but we do not need any additional targeting. We already have the flexibility within this bill to target up to 25 percent of the 14.3-percent pay increase.

I sincerely hope that the President will not take advantage of this flexibility, I sincerely hope that everyone in the service who is eligible will receive the 14.3-percent pay increase, but the provision is there should it be needed.

Then, too, we already target extensively with special pays and incentive pays. We pay sea pay and sub pay and flight pay and hazardous duty pay and proficiency pay. We provide more funds and more money for our health professionals, we give people who are nuclear qualified more money, we have enlistment bonuses and reenlistment bonuses, and we target at the present moment more than \$2 billion for people we want to attract or retain. So we do not need any more targeting.

It is probably important, too, Mr. Chairman, to take a look at who supports these two measures, which of our experts support the Senate version and which of our experts support the House version. The only military leader that I know of who is supporting the Senate version is General Myers, Chief of the Army Air Force. For the House version which provides the 14.3 percent, across-the-board pay increase, we have Secretary of Defense Weinberger, who, I assume, is representing President Reagan and the administration, we have General Osway, Chief of the Air Force personnel, we have Admiral Hayward, Chief of Naval Operations, and we have the military associations behind our bill. There is the Fleet Reserve, and we also have supporting the bill the Air Force Sergeants, and we have the National Association of Uniformed Services.

It really comes down to which problem we wish to address, recruitment or retention. The Senate bill would provide a slight increase in recruitment levels in the senior enlistment ranks over what the House version provides. There is about a 2-percent improvement, but both will overkill the problem. Both bills will provide 50,000 or more people at these levels than we need in a few years. Both are more than adequate to solve the problem the Senate version addresses.

But the House bill will help recruitment far more, and the Congressional Budget Office tells us that recruiting will be the big problem we will face in the 1980's once we establish comparability.

In conclusion, Mr. Chairman, I would like to say that cost is not a huge factor. Both bills cost about the same. The House version would save about a quarter of a billion dollars in 5 years and a total of over a billion dollars in 10 years. The difference is that the House bill, in my estimation, will continue the momentum we have going. It will address both problems, recruitment and retention. It will allow our contract that the Congress made to people in the armed services back in 1972 to be honored, and it will send a clear signal that the Congress does care about the sacrifices these people make in our behalf. It will provide the pay increases that military personnel want and expect.

I would just like to reiterate that we do not need more targeting. Anything else is redundant.

Mr. Chairman, I urge my colleagues to support the House version.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of New York. I yield to my friend, the gentleman from New York.

Mr. RICHMOND. Mr. Chairman, I rise in strong support of this legislation to increase the pay and allowances for members of the Armed Forces and in support of the amendment of the gentleman from New York (Mr. Addabado) which targets raises to keep technically qualified men and women in the Armed Forces.

I am convinced that this legislation is crucially needed to help the military attract and retain men and women with essential technical and managerial skills.

Mr. Chairman, I am convinced that the administration's military budget request for 1981 appears to encourage a wasteful anomaly. In a total defense budget of \$188.8 billion, \$38.8 billion is earmarked for military compensation, while \$52 billion is intended for weapons systems procurement. The remaining \$90 billion or so will be used largely for Pentagon management overhead.

From a prudent management point of view, it would make more sense to reverse these priorities for a while, and concentrate our vast defense resources on improving the general standards of competence and retention among line personnel. By raising military compensation to levels offered for similar skills in the private sector, we could recruit more competent people, retain them for longer periods, and significantly reduce the wasteful gap between personnel and technology. For these reasons, I am strongly supporting the legislation now before us, H.R. 3380.

The American public is being deluded into believing that vast expenditures on sophisticated new weapons systems are the answer to our military prayers. Defense contractors and their friends on the procurement side of the Department of Defense have done a magnificent job of lulling the public into this false sense of security.

Our real defense problems are more subtle and, therefore, more difficult to correct; in the end, they also may be more expensive to solve than the most pessimistic estimates of the cost of new hardware.

While they want more "bang for the buck," our military commanders do not yet have forces of high enough caliber to properly light the fuses. We have seen only the top of the tip of the iceberg of unpreparedness in three recent disasters: the aborted rescue mission in Iran, the destruction of a Japanese merchant vessel by an American submarine, and the fatal accident on board the carrier Nimitz.

In all three cases, military personnel were dealing with the most sophisticated machinery available in the world. And, in all three cases, the technology outran the capabilities of responsible humans.

If our weapons systems become even more sophisticated before we have brought maintenance and operating skills to appropriate levels, we will have thrown literally hundreds of billions of dollars down the drain.

By the evidence of their own studies, Pentagon officials are aware of this gap, and of the reasons for it:

First, they are not able to recruit enough people of high enough ability. Not only are the services failing to meet their numerical goals, but the overall quality of recruits remains low. One-quarter of current recruits do not have a high school diploma; 17 percent of current recruits scored below the 30 percentile in a screening exam whose benchmark is tests given to military personnel in 1944.

Second, the services are not able to retain personnel. In the fiscal year

ended last September, one-third or more of people trained in such areas as electronic repair and communications did not reenlist. Among even more highly trained people, such as naval pilots and nuclear submarine officers, fewer than 40 percent remain beyond their minimum service requirement.

By far the most frequently cited reason for this attrition, according to military exit surveys, is insufficient pay. Certainly, along with low morale and unpleasant working conditions, insufficient compensation is a primary reason for our failure to retain trained, efficient military personnel.

Another key reason for low morale is the distinct feeling that a military career deprives one's family of a decent quality of life. Since 1972, the disposable income of military personnel has declined between 13.4 percent and 25.8 percent, depending on rank and seniority. A junior officer now receives less compensation, including all allowances, than does a busdriver in Washington, D.C.

We have, then, a very expensive and ultimately wasteful revolving door in the Armed Forces. Large numbers of marginally prepared people are intensively trained to operate sophisticated systems. Then they take their skills into the private sector and command wages commensurate with their new knowledge. As they depart, new recruits begin their training. The result is that we never have a sufficient number of trained and experienced people to run the system.

Mr. Chairman, I believe that H.R. 3390 is an essential step in the right direction and I urge my colleagues to join me in approving an adequate and enlightened compensation policy for our Armed Forces.

Mr. MITCHELL of New York. Mr. Chairman, I reserve the balance of my time.

Mr. ADDABBO. Mr. Chairman, the Committee on Appropriations supports virtually all of H.R. 3380 as reported out by the Armed Services Committee. Of the total of 11 different sections in the bill, the committee has no objection to 10.

I applaud the distinguished chairman from Alabama and the members of his Subcommittee on Military Personnel and Compensation for producing a bill that provides thoughtful solutions to such various and difficult personnel problems as: A shortage of science and engineering officers, adequate reimbursement for temporary lodging when changing duty stations, emergency home leave for those stationed overseas; consolidation of authority for hazardous duty pay, and an increase in the ceiling for enlistment bonuses which will be of particular help to the Army in its recruiting effort.

Mr. Chairman, the only area of disagreement concerns section 2 in which the Armed Services Committee recommended an across-the-board 14.3-percent military pay raise on October 1, 1981, in lieu of a 5.3-percent raise on July 1 and a separate 9.1-percent raise on October 1, 1981, as proposed by the President. At the proper time, I will offer an amendment by the Appropriations Committee which will target the pay raise to the ranks of highest need, but which will still average 14.3 percent.

The Appropriations Committee held detailed hearings on H.R. 3380 with witnesses from the Office of the Secretary of Defense, the military services, and the General Accounting Office. The overwhelming substance of the testimony clearly dictates that the military pay raise for October 1 should be targeted. The committee believes that a pay raise as high as 22 percent should be granted to the more highly skilled and experienced enlisted personnel who are in short supply with others receiving raises in varying lesser amounts but with no one receiving a raise of less than 7 percent. The net effect of our proposal is to give a pay raise that will average 14.3 percent as opposed to the across-theboard proposal of 14.3 percent recommended by the Armed Services Committee

I am committed to making the All-Volunteer Force work. However, the approach recommended by the Armed Services Committee would leave the pay tables in the same proportion that was designed in the early 1970's without making any adjustments by pay grade based upon almost a decade of experience. Just as field testing is used to make needed adjustments in the design of a tank or aircraft before it is put into long-term production, we should use the acumulated evidence of nearly 10 years' experience to make military compensation support the All-Volunteer Force in the most economic manner possible.

The relationship between career and entry pay has significantly eroded over the years to the point that today a promotion to sergeant, the beginning of the career force, will gain an individual only \$20 a month in basic pay. How can we convince a highly qualified young person that increased responsibility in the military is adequately compensated?

All the services are seriously short of skilled personnel. In the Appropriations Committee report on the fiscal year 1981 defense budget, we estimated that DOD was short over 100,000 NCO's. Those numbers have changed little over the last year. Many of our Army divisions are not ready because of these shortfalls. The Navy must juggle crews in order to get marginally ready ships to sea. Air Force mainte-

nance personnel shortages reduce the

number of planes we can put into the air. According to the Congressional Budget Office, targeting the pay raise will allow the services to recruit virtually the same number of quality personnel over the next 5 years, but would increase the size of the career force by 19,000 trained and experienced leaders. Our proposal, and the one supported by the Senate Armed Services Committee, is to give a pay raise that will average 14.3 percent as opposed to the across-the-board proposal of 14.3 percent contained in the initial version of H.R. 3380.

There is strong support in the military services for a targeted pay increase. Army Chief of Staff E. C. Meyer has stated that he prefers a targeted pay raise. Gen. W. L. Creech, head of the Air Force Tactical Air Command, testified before the Appropriations Committee that a targeted pay increase would better meet this serious retention problem. The people working in the field have stated to me that they support the targeted approach.

For these reasons, the Appropriations Committee will offer at the proper time a substitute amendment for the across-the-board pay raise. It will provide the same 14.3-percent increase on average, but will target more of it to our critically short senior NCO's. Additionally, my amendment will give the President the flexibility to realine up to 2 percent of the pay raise if he judges it to be necessary.

I urge that you support the Appropriations Committee substitute amendment, which I intend to offer at the proper time.

Mr. DICKS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of the legislation and of the so-called Addabbo amendment.

Mr. Chairman, after years of ignoring the developing situation, there is now universal agreement that we face serious problems in manning our military forces. These problems are not going to go away, and in fact hold every promise of providing an even greater challenge to our military effectiveness than they do today.

There is no getting around the fact that as we proceed through the 1980's and early 1990's, there will be fewer and fewer individuals each year reaching what we now consider prime recruitment age. At the same time, we are seriously examining proposals to substantially expand the force levels we maintain. The Navy has a goal of a 600-ship fleet. This will require thousands of additional personnel and will add a requirement for an additional 20,000 petty officers, on top of the current 22,000 shortage. The Army is considering force increases of between 250,000 and 500,000. The Air Force wants to add to its active wings.

If we are to accomplish these goals, and if we are to obtain the military manpower we need, tough decisions

are going to have to be made.

I want to make clear from the outset, that the personnel problems we face in the services are deeper and more complex than simply deciding the proper level of compensation. We are engaged in a great and unprecedented experiment. Never has a nation attempted to maintain a force in excess of 2 million men and women under arms during an extended period of peacetime, without compulsion, in the history of the world. We simply do not have many precedents to go by in trying to determine how we accomplish this task and retain an effective fighting force.

In an effort to make the experiment work, we agreed to strive to achieve pay comparability with the private sector. This is an understandable general principle, but it is not without its

flaws.

Fundamentally, attempts to correlate civilian and military pay are like comparing apples and oranges. No matter how hard you try you cannot make a side-by-side comparison. Many military tasks, especially in combat arms, simply do not have any comparable position in the civilian world. There is no systematic method of factoring the various forms of compensation outside of basic pay in both worlds. Particularly in the military, there is an almost infinite combination of privileges and benefits which an individual soldier might receive. Fur-ther, in civilian Government, jobs are rated on the GS scale. In the military, the equivalent rank cuts across literally hundreds of different jobs with seniority and command structure the operating factors in determining rank. Even if we agree on the PATC standard as a fair judge of needed pay increases we are saying that pay adjustments that are necessary for a Federal white collar labor force whose medium age is about 45 should be automatically applied to a military work force that is roughly 55 percent blue collar and whose median age is about 24.

Second, the principle of comparability encourages the perception of military service as just another job. It is not, never was, and never can be. The bottom line is that a soldier is asked to risk his life for his Nation and if need be take the life of his Nation's enemy. In addition, he is assigned where needed, when the commander deems

he is needed there.

When we view the military as just another job, we foster an attitude that is not conducive to the essential qualities of commitment, loyalty and cohesion that have won far more battles throughout history than have so-called wonder weapons.

Viewing the military as a job also fosters the sense of careerism among the leadership of the services that damages our fighting capabilities. This attitude implies that its leaders can devote themselves mainly to advancing their own careers, and that its work force can be motivated by the same combination of fringe benefits and sanctions as any assembly line crew.

The careerist motivation must be addressed if we are to really build an effective fighting force. We must eliminate the system which places a premium on avoiding risks, which eliminates officers who well may be competent in their current assignments, through arbitrary and automatic "up and out" rules. We must allow more decentralized command authority. The Washington Post in its series on the officer corps notes that one of every six Army colonels, handpicked to command troops, has turned down the honor. The arguments presented do not center on pay, but on the authority officers are provided to lead, rather than simply manage. Retired Col. John B. Kelly summed up his reasons for voluntarily retiring by noting:

Why should I go out there and take all the hell and not have the authority.

My purpose in raising these points is to remind the Members of this body that we must not only consider the inputs in shaping military manpower policy. Numbers of individuals, and their backgrounds when they enter are no doubt of major importance. But even more important is what we do with them once they join the military to make them an effective fighting force.

Addressing these problems will require major internal reforms in the military. There is a limit on how much we can and should dictate these changes. But we can encourage the services to recognize and act on the basic problems. We can applaud leaders such as Army Chief of Staff E. C. Meyer when he initiates unit rotation experiments or lengthens the Army's basic training. We can bring the issues out for public debate and force a full and complete examination of them.

Any efforts to change the way the military operates in the personnel area will take time, will no doubt result in some setbacks, and will never completely eliminate problems. Some tradeoffs simply cannot be avoided. I am encouraged by the recent an-nouncement by the President that has created a Task Force on Military Manpower. I fervently hope, that in addition to examining the obvious aspects of the situation such as appropriate compensation levels and the pros and the cons of a draft, that they will examine the basic structure of the military personnel system to determine ways we can improve the product it produces. I also hope they give full attention to the requirements of the Reserve components, which continue to

be short of their mobilization requirements, particularly the Individual Ready Reserve.

The manpower problems we face today, cannot be ignored in hopes of a solution some years in the future. While aggregate numbers are sufficient for the current force structure, we continue to be desperately short in critical skill areas.

I intend to discuss in considerable detail the reasons I believe a targeted general pay increase is the most appropriate method of addressing this immediate problem during debate on the Appropriations Committee amendment. But I do want to take this opportunity to focus on the aspects of H.R. 3380, as reported by the Armed Services and Appropriations Committee, that do target compensation increases and have been relegated off center stage by the controversy over the general pay increase.

First, the bill increases the maximum enlistment bonus from \$5,000 to \$10,000. It also would, for the first time, allow payment of bonuses for enlistments of less than 4 years. Bonuses, where applied have been viewed by recruiters as exceedingly important tools. But the services have never advertised them in an effort to provide general inducement for recruitment. Rather, they have been used to encourage individuals, once sold on the service, to enter a particular career field. Their overall use has been minimal. The Air Force only began paying bonuses in this fiscal year and provided them to only 1 percent of person-nel. In the Navy, 2 percent received the bonus. And even the Army with the quantitative and qualitative constraints imposed by the Congress has only used them for 10 percent of their recruits. Overall, the Department spends less than \$100 million on enlistment bonuses today.

Many of us who have reviewed the personnel situation in detail feel that bonuses have been underutilized. If properly presented to the potential recruit, they can be a more effective inducement than a somewhat higher level of basic pay.

The bill also changes the basis on which eligibility for reenlistment bonuses can be calculated that will allow an individual to qualify for advanced technical training through service extensions and not be denied the opportunity to qualify for a bonus. This will avoid a forced decision between improving an individual's skill level or providing needed inducements for a full reenlistment.

Second, the bill provides the Department authority to establish special pays for unusual hazardous duty or duty performed under severe working conditions. Under existing law, the Congress must specifically authorize each of these special pays. This is the

type of micromanagement that Congress does not need to involve itself in and which inevitably leads to long delays before justified special pays can be authorized. The Congress should, of course, maintain a general oversight over the application of special pays, but by giving the Department greater flexibility in this area we, hopefully, can avoid the type of festering shortages we often are confronted with today.

Third, the legislation makes specific efforts to deal with the particularly difficult time we are having in attracting and retaining engineering and scientific officers. Recent reports show that the United States has produced 17,000 fewer engineers than it needs. The competition with the private sector for these individuals is particularly intense with starting salaries in private firms averaging in excess of \$20,000. Without help, the military simply cannot compete. Thus, H.R.

3380, establishes a \$15,000 accession bonus for a 4-year obligation, and a continuation bonus of \$3,000 for each

additional year of service.

Finally, the bill deals with concerns that, although they affect the working atmosphere in the military, are not generally considered major issues. These "financial irritants," however, are disproportionately cited by many who leave the services. Items such as reimbursement for temporary lodging expenses, advance payment of certain travel and transportation allowances, environmental and morale leave, and travel in conjunction with emergency leave will help create an atmosphere that better recognizes the realities of the burden faced by military personnel.

In conclusion, the pay caps imposed in the latter half of the 1970's on the military no doubt created a need for large increases again this year. But we should not be misled into thinking that our personnel problems will be solved by returning to some previously defined level of comparability. They will not. To solve them will require some basic and difficult decisions on the part of the Congress and the Department. The jury is still out on the viability of the All-Volunteer Force. A real trial will require creative thinking in dealing with the problems it presents, and I sincerely hope we will not shrink from that challenge.

□ 1300

I just might add, Mr. Chairman, I want to applaud the gentleman from Alabama (Mr. Nichols), the gentleman from New York (Mr. Mitchell), who have been at the forefront in not only this Congress but in the last Congress in dealing with the personnel problems. I think the enactment of the retention pay increase last year and the enactment of the 11.7-percent across-the-board pay increase are

largely responsible for the turnaround in recruiting and retention that we have seen in our All-Volunteer Force in the last year. We have made substantial progress.

I think that we can further that progress, and we will debate this tomorrow, if we target this pay increase that we are discussing this year. If we are going to keep those NCO's and petty officers in, then I think we have to give them a little more in compensation than the early recruit. I think the across-the-board approach simply does not recognize that hard reality.

The committee, to its credit, last year gave authority to target 25 percent of the pay increase, but the administration chose not to target 1 cent

of that pay increase.

With that kind of an attitude being presented by the administration, not just this administration but the prior administration as well, and the seeming reluctance to look at new and creative solutions, I feel that our subcommittee was correct in making this proposal. I think it will provide for a lively debate tomorrow.

I might point out to my colleagues that the other body voted on this issue and resolved it in favor of a targeted pay increase by a vote of 81 to 0. So there seems to be considerable support both politically and in the defense area. General "Shy" Meyer has also testified strongly in favor of a targeted pay increase, as has the Navy and other services as well.

So I want again to compliment the committee for the overall bill. We will have an amendment that we think improves it, and we will have a chance to discuss that tomorrow.

Mr. Chairman, I yield such time as he may consume to the gentleman

from Florida (Mr. Lehman).

Mr. Lehman. Mr. Chairman, in July I visited Fort Carson, Colo., as well as other military installations in the Rocky Mountain area. I was appalled by the conditions under which the enlisted men there must live and work.

Lack of housing on the post means that the privates are forced to find places to live elsewhere. At Fort Carson, the barracks used for Reserve and National Guard members appeared as bad as the most rundown housing projects I have ever seen. The barracks had originally been built as temporary shelter 40 years ago during World War II.

At Fort Carson, the privates who live offpost do not receive any additional financial help. With so little pay and high expenses, it probably should not surprise us that many if not most are forced to use food stamps in order to provide for their families. There are probably many more enlisted men and women who qualify for food stamps but are prevented by pride from accepting them. Mr. Chair-

man, it is unconscionable for us to ask these men and women to volunteer for the Armed Forces of our country and then fail to provide them with adequate compensation.

I was also shocked to learn at Fort Carson that our tank personnel are not equipped with fire-resistant clothing. After the 1973 Arab-Israeli war, I visited the burn ward at the Hadassah Hospital. I learned that protective clothing had made a life-or-death difference for the Israeli tank soldiers. In tank warfare, the overwhelming majority of injuries are the result of burns. At Fort Carson, I became concerned that we were being insensitive to the needs of our own soldiers by spending so many of our dollars on military hardware and so little on protecting lives.

Upon my return to Washington, I brought this matter to the attention of the distinguished gentleman from Alabama as well as other members of the Armed Services Committee. I have since learned that the Army does intend to begin equipping our tank crews with fire-resistant uniforms beginning in fiscal year 1982. While I am pleased that some progress is being made, I am also disappointed that it is taking so long for us to provide adequate protection for our servicemen.

Mr. Chairman, my visit to the military installations in Colorado taught me that we must continue to examine how we are going to spend the huge amounts of money we are providing the Defense Department. Let us make sure we put our people, and not sophisticated machinery, first.

In the end, we have to depend on our soldiers to protect us. As James Fallows noted in a recent article—

The effectiveness of a fighting force ultimately depends on the creation of a series of human bonds. . . . Armies will sacrifice to defend a nation that respects the sacrifices they make.

I wish to commend the Armed Services Committee for its efforts to improve the pay and benefits of the members of our Armed Forces. I agree with the members of the committee that it is essential that we upgrade the kind of compensation we give the men and women who dedicate their lives to serving their country. I support the 14.3-percent across-the-board pay raise contained in H.R. 3380 as reported by the Armed Services Committee.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to commend the gentleman from Alabama (Mr. Nichols) and the gentleman from New York (Mr. Mitchell) for the hard work that they have put in on this bill. I would like to suggest that simply because our subcommittee and the Appropriations Committee comes here with a little different view on the pay

part of it should take away in the least from the admiration that we have for these gentlemen and their committee and the work that they have done in upgrading the pay for our military and upgrading the benefits and conditions of the military, all of which have had to be done. They have done it in fine fashion.

forward through the We came Armed Services Committee last year with an 11.7-percent increase, and now that we are back with an overall proposal for a 14.3-percent increase in military pay and allowances, I think we are certainly on the right track. So I do no come here today in the least with any criticism of the action that has been taken by the Armed Services Committee.

□ 1315

Rather, I come here in a position that gives me some little concern, frankly, because I believe very strongly that the President and the Secretary of Defense ought to set defense policy, ought to determine basic issues such as pay; and so I do not like to come here and, in effect, suggest that we have the answer to how you pay all of the troops. And yet I must say to you that in some sense of frustration I come here supporting the position of the Defense Appropriations Subcommittee for the very reason that the administration last year, while having the authority, did not make any effort to target that pay raise.

We have been told—I have been told personally by the Secretary of Defense-that there is no intention to target the 14.3-percent raise that is in the bill this year. The Secretary's view, in fairness, is that 14.3 will bring the serviceman up to about the level where he should be, and he argues, that is, the Secretary does, that next year would be the time to start targeting. Well, I just, frankly, disagree with

that.

I have taken the well of the House for a number of years, as most of you know, talking about readiness, talking about the problems of our aircraft that are sitting in hangars not able to fly, and two of the main reasons that we have discussed over the years has been, one, the lack of spare parts and, two, the fact that we continue to lose our best trained people. When they get into the position where they can do a good job of mechanics work on a plane, any of them tend to be hired away by the defense contractors at two and three times the salary. We need to find some way to keep our NCO's, our petty officers, in the service in that area of the 12th or 13th year of military service. When time comes for about the third reenlistment, the second or third reenlistment, we find that we lose many of our NCO's. They are then, when they get to that point, looking at the prospect of putting in an additional 7 or 8 years to work into their 20-year retirement program. And so it is a big decision point. And if we start to lose our better NCO's, as we have been in the past, then we find that we are continuing to have to recruit more, we are having to hire more recruiters, we are having to pay for more advertising, we are having to find newer and better ways to create bonuses to encourage people to come into the service. It is my position that if we in fact can hold in the service the NCO level that we desperately need in our military that we would not have the recruiting problem that we have today. So it is on this basis, I think, that

the Defense Subcommittee on Appropriations has concluded that there is a clear need to do some targeting to try to go after those people who have been in the service for 10 or 12 years and who are at a crucial point in making a decision as to whether to stay in. We should go after those folks and, therefore, target the pay in a way that the guy who comes in as a recruit would come in at about 7 percent but within the year he would already be up to 9 or 10 percent, that the NCO up in the technical sergeant-master sergeant level would be up around 20 to 22 percent. In that way we would be doing the best we can to see that the people stay in the military who ought to stay there and be in the leadership role in the military, not only in the enlisted ranks, but in those crucial ranks in the officer corps as well.

So tomorrow the Appropriation Subcommittee on Defense, through our chairman, the gentleman from New York (Mr. ADDABBO), will offer an amendment to this bill to target the pay raise. We will leave 14.3 percent in the allowances, just like it is in this present bill. We basically do not touch anything else, except the pay itself, where we feel there is a great need to

do some targeting.

I would suggest to the Members what has already been said here, that the Senate, by a vote of 81 to 0, on Friday took the similar position to the position of our subcommittee. I would hope that the House would see the wisdom of following this approach so that we can go to conference with a good bill, good because the Armed Services Committee has made it good, and a little better, perhaps, because of the targeting that we would like to see done in the bill.

Mr. SKELTON. Mr. Chairman, will

the gentleman yield?

Mr. EDWARDS of Alabama. I yield to the gentleman from Missouri.

Mr. SKELTON. I think we should be fair in what we are saying, that the Senate vote that was 81 to 0 was not a vote on an "either/or" situation. That was the only ball game in town. The position before them, the one which the gentleman advocates, was the only position that any Senator could vote for, and being the only pay increase on which they could vote, they voted unanimously in favor of. However, I understand that during the debate a number of them did point out that it would be preferable to have the position that the House Armed Services Committee takes, the position which I advocate.

I thank the gentleman very much

for yielding.

Mr. EDWARDS of Alabama. I would say to the gentleman that if we lose on our position, I will gladly support the House Armed Services Committee. Again, I reiterate that the gentleman has done a magnificent job in moving down the road in a way that I think we should go

Mr. SKELTON. I appreciate that. And I may add just one other thing. I appreciate the gentleman's frankness and candor and his willingness to support us should we win, which, hopeful-

ly, we will.

I think Secretary Weinberger is correct. We should look at it next year. This year the soldier, the sailor, who is really the hub of the entire armed services, not the specialist, is the one that is expected to be brought up to standards with his counterparts in the civilian sector.

Mr. EDWARDS of Alabama. I thank the gentleman for his contribution.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Alabama. I yield to the gentleman from Washington.

Mr. DICKS. I want to commend the gentleman from Alabama for his usual outstanding statement on this issue.

I would only make one comment for my friend, the gentleman from Missouri, and that is that the Chief of Staff of the Army, General "Shy" Meyer, who has more at stake here than anyone else, has come down solidly in favor of a targeted pay increase as the kind of tool that will help him deal with the principal problem that the Army faces, and that is the retention of those terribly important NCO's.

I think the pay increase that will be given to the early enlistees is adequate, but I think targeting the NCO's, where the real problem is in retention, is the correct approach. I think General Meyer and I think every witness that we have asked before our subcommittee who is directly involved in the management of the armed services on the Joint Chiefs has come down in favor of this kind of a targeted approach.

I just want to also point out to my friend, the gentleman from Missouri, that we heard the same thing last year from Secretary Brown, the same thing from Secretary Weinberger. "Oh, we are going to get to it later." It is like the 5-year shipbuilding program. All of the ships are in the out years. I think it is time for us to act decisively and deal with this problem. We applaud the Armed Services Committee for its willingness to address this issue. I think we can go one step further and make this bill much more solid in its approach.

Mr. SKELTON. Mr. Chairman, will the gentleman yield so that I can re-

spond to that?

Mr. EDWARDS of Alabama. I yield to the gentleman from Missouri.

Mr. SKELTON. I would like to point out that it does us little good to retain those certain specialists if the foot soldier, who is really the hub of the Army, if the petty officer, who keeps the ships going, and the airmen, who keep the airplanes in the air, are not retained. These are the ones who would benefit under the House Armed Services Committee plan.

So I think next year is the time to look at it. This year let us take care of the foot soldiers, the sailors, and the airmen, who are really the hub, and keep the whole movement going.

Mr. EDWARDS of Alabama. Let me just respond to the gentleman and suggest that it is not just the technician that we are trying to target. It is the senior foot soldier, it is the leader of the troops in the field; it is the fellow who has been digging it out in the trenches for 10 or 12 years and finally gets to wondering what the heck it is all worth. And he is the fellow, just as well as the technician, that we are trying to target, because all of these NCO's have a vital part in the development of a proper military, all of those petty officers have a part in taking those ships to sea. And we see ships tied up at the docks because there are not enough people to take that ship out. That begins to worry all of us, I am sure, not just our subcommittee.

So it is all of the NCO level, as they move into the upper grades, that we are trying to target to keep them, because they are all vital. It is not just your airplane mechanic or your tank mechanic. It is just as well your foot soldier or the leaders of your foot soldiers. You cannot train very many recruits to be foot soldiers if you do not have good leaders in the NCO ranks in there to do the training.

Mr. MITCHELL of New York. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Alabama. I yield to the gentleman from New York.

Mr. MITCHELL of New York. The gentleman from Washington mentioned that General Meyer was supportive of that bill. He is the only military leader that I know who is a supporter of the Senate version of the pay increase bill. Along with the administration and Secretary of Defense Weinberger, we have General Osway, who is the Chief of Air Force Personnel, Admiral Hayward, who is the

Chief of Naval Operations, and we have every military association that has been living with this problem for years and years. We have the Fleet Reserve, the Air Force Sergeants Association, the National Association of Uniformed Services. I know we do not want to get into the debate today, but I just want to tell the gentleman that General Meyer, the individual, offered as an expert in the field, is the only person I know who is supportive of this, the only military leader I know of who is supportive of it.

Mr. EDWARDS of Alabama. I guess it would be fair to say that he may have the biggest problem of all of

them, too.

Well, we will debate this more tomorrow, and I do not care to pursue it further today. Mr. Chairman, I yield back the balance of my time.

Mr. NICHOLS. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri (Mr. Skelton), a member of

our committee.

Mr. SKELTON. Mr. Chairman, I wish to again reiterate the importance of the 14-percent pay raise that I think we should give to the military. No. 1, it has been expected. No. 2, it would actually help in retention. These are areas that must be seriously considered, and I truly hope that when we vote on this most important issue tomorrow, the Members will keep that fact in mind.

Mr. Chairman, in addition to the pay raise and increase in bonus authorities, H.R. 3380 includes a number of changes in travel and transportation entitlements. These items are limited in terms of both the cost and the number of personnel affected, but their impact on morale should be sub-

stantial.

Undoubtedly, one of the more troubling problems created by assignment overseas is the difficulty in securing transportation back home in the event of a family emergency. Currently, the individual must use Government transportation, no matter what the difficulties involved, or foot the bill himself.

H.R. 3380 would authorize roundtrip transportation for service members and dependents stationed overseas for emergency leave in case of death, imminent death, or serious illness of a close relative, or in the event of a natural disaster affecting the member's property. Such travel would be approved only if Government transportation were unavailable within a reasonable time frame and only to the port of entry into the United States. Additionally, the bill would make it possible for a service member on temporary duty assignment to travel to his permanent duty station or to a location no farther away than his permanent duty station in the event of the serious illness, injury, or death of a dependent.

When personal tragedy strikes, we must act quickly. The added flexibility provided by these new emergency leave travel entitlements could well prove critical to the individuals involved. They are limited, but the impact should not be underestimated. We are sending an important signal to the troops that we care about their welfare.

That is precisely what H.R. 3380 would do—it would send a signal to the troops that the Congress cares. This measure, as reported by the Armed Services Committee, is an important step forward in assuring that military pay keeps pace. We must be able to retain not only the senior skilled technicians, but we must have an entry-level salary that will attract recruits capable of meeting the higher quality standards that we in Congress have mandated. I urge favorable action by the House on this legislative initiative.

Mr. MITCHELL of New York. Mr. Chairman, I yield 5 minutes to the gentleman fom South Carolina (Mr. HARTNETT).

Mr. HARTNETT. Mr. Chairman, military service is by its very nature hazardous, particularly in wartime when any serviceman, regardless of peacetime assignment, may wind up in combat or combat-support role. During peacetime as well, there are a number of demanding jobs, essential to the mission, that place the service member in personal danger. Although money can never adequately compensate the individual for placing his life in peril, special pay is authorized for military personnel who serve in a variety of hazardous occupations. Hazardous duty incentive pay assists in attracting individuals to these occupational specialties: it also indicates to the individuals involved that their special sacrifices do not go unappreciated.

The current rate of hazardous duty incentive pay is \$55 monthly for enlisted personnel and \$110 for officers. Present law identifies a variety of specific types of duty for which hazardous duty incentive pay is authorized, for example, flying, parachute jumping, service involving intimate contact with persons with leprosy, work involving demolition of explosives, work inside high- and low-pressure chambers, service involving participation in acceleration or deceleration or thermal stress experiments, and carrier deck operations.

When experience indicates the need for special pay for additional types of duty, legislative action is required. As Members are well aware, this can frequently be a time consuming and cumbersome process, with needless delays. It often requires a tragedy or near tragedy to call attention to the particular problem area. For example, we were stunned and saddened by the recent death of an Air Force fuel han-

dler at the Titan II missile site in Arkansas. Despite the obvious rigors of the job, he was not eligible for hazardous duty incentive pay at the time of the accident. Ironically, civilians who were performing the same function were receiving additional compensation for the hazardous nature of the assignment. The effect on morale of this type of discrepancy is obvious.

H.R. 3380 is designed to provide greater flexibility in designating categories of hazardous duty pay. Rather than requiring legislation for each new proposal, the Secretary of Defense would be given the authority to determine additional categories of hazardous duty incentive pay. It is the committee's intention that this authority be exercised judiciously through a periodic service Secretary review and that it be consistent among the uniformed services. The committee further intends that this authority be used only in the most compelling circumstances.

H.R. 3380 would insure more equitable treatment of those who face imminent danger on a frequent basis and will have a positive effect on morale. This legislation is also an important step toward insuring all military personnel, regardless of rank or job designation, that they will receive a fair wage in return for their services. I urge favorable consideration of the bill as reported by the Committee on Armed Services.

□ 1330

Mrs. HOLT. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentlewoman from Maryland.

Mrs. HOLT. I thank the gentleman for yielding.

I want to thank the gentleman and commend him on his statement and urge the House to adopt H.R. 3380.

Mr. Chairman, witnesses appearing before the Armed Services Committee this year have stressed the substantial out-of-pocket expenses that many service members incur—and for which they are never reimbursed—in conjunction with permanent change of station orders.

Permanent change of station moves are made at the direction and for the convenience of the Governmentbased on military requirements. In theory, the Government pays all the costs involved. In practice, the individual is often reimbursed for only a fraction of the actual expenses. Understandably, this is an unanticipated financial burden that greatly irritates the service member and his or her family. This is particularly the case since a comparable civil service employee receives far more generous travel entitlements in conjunction with a transfer.

To help correct this situation, H.R. 3380 would authorize a temporary

lodging allowance to provide reimbursement for living expenses actually incurred by a service member and dependents while occupying temporary quarters in conjunction with a permanent change of station move. Service personnel currently receive travel and transportation allowances when in a travel status. Before departure from the old assignment or upon arrival at the new duty station, however, there are the costs of meals, lodging, and incidental expenses. No reimbursement is made for these expenses when incurred-although they are directly associated with permanent change of station orders.

The temporary lodging allowance envisioned in H.R. 3380 would be limited to 4 days and could not exceed the maximum per diem rates authorized for the area involved. The Armed Services Committee expects that the implementation of this provision will insure that reimbursement for dependents would be less than for the service member and, also, that total reimbursement for family would be subject to a daily ceiling.

While this improvement will not remove all the financial irritants connected with moves mandated by military orders, it is an important step forward toward greater equity and enhanced personnel satisfaction.

H.R. 3380, also, embodies a number of improvements in military pay and other entitlements including the final installments needed to close the gap between military and civilian pay. Additionally, while many of us would like to see an across-the-board pay raise this October, as provided by the Armed Services Committee, the President has the authority to reallocateor to use the latest word in vogue, target-up to 25 percent, if he feels conditions prior to October 1 so dictate. This discretionary authority is far better than locking in the pay table as proposed by the Appropriations Committee—at pay rates totally inadequate for junior enlisted personnel.

I urge the House to adopt the recommendations of the Armed Services Committee as contained in H.R. 3380.

Mr. HARTNETT. I thank the gentlewoman for her consideration, and I yield back the balance of my time.

Mr. NICHOLS. Mr. Chairman, I yield such time as he may consume to the gentleman from Mississippi (Mr. Montgomery), a distinguished member of our committee.

Mr. MONTGOMERY. Mr. Chairman, I would also like to thank the chairman of the subcommittee, the gentleman from Alabama, and also the gentleman from New York for the great work they have done on H.R. 3380. It is indeed a pleasure to serve with them on the Personnel and Compensation Subcommittee.

I rise in strong support of this bill that was reported out of the Committee on Armed Services by an almost unanimous vote of 36 to 1.

Let me make several points, Mr. Chairman, pertaining to this across-the-board pay raise for our military personnel.

My first point would be, and it has been pointed out here today, that the President, the Commander in Chief of our Armed Forces, has the discretion under current law to give authority to the individual military Secretaries to target 25 percent of the pay for our military personnel; 25 percent of this can be targeted to special groups if the different Secretaries would like to do this

So, I think it would be much better, as the chairman, the gentleman from Alabama, said, to let the different Secretaries determine the targeting rather than the Congress making this decision.

Certainly our military and civilian leaders are in a much better position than we to know who should receive this special pay.

Another point I would like to make, Mr. Chairman, is the matter of fairness and equity. We have reported out of the House Veterans' Affairs Committee legislation to establish a GI education program for the 1980's. The bill is now pending before the House Committee on Armed Services.

We sent Members of Congress and staff out into the field to see what would be needed to attract young men and women into the services and to keep them in the service and they like the GI education bill.

In our bill, however, we said let us target this educational bill to certain skills in the military. When we went out into the field we found some objections to this. As an example, we went to a communication platoon. We talked to the actual switchboard operators and the committee was leaning to targeting benefits for these switchboard operators. They needed more education and more skill. Then we talked to the individual soldier who would lay his life on the line in combat and he said, "Why are you discriminating against me? His job is not as dangerous as mine, and we do not think it is fair."

My point today, Mr. Chairman, is we are going to create some discrimination and some unfairness if we in Congress try to target who would get these pay raises.

An across-the-board increase with any targeting left to the discretion of the Department of Defense makes a lot of sense to me and that is why our committee reported the bill out in this form.

Let me close, Mr. Chairman, by saying quite frankly—I have said this before on the House floor—I think eventually we are going to have to go back to some type of limited draft. I know this administration would not support any form of draft and I doubt very seriously if this Congress would vote for a draft or limited draft.

We are getting some good men and women into the services, but we also are getting a lot of young men and women who cannot adjust. We bring them into the services and we have to discharge them. Thirty percent of those who come into the services have to be discharged before they complete their 3-year enlistment.

Since we are not going to return to any form of Selective Service System draft we must make the all-volunteer military system work. I think the across-the-board pay raise we have before us today is the best way and I think we should give it our strong support.

Mr. NICHOLS. Mr. Chairman, I yield 2 minutes to the gentleman from Maryland (Mr. Dyson), a member of the committee.

Mr. DYSON. Mr. Chairman, I rise in support of the committee's position and the position taken by the chairman of the Subcommittee on Personnel and Compensation, the gentleman from Alabama (Mr. Nichols), a good friend of us all.

I think one of the things that has probably been most important, at least to me as a new member of the Committee on Armed Services in the short time I have been on the committee, in this whole discussion of increased defense spending, is the manpower problem that the armed services are facing today.

One of the things that is most apparent to me is that members of our armed services—and I represent a good number of them in the First Congressional District—have a feeling there is a credibility gap between those of us here in the Congress and those who have served our country and are serving our country today.

I think it is absolutely essential that we do support the committee, including the full comparability increase, the 14.3-percent pay increase, for those members of our armed services. I say that because it does not make much difference what kind of military hardware we buy and we support, whether it is the MX or the B-1 bomber, if we do not have the capable people to operate those systems, and we are not going to have them if we do not give them the encouragement to enter and to stay in the services.

I think the 14.3 percent is the way to do that.

I also think other problems that the committee is addressing, such as housing, must also do that.

Again I rise in support of the committee's position on that and urge a favorable vote tomorrow in the House.

• Mr. BEARD. Mr. Chairman, I rise today in support of this bill, which would give our military personnel a much-needed raise. It is unconscionable that over the past several years military pay has fallen so far behind inflation that many military enlisted people find it necessary to go on food stamps to feed their families.

Our military people have no union officials or well-paid lobbyists to represent them in the budget process. They depend solely on us-the Members of this body—to see that they are paid an adequate wage. Nobody goes into the military to get rich, but neither should military people have to moonlight at civilian jobs just to be able to afford clothes for their family. Yet, that is the situation for far too many members of our military, because over the past several years, the leadership of this country-both in the executive and legislative branches-has failed in its duty to adequately provide for the basic needs of our military personnel. So, I support this bill not because it cures all the financial problems of military people, but because it is a step in the right direction, a step long overdue I might add.

Yet we should not delude ourselves into thinking that merely by increasing pay we can solve the serious manpower problems of the all-volunteer force. One of the most morale-damaging problems present in today's military is the lack of adequate medical care. This is a question not only of a shortage of doctors but a lack of adequate facilities. It is my belief that due to the very attractive salaries available to doctors in the civilian sector, pay for military doctors will never be able to be high enough to attract an adequate number. We are going to have to look at other ways to adequately fill our military medical ranks.

It is true that higher pay—if it is high enough—may slow the hemorrhage from our military of skilled NCO's and officers, the backbone of any effective military force. But I doubt seriously that simply raising pay will do anything to attract a more representative number of recruits. Our junior enlisted ranks today are comprised overwhelmingly of those from the lower educated scale of our society. Many do not have the skill or ability to be able to operate and maintain the sophisticated weaponry of today's military.

Look at the following statistics: The Armed Forces classify recruits into four categories of intellectual ability based on exam scores; category IV is the lowest. In 1979, nearly half of all Army recruits were category IV's.

If one thinks these test scores are irrelevant, look at scores on the skills qualifications tests, which directly measure a soldier's ability to do the job he will have to do in wartime. The failure rates are shocking. For exam-

ple, in 1979 only 18 percent of artillery target-spotters could pass their SQT's, only 28 percent of ammunition specialists, and only 15 percent of helicopter repairmen. While these results are only a sample, they are representative. I do not believe that simply raising pay will solve this problem.

Nor will raising pay do much to alleviate the appalling state of our Reserve Forces. Under the total force concept, the reserves are essential to success in any extended conflict. Yet, today the Active Reserves are at only 85 percent of needed strength, and the individual Ready Reserve is over 700,000 men short of wartime requirements. I question whether higher pay will do much at all to increase the readiness of our reserves.

Mr. Chairman, we must also consider that over 60 percent of our military budget now goes for compensation. I support this pay raise bill, but we in this country are going to have to start asking some hard questions soon about the direction we are going with this all-volunteer military. I think that those who believe that higher pay will be a cure-all are simply not taking a realistic outlook.

I intend to ask permission to insert in the RECORD today a copy of an article of mine entitled "The All-Volunteer Force: It Isn't Working," which elaborates on some of the problems I have mentioned. Thank you, Mr. Chairman.

• Mr. GLICKMAN. Mr. Chairman, I rise in strong support of H.R. 3380, the Armed Forces Pay Act of 1981. This legislation more than any other focuses on the most critical need of our defense program: The ability to recruit and retain qualified, dedicated military personnel.

As the report by the Armed Services Committee points out, we have fallen behind in terms of pay comparability for our military personnel, and, if we are serious about making the All-Volunteer Force work, we are going to have to bring compensation into line with what these hard working, skilled employees can earn in the private sector. Otherwise, the fact is that our armed services will not be the best possible.

And all of the money in the world poured into sophisticated weapons systems will not assure us a strong defense if the people we put in charge of them are not able to maximize the capabilities of those weapons. And if we are not paying our military personnel enough to keep them in the military, the expensive training which we provide them will end up being pointless. If the Defense Department trains personnel but cannot keep them because pay is better elsewhere, what we are doing is operating a highly technical, very expensive jobs training program, an engineer's CETA if you will. The

only way I see to make sure that does not happen is to adjust salaries as this bill proposes.

Before I close, I do want to bring to my colleagues' attention one specific provision of this bill which is particularly important to maintaining our Titan II missile systems safely and to military personnel throughout the armed services who are involved in especially hazardous work. Section 4 of the bill would authorize special pay for personnel involved in particularly hazardous activities or who work under unusually severe working conditions. The Secretaries of each of the various services would have the discretion to allow the special pay for specific jobs. I introduced legislation to authorize this special pay as H.R. 899, and Senator PRYOR of Arkansas has introduced a companion measure in the Senate. We did so in light of recommendations from the Air Force in the aftermath of recent accidents at

Titan facilities in my home State of Kansas and in neighboring Arkansas. By providing this kind of hazardous duty pay at the discretion of the Secretary, there will be more incentive for personnel involved in sensitive work at these facilities—such as handling the highly toxic propellants and fuels-to stay on the job rather than leaving for more lucrative work elsewhere. Retention rates in the Titan fuel handling job classification has been low, and that means that experience levels are not up to what they should be. And lack of experience raises the risk of accident, and, as recent incidents have shown, when the Titans are involved, the risk extends not only to employees on site but also to the public in surrounding areas.

Again, this bill certainly merits the support of the entire House, and I trust it will be enacted at an early date.

Mr. ADDABBO. Mr. Chairman, I include the following amendment which will be offered during the 5-minute rule tomorrow:

SUBSTITUTE AMENDMENT OFFERED BY THE COMMITTEE ON APPROPRIATIONS

On page 2, beginning on line 6 through line 11 on page 3, delete all of section 2, and insert in lieu thereof a revised section 2, as follows

PAY INCREASE FOR MEMBERS OF THE UNIFORMED SERVICES

Sec. 2. (a) Any adjustment required under the provisions of section 1009 of title 37. United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective.

(b) Effective with the first pay period after September 30, 1981, the monthly basic pay for members of the uniformed services within each pay grade, based on years of service computed under section 205 of title 37, United States Code, shall be as follows:

COMMISSIONED OFFICERS 1

Pay grade	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26	Over 30

1 While serving as Sergeant Major of the Army, Master Chief Petty Officer of the Navy or Coast Guard, Chief Master Sergeant of the Air Force, or Sergeant Major of the Marine Corps, basic pay for this grade is \$2,633.10 regardless of cumulative years of service computed under sec. 205 of title 37 of the United States Code.

(c) If the President determines such action to be in the national interest, effective with the first pay period after September 30, 1981, he may decrease by not more than 2 percent the amount of basic pay es-

tablished in subsection (b) for any pay grade based on years of service and he may apply the amounts derived from any such decreases to increase by not more than 2 percent the amount of basic pay established

in subsection (b) for any pay grade based on years of service.

(d) the basic allowance for subsistence authorized enlisted members and officers by

section 402 of title 37, United States Code, shall be as follows:

.... \$94.39 per month "Officers "Enlisted members \$4.50 per day when on leave or authorized to mess separately. 'When rations \$5.09 per day kind are not available. assigned to When \$6.73 per day"; duty under emer-gency conditions where no messing facilities United States are available.

and

(e) the basic allowances for quarters authorized members of the uniformed services by section 403(a) of title 37, United States Code, shall be as follows:

Mr. NICHOLS. Mr. Chairman, I have no further requests for time on this side, and I yield back the balance of my time

Mr. MITCHELL of New York. Mr. Chairman, I have no further requests for time, and I yield back the balance

of my time.

Mr. DICKS. Mr. Chairman, I would point out before I yield back the balance of my time that CBO has done a study that says, if we do business as usual, we will lose an additional 4,000 NCO's this year. They also state that if we went to a targeted pay increase, we would retain 4,000 additional NCO's in this year.

I think that is the kind of approach that will produce the most results and that is why we are advocating it from the Appropriations Committee.

Mr. MITCHELL of New York. Mr. SPECIAL PAY FOR UNUSUALLY HAZARDOUS DUTY Chairman, will the gentleman yield?

Mr. DICKS. I yield to the gentleman from New York.

Mr. MITCHELL of New York, CBO also has another study which says, once you establish comparability, which our bill intends to do, then the problem through the eighties is recruitment, not retention. If the gentleman would be interested in that.

Mr. DICKS. There is no question about it. Recruitment is going to be an ongoing problem. That is where the whole difficulty about it is, the efficacy of the All-Volunteer Force with fewer people.

The CHAIRMAN. The Clerk will

read.

The Clerk read as follows:

H.R. 3380

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Armed Forces Pay Act of 1981".

PAY INCREASE OF 14.3 PER CENTUM FOR MEMBERS OF THE UNIFORMED SERVICES

SEC. 2. (a) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective

(b)(1) Subject to the provisions of paragraph (2), each element of compensation specified in section 1009(a) of title 37, United States Code, shall be increased for members of the uniformed services by 14.3 per centum effective with the first pay period beginning after September 30, 1981.

(2) The President may allocate the percentage increase specified under paragraph (1) in the same manner and to the same extent the President is authorized under subsections (c) and (d) of section 1009 of title 37, United States Code, to allocate any percentage increase described in subsection (b)(3) of section 1009 of such title, except that the provisions of subsection (d)(2)(B) of such section shall not apply to this subsection or any action of the President under this subsection.

REENLISTMENT AND ENLISTMENT BONUSES

SEC. 3. (a) Section 308(e) of title 37. United States Code, is amended to read as follows:

(e) Any unserved period of an enlistment (including any extension of enlistment) for which no bonus has been paid or for which no bonus is otherwise payable under this section may, under regulations prescribed by the Secretary concerned, be considered part of an immediately subsequent term of reenlistment (or as part of an immediately subsequent voluntary extension of an enlistment) for the purpose of determining the eligibility of the member for a bonus under this section and for the purpose of computing the amount of such bonus.

(b) Section 308a of such title is amended-(1) by striking out "for a period of at least

four years"

(2) by striking out "to a total of at least

four years"; and
(3) by striking out "\$5,000" and inserting in lieu thereof "\$10,000".

OR DUTY PERFORMED UNDER UNUSUALLY SEVERE WORKING CONDITIONS

SEC. 4. (a) Chapter 5 of title 37, United States Code, is amended by adding at the end thereof the following new section:

"§ 315. Special pay: unusually hazardous duty or duty performed under unusually severe working conditions

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay may be paid special pay, in the amount set forth in subsection (b) of this section, for any month during which the member performs duties that have been determined by the Secretary concerned to be-

"(1) unusually hazardous; or

"(2) performed under unusually severe working conditions.

"(b) Special pay payable under subsection (a) of this section shall be paid at the rate of \$110 per month, in the case of an officer, and at the rate of \$55 per month, in the case of an enlisted member.

'(c)(1) A member may not be paid more than one payment of special pay under this

section for any month.

"(2) A member may not be paid special pay under this section for any period of service for which that member receives special or incentive pay under section 301, 301a. 301c, or 304 of this title.

"(d) In time of war, the President may suspend the payment of special pay under

this section.

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"315. Special pay: unusually hazardous duty or duty performed under unusually severe working conditions.".

DUTY REQUIRING AN ENGINEERING OR SCIENTIFIC SKILL DESIGNATED AS CRITICAL

SEC. 5. (a) Chapter 5 of title 37, United States Code, is amended by adding after section 315 (as added by section 4) the following new section:

"§ 316. Special pay: engineering and scientific career accession bonus and continuation pay

"(a) In this section, the term 'engineering or scientific duty' means service performed by an officer holding a degree in engineering or science from an accredited college or university that requires a skill designated under regulations prescribed by the President as critical and that requires an engineering or science degree.

"(b) Under regulations prescribed by the President, an officer of an armed force

"(1) is entitled to basic pay;

"(2) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific duty: and

"(3) executes a written agreement to serve on active duty for detail to engineering or scientific duties for a period of at least four

may be paid, in addition to all other compensation to which the officer is entitled, a bonus in an amount not to exceed \$15,000. The bonus may be paid in a lump sum or in equal periodic installments, as determined by the Secretary concerned.

"(c) Under regulations prescribed by the President, an officer of an armed force

"(1) is entitled to basic pay;

"(2) is below the pay grade of O-7;
"(3) has been certified by the Secretary concerned as having the technical qualifications for detail to engineering or scientific

"(4) has completed at least three but less than nineteen years of engineering or scien-

fic duty as an officer;
"(5) is not serving a period of obligated service under subsection (b) of this section;

"(6) executes a written agreement to remain on active duty for detail to engineering or scientific duty for at least one year, but no more than four years, of active serv-

may, upon acceptance of the written agreement by the Secretary concerned, be paid, in addition to all other compensation to which the officer is entitled, an amount not to exceed \$3,000 multiplied by the number of years, or monthly fraction thereof, of obligated service to which the officer agrees under the agreement. The total amount payable may be paid in a lump sum or in equal periodic installments as determined

by the Secretary concerned.

'(d)(1) An officer who does not serve on active duty for the entire period for which he has been paid under subsection (b) or (c) of this section shall refund that percentage of the payment that the unserved part of the period is of the total period for which the payment was made. Nothing in this subsection shall alter or modify the obligation of a regular officer to perform active service at the pleasure of the President. Completion by a regular officer of the total period of obligated service specified in an agreement under subsection (b) or (c) of this section does not obligate the President to accept a resignation submitted by that offi-

"(2) Subject to paragraph (3) of this subsection, an obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt

owed to the United States.

"(3) The Secretary concerned may waive, in whole or in part, a refund required under paragraph (1) of this subsection if the Secretary concerned determines that recovery would be against equity and good conscience or would be contrary to the best interests of the United States.

(4) A discharge in bankruptcy under title 11 that is entered less than five years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981."

"(b) The table of sections at the beginning of such chapter is amended by adding at the

end thereof the following new item: "316. Special: engineering and scientific career accession bonus and continu-

TEMPORARY LODGING EXPENSES

ation pay.".

SEC. 6. (a)(1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

"§ 404a. Travel and transportation allowances: temporary lodging expenses.

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is ordered to make a change of permanent station to another station in the United States may be paid or re-imbursed for subsistence expenses actually incurred by the member and the member's

dependents during a period not exceeding four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are lo-

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 404 the following new item:

"404a. Travel and transportation allowances: temporary lodging expenses."

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF CERTAIN TRAVEL AND TRANSPORTATION ALLOWANCES

7. (a) Section 405a(a) of title 37. United States Code, is amended by inserting after the second sentence in that section the following new sentence: "Such allowances may be paid in advance."

(b) Section 406(a) of such title is amended by adding at the end thereof the following new sentence: "Travel and transportation allowances authorized by this section may

be paid in advance."

(c) Section 407(a) of such title is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVERSEAS

SEC. 8. Section 411b(a) of title 37, United States Code, is amended-

(1) by inserting "(1)" after "(a)"; (2) by inserting "who is ordered to a consecutive tour of duty at the same duty station or" after "District of Columbia"; and

(3) by adding at the end thereof the fol-

lowing new paragraph:

"(2) If, because of military necessity, a member authorized travel and transportation allowances under this subsection is denied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.'

TRAVEL FROM ISOLATED DUTY STATIONS AND TRAVEL INCIDENT TO EMERGENCY LEAVE

SEC. 9. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

"§ 411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service, while serving at a duty station abroad in an area specifically designated by the Secretary concerned for purposes of this section, may be paid transpor-

"(1) to another location abroad having different social, climatic, or environmental conditions than those at the duty station at which the member is serving; or

'(2) to a location in the United States.

"(b) The transportation authorized by this section is limited to payment for transportation of the member, and of each de-pendent of the member authorized to reside at the member's duty station, for one roundtrip during any continuous two-year tour

and two roundtrips during any continuous three-year tour.

'§ 411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave

"(a) Under uniform regulations prescribed by the Secretaries concerned, roundtrip transportation for a member stationed overseas and for dependents of the member authorized to reside at the member's duty station may be provided from the member's duty station to the United States or its possessions incident to emergency leave granted for reasons of personal emergency (or, in the case of transportation provided only for a dependent, under circumstances involving a personal emergency similar to the circumstances for which emergency leave could be granted a member).

"(b) Transportation under this section may be authorized only upon a determination that, considering the nature of the emergency involved, Government transportation is not reasonably available. Transportation authorized under this section shall be limited to the cost of Government-procured commercial roundtrip air travel from the international airport nearest the location of the member and dependents at the time notification of the emergency is received or the international airport nearest the duty station of the member and dependents in the overseas area-

"(1) to the international airport within the continental United States closest to the overseas airport from which the member or dependents depart; or

"(2) as determined by the Secretary concerned, to an airport within the United States or its possessions convenient to the uniformed service involved.

"§ 411e. Travel and transportation allowances: travel performed in certain emergency situations

"Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station may be paid the travel and transportation allowances provided by section 404 of this title for travel performed from his place of temporary duty to his permanent duty station or to any other location, and return (if applicable), if such travel has been approved because of the serious illness or injury or the death of a dependent of the member. Travel and transportation to a location other than the permanent duty station of the member may not be paid under this section in excess of the amount for such travel and transportation to the member's permanent duty station, and return (if applicable).'

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allowances: transportation for members stationed abroad and dependents incident to emergency leave.

'411e. Travel and transportation allowances: travel performed in certain emergency situations.".

UNIFORM ALLOWANCES AND ADVANCED PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PRO-FESSIONS SCHOLARSHIP PROGRAM

SEC. 10. (a) Subsection (a) of section 415 of title 37, United States Code, is amended—

(1) by striking out "or" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof ": or" and

(3) by adding at the end thereof the following new paragraph:

"(4) upon reporting for the first period of active duty required by section 2121(c) of title 10, United States Code, as a member of the Armed Forces Health Professions Scholarship Program."

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship Program upon reporting for a period of active duty required by section 2121(c) of title 10.".

EFFECTIVE DATES

SEC. 11. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on October 1, 1981.

(b) The amendments made by section 6 shall take effect on April 1, 1982.

Mr. NICHOLS (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. NICHOLS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Bingham, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3380) to increase the pay and allowances of members of the Armed Forces, had come to no resolution thereon.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON HOUSE JOINT RESOLUTION 325, CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1982

Mr. DICKS. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on the joint resolution (H.J. Res. 325) making continuing appropriations for fiscal year 1982 for a 1-month period.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

□ 1345

YOUTH CONSERVATION COUNCIL

The SPEAKER. Under a previous order of the House, the gentleman from Alabama (Mr. Edwards) is recognized for 5 minutes.

• Mr. EDWARDS of Alabama. Mr. Speaker, the Mobile County, Ala., Soil and Water Conservation District is celebrating its first anniversary this month of a commendable program aimed at encouraging local youth to show appreciation for and help preserve the resources of nature through various projects of their choosing. The basic theme of this program is to use the resources of area youth to help save the resources of nature. This new program focuses on those local environmental problems that can be solved through the efforts of citizens who care, Boy Scouts and Girl Scouts, and with little or no funding. The Mobile area Boy Scouts and Girl Scouts will participate in identifying and correcting problems within a wide range of conservation projects and will also work to involve other youth groups in these projects.

The amazing thing is that so many groups have joined in to make this project so successful, groups such as the Alabama Forestry Commission, Mobile Bay Audubon Society, Mobile County Public School System, and many others. I was so impressed that I thought others should know about it. I think this is an ideal project for young people across the Nation.

The program involves a lot of elbow grease and public spirit and I wish, through these means, to commend all those involved in this program, for the work they are doing in bringing all these elements together in a program that shows great potential.

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER. Under a previous order of the House, the gentleman from North Carolina (Mr. Neal) is recognized for 5 minutes.

• Mr. NEAL. Mr. Speaker, I am notifying the House today of a U.S. Export-Import Bank proposal to guarantee another \$10 million in private loans to four Spanish electric utilities to make possible the sale of U.S. goods and services to complete the ASCO II nuclear powerplant on the Ebro River in the Province of Tarragona.

The Eximbank has previously committed \$66.5 million in direct loans and \$65.4 million in guarantees to help finance this project. The additional financing is needed to cover cost increases on U.S. supplies and services for the powerplant.

This Eximbank financing notification was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, requires that the Eximbank notify Congress of proposed loans or guarantees involving the export of nuclear technology or equipment. Unless Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I am submitting for the RECORD the Eximbank notification, which provides the details and terms of the proposed financial guarantees and a description of the ASCO II nuclear plant. I would welcome any comments or questions my colleagues might have on this financing proposal.

The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 26, 1981.
Hon. Stephen L. Neal.

Chairman, Subcommittee on International Trade, Investment and Monetary Policy, House Banking Committee, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

Nancy S. Pigman, Congressional Relations Officer.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 26, 1981.
Hon. Thomas P. O'Neill, Jr.,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States House of Representatives with respect to the following transaction involving U.S. exports to Spain.

A. DESCRIPTION OF TRANSACTION 1. BACKGROUND AND PURPOSE

In April, 1973, Eximbank authorized financial support in the form of a direct loan of \$49,033,800, a guarantee of private bank loans of \$49,033,800 and a local cost guarantee of loans of \$16,344,600 to four Spanish electric utilities-Fuerzas Electricas de Cataluna, S.A. (FECSA), Empresa Nacional Hidroelectrica del Ribagorzana. S.A. (ENHER), Hidroerlectrica de Cataluna, S.A. (HEC) and Hidroelectrica del Segre, S.A. (SEGRE) (Borrowers) for the ASCO II nuclear power plant, located on the Ebro River in the Province of Tarragona, 135 KM West of Barcelona. This plant is the companion plant to the contiguous ASCO I nuclear plant. In January, 1978, Eximbank authorized an additional direct loan of \$17,470,050 to support an additional \$20,553,000 of U.S. exports for the ASCO II project.

The Borrowers have now requested, and Eximbank is prepared to provide, additional support in the form of a financial guarantee of private loans of \$10,114,000 for the ASCO

II nuclear power plant. The Borrowers require this additional financing for cost increases principally involving an increased U.S. scope of supply covering new equipment, equipment modification and additional engineering services. This increased U.S. scope of supply largely reflects the desire of the Spanish nuclear regulatory authority and the project participants to be fully responsive to the lessons learned from the Three Mile Island accident. In addition, a lesser portion of the project cost increases have resulted from low labor productivity in Spain, which has caused schedule extensions and increased U.S. costs for fuel storage, erection supervision and other engineering services. Eximbank considers the reasons for and the amount of the increased U.S. costs to be reasonable and necessary to complete construction of this project.

2. IDENTITY OF THE PARTIES

FECSA, a privately-owned company established in 1951 and headquartered in Barcelona, is Spain's third largest electric utility. It participates in the ownership of and financing for the project to the extent of 40 percent.

ENHER, incorporated in 1946, is a "national enterprise" corporation controlled by Instituto Nacional de Industria, an autonomous agency of the Spanish State established in 1941 to promote the establishment and reorganization of industrial enterprises important to the economic development of Spain. ENHER is the sixth largest electric utility enterprise in Spain and is a 40 percent participant in ASCO II.

HEC was incorporated in 1946 and is the twelfth largest electric utility in Spain. It is privately owned and is a 15 percent participant in the project.

SEGRE, a closely-held private company, is the twenty-first largest electric utility in Spain and is a 5 percent participant in ASCO II.

3. NATURE AND USE OF GOODS AND SERVICES

The principal goods and services to be exported from the United States in connection with the increased U.S. costs are new equipment, equipment modifications and additional engineering services to be provided by the Westinghouse Corporation, the Bechtel Corporation and other U.S. suppliers. In addition, schedule delays have resulted in increased costs of previously contracted erection supervision and other engineering services and in U.S. fuel storage charges imposed by the U.S. Department of Energy.

4. SAFETY AND SAFEGUARD ASPECTS

Exports of the nuclear equipment and services will be made within the framework of two agreements: (1) the bilateral "Agreement on Atomic Energy: Cooperation for Civil Uses" between the United States and

Spain of August 16, 1957, as amended, and (2) the trilateral agreement "Atomic Energy: Application of Safeguards by the IAEA to the United States-Spain Cooperation Agreement" among the United States, Spain and the International Atomic Energy Agency on December 9, 1966, as amended. In addition, prior to export of the equipment and fuel, licenses must be obtained from the Nuclear Regulatory Commission.

5. EXECUTIVE BRANCH APPROVAL

In accordance with established procedures, Eximbank requested through the Department of State the views of the Executive Branch on the proposed transaction. The Department of State has advised that the Executive Branch has no objection to Eximbank's proceeding with this transaction.

B. EXPLANATION OF ADDITIONAL EXIMBANK FINANCING

1. REASONS

The Eximbank guarantee of \$10,114,000 will facilitate the export of \$15,560,000 of U.S. goods and services. The additional costs for which the Borrowers are requesting financing are attributable to an increased U.S. scope of supply covering new equipment, equipment modifications and additional engineering services reflecting the desire of the Spanish nuclear regulatory authority and the project participants to be fully responsive to the lessons learned from the Three Mile Island accident, Also, some additional costs are being incurred for escalation of U.S. fuel storage charges and costs of erection supervision and other engineering services caused by project construction schedule delays. For these reasons, Eximbank feels it is appropriate to provide its guarantee support for financing of these costs.

2. THE FINANCING PLAN

The additional costs of the United States goods and services are \$15,560,000, which will be financed as follows:

	Amount	Percent of U.S. costs
Cash payment	\$5,446,000 10,114,000	35 65
Total	15,560,000	100

(A) EXIMBANK CHARGES

A guarantee fee of 0.5 percent per annum on the undisbursed portion of the private loans guaranteed by Eximbank and a guarantee commitment fee of 0.125 percent per annum on the undisbursed portion of the private loans guaranteed by Eximbank will be charged. All fees are payable semiannual-

(B) REPAYMENT TERMS

Repayment by the Borrowers of the Eximbank-guaranteed private loans for the additional costs will be incorporated into the repayment schedule for the total Eximbank-supported financing for the ASCO II nuclear power project, which is as follows: (1) the portion allocated to the nuclear plant equipment costs will be repaid in 20 semiannual installments beginning June 18, 1985 (which is 6 months after the estimated start of commercial operations of the plant); and (ii) the portion allocated to the fuel fabrication and engineering services will be repaid in 6 semiannual installments beginning June 18, 1985.

Attached is additional information on Eximbank activity in and economic data on Spain.

Sincerely,

WILLIAM H. DRAPER III.

Attachment.

REAGAN JUSTICE?

The SPEAKER. Under a previous order of the House, the gentleman from Michigan (Mr. Crockett) is recognized for 5 minutes.

• Mr. CROCKETT. Mr. Speaker, on Thursday, the Washington Post carried a story entitled: "Justice Official's Memo on Yonkers Bias Suit Stirs Controversy," which described a memo circulated by a top-ranking official of the Reagan civil rights division at the Justice Department.

I have obtained the full text of this outrageous document, and submit it today for inclusion in the Congressional Record. I believe my colleagues, even those on the other side of the aisle, will be shocked by its tone, and outraged at its racist implications.

The memo, written by Robert J. D'Agostino, the designate for Deputy Assistant Attorney General, recom-mends that the Justice Department withdraw its participation in a landmark civil rights case involving school and housing discrimination in Yonkers, N.Y. The Justice Department had filed suit charging that the local school board, city officials and the local community development agency had discriminated against the city's population minority 32-percent through a pattern of school construction and closings, alteration of attendance lines, assignment of teachers, and selection of sites for subsidized housing in heavily minority areas. The Justice Department is apparently now reviewing this and two other cases to determine whether it will continue to prosecute them.

Mr. Speaker, the memo I place before my colleagues today is one of insensitivity, callousness, and racism. It is written by a man who, if confirmed, will hold a key position in the formulation of policy and procedures in the Department of Justice Civil Rights Division. Yet, by its content and by the use of racist "code words" such as "racial mixing" and "coerced residential integration", it offers evidence of an attitude against effective

affirmative action and civil rights enforcement.

Most abhorrent of Mr. D'Agostino's opinions are those expressed by the following:

(B)lacks were "improperly classified as emotionally disturbed." Why improperly? * * * Blacks, because of their family, cultural and economic background are more disruptive in the classroom on the average.

Mr. Speaker, I urge my colleagues to protest this affront to the credibility of our Government's commitment to civil rights.

The memo follows:

U.S. DEPARTMENT OF JUSTICE, Washington, D.C., July 21, 1981.

To: Wm. Bradford Reynolds, Assistant Attorney General-Designate, Civil Rights Division.

From: Robert J. D'Agostino, Deputy Assistant Attorney General-Designate, Civil Rights Division.

Subject: United States v. Yonkers Board of Education et al.

Yonkers is a most interesting case in that it represents both the end result of a mind set in the educational area and one of the opening shots in a new attempt to remake America through coerced residential integration.

Segregative intent is found in virtually every act taken by school authorities if that act did not lead to the ultimate good as defined by the Justice Department, racial mixing.

The letter of August 25, 1980, to the Superintendent of Schools of Yonkers summarizes the facts relied upon by Justice in bringing suit against the school system. Seven paragraphs deal with those facts.

Paragraph one deals with school construc-tion policies. Here Justice contends that schools that were built and opened with "greater than 50 percent minority enrollment" were intentionally racially segregated, presumably because there are now over 85 percent minority. I would say that a 50 percent or so minority school would be considered integrated if Yonkers proposed to open one now. The fact that two schools had "no significant number of minority students" until school closing in 1976 is evidence of segregative intent. I say it is just the opposite. Schools were closed in 1976 which resulted in formerly all-white schools becoming integrated. Other schools opened up virtually all-white or minority. Possibly, they were constructed where the students -neighborhood schools in urban areas were once considered very desirable.

Paragraph two alleges as proving segregative intent both the closing of schools which resulted in other schools being more identifiably of one race and the closings which resulted in intergrating schools. Perhaps the school board was treating schools as "just schools."

Paragraph three deals with assignment of faculty and administrators. Here the affirmative hiring practices of the school board are claimed to be proof of a violation of the Constitution, since the school board assigned a disproportionate number of newly hired blacks and Hispanics to minority schools—not all—just a disporportionate number.

Paragraph four states that blacks were "improperly classified as emotionally disturbed." Why improperly? And by what evidence does Justice presume to impose their views on who is or who is not emotionally disturbed (presumably disruptive in the classroom)? Evidently, Justice's position is that unless equal proportions of blacks and whites are classified as emotionally disturbed, the law violates the civil rights statutes or the Constitution. What hogwash. Blacks, because of their family, cultural and economic background are more disruptive in the classroom on the average. It seems that they would benefit from such programs.

Paragraph five dealing with counseling given to minority students claims a disproportionate number were steered to inferior vocational programs then to expanded general programs on the high school level. Disproportionate to their school achievement? Disproportionate to their needs? Creation of flexible or special programs to handle special needs of economically and socially disadvantaged children now becomes evidence of segregative intent.

Paragraph six deals with faculty and facilities. Insofar as there was unequal treatment of blacks and whites, a violation is present. However, the paragraph goes on to criticize the fact that the schools provided less in the way of academic curricula to blacks. Another logical reason for that is that fewer blacks were precollege. Certainly, that was true up until the last few years.

Paragraph seven deals with the failure to adopt a plan which the board had no obligation to adopt, but which would have, in the opinion of Justice, better mixed races, perhaps, by busing everyone somewhere else.

It is quite obvious from the list of alleged offenses that violated the Constitution and the Civil Rights Acts that the Yonkers School Board is in an impossible position. They were damned if they did and damned if they didn't.

In the housing area, Justice is demanding that Yonkers build 1100 units of low-income or subsidized housing regardless of the burdens in "non-minority impacted areas." dently, the power of the purse now resides ever more firmly in the federal courts as guided by Justice-an interesting gloss on self-government. What is the nature of Yonkers' violation? They were stupid enough or altruistic enough to voluntarily participate in programs to build low-cost and subsidized housing on sites approved by HUD in areas that housing was thought to be needed. The Justice position is, evidently, that the building of these housing units in areas of high minority concentration were constitutional violations requiring additional construction on Justice approved sites. Allegations of Title VIII violations are thrown in so as to have the benefit of the effects test. This case should be compared with the Manches-New Hampshire case where it is our contention that Manchester violated the Constitution by refusing to voluntarily participate in a low-cost or subsidized housing program after the town thought it might.

I believe that a thorough review of the Yonkers case is demanded by this Department. I see absolutely no reason to pursue this case in its present form. If it is the Reagan Administration's position to attempt to create law that will mandate the building of low-income housing projects when communities do not want such projects, then we should proceed, otherwise we should not.

The Yonkers review should be made in the context of a complete rethinking of our position in the housing cases including Manchester.

GRANVILLE CAYCE III

The SPEAKER. Under a previous order of the House, the gentleman from Kentucky (Mr. Hubbard) is recognized for 5 minutes.

 Mr. HUBBARD. Mr. Speaker, Hopkinsville, Ky., recently lost a prominent business, civic and church leader with the death of Granville Cayce III.

Even though he was only 32 at the time of his untimely death, Granville Cayce III had become an active businessman and civic leader, and was a church deacon.

I would like to express my sympathy to his widow, Karen Sholar Cayce, to his parents, Granville L. Cayce, Jr., and Billie Lee Watson Cayce, and his two brothers, Breck and Mike Cayce.

Granville Cayce III was vice president of Cayce Mill Supply Co. in Hopkinsville. He was an active member and leader of the local Jaycees chapter, and in 1980 received the coveted Jaycee of the Year award for his work in the local chapter.

He was a leader in the efforts to raise funds and oversee construction of a new Jaycee multipurpose building. He was an active member of the local fair board and United Way fundaising efforts. He was also an Eagle Scout and remained active in Scouting activities.

Granville Cayce III was a deacon at the First Christian Church and was a Chi Rho leader at the church. Mere words cannot relate the full story of this man and the mark that he left on his community. Granville Cayce III will be missed. I take this occasion today to offer my condolences and those of all my colleagues in this House who, directly or otherwise, mourn the passing of a civic and church leader.

CANADIAN-UNITED STATES RELATIONS

The SPEAKER. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

• Mr. FASCELL. Mr. Speaker, with the world so troubled, and the United States involved in so many turbulent areas around the world, it is all too easy to become complacent in the happy situation we have historically had in our relations with Canada. We are more than just neighbors; in many undertakings both large and small, we have been partners as well. Canada and the United States share close military ties both in NATO and in the North American Aerospace Command. Our defense procurement arrangements date back to World War II. The two countries also cooperate on a wide range of international problems, of which southern Africa and the Middle East are only the most current exam-

As chairman of the House delegation to the Canada-United States Interparliamentary Group, I am particularly pleased that our friendship is a continuing one: We have as a recent example the outstanding assistance Canada provided some of our people in Iran. It is the highest compliment to our relationship that while we were deeply grateful for the assistance, we were not surprised that so considerate and courageous an action should have come from Canada.

There is, unfortunately, a list of problems which currently exist between our two countries. Some of the problems involve complaints of Canada against us, and some of them involve complaints we have against them. All of them are complex, and they are proving persistent. At this point, I regret to have to note, there appear to be signs that tension and even tempers are beginning to rise on both sides of the border.

Attention on our side is centered on Canada's new national energy policy and on the squeeze it puts not only on American energy companies in Canada, but on trade, investment, and general business prospects for a range of American firms. Moves by Canadian companies to take over American ones in this country have also caused a reaction here.

I suggest that if we understand our own reaction to a handful of Canadian takeover efforts in the United States, we can also understand Canadian concerns when almost three-quarters of Canada's energy industry is in foreign hands. In fact, some 80 percent of that foreign participation is American.

We can also understand Canadian concerns about a number of other problems: The Garrison diversion project, which would help irrigate North Dakota but which Canadians fear would threaten Canadian fisheries; the Eastport refinery project, which would put a refinery in Maine but which would send oil tankers and the concomitant risk of spills, into Canadian waters; the Ross Dam project, which would provide additional electricity for our Pacific Northwest but would flood 7 more miles of Canadian territory; acid rain, which both our countries unhappily produce but of which we dump more on them than they dump on us. The list could go on.

To be sure, we have a list of our own concerns and complaints about measures taken or being contemplated by Canada. Several of these measures affect international investment or trade and appear to be at variance with established international norms.

But my purpose is not to present an exhaustive list of either side's complaints. It is rather to illustrate the range and complexity of the problems and issues between us. None of them is likely to go away quickly or easily; if they were easy, they would have been solved already.

So, along with the traditional friendship which we have understandably tended to take for granted, we also have to accept that problems of proximity, inevitably arising from the 5,000 miles of border we share, will continue to exist. It is not a matter of simply making the problems go away, but of determining how they should best be managed.

My concern and my call is that we bear in mind our heritage and history of friendship and cooperation, and seek resolution of our differences within that framework. Let our message to our Canadian friends be that we value their friendship, understand their concerns, and will work together to resolve or alleviate their grievances; and let that message also make clear we will look for a like attitude from them, so that their undoubted right to define and pursue their national interests will not impinge on our no less legitimate rights under international law.

There always exists the possibility of legislation to balance off the perceived injuries inflicted by another country. We know too well, however, how easily what begins, or is intended, as simple redress sets off a series of measures and countermeasures resulting in an upward spiral of retaliation which ends by proving nothing but which

takes us further than ever from solu-

For now, as long as prospects for mutually acceptable solutions exist, let us avoid this temptation, and call instead for our Government to exercise creative and vigorous diplomacy, clearly and firmly backed by public and congressional will, and to tackle these problems and resolve them in a way that both honors the traditions and preserves the prospects of friendly and constructive relations with our good neighbors to the north.

The SPEAKER. We have passed the time of the gentleman from California (Mr. Dannemeyer). Does the gentleman make a request that it be granted to him at this time?

Mr. DANNEMEYER. Mr. Speaker, I ask unanimous consent that I be granted my time at this time.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

FURTHER CUTS WHICH COULD BE MADE IN BUDGET

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. Dannemeyer) is

recognized for 30 minutes.
Mr. DANNEMEYER. I

Mr. DANNEMEYER. Mr. Speaker, on Friday I addressed the House for the purpose of starting a dialog on two interrelated issues: First, the need to make additional reductions in the fiscal year 1982 budget, and second, where those reductions might be made in the coming weeks. Specifically, I indicated my intention to share with my colleagues a list of 272 potential cuts put together by my office in conjunction with the work of the House Republican Economic Task Force's Subcommittee on Budget Reduction, of which I am honored to serve as chairman. The budget study was distributed in late July as a research inventory under the auspices of the House Republican Research Committee.

As a result, the study is being updated to reflect changes made in the final version of the budget reconciliation bill. Nonetheless, I believe that the 272 cuts, which total some \$52.3 billion, serve as a useful point of departure in our efforts to further reduce spending in order to bring the deficit under control. Failure to control the deficit will surely result in continued

high-interest rates.

Before returning to the list of cuts where I left off on Friday, I would like to direct the attention of my colleagues to an article in yesterday's Washington Post by syndicated columnist George F. Will. In discussing the economic climate, Will makes the following important observation.

Or consider the soothing thought that even if the federal deficit is \$20 billion above the administration's estimate of \$42.5 billion, it will be less than 2 percent of gross national product. Feel better? Don't. The salient fact is that decade ago, federal borrowing, including off-budget loans, accounted for 16 percent of the total demand on U.S. credit markets. In the fiscal year now ending, it will have accounted for 38 percent.

Will goes on to discuss the public debt and its relationship to the interest rate problem:

About half the federal debt of about \$1 trillion has a maturity of less than a year. That is good, if interest rates come down. In that case, government spending on debt service will decline substantially. Unfortunately, the maturity for so much debt so soon is not encouraging, because government spending projections have incorporated interest rate assumptions that already seem unreasonably optimistic.

With these thoughts in mind, allow me to return to the specific list of potential cuts. In each instance, I urge the House to bear in mind that each reduction would mean that much less that the Government would need to borrow and, correspondingly, that much more for business loans, car purchases, mortgage lending, and other private investments. All of these things would increase employment, stimulate productivity, and encourage economic growth.

Mr. Speaker, last Friday I began reading through this list of 272 cuts and had worked through those items contained under the "Judiciary." This afternoon I would like to commence with those proposed items for reduction in the Executive Office and "Funds appropriated to the Presi-

dent."

It is interesting to note that when you examine the Federal budget for the fiscal year you find that there are 22 major subdivisions by agency or department, and the 2 I have just alluded to, the Executive Office and "Funds appropriated to the President," are merely 2 of those 22.

The first cut under the Executive Office relates to the Council and Office of Environmental Quality. This, in our judgment, is one of these redundant offices that our Government could well get along without. We propose to speed up the elimination of this office, thereby saving \$1,044,000

this office, thereby saving \$1,044,000. In the Office of Administration, we propose to limit salaries and expenses to not more than 10 percent above 1981, a savings, if accomplished, of \$442,600.

In the Office of Management and Budget, commonly referred to as OMB, we would limit salaries and expenses in 1982 to 10 percent over what was spent in 1981. This would save \$494,900.

In the Office of U.S. Trade Representatives, we would allow 10 percent above 1980 for salaries and expenses. Proposed outlays represent a 70.8-percent increase since 1980, which in our judgment is somewhat excessive.

In this category, these four items total \$4,868,500.

Under "Funds appropriated the President," we find appropriations authorized by Congress enabling the President to spend money for various programs, mostly in the area of foreign assistance.

The first item in this category relates to expenditures of foreign security assistance, international military education and training. Here we propose to allow expenditures in 1982 not exceeding 10 percent above what was spent in 1981. If this principle is followed, it would result in a savings for this particular item of \$11,650.000.

In foreign security assistance, economic support fund, we would allow a growth for 1982 which is 20 percent above 1980. We should exercise greater care in giveaway programs overseas, because we have found that we cannot really buy friendship anywhere for the long-term or even, indeed, on a short-term basis. Likewise, this would result in a savings of \$63,051,600.

In foreign development assistance, contribution to the International Bank for Reconstruction, we would again allow 20 percent in 1982 over what was spent in 1980. Members should bear in mind that the proposed outlays for this particular item would result in an increase over 1980 of some 423.7 percent. In our view this is vastly exorbitant and should not be tolerated. If we follow the limitations as suggested, it would result in a savings of \$63,850,000.

Foreign development assistance, contribution to the International Development Association, we would allow in 1982, 10 percent over what was spent in 1981, thereby restricting excessive funding. The General Accounting Office in this instance has charged that there has been inadequate monitoring of the activities of this particular agency department, which has also engaged in poor procurement practices.

The next item relates to foreign development assistance, Asian Development Bank. Here again we would limit expenditures in 1982 to no more than 20 percent of 1980, resulting in a savings of \$27,636,400. The proposed outlays represent 77.1 percent of an increase over 1980, which we believe under present circumstances is exorbitant.

Members will note than in many of the instances the proposed growth was 10 or 20 percent over what was permitted in 1981 or 1980. We feel that this growth margin is perfectly proper and appropriate, because as we all know, when we go in to buy a car today, we are asked by our bank to pay interest rates of 20 or 22 percent, or if we can find a home to buy and money on the credit market to finance it, we are asked to pay 17 percent or 16 percent

even on a long-term basis. Most Americans today cannot even afford to buy a home on that basis because they do not have earnings high enough to service a debt of that type.

□ 1400

So it is not unreasonable in light of what we Americans are experiencing in the credit markets of the country to ask agencies of Government in 1982 to limit their increases to 10 percent over what was spent in 1981.

To continue, under foreign development assistance, African Development Fund, we would allow in 1982, 10 percent over what was spent in 1981. This

would save \$3 million.

In foreign development assistance, African Development Bank, we would defer this authorization as unnecessary since this new program largely duplicates the work of the African Development Fund. This would save \$17,987,000.

In foreign development assistance, International Fund for Agricultural Development, we would allow in 1982 a growth of not more than 10 percent over what was spent in 1981. The proposal for this particular agency, believe it or not, is 60 percent over what was spent in the preceding year. This recommendation, if implemented, would save \$12,500,000.

In foreign development assistance, international organizations and programs, we would eliminate U.N. funding. The U.N. Development Fund of \$145 million and U.N. Children's Fund of \$45 million are not part of the regular U.N. contribution. This proposed cut would save the taxpayers of this

country \$190 million.

In foreign development assistance, functional development assistance program, we would cut 50 percent from the fiscal year 1982 budget authority for population planning. We would restrict this particular program, which some of us choose to call social engineering at taxpayers' expense. This would save the taxpayers of this country \$172,960,500.

In foreign development assistance, Sahel development program, we would allow 10 percent over what was spent in 1981 for fiscal year 1982. This additional program, in our judgment, is unaffordable at the present time. The Sahel has gotten considerable attention through recent televised broadcasts and advertising in attempts to raise private contributions. If implemented, this would save \$10,823,800.

In foreign development assistance, International Development Cooperative Agency, operating expenses, also known as AID, we would cut 10 percent from the proposed expenditure for 1982. We feel there is much redundancy with other foreign aid programs, and here the General Accounting Office, the auditing arm of Congress, has reported that poor procure-

ment practices and monitoring exists in this program. \$32,649,100 would be saved

Foreign assistance development, trade and development program, rescind this program is our recommendation. In our judgment, we really cannot afford new programs of this type. This would save the taxpayers \$2,337,000.

In the Inter-American Foundation, we would allow 10 percent above 1981. The proposed outlay for this item is 296.2 percent over what was spent in 1981, which we believe is grossly excessive and should not be tolerated. If this is implemented, it would result in a savings of some \$14,702,300.

In international commodity agreements, we would eliminate funding for the entire program, which manipulates rubber prices on the world market and should not be subsidized by the taxpayers of this country. This would result in a savings of some \$10 million.

Totaled, these items contained in "Funds appropriated to the President," if implemented, would save

\$739,513,700.

When the Members hear these items mentioned, I think it is important that we have one continuing question in mind: Will the elimination or reduction of a program have an adverse impact on the poor, the handicapped, the deprived of our society? And I challenge anyone in this Chamber or who reads these figures to indicate that the deprived in our society, American citizens all, are going to suffer as a result of the implementation of these cuts that I have mentioned in the short time that I have been privileged to take the floor this afternoon.

Well, tomorrow it is my intention, fellow Members, to continue reading through this list of cuts, and over the course of the next several weeks to enumerate to the Members where the items are in our Federal budget that we can cut out some \$52 billion and I think it might behoove us to analyze what beneficial effects this would

have.

It would significantly reduce the quantity of money which the Federal Government has to borrow in order to finance its operations. If we had the courage to reduce spending by that amount in 1982, think of the dramatic impact that would have on the credit markets of this country.

markets of this country.

Does anyone really question the result on those credit markets? It would reduce the cost of credit for all Americans by driving the prime rate down by a least 6 percentage points from its current high of 20. And to the Members of this Congress who are concerned about the third largest item in the budget, that is, for interest think of the dramatic impact which that would have on the cost to the Federal Government of paying the in-

terest expense on the \$1 trillion national debt.

We believe this would reduce the cost to the Federal Government by at least 2 to 3 percentage points of maintaining the debt in that magnitude. And that would result in a savings of \$20 billion or \$30 billion in addition to these cuts.

I thank the Members for their attention. I thank the Speaker for the time that he has allotted me this afternoon, and I yield back the balance of my time.

WELFARE IN AMERICA—UNDER-CLASS: HOW ONE FAMILY COPES

(Mr. RICHMOND asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

• Mr. RICHMOND. Mr. Speaker, I know my colleagues will be interested in reviewing excerpts from an excellent, riveting Los Angeles Times article, "Underclass: How One Family Copes," by David Treadwell and Gaylord Shaw.

This outstanding study of welfare in America addresses the most significant problems now confronting Congress and elected officials at all levels of government.

Specifically, the authors highlight the failure of current Government programs to break the cycle of unemployment and poverty that keep families, such as the one described in the article, from getting into the mainstream of our Nation's economic life. Their conclusion is that jobs are the best way to help the underclass and that Government cannot do it alone.

This article clearly and persuasively indicates where our current thinking may have gone wrong and what we—Members of Congress and all State, city, and county elected officials—can do to end the hopeless cycle of unemployment and poverty that entraps millions of our fellow Americans.

I recommend this thoughtful, detailed, and timely article to my colleagues.

Excerpts from the article follow: [From the Los Angeles Times, July 5, 1981] Welfare in America—Underclass: How

ONE FAMILY COPES
(By David Treadwell and Gaylord Shaw)

CHICAGO.—On a slate-gray morning in late May, Louise Lowman stepped through the discarded newspapers blown along the side-walk by the wind from the lake, entered a grime-streaked office building and climbed the worn marble staircase to the second-floor waiting room of the state Public Aid Department.

Beside her, matching her mother's measured tread, was her 19-year-old unmarried daughter, Teresa. Cradled in Teresa's arms, wrapped snugly in a sparkling white blanket against the morning chill, was the teenager's month-old baby, John. . . .

Louise Lowman, 57, had been on welfare for 35 consecutive years, so a trip to the welfare office was nothing new to her. But this morning was different—this morning the process would begin to place baby John's name on America's welfare rolls. He would represent the third successive generation in the Lowman family to receive welfare.

In part the Lowmans' path to the welfare office was paved by problems of their own making—not least among them the fact that seven of Louise Lowman's 10 children were born out of wedlock and raised without the stability traditionally associated with a two-parent household.

IN ECONOMIC BASEMENT

But forces beyond this one family's control also were involved—forces great enough to overwhelm perhaps even the most determined individual.

Increasingly, an array of economic demographic and social forces has converged on members of the Lowman family and millions of others like them overwhelming their meager resources and locking them in the nations economic and social basement. They are members of what appears more and more to be a permanent underclass in America.

A permanent underclass. The very phrase seems alien to all that is America. Like every nation, the United States has always had poverty, but it has also nurtured the belief that anyone willing to work can improve his or her lot. Indeed, millions of European immigrants who landed destitute on America's shores worked their way up the economic ladder. More recently, hundreds of thousands of blacks and other minorities have lifted themselves into the middle class.

In fact, Louise Lowman's five oldest children have reached, or seem to be headed for, the middle class—they have become a policeman, a teacher, a cabdriver, a restaurant manager and a service station cashier.

rant manager and a service station cashier. But for Louise Lowman and her five younger children, the American tradition of upward mobility has become a dream deferred, or cancelled outright.

The costs of this stagnating poverty, both to the Lowman family and to the nation as

a whole, are enormous.

Within the underclass, social scientists recite a heavy toll of wasted lives, lost hopes, growing bitterness and deepening despair. Dollar figures can't be attached to such suffering, but it is possible to calculate roughly the price paid by the rest of the restion for this massive tragedy.

nation for this massive tragedy.

The most visible price paid is the estimated \$20 billion a year in taxes for the basic welfare programs that support members of the underclass who don't, won't or can't work

Another, more fearful type of tax is extracted by the criminal activity that amounts to an invisible job market for many in the underclass—crime that such authorities say is increasingly spilling out of the slums and taking its toll in more affluent neighborhoods. The cost of major crimes attributed to the underclass—measured in terms of lost property, lost productivity, prosecution and prison expenses—is estimated at \$10 billion a year.

Adding \$20 billion in social program spending, this means that the total dollar cost of maintaining the underclass hits \$30 billion annually—equivalent to a \$300 annual levy on each of the 100 million working people in America.

The problems of the underclass make up a discouraging litany: unemployment, welfare, crime, racism and racial barriers, industries

that have moved away, inner city schools that don't educate, government training programs that don't train or that train for jobs that don't exist, illegitimate children and a family structure that has deteriorated

WEB OF ADVERSITY WOVEN

Many, if not most, of the problems are interrelated—one connects to another, then another and still another, weaving a web of adversity that seems to defy unraveling.

For example, there is evidence that dependence on welfare may undermine the development of disciplined work habits, that the prospect of job failure erodes incentives to stay in school, that members of the underclass are so educationally deficient that they can qualify only for the most menial jobs or that even those with training and good work habits have skills that are technically obsolete in a rapidly changing market-place. The cumulative result is millions of people who are themselves almost technically obsolete, people for whom the nation has less and less use.

According to Douglas G. Glasgow, a Howard University sociologist, the emergence of this underclass "as a permanent fixture of our nation's social structure represents one of the most significant class developments in the last two decades."

To be sure, while the phrase "permanent underclass" is coming into broader usage, it is itself the subject of debate among scholars. Some economists contend that the word "permanent" is misleading because the bulk of the total poverty population is not a static mass but rather a shifting conglomeration of individuals and families whose fortunes rise and fall repeatedly over time. Also, some sociologists argue that the word "underclass" carries unwarranted ideological overtones.

STAY BELOW POVERTY LEVEL

Yet, from stacks of academic studies and government reports, some degree of consensus can be drawn about the existence of the underclass, about who belongs to it and roughly how large it is.

People generally ranked in the underclass are those who have jobs so marginal or seasonal that they remain below the poverty level year after year, or those who are long-term welfare recipients, or who are chronically unemployed, or who have dropped out of the labor market altogether, or who have turned to crime to support themselves, or who mix occasional work with welfare or proceeds from "hustling," the catch all ghetto term for a range of illicit activities.

Studies estimate that somewhere between 2 million and 10 million of the nation's 220 million people, or 1 percent to 5 percent, fit into one or more of these categories. And some authorities suggest that the numbers are growing.

For many middle- and upper-class Americans, especially those whose rise up the economic and social ladder resulted from their own hard work, it is difficult to comprehend how and why an underclass, dependent and despairing, came to exist in the midst of a land of opportunity.

Answers to this perplexing question can be found by examining the life and times of Louise Lowman and her family, and how this family's dilemma is inexorably linked to broader economic and social changes. . . .

As a girl growing up on Chicago's mostly black South Side. Louise Lowman never dreamed that one day she would see three generations of her family on welfare. . . . Louise graduated from the segregated high school in 1941. She wanted to be a nurse.

But there was no money for college . . . so she was forced to go to work. Racial barriers made desirable jobs difficult, if not impossible, to obtain.

Louise began washing dishes in a YMCA cafeteria near the Loop.

During the next two years, she held several jobs, but all were menial and low-paying. One lasted less than a week.

The only bright spot in life was her romance with Alonzo Allen, a young man she began dating after they met after high school.

In 1944, Alonzo was drafted into the Army and stationed near Chicago. Weeks later, Louise learned that she was pregnant with his child.

Guilt-ridden over the anguish of her parents but more afraid to risk an abortion, she decided to have the baby. Six months after his birth, she followed the advice of friends and signed up for welfare. Why not? she thought. It would be only temporary, until she could pick up the shattered pieces of her life.

Over the next 20 years, however, for reasons even she cannot fully explain, the bright future that seemed to stretch before her as a girl eluded Louise. There were no "better" jobs and there were more babies—nine in all, six boys and three girls, between 1949 and 1964.

Only one of the six different fathers of these 10 children even married her. His name was Thomas Lowman. He was her third lover, they had three children, and the marriage lasted three years. He dropped out of sight in the mid-1950s when she was hospitalized for two years with tuberculosis.

The succession of babies virtualy destroyed her chances of better jobs. Yet she was determined to give her children the best upbringing possible. It is perhaps the central paradox of Louise Lowman's life—and one that is shared by others in the underclass—that she struggled to maintain the traditional middle-class values while having a succession of children, most born out of wedlock, who undermined that struggle from the outset.

Yet struggle she did. She sacrificed to keep the family out of public housing, despite its lower cost. She thought that public housing bred crime and vandalism and turned neighbors into strangers.

PRACTICING THE DECEPT

Health permitting, she took in laundry, sold cosmetics from door to door and did other odd jobs to supplement her meager welfare stipend. Like many other welfare mothers, she did not report such outside income to the authorities and justified "practicing the decept," as she terms it, on the grounds that her government check did not cover her family's basic needs. . . .

Two boys, ages 22 and 20, have not held a steady job since they dropped out of high school. The elder of the two has been unemployed for more than seven years.

Another son, 23, is physically handicapped and retarded, and relies on government programs for support.

A fourth boy, a junior in high school is so depressed over his future that he is on the verge of quitting school. Louise takes some solace from the possibility that he will join the Army.

And then there is 19-year-old Teresa. Teresa was only two months away from graduating from high school when she dropped out to have her baby. With things the way they are, Louise Lowman believes. Teresa's chances in life are even more perilous than her own were 35 years ago.

What that means for baby John, she

avoids contemplating.

She feels somewhat to blame for what has happened, particularly by failing to instill in her last five children the discipline needed to compete successfully in a changing and-for inner-city blacks-a shrinking job market.

"The neighborhood is going down," she says. "The schools are getting worse. The dope fiends are out on the corners selling their whatnot. It's all I can do to keep the children from turning to the streets.'

While sociologists say the underclass is a "heterogeneous grouping"-a mixture of races and ages, of differing family characteristsics-national studies have vielded three findings that are striking:

Blacks are more than three times as likely to be poor than whites, with Latinos about

midway between.

Households headed by females are six times more likely to live in poverty than two-parent families.

Central city residents are twice as likely to

be poor as suburban residents.

When the three factors are combined—as they are with Louise Lowman, the female head of a black, inner-city household-the odds of a life in poverty are dramatically multiplied. Roughly three-fourths of all poor black families are headed by women, and a majority of these live in central cities.

To be sure, in sheer numbers, whites dominate the poverty population just as they do the general population: Of the 25.2 million people ranked by the Census Bureau in 1980 as below the poverty line, 16.7 million were white, 7.8 million were black and 2.6 million were of Latino origin. And poverty in Appalachia, which is mostly white, can be just as grinding as poverty on Chicago's South Side, which is mostly black.

PATTERNS IN BLACK GHETTOS

But it is in the black ghettos of America's cities that underclass patterns seem most pronounced:

Large numbers of women like Louise Lowman who are untrained for any but the most menial jobs or unable to work at all because they have small children or health problems.

Large numbers of men like two of her young adult sons who lack the skills or the motivation to find permanent, decentpaying jobs.

Large numbers of teen-agers like her two voungest children who seemingly are without the schooling or the discipline to make it into the mainstream.

Still in question is the extent to which poverty and welfare dependence are passed on from one generation to the next.

Howard University's Glasgow is among those who contend that the underclass is in-creasingly composed of "sons and daughters of previous generations of poor, and their children will predictably remain in the grip of poverty."

In contrast, Harvard's Lee Rainwater and Massachusetts Institute of Technology's Martin Rein reported in 1978 that their of data collected on a sample of 5,000 families each year since 1968 "seem to provide no support for the hypothesis that the experience of growing up in a welfare family per se makes men or women more to go on welfare themselves when they set up their own households."

PRESENCE KEPT HIDDEN

Louise Lowman's total monthly income is \$808, including \$128 in food stamps, \$238 from Social Security for support of her handicapped son, and \$302 in dependent children benefits for herself, Teresa and Matthew

In addition, she receives \$100 from Robbie's father, her 32-year-old policeman son, for the young boy's support. Robbie's presence in the home is hidden from welfare authorities and the money is unreported, so that her welfare check will not be reduced.

Peter, her unemployed son, also contributes half of his \$80 monthly check from the general assistance program, a form of welfare provided by the state and the city for unemployed individuals with low skills who are ineligible for federal welfare benefits.

Household expenses for a typical month are \$255 for rent, \$50 for utilities, \$12 for telephone, \$23 for her life insurance premium and \$7 for a subscription to the Chicago Defender, the black daily newspaper. This leaves \$461 for food, clothing, entertain-ment and miscellaneous expenditures for the seven of them.

It has been more than a year since the family last treated itself to a meal out at a fast-food restaurant and more than three years since Louise Lowman bought a new

housedress.
With Teresa getting a check for herself and baby John, Louise Lowman's monthly AFDC benefits would be reduced, she fig-

ured, by at least \$50.

Thus, Louise Lowman thought it was mandatory for Teresa to contribute to the family's support. Expenses are always going up-especially rent for their two-bedroom apartment, sadly in need of repair and a fresh coat of paint. The rent has climbed from \$220 to \$255 just recently, and the landlord is threatening to raise it another \$35 in the fall.

Teresa has promised to help meet household expenses-even, she said, if she decides to move in full time with her boyfriend, John, the father and namesake of her month-old baby. But Louise Lowman . knows from experience how independent a young girl can become once she starts receiving her own welfare check. .

STEADY JOB, NOMINAL PAY

Carl, who was born with cerebral palsy but managed to graduate from a special high school for handicapped children, is the only person in the house with a steady job. He works at a vocational center. The pay is nominal: he never brings home more than \$5 or \$6 a week. But the job keeps him from vegetating and relieves his mother of part of the daily burden of his care.

She used to give Carl money to buy his lunch at work. But she suspected that some of the girls were there cheating him out of it before he could eat. So she began packing his lunch to keep him from going hungry

A friend drove them to the welfare office

saving them the time and cost of a bus trip.
As they entered the building, Louise Lowman felt a familiar flutter of nervousness. Welfare offices, she learned early in life, can mean interminable waiting, endless red tape and officious bureaucrats.

Teresa was determined not to give the name of the baby's father to welfare authorities. She feared that they might take him to court, where he would be ordered to help support little John.

He is able; he has a part-time job in a health food store. But Teresa, like many ghetto youths, has developed an antipathy to anything that smacked of law enforcement-the courts, police, welfare officials. To her, they seem to exist only to harass black people, especially young black men.

Besides, John has promised to help out with the baby's expenses. She trusts him to keep his word.

The caseworker had thought the purpose of the trip was to add the baby to Louise Lowman's AFDC budget. When she learned that it was to place Teresa on her own budget, she apologized profusely and said she would have to turn the matter over to another caseworker. Teresa, after a brief interview, was given an appointment for the following week.

It was close to 9:30 a.m. when they walked out of the building. Louise Lowman . . still not found out how much her check would be reduced or how much Teresa's benefits would be. And it would be weeks before she finally did.

Louise Lowman . . . returned home to wait for her son Carl's Social Security check.

You never know when the mailman's going to show up, and you don't leave a government check sitting in you mailbox while you're off somewhere else," she said.

Much of the discontent with the present welfare system centers on AFDC, the program paying Louise Lowman \$302 a month and the program Teresa Lowman signed up for in May. As an unwed, teen-age mother Teresa is part of a disturbing national trend intimately linked to the growth of the un-

In the 1970s, there was a fivefold increase in the number of women under age 20 receiving AFDC payments. During the same decade, the number of AFDC children who had been born out of wedlock increased from about 1 million to 2.64 million.

Thus, the program stands out as a major example of a program which, because of demographic changes, has become the main source of support for a category of recipients far different than those originally tar-

When enacted during the Great Depression as part of Franklin D. Roosevelt's New Deal, it was meant to be a small, temporary program to help children whose fathers were dead. More than four decades later, 10.9 million recipients were receiving \$12.8 billion a year, and studies showed that 80% of the children were on AFDC rolls not because their fathers were dead, but because their parents were divorced (21.4%), separated (25.5%), or because the children were born out of wedlock (33.8%).

UNDERCLASS STATUS CERTAIN

Some researchers believe that rising illegitimacy rates virtually guarantee under-class status for thousands of young women and children. "Even legitimate teen-age pregnancies lead to lower education, lower earnings, and higher probabilities of ultimate marital dissolution and welfare dependency," a 1979 Urban Institute study said, "When a child is born out of wedlock the likelihood of these negative effects all increases.

Sar A. Levitan, director of George Washington University's Center for Social Policy Studies, concurs. "(When) a young woman has a child in her teen-age years, an out-ofwedlock child, nine-tenths of her life-time scenario is already written."

Still, many of these young women manage to climb out of poverty and leave the welfare rolls for at least part of their lives. In studies show that a majority of people who turn to the welfare system actually receive payments only intermittently; that there is much movement on and off welfare, in and out of poverty.

"Once people are on welfare they are not inescapably locked into the welfare system, nor once off of it are they necessarily freed from it for life," economist Richard Coe reported after analyzing data collected over the last 13 years by the University of Michigan's Survey Research Center.

Coe found that in a 10-year period, onethird of the welfare population received payments for only one year. But another one-fourth got payments in six or more of the 10 years.

Another study by Harvard's Rainwater and MIT's Rein estimated that fewer than 10 percent of those who go on welfare became members of a "welfare class" with long-term dependence on the government for survival. The other 90 percent manage to get off the rolls, at least temporarily.

That 10 percent identified by Rainwater and Rein as a "welfare class" constitutes the

core of America's underclass. 'You can always tell when it's check day," Louise Lowman observed as she sat by the front window of her apartment, watching for the mailman. "The people are all hang-

TIME OF HIGH ANXIETY

ing around their mailboxes. . . ."

Check day is always a time of high anxiety for her. Anything could happen to a check-the computer could foul up, the post office could misplace it, muggers could snatch it from you on your way to the check-cashing place or grab your money on the way out.

She never relaxed until the check was cashed and the money was spent for bills, groceries or whatever.

Some years ago, a law was passed permitting AFDC recipients to have their checks mailed directly to neighborhood currency exchanges, which in Chicago serve many people as local banks. Louise Lowman has hers sent there. But Carl's check comes from the Social Security Administration, and, as far as she knows, it offers no such arrangement. To Louise Lowman, this is another example of the myriad rules, regulations and procedures that complicate her already frustrating life on welfare.

It is one of the anomalies of Louise Lowman's life that she can read, write and compute better than any of her younger children. She does not attribute this to any sort of intellectual superiority on her part. She thinks it is simply a result of the declining quality of public education.

TRIED TO WARN DAUGHTER

An uneasiness has grown up between Louise Lowman and Teresa since the daughter entered her late teens. Louise Lowman had hoped that Teresa would finish high school and find a suitable job. But she knows that the odds are against that happening.

So many young girls like Teresa seem to be coming up pregnant, dropping out of school and going on welfare. Louise Lowman had tried to warn Teresa of the pitfalls, but the advice seemed to fall on deaf

"She's so stubborn," Louise Lowman said. "I wanted her to go to school and do something besides become a welfare recipient. That depresses me.". . .

THE CURRENCY EXCHANGE

. Louise Lowman spotted the mailman. Five minutes later she was on her way to the currency exchange three blocks away. Currency exchanges are places where people can cash checks, pay utility bills, purchase money orders, buy food stamps, obtain auto licenses and conduct other routine financial transactions

They flourish in Chicago's inner-city neighborhoods, many of which lack commercial banking facilities because of an Illinois law prohibiting branch banking. But the poorer the neighborhood and the more blacks living in it, the higher the fees for these services often are. Currency exchange owners justify the higher fees on the grounds that their cost of business is higher in black ghettos.

Louise Lowman paid a total of \$4.60 for three transactions: \$3.10 to cash Carl's \$238 check, 60 cents to purchase a \$5.75 money order and 90 cents to pay two utility bills. In addition, she paid 50 cents to purchase two 18-cent postage stamps from a machine.

She realizes that she pays dearly for currency exchange services. But there are no banks as close and convenient. Besides, she added, "most of the time when the checks come on check day, I don't have the carfare to get to the bank."

As she left the currency exchange, she noticed four seedy-looking men standing idly on a corner across the street. Instinctively, she pressed her hand against her bosom as if to protect the money contained in the coin purse there.

Louise Lowman seems more resigned than angry about her place in American society. But in her neighborhood, and in other underclass ghettos across the nation, not everyone is resigned. Many seem angry and bitter-a mood that many specialists think is contributing to the upswing in crimes committed by members of the underclass. And among some officials in Washington, there is apprehension about an increased potential for urban unrest.

The possible consequences of cuts in welfare and other programs "are pretty obvi-ous," Rep. Richard Bolling (D-Mo.) said recently. "I think it is going to cause, from the underclass and the near-underclass, kind of revolt that came from the middle and upper-middle class over the (Vietnam)

"It's frightening," Bolling added. Atty. Gen. William French Smith says the possibility of racial violence erupting as a result of cuts in social program budgets will be monitored by "an early-warning system." So far "we haven't had any great alarms that have gone off anywhere," Smith said recently. "It's quite possible that the effect of these so-called budget cuts won't materialize at all . . . in terms of causing temperatures to rise."

But mounting pressure within the underclass can pose increased threats to the rest of the nation without triggering riots. Indeed, the incidence of crime-including acts of wanton violence-spilling out of underclass ghettos is already a matter of concern across the nation.

Too often members of the criminal ele-ment within the underclass "operate on the assumption that they don't have a damn thing to lose," sociologist Kenneth Clark testified before a congressional committee this spring.

TOO MANY LACK RESPECT

"You gentlemen in the middle class have a particular respect for punishment, for penalty. That is a measure of your faith in society. You have something to lose," Clark told the committee members. ". . What is difficult for you to understand is that this society has made it possible for too large a group

of people not to have this respect."

He said the "middle class understandably wants to protect itself from the manifesta-

tions of desperation of the underclass" but that most anti-crime proposals merely "increase the adversary tension between the underclass and society. . . . In fact, we're perpetuating a kind of guerrilla warfare."

The precise scope of crime as a livelihood among the underclass is impossible to define-obviously, people who support themselves by illegal means are reluctant to report the fact to census takers or other government representatives.

But when the Carnegie Council of Policy Studies examined youth employment and education problems, it concluded that "the role of illicit earnings" may be "possibly more significant than welfare payments" in America's inner cities.

ROLE OF ILLEGAL INCOME

William Julius Wilson, chairman of the University of Chicago's sociology depart-ment cited a study that found that 20 percent of the adults in Harlem lived entirely on illegal income. "The underclass . . . knows that illegal activities, in many respects, provide a more lucrative alternative to low-wage employment," Wilson said.

A relationship between crime, poverty and race is suggested, too, by various government surveys.

Blacks make up about 12 percent of the nation's population, but 31 percent of those are officially classified as poor-and about 30 percent of those arrested for the three property crimes in the FBI's Crime Index (burglary, larceny-theft and auto theft).

The percentages are higher for violent crime. According to the lastest FBI reports, blacks make up 57 percent of those arrested for robbery, 48 percent of those arrested for murder or rape and 37 percent of those arrested for aggravated assault.

"In the end, there is no escaping the question of race and crime," author Charles Sil-berman said in his widely acclaimed book Criminal Violence, Criminal Justice.'

"To say this is to risk, almost to guarantee, giving offense; it is impossible to talk honestly about the role of race in American life without offending and angering both whites and blacks. . . . The truth is too terrible on all sides; and we are all too accustomed to the soothing euphemisms and inflammatory rhetoric with which the subject is cloaked."

Part of Matthew's problem, Lowman thinks, is that the schools are failing to educate children. It seemed as if teachers are not interested in helping students. They let the children slide further and further behind until it is too late to pull them back. No one seemed to learn anything.

She got a good public education herself and she thinks her five older children did too. But something has happened to public schools since then.

"It seems the kids keep getting dumber the longer they stay in school," she said.

Statistics lend some support to Mrs. Lowman's suspicions.

At the South Side Chicago school her children attended, past records of standard-ized tests indicate that the scores of pupils at the age of 7 are comparable to the national average in reading, but that these children fall further and further behind as they grow older. By the age of 11, they are two years behind the U.S. average, and they never seem to catch up.

Nationwide, the Carnegie Council reported in 1979, high school dropout rates "continue to be considerably higher for blacks and Hispanics than for whites, and these minority groups are a rising proportion of the youthful population. . . ."

When Glasgow, the Howard University professor, conducted a follow-up study of 30 black men he had interviewed at length when they were teen-agers in Watts in the late 1960s, he found that only six had graduated from high school. The other 24 had quit school or were expelled, he reported in his recent book, "The Black Underclass."

EDUCATION, UNEMPLOYMENT

Such dismal statistics on underclass education, in Glasgow's view, can be linked to underclass employment problems.

In the past two decades, he wrote, "the inner-city school system has had a devastating impact on black youths; it has failed to educate, train, socialize, or in other ways help them to become successful achievers."

Education of underclass children may be adversely affected by the underclass' tendency toward single-parent households, a recent study suggested. The National Association of Elementary School Principals reported last year that "one-parent children, on the whole, show lower achievement in school than, their two-parent peers..."

"Their absence rate runs far higher than for students with two parents," it said, and they are "consistently more likely to be late, truant, and subject to disciplinary action. One-parent children are more than twice as likely to give up on school altogether."

Dropping out of school has been the pattern among the youngest Lowman children and, inevitably, it has meant increased anguish in their search for jobs. . . .

Louise Lowman's 22-year-old son, Peter, returned home. He brought a present for her. . . . It was his way of sharing the largesse of \$16 he had just received for two days of work helping a friend dig gardens.

He felt good having a little extra money in his pockets. But it was also a reminder of the single most unsettling fact of his life—that he does not have a steady job and has not held one since he dropped out of high school seven years ago. Like his 20-year-old brother, Dennis, also a high school dropout and chronically unemployed, he seems destined for a life of welfare and odd jobs, and he has grown increasingly sullen and bitter.

His mother often expresses the view that neither Peter nor Dennis tried hard enough to find work. She knows that the job market is tight. She suspects that their attitude toward work has been affected by growing up in a home without a working father. But she wants them to make a success of their lives, however modest that success may be, and she believes that they should be able to overcome all odds.

But the story of their lives in the last few years illustrates the enormous, sometimes puzzling, difficulties that young men like Peter and Dennis have in fulfilling such ambitions—difficulties that lie partly within themselves and partly in forces beyond their control.

Peter dropped out of high school when he was 15. After searching unsuccessfully for work, he signed up with the Job Corps, the once-large federal program intended to train unemployed youngsters for useful employment.

He enrolled in the general maintenance curriculum and stayed with the program about a year. But he still failed to find work.

ALL-TOO-PERVASIVE PATTERN

Odd jobs seem to be all he is capable of holding down, despite his training and stated willingness to work. It is a pattern all

too pervasive in the South Side community where the Lowmans live. Unemployment among its 37,000 inhabitants is 14%—twice the national average—and there are almost 2,600 individuals, mostly young black males like Peter, receiving general assistance, a form of welfare for single persons with low skills who are chronically unemployed.

Peter went on general assistance three years ago, when he became too old to be counted for his mother's AFDC check. Because he lives at home, he receives \$80 a month instead of the usual \$184....

WENT TO ALABAMA FOR JOB

Dennis's story followed a similar pattern. Like Peter, he dropped out of school and turned to the Job Corps for training. He stayed two years, studying both general maintenance and construction

After completing the Job Corps program, he and three other teen-agers from Chicago were told that Jobs with a construction firm were awaiting them in Alabama. They were given \$600 apiece, flown to Alabama at government expense and settled into a motel.

Soon after they arrived, they bought two used cars to get back and forth from work. Dennis chipped in \$250 as his share.

Everything seems to be going along well until the first day of work, when one of the youths was found to be underage. He was told to return to Chicago. At the same time the others learned that their first paychecks would not come for two weeks.

Most of their money had already been spent, and they feared not being able to pay their motel bill and cost of food. Far from home in a strange city, they were desperate. They returned to Chicago without informing their employer.

"It was just one of those things." Dennis says now. "It was just something that I couldn't begin to explain." Dennis later found occasional jobs but, like Peter, he eventually turned to general assistance after he became too old to be counted for his mother's AFDC check. He moved out of the house and took up residence with a 22-year-old unmarried AFDC mother who had two young children by another mother who had

two young children by another man.

Later, he signed up for another job program that attempts to find permanent manufacturing jobs for unemployed and underemployed teen-agers and young adults. But he says he found the experience so frustrating that he quit that program after a week or so. He concedes that part of the problem was his inability to get to work on time, despite the alarm clock he was given to help him arise.

Now, he says, "I just sit back and wonder where do I go from here. I just try to be cool, you know, get high, try to avoid the problem sometimes. When I feel down, I get high just to relax my mind."

Officials at the last job program Dennis attended admit their success rate is not inspiring. Only one of five youngsters who enter succeeds in finding a permanent job. They point out that most participants come from welfare families, have few skills and have never developed good work habits.

Their older brother, Jesse, the policeman, also thinks Dennis and Peter lack the personal motivation to get ahead. But he attributes that largely to the cushion the wel-

fare system provides.
"It's easier to live on welfare now," he said. "When we were younger, when Dennis and Peter were just little babies, it was really rough. I remember being hungry back then as a kid on a regular basis. There were various neighborhood stores and barbecue places where I could do odds and ends, like

mopping floors, and I developed an interest in work."

Dennis and Peter insist that they have tried but that the opportunities are more dismal than their mother wishes to believe,

"You get out there, trying to find something," Dennis said. "But it don't get no better. They say, 'Call you in two weeks.' But you never get that phone call.

"I need a job, man. That's what's missing in my life. A job."

The long, gray columns of numbers in government reports show that the experiences of Peter and Dennis in the job market are far from unique. In fact, similar problems confront hundreds of thousands of black teen-agers and young men who, in the view of some scholars, represent the most volatile sector of the underclass.

Nationwide, the unemployment rate for these categories remained above 30 percent throughout the 1970s and at times hit 40 percent. In some inner cities, it regularly exceeded 50 percent. While teen-agers also have unemployment problems, but Frank Levy of the Urban Institute documented a startling gap between whites and blacks.

PATTERN AMONG YOUNG MEN

Between 1964 and 1978, he said, the number of white male teen-agers in the labor market increased 1.8 million. Of that total, 1.6 million—or about 90 percent—found jobs. In comparison, the number of black male teen-agers in the labor market increased 152,000 "and only 33,000—about 20 percent—were able to get jobs," Levy said.

Roughly the same pattern held for young men ages 20 to 24. Among whites, 2.3 million of the 2.7 million additional workers who joined the labor market found jobs. Among blacks, only 147,000 of the 476,000 additional new workers got jobs.

"In summary," Levy said, "... high unemployment rates among black teen-agers do not automatically vanish when the teenagers turn 20 years old... The labor market postition of black young men has deteriorated as rapidly as the labor market position of black male teen-agers."

The University of Chicago's Wilson also detailed a gap between the black underclass and the black middle class in his book, "The Declining Significance of Race." He concluded that while affirmative action programs have improved job opportunites for trained and educated blacks, "they have not been useful in breaking down barriers that have nothing to do with color and that result from labor-saving innovations, relocation of industry, labor-market segmentation and the shift from goods-producing to service-producing industries."

Thus, members of the underclass seem stuck at the bottom of America's basement with scant chance of climbing out because a rapidly changing, increasingly specialized economy has less and less use for the kind of work they are able to do.

The structural changes in the nation's industrial economy have been dramatic. For example, of 20 million new jobs created in the last decade, only 1% were in manufacturing, the sector that traditionally has employed the bulk of America's unskilled or blue-collar workers.

And the movement of more and more firms out of the center cities and into the suburbs and rural areas has been equally dramatic. The Lowman family's Chicago, for instance, was listed as losing more than 90,000 jobs in a six-year period.

MANY QUIT LABOR MARKET

With jobs vanishing, increasing numbers of unskilled blacks seem to be giving up and dropping out of the labor market entirely. When Levy of the Urban Institute re-examined census records last year he found that 11% of a sampling of working-age black males reported zero wage and salary income in 1978 compared with 5% in 1969.

". . . Being out of the labor market was a permanent status for a growing number of individuals," Levy said in a report published

by the Brookings Institution.

Wilson sees links between job troubles and social trends. For example, he traces the growth in the number of female-headed households in part to the dwindling number of higher-paying jobs in the inner city. His reasoning: Unemployed men, or those unable to earn an adequate salary, are more likely to leave their families—or never take responsibility for illegitimate children they father—than men with good jobs.

HAD TO WAIT FOR CHECK

Chili dogs and crackers were the menu for the night's meal. There were no vegetables, nothing on the side except milk or soda to drink. Fresh vegetables, like fresh fruits, are luxuries the Lowmans seldom enjoy. Starches and carbohydrates fill your stomach feater.

But because it was check day, the cupboard was barer than usual and she had to wait until after Carl's Social Security check

came in to buy some groceries.

She could have taken the bus to the supermarket, but then she would have had to pay a \$3 fee to have herself and her groceries transported home by the bootleg deliverymen who hung out in front of the supermarket. She used to shop at another supermarket that was closer to her home but the deliverymen there charged \$5. She felt that was too much; besides, she said, the quality of the food had gone down.

Despite its usually higher prices, she does not mind going to the corner store. It is owned by blacks. "I like to throw them a little business every now and then," she said. She had picked up some Doritos and Oreo cookies for Carl as a special treat,

since it was really his check day.

Louise Lowman spends little time pondering what it would take to lift her out of the life she is living. "I try not to think about it," she said. "I just take one day at a time."

But in the halls of academia and the offices of government, the questions are constantly asked: What are the solutions? What can be done that hasn't been done to propel underclass families like this one into America's mainstream?

Sometimes, it seems, the problems simply overwhelm the solutions. Even normally self-confident scholars, with a sigh of resignation, quote the ancient Yiddish proverb: "The mere existence of a problem is no proof of the existence of a solution."

Yet that passive fatalism seems alien to the American spirit. And clearly something must be done if America is to lift the burden on society imposed by the underclass and reduce the likelihood of what Howard University's Glasgow sees as "social conflict between the haves and have-nots. . . ."

WHITE HOUSE SOLUTIONS

President Reagan pegs his solutions to an economic program intended "to put America back to work; to make our cities and towns resound with the confident voices of men and women of all races . . . bringing home to their families a decent paycheck they can cash for honest money."

The Administration's belief is that its program of tax cuts and reined-in spending for social programs will stimulate an economy recovery which, in turn, will create a rising tide that lifts all boats—including the underclass boat. Even before Reagan outlined his cut-spending-and-cut-taxes approach to correcting the nation's economic ills, many scholars were saying that a robust economy, one that generates full employment, is vital to help the underclass.

"It cannot be overemphasized that because of accumulated disadvantages stemming from previous discrimination and being passed on from generation to generation, poor blacks are especially vulnerable to swings in the business cycle," the University of Chicago's Wilson wrote two years ago.

Wilson added that "it would be extremely shortsighted to assume that the problems of the lower-class black family can be satisfactorily addressed without a fundamental program of economic reform. A program that would lead to the sustained employment of ghetto men at respectable wages would be far more effective than any other conceivable effort to stabilize the ghetto family."

One of Wilson's colleagues, a liberal sociologist who requested anonymity rather than publicly confess "a loss of idealism," said of the underclass: "The masses of those people are lost—you can't change 20 years of hopelessness and despair." Instead, this sociologist said, "you have to figure out where you're going to break the cycle."

USC's Daniel Glaser suggests that ways to break that cycle might best be discovered through "imaginative experiments" aimed at underclass youth.

Two possibilities he suggested were subsidizing part-time employment for junior and senior high school students in a range of adult workplaces, thus overcoming what he termed the "social separation of youth from adults," and creating "teams" of youths who would compete collectively, rather than as individuals, for rewards tied to scholastic and personal conduct goals.

DANGER OF "WELFARE CYCLE"

"We need to learn what works for whom" through experimental programs rather than looking for an overall policy panacea, Glaser said.

There also is concern, even among liberals who support more generous benefits, about the dangers of the "welfare cycle."

Glasgow, for instance, spoke of "an increasing tendency for certain members of deprived groups to feel that society owes them something since it has systematically deprived them of their natural rights as citizens." But, he declared, "dependence on welfare as the means to correct the ills of the . . . underclass is a mistake" and "public assistance must never be accepted as the primary source of income by black work-capable citizens."

Thus there is a broad consensus that jobs are the best way to help underclass, and there is almost universal agreement that government cannot do it alone.

Glasgow said that while the federal government might mount an effective start-up program, it is through the private sector that members of the underclass can "begin to break the cycle of entrapment."

"... Welfare and hustling may suffice when there is no other way," he said, "but they are no substitute for regular, adequately paid work...."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. GILMAN (at the request of Mr. MICHEL), for an indefinite period, because of participation as a member of U.S. delegation to United Nations General Assembly.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 859. An act to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes, to the Committee on Armed Services.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2120. An act to facilitate the ability of product sellers to establish product liability risk retention groups, to facilitate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes; and

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry

Deal Co.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Benedict) to revise and extend their remarks and include extraneous material:)

Mr. Wampler, for 15 minutes, September 15, 1981.

Mr. Dannemeyer, for 30 minutes, today.

Mr. Dannemeyer, for 30 minutes, September 15, 1981.

Mr. Dannemeyer, for 30 minutes, September 16, 1981.

Mr. Dannemeyer, for 30 minutes, September 17, 1981.

Mr. Leach of Iowa, for 60 minutes, today.

Mr. Edwards of Alabama, for 30 minutes, today.

Mr. Dannemeyer, for 30 minutes, September 18, 1981.

(The following Members (at the request of Mr. Dyson) to revise and extend their remarks and include extraneous material:)

Mr. NEAL, for 5 minutes, today.

Mr. Gonzalez, for 15 minutes, today. Mr. Annunzio, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. Hubbard, for 5 minutes, today. Mr. Fascell, for 5 minutes, today.

Mr. O'NEILL and Mrs. Boggs, for 30 minutes each, on September 16, 1981, to lead tributes to Gary Hymel.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Addabbo, substitute amendment to be offered tomorrow by the Committee on Appropriations may be printed in the Record immediately after the total debate on H.R. 3380.

Mr. Addabbo's remarks to be included prior to the committee rising on

H.R. 3380.

Mr. RICHMOND, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the Congressional Record and is estimated by the Public Printer to cost \$2,040.

(The following Members (at the request of Mr. BENEDICT) and to include

extraneous matter:)

Mr. SOLOMON.

Mr. BEARD.

Mr. Dornan of California in two instances.

Mr. HUNTER.

Mr. LEBOUTILLIER.

Mr. BADHAM.

Mr. Wolf.

Mr. DERWINSKI in two instances.

Mr. Collins of Texas.

(The following Members (at the request of Mr. Dyson) and to include extraneous matter:)

Mr. Rose.

Mr. Anderson in 10 instances.

Mr. Gonzalez in 10 instances.

Mr. Brown of California in 10 instances.

Mr. Annunzio in six instances.

Mr. Jones of Tennessee in 10 instances.

Mr. Boner of Tennessee in five instances.

Mr. McDonald.

Mr. PHILLIP BURTON.

Mr. NATCHER.

Mr. PEASE.

Mr. ROYBAL. Mr. SCHUMER.

Mr. DAN DANIEL.

Mr. WHITTEN.

Mr. RANGEL.

Mr. AUCOIN.

Mr. NEAL.

Mr. SANTINI.

Mr. PEYSER.

Mr. BRODHEAD.

Mr. GEJDENSON.

ADJOURNMENT

Mr. DYSON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 7 minutes p.m.), the House adjourned until tomorrow, Tuesday, September 15, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2172. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting notice of various transfers of amounts appropriated to the Department of Defense, pursuant to section 750 of Public Law 96-527; to the Committee on Appropriations.

2173. A letter from the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), transmitting a report as of June 30, 1981, on Selected Reserve recruiting and retention incentives, pursuant to 10 U.S.C. 2134, and 37 U.S.C. 308b and 308c; to the Committee on Armed Services.

2174. A letter from the Secretary of Housing and Urban Development, transmitting a report on the need for further legislation in the area of real estate settlements, pursuant to section 14(a) of Public Law 93-533; to the Committee on Banking, Finance and Urban Affairs.

2175. A letter from the Chairman, National Advisory Council on Ethnic Heritage Studies, transmitting the annual report of the council, pursuant to section 443(a)(2) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

2176. A letter from the Clerk, U.S. Court of Claims, transmitting the court's judgment order in Docket No. 179-A, The Nez Perce Tribe of Idaho v. The United States; to the Committee on Interior and Insular Affairs.

2177. A letter from the Clerk, U.S. Court of Claims, transmitting the court's judgment order in Docket No. 279-D, Blackfeet Tribe of Indians v. The United States; to the Committee on Interior and Insular Affairs.

2178. A letter from the Director, Federal Prison System, Department of Justice, transmitting the annual report of the Board of Directors of Federal Prison Industries, Inc., for fiscal year 1980, pursuant to 18 U.S.C. 4127; to the Committee on the Judiciary.

ary.
2179. A letter from the General Counsel,
Federal Emergency Management Agency,
transmitting a draft of proposed legislation
to amend the Disaster Relief Act of 1974, as
amended; to the Committee on Public
Works and Transportation.

2180. A letter from the Secretary of Commerce, transmitting the annual report of the Commerce Department for fiscal year 1980, pursuant to section 8 of the act of February 14, 1903; jointly, to the Committees on Energy and Commerce, Merchant Marine and Fisheries, and Public Works and Transportation.

2181. A letter from the Acting Comptroller General of the United States, transmitting a report on implementation of the Federal merit pay system (FPCD-81-73, Sept. 11, 1981); jointly, to the Committees on Government Operations and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee on Appropriations. H.J. Res. 325. Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes. (Rept. No. 97-223). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BARNES (for himself, Mr. Fazio, and Mr. Hoyer):

H.R. 4467. A bill to amend title 5, United States Code, to restore semiannual cost-of-living adjustments for Federal annuitants; to the Committee on Post Office and Civil Service.

By Mr. DANIELSON (for himself and Mr. Moorhead):

H.R. 4468. A bill to amend chapter 84, section 1752 of title 18, United States Code, to authorize the Secretary of the Treasury to establish zones of protection for certain persons protected by the U.S. Secret Service; to the Committee on the Judiciary.

By Mr. LEHMAN:

H.R. 4469. A bill to allow Federal employees a 1-year period to modify or revoke any survivor benefit election made under section 8339 (j) or (k) of title 5, United States Code; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON (for himself and Mr. Howard):

H. Con. Res. 179. Concurrent resolution making apportionment of funds for the National System of Interstate and Defense Highways for the fiscal year 1983; to the Committee on Public Works and Transportation

By Mr. LAGOMARSINO:

H. Res. 213. Resolution expressing the sense of the House of Representatives with respect to the scheduled meeting of the Inter-parliamentary Union in Havana, Cuba, in September 1981; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

181. By the SPEAKER: Memorial of the House of Representatives of Northern Marianas Commonwealth, relative to exempting the Northern Marianas Commonwealth from the application of the Clean Air Act; to the Committee on Energy and Commerce.

182. Also, memorial of the Legislature of the State of California, relative to the sale of naval vessels; to the Committee on Foreign Affairs.

183. Also, memorial of the Legislature of the State of California relative to social security recipients; to the Committee on Ways and Means.

184. Also, memorial of the Legislature of the State of Mississippi, relative to storage of nuclear waste; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. HUBBARD:

H.R. 4470. A bill for the relief of John Denfip; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 375: Mr. Dyson and Mr. Stark.

H.R. 741: Mr. Dyson and Mr. Howard. H.R. 1776: Mr. Fithian, Mr. Leach of Iowa, Mr. Martin of New York, and Mr.

H.R. 2007: Mr. Hyde, Mr. Pashayan, Mr. BENJAMIN, Mr. CARNEY, Mr. JOHN L. BURTON, Mr. KINDNESS, Mr. DANNEMEYER, Mr. Patterson, Mr. Bereuter, Mr. Tauke, Mr. Stangeland, Mr. Davis, Mr. Fary, Mr. FLORIO, Mr. HAMMERSCHMIDT, and Mr. MILLER of Ohio.

H.R. 2068: Mr. FRANK.

H.R. 2103: Mr. McCollum.

H.R. 2104: Mr. Goodling. H.R. 2244: Mr. Wolpe. H.R. 2389. Mr. Hammerschmidt.

H.R. 2488: Mr. Long of Maryland.

2832: Mr. McCollum, Mrs. BOUQUARD, and Mr. BRODHEAD.

H.R. 2977: Mr. WILLIAMS of Montana. H.R. 3269: Mr. Roe, Mr. Jenkins, Mr. Der-Mr. Roth, Mr. Brown of Colorado, Mr. Long of Louisiana, Mr. Downey, Mr. Dellums, Mr. Miller of Ohio, Mr. Thomas, Mr. Oxley, Mr. LeBoutillier, Mr. Robinson, Mr. HERTEL, Mr. VENTO, and Mr. EMERY

H.R. 3392: Mr. Robinson and Mr. Danne-

MEYER

H.R. 4148: Mr. MARRIOTT. H.R. 4250: Mr. Brown of California, Mr. Wolfe, Mr. Seiberling, Mr. Fauntroy, Mr.

PEYSER, and Mr. OTTINGER.

H.R. 4373: Mr. OTTINGER, Mr. DUNN, Mr. BONKER, Mr. BROOMFIELD, Mr. HORTON, Mr. KILDEE, Mr. McEwen, Mr. Roemer, Mr. Gore, Mr. Pritchard, Mr. Madigan, Mr. WIRTH, Mr. KRAMER, Mr. WYDEN, Mr. MAV-

ROULES, Mr. MARKEY, Mr. GREGG, Ms. FER-RARO, and Mr. DORGAN of North Dakota.

H.J. Res. 260: Mr. BUTLER, Mr. MARTIN of North Carolina, Mr. BEREUTER, Mr. ROBIN-SON, Mr. BREAUX, Mr. ROBERTS of Kansas, Mr. Skeen, Mr. Findley, Mr. Stenholm, Ms.

FIEDLER, and Mr. McEwen.

H.J. Res. 318: Mr. Addabbo, Mr. Alexan-DER, Mr. ANTHONY, Mr. ASPIN, Mr. ATKINson, Mr. AuCoin, Mr. Bailey of Pennsylvania, Mr. Benedict, Mr. Bennett, Mr. Bethune, Mr. Bingham, Mr. Bowen, Mr. Brooks, Mr. Broyhill, Mr. John L. BURTON, Mr. CAMPBELL, Mrs. CHISHOLM, Mr. CONABLE, Mr. D'AMOURS, Mr. ROBERT W DANIEL, JR., Mr. DASCHLE, Mr. DELLUMS, Mr. Derrick, Mr. Dickinson, Mr. Dicks, Mr. Dowdy, Mr. Dwyer, Mr. Eckart, Mr. Ed-WARDS of California, Mr. Evans of Delaware, Mrs. Fenwick, Mr. Flippo, Mr. Florio, Mr. FOLEY, Mr. FORSYTHE, Mr. FOUNTAIN, Mr. FRENZEL, Mr. FROST, Mr. GRADISON, Mr. GREEN, Mr. RALPH M. HALL, Mr. SAM B. HALL, Mr. HAMMERSCHMIDT, Mr. HARTNETT, Mr. Howard, Mr. Hyde, Mr. Kazen, Mr. KRAMER, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEBOUTILLIER, Mr. LOEF-FLER, Mr. LOTT, Mr. LOWRY of Washington, Mr. Lujan, Mr. Martin of New York, Mr. Mr. LUJAN, Mr. MARTIN OF NEW TOTK, MIL.
McCloskey, Mr. Mitchell of New York,
Mr. Mollohan, Mr. Montgomery, Mr.
Mottl, Mr. Murtha, Mr. Nelligan, Ms.
Oakar, Mr. Patman, Mr. Pickle, Mr. PRITCHARD, Mr. RAHALL, Mr. RICHMOND, Mr. ROBERTS of South Dakota, Mr. ROTH, Mr. Russo, Mr. Sabo, Mr. Scheuer, Mr. Schu-MER, Mr. SHELBY, Mr. SHUSTER, Mr. SMITH OF New Jersey, Mr. SMITH Of Oregon, Mr. SOLARZ, Mr. SPENCE, Mr. STATON OF West Vir-ginia, Mr. Trible, Mr. Weaver, Mr. Whit-TEN, Mr. WINN, Mr. WORTLEY, Mr. WRIGHT, Mr. WYDEN, and Mr. YATRON.

H. Con. Res. 56: Ms. FIEDLER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

190. By the SPEAKER: Petition of the National Guard Association of the United States, Washington, D.C., relative to the statement of the National Governors' Association on readiness of the Army and Air

National Guard; to the Committee on Armed Services

191. Also, petition of the Executive Board, National Association of the Deaf, Silver Spring, Md., relative to telephone access for persons who use hearing aids: to the Committee on Energy and Commerce.

192. Also, petition of the Episcopal Urban Caucus of Maryland, relative to decontrol of natural gas prices; to the Committee on

Energy and Commerce.

193. Also, petition of the City Council, Duluth, Minn., relative to decontrol of natural gas prices; to the Committee on Energy and Commerce

194. Also, petition of Harry Sharp, Altus, Okla., et al., relative to citizens' band radio regulation; to the Committee on Energy and Commerce.

195. Also, petition of Genelle Martin, Flint, Tex., et al., relative to citizens' band radio regulation; to the Committee on Energy and Commerce.

196. Also, petition of the City Council, Hazleton, Pa., relative to Northern Ireland; to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3380

By Mr. SKELTON: -At the end of the bill, add the following new section:

INCREASE IN NUMBER OF SENIOR RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. . Section 2107, title 10, United States relating to financial assistance for specially selected members is amended as follows: In subsection (h), after the words "Navy program": strike "6,000" and insert "8,000" and after the words "Air Force program": strike "6,500" and insert "9,500".

H.R. 4241

By Mr. JAMES K. COYNE: -Page 7, line 8, strike out "\$2,238,027,000" and insert in lieu thereof "\$2,223,117,000".

Page 7, line 12, strike out "\$275,545,000" and insert in lieu thereof "\$260,635,000".

SENATE—Monday, September 14, 1981

(Legislative day of Wednesday, September 9, 1981)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray. Almighty God, gracious Father of us all, Thou hast guided the leadership of this Nation through troubled waters in the past. In the words of the first President of the United States:

"No people can be bound to acknowledge and adore the Invisible Hand which conducts the affairs of men more than those of the United States. Every step by which they have advanced to the character of an independent nation seems to have been distinguished by some token of providential agency * * * ."

We come to Thee O God, in an hour of great need. The Senate faces a superhuman task against a stubborn economy that refuses to yield to every effort to check its destructive course, and which seems bound to crush all the hopes and aspirations of the people. Thou alone, O Lord, hast the wisdom and the power needed at this critical hour.

Grant to Thy servants in the Senate, gracious Father, Thy wisdom and energy, that they may be adequate to the challenge of what seems an impossible situation. Assure them of Thy presence, love, and grace in their labors. We pray this in the name of Him in whom is all power in heaven and on Earth. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized. Mr. BAKER. Mr. President, I thank

the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE WORKLOAD

Mr. BAKER. Mr. President, on last Wednesday, the Senate reconvened after the statutory August break. I attempted to outline the many major measures yet to be completed by the Senate in the time remaining before sine die adjournment of this year. Among those items are the remaining appropriations bills; probably a continuing resolution for appropriations; the second concurrent budget resolution, which the statute requires of us

this fall; the farm bill, which I intend to ask the Senate to consider beginning Communications Act amendments; and the expulsion resolution reported by the Ethics Committee with respect to Senator HARRISON A. WILLIAMS,

ETHICS COMMITTEE RESOLUTION CONCERNING SENATOR WILLIAMS

As to the Williams resolution, the leadership has taken account of the committee's scheduling recommendations and, notwithstanding the fact that the measure is now on the calendar, no effort has been made nor will be made for the time being to schedule it for action by the full

However, it is necessary that this item be scheduled for consideration according to the requirements of the Senate workload. To that end, Senators should be advised that it is the intention of the leadership to recommend that sometime in early November, the Senate proceed to consideration of the resolution of expulsion

Mr. ROBERT C. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. ROBERT C. BYRD. Mr. President, I believe that the majority leader has indicated a very reasonable approach with respect to the scheduling of the Williams resolution. The leader is taking into account the very considerable workload that remains for the Senate to handle by way of the appropriations bills, the continuing resolution, the second concurrent budget resolution, the extension of the debt limit, and the various other pieces of legislation that are aside from the appropriations and budget process. I think that the majority leader is quite correct in his judgment that these matters should be approached first. After all, it is the economy of the Nation that is uppermost in the minds of the American people and it behooves the Senate to act as expeditiously as possible in dealing with the budget, with appropriations matters, extending the debt limit, and

I also feel that the majority leader has acted appropriately in stating that sometime in early November the Senate will proceed to consideration of the resolution of expulsion. That seems to me to be a fair timetable. It seems to me to be a realistic one. I am certainly supportive of the majority leader in this respect.

I think I should make it clear that, insofar as this Senator is concerned, I do not believe that the decisions that remain for Judge Pratt to make should have any bearing whatsoever on this body's deliberations in connection with this matter.

I think that the Senate has a responsibility of its own to act based on the facts and in consideration of the recommendation that was made unanimously by the members of the Senate Ethics Committee. That committee recommended that the Senator be expelled. It also recommended that the Senate wait until such time as the appeals process has been able to run its course.

I take this occasion to compliment the committee. It was a difficult decision, I am sure. I compliment the members of the committee on both sides of the aisle for the duty which they have performed. I think it is a very compelling recommendation by the committee when we realize that it was entered into unanimously. I think it is reasonable to wait until around the 1st of November to proceed with this case.

For the reasons that have been set forth by the distinguished majority leader. I feel that the Senate has a constitutional responsibility to act one way or the other in this matter and to do so fairly expeditiously and, certainly, taking into consideration the other duties and the other legislative problems that confront us. It seems to me that the majority leader has outlined a timetable that takes into consideration all of those very necessary factors.

Again, Mr. President, I emphasize that the Senate is not bound by any decision by the court in this matter. The Senate is bound to fulfill its responsibilities under the Constitution based on whatever facts there are to be weighed and quite independently of the actions of the court.

Having said that, Mr. President, I want to say again that I personally am very comfortable with the schedule that the leader has laid out. I fully support him. I say this, having talked with at least two of the Democratic members of the Ethics Committee.

I have discussed this with Mr. HEFLIN, the ranking minority member, and I have discussed it with Mr. EAGLETON. I have not had an opportunity to discuss it with Mr. PRYOR. But, without presuming to say one way or another how those two members with whom I have discussed the matter may feel personally, I believe that the timetable is a reasonable one and that it comports, it seems to me, with the recommendations of the committee, although perhaps not precisely, in that the Senate, by virtue of the majority leader's statement, is not tying its schedule to that of the court. To do otherwise would be the wrong thing to do, in my judgment.

I am glad that the majority leader is not making his judgment on that basis at all. I am fully supportive of his not having done that, fully supportive of the scheduling of the matter as he has indicated. It gives Senators ample time to study the transcripts, ample time to view the tapes, ample time to give this matter thorough and careful and judicious consideration.

So I thank the majority leader. I appreciate the fact that he is telling us at this time what we can expect. Again, I support his position and the reasons therefor.

Mr. BAKER. I thank the distinguished minority leader. He is most generous in his remarks, and I am grateful for his support in this difficult decision.

I suppose that one of the most difficult things any Member of the Senate must deal with in his career, at least from a personal standpoint, is to pass judgment on one of his colleagues, on the recommendation of the Ethics Committee. That has happened only twice in my experience here, and it has not been pleasant.

I take this opportunity to urge all Members to take account of the fact that they owe a special responsibility to pay close attention to the evidence that will be presented and the proceeding as it unfolds, to be fully prepared to deal with this matter, and to know that we will deal with this matter, when and if the time arrives, to the exclusion of other matters, as carefully as the leadership can urge and encourage and require Senators to do.

In order to help prepare for that unhappy event, I trust that the Senate Ethics Committee will make its recommendations on how they will prepare the evidence for the consideration of Members in advance of the time. There is a great mass of material, that the Ethics Committee has considered and which will be available to Members.

I now yield to the distinguished chairman of the Ethics Committee, the Senator from Wyoming, for any remarks he

may care to make.

Mr. WALLOP. I thank the majority leader and the minority leader for their support in this matter.

I say this, and it is a small distinction, but it is something that I believe bears being stated, because there are so many Members of the legal profession in this body.

The Ethics Committee recommendation was not to wait until the appeal process had run. We were referring to matters which are a part of the trial proceeding, that is, a due process pleading which may or may not have an influence on Judge Pratt's sentencing or affirmation of the conviction by the jury.

Also, I believe the point should be made that the committee's recommendation and resolution stand, regardless of what Judge Pratt rules. It is only a matter of when, not what Judge Pratt rules. So we did not attempt to tie our recommendation to his ruling.

I will present to the majority leader this afternoon a schedule for reviewing the audio and visual recorded material. There are 6 hours in all. not all of which was entirely relevant, but some Senators may want to see all of it. We thought we would put it into packages, one of approximately 3 hours, and then if any Senator says he wants to see the rest, we will make the remaining tapes available. We will do this on 3 days in each of 2 weeks, so that Senators can find time to accommodate their schedules to do this. I urge Senators to do it, because

it is a matter of utmost fairness that they be thoroughly familiar with the evidence on which the Senate has to make its judgment.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. WALLOP, I yield.

Mr. BAKER. I absolutely agree with the distinguished chairman of the Ethics Committee. It is urgent that all Members acquaint themselves with the facts and that they examine the evidence prior to the time the Senate addresses the question of the resolution. I urge Members to do so.

I also urge that Members themselves do so. I am not at all sure that the committee should permit members of the staff to do so. Indeed, I recommend against that.

Mr. WALLOP. I believe it is the judgment of the committee that we will make those tapes available to Members.

Mr. BAKER. Members only. Mr. WALLOP. Members only.

I also urge Members themselves to read the report of the committee. There is a short summary, and there is a very detailed and voluminous report, including the report of the special counsel.

All these things will be made available; and if any Senator desires to have a special briefing on any part of it, we can make special counsel or a member of the staff of the Ethics Committee available to that Member, to ask any questions, and to satisfy himself or herself in any way possible.

Mr. BAKER. I thank the distinguished Senator from Wyoming, the chairman of the Ethics Committee.

I close by urging, once again, that Members take account now of this schedule, take account of the fact that there is a wealth of information to be considered by each Member of the Senate before the date arrives for proceeding to consideration of the resolution by the full Senate.

I hope Senators will use the time remaining in September and October to acquaint themselves fully with this record and will be prepared, early in November, to proceed to consideration of the resolution recommended by the Ethics Committee, as soon as it is scheduled.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I yield it now to the distinguished minority leader, if he wishes, or I will yield the floor.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

How much time do I have, Mr. President?

The PRESIDING OFFICER. The minority leader has 10 minutes.

Mr. ROBERT C. BYRD. I thank the Chair.

CUTTING NATIONAL DEFENSE

Mr. ROBERT C. BYRD. Mr. President, the announcement of cuts in our Na-

tion's defense program by the administration over the weekend raises some serious concerns. It presents fundamental questions about the adequacy of our long-term defense effort, and about the credibility of American staying power. The initial spending levels announced this past March by the administration were certainly not carved in stone-they were, after all, this administration's best estimate of how the Nation should meet the formidable challenges posed to us by the Soviet Union. Changes could be expected as we went along, but the general level of effort seemed appropriate. Now, suddenly, we are reducing by over one-third the increased outlays previously announced over the Carter budget for reasons totally unrelated to our real defense needs, it seems to me.

The administration's initial reaction to the growing military imbalance with the Soviet Union received widespread bipartisan support. The first installment of this defense program was overwhelmingly approved by the Senate in the fiscal year 1982 defense authorization bill. The polls showed a national consensus in favor of the need for higher levels of spending in order to invest in and sustain the forces America needed to meet the Soviet challenge, to lead the Western alliance, and to support new commitments in the Persian Gulf.

The consensus which was forged, and which I believe still exists, is grounded on a real belief that there is no higher priority than the defense of the United States. The level of our defense, the adequacy of our forces, and the credibility of our word, cannot be whipsawed by a changing balance sheet manipulated by the Office of Management and Budget. It is no secret that the men who are charged with seeing to it that America's defenses are where they should be—the Secretary of Defense and Senators in this body—were alarmed by the prospects of the cuts which have just been announced.

In his presentations supporting the budget submissions to Congress, the Secretary of Defense made a convincing case that renewed defense efforts were overdue. His presentations were substantiated by an analysis of the comparative Soviet and American defense effort released by the Central Intelligence Agency last February. The CIA documented a very serious divergence in the Soviet and American defense efforts over the last decade. In the aggregate, for the 1971-80 period, the CIA estimated that the dollar costs of Soviet defense activities were 40 percent higher than comparable U.S. outlays. Last year their expenditures were fully 50 percent higher than our own.

The disparity in strategic forces, as documented in the analysis, is alarming. Including intercontinental missiles and ballistic missile firing submarines the Soviet effort was triple our own. In general purpose forces, including land forces, tactical air, naval and mobility capability—airlift and sealift—the Soviet effort

was 60 percent higher than our own. Even in naval forces, an area in which it is absolutely crucial for an island maritime nation like our own to be preeminent, the Soviets have challenged our supremacy.

The general drift against the United States in the comparative balance of military forces with the Soviet Union was emphasized and reemphasized by the President during his election campaign. It was highlighted and rehighlighted by his chief advisers as they strove to persuade the Congress to accept their new budget formulations. Secretary Weinberger, in his presentation before the Senate reiterated the driving point: President Reagan had an "election mandate to rebuild our defense capability." The defense budgets of the previous administration had been "underfunded," he stated. Again, he said:

The operating levels assumed in those budgets reflect a much more tranquil view of the international political scene than actually exists. Those budgets simply will not support the desired military capability."

The shortfalls in our military capabilities were virtually across the board. There is a "growing imbalance in our strategic forces, while our conventional force structure is too small and lacks sufficient mobility, readiness, and sustainability", said Secretary Weinberger. While we retrenched in the decade of the 1970's, the Soviets, he maintained, "embarked upon a military buildup unprecedented in world history." They have "relentlessly improved their military capabilities all across the spectrum." Thus the budgets of the recent past have been inadequate to support our widespread commitments. They have lead to a diminution of confidence in the United States abroad. They have tempted Soviet adventurism. We must strengthen our presence in Southwest Asia since Southwest Asia will be the "fulcrum of contention for the foreseeable future."

The sum and substance of everything we have heard so far is that major new investments must be made now in strategic forces and in conventional forces. We must be prepared to meet several contingencies—in different parts of the globe—at the same time.

On arms control negotiations with the Soviet Union the policy is to go slowly until we improve our capabilities.

Our allies have been exhorted to increase their defense effort. Deputy Defense Secretary Carlucci received prominent attention across Europe in March when he told our allies that the Soviet military buildup exceeds any rational requirement for defense, that on "all levels of military capability, the trends are ominous." He bluntly pressed European governments to both increase their overall defense effort and to increase their force projections outside the European theater, particularly into southwest Asia.

The Secretary of the Navy and our top admirals have stated with unprecedented bluntness that for the first time the United States has lost its historic edge in naval forces. The Chief of Naval Operations stated in February the "trends of the last decade have led us to this point where even a slim margin of superiority has to be set aside." He continued, "For the first time in anyone's recollections, the U.S. Navy is unable fully to meet its peacetime commitments" and would have to vacate essential areas of the world to respond to an emergency.

The upshot of the rhetoric of the first 9 months of this administration has been that a massive military rebuilding program should be launched. The projected spending program, in gross terms. did not appear to be unreasonablefrom the viewpoints either of the imbalances with the Soviet Union or of historic levels of defense spending in America. The Reagan program, as originally announced, would have provided a defense budget which comprised about 32 percent of the national budget. Although these percentages are higher than those during most of the 1970's, they are considerably lower than comparable figures from the end of World War II up through the early 1970's. In 1960, for instance, nearly one-half of the entire national budget went to defense.

Over the period covered by fiscal years 1982-84, the Reagan administration originally projected increases in outlays of \$38.1 billion above the previous administration's budget. This increase represents the additional cash outlays, the additional spending beyond what would have occurred under the Carter program. The cuts announced this week, amounting to \$13 billion in outlays for those 3 fiscal years, reduces the Reagan administration's add-on's by 34 percent. There is no rationale, from a military standpoint, for these cuts. They are purely and simply dictated by budgetary expediency.

The difficulty has not been in understanding the need for significant increases in the defense budget. It has been in the lack of detailed rationale within the budget. The strong national consensus to meet the Soviet challenge must be sustained by specific justifications. Although the administration has exhorted us to expand our forces to meet a multiplicity of challenges, both conventional and strategic, it has not identified what contingencies we are likely to face, and what new forces, alliances and strategies must be designed to meet them.

Since details of the Nation's longterm defense program have not been made available, indeed perhaps have not yet even been developed, it has been impossible to determine whether the specific spending levels were adequate to do the job.

For instance, the administration has stated that Soviet investments in intercontinental missiles may soon permit them to demolish our land-based missile force in a first strike. It has stated that our aging B-52 bomber force will be inadequate to perform its mission by the end of the decade. Yet it has not been able to make any recommendations on what kind of missile force and bomber force we should produce to correct this problem. Delay and more delay characterize our stra-

tegic decisions. Naturally, without these decisions, it cannot be known what the price tag in the strategic area will be.

In the key sector of naval forces, the administration has stated that its goal should be a Navy of about 600 ships, up from the present active force of about 450. By law, the submission of a 5-year Navy shipbuilding program is required to accompany the executive branch budget submission each year. This plan has not yet been made available. What kind of Navy are we going to build? How many ships? What kind of ships? The answers are not available, and so we cannot know the price tag.

We are clearly commiting ourselves to a firstline defense of the Persian Gulf. How will we do it? What kind of forces will it take? Where are the plans for the new equipment, weapons and military doctrines necessary to credibly guarantee our commitment there? Since the details of our long-term role in the Persian Gulf are not available, we cannot know with any precision what the long-term costs will be.

And so, the cuts announced by the administration are as painless as the increases originally announced. There is an increasing air of unreality over the defense budget process. Neither the increases nor the decreases can be identified with the specifics of a defense program. There are those who have been arguing that even the March budget projections were inadequate to buy the forces needed in all these areas. Yet without a specific program we cannot possibly know what level of spending is appropriate.

But whatever level of spending should be appropriate, it must directly related to our defense needs, to the strength of the West, to the Soviet challenge. These realities cannot be wished away on the altar of a balanced budget. The administration cannot simply rediscover high interest rates and cut back its increases over the previous defense budget by fully one-third. It is irresponsible to delay all the tough decisions in defense in order to wait on the success of the administration's economic program. The fragile consensus supporting significant spending increases will not last forever. The Nation needs a visible, tangible military program. The time for rhetoric has long passed. I do not believe the Senate should endorse somersaults on military spending without the assurance that a carefully developed and effective defense policy will be put into place. It is not too much to expect that such a policy, and the costs necessary to implement it, be articulated without further delay.

Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The minority leader has 2 minutes remaining.
Mr. BAKER. Mr. President, will the Senator yield 30 seconds to me?

Mr. ROBERT C. BYRD. I yield to the distinguished majority leader.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I meant to do this earlier.

I thank the minority leader. I will do it at this time.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the expiration of the time allocated to the two leaders under the standing order and the recognition of the Senator from Wisconsin on his special order there be a brief period for the transaction of routine morning business to extend not beyond the hour of 1 p.m. and that Senators may be permitted to speak for not more than 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF ROBERT P. HUNTER

Mr. BAKER. Mr. President, I have one further matter. I understand that the nomination of Robert P. Hunter, of Virginia, to be a member of the National Labor Relations Board, is cleared on the minority side. If that is correct, I am prepared to proceed to the consideration of that item.

Mr. ROBERT C. BYRD. Mr. President, that is correct.

Mr. BAKER. Mr. President, I will defer it.

I thank the minority leader for advising that it is clear on his calendar.

I will defer that for the time being and thank the Senator for yielding once

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.
Mr. President, I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes.

CAMBODIAN PRISON REMINDS US OF ATROCITIES

Mr. PROXMIRE. Mr. President. I will only take a short part of that time. I did not intend to ask for 15 minutes, but somehow that order was put in.

Mr. President, an article in the Washington Post on August 12 was the last of a brilliant series on Cambodia written by William Branigan.

This piece focuses on the Tuol Seng Prison, which served as a detention center and death camp during the rule of the Khmer Rouge. It presents a macabre monument to the atrocities committed there just 2 years ago. Torture chambers, with a wide range of tools and instruments, remain intact, complete with bloodstains. Mass graves nearby contain thousands of skeletons, estimated to be only a fraction of the tens of thousands who were massacred at Tuol Seng.

The slaughter which took place in Cambodia was not directed at a single ethnic or religious group. Rather, it was directed at a number of different sectors of the population. The entire middle class in the country was exterminated, as were several tribal groups. Then the fury of the revolution was directed at the cadres of the Khmer Rouge itself, and numerous purges took place.

Tuol Seng now stands as a museum, reminding the Cambodian nation of its grim ordeal. It also stands as a reminder to the United States, and to this body, that mass murders can and do occur in this age.

Extreme violations of human rights such as that which took place in Cambodia can and must be condemned by the world community. The United States. as a leader of the free nations and a strong advocate of human rights, has an especially large responsibility for speaking out against such actions.

We do speak out. But, unfortunately, some of our actions are inconsistent with our words. We condemn human rights violations, yet we have not ratified the most basic of human rights treaties, the Genocide Convention. As the Tuol Seng Prison shows with gruesome clarity, massive violations of human rights continue to recur. We must strengthen our voice in condemning such violations. We must ratify the Genocide Convention.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

The Senator from Virginia is recog-

THE HIGH INTEREST RATES

Mr. HARRY F. BYRD, JR. Mr. President, I invite the attention of the Senate to the RECORD of Friday, September 11. On page 20270 is a speech delivered in the Senate of the United States this past Friday by the distinguished senior Senator from Wisconsin (Mr. Prox-MIRE) which is captioned "Why Congress Should Not Increase the Debt Limit," although the speech itself does not deal precisely with that point. That is not the point I am alluding to in my

comments today.
I think Senator PROXMIRE, in his speech of this past Friday, made one of the finest presentations I have read in regard to what can and cannot be done to bring interest rates down. The Senator from Virginia happens to believe that the current high interest rates are absolutely devastating to our Nation, devastating to the homebuilding industry, devastating to those who need and want to buy homes, devastating to those who want to buy automobiles, devastating to automobile dealers all down the line, to the farmers—farmers must go into the money markets to finance their crops each year, and they are paying in my area 21- and 21.5-percent interest.

These high interest rates are devastating in spite of attempts made to bring them down. But, as Senator PROXMIRE SO ably argues in his speech of last Friday, there is no way you can legislate a reduction in interest rates. I will not attempt to paraphrase Senator PROXMIRE's speech because it is his language and his words, which are so much better than I can make them. I would prefer just to invite the attention of our colleagues in the Senate to that speech by Senator PROXMIRE and urge that it be read because, in my opinion, it makes so much sense. It makes so much sense that there is only a certain amount that the Federal Reserve Board can do in regard to controlling interest rates.

There is no way the Federal Reserve Board can control long-term interest rates. There is just no way it can be

Senator Proxmire points out it is possible the Federal Reserve Board can have some effect on short-term interest rates, but even there it is running the risk of stimulating inflation and increasing interest rates rather than bringing about a reduction in interest rates.

As Senator PROXMIRE in his speech points out, the Federal Reserve Board is a creature of the Congress. Congress can abolish the Board if it wishes to do so. Congress can take over the control of the money supply. I do not know of anything worse that could happen to this country than to have 535 politicians trying to determine how to handle this very complicated, difficult monetary policy.

So I rise only to commend the distinguished and able Senator from Wisconsin for his speech. I think it is a masterful presentation. I cannot say that I agree with every word of it, but I agree with virtually all of it.

There is one point that I will mention with which I am not in agreement. Senator PROXMIRE very correctly points out, and I am in agreement with that, that the way to get interest rates under control is to bring down spending, get spending under control, balance the budget so that the Federal Government does not go into the money market to the great extent that it does to finance the national debt. Incidentally, the national debt has doubled in 7 years. No wonder we have high interest rates.

Senator PROXMIRE points out that the public generally and the business community are not convinced that the present fiscal program of the President and the Congress will succeed because they do not feel we will get to a balanced budget. Senator PROXMIRE feels it is doubtful that we will get to a balanced budget.

I am more optimistic on that. I think we can get to a balanced budget in 1984. I think we must get to a balanced budget in 1984. I know Senator Proxmire wants to get to a balanced budget in 1984, and I think if we can get spending under control, that will be the single most important thing that can be done by Congress and the President of the United States to bring about a balanced budget for the fiscal year 1984. I am convinced that it can be done, if the President shows the same determination he has shown for the past 7 months. I want to commend the President of the United States for his determination to bring down Government spending. It was his leadership that brought about the \$35 billion reduction in projected spending. Had it not been for his leadership I say

the Congress of the United States would never have had the courage to reduce spending to the degree that it has.

I personally feel we must go beyond the reductions that have already been made. I think we should make additional reductions for fiscal 1982, the budget we are now working on.

I support a reduction in the projected increase for national defense. I am a strong advocate of national defense, and I have been a strong advocate ever since I have been in the Senate. But I feel the Defense Department cannot be sacrosanct. We cannot give a blank check to the Fentagon any more than we can give a blank check to any of the other departments of Government.

So I would hope that the Congress would take a very careful look at what we are preparing to do in regard to defense expenditures. I propose to support President Reagan in reductions in that Department that I understand he will recommend.

But, primarily, today I want to congratulate once again the able and distinguished Senator from Wisconsin (Mr. Proxmire) for his speech of last Friday and to urge all of my colleagues to read that excellent address.

Mr. PROXMIRE. Will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I am happy to yield.

Mr. PROXMIRE. Mr. President, I want to thank my good friend from Virginia for his remarks. There is no Member of the Senate whose support I would rather have. He has a completely consistent record through all the years he has spent in this Senate in fighting against waste and excessive spending and fighting to balance the budget and bring our fiscal policy under control. If we had 99 more HARRY BYRD'S here, we would not have the problem we have with the budget.

So I want to thank my good friend for his support. I think he is so right. Unfortunately, we cannot get our colleagues to see it this way, but he is so right in pointing out that the one way, the one way, we can effectively get interest rates under control is to get the Federal Government out of the credit markets in the massive way we are.

There is just no disputing the fact that Congress of the United States and administrations over the years, over the last 20 years or more, have been responsible for putting us into a position where we have created such a tremendous demand for the available credit that interest rates have gone right through the roof.

And the Senator is right in saying that if the small businessmen of this country and the farmers of this country and the homebuilders want relief, they should tell their Congressman what they want their Congressman to do is to work where the Congressman can be effective to cut spending down and balance the budget.

I pointed out, and I wish to reiterate because I think it is so important, that last year, in 1980, out of every \$100 of new savings \$17 of that was required to fund the budget deficit and another \$17 was required to fund off-budget borrowing, the increase in that. In other words, if we had a balanced budget, not had any net increase in off-budget borrowing, we would have a huge one-third increase for normal available for porrowing in this country, interest rates would have been much lower, funds would have been available for the homebuilding industry and the automobile industry and other industries that would have put people to work, and the economy would have been far healthier. That is the kind of policy we are going to have to establish.

I am delighted that my good friend from Virginia has made the statement he has. I am deeply flattered and grateful to him for his remarks.

Mr. HARRY F. BYRD, JR. Mr. President, I thank the Senator from Wisconsin. I might say, in regard to the extent that the Government is going into the money markets, at a hearing before the Taxation Subcommittee of the Finance Committee this past Friday, the Treasury Department testified that for the fiscal year 1982, which begins on October 1, the Government will need to go into the money markets with \$252 billion just to roll over the existing debt; then, on top of that, it must go into the money markets for somewhere between \$60 billion and \$90 billion for new debt.

The national debt today is \$979 billion. The Treasury Department told the Finance Committee, on this past Friday, that at the end of another year it will be \$1.079.000.000,000.

Now, there is no wonder that interest rates are high. The Government is forcing the interest rates up by its huge deficit spending and the resultant borrowing. And it is not just for 1 year that that is being done. As I see it, it is the effect of accelerated and cumulated deficits over a period of 20 years.

So this matter of doing something about interest rates comes back to the Congress of the United States. It has been the irresponsible action of the Congress over a period of years that has brought on, in my judgment, this high inflation and these high interest rates.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business, under the same terms and conditions, be extended to not later than I:15 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CAPE HATTERAS LIGHTHOUSE

Mr. HELMS. Mr. President, for more than 200 years, the Cape Hatteras Lighthouse has been the symbol of the North Carolina Outer Banks. It is one of the country's most famous lighthouses, and its unique candy-stripe exter or makes it the most recognized lighthouse on the east coast. The lighthouse has so dominated the landscape and the history of the area that it has been placed on the National Register of Historic Places.

The collision of two currents off the North Carolina coast prompted early sailors to recognize the necessity of a lighthouse at the tip of Cape Hatteras. It is there that the warm Gulf Stream meets the cold, south-bound Virginia coastal current accounting for the treacherous Diamond Shoals—shoals that have been called the graveyard of the Atlantic. Since the first recorded shipwreck occurred on these shoals in 1526, more than 2,300 wrecks have been recorded there.

It was Alexander Hamilton who, as Secretary of the Treasury, first proposed that Congress acquire the land and construct a lighthouse at Cape Hatteras. During the Revolutionary War, when he had been George Washington's aide-decamp, he was on a ship caught in a storm off the cape. The ship narrowly avoided destruction on the treacherous shoals. This near miss was not forgotten and with his assistance, the first lighthouse was completed in 1803 to warn passing ships away from the danger.

There were many complaints about the location and the size of the first lighthouse. It was said to be too short and too far from shore. So, in 1870, the present 208-foot-tall lighthouse was built 600 feet north of the original structure and 1,500 feet from the shore.

Soon after construction, it was noted that the eastern beach had begun to erode—so much so that by 1919, the ocean was within 300 feet of the base of the lighthouse. By the early 1930's, the water was so close that a skeleton lighthouse was constructed some distance away to replace it.

Over the years, various efforts were made to control the erosion threatening the lighthouse. The efforts were so successful in restoring the beach that in 1950, the light was returned to the lighthouse. It has sent its message across the water from there ever since.

Now, erosion once again jeopardizes this important piece of North Carolina history. Experts indicate that a major storm could topple the structure at any time. The Park Service, which now has jurisdiction over the lighthouse because of its location in the Cape Hatteras National Seashore, has estimated that it could take several million dollars to save it. At this point, sufficient Federal funds simply are not available to initiate such an operation.

I am gratified by the many folks in North Carolina and around the country who share my love for the lighthouse and who are willing to step in to help in the crisis. They have formed a Save the Cape Hatteras Lighthouse Committee to raise the necessary funds to meet the challenge. The group has honored me by asking that I serve as cochairman of the committee. Hopefully, through the efforts of this group and the National Park Service, the light will continue to shine from the lighthouse as a symbol of our proud maritime heritage.

Miss Katherine Hunter, a fine citizen of Raleigh, N.C., has expressed in a poem the respect we all have for the monument and the concern we have for its preservation. I ask unanimuos consent that Miss Hunter's poem appear in the Rec-ORD at the conclusion of my remarks.

There being no objection, the poem was ordered to be printed in the Record, as follows:

THE HERITAGE OF HATTERAS

I am one of the last kings of the modern world.

My majestic form, tall and strong, still reigns as it has for the past hundred years Over the misty blue and green beauty of Cape Hatteras.

My realm encompasses the vastness of the threatening sea

And the narrowness of the sandy islands. The creatures of the ocean and the inhabitants of the island

Worship and love me, for I am a part of them. Dressed in regal robes of black and white with a crown of diamond brilliance,

I watch over my people, from the sandy barefoot child Who gazes up at me in awe to the salt-

whiskered old sailor who looks to me for safety.

unshakable endurance I guide them through the empty night like a spiritual force.

The tradition of my monarchy is a part of their heritage;

I am the visible symbol that links these people with their forefathers and an older and simpler way of life.

But kings and queens are only remnants of fairy tales, Mere elements of pageantry whose days of

power have diminished.

I too feel the growing threat against my power, against my very existence, As the encroaching sea steals the sandy soil

wherein lie my roots and the roots of my people.

Although I have heard the seagulls crying rumors of my demise, I know my people will not foresake me, for

my imperial loftiness

With its past enduring strength against the pounding sea represents the spirit of Hatteras.

I am the unspoken whisper that mingles the past with the present.

-KATHERINE HUNTER.

REQUEST TO STATION ADDITIONAL PERSONNEL WITHIN THE TERRI-TORY OF GUAM

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution which was adopted by the Guam Legislature relating to a request that the Department of Justice and the Federal Bureau of Investigation station additional personnel in their field office situated within the Territory of Guam.

There being no objection, the resolu-tion was ordered to be printed in the RECORD, as follows:

RESOLUTION No. 119

Be it resolved by the Legislature of the Territory of Guam:

Whereas, the Legislature of the Territory of Guam takes special note that Federal agencies have been recently more responsive to Federal law enforcement needs as exemplified by the assignment to Guam of resident Federal Drug Enforcement Agents, an alcohol, tobacco and firearms agent, an additional investigative agent assigned to

Immigration and Naturalization Service, and an additional Deputy U.S. Marshal; and Whereas, the Legislature of the Territory

of Guam takes note that the Federal Bureau of Investigation (FBI) is responsible for investigating over two hundred possible Federal violations, including investigative re-sponsibilities in the field of foreign counterintelligence; and

Whereas, the Legislature of the territory of Guam also takes note that the territory of Guam benefits from the various federal programs involving the use of Federal fundthe intentional misuse of which can involve violations of federal law, the investigation of which primarily falls under the jurisdiction of the Federal Bureau of Investigation (FBI); and

Whereas, the Legislature further takes note that the Federal Bureau of Investigation (FBI) personnel stationed on Guam have responsibilities Investigative Guam, the Commonwealth of the Northern Mariana Islands, all the islands in the Trust Territory of the Pacific Islands and in the area of foreign counter-intelligence; and

Whereas, the Legislature of the territory of Guam also takes note that the territory of Guam, the Commonwealth of the Northern Mariana Islands and the islands in the Trust Territory of the Pacific, are situated over three thousand five hundred (3,500) miles from the closest state and nearly six thousand (6,000) miles from the mainland United States; and

Whereas, the Legislature of the territory of Guam takes note that presently, only one resident FBI agent is assigned to Guam to investigate matters involving federal law enforcement; now, therefore, be it

Resolved, that the Legislature of the territory of Cuam hereby compliments the Federal Bureau of Investigation (FBI) for the active work of the FBI agents stationed on Guam; and be it further

Resolved, that the territory of Guam would benefit greatly if additional FBI agents and proper support personnel were assigned to the territory to carry out the unique responsibilities of the Federal Bureau of Investigation which the Legislature collectively resolves are of significant importance to the welfare of all United States citizens and the residents of the territory of Guam, the Commonwealth of the Northern Mariana Islands and the Trust Territory of the Pacific Islands; and be it further

Resolved, that the Legislature, on behalf of the people of Guam, hereby requests the U.S. Department of Justice and the Federal Bureau of Investigation (FBI) to assign to the territory to carry out the responsibilities of the FBI; and be it further

Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the United States Attorney General; to the Director of the Federal Bureau of Investigation; to the Chief of the Hawaii Regional FBI Office; to the United States Department of Justice; to the United States Attorney, District of Guam; to the Drug Enforcement Agent of Guam; to Guam's Congressman, Antonio B. Won Pat; and to the Governor of Guam.

GUAM POWER SYSTEM

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution that was adopted by the Guam legislature relating to the position of the Government of Guam toward, transfer of clear title for the island-wide power system from the U.S. Government to the Government of

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION No. 149

Be it resolved by the Legislature of the Territory of Guam:

Whereas, historically, the United States Government intended that there should be a single island-wide power system (IWPS) on Guam, exclusive of the Navy's standby emergency power equipment, to serve both military and civilian needs, and was in-tended to be eventually transferred to and controlled by the civilian government of Guam, as per Section 28(a) of the Organic Act of Guam as well as the agreement between the Departments of the Navy and Interior; and

power facilities constructed by Whereas. the Navy after World War II were jointly financed by the United States Government and the government of Guam; and

Whereas, the enactment of the Organic Act of Guam, 1950, required the transfer of title to the civil government of all properties needed for the administration of the civilian community, and the Interior-Navy Agreement, also signed in 1950, was intended to provide a scheduled transition of administrative responsibilities from the Navy to the government of Guam, and the Power Pool Agreement of 1972 also intended a timely phaseout of Navy management (control); and

Whereas, Guam Power Authority is now willing and able to accept the responsibility for operating and maintaining the integrated island-wide power system, in fulfillment of the intent of the Power Pool Agreement;

Whereas, the Power Pool Agreement is no longer serving its original intent; and

Whereas, Section 11 of the Organic Act (48 USC § 1423a) exempts all bonds issued by the government of Guam from taxation by the Government of the United States; and Whereas, the Federal Financing Bank and

the Secretary of the Treasury neglected to take this exemption into account in determining Guam's payment schedule and total liability in the \$36 million loan; and

Whereas, proper consideration of this exemption could save Guam hundreds of thousands of dollars per year in payments; now, therefore, be it

Resolved, That the Legislature adopts the attached report as a statement of its findings and position with regard to the Guam power system; and be it further

Resolved, that the Legislature urges the United States Congress to favorably act on the Bill attached hereto or such other measure that would transfer clear title for the island-wide power system from the United States Government to the government of Guam, to rectify inequitable payments made by the government of Guam to the Navy, and to exempt Guam from certain sections of the Clean Air Act; and be it further

Resolved, that Guam Power Authority take action to exercise Section 15 of the Power Pool Agreement, terminating the Power Pool Agreement, and legislation be introduced into Congress to transfer clear title of the island-wide power system to the Guam Power Authority, at no cost, as authorized in Section 28(a) of the Organic Act of Guam. A transition period of six months shall be established during which the Navy and the Guam Power Authority should work closely to coordinate the transfer of controls, the Navy becoming a Guam Power Authority customer, as per the Power Pool Agreement, and as is the practice in other mixed military-civilian communities; and be it further

Resolved, that the U.S. General Accounting Office review the Navy's files to determine if inequitable payments have been made to the Navy by Guam Power Authority,

any inequities being found shall be credited towards payment of the \$36 Million federally guaranteed loan to the Guam Power Authority; and be it further

Resolved, that the Federal Financing Bank and the Secretary of Treasury review the \$36 Million loan documentation to determine Guam's obligation in light of the tax exemption: and be it further

Resolved, that the Federal Financing Bank credit the Guam account for any overpay-ment that may have occurred as a result of the non-application of the tax exemption; and be it further

Resolved, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the President of the United States; to the President of the Senate, United States Congress; to the Speaker of the House of Representatives, United States Congress; to the Secretary of Defense; to the Secretary of the Interior; to the Secretary of the Navy; to the Secretary of the Treasury (Federal Financing Bank); to the General Accounting Office; to Guam's Congressman, Antonio B. Won Pat; to the Commander-in-Chief, Pacific Fleet, Hawaii; to the Commander, Naval Force Marianas; to the Federal Comptroller of Guam; to the Governor of the Commonwealth of the Northern Marianas; to the Executive Director of the Commissioners' Council; to the Chairman and Board members of the Guam Power Authority; to the General Manager of the Guam Power Authority; to the Lieutenant Governor of Guam; and to the Governor of Guam.

REQUEST THAT CERTAIN MINNE-SOTA COUNTIES BE DECLARED DISASTER AREAS

Mr. THURMOND. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution that was adopted by the Minnesota State legislature memorializing the President and Congress to declare certain Minnesota counties to be disaster areas for the purpose of receiving Federal disaster aid.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION

Whereas, on Sunday, June 14, 1981, a tornado devastated portions of Hennepin and Ramsey Counties; and,

Whereas, on Sunday, June 21, 1981, and Tuesday, June 23, 1981, a hail, wind, and rainstorm devastated Chippewa, Renville, Redwood, Brown, Nicollet, Watonwan, Blue Earth, Martin, Faribault, Freeborn, Steele, Waseca, Mower, Big Stone, Yellow Medicine,

and Lac Qui Parle Counties; and,
Whereas, the total damage of the two
storms may total in excess of \$310,000,000, and since a significant portion is uninsured, the burden of loss must be borne by individual farmers and property owners, and state, city, and county governments; and,

the resources of individuals. farmers, and various governmental units are inadequate to alleviate the losses; and,

Whereas, the storm also caused incal-culable human suffering by those who were the victims of the disasters; and.

Whereas, the health and stability of Minnesota's farm and agricultural economy is vital to the entire economy of Minnesota;

Whereas, it is necessary that the victims receive aid from the federal government to relieve their distress:

Now, Therefore, Be It Resolved by the Legislature of the State of Minnesota that the President and Congress should take the necessary action to ensure that the counties in Minnesota which were subject to storm damage on June 14, 21, and 23, 1981, promptly receive federal disaster assistance.

Be it further resolved that the Secretary or State of the State of Minnesota is directed to transmit certified copies of this memorial to the President of the United States, the President and the Secretary of the United States Senate, the Speaker and Chief Clerk of the United States House of Representatives and to Minnesota's Senators and Representatives in Congress.

THE 1981 ANNUAL REPORT OF THE BOARD OF TRUSTEES OF THE FEDERAL SUPPLEMENTARY MEDI-CAL INSURANCE TRUST FUND

Mr. THURMOND. Mr. President, as the President pro tempore of this body, I have received the 1981 annual report of the board of trustees of the Federal supplementary medical insurance trust fund. This report is available for review by my colleagues in the office of the President pro tempore.

SOVIET CHEMICAL WARFARE THREAT

Mr. HEFLIN. Mr. President, I greeted the news of Secretary of State Haig's recent speech detailing the Soviet Union's use of deadly chemical weapons in Afghanistan and in Southeast Asia with great horror as well as an uplifting and encouraging sense of relief.

Like all Americans, I hold a basic abhorrance to chemical weapons and I sincerely wish that our unilateral refusal to use these weapons would make all nations of the world refrain from conducting chemical warfare. Unfortunately, that is not the case.

As Secretary Haig so ably explained in his speech in West Berlin, the Soviet Union has been engaged in a massive buildup of its chemical warfare capabilities. In fact, the Soviets have expended hundreds of millions of dollars

to develop and employ the world's most sophisticated defensive-and offensivechemical warfare force.

Yet this fact is by no means "news." Mr. President, frankly I am a bit baffled that Secretary Haig's remarks have been treated by the world's press as a great revelation.

Mr. President, As I mentioned before, along with being horrified, I was greatly relieved by Secretary Haig's speech. I am relieved. Further, I am encouraged and delighted that Secretary Haig and the Reagan administration have recognized and have spoken out on the serious threat to world peace and stability that is posed by the Soviet Union's buildup of its chemical warfare force.

I first spoke of this threat on the Senate floor in June 1980. At that time I pointed to indisputable evidence showing that the Soviet Union had used deadly chemical weapons in Afghanistan as well as in Laos, Yemen, and Cambodia.

The Soviet Union has integrated chemical warfare into all phases of its armed services. Soviet forces are fully trained and ready to mount a deadly chemical warfare attack on our allies in Western Europe and the chances of surviving and retaliating are marginal at best.

Mr. President, United States and NATO forces are dismally underprepared to defend the free world against a Soviet chemical attack. The Soviets have a separate branch of chemical warrare troops consisting of 100,000 specialistseach trained and equipped to use an extensive arsenal of lethal chemical agents. Further, all Soviet and Warsaw Pact soldiers are fully equipped with protective and decontamination equipment as well as deadly offensive chemical weapons.

By contrast, the United States has deemphasized its chemical warfare ca-pabilities and has allowed those capabilities to atrophy. Our stockpiles of 1950's generation chemical weapons are outdated and ineffective. Our soldiers in the field do not have adequate training in dealing with a Soviet chemical weapons attack and are not equipped with adequate protective clothing or decontamination equipment.

Mr. President, last year Congress did take steps to revive our chemical warfare capabilities when we approved a plan to construct a new binary chemical munitions facility in Arkansas. I strongly supported that legislation and believe it was an important first step toward im-proving our national defense posture with respect to chemical weapons.

There is no question that the best deterrent to a Soviet chemical warfare invasion on the United States or on our allies in Western Europe is a strong, viable U.S. chemical warfare capability.

Mr. President, I am relieved that Secretary Haig has brought these facts concerning the Soviet Union's buildup of chemical warfare to the attention of the world. I am encouraged and delighted that President Reagan has indeed recognized the serious threat that an unchecked Soviet build-up of chemical warfare poses to the stability of the free world. The United States must be prepared to counter and retaliate to any Soviet attack-including a chemical weapons assault.

THE PRESIDENTIAL SIGNING OF A PROCLAMATION DECLARING OCTOBER 19 A NATIONAL DAY OF CELEBRATION TO MARK THE BI-CENTENNIAL OF THE YORKTOWN VICTORY

Mr. WARNER. Mr. President, on September 30, 1980, nearly 1 year ago, the Senate passed a joint resolution asking the President to proclaim October 19 a day of national celebration to mark the bicentennial of the Yorktown victory. I have just returned from the White House where President Reagan signed that proclamation.

As a result of the President's action, the victory at Yorktown will be marked in a manner consistent with its unique place in our history.

This is not a celebration simply for Yorktown. Nor is it a celebration simply for Virginia. This is a celebration for our entire Nation. Just as the Fourth of July belongs to our Nation, so does the victory at Yorktown.

The American republic was proclaimed to the world on the Fourth of July 1776, in the stirring words of the Declaration

of Independence.

But, Mr. President, just as there is a difference between words and deeds, so too is there a difference between declaring independence and achieving independence. American independence had to be won on the battlefield and it was at Yorktown where that independence was finally won.

Of equal significance, Yorktown also decided for America that ultimate political power would rest, not in the hands of governments, but in the hands of

people.

This celebration has served in the past and will serve again in 1981 as a tangible pledge to America's future. It will serve as a celebration to rededicate those enduring principles upon which this Republic was founded and which have served us so well these 200 years.

For the information of my colleagues, the activities in Yorktown on October 19 will mark the culminated of thousands of man-hours of planning, and a series of smaller, but individually significant commemorations of events leading up to the final, decisive battle at which Cornwallis surrendered to Gen. George Washington.

The celebration at Yorktown will be a 4-day event which will include numerous colonial arts and crafts demonstrations, music festivals, parades by militia in period dress, as well as ceremonies involving present day military units of the United States and France.

On October 19, over 4,000 men and women will reenact Cornwallis' surrender to Washington. Major speeches will be given by President Reagan and

French President Mitterand.

As my colleagues will remember, last Thursday Senator HARRY BYRD and I introduced a resolution encouraging the Senate leadership to arrange our legislative schedule so that Members might have the opportunity to attend these ceremonies on October 19. A similar resolution is being introduced in the House of Representatives. It is our hope that, indeed, our colleagues will be able to attend this very special celebration of important event in American history.

Mr. President, I thank the Members of the Senate and the House of Representatives who supported the joint resolutions seeking a Presidential proclamation for this occasion. And I express my gratitude, the gratitude of the peoof Virginia, and the gratitude of all the citizens of our Nation for the recognition President Reagan has now given October 19, 1981, as a national day of celebration to mark the bicen-tennial of the victory at Yorktown.

THE U.S. FARM ECONOMY

Mr. BOSCHWITZ. Mr. President, on the 9th of September, and I am not going to enter the entire article in the REC-ORD, the Journal of Commerce, a highly respected publication, wrote an article entitled "U.S. Farm Economy Study Reveals Gloomy Outlook." Mr. President.

we are going to be taking up the farm bill soon here, on the floor. Many of my actions during the course of consideration of that farm bill are predicated just on the fact that, indeed, as in the U.S. farm economy study that reveals that gloomy outlook, that gloomy outlook is felt on the farm.

The first paragraph says:

The United States economy is teetering on the brink of depression reminiscent of the 1930s, according to a study by Data Resources, Inc., an economic consulting firm in Lexington, Massachusetts.

That almost says it all, Mr. President. I suppose the only thing worse than teetering on the brink of a depression is being in it, but, quite clearly, that situation is close at hand in the farm economy, certainly in my State of Minnesota. So, as we look forward to the farm bill and consideration of it, those are the things I am going to be having in mind.

I note the second paragraph of that

article. It states:

The outlook for farm income and profitability has gone beyond dismal and would have to be termed catastrophic, the firm said in a report of its study perpared by Richard Pottorff, it senior agricultural economist.

Mr. President, the outlook for farm income has gone beyond the term 'dismal" and is now being termed "catastrophic."

Indeed, I find that to be the condition in my State—my State, which has such a broad farm economy, my State which goes so far from the North to the South that we are in the top 10, so to speak, on virtually every farming commodityonly of corn, soybeans, wheat, and dairy, but even such more esoteric crops as potatoes, sugar beets, and sunflowers. which are grown in the northern part of our State which is too far north to accommdate corn and soybeans.

Mr. President, it is my hope that we shall be able to work out some type of accommodation on the farm bill of 1981. I shall do all I can to work out such an accommodation but will not hesitate to do what is necessary to bring about a situation that our farmers can live with. We simply cannot have a catastrophic situation on the farm. The whole base of our economy in this country is predicated on that agricultural sector.

So, Mr. President, we are going to have a long debate. I hope it will not be too long, but in any case, I look forward to putting together a farm bill that will indeed help our farmers through this diffi-

cult period.

Mr. BAKER. Mr. President, I congratulate the Senator from Minnesota for his concern in this matter and for his very active participation in the deliberations of this bill in committee and at a number of meetings that have occurred, some of which I have attended and some which I have not been able to attend. No Member of this body has shown a greater expertise in or a greater concern for the plight of the American dairymen than has the distinguished Senator from Minnesota

I join him in hoping that some resolution of the outstanding differences on the remaining problems of this bill can be worked out. I assure him that I will do my best to see that the parties have an

opportunity to explore the possibilities for resolving the remaining differences and for expediting the passage of an appropriate measure.

Mr. President, in a few moments I intend to ask the Senate to proceed to the consideration of Calendar No. 169, the budget waiver underlying the farm bill.

Assuming that the budget waiver is agreed to, I will then ask that the Senate proceed to the consideration of the

farm bill itself.

When we reach that point, in addition to trying to work out and resolve the remaining differences between us, I hope we can work a unanimous-consent agreement on a limitation of time on the bill itself and, if not on the bill, at least on the amendments that may be offered to the bill, because the senate does have a great deal of work yet to do.

We have this bill tentatively scheduled for today and tomorrow. We will have a cloture vote on Wednesday on the Department of Justice authorization bill. Depending on the outcome of that clo-ture vote, we will then have to turn to the consideration of the Department of Justice authorization bill, under the provisions of rule XXII and sections thereof dealing with postcloture proceedings, or the bill will be taken down, as the previous unanimous-consent order provided.

In any event, this is going to be a full week. As Members attempt to resolve the remaining disagreements and differences on the farm bill, I hope they will consider the possibility of a limitation of time for the consideration of the bill and

amendments thereto.

Mr. President, I observe that the distinguished minority leader, the distinguished chairman of the committee, and the distinguished ranking minority member are in the Chamber. I am prepared at this time to proceed to place this matter before the Senate, if there is no further morning business.

I yield the floor. Mr. ROBERT C. BYRD. Mr. President, there is no objection on this side of the aisle to proceeding with the budget waiver and then with the measure itself.

Mr. BAKER. I thank the Senator.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, is there further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of Calendar 169, Senate Resolution 145, budget waiver underlying S. 884, the farm bill.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows: A resolution (S. Res. 145) waiving sections 303(a)(4) and 402(a) of the Congressional Budget Act of 1974 with respect to the con-sideration of S. 884.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 145) agreed to, as follows:

S. RES. 145

Resolved, That pursuant to sections 303(c) and 402(c) of the Congressional Budget Act of 1974, the provisions of sections 303(a) (4) and 402(a) of such Act are waived with respect to the consideration of S. 884, the Agriculture and Food Act of 1981, a bill to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes

The waiver of section 303(a)(4) is necessary to permit consideration of new spending authority to become effective in fiscal years for which the first concurrent resolution on the budget has not been agreed to. Specifically, S. 884 provides new spending authority under section 401(c)(2)(C) for producers of wheat, feed grains, upland cotton, rice, and other agricultural commodities to become effective in fiscal years 1983, 1984, and 1985, prior to the adoption of the first concurrent resolutions on the budget for such vears.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to extend the dairy indemnity program; extend the solar model farms and demonstration program; extend the rural development and small farm research and extension programs; authorize new programs for agricultural conservation and rangeland research; and authorize additional appro-priations for the purchase of capital stock of the rural telephone bank.

S. 884 extends for four years the basic legislation for almost all of the Nation's major farm commodities, and it is essential that the producers of such commodities know in advance the manner and level of price support in order to plan effective farm operations. The delay in reporting S. 884 was occasioned by a determined effort on the part of the Committee on Agriculture, Nutrition, and Forestry to report legislation meeting the budgetary restraints of the first concurrent resolution on the budget for fiscal year 1982.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AGRICULTURE AND FOOD ACT OF 1981

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 151, S. 884, the farm bill.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 884) to revise and extend programs to provide price support and produc-tion incentives for farmers to assure an abundance of food and fiber, and for other purposes

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike out all after the enacting clause, and insert the follow-

That this Act, with the following table of contents, may be cited as the "Agriculture and Food Act of 1981."

TABLE OF CONTENTS TITLE I-DAIRY

Sec. 101. Dairy base plans.

Sec. 102. Legal status of producer handlers.

Sec. 103. Milk price support.

Sec. 104. Transfer of dairy products to vet-erans hospitals and the military.

Sec. 105. Dairy indemnity program. Sec. 106. Reduction of dairy product inventories.

TITLE II—WOOL AND MOHAIR

Sec. 201. Declaration of policy.

Sec. 202. Extension of support program; support price.

Sec. 203. Payments.

Sec. 204. Reimbursement.

TITLE III-WHEAT

Sec. 301. Loan rates, target prices, disaster payments, wheat acreage reduction program, and land diversion for the 1982 through 1985 crops of wheat.

Sec. 302. Nonapplicability of certificate requirements.

Sec. 303. Suspension of marketing quotas and producer certificate provi-

Sec. 304. Suspension of quota provisions. Sec. 305. Nonapplicability of section 107 of the Agricultural Act of 1949 to the 1982 through 1985 crops of wheat.

TITLE IV-FEED GRAINS

Sec. 401. Loan rates, target prices, disaster payments, feed grain acreage reduction program, and land di-version for the 1982 through 1985 crops of feed grains.

Sec. 402. Nonapplicability of section 105 of the Agricultural Act of 1949 to the 1982 through 1985 crops of feed grains,

TITLE V-UPLAND COTTON

Sec. 501. Base acreage allotments; suspension of marketing quotas and related provisions.

Sec. 502. Loan rates and target prices, disaster payments, cotton acreage reduction program, and land di-version for the 1982 through 1985 crops of upland cotton.

Sec.503. Extension of Commodity Credit Corporation sales price restrictions.

Sec. 504. Miscellaneous cotton provisions.

Sec. 505. Skiprow practices.

Sec. 506. Preliminary allotments for 1986 crops of upland cotton.

Sec. 507. Price support adjustments.

TITLE VI-RICE

Sec. 601. Repeal of provisions relating to national acreage allotments, allocations, apportionment, marketing quotas, and penalties.

Sec. 602. Loan rates, target prices, disaster payments, rice acreage reduction program, and land diversion for the 1982 through 1985 crops of rice.

Sec. 603. Definition of cooperator.

TITLE VII-PEANUTS

Sec. 701. Annual marketing quota and State acreage allotment.

Sec. 702. National acreage allotment; national poundage quota; farm poundage quota; and definitions.

Sec. 703. Sale, lease, and transfer of acreage allotments.

Sec. 704. Marketing penalties; disposition of additional peanuts.

Sec. 705. Reports and records.

Sec. 706. Preservation of unused allotments.

Sec. 707. Price support program.

TITLE VIII—SOYBEANS

Sec. 801. Soybean price support. TITLE IX-SUGAR

Sec. 901. Sugar price support. TITLE X-GRAIN RESERVES

Sec. 1001. Producer storage program. Sec. 1002. International emergency food reserve.

Sec. 1003. Disaster reserve.

Sec. 1004. Farm storage facility loans. Sec. 1005. Conforming amendment. TITLE XI-MISCELLANEOUS

Sec. 1101. Payment limitations for wheat, feed grains, upland cotton, and rice.

Sec. 1102. Finality of determinations.

Sec. 1102. Finally of determinations.

TITLE XVI-EFFECTIVE DATE

Sec. 1601. Effective date.

TITLE I-DAIRY

DAIRY BASE PLANS

SEC. 101. Effective on January 1, 1982, section 8c(5)(B) of the Agricultural Adjustment Act of 1933, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, (7 U.S.C. 608c(5)(B)), is fur-ther amended by striking all that follows the comma at the end of the clause (c) and inserting in lieu thereof the following "(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among pro-ducers on the basis of their marketings of milk during a representative period of time, and (e) a provision providing for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order."

LEGAL STATUS OF PRODUCER HANDLERS

SEC. 102. The legal status of producer handlers of milk under the provisions of the Agricultural Adjustment Act of 1933,

as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, shall be the same subsequent to the adoption of amendment made by the Agriculture and Food Act of 1981 as it was prior thereto.

MILK PRICE SUPPORT

SEC. 103. (a) Section 201(c) of the Agricultural Act of 1949 (7 U.S.C. 1446(c)) is amended by striking out the second sentence and inserting in lieu thereof the following: "Notwithstanding the foregoing, effective for each of the fiscal years during the period beginning October 1, 1981, and ending September 30, 1985, whenever the Secretary estimates that the net cost of Government price support purchases of milk or the products of milk will exceed \$500,000,-000 or that net Government price support purchases of milk or the products of milk will exceed 3.52 billion pounds (milk equivalent) during any fiscal year, the price of milk beginning on October 1 of such fiscal year shall be supported at such level, as determined by the Secretary, not less than 70 per centum of the parity price there-

(b) Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by adding thereto a new subsection (d) as follows:

"(d) Notwithstanding the provisions of

subsection (c) of this section, effective for the period beginning on October 1, 1981, and ending September 30, 1985, the Secretary shall adjust the support price of milk to not less than 70 per centum of the parity price therefor on April 1 of each fiscal year, if on that date the support price of milk is below 70 per centum of the parity price therefor.".

TRANSFER OF DAIRY PRODUCTS TO VETERANS HOSPITALS AND THE MILITARY

104. Section 202 of the Agricultural Act of 1949 is amended by striking out "1981" in subsections (a) and (b) and inserting in lieu thereof "1985".

DATRY INDEMNITY PROGRAMS

SEC. 105. Section 3 of the Act of August 13, 1968 (82 Stat. 750, as amended; 7 U.S.C. 4501) is amended by striking out "1981" and inserting in lieu thereof "1985"

REDUCTION OF DAIRY PRODUCT INVENTORIES

SEC. 106. The Secretary of Agriculture shall utilize, to the fullest extent practicable, the authorities under the Commodity Credit Corporation Charter Act (including expor-tation of dairy products at not less than prevailing world market prices), the Agricultural Trade Development and Assistant Act of 1954 (Public Law 480), and other authorities available to the Secretary to reduce inventories of dairy products held by the Commodity Credit Corporation so as to reduce net Commodity Credit Corporation expenditures to the estimated outlays for the milk price support program used in developing budget outlays under the Congressional Budget Act of 1974 for the appropriate fiscal year.

TITLE II-WOOL AND MOHAIR

DECLARATION OF POLICY

SEC. 201. Section 702 of the National Wool Act of 1954 is amended to read as follows:

"Sec. 702. It is hereby recognized that wool is an essential, strategic, and energy-efficient commodity which is not produced in the United States in sufficient quantities and grades to meet the domestic needs; and that the desired domestic production of wool is impaired by predatory animals and by the depressing effects of wide fluctuations in the price of wool in the world markets. It is hereby declared to be the policy of Congress, as a measure of national security and to promote the general economic welfare, a positive balance of trade, and the efficient use of the Nation's resources, to encourage the continued domestic production of wool at prices fair to both producers and consumers

in a manner which will assure a viable do-mestic wool industry in the future.".

EXTENSION OF SUPPORT PROGRAM; SUPPORT PRICE

SEC. 202. Section 703 of the National Wool

Act of 1954 is amended—
(1) by striking out "1981" in subsection
(a) and inserting in lieu thereof "1965"; and

(2) by striking out all that follows the comma in subsection (b) after the word "Provided" and inserting in lieu thereof the following: "That for the marketing years beginning January 1, 1982, and ending cember 31, 1985, the support price for shorn wool shall be 75 per centum (rounded to the nearest full cent) of the amount calculated according to the foregoing formula.".

PAYMENTS

SEC. 203. The first sentence of section 704 of the National Wool Act of 1954 is amended by striking out the colon after the word "therefore", inserting a period in lieu there-of, and striking out the remainder of the sentence.

REIMBURSEMENT

SEC. 204. Section 705 of the National Wool Act of 1954 is hereby repealed.

TITLE III-WHEAT

LOAN RATES, TARGET PRICES, DISASTER PAY-MENTS, WHEAT ACREAGE REDUCTION PRO-GRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, the Agricultural Act of 1949 is amended by adding after section 107A the following new section: SEC. 107B. Notwithstanding any other

provision of law-

"(a) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of wheat at such level, not less than \$3.50 per bushel, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand con-

ditions, and world prices for wheat.

"(b) (1) (A) In addition, the Secretary shall make available to producers payments for each of the 1932 through 1985 crops of wheat in an amount computed as provided in this subsection. Payments for any such crop of subsection. Payments for any such crop of wheat shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to wheat than the acreage actually planted to wheat.

"(B) The payment rate for wheat shall be

the amount by which the higher of-

"(1) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

(ii) the loan level determined under subsection (a) of this section for such crop, is less than the established price per bushel.

"(C) For the 1982 through 1985 crops of wheat, the established price shall not be less wheat, the established price shall not be fess than \$4.20 per bushel for the 1982 crop, \$4.40 per bushel for the 1983 crop, \$4.60 per bushel for the 1984 crop, and \$4.80 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of pro-duction per acre for the two crop years im-mediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on

the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The total quantity on which pay-

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2)

of this subsection.

"(2) (A) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33½ per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

duction below 80 per centum for the crop.

"(C) With respect to the 1982 through 1985 crops of wheat, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their wheat acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of wheat, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—

that—
"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting wheat or other non-conserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the pro-

ducers for the crop involved.

"(c) (1) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of wheat. The proclama-tion shall be made not later than August 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it neces-sary based upon the latest information, and Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for wheat shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary deter-mines that carryover stocks of wheat are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of wheat. The allocation factor for wheat shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of wheat be more than 100 per centum nor less than

80 per centum.

"(3) The individual farm program acreage for each crop of wheat shall be determined by multiplying the allocation factor by the acreage of wheat planted for harvest on the farms for which individual farm program acreages are required to be determined. The wheat acreage shall not be further reduced by application of the allocation factor if the producers reduce the acreage of wheat planted for harvest on the farm from the previous year by at least the percentage rec-ommended by the Secretary in the proclamation of the national program acreage made not later than August 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage wheat planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for wheat, the Secretary may make such ad-justments as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) The farm program payment yield for each crop of wheat shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for wheat was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwithstanding the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield

established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields shall balance to the national, State, or county program payment yields shall balance to the national,

"(e) (1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to wheat if the Secretary determines that the total supply of wheat will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to wheat acreage base for each wheat-producing farm. Producers on a farm who know-ingly produce wheat in excess of the per-mitted wheat acreage for the farm shall be ineligible for wheat loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be or determining any reduction required to be made for any year as the result of a limita-tion imposed by the Secretary under this paragraph shall be the acreage planted on the farm to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to wheat for harvest in the two crop years immediately preceding the year for which the determina-tion is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of wheat times the number of acres actually planted to such commodity, by (ii) the num-ber of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, saffiower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of wheat if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of wheat. If a land diversion program is in effect under this subsection, the Secretary may also require that pro-

ducers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local com-munity so as not to affect adversely the econ-omy of the county or local community.

(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

'(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participa-tion no later than such date as the Secretary may prescribe. The Secretary may by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

(f) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the

operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this

section.

"(h) The Secretary shall carry out the program authorized by this section through the

Commodity Credit Corporation.

"(1) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other com-modity program may not be required as a condition of eligibility for loans, purchases, or payments under this section.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

Sec. 302. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for process sors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982, through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 303. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricul-

tural Adjustment Act of 1938 shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 304. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRI-CULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF WHEAT

SEC. 305. Section 107 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of wheat.

TITLE IV-FEED GRAINS

LOAN RATES, TARGET PRICES, DISASTER PAY-MENTS, FEED GRAIN ACREAGE REDUCTION PRO-GRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 401. Effective only for the 1982 through 1985 crops of feed grains, the Agricultural Act of 1949 is amended by adding after section 105A the following new section: "SEC. 105B. Notwithstanding any other

provision of law-(a) (1) The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of corn at such level, not less than \$2.60 per bushel, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.

The Secretary shall make available to producers loans and purchases for each of the 1982 through 1985 crops of grain sorghums, barley, oats, and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchasers are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in sec-

tion 401(b) of this Act.

"(b) (1) (A) The Secretary shall make available to producers payments for each of the 1982 through 1985 crops of corn, grain sorghums, oats, and, if designated by the Secretary, barley, in an amount computed as provided in this subsection. Payments for any such crop of feed grains shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event may payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to such feed grains.

(B) The payment rate for corn shall be the amount by which the higher of-

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop, is less than the established price per bushel

"(C) For the 1982 through 1985 crops of the established price shall not be less than \$2.80 per bushel for the 1982 crop, \$2.95 per bushel for the 1983 crop, \$3.10 per bushel for the 1984 crop, and \$3.25 per bushel for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be ap-propriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such infor-mation as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(D) The payment rate for grain sor-

ghums, oats and, if designated by the Secretary, barley, shall be at such rates as the Secretary determines fair and reasonable in relation to the rate at which payments are

made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph

(2) of this subsection.
"(2)(A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 331/3 per centum of established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of feed grains, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 50 per centum of the established price for crop for the deficiency in production below 60 per centum for the crop

"(C) With respect to the 1982 through 1985 crops of feed grains, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their feed

grain acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of feed grains, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary deter-

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting feed grains or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such loses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

"(iii) additional assistance must be made available to such producers to alleviate the economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual tarms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(c) (1) The Secretary shall proclaim a na tional program acreage for each of the 1982 through 1985 crops of feed grains. The proc-lamation shall be made not later than November 1 of each calendar year for the crop harvested in the next succeeding calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (2) of this subsection if the Secretary determines it necesary based upon the lastest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for feed grains shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of feed grains are excessive or an increase in stock is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(2) The Secretary shall determine a program allocation factor for each crop of feed grains. The allocation factor for feed grains shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop, except that in no event shall the allocation factor for any crop of feed grains be more than 100 per centum nor less than 80 per centum.

"(3) The individual farm program acreage for each crop of feed grains shall be determined by multiplying the allocation factor by the acreage of feed grains planted for harvest on the farms for which individual farm program acreages are required to be determined. The feed grain acreage shall not be further reduced by application of the al-location factor if the producers reduce the acreage of feed grains planted for harvest on the farm from the previous year by at least the percentage recommended by Secretary in the proclamation of the national program acreage made not later than November 1 prior to the year in which the crop is harvested. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of feed grains planted for harvest is less than for the preceding year, but for which the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for feed grains, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(d) the farm program payment yield for each crop of feed grains shall be the yield established for the farm for the previous crop year, adjusted by the Secretary to provide a fair and equitable yield. If no payment yield for feed grains was established for the farm in the previous crop year, the Secretary may determine such yield as the Secretary finds fair and reasonable. Notwith-

standing the foregoing provisions of this subsection, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this subsection. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(e)(1) Notwithstanding any other provision of this section, the Secretary may impose a limitation on the acreage planted to feed grains if the Secretary determines that the total supply of feed grains will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the feed grain acreage base for each feed grain-producing farm. Producers on a farm who knowingly produce feed grains in excess of the permitted feed grain acreage for the farm shall be ineligible for feed grain loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction reof a limitation, imposed by the Secretary under this paragraph shall be the acreage planted on the farm to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to feed grains for harvest in the two crop years immediately preceding the for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of feed grains times the number of acres actually planted to such commodity, by (ii) the num-ber of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsec-tion referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water ero-However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other com-modity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price supprogram, and will not adversely affect farm income.

"(2) The Secretary may conduct a land diversion program and make land diversion payments to producers of one or more of the crops of corn, barley, cats, rye, and grain

sorghums if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of any of these leed grains. If a land diversion program is in effect for one or more of the crops of corn, barley, oats, rye, and grain sorghums. the Secretary may also require that producers participate in such program as a condition of eligibility for loans, purchases, and payments authorized by this section. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(3) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies.

"(4) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(1) In any case in which the failure of a producer to comply fully with the terms and conditions of the program conducted under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(g) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(h) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(1) The provisions of section 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this section.

"(j) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(k) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this section."

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949 TO THE 1982 THROUGH 1985 CROPS OF FEED GRAINS

SEC. 402. Section 105 of the Agricultural Act of 1949 shall not be applicable to the 1982 through 1985 crops of feed grains. TITLE V-UPLAND COTTON

BASE ACREAGE ALLOTMENTS; SUSPENSION OF MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1342, 1343, 1344, 1345, 1346, and 1377) shall not be applicable to upland cotton of the 1982 through 1985 crops.

LOAN RATES AND TARGET PRICES, DISASTER PAY-MENTS, COTTON ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF UPLAND COTTON

SEC. 502. Effective only for the 1982 through 1985 crops of upland cotton, section 103 of the Agricultural Act of 1949 (7 U.S.C. 1444) is amended by adding at the end thereof the following new subsection:

"(g) (1) The Secretary shall, upon presentation of warehouse receipts reflecting accrued storage charges of not more than sixty days, make available for the 1982 through 1985 crops of upland cotton to cooperators nonrecourse loans for a term of ten months from the first day of the month in which the loan is made at such level as will reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States the smaller of (A) 85 per centum of the average price (weighted by market and month) of such quality of cotton as quoted in the designated United States spot markets during three years of the fiveyear period ending July 31 in the year in which the loan level is announced, excluding the year in which the average price was the highest and the year in which the average price was the lowest in such period, or (B) 90 per centum of the average, for the fifteen-week period beginning July 1 of the year in which the loan level is announced, of the which the loan level is announced, of the five lowest priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. northern Europe (adjusted downward by the average difference during the period April 15 through October 15 of the year in which the loan is announced between the contractions of the period april 15 through october 15 of the year in which the loan is announced between the contractions of the period of the year in which the loan is announced between the period of the year in which the loan is announced between the period of the year in which the loan is announced between the period of the year in which the loan is announced between the period of the growths of the growt is announced between such average northern Europe price quotation of such quality of cotton and the market quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)). In no event shall such loan level be less than 55 cents per pound. If for any crop the average northern Europe price determined under clause (B) of the first sentence of this paragraph is less than the average United States spot market price determined under clause (A) of the first sentence of this paragraph, the Secretary may, notwithstanding the foregoing provisions of this paragraph, increase the loan level to such level as the Secretary may deem appropriate, not in excess of the average United States spot market price determined under clause (A) of the first sentence of this paragraph. The loan level for any crop of cotton shall be determined and announced by the Secretary not later than November 1 of the calendar year later than November 1 of the calendar year preceding the marketing year for which such loan is to be effective, and such level shall not thereafter be changed. Nonrecourse loans provided for in this subsection shall, upon request of the cooperator during the tenth month of the loan period for the cotton, be mostly available for an additional term of made available for an additional term of eight months, except that such request to extend the loan period shall not be approved in a month when the average price of Strict Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9) in the designated spot markets for the preceding month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six-month period. Whenever the Secretary determines that the average price of Strict Low Middling one-and-one-sixteenth-inch cotton (micron-

aire 3.5 through 4.9 in the designated spot markets for a month exceeded 130 per centum of the average price of such quality of cotton in such markets for the preceding thirty-six months, notwithstanding any other provision of law, the President shall immediately establish and proclaim a special limited global import quota for upland cotton subject to the following conditions:

"(1) The amount of the special quota shall be equal to twenty-one days of domestic mill consumption of upland cotton at the seasonally adjusted average rate of the most recent three months for which data are available

"(ii) If a special quota has been estab-lished under this paragraph during the pre-ceding twelve months, the amount of the quota next established hereunder shall be the smaller of twenty-one days of domestic mill consumption calculated as set forth in clause (i) of this subsection or the amount required to increase the supply to 130 per centum of the demand.

"(iii) As used in clause (ii) of this para-graph, the term 'supply' means, using the latest official data of the Bureau of the Census, the United States Department of Agriculture, and the United States Department of the Treasury, the carryover of upland cotton at the beginning of the marketing year (ad-justed to four-hundred-and-eight-pound bales) in which the special quota is established, plus production of the current crop, plus imports to the latest date available during the marketing year, and the term 'demand' means the average seasonally adjusted annual rate of domestic mill consumption in the most recent three months for which data are available, plus the larger of average exports of upland cotton during the preceding six marketing years or cumulative exports of upland cotton, plus outstanding export sales for the marketing year in which the special quota is established.

"(iv) When a special quota is established under the provisions of this subsection, a ninety-day period from the effective date of the proclamation shall be allowed for enter-

ing cotton under such quota.

"(2) Notwithstanding the foregoing provisions of this subsection, a special quota period shall not be established that overlaps

an existing special quota period.

"(3) Notwithstanding any other provision of law, any upland cotton described in items 955.01 through 955.03 of part 3 of the appendix to the Tariff Schedules of the United States imported into the United States during the period of time a special quota established under this subsection is in effect shall be deemed to be an import under such special quota until the special quota is filled and any such cotton shall be free of duty.

(4) Payments shall be made for each crop of upland cotton to the producers on each farm at a rate equal to the amount by which

the higher of-

"(A) the average market price received by farmers for upland cotton during the calen dar year which includes the first five months of the marketing year for such crops, as deter-mined by the Secretary, or

"(B) the loan level determined under paragraph (1) of this subsection for such crop,

is less than the established price per pound times in each case (i) the farm program acreage for cotton, determined in accordance with paragraph (8) of this subsection (but in no event on a greater acreage than the acreage actually planted to cotton for harvest), multiplied by (ii) the farm program payment yield for cotton determined in ac-cordance with paragraph (9) of this subsection. For the 1982 through 1985 crops of upland cotton, the established price shall not be less than \$0.71 per pound for the 1982 crop, \$0.76 per pound for the 1983 crop, \$0.85 per pound for the 1984 crop, and \$0.93 per pound for the 1985 crop. Any such established

price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made. The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery own-ership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. The total quantity on which payments would other-wise be payable to a producer for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (5) of this subsection.

"(5) (A) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of upland cotton, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for cotton to cotton or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planning disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immethe control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33\%, per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph affection only in the control of the control o

(C) of this paragraph, effective only with reet to the 1982 through 1985 crops of upland cotton, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of cotton which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to the producers at a rate equal to 33 1/3 per centum of the established price for the crop for the deficiency in production below 75 per centum

for the crop.

"(C) With respect to the 1982 through 1985 crops of upland cotton, producers on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their cotton

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of up-land cotton, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary de-

termines that-

"(i) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, pro-ducers on a farm have suffered substantial losses of production either from being prevented from planting cotton or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance program; and

(iii) additional assistance must be made available to such producers to alleviate the

economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the pro-

ducers for the crop involved.

"(6) The Secretary shall establish for each of the 1982 through 1985 crops of upland cotton a national program acreage. Such national program acreage shall be announced by the Secretary not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary may revise the national program acreage first announced for any crop year for the purpose of determining the allocation fac-tor under paragraph (7) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall announce such revised national program acreage as soon as it has been made. The national program acreage shall be the number of harvested acres the Secretary determines (on the basis of the estimated weighted national average of the farm program yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. The national program acreage shall be subject to such adjustment as the Secretary determines necessary, taking into consideration the estimated carryover supply, so as to provide for an adequate but not excessive total supply of cotton for the marketing year for the crop for which such national program acreage is established. In no event shall the national program acreage be less than ten million acres

"(7) The Secretary shall determine a program allocation factor for each crop of upland cotton. The allocation factor exceed 100 per centum) shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop.

"(8) The individual farm program acreage for each crop of upland cotton shall be determined by multiplying the allocation factor by the acreage of cotton planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the cotton acreage on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of cotton planted for harvest on the farm from the previous year by at least the percentage rec-ommended by the Secretary in the announcement of the national program acreage made not later than November 1 of the calendar year preceding the year for which such acreage is established. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of cotton planted for harvest is less than for the preceding year, but the reduction is in-sufficient to exempt the farm from the ap-plication of the allocation factor. In establishing the allocation factor, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(9) The farm program payment yield for each crop of upland cotton shall be determined on the basis of the actual yields per harvested acre on the farm for the preceding three years, except that the actual shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, or other natural disaster, or other condition beyond the control of the producers. In case farm yield data for one or more years are unavailable or there was no production, the Secretary shall provide for appraisals to be made on the basis of actual yields and program payment yields for similar farms in the area for which data are available. Notwithstanding the foregoing provisions of this paragraph, in the determination of yields, the Secretary shall take into account the actual yields proved by the producer, and neither such yields nor the farm program payment yield established on the basis of such yields shall be reduced under other provisions of this paragraph. If the Secretary determines it necessary, the Secretary may establish national, State, or county program payment yields on the basis of historical yields, as adjusted by the Secretary to correct for abnormal factors affecting such yields in the historical period, or, if such data are not available, on the Secretary's estimate of actual yields for the crop year involved. If national, State, or county program payment yields are established, the farm program payment yields shall balance to the national, State, or county program payment yields.

"(10) (A) Notwithstanding any other provision of this subsection, the Secretary may impose a limitation on the acreage planted to upland cotton if the Secretary determines at the total supply of upland cotton will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction the upland cotton acreage base for each cotton-producing farm. Producers on a farm who knowingly produce cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the acreage planted on the farm to upland cotton for harvest (including any acreage which the producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for which the determination is made or, at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop years immediately preceding the year for which the determination is made. The Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. A number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to such com-modity, by (ii) the number of acres authorized to be planted to such commodity under the limitation imposed by the Secretary (hereinafter in this subsection referred to as 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will as sure protection of such acreage from weeds

and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing, or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not

adversely affect farm income.

"(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of upland cotton if the Secretary determines that such payments will assist in obtaining necessary adjust-ments in the total acreage of upland cotton. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condition of eligibility for loans and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation us approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a contract offer, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the

economy of the county or local community; "(C) The reduced acreage and the diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consul-

tation with wildlife agencies.

"(11) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such par-ticipation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage

in the supply of agricultural commodities.

"(12) The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.

"(13) The Secretary shall provide adequate

safeguards to protect the interests of tenants

and sharecroppers.
"(14) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans and payments, the Secretary may, nevertheless, make such loans and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program require-ments in cases in which lateness or failure to meet such other requirements does not ad-

versely affect the operation of the program.
"(15) The Secretary may issue such regulations as the Secretary determines necess carry out the provisions of this sub-

"(16) The Secretary shall carry out the

program authorized by this subsection through the Commodity Credit Corporation.

"(17) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(18) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection.

"(19) In order to encourage and assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act.".

EXTENSION OF COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Section 603 of the Food and Agriculture Act of 1977 (91 Stat. 939) is amended by striking out "July 31, 1982" and inserting in lieu thereof "July 31, 1986".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. (a) Section 408(b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof a colon and the following: "And provided further, That for the 1982 through 1985 crops of upland cotton a cooperator shall be a producer on a farm who has limited the acreage planted in accordance with paragraph (10) (A) of section 103(g).".

(b) Sections 103(a) and 203 of the Agricultural Act of 1949 (7 U.S.C. 1444 and 1446d) shall not be applicable to the 1982 through 1985 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1374) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRELIMINARY ALLOTMENTS FOR 1986 CROP OF UPLAND COTTON

SEC. 506. Section 606 of the Food and Agriculture Act of 1977 (7 U.S.C. 1342 note) is amended by striking out "1982") and inserting in lieu thereof "1986".

PRICE SUPPORT ADJUSTMENTS

SEC. 507. Section 403 of the Agricultural Act of 1949 (7 U.S.C. 1423) is amended by adding at the end thereof the following: "Beginning with the 1982 crop of upland cotton, the quality differences (premiums and discounts for grade, staple and micronaire) for the loan program shall be established by the Secretary by giving equal weight to (1) loan differences for the preceding crop and (2) the market differences for such crop in the nine designated United States spot markets."

TITLE VI-RICE

REPEAL OF PROVISIONS RELATING TO NATIONAL ACREAGE ALLOTMENTS, ALLOCATIONS, APPOR-TIONMENT, MARKETING QUOTAS, AND PENALITES

SEC. 601. (a) Effective beginning with the 1982 crop of rice, sections 352, 353, 354, 355, and 356, of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1352, 1353, 1354, 1355, and 1356) are repealed.

(b) Effective beginning with the 1982 crop of rice, section 377 of such Act (7 U.S.C. 1377) shall not be applicable to rice acreage.

LOAN RATES, TARGET PRICES, DISASTER PAY-MENTS, RICE ACREAGE REDUCTION PROGRAM, AND LAND DIVERSION FOR THE 1982 THROUGH 1985 CROPS OF RICE

SEC. 602. Effective only for the 1982 through 1985 crops of rice, section 101 of the Agricultural Act of 1949 (7 U.S.C. 1441) is amended by adding at the end a new subsection (i) as follows:

"(i) Notwithstanding any other provision

"(1) For the 1982 through 1985 crops of rice, the established price shall not be less than \$11.23 per hundredweight for the 1982 crop, \$12.14 per hundredweight for the 1983 crop, \$12.70 per hundredweight for the 1984 crop, and \$13.50 per hundredweight for the 1985 crop. Any such established price may be adjusted by the Secretary as the Secretary determines to be appropriate to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preced-ing the year previous to the one for which the determination is made from (ii) of production for each of such years may determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

"(2) The Secretary shall make available, to cooperators in the several States of the United States, loans and purchases for each of the 1982 through 1985 crops of rice at a level that bears the same ratio to the loan for the preceding year's crop as established price for such crop bears to the established price for the preceding year's crop. If the Secretary determines that loans and purchases at such a level for any of the 1982 through 1985 crops would substantially discourage the exportation of rice and result in excessive stocks of rice in the United States, the Secretary may, notwithstanding the foregoing provisions of this paragraph, establish loans and purchases for any crop at such level, not less than \$8 per hundredweight, as the Secretary determines necessary to avoid such excessive stocks. The loan and purchase level for each of the 1983, 1984, and 1985 crops of rice shall be established on the basis of the loan and purchase level established for the preceding crop year before the application of the preceding sentence. The established price and the loan and purchase level for each crop shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

"(3) The Secretary shall make available to cooperators payments for each of the 1982 through 1985 crops of rice grown in the several States of the United States at a rate equal to the amount by which the established price for the crop of rice exceeds the higher

of—
"(A) the national average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under paragraph (2) for such crop.

"(4) The payments for each such crop of rice shall be computed by multiplying (1) the payment rate by (ii) the farm program acreage for the crop by (iii) the yield established for the farm. In no event shall payments be made under this paragraph for any crop on a greater acreage than the acreage actually planted to rice. The yield for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years. The actual yield shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the cooperators.

"(5) The total quantity on which pavments would otherwise be payable to a producer on a farm, for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to

the producer for the crop under paragraph

(6) of this subsection.
"(6) (A) Except as provided in subpara graph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for rice to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the cooperators on the number of acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment vield established by the Secretary times a payment rate equal to 331/3 per centum of the established price for the crop.

"(B) Except as provided in subparagraph (C) of this paragraph, effective only with respect to the 1982 through 1985 crops of rice, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the producers are able to harvest on any farm is less than the result of multiplying 75 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a reduced yield disaster payment to cooperators at a rate equal to 33½ per centum of the established price for the crop for the deficiency in production below 75 per centum

"(C) With respect to the 1982 through 1985 crops of rice, cooperators on a farm shall not be eligible for disaster payments under this paragraph if crop insurance is available to them under the Federal Crop Insurance Act with respect to their rice acreage.

"(D) Notwithstanding the provisions of subparagraph (C) of this paragraph, effective only for the 1982 through 1985 crops of rice, the Secretary may make disaster payments to producers on a farm under this paragraph whenever the Secretary determines that—
"(i) as the result of drought, flood, or

"(1) as the result of drought, flood, or other natural disaster, or other condition beyond the control of the producers, producers on a farm have suffered substantial losses of production either from being prevented from planting rice or other nonconserving crop or from reduced yields, and that such losses have created an economic emergency for the producers;

"(ii) Federal crop insurance indemnity payments and other forms of assistance made available by the Federal Government to such producers for such losses are insufficient to alleviate such economic emergency, or no crop insurance covered the loss because of transitional problems attendant to the Federal crop insurance programs and

eral crop insurance program; and
"(iii) additional assistance must be made
available to such producers to alleviate the
economic emergency.

The Secretary may make such adjustments in the amount of payments made available under this subparagraph with respect to individual farms so as to assure the equitable allotment of such payments among producers taking into account other forms of Federal disaster assistance provided to the producers for the crop involved.

"(7) (A) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year. The Sec-

retary may revise the national program acreage first proclaimed for nay crop year for the purpose of determining the allocation factor under subparagraph (B) of this paragraph if the Secretary determines a revision necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres that the Secretary estimates will be harvested for such crop. In no event may the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined, except that the rice average on a farm eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the previous year by at least the percenage recommended by the Secretary in the annual proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than for the preceding year, but the reduc-tion is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary may make such adjustment as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this para-

"(8)(A) Notwithstanding any other pro-vision of this subsection, the Secretary may impose a limitation on the acreage planted to rice if the Secretary determines that the total supply of rice will, in the absence of such limitation, be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergen-cy. Such limitation shall be achieved by applying a uniform percentage reduction to the rice acreage base for each rice-producing farm. Producers on a farm who knowingly produce rice in excess of the permitted rice acreage for the farm shall be ineligible for rice loans, purchases, and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year as the result of a limitation imposed by the Secretary under this subparagraph shall be the acreage planted to rice on the farm to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the crop year immediately preceding the year for

which the determination is made or, at the discretion of the Secretary, the average acreage planted to rice for harvest in the two years immediately preceding the year for which the determination is made. In determining the acreage planted to rice in any previous year for purposes of this subpara-graph, the Secretary may make adjustments to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. number of acres on the farm determined by dividing (i) the product obtained by multiplying the number of acres required to be withdrawn from the production of rice times the number of acres actually planted to rice, by (ii) the number of acres authorized to be planted to rice under the limitation imposed by the Secretary (hereinafter in this sub-section referred to as the 'reduced acreage') shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion. However, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to sweet sorghum, hay and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flexseed, triticale, oats, rye, or other com-modity, if the Secretary determines that such production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

(B) The Secretary may conduct a land diversion program and make land diversion payments to producers of rice if the Secretary determines that such payments will assist in obtaining necessary adjustments in the total acreage of rice. If a land diversion program is in effect under this subsection, the Secretary may also require that producers participate in such program as a condi-tion of eligibility for loans, purchases, and payments authorized by this subsection. Land diversion payments shall be made to a producer on a farm who devotes an acreage of cropland on the farm to conservation uses approved by the Secretary in accordance with a land diversion contract entered into with the Secretary. The amounts payable to a producer under a land diversion contract shall be determined by such means as the Secretary determines appropriate, including the submission of bids for such contracts. In determining the acceptability of a con-tract offer, the Secretary shall take into con-sideration the extent of the diversion to be undertaken by the producer and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community:

"(C) The reduced acreage and the addi-

"(C) The reduced acreage and the additional diverted average may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife

agencies.

"(D) An operator of a farm desiring to participate in the program conducted under this subsection shall execute an agreement with the Secretary providing for such participation no later than such date as the Secretary may prescribe. The Secretary may, by mutual agreement with the producer, terminate or modify any such agreement entered into under this subsection if the Secretary determines such action necessary because of an emergency created by drought or other disaster or to prevent or alleviate a shortage in the supply of agricultural commodities.

"(9) The Secretary shall provide for the sharing of payments made under this sub-

section for any farm among the producers on the farm on a fair and equitable basis. "(10) The Secretary shall provide adequate

"(10) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

"(11) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the failure. The Secretary may authorize the county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or modify deadlines and other program requirements in cases in which lateness or failure to meet such other requirements does not adversely affect the operation of the program.

"(12) The Secretary may issue such regulations as the Secretary determines necessary to carry out the provisions of this sub-

section.

"(13) The Secretary shall carry out the program authorized by this subsection through the Commodity Credit Corporation.

"(14) The provisions of subsection 8(g) of the Soil Conservation and Domestic Allotment Act (relating to assignment of payments) shall apply to payments under this subsection.

"(15) Notwithstanding any other provision of law, compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans, purchases, or payments under this subsection.

DEFINITION OF COOPERATOR

SEC. 603. Effective only with respect to the 1982 through 1985 crops of rice, the third proviso in the first sentence of section 408(b) of the Agricultural Act of 1949 (7 U.S.C. 1428(b)) is amended to read as follows; "Provided further, That for the 1982 through 1985 crops of rice, a cooperator shall be a producer on a farm who has reduced the acreage base planted to rice as required under section 101(1)(8) of this Act.".

TITLE VII—PEANUTS

ANNUAL MARKETING QUOTA AND STATE ACREAGE ALLOTMENT

SEC. 701 (a) Subsections (a) and (e) of section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358 (a) and (e)) shall not be applicable to the 1982 through 1985 crops of peanuts.

(b) Effective for the 1982 through 1985 crops of peanuts, subsection (c)(1) of section 358 of such Act (7 U.S.C. 1358(c)(1)) is amended by striking out the period at the end of the second sentence and inserting in lieu thereof a colon and the following: "Provided further, That the reanut acreage allotment for the State of New Mexico shall not be reduced below the 1977 acreage allotment as increased pursuant to subsection (c)(2) of this section."

NATIONAL ACREAGE ALLOTMENT; NATIONAL POUNDAGE QUOTA; FARM POUNDAGE QUOTA; AND DEFINITIONS

SEC. 702. Effective only for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358) is further amended by adding at the end thereof the following new subsections:

"(k) Not later than December 1 of each year, the Secretary shall announce a national acreage allotment for peanuts for the next crop taking into consideration projected domestic use, exports, and a reasonable carryover, except that such allotment shall not be less than 1,614,000 acres.

"(1) Not later than December 1 of each year, the Secretary shall announce a minimum national poundage quota for peanuts for the next marketing year. The minimum national poundage quota for any crop shall be 1,300,000 tons increased by such additional quantity as the Secretary estimates will be necessary to meet the requirements for do-mestic edible and seed uses during the mar-

keting year.

"(m) For each farm for which a farm acreage allotment has been established, a farm yield for peanuts shall be determined. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977. In the event that peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount deter-mined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

(n) For each farm, a farm base production poundage shall be established equal to the quantity determined by multiplying the farm peanut screage allotment by the farm yield determined in accordance with sub-

section (m) of this section.

"(o)(1) For each farm, a farm poundage quota shall be established by the Secretary for each marketing year equal to the farm for each marketing year equal to the larm base production poundage multiplied by a factor determined by the Secretary, such that the total of all farm poundage quotas will equal the national poundage quota for such marketing year. The poundage quota so determined, beginning with the 1982 crop for any farm, shall be increased by the number of pounds by which marketings of quota peanuts from the farm during previous marketing years (excluding any marketing year before the marketing year for the 1980 crop) were less than the farm poundage quota

(2) A quantity of peanuts equal to the quantity of peanuts undermarketed in any year may be produced and marketed in any subsequent year or years (undermarketing carry forward) and such quantity of peanuts shall be considered quota peanuts, except that in order to qualify for an undermarketing carry forward in any year a producer must have planted an acreage on the farm to peanuts in the preceding year equal to or greater than 50 per centum of the acreage allotment for the farm for peanuts for such

preceding year.
"(3) In no case may the total marketings of a producer exceed actual production from

the farm acreage allotment.

"(4) Notwithstanding the foregoing pro-visions of this subsection, if the total of all increases under pargraph (1) of this subsection in individual farm poundage quotas exceeds 10 per cenutm of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all increases does not exceed 10 per centum of the national poundage quota. "(p) For the purposes of this part and title

I of the Agricultural Act of 1949

(1) 'quota peanuts' means, for any marketing year, any peanuts which are eligible for domestic edible use as determined by the Secretary, which are marketed or considered marketed from a farm, and which do not exceed the fram poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year, any peanuts which are mar-

keted from a farm and which are in excess of the marketings of quota peanuts from such farm for such year but not in excess of the actual production of the fram acreage al-

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts by crushing or otherwise when authorized by

the Secretary; and

(4) 'domestic edible use' means use for milling to produce domestic food peanuts and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, AND TRANSFER OF ACREAGE ALLOTMENTS

SEC. 703. Effective for the 1982 through 1985 crops of peanuts, section 348a of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1358a) is amended—

(1) by striking out in subsection (a) ", if he determines that it will not impair the effective operation of the peanut marketing quota or price support program,";

(2) by striking out "may" each place it appears in subsection (a) and inserting in lieu thereof "shall";
(3) by changing the period at the end of

(3) by changing the period at the end of subsection (g) to a colon and adding the following: "Provided, That such fifty-acre limitation shall not apply in the case of any State in which the total farm peanut acreage allotment is eleven thousand acres or less.";

(4) by adding at the end thereof the fol-

lowing new subsections:

"(i) Notwithstanding any other provision
of this section, transfers shall be on the basis of the farm production poundage, and the acreage allotment for the receiving farm shall be increased by an amount determined by dividing the number of pounds transferred by the farm yield for the receiving farm, and the acreage allotment for the transferring farm shall be reduced by an amount determined by dividing the number of pounds transferred by the farm yield for the transferring farm.

Notwithstanding the provisions of subsection (b) (1) of this section, farm acreage allotments and marketing quotas for peanuts may be transferred from one county to another in the same State in the case of any State in which the total from peanut acreage allotment is eleven thousand acres

or less."

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective only for the 1982 through 1985 crop of peanuts, section 359 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1359) is amended-

(1) by inserting "(1)" after the subsection designation "(a)";

(2) by striking out in the first sentence of subsection (a) (1) of such section, as designated by clause (1) of this section, "75 per centum of the support price for" and insert-ing in lieu thereof "120 per centum of the support price for quota":

(3) by inserting after the first sentence of subsection (a) (1) of such section, as designated by clause (1) of this section, the following new sentence: "The marketing of any additional peanuts from a farm shall be subject to the same penalty unless the rea-nuts, in accordance with regulations established by the Secretary, are placed under loan at the additional loan rate under the loan program made available under section 108(b) of the Agricultural Act of 1949 and not redeemed by the producers or are marketed under contracts between handlers and producers pursuant to the provisions of sub-section (i) of this section.";

(4) by striking out "normal yield" in subsection (a) (1) of such section, as designated by clause (1) of this section, and inserting in lieu thereof "farm yield";

(5) by adding at the end of subsection (a)(1) of such section as designated by clause (1) of this section the following new

paragraph:

'(2) The Secretary shall authorize, under such regulations as the Secretary shall pre-scribe, the county committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act to waive or reduce marketing penalties provided for under this subsection in cases in which such committees determine that the violations which were the basis of the penalties were unintentional or without knowledge on the part of the parties concerned. Errors in weight which do not exceed one-tenth of 1 per centum in the case of any one marketing document shall not be considered marketing violations except in cases of fraud or conspiracy."; and

by adding at the end of such section

the following new subsections:

"(f) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts ex-cluded under section 359(c), are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use.

"(g) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that could reasonably be produced from the quantity of peanuts having the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal to 120 per centum of the loan level for quota peanuts on the quantity of peanuts which the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the peanuts so acquired.

"(h) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108(c) of the Agricul-tural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate ware-

housing, handling, and marketing.

"(1) Handlers may, under regulations prescribed by the Secretary, contract with producers for the purchase of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area marketing association) for approval prior to April 15 of the year in which the crop is produced, except that if any handler contracts with a producer for additional peanuts at a price equal to or more than 105 per centum of the loan level of quota peanuts such peanuts may be utilized as quota peanuts if (1) such contract is approved before April 15 of the year in which the crop is produced, and (2) all of the producer's quota peanuts have been contracted for before or at the same time that the producer's additional peanuts are contracted

for.

"(1) Subject to the provisions of section

Act of 1949, any pea-407 of the Agricultural Act of 1949, any pea-

nuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, and other expenses, plus (1) 100 per centum of the loan value of quota peanuts if the additional peanuts are and paid for during the harvest season upon delivery by and with the written consent of the producer, (2) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer but not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year. For the period from the date additional peanuts are delivered for loan to April 30 of the calendar year following the year in which such additional peanuts were harvested, the area marketing associations designated pursuant to section 108(c) of the Agricultural Act of 1949 shall have sole authority to accept or reject lot list bids when the sales price as determined under this section equals or exceeds the minimum price at which the Commodity Credit Corporation may sell its stocks of additional peanuts, except that the area marketing association and the Commodity Credit Corporation may agree to modify the authority granted by this sentence in order to facilitate the orderly marketing of additional peanuts.".

REPORTS AND RECORDS

Sec. 705. Section 805 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRESERVATION OF UNUSED ALLOTMENTS

SEC. 706. Section 806 of the Food and Agriculture Act of 1977 (91 Stat. 947) is amended by striking out "1981" and inserting in lieu thereof "1985".

PRICE SUPPORT PROGRAM

SEC. 707. Effective for the 1982 through 1985 crops of peanuts, title I of the Agricultural Act of 1949 is amended by adding after section 107 a new section 108 as follows:

"SEC. 108. Notwithstanding any other provision of law—

"(1) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1982 through 1985 crops of peanuts at such levels as the Secretary finds appropriate, taking into consideration the eight factors specified in section 401(b) of this Act, and any change in the index of prices paid by farmers for production items, interest, taxes, and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the marketing year for which the level of support is being determined, except that the level of price support for the 1982 through 1985 crops shall not be less than \$631 per ton. The levels of price support so announced may not be reduced by any de-ductions for inspection, handling, or storage, but the Secretary may make adjustments for location of peanuts and other adjustments authorized by section 403 of this Act.

"(2) The Secretary shall make price support available to producers through loans, purchases, or other operations on additional peanuts for each of the 1982 through 1985 crops of peanuts. In determining the support level for additional peanuts, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets, but in no case may the level of price support

for additional peanuts be set at a level which the Secretary estimates would result in the Commodity Credit Corporation incurring a loss on the price support program for additional peanuts for the marketing year concerned. The Secretary shall announce the level of price support for additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of price support, so announced, is to be in effect.

"(3) (A) In carrying out paragraphs (1) and (2) of this subsection, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980)) to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily for the purpose of conducting such loan activities. The Secretary may not make warehouse storage loans available to any cooperative which is engaged in operations or activities concerning peanuts other than those operations and activities specified in this section and in section 359 of the Agricultural Adjustment Act of 1938. Such area marketing associations shall be used in administrative and supervisory activities re-lating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans made under this paragraph shall include, in addition to the price support value of the peanuts, such costs as the area marketing association reasonably may incur in carrying out its responsibilities, operations, and activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(B) The Secretary shall require that each area marketing association establish pools and maintain complete and accurate records by type for quota peanuts handled under loans and for additional peanuts produced without a contract between handler and producer described in section 359(i) of the Agricultural Adjustment Act of 1938. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be dis-tributed in proportion to the value of the peanuts placed in the pool by each grower Net gains for peanuts in each pool shall consist of (i) for quota peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts, and (ii) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (1) of this sub-paragraph. Notwithstanding any other other provision of this subsection, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower."

TITLE VIII—SOYBEANS SOYBEAN PRICE SUPPORT

SEC. 801. Effective only with respect to the 1982 through 1985 crops of soybeans, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended—

 in the first sentence, by inserting "soybeans," after "tung nuts,"; and

(2) by adding at the end thereof a new subsection (g) as follows:

"(g)(1) The Secretary shall make available price support to producers for soybeans through loans and purchases during each of the four marketing years beginning with the 1982 marketing year at a level equal to 75

per centum of the average Chicago quoted cash price for number 1 yellow soybeans for each of the preceding five marketing years, excluding the high and low valued Provided however, That in no event shall the Secretary establish a support price of less than \$5.02 per bushel. For the purposes of this section, the soybean marketing year shall be the twelve-month period beginning on September 1 and ending August 31. The Secretary shall make a preliminary announcement of the level of price support no earlier than thirty days in advance of the beginning of the marketing year based upon the latest information and statistics available when such level of price support is announced, and shall make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. In no event shall such final level of support be announced later than October 1 of the marketing year for which the announcement applies; nor shall the final level of support be less than the level of support set forth in the preliminary announcement.

"(2) Notwithstanding any other provision

"(A) The Secretary shall not require participation in any production adjustment control program for soybeans or any commodity as a condition of eligibility for price support for soybeans; and

"(B) Soybeans shall not be considered an eligible commodity for any reserve program, and the Secretary shall not authorize payments to producers to cover the cost of storing soybeans."

TITLE IX—SUGAR SUGAR PRICE SUPPORT

SEC. 901. Effective only with respect to the 1982 through 1985 crops of sugar beets and sugar cane, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended—

(1) in the first sentence, by striking out "honey, and milk" and inserting in lieu thereof "honey, milk, sugar beets, and sugar cane"; and

(2) by adding at the end thereof a new subsection (h) as follows:

"(h) The price of each of the 1982 through 1985 crops of sugar beets and sugar cane, respectively, shall be supported in the manner specified below:

"(1) Effective with respect to sugar processed from domestically grown sugar beets and sugar cane beginning with the effective date of this subsection through March 31, 1982, the Secretary shall support the price of sugar beets and sugar cane through purchases of the processed products thereof or through other operations at such level as the Secretary determines appropriate to approximate a raw sugar price of 19.6 cents

per pound.

"(2) Effective October 1, 1982, the Secretary shall support the price of domestically grown sugar cane through nonrecource loans at such level as the Secretary determines appropriate but not less than 19.6 cents per pound for raw cane sugar. Effective October 1, 1982, the Secretary shall support the price of domestically grown sugar beets through nonrecourse loans at such level as the Secretary determines to be fair and reasonable in relation to the level of loans for raw cane sugar. The Secretary shall announce the loan rate to be applicable during any fiscal year as far in advance of the beginning of that fiscal year as practicable consistent with the purposes of this section. Loans during any such fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of that fiscal year.

"(3) For the purposes of paragraph (2)—
"(A) The 1982 crop of sugar beets and sugar cane shall be the crop of sugar beets

and sugar cane processed into refined beet sugar and raw cane sugar, respectively, during the period April 1, 1932, through March 31, 1983;

"(B) Loans for the 1982 crop of sugar beets and sugar cane shall be made available during the period October 1, 1982, through March 31, 1983; and

(C) The 1983 through 1985 crops of sugar beets and sugar cane and the period of loan availability for such crops shall be estab-lished in the same manner as prescribed in subparagraphs (A) and (B) of this paragraph."

TITLE X-GRAIN RESERVES

PRODUCER STORAGE PROGRAM

SEC. 1001. Section 110 of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 110. (a) The Secretary is authorized to formulate and administer a program under which producers of wheat and producers of feed grains will be able to store wheat and feed grains when such commodities are in abundant supply and extend the time period for their orderly marketing. The Secretary shall establish safeguards to assure that wheat and feed grains held under the program shall not be utilized in any manner to unduly depress, manipulate, or curtail the free market. The authority provided by this section shall be in addition to other authorities available to the Secretary for carrying out producer loan and storage operations.

"(b) In carrying out the producer storage program, the Secretary may provide original or extended price support loans for wheat and feed grains under terms and conditions designed to encourage producers to store wheat and feed grains for extended periods of time in order to promote orderly marketing when wheat or feed grains are in abundant supply. Loans made under this section shall be made at the same level of support as provided for by this Act or at such higher level as the Secretary may deem appropriate. Among such other terms and conditions as the Secretary may prescribe by regulation, the program may provide for (1) repayment of such loans in not less than three years nor more than five years; (2) payments to producers for storage in such amounts and under such conditions as the Secretary determines appropriate to encourage producers to participate in the program; (3) a rate of interest as determined under subsection (c) of this section; (4) recovery of amounts paid for storage, and for the payment of additional interest or other charges in the event such loans are repaid by producers before the market price for wheat or feed grains has reached the price levels specified in clause (5) of this subsection; and (5) conditions designed to induce producers to redeem and market the wheat or feed grains securing such loans without regard to the maturity dates thereof whenever the Secretary determines that the market price for the commodity has attained a specified

level, as determined by the Secretary.

"(c) The rate of interest charged participants in the program authorized by this section shall be not less than the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interest as the Secretary deems appropriate effectuate the purposes of this section. Not-withstanding the foregoing, the Secretary is authorized to increase the applicable rate of interest in such amounts and at such intervals as the Secretary determines is appropriate to encourage the orderly marketing of wheat and feed grains securing loans made under this section after the market price for

the commodity has attained the level determined under clause (5) of subsection (b).

"(d) Notwithstanding any other provision of law, the Secretary may recuire producers to repay loans under this section plus accrued interest and such other cheeps. crued interest and such other charges as may be required by regulation prior to the maturity date thereof if the Secretary determines that emergency conditions exist which require that such commodity be made available in the market to meet urgent domestic or international needs and the Secretary reports such determination and the reasons therefor to the President, the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives at least four-

teen days before taking such action.
"(e) The Secretary shall announce the terms and conditions of the producer storage program as far in advance of making loans as practicable. In such announcement, the Secretary shall specify the quantity of wheat or feed grains to be stored under the program which the Secretary determines appropriate to promote the orderly marketing of such commodities. The Secretary may place an upper limit on the amount of wheat and feed grains placed in the reserve, but such upper limit may not be less than seven hun-dred million bushels for wheat and one billion bushels for feed grains.

"(f) Notwithstanding any other provision of law, except as otherwise provided under section 302 of the Food Security Wheat Reserve Act of 1980 and section 208 of the Agricultural Trade Suspension Adjustment Act of 1980, whenever the original or extended loan program authorized by this section is in effect, the Commodity Credit Corporation not sell any of its stocks of wheat or feed grains at less than 105 per centum of the average projected cost of production for the commodity involved for the current crop year, as determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose, which shall include (i) variable costs, ii) machinery ownership costs, (iii) general farm overhead costs, (iv) return for management comparable to the normal manage-ment fees charged by other comparable industries, and (v) land value, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. The foregoing restriction shall apply to-

"(1) sales of such commodities which have substantially deteriorated in quality or as to which there is a danger of loss or waste through deterioration or spoilage; and

"(2) sales or other disposals of such com-modifies under the Act of September 21, 1959 (73 Stat. 574, as amended; 7 U.S.C. 1427

"(g) The Secretary may, with the concurrence of the owner of grain stored under the program authorized by this section, reconcentrate all such grain stored in commercial warehouses at such points as the Secretary deems to be in the public interest, taking into account such factors as transportation and normal marketing patterns. The Secretary shall permit rotation of stocks and fa-cilitate maintenance of quality under regulations which assure that the holding pro-ducer or warehouseman shall, at all times, have available for delivery at the designated place of storage both the quantity and quality of grain covered by his commitment.

"(h) Whenever grain is stored under the

provisions of this section, the Secretary may buy and sell at an equivalent price allowing customary location and grade differentials, substantially equivalent quantities of grain in different locations or warehouses to the extent needed to properly handle, rotate, distribute, and locate such commodities which the Commodity Credit Corporation owns or controls. Such purchases to offset sales shall be made within two market days following the sales. The Secretary shall make a daily list available showing the price, location, and quantity of the transactions.

"(1) The Secretary shall use Commodity Credit Corporation, to the extent feasible, to fulfill the purposes of this section. To the maximum extent practicable consistent with the fulfillment of the purposes of this section and the effective and efficient administration of this section, the Secretary shall utilize the usual and customary channels, facilities, and arrangements of trade and commerce."

INTERNATIONAL EMERGENCY FOOD RESERVE

SEC. 1002. Section 111 of the Agricultural Act of 1949 (7 U.S.C. 1445f) is repealed.

DISASTER RESERVE

SEC. 1003. Section 813 of the Agricultural Act of 1970 (7 U.S.C. 1427a) is repealed.

FARM STORAGE FACILITY LOANS

SEC. 1004. Section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h)) is amended by deleting from the fourth proviso of the second sentence the phrase "shall make loans" and inserting in lieu thereof the phrase "may make loans".

CONFORMING AMENDMENT

SEC. 1005. Section 208(c)(2)(B) of the Agricultural Trade Suspension Adjustment Act of 1980 is amended by amending clause to read as follows:

"(i) if there is a producer storage program in effect for the commodity, at not less than 105 per centum of the then current price level at which the Secretary may encourage repayment of producer storage loans on the commodity prior to the maturity dates of the loans, as determined under clause (5) of the second sentence of section 110(b) of the Agricultural Act of 1949, or".

TITLE XI-MISCELLANEOUS

Subtitle A-Provisions Applicable To More Than One Commodity

PAYMENT LIMITATIONS FOR WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

Sec. 1101. Notwithstanding any other provision of law-

(1) The total amount of payments (excluding disaster payments) that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice shall not exceed \$50,000 for each of the 1982 through 1985 crops.

(2) The total amount of disaster payments that a person shall be entitled to receive un-der one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice shall not exceed \$100,000 for each of the 1982 through 1985 crops.

(3) The term "payments" as used in this

section shall not include loans or purchases, or any part of any payment that is determined by the Secretary of Agriculture to represent compensation for resource adjustment (excluding land diversion payments)

(4) If the Secretary determines that the total amount of payments that will be earned by any person under the program in effect for any crop will be reduced under this section, any acreage reduction for the farm or farms on which such person will be sharing in payments earned under such program shall be reduced to such extent and in such manner as the Secretary determines will be fair and reasonable in relation to the amount of the payment reduction.

(5) The Secretary shall issue regulations defining the term "person" and prescribing such rules as the Secretary determines neces-sary to assure a fair and reasonable application of such limitation. The rules for determining whether corporations and their stockholders may be considered as separate persons shall be in accordance with the regulations issued by the Secretary on December 18, 1970, under section 101 of the Agri-

cultural Act of 1970.

(6) The provisions of this section that limit payments to any person shall not be applicable to lands owned by States, political

subdivisions, or agencies thereof, so long as such lands are farmed primarily in the cirect furtherance of a public function, as determined by the Secretary.

FINALITY OF DETERMINATIONS

SEC. 1102. The first sentence of section 385 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1385) is amended to read as follows: "The facts constituting the basis for any Soil Conservation Act payment, any payment under the wheat, feed grain, upland cotton, and rice programs authorized by the Agricultural Act of 1949 and this Act, any loan, or price support operation, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Secretary or by the Commodity Credit Corporation, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Gov-

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

SEC. 1103. Effective only with respect to the marketing years for the 1982 through 1985 crops, section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended—

(1) by amending the third proviso of the third sentence to read as follows: Provided, That the Corporation shall not sell any of its stock of wheat, corn, grain sorghum, barley, oats, and rye, respectively, at less than 115 per centum of the current national average loan rate for the commodity, adjusted such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines plus reasonable appropriate. carrying charges."; and

(2) by striking out in the seventh sentence, "but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 1104. Effective only for the 1982 through 1985 crops of wheat, feed grains, upland cotton, and rice, section 408(k) of the Agricultural Act of 1949 (7 U.S.C. 1428 (k)) is amended to read as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT, FEED GRAINS, UPLAND COTTON, AND

"(k) Reference made in sections 402, 403, 406, 407, and 416 to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well as to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act; and references made to the terms 'price support', 'price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as ap-plying as well to the loan and purchase operations for wheat, feed grains, upland cotton. and rice under this Act.".

Subtitle B-Other Miscellaneous Provisions SPECIAL GRAZING AND HAY PROGRAM

SEC. 1105. Section 109 of the Agricultural Act of 1949 (7 U.S.C. 1445d) is amended-

(1) in the first sentence of subsection (a), by striking out "1981" and inserting in

lieu thereof "1985";
(2) in the second sentence of subsection (a), by striking out "Under the special program" and inserting in lieu thereof "If a special program is implemented"; and

(3) in subsection (d), by striking out "acreage set-aside" and inserting in lieu thereof "reduced acreage or land diversion".

EMERGENCY FEED PROGRAM

Sec. 1106. (a) Section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by striking out the fifth and sixth sentences thereof.

(b) (1) The first sentence of section 1105 a) of the Food and Agriculture Act of 1977 (7 U.S.C. 2267(a)) are amended by inserting after the words "maintenance of livestock" the words "and poultry"

(2) Paragraphs (1) and (2) of section 1105 (b) of the Food and Agriculture Act of 1977 (7 U.S.C. 2267(b)) are amended by inserting the words "or poultry" immediately after the word "livestock" each time that word appears.

FARM INCOME PROTECTION INSURANCE PROGRAM STUDY

SEC. 1107. (a) It is the sense of Congress that the concept of farm income protection insurance should be studied in order to determine whether such a concept might provide the basis for an acceptable alternative to the commodity price support, income maintenance, and disaster assistance programs currently administered by the United States Department of Agriculture for the benefit of United States farmers. Toward this objective, the Secretary of Agriculture shall appoint a special task force to study and report on such concept.

(b) The special task force appointed by the Secretary shall be composed of the following: a total of three representatives of agricultural commodity organizations and general farm organizations, three representatives of the private insurance industry (including stock companies, mutual companies, agents, or brokers), two full-time farmers, one official of the Federal Crop Insurance Corporation, one official of the Agricultural Stabilization and Conservation Service, two individuals from appropriate academic fields, and the designated representative of the Secretary of Agriculture. The designated representative of the Secretary shall serve as the chairman of the special task force.

(c) The study conducted by the special task force shall include, but not be limited to, an analysis of the following:

(1) the characteristics of a farm income

protection insurance program;

(2) the feasibility of such a program as a substitute for the commodity price sup-port, income maintenance, and disaster as-sistance programs administered by the Department of Agriculture for United States farmers;

(3) the appropriate roles of the private insurance industry and the Federal Gov-ernment in the development, implementation, and administration of such a program;

(4) alternate mechanisms for administer-

ing such a program;

(5) the acceptability of such a program to farmers: and

(6) the costs associated with the develop-

ment and implementation of such a program. (d) Not later than eighteen months following enactment of this Act, the special task force shall transmit to the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and the Committee on Agriculture of the United States House of Representatives copies of the report on farm income protection insurance and any legislative changes that the special task force recommends for purposes of establishing a farm income protection insurance program. Minority views, if submitted in a timely manner, shall be included in the report prepared and transmitted by the special task force.

(e) The Secretary of Agriculture shall provide such staff personnel, clerical assistance, services, materials, and office space as may be required to assist the special task force in carrying out its duties.

(f) In conducting its study and preparing its report and recommendations, the special task force may obtain the assistance of Department of Agriculture employees, and, to the maximum extent practicable, the assist-ance of employees of other Federal departments or agencies who may have relevant expertise in the areas of insurance, income maintenance, disaster assistance, argriculture, program management, and program evaluation.

(g) Members of the special task force shall serve without compensation if not otherwise officers or employees of the United States. except that they shall, while away from their homes or regular places of business in the performance of services under this section. be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5 of the United States Code.

(h) The special task force shall be dissolved forty-five days after submission of the report required in subsection (d) of this

STATE AGENCY AUTHORITY FOR GRAIN INSPEC-TIONS AT EXPORT PORT LOCATIONS

SEC. 1108. The first sentence of section 7(e) (2) of the United States Grain Standards Act (7 U.S.C. 79(e)(2)) is amended by inserting "(A)" before "which was performing", and by inserting after "1976," the following: "or which performed official inspection at an export port location at any time prior to such date and was designated under subsection (f) of this section on the date of the enactment of this clause to perform official inspections at locations other than export port locations,".

DEPARTMENT OF AGRICULTURE ADVISORY COMMITTEES

SEC. 1109. (a) Title XVIII of the Food and Agriculture Act of 1977, Revised Statutes. title 91, page 1041, is amended to read as

"TITLE XVIII-DEPARTMENT OF AGRI-CULTURE ADVISORY COMMITTEES

"PURPOSES

"SEC. 1801. The purposes of this title are

"(1) require strict financial and program accounting by advisory committees of the Department of Agriculture;

(2) assure balance and objectivity in the membership of such advisory committees; "(3) prevent the formation or continuation of unnecessary advisory committees by the Department of Agriculture.

"DEFINITIONS

"SEC. 1802. When used in this title—"(1) the term, 'Secretary' means the Secretary of Agriculture of the United States;

"(2) the term 'Department of Agriculture' means the United States Department of Agriculture: and

"(3) the term 'advisory committee' means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other sub-group thereof that is established or used by the Department of Agriculture in the interest of obtaining advice or recommendations for the President or the Department of Agriculture, except that such term excludes any committee which (A) is composed wholly of full-time officers or employees of the Federal Government, (B) is established by statute or reorganization plan, or (C) is established by the President.

"MEMBERSHIP ON ADVISORY COMMITTEES

"SEC. 1803. (a) No person other than an officer or employee of the Department of Agriculture shall serve on more than one advisory committee, unless authorized by the Secretary.

"(b) Not more than one officer or employee of any corporation or other non-Federal entity, including all subsidiaries and affiliates thereof, shall serve on the same advisory committee at any one time, unless authorized by the Secretary.

"(c) No person other than an officer or employee of the Department of Agriculture

shall serve for more than six consecutive years on an advisory committee, unless authorized by the Secretary.

"ANNUAL REPORT

"Sec. 1804. The Secretary shall annually transmit to the appropriate committees of Congress having legislative jurisdiction or oversight with respect to the agency within the Department of Agriculture that provides support services to an advisory committee, to the Library of Congress

"(1) a copy of the report concerning that advisory committee prepared in compliance with section 6(c) of the Federal Advisory Committee Act (5 U.S.C. appendix 1);

"(2) a list of the members of that advisory committee which shall specify the principal place of residence, persons or companies by whom they are employed and other major sources of income, as defined by the Secre-tary, of each member; and

(3) a statement of the amount of expenses incurred in connection with advisory committee meetings by any member of an advisory committee for which reimbursement was received from any source other than the United States or the member's employer.

"BUDGET PROHIBITIONS

"Sec. 1805. No advisory committee shall expend funds in excess of its estimated annual operating costs by more than 10 per centum or \$500, whichever is greater, until it provides the Secretary with an explanation of the need for the additional expenditure and the Secretary approves such additional expenditure.

"TERMINATION OF ADVISORY COMMITTEES

"Sec. 1806. The Secretary shall terminate any advisory committee upon a finding that

any such advisory committee—
"(1) has expended funds in excess of its estimated annual operating costs by more than 10 per centum or \$500, whichever is greater, without the prior approval of the Secretary pursuant to the provisions of section 1805 of this title;

"(2) has failed to file all reports required under the provisions of the Federal Advisory Committee Act or this title:

"(3) has failed to meet for two consecutive

"(4) is responsible for functions that otherwise would be or should be performed by Federal employees; or

'(5) does not serve or has ceased to serve

an essential public function.".
(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out the items relating to section 1801 through 1809 and inserting in lieu thereof the following items:

"Sec. 1801. Purposes.

"Sec. 1802. Definitions.

"Sec. 1803. Membership on advisory committees.

"Sec. 1804. Annual report

"Sec. 1805. Budget prohibitions.

"Sec. 1806. Termination of advisory committees.".

RURAL TELEPHONE BANK AMENDMENT

Sec. 1110. The Rural Electrification Act of 1936 (7 U.S.C. 901-950b) is amended-

- (1) in the second sentence of section 406 (a), by inserting after "thereafter" the words "but not later than fiscal year 1991", and by striking out "\$300,000,000" and inserting in lieu thereof "\$600,000,000"; and
- (2) in the first sentence of section 406(c), by striking "September 30, 1985" and inserting in lieu thereof "September 30, 1995". and by striking "and after the amount of class A and class B stock issued totals \$400,000,000,",

CONSULTATION ON GRAIN MARKETING

SEC. 1111. Congress encourages the Secretary of Agriculture, in coordination with other appropriate Federal departments and agencies, to continue to consult with representatives of other major grain exporting nations toward the goal of establishing more orderly marketing of grain and achieving higher farm income for producers of grain.

TITLE XII-AGRICULTURAL EXPORTS

AGRICULTURAL EXPORT CREDIT REVOLVING FUND

SEC. 1201. Section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) is amended by adding at the end thereof the following new subsection (d):

"(d) (1) There is hereby established in the Treasury a revolving fund to be known as the Agricultural Export Credit Revolving Fund, which shall be available without fiscal year limitation for use by the Commodity Credit Corporation (hereinafter referred to in this subsection as the 'Corporation') for financing in accordance with this section and section 5(f) of the Commodity Credit Corpora-tion Charter Act (15 U.S.C. 714c)—

"(A) commercial export sales of United States agricultural commodities out of private stocks or stocks owned or controlled by the Corporation on credit terms of not to ex-

ceed three years;

"(B) export sales of United States breeding animals (including, but not limited to, cattle, swine, sheep, and poultry), including the cost of freight from the United States to designated points of entry in other nations; and

"(C) the establishment of facilities in importing countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing fungible agricultural commodities produced in and exported from the United States (through the use of local currency generated from the sale United States agricultural commodities).

"(2) The Corporation shall use the revolving fund only to extend credit for purposes of market development and only where there is substantial potential for developing regular commercial markets for United States

agricultural commodities.

'(3) The Secretary of Agriculture shall ensure that the revolving fund is used in such a manner as to involve equitable use of the funds to finance sales to the greatest feasible number of countries. In carrying out this objective, the Secretary shall establish procedures under which-

"(A) not less than 85 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the purposes provided in clause (A) of para-

graph (1) of this subsection; and

(B) not to exceed 25 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the financing of credit sales to any one country for the purposes described in paragraph (1) of this subsection.

- "(4) There are authorized to be appropriated to the Agricultural Export Credit Revolving Fund such sums as Congress shall deem necessary to carry out the provisions of this subsection. All funds received by the Corporation in payment for credit extended by the Corporation using the revolving fund in financing export sales of the type specified in paragraph (1) of this subsection shall be added to and become a part of such revolving fund.
- "(5) The Secretary shall submit an annual report to Congress not later than December 1 of each year with respect to the see of the revolving fund in carrying out export credit sales by the Corporation in the previous fiscal year. Such report shall include the names of the countries extended credit under such programs, the total amount of such credit in the case of each such country in such fiscal year, and a discussion and evaluation of the market development activities of the Corporation under this subsection during such fiscal year. The first such report shall be submitted to Congress not later than December 1, 1982.

"(6) The revolving fund created by this subsection is abolished effective October 1, 1935, and all unobligated money in such fund on September 30, 1985, shall be transferred to and become part of the miscellaneous receipts account of the Treasury.

"(7) The authority provided under this subsection shall be in addition to, and not

in place of, any authority granted to the Secretary or the Corporation under any other provision of law."

CONGRESSIONAL CONSULTATION ON BILATERAL COMMODITY SUPPLY AGREEMENTS

SEC. 1202. At least thirty days before the Government of the United States enters into any bilateral international agreement, other than a treaty, involving a commitment on the part of the United States to assure access a foreign country or instrumentality thereof to United States agricultural commodities or products thereof on a commercial basis, the President shall notify and consult with the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture for the purpose of setting forth in detail the terms of and reasons for negotiating such agreement receiving recommendations, if any, with respect thereto.

SPECIAL STANDBY EXPORT SUBSIDY PROGRAM

SEC. 1203. (a) In order to discourage foreign countries or instrumentalities thereof from using subsidies to promote the exportation of agricultural commodities, the Secretary of Agriculture shall formulate a special ndby export subsidy program for agricultural commodities or products thereof produced in the United States. Such program shall be designed to neutralize the effects of export subsidy programs instituted by foreign countries or instrumentalities thereof to encourage exports of their agricultural commodities to forcign markets other than the United States.

(b) The Secretary shall implement the special standby export subsidy program formulated under subsection (a) of this section

only after the President

(A) makes a determination under section 301 of the Trade Act of 1974 (19 U.S.C. 2411) that action by the United States is appropriate to obtain the elimination of an act, policy, or practice of a foreign country or instrumentality that results in-

(i) substantial displacement of United States exports of agricultural commodities

of foreign markets, or

- (ii) prices for agricultural commodities in foreign markets materially below which suppliers of the same agricultural commodities produced in the United States must charge in order to supply such commodities to the same market;
- (B) makes a determination that such act, policy, or practice of the foreign country or instrumentality concerned involves the use of export subsidies to encourage exports of such country's or instrumentality's agricul-tural commodities to foreign markets other than the United States:
- (C) fails to reach a mutually acceptable resolution through consultations with the foreign country or instrumentality con-
- (D) is authorized under the dispute settlement procedures specified in the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agree-ment on Tariffs and Trade to undertake an export subsidy program to counter the export subsidies on agricultural commodities employed by the foreign country or instrumentality concerned: Provided, That the United States is obligated by international agreement to receive such authorization before undertaking measures to counter such export subsidies.
- (c) The Secretary of Agriculture shall use the Commodity Credit Corporation in carry-

ing out the special standby export subsidy program authorized by this section.

(d) Nothwithstanding any other provision of this section, the Secretary of Agriculture shall not implement the special standby export subsidy program for purposes of promoting export sales of cotton produced in the United States.

AGRICULTURAL EMBARGO PROTECTION

Sec. 1204. Notwithstanding any other provision of law-

(a) If the President or other member of the executive branch of the Federal Govcrnment causes the export of any agricultural commodity to any country or area of the world to be suspended or restricted for reasons of national security or foreign policy under the Export Administration Act of 1979 or any other provision of law, and if such suspension or restriction of the export of such agricultural commodity is imposed other than in connection with a suspension or restriction of all exports from the United States to such country or area of the world, and if export sales of such agricultural commodity by the United States to such country or area of the world during the year preceding the year in which the suspension or restriction is imposed exceed 3 per centum of the total export sales of such commodity by United States to all foreign countries during the year preceding the year in which the suspension or restriction is in effect, the Secretary of Agriculture (hereinafter in this section referred to as the Secretary) shall compensate producers of the commodity involved by either-

(1) making payments available to such producers, as provided in subsection (b) of

this section; or

(2) on the date on which the suspension restriction is imposed, establishing the loan level for such commodity under the Agricultural Act of 1949, if a loan program is in effect for the commodity, at 100 per centum of the parity price for the commo-dity, as determined by the Secretary on the date of the imposition of the suspension or restriction: or

(3) undertaking any combination of the measures described in clauses (1) and (2)

of this subsection.

(b) If the Secretary makes payments available to producers pursuant to clause (1) of subsection (a) of this section, the amount of such payment shall be determined by-

(1) in the case of an agricultural commodity for which payments are authorized to be made to producers under title I of the Agricultural Act of 1949, multiplying (i) the producer's farm program payment yield or the yield established for the farm for the commodity involved, times (ii) the farm program average established for the commodity, times (iii) the amount by which the average market price per unit of such commodity received by producers during the sixmodify received by producers during the six-ty-day period immediately following the date of the imposition of the suspension or restriction is less than 100 per centum of the parity price for such commodity, as determined by the Secretary on the date of imposition of the suspension or restriction;

(2) in the case of other agricultural com-modities for which price support is authorized for producers under titles I, II, and III of the Agricultural Act of 1949, multiplying the amount by which the average market price per unit of such commodity received by the producers during the sixty-day period immediately following the date of the imposition of the suspension or restriction is less than 100 per centum of the parity price for such commodity, as determined by the Secretary on the date of the imposition of the suspension or restriction, by the quantity of such commodity sold by the producer during the period that the suspension or restriction is in effect.

(c) The payments made pursuant to clause (1) of subsection (b) of this section shall be made for each marketing year or part thereof during which the suspension or restriction effect and shall be made in equal amounts at ninety-day intervals, beginning ninety days after the date of the imposition of the suspension or restriction.

(d) (1) Any loan level established pursuant to clause (2) of subsection (a) of this sec-tion shall remain in effect as long as the suspension or restriction described in sub-

section (a) remains in effect.

(2) Any commodity loan the level of which is increased by the Secretary pursuant to clause (2) of subsection (a) of this section shall be made available to producers of the commodity without interest

(e) The Secretary is authorized to issue such regulations as are deemed necessary to carry out the provisions of this section

(f) The Secretary shall use the Commodity Credit Corporation in carrying out the provisions of this section.

(g) The provisions of this section shall become effective with respect to any suspensicn or restriction of the export of any agricultural commodity, as described in subsection (a) of this section, implemented after the date of enactment of this Act.

TITLE XIII-PUBLIC LAW 480

MISCELLANEOUS AMENDMENTS

Sec. 1301. Section 101 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "for foreign currencies" before the period at the end of the section and inserting in lieu thereof to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement"

SEC. 1302. Section 103(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended to read as follows:

"(b) except where the President deter-mines that it would be inconsistent with the objectives of this Act, determine the amount of foreign currencies needed for the uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III, and the agreements for credit sales shall provide for payment of such amounts in dollars or in foreign currencies upon delivery of the agricultural commodities. Such payment may be considered as an advance payment of the earliest installment;

SEC. 1303. Subsection 103(d) of the Agricultural Trade Development and Assistance Act of 1954 is amended by amending the first full sentence to read as follows: "As used in this Act, 'friendly country' shall not include any country or area dominated or controlled by a foreign government or organization con-

trolling a world Communist movement.".

SEC. 1304. Section 103(1) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out the words beginning with "obtain commitments from friendly purchasing countries' through

"United States of America, and".
SEC. 1305. Section 104 of the Agricultural
Trade Development and Assistance Act of

1954 is amended-

(1) by striking out in the first sentence "under this title" and inserting in lieu thereof "under agreements for such sales entered into prior to January 1, 1972";

- (2) by striking out in subsection (d) "\$5,-000,000" and inserting in lieu thereof "\$10,-000,000"; and
- (3) by striking out in clause (3) of the proviso following subsection (k) "(except as provided in subsection (c) of this section),".

SEC. 1306. Section 106(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following sentence: "Payment by any friendly country for commodities purchased for foreign currencies on credit terms and on terms which permit conversion to dollars shall be upon terms no less favorable to the United States than those for development loans made under section 122 of the Foreign Assistance Act of 1931, as amended.".

SEC. 1307. Section 108 of the Agricultural Trade Development and Assistance Act of

1954 is repealed.

SEC. 1308. Section 109 of the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1709) is amended—

(1) by amending subsection (a) as follows: (A) in paragraph (3), by inserting immediately before the semicolon ", and reducing illiteracy among the rural poor"

(B) by striking out the period at the end

of paragraph (10) and inserting in lieu thereof "; and"; and
(C) by inserting the following new paragraph immediately after paragraph (10); "(11) carrying out programs to improve the health of the rural poor.";

(2) by repealing subsection (b); and(3) by adding at the end thereof the fol-

lowing new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum extent feasible, in specific and measurable terms, and in a manner which ensures that needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum extent feasible, take appropriate steps to assure that, in each agreement entered into under this title and in each amendment to such an agreement, the self-help measures agreed to are additional to the measures which the recipient country otherwise is undertaking without the new resources.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and each amendment to such an agreement, are being fully carried out."

SEC. 1309. Section 110 of the Agricultural rade Development and Assistance Act of

1954 is repealed.

SEC. 1310. Section 115(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting in the first sentence after the words "food commodities"

the words "from private stocks". SEC. 1311. Section 204 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "\$750,000,-000" in the first sentence and inserting in

lieu thereof "\$1,000,000,000".

SEC. 1312. Section 402 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out in the second sentence "or beer" after "wine" and inserting in lieu thereof ", beer, or distilled spirits". SEC. 1313. Section 408(a) of the Agricul-

tural Trade Development and Assistance Act of 1954 is amended by striking out "April 1" and inserting in lieu thereof "July 1".

PUBLIC LAW 480 EXTENSION

SEC. 1314. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "1981" and inserting in lieu thereof "1985".

TITLE XIV-RESEARCH, EXTENSION, AND TEACHING IN THE FOOD AND AGRI-CULTURAL SCIENCES

REVISED FINDINGS

SEC. 1401. Section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101) and is amended to read as follows:

"SEC. 1402. Congress finds that-

the Federal Government of the United States has provided funding support for agricultural research, extension, and teaching for many years in order to promote and protect the general health and welfare of the people of the United States, and this support has significantly contributed to the development of the Nation's agricultural system;

a unique partnership arrangement "(2) exists in agricultural research, extension, and teaching between the Federal Government and the governments of the several States and this partnership should be pre-

served:

"(3) the existing agricultural research estem consisting of the Federal Governsystem ment, the land-grant colleges and universities, other colleges and universities engaged in agricultural research, extension, teaching, and the private sector constitute an essential national resource which must serve as the foundation for any further strengthening of agricultural research, extension, and teaching in the United States;

"(4) of major concern is the security of the future food supply and its costs due to declining rates of increase in productivity, rapidly escalating cost of petroleum and petrochemicals, declining water tables, natural resource depletion, deterioration of environmental quality, and the ability world agriculture to provide and maintain adequate diets for an ever increasing population with rather fixed areas of cropland;

"(5) advances in food and agricultural sciences and technology have become increasingly limited by the concentration upon through development and exploitation of currently known scientific principles and technological approaches at the expense of more fundamental research, and strong research effort in the basic sciences is neces sary to achieve breakthroughs in knowledge that can support new and innovative

food and agricultural technologies;
"(6) available data and research based economic information are no longer sufficient to deal with the increasingly complex public and private decisions needed to

respond to the rapidly changing events in domestic world agriculture;

'(7) the land-grant colleges and universities, other colleges and universities, and the Department of Agriculture should have improved linkages with the international research centers and counterpart institutions and agencies in developed, transitional, and developing countries; this would serve the purpose of United States agriculture and the United States and the world economy; and

"(8) long-range planning for research, extension, and teaching is a key element in meeting the objectives of this title, and all of the elements in the food and agricultural service and education system are encouraged to expand their successful planning and co-

ordination efforts.".

AMENDED PURPOSES

SEC. 1402. Section 1403 of the National Agricultural Research, Extension, and Teaching Policy of 1977 (7 U.S.C. 3102) is amended-

(1) by amending paragraph (2) to read as follows;

"(2) undertake the special measures set forth in this title to improve the coordination and planning of agricultural research, extension, and teaching programs, identify needs and establish priorities for these programs, assure that national agricultural research, extension, and teaching objectives are fully achieved, and assure that the results of agricultural research are effectively communicated and demonstrated to farmers, processors, handlers, consumers, and all other users who can benefit therefrom;";

(2) in paragraph (4) by striking out the comma after the word "programs" the first time it appears and by striking out "including the initiatives specified in section 1402(8) of this title,";

(3) in paragraph (5) by striking out the word "scientific"; and

(4) in paragraph (7) by striking out the words "training and research" and inserting in lieu thereof the words "research, exten-sion, and teaching".

AMENDED DEFINITIONS

SEC. 1403. Section 1404 of the National Agricultural Research, Extension, and Teaching Act of 1977 (7 U.S.C. 3103) amended-

(1) by amending paragraph (8) to read as follows:

"(8) the term 'food and agricultural sciences' means basic, applied, and developmental research, and extension and teaching activities, in the food, agricultural, renewable natural resources, forestry, and social sciences, in the broadest sense of these terms, including but not limited to, activities relating to-

"(A) domestic and export market expansion for United States agricultural products; "(B) production inputs, such as energy, to

improve productivity;
"(C) animal health to protect man and the animal production base of the United States;

"(D) human nutrition;
"(E) home economics and family life;

"(F) rangeland management;
"(G) aquaculture; and

"(H) energy production, use and conservation:

(2) by amending paragraph (12) to read: "(12) except as provided in subtitle H of this title, the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, the Virgin Islands of the United States, and the District of Columbia;"; and

(3) by amending paragraph (14) to read

follows:

"(14) the term 'teaching' means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and matters relating thereto (such as faculty development, stu-dent recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies) conducted by colleges and universities offering baccalaureate or higher degrees.".

RESPONSIBILITIES OF THE SECRETARY AND DE-PARTMENT OF AGRICULTURE

1404. Section 1405 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3121) is amended-

(1) in paragraph (1) by striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services"

(2) in paragraph (2) by striking out the words "teaching, and manpower development" and inserting in lieu thereof the words "and teaching";

(3) in paragraph (5) by striking out the word "other";

(4) in paragraph (6) by inserting the ords "or proposed" after the words "actions taken"

(5) in paragraph (8) by striking out the word "and" at the end thereof;

(6) in paragraph (9) by striking out the period and inserting in lieu thereof a cemicolon followed by the word "and"; and

(7) by adding at the end thereof the following new paragraph:

"(10) coordinate all agricultural research,

extension, and teaching activities conducted or financed by the Department of Agriculture with the periodic renewable resource assessment and program provided for in sections 3 and 4 of the Forest and Rangeland Renewable Resources Planning Act of 1974 and the appraisal and program provided for in sections 5 and 6 of the Soil and Water Resources Conservation Act of 1977.".

SUBCOMMITTEE ON FOOD, AGRICULTURAL, AND FORESTRY RESEARCH

SEC. 1405. (a) Section 401(h) of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6651(h)) is amended-

(1) by striking out the words "Subcommittee on Food and Renewable Resources" and inserting in lieu thereof the words "Subcommittee on Food, Agricultural, and Forestry Research":

(2) by striking out the words "Department of Health, Education, and Welfare" and in-serting in lieu thereof the words "Department of Health and Human Services"; and
(3) by striking out the words "Energy and

Research and Development Administration and inserting in lieu thereof the words "Department of Energy".

(b) Section 257(b) of the Energy Security Act (42 U.S.C. 8852) is amended in paragraph (1) by striking "Subcommittee on Food and Renewable Resources" and inserting in lieu thereof "Subcommittee on Food, Agricultural, and Forestry Research".

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

SEC. 1406. Section 1407 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122) is amended-

- (1) in subsection (a) by striking out "of five years" and inserting in lieu thereof "that expires December 31, 1986";
- (2) by amending subsection (b) to read as follows:

"(b) The Joint Council shall be composed of not fewer than twenty-five representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and agricultural sciences, including land-grant colleges and universities; other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching; State agricultural experiment stations; State cooperative extension services; agencies within the Department of Agriculture which have significant research, extension, or teaching responsibilities; the Office of Science and Technology Policy; and other Federal agencies determined by the Secretary to be appropriate. Members shall be appointed for a term of three years by the Secretary from nominations made by the organizations and agencies described in the preceding sentence. The terms of members shall be staggered. At least one-half of the members of the Joint Council shall be appointed by the Secretary (ensuring that regional differences are prop-erly considered) from among distinguished persons engaged in agricultural research, extension, or teaching programs at land-grant colleges and universities and State agricultural experiment stations. To ensure that other agricultural institutional views are considered by the Joint Council, two of the members of the Joint Council shall be appointed by the Secretary from among persons who are distinguished representatives of other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching. The Joint Council shall be jointly chaired by the senior policy official of the Depart-ment of Agriculture responsible for research, extension, and teaching, and a person to be

elected from among the non-Federal membership of the Joint Council.'

(3) by amending paragraph (1) of subsection (d) to read as follows:

The primary responsibility of the Joint Council shall be to bring about more effective research, extension, and teaching in the food and agricultural sciences in the United States by improving planning and coordination of publicly and privately sup-ported food and agricultural science activi-ties and by relating Federal budget development and program management to these processes.";

(4) in subsection (d)(2)(E) by striking it "efforts" and all that follows through 'planning," and inserting in lieu thereof "of the food and agricultural sciences, by using, wherever possible, the existing regional re-search, extension, and teaching organizations State cooperative institutions to provide regional planning and coordination,

(5) by amending subsection (d)(2)(G) to

read as follows:

"(G) submit a report, not later than June

30 of each year-

"(1) specifying the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs;

delineating suggested areas of re sponsibility among Federal, State, and private organizations in carrying out such pro-

grams; and

"(iii) specifying the levels of financial and other support needed to carry out such pro-grams. Each such report shall be submitted to Congress, the Secretary of Agriculture, and the constituent organizations of the Joint Council. Minority views, if timely submitted, shall be included in such report,"; and

(6) by adding at the end thereof new sub-

sections (e), (f), and (g) as follows:

"(e) The meetings of the Joint Council shall be publicly announced in advance and shall be open to the public. Appropriate records of the activities of the Joint Council shall be kept and made available to the public on request.

(f) This title shall constitute the charter under which the Joint Council will operate and no further charter shall be necessary. The Joint Council may develop bylaws or operating procedures if such are determined to necessary for effective operations. Notwithstanding any other provision of law, the Joint Council shall be exempt from the provisions of the Federal Advisory Committee

The Joint Council is authorized to establish such panels as it deems appropriate to develop information, reports, advice, and recommendations for the use of the Joint Council in meeting its responsibilities. Members of such panels may include members of the Joint Council, individuals from the Department of Agriculture and other departments and agencies of the Federal Government, representatives of State agencies, land-grant colleges and universities, other colleges and universities, State agricultural experiment stations, and individuals from the private sector. Such panels shall be exempt from the provisions of the Federal Advisory Committee Act and title XVIII of the Food and Agriculture Act of 1977.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1407. Section 1408 of the National Agricultural Research. Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123) is amended-

(1) in subsection (a) by striking out "of five years" and inserting in lieu thereof "that expires December 31, 1986";

(2) in subsection (b) — (A) by striking out "twenty-one" and inserting in lieu thereof "twenty-five";

by amending paragraph (1) to read (B) as follows:

"(1) eight producer members representing various geographical regions and production interests, including forestry and aquacul-

(C) by adding at the end thereof the following:

"Such members shall be appointed to serve staggered terms."; and

(3) in subsection (f)(2)(E), by striking it "October 31" and inserting in lieu thereof "July 1"; and

(4) in subsection (f)(2)(F), by striking out "March 1 of" and inserting in lieu thereof "February 20 of".

FEDERAL-STATE PARTNERSHIP AND COORDINATION

Sec. 1408. (a) Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended to read as follows:

"FEDERAL-STATE PARTNERSHIP AND COORDINATION

"Sec. 1409. A unique partnership arrangement exists in food and agricultural re-search, extension, and teaching between the Federal Government and the governments of the several States whereby the States have accepted and have supported, through legislation and appropriations-

"(1) research programs under-

"(A) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887:

(B) the Act of October 10, 1962 (16 U.S.C. 582a et seq.). commonly known as the Mc'ntire-Stennis Act of 1962; and

"(C) subtitle E of this title;

"(2) extension programs under the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act; and

"(3) teaching programs under—
"(A) the Act of July 2, 1862 (7 U.S.C. 301 et seq.), commonly known at the First Morrill Act:

"(B) the Act of August 30, 1890 (7 U.S.C. 321 et seq.), commonly known as the Second

Morrill Act; and

(C) the Act of June 29, 1935 (7 U.S.C. 427 et seq.), commonly known as the Bankhead-

This partnership in publicly supported agricultural research, extension, and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed, and in many cases, site-specific needs of American agriculture. This partnership must be preserved and enhanced.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by striking out the item relating to section 1409 and inserting in lieu thereof the following new item:

Sec. 1409. Federal-State partnership and coordination.".

SECRETARY'S REPORT

SEC. 1409. Section 1410 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3125) is amended by striking out "February 1" and inserting in lieu thereof "January 1".

LIBRARIES AND INFORMATION NETWORK

SEC. 1410. Section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3126) is amended

(1) in subsection (a)

(A) in paragraph (4) by striking out "and" at the end thereof;

(B) in paragraph (5) by striking out the period and inserting in lieu thereof a semi-colon and the word "and";

(C) by adding a new paragraph (6) to

read as follows:

"(6) the Department of Agriculture establish mutually valuable working relationships with international and foreign information and data programs."; and

(2) in subsection (b) by amending paragraph (3) to read as follows:

(3) providing notification about these collections on a regular basis to the State cooperative extension services, State educational agencies, and other interested persons,"

SUPPORT FOR THE JOINT COUNCIL AND THE ADVISORY BOARD

SEC. 1411. Section 1412(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3127(a)) is amended to read as follows:

(a) To assist the Joint Council and the Advisory Board in the performance of their duties, the Secretary may appoint, after consultation with the co-chairman of the Joint Council and the chairman of the Advisory

Board-

"(1) a full-time executive director who shall perform such duties as the co-chair-men of the Joint Council and the chairman of the Advisory Board may direct and who shall receive compensation at a rate not to exceed the rate payable for GS-18 of the General Schedule established in section 5332 of title 5, United States Code; and

(2) a professional staff of not more than five full-time employees qualified in the food and agricultural sciences, of which one shall serve as the executive secretary to the Joint Council and one shall serve as the executive secretary to the Advisory Board.".

GENERAL PROVISIONS; ADDITIONAL ASSISTANT SECRETARY OF AGRICULTURE

SEC. 1412. (a) Section 1413 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3128) is amended by adding at the end thereof the following new subsections:

"(c) There are authorized to be appropriated annually such sums as Congress may determine necessary to carry out the pro-visions of section 1412 of this title and sub-

section (b) of this section.

"(d) In the performance of the duties assigned to them under this title, the Subcommittee on Food, Agricultural, and Forestry Research of the Federal Coordinating Council for Science, Engineering, and Technology, the Joint Council, and the Advisory Board shall, to the extent practicable, (1) conduct joint meetings and exchange reports, (2) coordinate such meetings with, and distribute such reports to, others in the national agricultural research, extension, and teaching system, and (3) appoint persons to serve as liaisons with each other and other members of such system.

"(e) In addition to the Assistant Secretaries of Agriculture now provided for by law, there shall be one additional Assistant Secretary of Agriculture, who shall be appointed by the President, by and with the advice and consent of the Senate, who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of Agriculture, and who shall carry out such duties as may be prescribed by the Secretary of Agriculture.".

"(b) Section 5315 of title 5, United States Code, is amended in the item relating to Assistant Secretaries of Agriculture by striking out "(5)" and inserting in lieu thereof "(6)".

PROGRAM FOR COMPETITIVE, SPECIAL, AND FACILI-TIES GRANTS FOR AGRICULTURAL RESEARCH

SEC. 1413. (a) Section 2(b) of the Act August 4, 1965 (7 U.S.C. 4501), is

- (1) in the second sentence by inserting after the words "on Foods and Agricultural Sciences" the following: "and the National Agricultural Research and Extension Users Advisory Board"; and
- (2) in the last sentence by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for each

of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984. September 30, 1985, September 30, 1986, and September 30, 1987,".

(b) Section 2(c) of the Act of August 4, 1965 (7 U.S.C. 450i(c)) is amended—
(1) in paragraph (1) by inserting "research foundations established by landgrant colleges and universities," after "landgrant colleges and universities,";

(2) by amending paragraph (2) to read as

follows:

"(2) to State agricultural experiment stations, land-grant colleges and universities, research foundations established by landgrant colleges and universities, colleges and universities receiving funds under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), and accredited colleges of veterinary medicine, to facilitate or expand ongoing State-Federal food and agricultural research programs that (A) promote excellence in research, (B) promote the development of regional research centers, (C) promote the research partnership between the Department of Agriculture and such colleges and universities, research foundations or State agricultural experiment stations, or (D) facilitate coordination and cooperation of research among States.".

Section 2(d) of the Act of August 4,

1965 (7 U.S.C. 450i(d)), is amended—
(1) by striking out "the purchase of equipment" and all that follows through the dash and inserting in lieu thereof "the renovation and refurbishment (including energy retrofitting) of research spaces in buildings or spaces to be used for research, and the purchase and installation of fixed equipment in such spaces. Such grants may be new construction only for auxiliary facilities, and fixed equipment used for research in such facilities, such as greenhouses, insectaries, and research farm structures and in-

taries, and research farm structures and in-stallations. Such grants shall be made to—"; (2) in paragraph (1) by striking out "available; and" and inserting in lieu thereof "available;", (3) in paragraph (2) by striking out the period and inserting in lieu thereof a semi-

colon: and

(4) by inserting after paragraph (2) the

- following new paragraphs:
 "(3) each forestry school not described in paragraph (1), in an amount which is equal to 10 per centum of the funds received by such school under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;
- "(4) each college eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee Institute, in an amount that is equal to 10 per centum of the funds received by such college under section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977.".

AMENDMENT TO THE RESEARCH FACILITIES ACT OF 1963

SEC. 1414. Section 4(a) of the Act of July 22, 1963 (7 U.S.C. 390c(a)), is amended by striking out "for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for each of the fiscal years ending September 30, 1982. September 30, 1983. September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987,". FEDERAL SUPPORT OF HIGHER EDUCATION IN THE

FOOD AND AGRICULTURAL SCIENCES

SEC. 1415. Section 1417 of the National Agricultural Research, Extension, and Teach ing Policy Act of 1977 (7 U.S.C. 3152) is amended-

(1) by amending subsection (a) to read as follows:

"(a) (1) The Secretary shall promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs.

"(2) The Secretary of Education shall delegate to the Secretary the authority to carry out all functions and duties under the Act of June 29, 1935 (7 U.S.C. 427 et seq.), applicable to the activities and programs for which funds under section 22 of such Act are available to the Secretary.

(2) by redesignating subsections (b), (c), and (d) as (c), (d), and (e), respectively and inserting a new subsection (b) to read

as follows:

"(b) (1) The Secretary may make grants to land-grant colleges and universities, and to other colleges and universities having a demonstrable capacity to carry out food and agricultural teaching, for periods not to exceed five years-

"(A) to strengthen institutional capacities to respond to State, national, or international educational needs in the food and

agricultural sciences;

"(B) to attract students and educate them as needed in the food and agricultural sciences, and to attract needed professionals to provide for their professional improvement the food and agricultural sciences;

(C) to design and implement innovative food and agricultural educational programs;

"(D) to facilitate cooperative agreements between two or more eligible institutions to maximize the use of faculty and facilities to improve their food and agricultural teaching programs.

Such grants shall be made without regard matching funds, but each recipient stitution shall have a significant ongoing commitment to the food and agricultural sciences generally and to the specific subject area for which such grant is to be used.

'(2) The Secretary may make competitive grants to colleges and universities for periods

not to exceed five years-

"(A) to develop or administer programs to meet unique food and agricultural educa-

tional problems: and

(B) to administer and conduct specialized programs to attract individuals for undergraduate and graduate programs and to administer and conduct graduate fellowship programs to meet regional and national objectives in the food and agricultural sciences. Such grants shall be made without regard to matching funds provided by recipients."; and

(3) in subsection (e), as redesignated by paragraph (2) of this section, by striking out for the fiscal year ending September 30, 1982," and inserting in lieu thereof "for each of the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985 September 30, 1986 and September 30, 1987,".

TRANSFER OF FUNCTIONS

SEC. 1416. (a) There are hereby transferred to the Secretary of Agriculture all the functions of the Secretary of Education and of the Department of Education under the Act of August 30, 1890 (7 U.S.C. 321 et seq.)

There are hereby transferred to the Department of Agriculture the offices of the Department of Education established under the Act of August 30, 1890 (7 U.S.C. 321 et seq.).

NATIONAL AGRICULTURAL SCIENCE AWARD

SEC. 1417. (a) Section 1418 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3153) is

- (1) by amending the section heading to ad as follows: "NATIONAL AGRICULTURAL read as follows: SCIENCE AWARD";
- (2) by amending subsection (a) to read as follows:
- "(a) The Secretary shall establish the National Agricultural Science Award for re-search or advanced studies in the food and agricultural sciences, including the social sciences. Two such awards, one for each of the categories described in subsection (d)

of this section, shall be made in each fiscal

year.";
(3) by redesignating subsections (c) and (d) as subsections (d) and (e), respectively;

(4) by inserting immediately after subsection (b) a new subsection (c) as follows:

"(c) The awards will be open to persons in agricultural research, extension, teaching, or any combination thereof."

The table of contents of the Food and Agriculture Act of 1977 is amended by striking out the following:

"Sec. 1418. National agricultural research award."

and inserting in lieu thereof the following: "Sec. 1418. National agricultural science award."

ALCOHOL AND INDUSTRIAL HYDROCARBONS

SEC. 1418. Section 1419(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3154(a)) is amended-

- (1) by striking out in the first sentence "colleges and universities, and Government corporations" and inserting in lieu thereof "colleges, universities, Government corpora-tions, and Federal laboratories" and by and by tions. striking out in the third sentence "colleges, universities and Government corporations" and inserting in lieu thereof "colleges, universities, Government corporations, and Federal laboratories";
- (2) by striking out "four" in the sixth sentence; and
- (3) by striking out "and September 30, 1982" in the sixth sentence and all that follows through the period at the end thereof and inserting in lieu thereof the following: "September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987; Provided, That the total amount of such appropriations shall not exceed \$40,000,000 during the ten-year period beginning October 1, 1977, and shall not exceed such sums as may be authorized by law for any fiscal year subsequent to such period: Provided further, That not more than a total of \$5,000,000 may be awarded to the colleges and universities of any one State."

NUTRITION EDUCATION PROGRAM

SEC. 1419. Section 1425 of the National Agricultural Research. Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3175) is amended-

(1) by amending subsection (b) to read as follows:

"(b) In order to enable low-income individuals and families to engage in nutritionally sound food purchasing and preparation practices, the expanded food and nutrition education program conducted under section 3(d) of the Act of May 8, 1914 (7 U.S.C. 343 (d)), shall provide for the employment and training of professional and paraprofessional aides to engage in direct nutrition education of low-income families and in other appropriate nutrition education programs. To the maximum extent practicable, such program aides shall be hired from the indigenous target population."; and
(2) by adding a new subsection (c) to read

as follows:

"(c) Beginning with the fiscal year ending

September 30, 1982-

(1) Any funds annually appropriated under section 3(d) of the Act of May 8, 1914, for the conduct of the expanded food and nutrition education program, up to the amount appropriated under such section for such program for the fiscal year ending September 30, 1981, shall be allocated to each State in the same proportion as funds appropriated under such section for the conduct of the program for the fiscal year ending September 30, 1981, are allocated among the States; with the exception that the Secretary may retain up to 2 per centum of such amount

for the conduct of such program in States that did not participate in such program in the fiscal year ending September 30, 1981.

(2) Any funds appropriated annually under section 3(d) of the Act of May 8, 1914, for the conduct of the expanded food and nutrition education program in excess of the amount appropriated under such section for the conduct of the program for the fiscal year ending September 30, 1981, shall be allocated as follows:

(A) 4 per centum shall be available to the Secretary for administrative, technical, and other services necessary for the administration of the program.

'(B) The remainder shall be allocated

among the States as follows:

10 per centum shall be distributed

equally among all States; and

The remainder shall be allocated to (11) each State in an amount which bears the same ratio to the total amount to be allocated under this subparagraph as the population of the State living at or below 125 per centum of the income poverty guidelines prescribed by the Office of Management and Budget (adjusted pursuant to section 625 of the Economic Opportunity Act of 1964 (86 Stat. 697, as amended; 42 U.S.C. 2971d)), bears to the total population of all the States living at or below 125 per centum of the in-come poverty guidelines, as determined by the last preceding decennial census at the time each such additional amount is first appropriated. The provisions of this subparagraph shall not preclude the Secretary from developing educational materials and programs for persons in income ranges above the level designated in this subparagraph."

REPEAL OF SECTION 1426 OF THE NATIONAL AGRI-CULTURAL RESEARCH, EXTENSION, AND TEACH-ING POLICY ACT OF 1977

SEC. 1420. (a) Section 1426 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3176) is repealed.

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by strik-

ing out

"Sec. 1426. Nutrition education materials."

and inserting in lieu thereof

"Sec. 1426. Repealed.".

ELIGIBLE INSTITUTIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH FUNDS

SEC. 1421. Section 1430 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3192) is amended-

(1) by amending paragraph (1) to read as follows:

'(1) the term 'eligible institution' means accredited colleges of veterinary medicine and State agricultural experiment stations;"; and

(2) by amending paragraph (2) to read: the term 'dean' means the dean of an accredited college of veterinary medicine;".

ANIMAL HEALTH SCIENCE RESEARCH ADVISORY BOARD

SEC. 1422. Section 1432(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3194(a)) is amended by striking "of five years" and inserting in lieu thereof "that expires Decem-

APPROPRIATIONS FOR RESEARCH ON NATIONAL OR REGIONAL PROBLEMS

1423. Section 1434 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is amended-

(1) by amending subsection (b) to read as follows:

"(b) Funds appropriated under this section shall be awarded in the form of grants, for periods not to exceed five years, to eligible institutions."; and

(2) by adding at the end thereof new subsections (c), (d), and (e) as follows

"(c) In order to establish a rational allocation of funds appropriated under this section, the Secretary shall establish an-nually priority lists of animal health and disease problems of national or regional significance. Such lists shall be prepared after consultation with the Joint Council, the Ad-Board, and the Board. Any recommendations made in connection with such consultation shall not be controlling on the Secretary's determination of priorities. In establishing such priorities, the Secretary, the Joint Council, the Advisory Board, and Board shall consider the following factors:

(1) any health or disease problem which causes or may cause significant economic losses to any part of the livestock production industry;

"(2) whether current scientific knowledge necessary to prevent, cure, or abate such a

health or disease problem is adequate; and '(3) whether the status of scientific research is such that accomplishments may be anticipated through the application of scientific effort to such health or disease problem

(d) Without regard to any consultation under subsection (c), the Secretary shall, to the extent feasible, award grants to eligible institutions on the basis of the priorities assigned through a peer review system. Grant-ees shall be selected on a competitive basis in accordance with such procedures as the Secretary may establish.

"(e) In the case of multiyear grants, the Secretary shall distribute funds to grant recipients on a schedule which is reasonably related to the timetable required for the orconduct of the research project involved."

EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1424. Section 1444 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221) amended-

(1) in subsection (a)-

(A) by inserting "and ending with the fiscal year ending September 30, 1981," immediately after "Beginning with the fiscal year ending September 30, 1979," in the second sentence; and

(B) by inserting immediately after the second sentence a new sentence as follows "Beginning with the fiscal year ending September 30, 1982, there shall be appropriated under this section for each fiscal year an amount not less than 51/2 per centum of the total appropriations for such year under the Act of May 8, 1914 (7 U.S.C. 341-349).";

(2) in subsection (b)(2)(B) by inserting "current at the time each such additional sum is first appropriated" after "the last pre-ceding decennial census" both times it

(3) in subsection (c) by striking out "administrative head for extension" and inserting in lieu thereof "extension administrator and by inserting "and each five years there-after" before the period; and

(4) in subsection (d) by striking out "submitted by the proper officials of each institution" in the second sentence and inserting in lieu thereof "coordinated with and become part of the overall State plan for extension work and shall be submitted, as part of such overall plan, by the State director of the cooperative extension service".

AGRICULTURAL RESEARCH AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1425. Section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3222) is amended-

(1) in subsection (b) (1) by adding at the end thereof a new sentence to read as follows:

"These administrative funds may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for the purpose of assessing research opportunities or research planning.";

(2) in subsection (b) (2) (B) by inserting "current at the time each such additional sum is first appropriated" after "the last pre-ceding decennial census" both times it ap-

pears; and

(3) in subsections (c) and (d) by striking out the words "chief administrative officer each time they appear and inserting in Heu thereof "research director".

AUTHORIZATION FOR APPROPRIATIONS FOR SOLAR ENERGY MODEL FARMS AND DEMONSTRATION PROJECTS

SEC. 1426. Section 1454 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3263) is amended by striking "September 30, 1981" and inserting in lieu thereof "September 30, 19863

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1427. Section 1458 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3291) is

amended to read as follows: SEC. 1458. (a) The Secretary, subject to such coordination with other Federal offi-cials, departments, and agencies as the President may direct, is authorized to-

"(1) expand the operational coordination of the Department of Agriculture with institutions and other persons throughout the world performing agricultural and related research and extension activities by exchanging research materials and results with such institutions or persons and by conducting with such institutions or persons joint or coordinated research and extension on problems of significance to food and agriculture in the United States;

"(2) assist the Agency for International Development with agricultural research and extension programs in developing countries;

'(3) work with developed and transitional countries on agricultural and related re-search and extension, including the training of persons from such countries engaged in such activities and the stationing of scientists at national and international institu-

tions in such countries;
"(4) assist United States colleges and universities in strengthening their capabilitles for agricultural and related research and extension relevant to agricultural development activities in other countries; and

"(5) further develop within the Department of Agriculture highly qualified and experienced scientists who specialize in international programs, to be available for the activities described in this section.

"(b) The Secretary shall draw upon and enhance the resources of the land-grant colleges and universities, and other colleges and universities, for developing linkages among these institutions, the Federal Government, international research centers, and counterpart agencies and institutions in both the developed and less-developed countries to serve the purposes of agriculture and the economy of the United States and to make a substantial contribution to the cause of improved food and agricultural progress throughout the world.

"(c) The Secretary may provide specialized or technical services, on an advance of funds or a reimbursable basis, to United States colleges and universities carrying out international agricultural and related re-search, extension, and teaching development projects and activities. All funds received in payment for furnishing such specialized or technical services shall be deposited to the credit of the appropriation from which the

cost of providing such services has been paid or is to be charged.".

AUTHORIZATION FOR APPROPRIATIONS FOR EXIST-ING AND CERTAIN NEW AGRICULTURAL RE-SEARCH PROGRAMS

SEC. 1428. Section 1463 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311) is amended—

(1) in subsection (a) by striking out "and \$780,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "\$780,000,000 for the fiscal year ending September 30, 1982, \$780,000,000 for the fiscal year ending September 30, 1983, \$835,000,000 for the fiscal year ending September 30, 1984, \$890,000,000 for the fiscal year ending September 30, 1985, \$945,000,000 for the fiscal year ending September 30, 1985, \$945,000,000 for the fiscal year ending September 30, 1987,";

(2) in subsection (b) by striking out "and \$220,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "\$220,000,000 for the fiscal year ending September 30, 1982, \$230,000,000 for the fiscal year ending September 30, 1983, \$240,000,000 for the fiscal year ending September 30, 1984, \$250,000,000 for the fiscal year ending September 30, 1984, \$250,000,000 for the fiscal year ending September 30, 1985, \$260,000,000 for the fiscal year ending September 30, 1986, and \$270,000,000 for the fiscal year ending September 30, 1987,"; and

(3) by adding at the end thereof a new

subsection as follows:

"(c) Notwithstanding any authorization for appropriations for agricultural research in any Act enacted before the effective date of this subsection, not less than 25 per centum of the total funds appropriated to the Secretary in any fiscal year for the conduct of the cooperative research program provided for under the Act of March 2, 1887 (7 U.S.C. 361a et seq.); the cooperative forestry research program provided for under the Act of October 10, 1962 (16 U.S.C. 582a et seq.); the special and competitive grants programs provided for in sections 2(b) and 2(c) of the Act of August 4, 1965 (7 U.S.C. 450i); the animal health research program provided for under sections 1433 and 1434 of this title; the native latex research program provided for in the Native Latex Commercialization and Economic Development Act of 1978 (7 U.S.C. 178 et seq.); and the research provided for under various statutes for which funds are appropriated under the Agricultural Research heading or a successor heading, shall be appropriated for agricultural research at State agricultural experiment stations pursuant to the provision of the Act of March 2, 1887 (7 U.S.C. 361a et seq.).".

AUTHORIZATION FOR APPROPRIATIONS FOR EXTENSION PROGRAMS

SEC. 1429. Section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of -1977 (7 U.S.C. 3312) is amended by striking out "and \$350,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "\$350,-000,000 for the fiscal year ending September 30, 1982, \$360,000,000 for the fiscal year ending September 30, 1982, \$360,000,000 for the fiscal year ending September 30, 1984, \$380,-000,000 for the fiscal year ending September 30, 1985, \$390,000,000 for the fiscal year ending September 30, 1985, \$390,000,000 for the fiscal year ending September 30, 1987,".

MISCELLANEOUS PROVISIONS

SEC. 1430. (a) The National Agricultural Research Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by adding in subtitle K the following new sections:

"PROGRAM EVALUATION STUDIES

"SEC. 1471. (a) The Secretary shall regularly conduct program evaluations to meet the purposes of this title and the responsibilities assigned to the Secretary and the

Department of Agriculture in this title. Such evaluations shall be designed to provide information that may be used to improve the administration and effectiveness of agricultural research, extension, and teaching programs in achieving their stated objectives.

"(b) The Secretary is authorized to encourage and foster the regular evaluation of agricultural research, extension, and teaching programs within the State agricultural experiment stations, cooperative extension services, and colleges and universities, through the development and support of cooperative evaluation programs and program evaluation centers and institutes.

"GENERAL AUTHORITY TO AWARD CONTRACTS, GRANTS AND COOPERATIVE AGREEMENTS

"Sec. 1472. (a) The purpose of this section is to confer upon the Secretary general authority to award contracts, grants or cooperative agreements to further the research, extension, or teaching programs in the food and agricultural sciences of the Department of Agriculture. This authority supplements all other laws relating to the Department of Agriculture and is not to be construed as limiting or repealing any existing authorities.

"(b) The Secretary is authorized to enter into contracts with, or make cooperative agreements with, or make grants to, State agricultural experiment stations, State cooperative extension services, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations, individuals, and any other contractor or recipient for periods not to exceed five years, to further the research, extension or teaching programs in the food and agricultural sciences of the Department of Agriculture.

"(c) The Secretary may vest title to expendable and nonexpendable equipment and supplies and other tangible personal property in the contractor or recipient when the contractor or recipient purchases such equipment, supplies, and property with contract, grant, or cooperative agreement funds and the Secretary deems such vesting of title a furtherance of the agricultural research, extension, or teaching objectives of the Department of Agricultura

partment of Agriculture.

"(d) The Secretary may enter into contracts, grants, or cooperative agreements, as authorized by this section, without regard to any requirements for competition, the provisions of section 3709 of the Revised Statutes (41 U.S.C. 5), and the provisions of section 3648 of the Revised Statutes (31 U.S.C. 529)."

"LIMITATION ON USE OF FUNDS

"Sec. 1473. Funds appropriated for carrying out the purposes of sections 1433, 1434, 1444, and 1445 of this title and funds appropriated for carrying out the purposes of the Act of March 2, 1887 (7 U.S.C. 361a et seq.), the Act of May 8, 1914 (7 U.S.C. 341 et seq.), and the Act of October 10, 1962 (16 U.S.C. 582a et seq.), shall not be available for the payment of indirect costs or tuition remission."

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by inserting immediately after the following:

"Sec. 1470. Rules and regulations.

"Sec. 1471. Program evaluation studies.
"Sec. 1472. General authority to award con-

tracts, grants, and cooperative agreements.

"Sec. 1473. Limitation on use of funds.".

RANGELAND RESEARCH

SEC. 1431. (a) The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101 et seq.) is amended by adding at the end thereof the following new subtitle L:

Subtitle L—Rangeland Research

"PURPOSE

"SEC. 1479. It is the purpose of this subtitle to promote the general welfare through im-

proved productivity of the Nation's range-lands, which comprise 60 per centum of the land area of the United States. Most of these rangelands are unsuited for cultivation, but produce a great volume of forage that is inedible by humans but readily converted, through an energy efficient process, to high quality food protein by grazing animals. These native grazing lands are located throughout the United States and are imlocated portant resources for major segments of the Nation's livestock industry. In addition to the many livestock producers directly dependent on rangelands, other segments of agriculture are indirectly dependent on range-fed livestock and on range-produced forage that can be substituted for grain in times of grain scarcity. Recent resource assessments indicate that forage production of rangeland can be increased at least 100 per centum through development and application of improved range management practices while simultaneously enhancing wildlife, watershed, recreational, and esthetic values and reducing hazards of erosion and flooding.

"RANGELAND RESEARCH PROGRAM

"SEC. 1480. The Secretary is authorized to develop and implement a cooperative rangeland research program to improve the pro-duction and quality of desirable naturally grown forage or introduced forage species which are managed in a similar manner to naturally grown forage for livestock and wildlife. The program shall include studies of (1) management of rangelands and agricultural land as integrated systems for more efficient use of crops and waste products in the production of food and fiber; (2) methof managing rangeland watersheds to maximize efficient use of water and improve water yield, water quality, and water conservation, to protect against damage of rangeland resources from floods, erosion, and other detrimental influences, and to remedy unsatisfactory and unstable rangeland conditions; (3) revegetation and rehabilitation of rangelands including the control of noxlous species; and (4) such other matters as the Secretary considers appropriate. The development and implementation of a program under this section shall be coordinated with the programs carried out under the Forest and Rangeland Renewable Resources Planning Act of 1974, the Soil and Water Resources Conservation Act of 1977, and the Renewable Resources Extension Act of 1978.

"RANGELAND RESEARCH GRANTS

"Sec. 1481. The Secretary is authorized to make grants to land-grant colleges and universities, State agricultural experiment stations, and to colleges, universities, and Federal laboratories having a demonstrable capacity in rangeland research, as determined by the Secretary, to carry out rangeland research under this subtitle. This grant program shall be based on a matching formula of 50 per centum Federal and 50 per centum State funding.

"REPORTS

"SEC. 1482. Not later than one year after enactment of this subtitle, and not later than March I of each successive year, the Secretary shall submit a report to the President, the House Committee on Agriculture, the House Committee on Appropriations, the Senate Committee on Agriculture, Nutrition, and Forestry, and the Senate Committee on Appropriations. Such report shall contain an evaluation of the operation of the program authorized under this subtitle.

"RANGELAND RESEARCH ADVISORY BOARD

"SEC. 1483. (a) The Secretary shall establish a board to be known as the Rangeland Research Advisory Board, which shall have a term that expires December 31, 1986, and which shall be composed of twelve members appointed by the Secretary as follows:

"(1) four representatives of the Science and Education Administration of the Department of Agriculture;

"(2) four persons representing State agricultural experiment stations; and

"(3) four persons representing national rangeland and range livestock organizations. The members shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in the performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5 of the United States Code.

"(b) The Board shall meet at the request of the Secretary, who shall call at least one meeting each year, to consult with and advise the Secretary with respect to the implementation of this subtitle and to recommend priorities for the conduct of research activities authorized under this subtitle, under such rules and procedures as the Secretary may prescribe.

"APPROPRIATIONS

"SEC. 1484. (a) There are hereby authorized to be appropriated such sums, not to exceed \$10 million annually, as Congress may determine necessary to carry out the provisions of this subtitle.

"(b) Funds appropriated under this section shall be allocated by the Secretary to eligible institutions for work to be done as mutually agreed upon between the Secretary and the eligible institution or institutions. The Secretary shall, whenever possible, consult the Board in developing plans for the use of these funds.".

(b) The table of contents of the Food and Agriculture Act of 1977 is amended by insert-ing at the end of title XIV the following new items:

"Subtitle L-Rangeland Research

"Sec. 1479. Purpose.

"Sec. 1480. Rangeland research program.

"Sec. 1481. Rangeland research grants.

'Sec. 1482. Reports.

"Sec. 1483. Rangeland Research Advisory Board.

"Sec. 1484. Appropriations.".

COOPERATIVE STATE FORESTRY

SEC. 1432. (a) Section 1 of the Act of October 10, 1962 (16 U.S.C. 582a), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "It is also recognized that the provisions of this Act are essential to assist in providing the research background that undergirds the Forest and Rangeland Renewable Resources Planning Act of 1974, the Renewable Resources Extension Act of 1978, and the Soil and Water Resources Conservation Act of 1977.".

(b) Section 2 of the Act of October 10, 1962 (16 U.S.C. 582a-1), is amended by adding at the end thereof the following: "If more than one institution within a State are certified as qualifying for assistance, then it shall be the responsibility of such institu-tions in agreement with the Secretary, to develop complementary programs of forestry research for the State.".

(c) Sections 5 and 6 of the Act of Octo-1962 (16 U.S.C. 582a-4, 582a-5), are

amended to read as follows:

"SEC. 5. (a) The Secretary of Agriculture shall prescribe such regulations as may be necessary to carry out this Act and to furnish such advice and assistance through a cooperative State forestry research unit in the Department of Agriculture as will best pro-mote the purposes of this Act.

"(b) The Secretary shall appoint a council of not fewer than sixteen members which shall be constituted to give representation to

Federal and State agencies concerned with developing and utilizing the Nation's forest resources, the forest inqustries, the forestry schools of the State-certified eligible institutions, State agricultural experiment stations, and volunteer public groups concerned with forests and related natural resources. The council shall meet at least annually and shall submit a report to the Secretary on regional and national planning and coordination of forestry research within the Federal and State agencies, forestry schools, and the forest industries, and shall advise the Secretary on the apportionment of funds. The Secretary shall seek, at least once each year, the advice of the council to accomplish efficiently the purposes of this Act.

"SEC. 6. Apportionments among participating States shall be determined by the Secretary of Agriculture after consultation with the council appointed under section 5. making such apportionments, consideration shall be given to pertinent factors including non-Federal expenditures for forestry research by State-certified eligible institu-tions, areas of non-Federal commercial forest land, and the volume of timber cut annually. Three per centum of such funds as may be appropriated shall be made available to the ecretary for administration of this Act. these administrative funds may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for purposes of assessing research opportunities or research planning.".

ADDITIONAL AGRICULTURAL RESEARCH SUPPORT

SEC. 1433. The second sentence of section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), is amended-

(1) by striking out "and (3)" and insert-

ing in lieu thereof "(3)"; and

(2) by changing the period at the end thereof to a semicolon and inserting the following: "and (4) support food and agricultural research, extension, and teaching in order to meet the challenge of providing adequate food and fiber production for the United States and the world.".

EXCESS FEDERAL PROPERTY

SEC. 1434. Section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483(d)(2)) is amended by striking out the word "or" at the

end of subparagraph (C);

(2) striking out the period at the end of subparagraph (D) and inserting in lieu thereof a semicolon and the word "or"; and

(3) adding the following new subparagraph immediately after subparagraph (D):

'(E) property furnished by the Secretary of Agriculture to any State or county extension service engaged in cooperative agriculture extension work pursuant to the Act of May 8, 1914 (7 U.S.C. 341 et seq.); any State experiment station engaged in cooperative agricultural research work pursuant to the Act of March 2, 1887 (7 U.S.C. 361a et seq), and any institution engaged in cooperative agricultural research or extension work pursuant to sections 1433, 1434, 1444, or 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3195, 3196, 3221, and 3222) or the McIntire-Stennis Act of 1962 (16 U.S.C. 582a et seq.), where title is retained in the United States.".

BURAL DEVELOPMENT AND SMALL FARM RESEARCH AND EXTENSION

SEC. 1435. (a) Title V of the Rural Development Act of 1972 (7 U.S.C. 2661-2670) is amended by striking out sections 501 through 508 and inserting in lieu thereof the following:

"SEC. 501. PURPOSES AND GOALS .- (a) The overall purpose of this title is to fcster a balanced national development that provides opportunities for increased numbers of

the people of the United States to work and enjoy a high quality of life dispersed throughout our wation by providing the essendal knowledge necessary for successful programs of rural development. It is further one purpose of this title to-

(1) provide multistate regional agencies, States, counties, cities, multicounty plan-ning and development districts, businesses, inquestries, Indian tribes on Federal and State reservations or other federally recognized indian tribal groups, and others in-voived with public services and investments in rural areas or that provide or may provide employment in these areas the best available scientific, technical, economic, organizational, environmental, and management information and knowledge useful to them, and to assist and encourage them in the interpretation and application of this information to practical problems and needs in rural development:

(2) provide research and investigations in all fields that have as their purpose the development of useful knowledge and incormation to assist those planning, carrying out, managing, or investing in facilities, services, businesses, or other enterprises, public and private, that may contribute to

rural development;

'(3) increase the capabilities of, and encourage, colleges and universities to perform the vital public services role of research, and the transfer and practical application of knowledge, in support of rural development:

"(4) expand small farm research and extend training and technical assistance to small farm families in assessing their needs and opportunities and in using the best available knowledge on sound economic approaches to small farm operations and on existing services offered by the Department of Agriculture and other public and private agencies and organizations to improve their income and to gain access to essential facilities and services; and

"(5) support activities to supplement and extend programs that address special research and education needs in States periencing rapid social and economic adjustments or unique problems caused by rural isolation and that address national and regional rural development policies,

strategies, issues, and programs.

(b) The goals of this title are to-"(1) encourage and support rural United States, in order to help make it a better place

to live, work, and enjoy life;
"(2) increase income and improve employment for persons in rural areas, including the owners or operators of small farms, small businesses, and rural youth;

"(3) improve the quality and availability of essential community services and facilities in rural areas;

(4) improve the quantity and quality of rural housing;

"(5) improve the rural management of natural resources so that the growth and development of rural communities needed to support the family farm may be accommodated with minimum effect on the natural

environment and the agricultural land base; "(6) improve the data base for rural development decisionmaking at local, State, and national levels;

- "(7) improve the problem solving and development capacities and effectiveness of rural governments, officials, institutions, communities, community leaders, and citizen groups in
- "(A) improving access to federal programs; "(B) improving targeting and delivery of
- technical assistance; "(C) improving coordination among Federal agencies, other levels of government, and institutions and private organizations in rural areas; and

"(D) developing and disseminating better information about rural conditions.

"SEC. 502. PROGRAMS AUTHORIZED .-Secretary of Agriculture may conduct, in cooperation and coordination with colleges and universities, the following programs to carry out the purposes and achieve the goals of this

"(a) RURAL DEVELOPMENT EXTENSION PRO--Rural development extension pro-GRAMS. grams shall consist of the collection, inter-pretation, and dissemination of useful information and knowledge from research and other sources to units of multistate regional agencies, State, county, municipal, and other units of government, multicounty planning and development districts, organizations of citizens contributing to community and rural development, businesses, Indian tribes on Federal or State reservations or other federally recognized Indian tribal groups, and industries that employ or may employ people in rural areas. These programs also shall include technical services and educational activities, including instruction for persons not enrolled as students in colleges or universities, to facilitate and encourage the use and practical application of this information. These programs may also include feasibility studies and planning assistance.

"(b) RURAL DEVELOPMENT RESEARCH .- Rural development research shall consist of re-search, investigations, and basic feasibility studies in any field of discipline that may develop principles, facts, scientific and technical knowledge, new technology, and other information that may be useful to agencies of Federal, State, and local government, industries in rural areas, Indian tribes on Federal and State reservations or other federally recognized Indian tribal groups, and other organizations involved in community and rural development programs and activities in planning and carrying out such programs and activities or otherwise be practical and useful in achieving the purposes and goals

of this title.

"(c) SMALL FARM RESEARCH PROGRAMS. Small farm research programs shall consist of programs of research to develop new approaches for initiating and upgrading small farm operations through management techniques. agricultural production techniques, farm machinery technology, new products, new marketing techniques, and small farm finance; to develop new enterprises that can use labor, skills, or natural resources available to the small farm family; or that will help to increase the quality and availability of services and facilities needed by the small farm family.

"(d) SMALL FARM EXTENSION PROGRAMS. Small farm extension programs shall consist of extension programs to improve small farm operations, including management techniques, agricultural production techniques, farm machinery technology, marketing techniques, and small farm finance; to increase use by small farm families of existing services offered by the Department of Agricul-ture and other public and private agencies and organizations; to assist small farm families in establishing and operating coopera-tives for the purpose of improving their family income from farming or other economic activities; to increase the quality and availability of services and facilities needed by small farm families; and to develop new enterprises that can use labor, skills, or natresources available to the small farm ural family.

"(e) SPECIAL GRANTS PROGRAMS.—Special grants programs shall consist of extension and research programs to strengthen reand education on national and regional issues in rural development, including the assessment of alternative policies and strategies for rural development and bal-anced growth; to develop alternative strategies for national and regional investment, and the creation of employment, in rural areas; to develop alternative energy policies to meet rural development needs; and to strengthen rural development programs of agencies of the Department of Agriculture and those in other Federal departments and agencies.

SEC. 503. APPROPRIATION AND ALLOCATION of Funds.-(a) There are hereby authorized to be appropriated such sums as are neces-

sary to carry out the purposes of this title.

"(b) Such sums as are appropriated to out the provisions of sections 502(a) and 502(b) of this title shall be distributed by the Secretary of Agriculture as follows:

(1) 4 per centum shall be retained by the Secretary for program administration and national coordination of State programs, and program assistance to the States;

(2) 10 per centum shall be used to finance work serving two or more States in which colleges or universities in two or more States cooperate or that is conducted by one college or university to serve two or more States;

"(3) 20 per centum shall be allocated

equally among the States; and

(4) 66 per centum shall be allocated to as follows: One-half State amount that bears the same ratio to the total amount to be allotted as the rural population of the State bears to the total rural population of all the States, as determined by the last preceding decennial census current at that time; and one-half in an amount that bears the same ratio to the total amount to be allotted as the farm population of the State bears to the total farm population of all the States, as determined by the last preceding decennial census current at that time:

Provided, That, beginning with the fiscal year ending September 30, 1982, no State may receive more than \$75,000 until all States have been allotted a minimum of \$75,000.

'(c) Such sums as are appropriated to carry out the provisions of section 502(e) of this title shall be distributed by the Secretary to colleges and universities, on a competitive or matching fund basis, according to the Secretary's determination of the projects and manner of funding that show the most promise of fulfilling the objectives of section 502(e) of this title.

"(d) Funds appropriated under this title may be used to pay salaries and other ex-penses of personnel employed to carry out the functions authorized by this title; obtain necessary supplies, equipment, and services; and to rent, repair, and maintain facilities needed, but not to purchase or construct buildings.

"(e) Payment of funds to any State for programs authorized under sections 502(a) 502(b), 502(c), and 502(d) of this title shall contingent upon the approval of the Secretary of a plan of work and budget for such programs and compliance with such regulations as the Secretary may issue under this title. Plans for work shall be jointly developed in each State by the land-grant colleges and universities eligible to receive funds under the Act of July 2, 1862 (7 U.S.C. 301 et seq.), and the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee Institute. In States in which there is land-grant institution eligible to receive funds under the Act of August 30, 1890. the land-grant institution eligible to receive funds under the Act of July 2, 1862, shall be responsible for developing plans of work and budgets. In the development of the plans of work and budgets, consideration shall be given to involvement of the re-sources and expertise of the colleges and universities serving the region in which the plans and budgets are to be applied.

"(f) Funds shall be available for use by each State in the fiscal year for which appropriated and the next fiscal year following the fiscal year for which appropriated. Funds shall be budgeted and accounted for on such forms and at such times as Secretary shall prescribe.

"(g) Funds provided to each State under this title may be used to finance programs through or at private and publicly supported colleges and universities other than the institutions responsible for administering the programs, as provided under section 504 of this title.

"Sec. 504. Cooperating Colleges and Universities.-(a) To ensure national coordination with other federally supported agricultural research and extension programs, administration of each State program shall be the responsibility of the colleges and universities eligible to receive funds under the Act of July 2, 1862, and the Act of August 30, 1890, including Tuskegee Institute. In States that contain more than one such institution, such administration shall be responsibility of the institution designated by mutual agreement of all such institutions, subject to approval by the Secretary of Agriculture. The Secretary shall pay funds available to each State to such institution or university. Such administration shall be coordinated with other federally supported agricultural research and extension programs conducted in the State.

"(b) All private and publicly supported

colleges and universities in a State shall be eligible to participate in programs authorized under this title. Officials at universities or colleges other than those responsible for administering the programs that wish to participate in these programs shall submit program proposals to the college or university officials responsible for administering the programs who shall consider such proposals in the process of developing the budgets and plans of work.

"(c) The institution of each State responsible for administering the programs authorized under this title shall designate an official who shall be responsible for the overall coordination of the programs.

"(d) The institution in each State responsible for administering the programs authorized under this title shall name an advisory council to review and approve budgets and plans of work conducted under this title and to advise the chief administrative officer of the institution administering the programs on matters pertaining to the programs. An existing State rural development committee or council may be named to perform this function, or a new council may be appointed by the chief administrative officer or officers. The committee or council named or appointed shall consist of at least twelve members and shall include persons representing farmers, business, labor, banking, local government, multicounty planning and develop-ment districts, public and private colleges and universities in the State, and Federal and State agencies involved in rural develop-

"SEC. 505. WITHHOLDING FUNDS .-- If the Secretary of Agriculture determines that a State is not eligible to receive part or all of the funds to which it is otherwise entitled for programs under sections 502(a) and 502 (b) of this title because of a failure to comply with regulations issued by the Secretary under this title, the facts and reasons therefor shall be reported to the President, and the amount involved shall be kept separate in the Treasury until the expiration of the Congress next succeeding the session of the legislature of the State from which funds have been withheld in order that the State may, if it should so desire, appeal to Congress from the determination of the Secretary. If the next Congress shall not direct such sum to be paid, it shall be covered into the Treasury. If any portion of the moneys that are received by the designated officers of any State for the support and maintenance of programs authorized under this title shall by any action or contingency be diminished or lost, or be misapplied, it shall be replaced by the State.

"SEC. 506. DEFINITIONS.—For the purposes of this title

'rural development' means the planning, financing, and development of facilities and services in rural areas that contribute to making those areas desirable places in which to live and make private and business investments; the planning, development, and expansion of business and industry in rural areas to provide increased employment and income; the planning, development, conser-vation, and use of land, water, and other natural resources of rural areas to maintain or improve the quality of the environment for people and business in rural areas; and the building or improvement of institutional, organizational, and leadership capacities of rural citizens and leaders to define and resolve their own community problems;

"(b) 'State' means the several States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands of the United States, and the Commonwealth of the

Northern Mariana Island: and

"(c) 'small farm' means any farm (1) producing family net income from all sources (farm and nonfarm) below the median non-metropolitan income of the State; (2) operated by a family dependent on farming for a significant though not necessarily a majority of its income; and (3) on which family members provide most of the labor and management.

"SEC. 507. REGULATIONS.—The Secretary of Agriculture may issue such regulations as the Secretary determines necessary to carry

out the provisions of this title."

(b) Section 509 of the Rural Development Act of 1972 (7 U.S.C. 2669) is redesignated as section 508, and section 510 of the Rural Development Act of 1972 (7 U.S.C. 2670) is hereby repealed.

INCREASED EMPHASIS ON MARKETING EDUCATION PROGRAMS FOR SMALL- AND MEDIUM-SIZE FAMILY FARMING OPERATIONS

SEC. 1436. In carrying out marketing research and education programs, the Secretary of Agriculture shall take such steps as may be necessary to increase the efforts of the Department of Agriculture in providing marketing education programs for persons engaged in small- and medium-size family farm operations.

TITLE XV-RESOURCE CONSERVATION Subtitle A-Soil and Water Conservation

POLICY AND REPORT

SEC. 1501. (a) Congress hereby reaffirms its policy to promote soil and water conserva-tion, improve the quality of the Nation's waters, and preserve and protect natural resources through the use of effective conservation and pollution abatement programs.

(b) The Secretary of Agriculture shall submit a report to Congress not later than December 31, 1981, setting forth a comprehensive soil and water conservation policy, including recommendations as to how the various soil and water conservation programs that are administered by agencies within the Department of Agriculture can be strengthened and improved.

Subtitle B-Special Areas Conservation Program FINDINGS

SEC. 1502. Congress finds that-

(1) studies by the Department of Agriculture indicate that billions of tons of soil are eroded annually from non-Federal lands in the United States, much of which represents soil eroded from cropland;

(2) nearly one-half of the four hundred and thirteen million acres of cropland have soils with moderate, high, or very high risk of damage by sheet and rill erosion;

(3) the severity of erosion-related prob-lems varies widely from one geographic area to the next;

(4) some of the most productive agricultural areas of the United States are also those having the most serious and chronic erosion-

related problems.

(5) solutions to such chronic erosion-related problems should be designed to address the local social, economic, environmental, and other conditions unique to the area involved to ensure that the goals and policies of the Federal Government are effectively integrated with the concerns of the local com-

(6) certain range and pasturelands in the United States are producing less than their potential and therefore their productive capacity could be substantially improved by application of intensified range and pasture management practices; the protection of these lands is essential to controlling erosion. improving ecological conditions, enhancing wildlife and riparian habitats, water quality and yield, and meeting the need to produce food and fiber in a manner that is more energy efficient; and

(7) there is a need for-

reducing seepage from on-farm and off-farm irrigation ditches and conveyance systems;

(B) improving water conservation and utilization; and

(C) installing measures to capture on-farm irrigation return flows.

FORMULATION AND IMPLEMENTATION OF SPE-CIAL AREAS CONSERVATION PROGRAM

SEC. 1503. (a) The Secretary of Agriculture (hereinafter in this subtitle referred to as "Secretary") shall establish a program for the conservation of soil, water, and related resources in special areas designated pursuant to section 1504 (hereinafter referred to as "designated special areas") by providing technical and financial assistance to owners and operators or groups of owners and operators of farm, ranch, and certain other lands at their request. Such assistance with respect to State, county, and other public land shall be limited to those lands that are an integral part of a private farm operating unit and under the control of the private land owner or operator.

- (b) To carry out the program established under this subtitle, the Secretary may enter into contracts with owners and operators of farm, ranch, or other land in a designated special area having such control over the land as the Secretary deems necessary. Any such contract may be entered into with respect to land in a designated special area which is not farm or ranch land only if the erosion-related problems of such land are so severe as to make such contracts with respect to such land necessary protection of farm or ranch land in that designated special area. Contracts under this subtitle shall be designed to provide assist-ance to the owners or operators of such farm, ranch, or other land to make voluntary changes in their cropping systems which are needed to conserve or protect the soil, water and related resources of such lands, and to carry out the soil and water conservation measures needed under such changed systems and uses.
- (c) The basis for such contracts shall be a conservation plan approved by the Secretary and the soil and water conservation district in which the land on which the plan is to be carried out is situated. The Secretary shall provide to the land owner or operator, upon request, such technical assistance as may be needed to prepare and submit to the Secretary a conservation plan-
 - (1) which incorporates such soil and

other conservation practices and measures as may be determined to be practicable to protect such land from erosion or waterrelated problems;

(2) which outlines a schedule for the implementation of changes in cropping systems or use of land or of water and of conservation measures proposed to be carried out on the farm, ranch, or other land during the

contract period;
(3) which is designed to take into account the local social, economic, and environmental conditions, which will help solve the particular erosion or water-related problems

of the designated area;
(4) which may allow for such varying levels of conservation application as are appropriate to address the problems and may be developed to cover all or part of a farm, ranch, or other land as determined to be necessary to solve the conservation prob-

(5) which may include practices measures for enhancing fish and wildlife and recreation resources and for reducing or controlling agricultural-related pollution:

(6) which identifies those conservation systems and measures, including planned grazing systems, needed to improve vegetative conditions, reduce erosion, and conserve water on range and pasturelands.

(d) Under any contract entered into un-der this subtitle, the land owner or operator

shall agree

(1) to carry out the plan for the owner's or operator's farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secre-

tary pursuant to subsection (f);

- (2) to forfeit further payments under the contract and refund to the United States all payments received thereunder, including interest, upon violation by the owner or operator of the contract at any stage during the time the owner or operator has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board for the district in which the lands are located, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds, including interest, or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the contract:
- (3) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract; and
- (4) upon transfer, during the contract period, of the rights or interests of the owner or operator in the farm, ranch, or other land on which the plan is to be carried out, to forfeit all rights to further payments under the contract and refund to the United States all payments received thereunder, including interest, unless the transferee of any such land agrees with the Secretary to assume all obligations of the contract.
- (e) In return for an agreement by the landowner or operator under this section, the Secretary shall agree to share the cost of carrying out the conservation measures set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest. The portion of the costs to be shared shall be that part which the Secretary determines is nec-essary and appropriate to effectuate the installation and, if applicable, the maintenance of the conservation treatment under the contract, including the cost of labor. The Secretary shall determine the amount of the shared costs to be borne by the Secretary, taking into consideration the social and eco-

nomic conditions unique to each designated geographic area and the degree of conservation to be achieved. The Secretary shall determine the maximum amount of cost-share assistance that may be provided to any single recipient. If adjustments from cultivated crops to permanent vegetative cover or changes in crop varieties are undertaken as conservation treatment, financial assistance may be provided with regard to the income lost as a result of such land use or crop adjustments.

(f) The Secretary may terminate any contract with a landowner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest and may agree to such modification of contracts previously entered into as the Secretary may determine to be desirable to carry out the purposes of the program or facilitate the practical administration thereof or to accomplish equitable treatment with respect to similar conservation or other programs administered by the Secretary.

(g) The Secretary may also enter into contracts with landowners or operators for the purpose of maintaining any conservation treatment established under this subtitle or other conservation treatment which has been adequately established, and to provide such assistance as is necessary to retain the treatment on the land. The provisions and administration of such contracts shall be in accordance with the requirements set forth in subsections (b) through (f).

PROGRAM TO BE DIRECTED AT SPECIFIC PROBLEMS

SEC. 1504. (a) The program established under this subtitle shall be directed toward identifying and correcting such erosion-related or water management-related problems as may exist within each designated special area. Assistance under this subtitle may be provided to any geographic area of the United States only if such area is first designated by the Secretary as having severe and chronic erosion-related or water management-related problems.

(b) In designating a geographic area as a special area under this subtitle, the Secretary shall prepare and publish a report setting forth an assessment of the problems, objectives, and priorities in such area, and a schedule for the implementation of the program under this subtitle. The Secretary shall indicate in such report how the program as developed with respect to such area takes into consideration ongoing programs of Federal, State, and local agencies, including soil conservation districts, relating to soil and water conservation, pollution abatement, or the improvement or protection of forest land. The Secretary shall, within existing authorities, assure that all Department of Agriculture programs operating in a designated special area complement the conservation objectives outlined for such area.

CONTRACT LIMITATIONS

SEC. 1505. Special areas may be designated pursuant to section 1504 of this subtitle at any time within ten years after the date of enactment of this Act. Contracts authorized by subsections (b) and (g) of section 1503 of this subtitle may be entered into at any time within ten years after the designation of the special area to which they relate. Such contracts may not exceed ten years in duration, and the amount of contracts that may be entered into in any one fiscal year shall not exceed such amounts as may be provided for in advance in appropriations Acts.

NOTIFICATION OF COMMITTEES OF CONGRESS

SEC. 1506. The Secretary shall submit a copy of each special area report developed and published pursuant to section 1504(b) of this subtitle to the Committee on Agriculture, Nutrition, and Forestry of the United States Senate and to the Committee

on Agriculture of the United States House of Representatives.

UTILIZATION OF SERVICES AND FACILITIES

SEC. 1507. In carrying out the provisions of this subtitle, the Secretary may utilize the services of local, county, and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) and the technical services of the Department of Agriculture, soil and water conservation districts, and other State or local agencies. The Secretary may utilize the services and facilities of the Commodity Credit Corporation in carrying out this subtitle.

IMPROVEMENT OF TECHNOLOGY

SEC. 1508. The Secretary may expend funds directly or through grants for such research as is needed to assist in developing new or improving existing technologies for controlling erosion or water-related problems in designated special areas.

REGULATIONS

SEC. 1509. The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this subtitle.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1510. There are authorized to be appropriated annually, to be available until expended, such sums as may be necessary to carry out the program authorized by this subtitle.

REPORT TO CONGRESS

SEC. 1511. The Secretary shall submit a report to Congress by January 1, 1986, and at each five-year interval thereafter, concerning the operation of the program provided for in this subtitle. Such report shall contain an evaluation of the operation of such program and shall include recommendations for such additional legislation as may be necessary to solve identified soil, water, and related resources problems in areas designated by the Secretary under this subtitle and to utilize new technology and research related to such problems.

PROTECTION OF PARTICIPANTS

SEC. 1512. No person shall be disqualified from participating in, or suffer any forfeiture or reduction in benefits under, any other program administered by the Secretary by virtue of participation in the program provided for in this subtitle.

Subtitle C—Amendments to the Small Watershed Program and to the Bankhead-Jones Farm Tenant Act

AMENDMENTS TO SMALL WATERSHED PROGRAM

SEC. 1513. (a) Section 2 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1002) is amended by changing the period at the end thereof to a semicolon and inserting the following: "or any Indian tribe or tribal organization, as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b), having authority under Federal, State, or Indian tribal law to carry out, maintain and operate the works of improvement."

(b) Section 2 of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1002) is further amended by striking out "\$1,000,000" and inserting in lieu thereof "\$5,000,000".

(c) Section 3(6) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1003(6)) is amended by inserting after the word "wildlife," the word "energy,".

(d) Section 4(1) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1004(11)) is amended by changing the semicolon at the end thereof to a colon and inserting the following: "Provided further, That the Secretary shall be authorized to bear an amount not to exceed one-half of the costs of the land, easements, or rights-of-way acquired or to be acquired by the local organization for mitigation of fish and

wildlife habitat losses, and that such acquisition is not limited to the confines of the watershed project boundaries;".

(e) Section 5(3) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1005(3) is amended by striking out "\$1,000,000" and inserting in lieu thereof "\$5,000,000".

(f) Section 5(4) of the Watershed Protection and Flood Prevention Act (16 U.S.C. 1005(4) is amended by striking out "\$1,000,000" and inserting in lieu thereof "\$5,000,000".

AMENDMENT TO THE BANKHEAD-JONES FARM TENANT ACT

SEC. 1514. Section 31 of title III of the Bankhead-Jones Farm Tenant Act (7 U.S.C. 1010) is amended by inserting after the words "Cams and reservoirs," the words "developing energy resources,".

Subtitle D—Reservoir Sedimentation Reduction Program

FORMULATION OF PROGRAM

SEC. 1515. The Secretary of Agriculture is authorized to formulate and implement a program for determining the feasibility of reducing excessive sedimentation in existing reservoirs. Such an assistance program may be implemented on the watershed drainage areas of no more than five publicly owned reservoirs. The Secretary may select for the program reservoirs in which excessive amounts of sediment are being deposited because of critical soil erosion problems in the watershed drainage area.

PLANS

SEC. 1516. For each reservoir and drainage area selected under section 1515 of this subtitle, a plan shall be prepared that includes an assessment of the problems, a listing of objectives and priorities, and an implementation plan for achieving the objectives. The Secretary of Agriculture shall enter into an agreement with the soil and water conservation districts containing land within the reservoir or drainage area, an agency of State government designated by the Governor, and units of local government that have recognized interests in the reservoir, for the purpose of preparing the plan. The plan shall be signed by the Secretary, or the Secretary's designee, and the other parties to the agreement.

APPROVAL OF PLANS

SEC. 1517. The Secretary shall submit each plan developed under section 1516 of this subtitle to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives. The Secretary may implement any such plan only after each such committee adopts a resolution approving the plan.

AUTHORIZATION OF APPROPRIATIONS

Sec. 1518. There are hereby authorized to be appropriated, for each of the fiscal years 1983 through 1987, such sums as may be necessary for carrying out the provisions of this subtitle, such sums to remain available until expended.

REPORT

SEC. 1519. The Secretary of Agriculture shall submit a report evaluating the program authorized under this subtitle to Congress by January 1, 1987. The report shall include a recommendation as to whether the program shall be extended and, if so, how it could be strengthened.

Subtitle E-Volunteers for Conservation

AUTHORIZATION FOR USE OF VOLUNTEERS

SEC. 1520. The Secretary of Agriculture is authorized to recruit, train, and accept without regard to the civil service and classification laws, rules, or regulations, the services of individuals without com-

pensation as volunteers, for, and in aid of, interpretive functions, visitor services, conservation measures and development. or other activities related to matters ad-ministered by the Secretary through the Soll Conservation Service. The Secretary is authorized to provide for incidental expenses of such volunteers for items such as transportation, uniforms, lodging, and subsistence.

STATUS AS FEDERAL EMPLOYEES

SEC. 1521. (a) Except as provided in subsection (b) of this section, such volunteers be deemed Federal employees shall not and shall not be subject to the provisions of law relating to Federal employment, including those relating to hours of work, rates of compensation, and Federal employce benefits.

(b) For the purcoses of the tort claim provisions of sections 2371 through 2680 of title 28 of the United States Code, and for the purposes of chapter 81 of title 5 of the United States Code relating to compensation to Federal employees for work-related injuries, volunteers under this sub-title shall be deemed employees of the United States.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1522. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle.

Subtitle F-Resource Conservation and Development Program

PURPOSE

Sec. 1523. It is the purpose of this subtitle to encourage and improve the capability of State and local units of government and local nonprofit organizations in rural areas to plan, develop, and carry out a program for resource conservation and development.

DEFINITIONS

SEC. 1524. As used in this subtitle— (1)(A) The term "area plan" means a resource conservation and utilization plan which is developed for a designated area of a State or States through a planning process and which includes the following primary elements:

(i) a land conservation element, the purpose of which shall be to control erosion

and sedimentation; and

(ii) a water management element, the purpose of which shall be to provide for the conservation, utilization, and quality of water, including irrigation and rural water supplies, the mitigation of floods and high water tables, construction, repair, and improvement of dams and reservoirs, improvement of agricultural water management, and improvement of water quality through control of noncoint sources of pollution.

(B) Such term also means an area plan as defined in subparagraph (A) of this para-

graph which also includes one or more of the

following secondary elements:
(i) a community development element, the purpose of which shall be the development of natural resources based industries, protection of rural industries from natural resource hazards, development of aquaculture, development of adequate rural water and waste disposal systems, improvement of recreation facilities, improvement in the quality of rural housing, provision of adequate health and education facilities, and satisfaction of essential transportation and communication needs; or

(ii) other elements, the purpose of which shall include energy conservation, protection of agricultural land, as appropriate, from conversion to other uses, or protection of

fish and wildlife habitats.

(2) The term "designated area" means a geographic area designated by the Secretary to receive assistance under this subtitle.

(3) The term "planning process" means the continuous effort by any State, local unit of government or local nonprofit organization to develop and carry out effective resource conservation and utilization plans for a designated area, including development of an area plan, goals, objectives, policies, implementation activities, evaluations and reviews, and the opportunity for public participation in such efforts.

(4) The term "financial assistance" means the cost-sharing arrangements that are available under this subtitle through Federal

contracts, grants, or loans.
(5) The term "local unit of government" means any county, city, town, township, parish, village, or other general-purpose subdivision of a State, any local or regional special district or other limited political subdivision of a State, including any soil conservation district, school district, park authority, and water or sanitary district, or any Indian tribe or tribal organization established under Federal, State, or Indian tribal law

(6) The term "nonprofit organization" means any community association, wildlife group, resource conservation organization, or other organization that is incorporated for the purpose of providing a rural area with those public facilities or services that are included in the area plan for such area, which plan has been approved by the Secretary.
(7) The term "Secretary" means the Secre-

tary of Agriculture.
(8) The term "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, Guam, the Common-wealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and

American Samoa.
(9) The term "technical assistance" means any service provided by personnel of the De-partment of Agriculture or non-Federal personnel working through the Department of Agriculture, including, but not limited to, inventorying, evaluating, planning, designing, supervising, laving out and inspecting works of improvement, and the providing of maps, reports, and other documents assoclated with the services provided.

(10) The term "works of improvement"

means the facilities installed or being installed in accord with an area plan.

RESOURCE CONSERVATION AND DEVELOPMENT PROGRAM

SEC. 1525. The Secretary shall establish a resource conservation and development program under which the Secretary shall make available to States, local units of government, and local nonprofit organizations the technical and financial assistance necessary to permit such States, local units of government, and local nonprofit organizations to operate and maintain a planning and implementation process needed to conserve and improve the use of land, develop natural resources, and improve and enhance the social, economic, and environmental conditions in rural areas of the United States:

SELECTION OF NEW DESIGNATED AREAS

SEC. 1526. The Secretary shall select designated areas for assistance under this subtitle on the basis of the primary elements specified in section 1524(1)(A).

AUTHORITY OF THE SECRETARY

Sec. 1527. In carrying out the provisions of this subtitle, the Secretary may-

(1) provide technical assistance to any State, local unit of government, or local non-profit organization within a designated area to assist in developing and implementing an area plan for that area;

(2) cooperate with other departments and agencies of the Federal Government, State and local governments, and local nonprofit organizations in conducting surveys and inventories, disseminating information, and developing area plans:

(3) assist in carrying out an area plan approved by the Secretary for any designated area by providing technical and financial assistance to State and local public agencies and nonprofit organizations designated to receive such assistance by the Governor or legislature of the State concerned; and

(4) enter into agreements with State agencies, local units of government, and local nonprofit organizations, as provided in sec-

tion 1528.

AGREEMENTS; TERMS AND CONDITIONS

SEC. 1528. (a) Technical and financial assistance, including loans, may be provided by the Secretary to any State agency, local unit of government, or local nonprofit organization to assist in carrying out works of improvement specified in an area plan approved by the Secretary only if-

(1) such State agency, local unit of government, or local nonprofit organization agrees in writing to carry out such works of im-provement and to finance or arrange for fi-nancing of any portion of the cost of carrying out such works of improvement for which financial assistance is not provided by the Secretary under this subtitle;

(2) the works of improvement for which assistance is to be provided under this subtitle are included in an area plan and have been approved by the State agency, local unit of government, or local nonprofit orga-

nization to be assisted;

(3) the Secretary determines that assistance to finance the type of works of improve ment concerned is not reasonably available to such State agency, local unit of government, or local nonprofit organization under any other Federal program;

(4) the works of improvement provided for in the area plan are consistent with any current comprehensive plan for such area;

(5) the cost of the land or an interest in the land acquired or to be acquired under such plan by any State, local unit of govern-ment, or local nonprofit organization is borne by such State, local unit of government, or local nonprofit organization; and

(6) the State, local unit of government, or local nonprofit organization participating in an area plan agrees to maintain and operate all works of improvement installed under

such plan.

(b) Loans made under this subtitle shall be made on such terms and conditions as the Secretary may prescribe, except that such loans shall have a repayment period of not more than thirty years from the date of completion of the work of improvement for which the loan is made and shall bear interest at the average rate of interest paid by the United States on its obligations of a comparable term, as determined by the Secretary of the Treasury.

(c) Assistance may not be made available to any State agency, local unit of government, or local nonprofit organization to carry out any area plan unless such plan has been submitted to and approved

by the Secretary.

(d) The Secretary may withdraw technical and financial assistance with respect to any area plan if the Secretary determines that such assistance is no longer needed or that sufficient progress has not been made toward developing or implementing the primary elements of such plan.

RESOURCE CONSERVATION AND DEVELOPMENT POLICY BOARD

SEC. 1529. (a) The Secretary shall establish within the Department of Agriculture a Resource Conservation and Development Policy Board.

(b) Such board shall be composed of seven members selected by the Secretary from among employees of the Department of Agriculture. One member shall be designated by the Secretary to serve as chairman. (c) It shall be the function of such board to advise the Secretary regarding the administration of the provisions of this subtitle, including the formulation of policies for carrying out the program provided for by this subtitle.

EVALUATION OF THE PROGRAM

SEC. 1530. The Secretary shall evaluate the program provided for in this subtitle to determine if such program is effectively meeting the needs and objectives identified by the States, local units of government, and local nonprofit organizations participating in such program. The Secretary shall submit to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry a report containing the results of such evaluation by September 1986, together with recommendations of the Secretary for continuing, terminating, redirecting, or modifying the program.

REGULATIONS

SEC. 1531. The Secretary shall prescribe such regulations as may be necessary to carry out the provisions of this subtitle.

LIMITATION ON PROVISION OF ASSISTANCE

SEC. 1532. The program provided for in this subtitle shall be limited to providing technical and financial assistance to not more than two hundred and twenty-five active designated areas.

SUPPLEMENTAL AUTHORITY OF THE SECRETARY

SEC. 1533. The authority of the Secretary under this subtitle to assist States, local units of government, and local nonprofit organizations in the development and implementation of area plans shall be supplemental to, and not in lieu of, any authority of the Secretary under any other provision of law.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 1534. There are authorized to be appropriated for each of the five fiscal years beginning October 1, 1982, and ending September 30, 1987, such sums as may be necessary to carry out the provisions of this subtitle. Funds appropriated pursuant to this subtitle shall remain available until expended.

SUBTITLE G-AGRICULTURAL LAND PROTECTION POLICY ACT

SHORT TITLE

1535. This subtitle may be cited as "Agricultural Land Protection Policy Act".

FINDINGS, PURPOSE, AND DEFINITIONS

SEC. 1536. (a) Congress finds that-

(1) the Nation's agricultural land is a unique natural resource and provides food and fiber necessary for the continued wel-fare of the people of the United States; (2) each year, a large amount of the Na-tion's agricultural land is irrevocably con-

verted from actual or potential agricultural

use to nonagricultural use;
(3) continued decrease in the Nation's agricultural land base may threaten the ability of the United States to produce food and fiber in sufficient quantities to meet domestic needs and the demands of our export markets;

(4) the extensive use of agricultural land for nonagricultural purposes undermines the economic base of many rural areas;

(5) Federal actions, in many cases, result in the conversion of agricultural land to non-agricultural uses where alternative actions

would be preferred;

(6) the Department of Agriculture is the agency primarily responsible for the im-plementation of Federal policy with respect to United States agricultural land, assuring the maintenance of the agricultural pro-duction capacity of the United States, and has the personnel and other resources needed to implement national agricultural land protection policy; and

(7) the Department of Agriculture and other Federal agencies should take steps to assure that the actions of the Federal Gov-ernment do not cause United States agricultural land to be irreversibly converted nonagricultural uses in cases in which other national interests do not override the importance of the protection of agricultural land nor otherwise outweigh the benefits of maintaining agricultural land resources

(b) The purpose of this subtitle is to establish procedures with respect to the administration of Federal law and regulations that will assure that the Federal Government by its actions does not cause the unnecessary loss of United States agricultural land.
(c) As used in this subtitle—

(1) the term "agricultural land" means any land (including cropland, pastureland, range-land, or forest land) that is used, or is capable of being used, for agricultural, forestry, or timber production purposes, as determined

by the Secretary of Agriculture;
(2) the term "State" means any of the fifty
States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, or any territory or possession of the United States;

(3) the term "unit of local government" means the government of a county, municipality, town, township, village, or other unit of general government below the State level, or a combination of units of local government acting through an areawide agency under State law or an agreement for the formulation of regional development policies and plans.

AGRICULTURAL LAND PROTECTION POLICY

SEC. 1537. (a) The Department of Agriculture, in cooperation with the other departments, agencies, independent commissions, and other units of the Federal Government, shall develop procedures for identifying the effects of actions of such units of the Federal Government with respect to the conversion of agricultural land to nonagricultural uses.

- (b) In administering the laws and regula-tions of the United States, each department, agency, independent commission, or other unit of the Federal Government shall, using the procedures provided for in subsection (a) of this section, identify and take into account any negative effects, with respect to the protection of United States agricultural land, of any action that it proposes to undertake and consider alternative actions, as appropriate, that could lessen such negative effects; and shall assure that such proposed action, to the extent practicable, is consistent with any plans or policies of the State or unit of local government concerned to lessen the amount of conversion of agricultural land to nonagricultural uses.
- (c) The Department of Agriculture may make available to States, units of local govand ernment, individuals, organizations, and other units of the Federal Government information useful in restoring, maintaining, and improving the quantity and quality of agricultural land.

CONFORMATION OF EXISTING POLICIES AND PROCEDURES

SEC. 1538. (a) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall re-view current provisions of law, administrative rules and regulations, and policies and procedures applicable to it to determine whether any provision thereof will prevent such unit of the Federal Government from taking appropriate action to comply fully with the provisions of this subtitle

(b) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall, as appropriate, develop proposals for action to bring its

programs, authorities, and administrative activities into conformity with the purpose and policy of this subtitle.

SEC. 1539. Within one year after the effective date of this subtitle, the Secretary of Agriculture shall report to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agricul-ture of the House of Representatives on the progress made in implementing the provisions of this subtitle. Such report shall include information on-

(1) the effects, if any, of Federal programs, authorities, and administrative activities with respect to the protection of United States agricultural land; and

(2) results of the reviews of existing policles and procedures required under section 1538(a) of this subtitle.

STATEMENT OF LIMITATION

SEC. 1540. (a) This subtitle does not authorize the Federal Government in any way to regulate the use of private or non-Federal land or to affect the property rights of owners of such land.

(b) None of the provisions or other requirements of this subtitle shall apply to the acquisition or use of agricultural land for national defense purposes

PROHIBITION

SEC. 1541. This subtitle shall not be deemed to provide a basis for any action, either legal or equitable, by any State, local unit of government, or any person or class of persons challenging a Federal project, program, or other activity that may affect agricultural land.

EFFECTIVE DATE

SEC. 1542. The provisions of this subtitle shall become effective six months after the date of enactment of this Act.

SUBTITLE H-MISCELLANEOUS PROVISIONS LOCAL SEARCH AND RESCUE OPERATIONS

SEC. 1543. The Secretary of Agriculture is authorized to assist, through the use of Soil Conservation Service personnel, vehicles, communication equipment, and other communication equipment, equipment or materials available to the Secretary, in local search and rescue operations when requested by responsible local public authorities. Such assistance may be provided in emergencies caused by tornadoes, fires, floods, snowstorms, earthquakes, and similar disasters.

RECLAMATION

SEC. 1544. Section 406(d) of the Surfacing Mining Control and Reclamation Act of 1977 (30 U.S.C. 1236(d)) is amended by adding at the end thereof the following new sentence: "The Secretary of Agriculture may carry out, without regard to the acreage limitations set forth in this section, experimental recla mation treatment projects on all lands within a hydrologic unit if the Secretary determines that treatment of such lands as a hydrologic unit will achieve greater reduction in the adverse effects of past surface mining practices than would be achieved if reclamation was done on individual parcels of land."

TITLE XVI-EFFECTIVE DATE

SEC. 1601. Except as otherwise provided herein, the provisions of this Act shall become effective October 1, 1981.

Mr. BAKER. Mr. President, I intend to yield the floor in a moment to the distinguished chairman of the committee and other Members. I observe that the Senator from Minnesota is in the Chamber, as well as the Senator from Kentucky and others.

I repeat what I said in morning business: I genuinely hope that this very controversial and complex matter can be disposed of this day and the full day we will devote to it tomorrow. In order to do that, it appears to me to be necessary to explore actively the possibility of a limitation of time for the consideration of amendments to this bill and the possibility of a time certain for final passage. I do not put such a request at this time. However, once again, I urge all Members to consider that possibility in the course of their deliberations today and in meetings that are almost certain to occur during the course of this day on the floor and in other places.

I yield the floor.

Mr. HELMS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Boschwitz). Without objection, it is so ordered.

Mr. HELMS. Mr. President, I was about to say that I am pleased that the Senate today is beginning consideration of the Agriculture and Food Act of 1981, S. 884. That may be somewhat of an overstatement considering some of the ramifications and complications of this piece of legislation. But at the very minimum I am willing that the Senate begin its consideration.

This legislation provides a framework of support for a broad range of farm commodities. It deals with both domestic programs and international efforts such as market development and food for

Beyond that, it strengthens our systems for agricultural research and resource conservation, which are, of course, issues of utmost concern to our long-term productivity. By enhancing productivity and encouraging orderly marketing through loans and farmer-owned reserves, this bill, S. 884, is designed to provide benefits for the consumer as well as the producer.

All these issues are addressed in a costconscious manner, in a way that is worthy of support by the farmer, the consumer, and the taxpayer, which is not to say that everyone is tickled pink with this piece of legislation. I am not myself. But under the exigencies of the situation we have tried to accommodate as many interests as possible, bearing in mind the budgetary restraints that we all feel.

The new farm bill will replace the current farm and food statutes which expire this year. I believe this new legislation builds on and certainly improves current law.

It retains the basic framework of recent farm legislation, which has many desirable features. In some cases, it makes even further advancements toward a market-oriented agricultural policy.

This Senator believes strongly in an agricultural policy which is oriented to the marketplace, and this legislation measures well on that scale. For the record, let me identify some highlights of

the market-oriented provisions of this bill.

For the first time, the loan rate for soybeans will be calculated on the basis of recent soybean market prices. U.S. soybean exports make up more than 80 percent of the world's soybean trade. It is therefore, particularly appropriate to use this method to calculate government support levels for soybeans because they are so market sensitive in the world economy.

Disaster payments are being phased out, to be replaced by the Federal crop insurance program already authorized by Congress. The new Federal crop insurance program is a more businesslike, cost-effective means of providing protection from natural disasters than is the disaster payments program.

Loan rates will be set at levels which will not interfere with the market. This means that the Government will not acquire burdensome stocks of grain. Moreover, it means that producers will make their decisions on the type and amount of various crops to plant according to the marketplace, not the Government, which is the way it should be.

The normal crop acreage and crosscompliance regulations of recent years will be eliminated. Such restrictions were a particular hardship for producers in the South last year who tried to adjust cropping patterns after the devastating drought. The committee made the judgment that such Government regulations reduced farmer's flexibility and therefore, were unnecessary.

The call price on the farmer-owned reserve will be eliminated, as was suggested by the distinguished Secretary of Agriculture, Mr. Block. The call price is the level at which the Government loan must be repaid, which usually means that farmers are forced to sell the grain. When grain is called, the surge of grain onto the market places a tremendous burden on many marketing and transportation institutions, and market prices may be unduly depressed. Our proposal will avoid that dislocation and allow sales decisions to be made by farmers, not by Government mandate. The committee provided that the Secretary could require loans to be repaid before maturity only in emergencies, after notification properly made to Congress. The Secretary would retain authority to adjust interest rates in order to encourage orderly marketing

Finally, a revolving fund for agricultural export credits will be authorized, which this Senator hopes will be funded as soon as possible. Operation of such a fund should encourage world demand for U.S. agricultural products by providing financing for purchases in a reliable, consistent, and self supporting fashion. This provision was one endorsed repeatedly by witnesses at our hearings on the farm bill conducted earlier this year.

(Mr. LUGAR assumed the chair.)

Mr. HELMS. The point is that these provisions are examples of a move toward market orientation in the Agriculture and Food Act of 1981. Many other portions of current law which are already proven effective were retained in that regard.

Needless to say, Mr. President, all of

this was developed under the most demanding time and budgetary restraints. Indeed, I believe I am correct that this is the first farm bill in history that has been drafted with budget restraint at all.

Certainly, the budget resolution agreed to by Congress imposed discliplines on any Federal expenditures.

Mr. President, our hearings on this legislation began, as I recall, on March 2, early in March, I believe it to have been March 2, and I recall telling my colleagues on the committee that this task would demand our very best efforts. The committee members responded admirably, and I am grateful to them for their cooperation and for their work.

The committee conducted 24 days of hearings on our farm and food programs combined. Several weeks of comprehensive hearings were held in Washington, in addition to field hearings in many States. We heard from farmers, consumer organizations, farm organizations, agribusiness representatives, Senators, agricultural researchers, Governors, private industry, the Secretary of Agriculture, and many others.

Following these comprehensive hearings, the committee conducted almost 3 weeks of markup sessions to perfect the legislation, if it can be called that.

At one point, the committee tentatively approved provisions which were found in the aggregate to be significantly above our budgetary limits. With considerable efforts, the committee refashioned the farm bill so that it met the test of the first concurrent budget resolution.

As the Senate begins consideration of this measure I think it is important to bear in mind the severe challenges facing family farmers in today's economy. America's faimers have been hit hard by drought, inflated production costs, and high interest rates. They are now recovering from a year in which net farm income fell nearly 40 percent from the year before. In fact, detailed farm income estimates for last year were recently completed by the U.S. Department of Agriculture, and these estimates show the net farm income for 1980 was \$19.9 billion, 39 percent below 1979's \$32.7 billion, in constant dollars.

Now, if you look at it in terms of constant 1972 dollars this was a decline in 1 year of about 45 percent. So while I know that many Senators are anxious to have at this bill, and I am aware of the number of amendments which are now reposing at the desk, I would caution those Senators, and I would caution the public to take note of an obvious fact of life: Who else in our economy besides the American farmers were asked to take a 45-percent cut in pay last year?

Double-digit inflation, higher interest rates, and increasing energy costs pushed total farm production expenses up 10 percent in 1980 to \$130.7 billion.

In 1980, short-term interest increased 29 percent; fuel costs were up to 29 percent; fertilizer 27 percent; and real estate interest up 19 percent.

Meanwhile, there was no way the American farmer could pass along his increase in the cost of production. The price of farm products has not kept pace due to the grain embargo and other factors. Farm debt has attained record levels. Production expenses are expected to climb at a rate of 9 to 11 percent this

Mr. President, I do not hesitate to defend the American farmer in terms of his dedication to getting this country straight again. Obviously, the American farmer has a prime interest in controlling inflation, and this means restraint in spending by this Government for all programs across the board. In such a setting it is essential that Congress enact legislation with minimum cost to the taxpayer. Overspending for farm programs as for other programs will simply further and contribute to the inflation which is now plaguing America's farm-

This committee has constantly worked to develop legislation which is in fact cost effective, which will in fact provide for a reasonable farm program without unreasonable Government costs.

A number of controversial concepts and topics were considered by the committee and, of course, it is important for Senators to understand the reasoning which the committee used in each case. These included dairy, target prices, and

Let us look at title I, which is the dairy program. Notwithstanding all of the arguments and the enormous arithmetic of the cost of the dairy program and other programs, I do, nonetheless, remind Senators that there is no type of agricultural production in America quite so demanding as that of the dairy farmer. Nature demands that cows must be milked morning and night, every day, 365 days of the year, with no holiday. Even a change in the time of day the cows are milked throws off their natural routine and that has its effect on production and profitability.

I do not think anybody wants to contend that the dairy farmer is not a hard worker. Such essential, continous labor is important if the consumers of America are to have a continuous flow of highly nutritional milk, butter, and cheese. So the question that the committee confronted, and I know Senator Huddleston will agree—neither his State nor mine is a major dairy State. The question is, how are we going to approach the profitability of the dairy farmer given the circumstances of the last 20 or 30 years and the farm programs during that period? How are we going to assure the American consumers that they will have

an adequate supply of milk?

For 40 years, Congress has been setting a level of support through a complex marketing system. I recall nearly 9 years ago I took my seat for the first time as a member of the Agriculture Committee. I had no idea how much I did not know about farm programs. About the only consolation that I received that year was the realization that maybe some other Senators did not understand them. either. As a matter of fact, I remember the distinguished chairman of the committee, Mr. Talmadge, turning to one

side one morning and saying, "What the heck is parity, anyhow?"

I do not claim to be an expert as to the details of all of these programs. All I know is that we must guard against overt action that will continue the process of sending the American farmer down the tube. I would like to take a position of offering amendments here and amendments there that will sound good back home. But the truth of the matter is that we had better approach this highly delicate balance, to the extent it is balanced, in terms of the American farmers, and we had better do it carefully. We have to take this step this year and proceed from

I could promise any Senator that he or she is going to have full cooperation from me if, and when, we can find a better way and a quicker way to move toward market orientation of our agricultural

sector.

The committee made the judgmentand Mr. President, there was much debate, and there is still debate going on right now-that the level of compensation in the expiring farm bill was too high, considering the cost to the Treasury and the farmers' ability ot produce even more than current consumer demands.

This has led to the Government spending enormous amounts and acquiring tremendous stocks of surplus dairy products which are bought and stored at the tax-

payer's expense.

But regardless of what anyone may contend, the Committee on Agriculture, Nutrition and Forestry set about the business of doing its best to preserve the dairy farmer-and you can read that "preserving a lot of dairy farmers who may go down the tube otherwise"bringing it into balance.

The odd thing is that I see criticism both ways. I see where the committee has done practically nothing, which is not so. Then I see another newspaper describing the action with respect to the dairy program as "the sharpest cut in dairy price supports in more than 30 years."

guess that means that the committee did about as good a job as any committee of mortals could do in a complex, com-

plicated situation.

I sav again that I do not like everything in this farm bill. If I had my way, I would change this or I would change that. But the fact is that we have fine tuned a reasonable compromise that has been designed to reduce Federal spending, which we are doing, and which will prevent the agriculture sector slipping over into chaos.

Speaking of the dairy sector, while the committee bill retains the basic price supports for milk at 75 percent to 90 percent of parity, the bill also provides that the price support level may be set at not less than 70 percent of parity if the Secretary estimates that the net cost of Government price support purchases of milk or milk products will exceed \$500 million or net Government price support purchases will exceed 3.52 billion pounds of milk equivalent during any fiscal year.

Say what you will, but if you ask the dairy farmer, who has been living with this program all these years and count-

ing on it, he will tell you that it is stiff medicine, and I am not sure that I would win any popularity award with the dairy interests.

However, the point I am making-and want to emphasize it as genuinely as I can—is that the committee has made a forthright, honest effort to meet the various demands upon it, bearing in mind that our No. 1 goal is to keep the farmer in business and, No. 2, to move the agriculture sector toward market orientation.

We have done that, Mr. President. We have done it because I believe the actions we have taken have been the kind of actions that, in the long run, will be in the best interests of the farmer, the con-

sumer, and the taxpayer.

Target prices-another hotly contested topic in the committee. I wish all Senators could have heard the debate. sometimes arguments. You could listen to one Senator and you could listen to another, and you could come up with the opinion that the target price system is great or it is lousy, that it has advantages or it has disadvantages. But the point is that after lengthy deliberation. the committee, in the vast majority, determined that the target price system was preferable to other alternatives. Target prices were included in the programs for feed grains, wheat, cotton, and

The system works in this way. A target-price level is determined for various commodities and if actual market prices for the commodity fall below the target prices, the Government will make deficiency payments to participating farmers to cover the difference. Apart from targets, the producer may take out a loan on his commodity which is at a rate or value lower than the target price.

On this point, let me be absolutely clear. I do not favor direct Government payments. Secretary Block does not favor direct Government payments. Most farmers themselves do not like direct Government payments.

And under the moderate target price levels adopted in our bill, direct Government payments will not be made unless market prices fall significantly below what USDA calculates is the cost of producing those commodities.

There is a fair chance-certainly, it is my hope—that market prices will be high enough over the next 4 years that not 1 penny of direct Government deficiency payments will be made. But I cannot tell the Senate that that will be the case or that it will not be the case. I do not have a crystal ball; and, as I look around this Chamber, I do not see any crystal ball. We simply have to do the best we can, cutting the cloth to fit the pattern, bearing in mind that we do not want to push the farmers of this country over the precipice.

We talk about high interest rates. Farmers did not do it. We talk about inflation. The farmers did not do it. It was done to them.

I find it of some interest that some of the objections I have read in the press, some of the objections to this farm bill, have come from people who have encouraged the wholesale handout of Government funds to nonproducers.

For 3 or 4 years, I have been standing in this Chamber, day after day, saying, "Let's look at this food stamp program, for example. Let's look at the fraud, the waste." I was hooted down by some of the editorial activists who said, "Oh, there is not much fraud in the food stamp program. That Senator from North Carolina is nuts." Now they are coming around.

I do not know how many Senators saw the television program "20/20" on ABC the other night. The food stamp program wastes almost more money than the farmers get. Food stamps have developed into a second currency. Organized crime is dealing in them. But the folks who have been saying, "Don't touch that food stamp program," or "Don't touch any welfare program" are some of those who are saying that this farm bill is just too expensive.

So I plead guilty to my support of a piece of legislation which I believe is the best we are going to get to prevent chaos in the agricultural sector. We are cutting spending. We are moving the agricultural sector toward market orientation.

Undoubtedly, in the months and years to come we can and we will do better, but we better not jerk the rug, the remainder of the way, out from under the farmer at this time.

While the committee bill retains the basic price support level for milk at 75 to 90 percent of parity, the bill also provides that the price support level may be set at not less than 70 percent of parity if the Secretary estimates that the net cost of Government price support purchases of milk or milk products will exceed \$500,000,000, or net Government price support purchases will exceed 3.52 billion pounds—milk equivalent—during any fiscal year.

This is stiff medicine, but it will send a more correct price signal to dairy producers and will be in the longrun, best interest of the farmer, the consumer, and the taxpayer.

Another hotly contested topic in the committee was that of target prices. Without question, the target price system has its advantages and disadvantages. However, after lengthy deliberation, the committee determined that the target price system was clearly preferred to other alternatives.

Target prices were included in the programs for feed grains, wheat, cotton, and rice.

The system works in this way. A "target price" level is determined for various commodities and if actual market prices for the commodity fall below the target prices, the Government will make deficiency payments to participating farmers to cover the difference. Apart from targets, the producer may take out a loan on his commodity which is at a rate or value lower than the target price.

On this point, let me be absolutely clear. I do not favor direct Government payments. Secretary Block does not favor direct Government payments. Most farmers themselves do not like direct Government payments.

And under the moderate target price levels adopted in our bill, direct Government payments will not be made unless market prices fall significantly below what USDA calculates is the cost of producing those commodities.

In fact, it is my hope that market prices will be high enough over the next 4 years that not 1 penny of direct Government deficiency payments would be made. However, the committee felt that target prices are necessary to provide farmers with a measure of income protection.

Our legislation will provide not only target prices at moderate levels, but also tools for the Secretary of Agriculture to use in order to keep Government payments from being made. These include acreage reductions authority, the farmer-owned reserve, and additional mechanisms to expand agricultural exports.

I have great confidence that Secretary Block and the Reagan administration will operate these programs in such a way to minimize costs to the Treasury. We can all work together, then, to use these tools when necessary so that prices remain adequate and so that direct Government payments will not be made.

The net result is that everyone is motivated to expand exports and strengthen prices, and farmers receive their income from the marketplace, not the Government.

The committee did not arrive at this endorsement of target prices without a great deal of consideration and scrutiny.

In the course of our farm bill hearings, many witnesses were asked about target prices or alternatives. There was active support for target prices, but there was also the statement that we could eliminate target prices in the loan rate was significantly increased. This alternative was considered at length in committee markup and not approved.

If target prices are eliminated, we must ask how much loan rates would have to be increased in order to provide an equivalent amount of protection to the farmer as target prices provide currently.

The answer is that loan rates would have to be considerably higher, and this has implications which must be considered.

If loan rates are too high, there is the possibility that they will interfere in the market. In other words, if the loan is set above actual cash prices, farmers will choose to not repay the loan but rather to forfeit the collateral to the Government. Should this occur, the Government will acquire burdensome stocks of grain.

This occurred in the 1950's and 1960's when the Government was in the grain business in such a big way. Huge surpluses of Government grain were stored in Government bins across the country.

Not only was this costly to the taxpayer, but those huge stocks of grain became a strong depressant, hanging over the market and keeping farm prices low. It took us a long time to work the Government out of the grain business in this way, and there are serious consequences if we go back. Furthermore, overly high loan rates could make the United States less competitive in the world market. It could allow our competitors in grain marketing around the globe to make excess profits and expand their market share at our expense. Such action could in fact reduce our agricultural exports which we are so committed to expand.

A policy of no target prices and overly high loan rates, then, could be the least market-oriented alternative of all.

Make no mistake—commodity loan rates are a cornerstore of farm programs. Our legislation provides for an increase in loan rates from current levels. Further, the public should note that, as long as loans are at market-clearing levels, these loans are completely recoverable—in fact, they are repaid with interest. Our committee believes that the Government accounting systems should reflect this fact.

But if loan rates are too high relative to the actual market, there are serious consequences for both the consumer and the taxpayer.

With this in mind, the committee adopted loan rates at levels low enough to allow the market to work. But the committee believes that farmers deserve more protection than that. The best way to provide that, as I have already described, is through target prices.

Another area of considerable controversy was the sugar program, title LX. The loan program provided in the bill should provide beneficial stability for both growers and users of sugar.

Sugar is a commodity which has felt the "boom and bust" of market conditions. This extreme volatility and price fluctuation in the so-called "free" world sugar market demonstrates the need for a sugar program.

Some may ask why the committee adopted a sugar program at a time when we are seeking less, not more, Government. It is a valid question, because the marketplace rather than the Government is clearly a more efficient allocator of resources.

The fact of the matter is, however, that there is not a free market in sugar. Most of the world's sugar is traded in tightly controlled Government and private contracts.

Less than a fourth of all sugar produced in the world is freely traded. Yet from this small amount that is traded, the United States must import as much as 30 percent of those free stocks. This leaves the United States particularly vulnerable to price fluctuations.

And yet, in spite of the disruptive effects that dependence on this highly restricted market breeds for producers, processors, and consumers alike, the United States is the only sugar-producing country in the world to be without an effective Government price support program that attempts to provide protection from the extremes of market gyrations.

The committee believes that a mandatory price support program is needed to provide the incentive and assurance for U.S. growers to make the investments to

sustain or increase domestic sugar production.

The committee also is sensitive to the need to control Federal spending. With that in mind, we carefully crafted a system to allow for loan and purchase activity, while keeping Federal costs to essentially nothing.

The committee bill provides that loan activity must occur within a fiscal year. The committee further encourages the Secretary to use the tools at his disposal to guard against Government cost from

acquisition of sugar.

According to the Congressional Budget Office, this program will result in zero outlays-not only next year, but every year for the life of the farm bill. Shortterm cost to the consumer must be balanced with the benefits of stability to both the producer and the consumer.

Recent sugar market developments show how critical a safety net for growers may be. The recent price trend for

sugar has been sharply lower.

USDA has reported the estimated domestic raw sugar spot price for each of the last 12 months. The data shows that the price fell dramatically from over 41 cents per pound in October 1980 to 17 cents in August 1981.

With production costs rapidly inflating, this dramatic drop in prices will further damage sugar producers and the

rural economy.

A sugar program, however, will provide a safety net which encourages needed stability in an unstable economy.

After adopting loan programs for wheat, corn, grain sorghum, barley, oats, rye, cotton, rice, peanuts, and soybeans, the committee decided that it was equitable for the sugar industry to have a loan program as well.

We believe that a million dollars of real assistance to the farmer is better than \$10 million of unfulfilled promises. At the same time, the benefits to society which result from these reasonable in-

vestments is more than worth the cost.
Mr. President, the committee members have shown tremendous discipline in the preparation of this farm bill, and have fashioned it under the most severe budgetary constraints ever confronted in the writing of any farm bill in this

Nation's history.

In July a number of Senators who are members of the committee, as well as many who are not, joined Senator HUDDLESTON and me in circulating a "Dear Colleague" letter discussing that discipline and the need for the entire Senate to appreciate the delicate bal-ance achieved in the writing of the bill.

So that Senators may be reminded of the broad bipartisan recognition given to the Agriculture Committee and the broad support for our bill by our colleagues, I ask unanimous consent that the text of the July 16, 1981 letter be printed herewith, to include a listing of the Senators who signed the letter.

Also, so that Senators may have a better understanding of S. 884 as reported, I ask unanimous consent that a brief explanation of the bill be printed immediately following the letter.

Now, let me say in conclusion that the committee has been obligated by changes in certain economic and crop production forecasts to carefully review the bill. We have developed a committee compromise package of amendments which I shall discuss in more detail shortly.

There being no objection, the material was ordered to be printed in the RECORD,

as follows:

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY, Washington, D.C., July 16, 1981.

DEAR COLLEAGUE: Every Senator has an

agricultural constituency, and there is usually a high degree of interest every four years when the Committee on Agriculture, Nutrition, and Forestry reports an omnibus farm

S. 884, the 1981 farm bill, is no exception. We can assure you that crafting this bill in Committee was not easy. After some 25 lengthy mark-up sessions—more than twice as many as required in 1977—the Commit-tee approved a bill that retains the basic

framework of improvements.

Of course, the task of the Committee was made more difficult because 1981 is the first year in which severe budgetary constraints are such a prominent factor in the consideration of all legislation. The farm bill, as reported, makes important savings in the cost of the Nation's farm programs and meets the test of the budget resolution.

Given the budgetresortation.

Given the budgetary circumstances, we believe that the reported bill embodies the best provisions obtainable, and is, therefore, a prudent measure worthy of your support. It is our hope that the Senate will recognize the careful scrutiny the Committee gave to

all aspects of farm legislation.

No doubt, there are features of S. 884 that some Senators would prefer to have been handled differently. But we hope that all Senators will resist the temptation to offer amendments that would undermine the legislation. The adoption of such amend-ments would endanger the whole concept of omnibus farm legislation and the structure of the Nation's farm commodity programs. It is our earnest hope that no such amendments will be offered.

It is our intention to resist all amendments that would change the basic structure of the bill fashioned in Committee. We urge all Senators to join us in opposing such

amendments.

We appreciate your interest and coopera-tion. Members of the Committee on Agriculture, Nutrition, and Forestry and staff stand ready to offer any assistance to you or your staff in understanding any of the features of S. 884 about which you may have questions.

Sincerely, Walter D. Huddleston, Thad Cochran, David Boren, David Pryor, J. Bennett Johnston, Russell Long, Wendell Ford, Paula Hawkins, Jesse Helms, Mark Andrews. Howell Heflin, Edward Zorinsky, John Warner, Lloyd Bentsen, John P. East, Spark Matsunaga, Strom Thurmond, Jeremiah Denton, Daniel Inouye, Sam Nunn.

AGRICULTURE AND FOOD ACT OF 1981—BRIEF EXPLANATION OF LEGISLATION

TITLE I-DAIRY

Title I of the bill would-

(1) Establish permanent authority for the inclusion of seasonal base-excess plans and seasonal takeout-payback (Louisville) plans in milk marketing orders (but would not extend the authority for Class I base plans);

Leave current law unchanged which requires that the price of milk be supported at a level between 75 and 90 percent of the parity price for milk, but beginning October 1, 1981, and ending on September 1, 1985, authorize the Secretary of Agriculture to support the price of milk at not less than

70 percent of parity if the Secretary esti-mates for any fiscal year that net Government price support purchases of milk and dairy products will cost more than \$500 million or exceed 3.52 billion pounds (milk equivalent). Adjustment of the support price of milk upward to 70 percent of parity on April 1 of each year would be required if the support price has fallen below 70 percent

(3) Require the Secretary, to the maximum extent practicable, to use available authorities to reduce inventories of dairy products held by the Commodity Credit Corporation (CCC) so as to reduce net CCC expenditures under the milk price support program in any fiscal year to the budget outlays for the program established under the Congressional Budget Act of 1974 for that

(4) Extend, through December 31, 1985 the provisions requiring the CCC to donate dairy products acquired under the price support programs to veterans hospitals and the military; and

Extend, through September 30, 1985, the authority for the Secretary to make indemnity payments to dairy producers who sustain losses of milk contaminated by pesticides (indemnities also available to milk manufacturers), other chemicals and toxic substances, or nuclear radiation or fall out.

TITLE II-WOOL AND MOHAIR

Title II of the bill would-

(1) Extent, through December 31, 1985, the requirement for a price support program for wool and mohair, but changes the level of support for shorn wool from 85 percent to 75 percent of the price support formula set out in the National Wool Act of 1954 (the support levels for pulled wool and mohair based on the support price for shorn wool); and

(2) Delete provisions of the National Wool Act limiting total cumulative payments under the wool price support program to an amount equal to 70 percent of the accumulated total wool customs receipts since Janu-

ary 1, 1953.

TITLE III-WHEAT

Title III of the bill would-(1) Provide for a loan and target price program for the 1982 through 1985 crops of wheat. Loans and purchases would be made available to wheat producers at not less than \$3.50 per bushel. Minimum target prices (per bushel) would be: \$4.20 for the 1982 crop; \$4.40 for the 1983 crop; \$4.60 for the 1984 crop; and \$4.80 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing wheat. Target price payments would be com-

puted as under existing law;
(2) Make prevented planting and reduced yield disaster payments available, for each of the 1982 through 1985 crops of wheat, for producers for whom Federal crop insurance is not available. Disaster payments would be computed as under existing law. The Secretary would also be given discretionary authority to make such disaster payments available to any wheat producer if disaster losses have created an economic emergency that cannot be alleviated by crop insurance and other assistance programs; and

(3) Authorize acreage limitation and paid diversion programs for the 1982 through 1985 crops of wheat, if needed to protect against overproduction. Producers who produce wheat in excess of that permitted under an acreage reduction program would not be eligible for program loans, purchases, and payments; and participation in the paid diversion could be required as a condition of eligibility for such loans, purchases, and pay-

TITLE IV-FEED GRAINS

Title IV of the bill would-

(1) Provide for a loan and target price pro-

gram for the 1982 through 1985 crops of feed grains. Loans and purchases would be made available to producers of corn at not less than \$2.60 per bushel. Loans and purchases for barley, oats, rye, and grain sorghum would be made at levels that are fair and reasonable in relation to the level of loans and purchases for corn. Target price pay-ments would be made available for corn, grain sorghums, oats, and (if designated by the Secretary) barley. Minimum targets prices for corn (per bushel) would be: \$2.80 for the 1982 crop; \$2.95 for the 1983 crop; \$3.10 for the 1984 crop; and \$3.25 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing corn. The target prices for the other feed grains would be set at levels that are fair and equitable in relation to the target price for corn. Target price payments would be computed as under existing law;

(2) Make prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of feed grains

in the same manner as for wheat; and
(3) Authorize acreage limitation and paid
diversion programs for the 1982 through 1985
crops of feed grains in the same manner as wheat.

TITLE V-UPLAND COTTON

Title V of the bill would-

(1) Provide for a loan and target price program for the 1982 through 1985 crops of upland cotton. Loans would be made available at the lower of (1) 85 percent of the acreage U.S. spot market price for upland cotton during the preceding 5 years or (2) 90 percent of the average Northern Europe price for upland cotton, as determined under for-mula set out in the bill; however, in no case could the loan level be less than 55 cents per pound. The loan level must be announced by November 1 of each year and could not thereafter be changed. Loans may be extended beyond the normal 10-month term, at the producer's request, for an additional 8 months unless the average price of upland cotton for the preceding month exceeded 130 percent of the average price for the preceding 3 years, in which event a special import quota would be proclaimed:

(2) Target price payments would be avail-(2) Target price payments would be available. Minimum target prices (per pound) would be: \$0.71 for the 1982 crop; \$0.76 for the 1983 crop; \$0.85 for the 1984 crop; and \$0.93 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing cotton. Target price payments would be computed as under

existing law.

(3) Make prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of upland cotton in the same manner as for wheat;

(4) Authorize acreage limitation and paid diversion programs for the 1982 through 1985 crops of upland cotton in the same manner as for wheat;

(5) Require the Secretary to make available to producers of the 1982 through 1985 crops of upland cotton loans on seed cotton, using the authorities under the CCC Charter

Act; and

(6) Require the Secretary to establish premiums and discounts under the loan program giving equal weight to loan differences for the preceding crop and market differ-ences in the designated spot markets.

TITLE VI-RICE

Title VI of the bill would-

(1) Repeal the provisions authorizing acreage allotment and marketing quota programs for rice;

(2) Provide for a loan and target price program for the 1982 through 1985 crops of rice. The minimum target prices (per hundred-weight) would be: \$11.23 for the 1982 crop; \$12.14 for the 1983 crop; \$12.70 for the

1984 crop; and \$13.50 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing rice. Target price payments would be computed as under existing law. Loans and purchases would be made available for each crop of rice at a level that bears the same ratio to the previous year's loan level as the target price bears to the previous year's price, except that, if the Secretary determines that any such loan level will substantially discourage the exportation of rice and result in excess stocks of rice, the Secretary may set the loan rate at a lower level (but not less than \$8 per hundredweight) to avoid excessive stocks;

(3) Make prevented planting and reduced vield disaster payments available for each of the 1982 through 1985 crops of rice in the same manner as for wheat; and

(4) Authorize acreage limitation and paid diversion programs for the 1982 through 1985 crops of rice in the same manner as for wheat.

TITLE VII-PEANUTS

Title VII of the bill would-

(1) Establish, for each of the 1982 through 1985 crops of peanuts, a minimum national acreage allotment of 1,614,000 acres, and a minimum national poundage quota of 1,300,000 tons (which include a minimum State acreage allotment of 9,787 acres for New Mexico. Acreage allotments may be sold. leased, or transferred only within a county, except that, in States in which the total acreage allotment is 11,000 acres or less, transfers may be made anywhere within the State. Farm poundage quotas would be determined as under current law, except that more than one year's undermarketings (excluding those prior to the 1980 crop) may be carried forward so long as the producer plants at least 50 percent of the allotment;

(2) Retain the peanut program's two-tier system of "quota" peanuts (production with-in a farm's poundage quota) and "additionpeanuts (production within the allotment in excess of the poundage quota);

- (3) Provide that the penalty for marketing peanuts in excess of a farms' poundage quota would be 120 percent of the support price quota peanuts (although additional peanuts may be placed under loan and not redeemed, or marketed under contracts with handlers for crushing or export, without being subject to penalties). State and county would be given authority to waive penalties for unintentional violations. Also, area marketing associations would have authority to sell, at prices equal to or greater than the minimum CCC sales, prices, additional peanuts under loan;
- (4) Establish, for each of the 1982 through crops, a minimum price support level for quota peanuts of \$631 per ton. The price support level for additional peanuts would be set by the Secretary, taking into consideration demand and prices for edible oil and meal and demand for peanuts abroad. However, the additional peanut loan must be set at a level estimated to result in no program losses to the CCC; and
- (5) Require the Secretary to make ware-house storage loans available to designated area marketing associations (except cooperatives engaged in activities with respect to peanuts other than handling CCC price support operations), and to use the associations in administrative and supervisory activities relating to price support and marketing.

TITLE VIII-SOYBEANS Title VIII of the bill would-

(1) Establish a price support loan and purchase program for soybeans marketed in each of the 1982 through 1985 marketing years. Loans and purchases would be made available on soybeans at a level equal to 75 percent of the average Chicago cash price for No. 1 yellow soybeans for the 5 marketing years immediately preceding the then currone marketing year texcluding the high and and low valued years), except that in no event could the support price be less than \$5.02 per bushel; and

(2) Provide that the Secretary may not require participation in any production adjustment program as a condition of eligibility for soyoean price support under the bill; that 1982 through 1985 crop soybeans would not be eligible for any storage reserve program; and that the Secretary may not make payments to producers to cover the cost of storing 1982 through 1985 crop soybeans

TITLE IX-SUGAR

Title IX of the bill would-

(1) Establish a price support program for the 1982 through 1985 crops of sugar beets and sugar cane:

(2) During the period beginning with the effective date of the bill and ending March 31, 1982, require the Secretary to support the price of domestically grown sugar beets and sugar cane (through purchase of processed sugar or other operations), at a level to approximate a raw sugar price of 19.6 cents per pound;

(3) Beginning October 1, 1982, require the Secretary to support the price of domes-tically grown sugar crops for each of the 1982 through 1985 crops through nonrecourse loans to producers, as follows:

(1) for sugar cane, at not less than 19.6 cents per pound of raw cane sugar; and

(ii) for sugar beets, at a level that is fair and reasonable in relation to the support level for raw cane sugar.

Loans could not be made available before the beginning of the fiscal year and would have to mature before the end of that fiscal

TITLE X-GRAIN RESERVES

Title X of the bill would make a number of revisions in the farmer-held reserve program for wheat and feed grains, including the following:

(1) The establishment of a wheat reserve program would be made discretionary with the Secretary (under existing law, the Secretary is required to establish a wheat reserve);

(2) Reserve price support loans could be set at levels higher than the regular support level. The specific levels would be left to the

discretion of the Secretary;
(3) The requirement that the Secretary interest charges on loans made the 1980 and 1981 crops of wheat and feed grains will be deleted:

(4) Storage payments could be made at levels designed to induce participation in the program, rather than (as under existing law) at levels sufficient to cover storage

(5) Interest rates on reserve loans could be increased as appropriate to encourage the orderly marketing of grain when the lease" level is reached;

(6) The provision in current law establishing "call" levels would be deleted; although the Secretary could require repayment of reserve loans prior to maturity if emergency conditions exist;

(7) The requirements of current law that wheat reserve be no smaller than 300 million bushels, nor larger than 700 million bushels, would be deleted; the Secretary would be authorized to place upper limits on the size of the reserves, but any such upper limit could not be less than 700 million bushels for wheat and 1 billion bushels

for feed grains; and
(8) The minimum price at which CCC could sell its stocks of wheat and feed grains when a reserve is in effect would be changed from 105 percent of the current call level to 105 percent of the estimated current cost of production (including return for manage-ment and land values).

Title X of the bill would also repeal the provisions in existing law authorizing the establishment of a disaster reserve of wheat, feed grains, and soybeans, and make the CCC farm storage facility loan program per-missive rather than mandatory.

TITLE XI-MISCELLANEOUS

Subtitle A-Provisions applicable to more than one commodity

Subtitle A of title XI extends to the 1982 through the 1985 crops the limitations in current law on the total payments that a farmer may receive annually under the wheat, feed grains, upland cotton, and rice programs. The annual limitations are: \$50,000 for payments under the program except disaster payments; and \$100,000 for disaster pay-ments. Loan and purchase proceeds and compensations for resource adjustment (excluding land diversion payments) are not considered payments for the purpose of these limitations.

Subtitle B-Other miscellaneous provisions Subtitle B of title XI of the bill would-

(1) Extend the special wheat grazing and hay program to the 1982 through 1985 crops;

(2) Extend to poultry producers eligibil-y for assistance under the emergency livestock feed program established under the Food and Agriculture Act of 1977.

(3) Direct the Secretary to appoint a special task force to study the concept of farm income protection insurance and the feasibility of such insurance as an alternative to current price support, income maintenance, partment of Agriculture, and report to the agriculture committees of Congress (within 18 months) on the results of their students

(4) Authorize the Administrator of the Federal Grain Inspection Service to delegate his authority to perform official grain inspection and weighing at export port locations to

any State agency that-

(i) performed official inspection at an export port location prior to July 1, 1976; and

is designated to perform official inspection at locations other than export port locations on the date of enactment of the bill:

(5) Substantially revise title XVIII of the Food and Agriculture Act of 1977 relating to advisory committees established within the Department of Agriculture to eliminate re-quirements under title XVIII that are duplicative of the provisions of the Federal Ad-

visory Committee Act;
(6) Increase—from \$300 million to \$600 million—the limit on the total amount of Class A stock of the Rural Telephone Bank that may be issued to the Government; and extend to September 30, 1991, the authority for the Government to purchase such stock; and extend to September 30, 1995, the date after which Government stock in the Bank must be retired as soon as practicable: and

(7) Encourage the Secretary to continue to consult with representatives of other major grain exporting nations on establishing more orderly marketing of grain and achieving higher farm income for grain producers.

TITLE XII-AGRICULTURAL EXPORTS

Title XII of the bill would-

- (1) Establish an agricultural export credit revolving fund in the Treasury for use by the CCC to finance short-term commercial export sales of agricultural commodities. sales of breeding animals, and the establishment of handling facilities for agricultural commodities in importing countries for market development purposes. The term of the revolving fund would expire October 1,
- (2) Require the President to notify (at least 30 days in advance), and consult with, the agriculture committees of Congress on proposed bilateral agreements, other than treaties, involving commitments on the part

of the United States to assure access by another country to U.S. agricultural commodi-

ties and products on a commercial basis;
(3) Direct the Secretary to formulate a special standby export subsidy program for agricultural commodities designed to neutralize export subsidy programs of other countries. The program would be implemented only if the President determines that the export subsidy program of another country is adversely affecting the export marketing of the U.S. agricultural commodities; a mutually acceptable resolution of the matter cannot be obtained through consultations; and the special export subsidy program is authorized under dispute settleprocedures in international agreements, if any. However, the special export subsidy program could not be used to promote export sales of U.S. cotton; and

(4) Require the Secretary to make payments or loans available to farmers in compensation for any national security or foreign policy embargo of the export of agricultural commodities to another country that is implemented after the bill is en-

acted, if-

(i) the embargo is not a complete embargo of all exports to the other country; and

(ii) the other country imported more than percent of the total exports of the agricultural commodity involved during the pre-

ceding year.

The Secretary would have to make available to producers of agricultural commodi-ties, for which price support is authorized, payments for the difference between 100 percent of parity for the commodity involved and the market price for the commodity during the 60-day period following the imposition of the embargo. Payments would be made available as long as the embargo is in effect, for production affected by the embargo. As an alternative to payments, the Secretary could make available to producers, for the period that the embargo is imposed, loans on the commodities involved in the embargo (if a loan program is in effect for the commodity) at 100 percent of parity. The Secretary would also have the authority to implement a program that combines payments and loans.

TITLE XIII-PUBLIC LAW 480

Title XIII of the bill would-

(1) Extend-through December 31, 1985the authority for the President to (1) make agreements to finance sales of agricultural commodities under title I of Public Law 480, and (2) provide agricultural commodities for programs of assistance in other countries under title II of Public Law 480;

(2) Delete the limit of \$1.9 billion on annual appropriations to support the title I programs, and increase—from \$750 million to \$1 billion—the limit on annual appropriations to support the title II food assistance

program;

(3) Increase from \$5 million to \$10 million-the annual limit on the use of foreign currencies generated under title I to meet

- emergency nonfood relief requirements;
 (4) Add provisions to title I of Public Law 480 to strengthen the self-help measures that countries receiving title I financing must agree to undertake to increase agricultural production (including efforts to reduce illiteracy among, and improve the health of, the rural poor) so as to benefit needy people in such countries:
- (5) Provide authority for the domestic distilled spirits industry to participate in foreign market development under Public Law 480 on the same basis as the beer and wine industry.

TITLE XIV-RESEARCH, EXTENSION, AND TEACH-ING IN THE FOOD AND AGRICULTURE SCIENCES

Title XIV makes a number of amendments to the National Agricultural Research, Extension, and Teaching Policy Act of 1977 and

related statutes. These amendments would—
(1) Revise the findings contained in the 1977 Act to emphasize the importance of the Federal-State partnership in the conduct of agricultural research, extension, and teaching; a strong, basic research program; and long-range planning to meet national agricultural research, extension, and teaching objectives:

(2) Extend the term of the Joint Council on Food and Agricultural Sciences to December 31, 1986, and set the membership of the Joint Council at not fewer than 25 members. At least one-half of the membership would be representatives of land-grant colleges and universities, and two of the members would be representatives of other colleges and universities. The primary responsibility of the Joint Council would be to bring about more effective agricultural research, extension, and teaching by improving the planning and coordination of such activities and by relating Federal budget development and program management to such activities:

(3) Extend the term of the National Agricultural Research and Extension Users Advisory Board to December 31, 1986, and increase the number of members from 21 to 25, including 8 members who are producers;

(4) Authorize an additional Assistant Secretary of Agriculture to manage research, extension, and teaching activities in the De-

partment of Agriculture;

(5) Make forestry schools receiving funds McIntire-Stennis Act and acthe credited colleges of veterinary medicine eligible for special grants under Public Law 89–106, and amend the research facility grant program under Public Law 89–106 to limit eligibility for grants to projects (1) to renovate or refurbish research facilities or acquire equipment, or (ii) for new construction of auxiliary facilities or fixed equipment used in research; and make forestry schools and 1890 land-grant colleges

eligible for the grants;
(6) Direct the Secretary to promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs; and transfer to the Secretary all the functions and offices of the Secretary of Education and Department of Education under the Second Morrill Act (relating to 1890 land-grant

colleges):

(7) Provide that, beginning with fiscal year 1982, any funds appropriated for the expanded food and nutrition education gram in excess of amounts appropriated in fiscal year 1981 will be allocated as follows—

four percent to the Secretary for ad-

ministration.

(ii) the remainder allocated as follows:
 (a) ten percent to be distributed equally among the States; and

(b) the remainder to be distributed under the formula provided in existing law which takes into consideration the proportion of the population in a State below 125 percent of the poverty level.

Also, the Secretary could retain up to 2 percent of appropriations up to the amount appropriated for the program in fiscal year 1981 for the conduct of the program in States that did not participate in fiscal year 1981;

- (8) Effective beginning in fiscal year 1982, increase the amount to be appropriated annually to support extension work at the 1980 land-grant colleges from 4 percent to 5½ percent of the amount annually appropriated for extension work under the Smith-Lever Act:
- Extend authorizations for appropria tions for various agricultural research and extension programs for each of the 1983 through 1987 fiscal years with specific authorization amounts. Generally, not less than 25 percent of all funds appropriated for agri-

cultural research must be appropriated for agricultural research at State agricultural

experiment stations;

Authorize the Secretary to make grants to land-grant institutions, State agricultural experiment stations, and other qualified institutions to carry out research to improve the production and quality of rangeland forage for livestock and wildlife. The grant program would be operated on a matching fund basis, with States required to supply 50 percent of the funding for the research. Up to \$10 million would be authorized to be appropriated annually for the program;

(11) Amend section 32 of the Act of August 24, 1935, which appropriates to the Secretary in each fiscal year an amount equal percent of customs receipts during the preceding calendar year for operations to encourage exports and domestic consumption of agricultural commodities and re-establish farmers' purchasing power, to per-mit the Secretary also to use section 32 funds to support agricultural research, extension,

and teaching; and
(12) Revise and extend the rural development and small farm research and extension programs under title V of the Rural Development Act of 1972.

TITLE XV-RESOURCE CONSERVATION

Title XV establishes new programs for Special Areas Conservation, Resource Conservation and Development, and Agricultural Land Protection, and authorizes the Secreto establish a program for Reservoir Sedimentation Reduction. This title also provides new authority to the Soil Conservation Service to use volunteers and to participate in local search and rescue operations and makes certain other amendments to current

Subtitle A would reaffirm congressional policy to promote conservation of soil and water, improvement of water quality, and preservation of natural resources, and require the Secretary to submit a report to Congress by December 31, 1981, setting forth comprehensive soil and water conservation

policy.
Subtitle B would require the Secretary to establish a Special Areas Conservation Program directed toward identifying and correcting severe and chronic erosion-related or water management-related problems. The program is designed to provide technical and financial assistance on a cost-sharing basis to landowners and operators to aid in carrying out conservation measures set forth in approved conservation plans in designated special areas. Financial assistance is to be provided through contracts, of not more than 10 years duration, with landowners and operators. Participation in the program would not disqualify anyone from receiving benefits under other USDA programs.

Subtitle C would authorize Indian tribes and tribal organizations to sponsor small watershed projects; exempt watershed projects that cost the Federal Government less than \$5 million (now \$1 million) from congressional approval requirements; and provide for energy conservation as an element in small watershed projects. This subtitle also would amend the Bankhead-Jones Farm Tenant Act to allow the development of energy resources in connection with land conservation and utilization projects eligible for cost sharing.

Subtitle D would authorize the Secretary to establish a 5-year pilot program for reduc-ing excessive sedimentation in up to five publicly-owned reservoirs through the implementation of conservation measures in the applicable watershed drainage areas in accordance with plans approved by Congress.

Subtitle E would authorize the Secretary to use volunteers in connection with conservation work.

Subtitle F would require the Secretary to establish a Resource Conservation and Development program designed to provide technical and financial assistance to State and local governments and nonprofit organizations for developing and implementing plans of land conservation and water management in not more than 225 active designated rural areas.

Subtitle G would authorize the Secretary to coordinate the efforts of Federal agencies for purposes of protecting agricultural lands from adverse effects resulting from Federal actions. Each Federal agency is directed to consider appropriate alternatives before taking any action that would result in the conversion of agricultural land to nonagricultural purposes, except in the case of actions

related to national defense agencies.
Subtitle H would authorize the Secretary to use, on request, Soil Conservation Service resources to assist in local search and rescue operations in emergency situations resulting from natural disasters. This subtitle also would authorize the Secretary to implement experimental reclamation treatment projects on unreclaimed mined lands in hydrologic units, rather than individual land parcels. without regard to acreage limitations.

Mr. HELMS. Mr. President, I yield to my distinguished colleague from Kentucky, the ranking Democrat on the Agriculture Committee, with whom it is such a pleasure to work, and who always offers the highest spirit of cooperation and who has a unique talent for developing legislation.

I will yield to him so that he may make his opening statement, and with gratitude for the fine work he has done. The PRESIDING OFFICER

KASTEN). The Senator from Kentucky.

Mr. HUDDLESTON. I thank the distinguished chairman of the committee. Let me say I do not know of any Member of this body who has attacked a more difficult problem with greater diligence and dedication than the chairman of the Agriculture Committee in trying to develop this particular legislation.

The chairman has already described, and I concur with his description, the unique situation we operated under this year in trying to develop a farm bill which would meet the specific needs of our agricultural community and, at the same time, stay within budget limitations that were imposed upon the committee by budget resolutions and the reconciliation process.

I think the bill that has been produced, with the amendment that will be offered that takes into account the most recent reevaluations of the economic situation in this country, is a product that can be endorsed and accepted by Congress and is about the very best possible approach to some of the very difficult problems that we are faced with, not only within the agricultural sector, of course, but throughout the entire economic community of our Nation.

Mr. President, S. 884, the Agriculture and Food Act of 1981, will extend and update a number of the important farm commodity programs; extend the foodfor-peace programs under Public Law 480; provide authorizations for agricultural research, extension, and teaching programs; and establish programs and policies to facilitate soil and water resource conservation efforts.

Due to budget restraints, the programs and authorities provided under the bill will not provide all of what I believe could be done to insure the continued stability and soundness of our agricultural economy. Nonetheless, the bill is of vital importance to our Nation's farmers; and I urge the Senate to approve it.

BUDGET AMENDMENT

Mr. President, I will join the distinguished chairman of the Committee on Agriculture, Nutrition, and Forestry, Senator Helms, and other members of the committee in offering an amendment to the bill, as reported by the committee. The amendment will effect reductions in projected expenditures for several of the commodity programs under the bill.

The amendment will not revise substantially the program provisions developed in the committee markup sessions on S. 884. For the most part, it will simply scale down minimum price support

and target price levels.

The amendment is designed to respond to the concerns of the administration about the Department of Agriculture's possible budget exposure under the committee reported bill. I believe that the amendment will set the minimum support and target rates under the bill at levels that the administration will find acceptable.

I can assure my colleagues that I will join in offering this amendment with the greatest reluctance, only because it clear that the President will not sign the

bill in its present form.

Although the hard-pressed farmers of this Nation need the stronger minimum support prices and target levels under the committee reported bill; I believe that it is more important to farmers that the loan and target mechanisms needed to stabilize farm prices and protect farm income during the next 4 years be enacted into law. Under the amendment, the Secretary of Agriculture will have the authority to adjust upward commodity loan levels and target prices for the commodities involved as necessary to respond to the needs of U.S. agriculture.

AGRICULTURE AND THE ECONOMY

Mr. President, agriculture is of key importance to the economic well-being of our Nation. Each of us in this country has a stake in the farmer's survival.

Farming and the industries that support it account for about one-fourth of our gross national product. In some areas of our country, almost all economic activity is generated by agriculture.

In my view, agriculture is a national economic resource that Congress must assure is maintained at its full potential.

Clearly, we cannot provide total protection to the agricultural economy. Nor should we in a free market system. But, over the years, Congress has recognized the importance of agriculture to our national economic security and has developed programs to stabilize, and encourage the development of, agriculture.

The price support programs, in particular, have provided farmers with a degree of stability in uncertain markets and protection from prices sliding far below the cost of production.

These efforts have borne fruit. The farm programs have assisted our farmers in providing a plentiful supply of food and fiber at reasonable prices to the consumers of the Nation and the world.

DEVELOPING THE BILL

The current farm bill became law 4 years ago; and many of its provisions will expire this year. We must reevaluate the existing programs and plan ahead for the needs of agriculture in the coming 4 years.

The farm bill hearings conducted by the Committee on Agriculture, Nutrition, and Forestry earlier this year made it clear that our farmers are facing virtually unprecedented demands and problems over which they have no control. Farmers face—among other adversities—record high interest rates, falling farm income, and dramatically higher fuel costs. Present economic conditions threaten the continued vitality of agricultural economy.

Earlier this month, the Economic Research Service of the Department of Agriculture forecast that crop prices later in 1981 and in 1982 will fall below this season's levels and that agricultural exports in 1981 will be less than exports in 1980. Also, they revised downward, by about 10 percent, their previous estimates of net farm income for 1981. Farm income this year may not be any higher than in 1980, which was a disastrous year for farmers.

Also, we are seeing thousands of acres of farmland being lost every year due to soil erosion and encroaching nonagricultural development.

A part of the effort to reduce Government expenditures and balance the Federal budget, Congress has the responsibility of writing a farm bill that keeps Federal outlays to a minimum while responding to the needs of the U.S. agriculture.

I am concerned, nonetheless, about the possible adverse effects that budget restraints may have on our Nation's hard-pressed farmers.

The price and income protection provided by the farm programs are, in the strictest sense, an investment in the continuing ability of the farmers of this Nation to meet the food and fiber needs of consumers at home and abroad. This investment in agriculture is one of the best investments the American people can make. A productive agriculture is essential in our fight against inflation.

Also, I vigorously disagree with efforts to label the commodity programs as expensive. The administration has a variety of marketing tools at its disposal to keep down the costs of the programs and will continue to have those tools under S. 884. In addition, a substantial part of the farm programs are loan programs under which farmers pay interest at or near the cost of money to the Government.

Congress will have the serious responsibility, over the next 4 years, of monitoring closely the administration's implementation of the reduced-budget programs under this farm bill. As ranking Democratic member of the Agriculture Committee, I will make every effort to assure that the programs meet the

objectives of providing stability to, and encouraging the development of, U.S. agriculture.

COMMODITY PROGRAMS

The bill would provide loan and target price programs for the 1982 through 1985 crops of wheat, feed grains, upland cotton, and rice. Also, the bill will authorize disastser payment programs for these commodities as needed, and acreage limitation and paid diversion programs to protect against overproduction.

I would like to see higher target levels than those that will be provided under S. 884. However, I am pleased that the bill includes some provision for target prices. Target prices have been valuable tools in supporting and stabilizing farm income without causing significant detrimental effects on markets.

Target prices, when coupled with acreage limitations or diversion during periods of temporary surpluses, provide the Secretary of Agriculture with an equitable method of controlling production and preventing price-depressing excess stocks.

Additionally, because the target price mechanism allows the market to operate without interference from the loan level, which sets a floor to the market price, it can have a positive effect on the competitive position of the United States in world markets for these commodities.

The bill will authorize a price support loan program for soybeans marketed in each of the 1982 through 1985 marketing years. Loans will be made available for each crop at a level equal to 75 percent of the average cash price for soybeans over the preceding 5 marketing years, except that in no event could the support price be less than \$5.02 per bushel.

Using this method to establish the loan level will assure the soybean producer that interim financing will be available to meet his needs and that the loan is not pegged at a level that will interfere with market operation or force the Government to acquire burdensome stocks.

The bill will make several changes in the farmer held reserve program for wheat and feed grains. Farmers have made good use of this program since its establishment by the Carter administration under the 1977 farm bill.

Overall, the changes in the reserve program made by the bill improve the program and deserve the support of the Senate.

The bill contains a provision, similar to that in the omnibus farm bill I introduced earlier this year, to authorize the Secretary to make reserve price support loans at a level higher than the regular support level. This will enable the Secretary to attract more grain to the reserve when necessary to encourage participation in the program.

Also, the provision in current law establishing call levels for the reserve would be deleted, although the Secretary could require repayment of reserve loans prior to maturity if emergency conditions exist.

PROVISIONS RELATING TO AGRICULTURAL EXPORTS

The bill will authorize the establishment of an agricultural export credit revolving fund, to be operated by the Com-

modity Credit Corportation to finance

commercial export sales transactions. The fund would be used to promote the export sales of agricultural commodities and breeding animals, and finance the establishment of facilities in importing countries that improve the ability of such countries to handle agricultural commodities.

The revolving fund will be used only for purposes of market development and where there is substantial potential for developing regular commercial markets for U.S. agricultural commodities.

The export credit revolving fund to promote increased agricultural export sales is an initiative that has been promoted by many agricultural groups in recent years.

While I hope that we could soon begin to establish and use the revolving fund; under current budget limitations, it is very uncertain when that might happen. Nonetheless, we will have established the mechanism under S. 884, and it can serve as an important tool in expanding our export markets when it is funded.

The bill also includes provisions setting ground rules under which the Government may enter into bilateral international agreements, other than treaties, involving U.S. agricultural commodities. Under the bill, prior to entering an agreement, the President would be required to consult with the Senate Committee on Agriculture, Nutrition, and Forestry and the House Committee on Agriculture on the terms of, and reasons for negotiating, the agreement.

These provisions will assure congressional involvement in the development of any new bilateral commodity supply agreements.

The bill includes provisions to discourage the use of subsidies by foreign countries to promote the export sales of their agricultural commodities. Under the bill, the Secretary of Agriculture will be required to formulate a special standby export subsidy program for U.S. agricultural commodities and products to be used as needed to neutralize the effects of export subsidies instituted by foreign countries.

I would hope that we will never be forced to use this program; but it will give our trade negotiators an additional tool to assure fair treatment of U.S. Agricultural commodities in international markets.

The bill also includes provisions designed to protect producers when the Federal Government imposes a national security or foreign policy embargo on the export of U.S. agricultural commodities. These provisions will give farmers some protection against being singled out to bear the brunt of a partial embargo.

The 1977 farm bill included permanent legislation that provides protection for farmers against short supply embargoes. These provisions of the bill will complement that legislation.

Protection under the bill would be made available if the embargo is not a complete embargo of all exports to the other country involved, and the other country imported more than 3 percent of the total exports of the agricultural commodity involved during the preceding year.

The Secretary would be required to make payments available to producers of agricultural commodities for which price support is authorized. The payments would equal the difference between 100 percent of parity for the commodity involved and the market price for the commodity that prevails during the 60-day period following the imposition of the embargo. Payments would be made available as long as the embargo is in effect, for production affected by the embargo.

As an alternative to payments, the Secretary could make loans available to producers for the period that the embargo is imposed. Loans would be made available on the commodities involved in the embargo, if a loan program is in effect for the commodity, at 100 percent of parity.

The Secretary would also have authority to implement a program that combines payments and loans.

The bill also includes a number of provisions dealing with Public Law 480, which provides authority for the food for peace programs.

The goals of the Public Law 480 programs are to expand international trade, develop and expand export markets for U.S. agricultural commodities, combat hunger and malnutrition, and promote the foreign policy of the United States.

Over \$30 billion in U.S. food commodities have been sold or donated abroad under the programs since they were established in 1954.

The bill would extend the programs for another 4 years, through December 1985. In addition, there are a number of technical amendments that would eliminate references to outdated language relating to repayment in foreign currency.

There are also changes in title I of Public Law 480 that are designed to make certain that the self-help measures that recipient countries must take under the program are more effective, can be monitored, and are in addition to other development programs already being undertaken.

RURAL TELEPHONE BANK

The bill will continue, for another 10 years, the authority for the Federal Government to purchase stock issued by the Rural Telephone Bank. The Government would be authorized to buy \$30 million worth of stock annually during the additional 10-year period.

Money from the Government's stock purchasers, added to funds from non-Federal sources, will enable the Rural Telephone Bank to lend funds at an intermediate rate of interest. This rate is above that provided under the Rural Electrification Administration's low-interest loan program, but below commercial rates.

Unless the Government provides this injection of capital, interest rates for Rural Telephone Bank loans will escalate dramatically. This would greatly increase the demand for Rural Electrification Administration low-interest loans.

The stock purchases are, in effect, like much of the assistance provided to rural communities; they are loans that will be repaid with interest when the Rural Telephone Bank buys back the outstandin shares of stock. This buy back of stock

is required by law; and when 51 percent of the stock is redeemed, the Rural Telephone Bank will become a quasi-independent banking corporation.

RESEARCH, EXTENSION, AND TEACHING

A major part of the bill focuses on supporting and improving food and agricultural research, extension, and teaching

Federal support of the development of agricultural science and technology is a public investment that has paid huge dividends for this Nation and the world; and the development and dissemination of new agricultural technology are fundamental missions of the Department of Agriculture.

Congress has the responsibility of providing the necessary tools by which the Department and the scientific community can meet the agricultural research, extension, and teaching needs of our Nation.

Congress first addressed the needs of the food and agricultural sciences in a unified manner in title 14 of the 1977 Farm bill.

The bill will not make radical changes in the Federal policies and programs established under title 14. The bill will continue—through fiscal year 1987—funding authorizations for agricultural research, extension, and teaching programs provided under title 14, and will update and fine tune the operation of a number of these programs.

Also the testimony of witnesses from the agricultural research, extension, and teaching community at the farm bill hearings was clear that coordination of agricultural research and education activities could be improved.

The great strength of our decentralized system of agricultural research and education has been that diverse needs can be addressed. Yet, that decentralization can be a weakness if coordination of efforts is lacking.

Also, a better system for communication between the Federal and State research systems, and between the research community and the users of that research, is needed.

To better focus the expenditure of funds and insure greater communication and coordination within the food and agricultural sciences, the bill restructures the Joint Council on Food and Agricultural Sciences; adds four additional producer members to the Users Advisory Board; and extends the terms of the Council and Board. In addition, the responsibilities of these key panels are more carefully defined, to insure the concentration of research and extension efforts in those areas of greatest national needs.

The bill will strengthen the role of the States in the research, extension, and teaching programs. It also will give the Secretary of Agriculture additional authorities to improve higher education in the food and agricultural sciences.

I am pleased that the bill includes the provisions of my bill to strengthen the rural development and small farm research and extension programs.

RESOURCE CONSERVATION

The bill contains a number of provisions that address the serious stresses placed on our agricultural land and water resources by

the growing demands for agricultural commodities and biomass energy, and by conversion of farmland to nonagricultural uses.

During the 1970's, millions of acres of land were brought into production to meet new demands for farm exports. It is anticipated that more farmland will be brought into production as the world demand for food and fiber continues to increase and the use of ethanol for energy expands.

These previously idle parcels of land tend to be highly susceptible to erosion. Of the acreage presently under cultivation, 25 percent already suffers from erosion problems. If not checked, erosion can cause irreversible soil damage.

To address these problems, the bill will create a new program to target conservation resources to areas suffering from severe erosion problems.

In addition, new legislative authority will be provided for the resource conservation and development program. Under the bill, the program will assist local organizations in preparing and implementing local conservation programs.

In addition to the damage caused by erosion, agricultural land is being lost to housing developments, factories and other facilities, and highways at the rate of 3 million acres per year. Studies indicate that the Federal government may be the largest single contributor to the conversion of agricultural land to nonagricultural uses.

Most development on agricultural land is necessary and desirable. However, simple modifications in Federal policies and programs could reduce the conversion of farmland by Federal agencies.

Therefore, the bill includes provisions establishing a farmland protection policy that will require Federal agencies to consider the negative effects of their actions and policies on agricultural land; and to consider alternatives before taking actions that would result in the conversion of agricultural land to nonagricultural uses. The bill will not, however, regulate or affect actions or use of agricultural land by states or private persons.

Our Nation's most valuable natural resource is its abundance of fertile agricultural land. This resource provides the foundation for a strong economy and supplies food and fiber not only for Americans but also persons in many other countries.

The resource conservation provisions in this bill will provide a basis for the improved stewardship of our limited agricultural land.

CONCLUSION

The Federal farm programs must provide some measure of stability and income protection for U.S. farmers. That means that there should be reasonable supports that address sky-rocketing production costs and the uncertainties of nature and the economy that farmers face, without reducing the competitiveness of the U.S. farmer in the world market.

The approach taken by the bill is to continue, within the budget constraints and with appropriate modifications and improvements, the program mechanisms developed in the 1977 farm bill. This approach provides, I believe, maximum assurance that the programs, with proper management by the administration, will achieve their goals over the next 4 years.

Mr. President, the bill—with the amendment I mentioned earlier—will meet the budget requirements; it will provide the Secretary of Agriculture a great deal of flexibility, within specified

policy limits, to respond appropriately to changes in the needs of the farm economy; it retains the price support loan and farmer-held reserve programs that farms need; and it contains other provisions that will assure the continued vitality of our agricultural sector. I urge its adoption by the Senate.

Mr. President, I ask unanimous consent to have printed in the Record a summary of the major provisions of S. 884, as reported by the Committee on Agriculture, Nutrition, and Forestry.

There being no objection, the summary was ordered to be printed in the Record, as follows:

SUMMARY OF THE MAJOR PROVISIONS OF S. 884, AS AMENDED BY THE COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

TITLE I-DAIRY

Title I establishes permanent authority for the inclusion of seasonal base—excess plans and seasonal takeout—payback (Louisville) plans in milk marketing orders (but does not extend the authority for Class I base

Title I provides for milk price support as follows: Permanent law, which requires that milk be supported at a level between 75 and 90 percent of the parity price for milk, would again become effective October 1, 1981. However, for each fiscal year in the period beginning on October 1, 1981, and ending on September 30, 1985, whenever the Secretary of Agriculture estimates for any fiscal year that net Government price support purchases of milk and dairy products will (1) cost more than \$500 million or exceed 3.52 billion pounds (milk equivalent), the minimum milk price support level at the beginning of that fiscal year would be 70 percent of parity.

Title I also requires an adjustment of the

Title I also requires an adjustment of the support price of milk upward to 70 percent of parity on April 1 of each year during the 1982 through 1985 fiscal years if the support price has fallen below 70 percent of parity.

Title I requires the Secretary, to the

Title I requires the Secretary, to the maximum extent practicable, to use authorities available to him to reduce inventories of dairy products held by the Commodity Credit Corporation (CCC) so as to reduce net CCC expenditures under the milk price support program in any fiscal year to the budget outlays for the program established under the Congressional Budget Act of 1974 for that year.

Title I extends, through December 31, 1985, the provision of law requiring the CCC to donate dairy products acquired under the price support programs to veterans hospitals and the military.

Title I extends, through September 30, 1985, the authority for the Secretary to make indemnity payments to dairy producers who sustain losses of milk contaminated by pesticides (indemnities also available to milk manufacturers), other chemical and toxic substances, or nuclear radiation or fallout.

TITLE II-WOOL AND MOHAIR

Title II extends, through December 31, 1985, the requirement for a price support program for wool and mohair, but changes the level of support for shorn wool from 85 percent to 75 percent of the price support formula set out in the National Wool Act of 1954 (the support levels for pulled wool and mohair are based on the support price for shorn wool).

Title II also deletes provisions of the National Wool Act limiting payments under the wool price support program to an amount equal to 70 percent of wool customs receipts.

TITLE III-WHEAT

Title III provides for a loan and target price program for the 1982 through 1985 crops of wheat. Loans and purchases will be made available to wheat producers at a level, not less than \$3.50 per bushel, that the Secretary determines will maintain the competitive relationship of wheat to other grains. The minimum target prices (per bushel) will be: \$4.20 for the 1982 crop; \$4.40 for the 1983 crop; \$4.60 for the 1984 crop; and \$4.80 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing wheat. Target price payments will be computed as under existing law.

Title III makes prevented planting and reduced yield disaster payments available, for each of the 1982 through 1985 crops of wheat, for producers for whom Federal crop insurance is not available. Disaster payments will be computed as under existing law. Also, the Secretary will have discretionary authority to make such disaster payments available to any wheat producer if disaster losses have created an economic emergency that cannot be alleviated by crop insurance and other assistance programs.

Title III authorizes acreage limitation and paid diversion programs for the 1982 through 1985 crops of wheat, if needed to protect against overproduction. Producers who plant wheat in excess of that permitted under an acreage reduction program will not be eligible for program loans, purchases, and payments; and participation in the paid diversion could be required as a condition of eligibility for such loans, purchases, and payments.

TITLE IV-FEED GRAINS

Title IV provides for a loan and target price program for the 1982 through 1985 crops of feed grains. Loans and purchases will be made available to producers of corn at a level, not less than \$2.60 per bushel, that the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains. Loans and purchases for barley, oats, rye, and grain sorghum will be made at levels that are fair and reasonable in relation to the level of loans and purchases for corn. Target price payments will be made available for corn, grain sorghums, oats, and (if designated by the Secretary) barley. The minimum target prices for corn (per bushel) will be: \$2.80 for the 1982 crop; \$2.95 for the 1983 crop; \$3.10 for the 1984 crop; and \$3.25 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing corn. The target prices for the other feed grains will be set at levels that are fair and equitable in relation to the target price for corn. Target price payments will be computed as under existing law.

Title IV makes prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of feed grains in the same manner as for wheat.

Title IV authorizes acreage limitation and paid diversion programs for the 1982 through 1985 crops of feed grains in the same manner as for wheat.

TITLE V-UPLAND COTTON

Title V provides for a loan and target price program for the 1982 through 1985 crops of upland cotton. Loans will be made available at the lower of (1) 85 percent of the average U.S. spot market price for upland cotton during the preceding five years and (2) 90 percent of the average Northern Europe price for upland cotton, as determined under formulas set out in the bill; however, in no case could the loan level be less than 55 cents per pound, and the Secretary could adjust the loan level upward (when it is based on the average Northern Europe price) to not in excess of the level based on the average U.S. spot market price. The loan level must be announced by November 1 of each year and could not thereafter be changed. Loans could be extended beyond

the normal ten-month term, at the producer's request, for an additional eight months unless the average price of upland cotton for the preceding months exceeded 130 percent of the average price for the preceding three years, in which event a special import quota would be proclaimed.

The minimum target prices (per pound) will be: \$0.709 for the 1982 crop; \$0.76 for the 1983 crop; \$0.85 for the 1984 crop; and \$0.93 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing cotton. Target price payments will be computed as under existing law.

Title V makes prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of upland cotton in the same manner as for wheat.

Title V authorizes acreage limitation and paid diversion programs for the 1982 through 1985 crops of upland cotton in the same manner as for wheat.

manner as for wheat.

Title V requires the Secretary to make available to producers of the 1982 through 1985 crops of upland cotton loans on seed cotton, using the authorities he has under the CCC Charter Act.

TITLE VI-RICE

Title VI repeals the provisions authorizing acreage allotment and marketing quota programs, and provides for acreage limitation and paid diversion programs for the 1982 through 1985 crops of rice that are like the programs for wheat, feed grains, and upland cotton.

Title VI also provides for a loan and target price program for the 1982 through 1985 crops of rice. The minimum target prices (per hundredweight) will be: \$11.23 for the 1982 crop; \$12.14 for the 1983 crop; \$12.70 for the 1984 crop; and \$13.50 for the 1985 crop. The Secretary could establish a higher target price for any such crop as appropriate to reflect any change in the per acre cost of producing rice. Target price payments will be computed as under existing law. Loans and purchases will be made available for each crop of rice at a level that bears the same ratio to the previous year's loan level as the target price, except that, if the Secretary determines that any such loan level will substantially discourage the exportation of rice and result in excess stocks of rice, the Secretary may set the loan rate at a lower level (but not less than \$8 per hundredweight) to avoid excessive stocks.

Title VI makes prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of rice in the same manner as for wheat.

TITLE VII-PEANUTS

Title VII revises and extends—to the 1982 through 1985 crops—the current peanut program.

Under title VI, for each of the 1982 through 1985 crops of peanuts, there will be a minimum national acreage allotment of 1,614,000 acres, and a minimum national poundage quota of 1,300,000 tons (which the Secretary may increase to meet estimated re-cuirements for domestic edible and seed uses during the next marketing year). Acreage allotments may be sold, leased, or transferred only within a county, except that, in States in which the total acreage allotment is 11,000 acres or less, transfers may be made any-where within the State. Farm poundage quotas will be determined as under current law, except that more than one year's undermarketings (excluding those prior to the 1980 crop) may be carried forward so long as the producer plants at least 50 percent of the allotment.

Title VII retains the peanut program's twotier system of "quota" peanuts (production within a farm's poundage quota) and "additional" peanuts (production within the allotment in excess of the poundage quota)

Under title VII, the penalty for marketing peanuts in excess of a farm's poundage quota will be 120 percent of the support price for quota peanuts (although additional peanuts may be placed under loans and not redeemed, or marketed under contracts with handlers for crushing or export, without being subject to penalties). State and county committees will be given authority to waive penalties for unintentional violations; and document errors in weight not in excess of one-tenth of 1 percent will generally not be considered be violations. Also, area marketing associations will have authority to sell, at prices equal to or greater than the minimum CCC sales price, additional peanuts under loan.

Title VII establishes, for each of the 1982 through 1985 crops, a minimum price support level for quota peanuts of \$631 per ton. The price support level for additional peanuts be set by the Secretary, taking into consideration demand and prices for edible oil and meal and demand for peanuts abroad. However, the additional peanut loan must be set at a level estimated to result in no

program losses to the CCC.

The Secretary will be required to make warehouse storage loans available to designated area marketing associations (except cooperatives engaged in other activities with respect to peanuts in addition to handling CCC price support operations), and to use the associations in administrative and supervisory activities relating to price support and marketing. Area marketing associations will be required to operate marketing pools for quota and additional peanuts under loan. Net gains on peanuts in any such pool will be distributed to producers in proportion to the value of the peanuts placed in the pool by each producer.

TITLE VIII-SOYBEANS

Title VIII establishes a price support loan and rurchase program for soybeans mar-keted in each of the 1982 through 1985 marketing years. Loans and purchases will be made available on soybeans at a level equal 75 percent of the average Chicago cash price for No. 1 yellow soybeans for the five marketing years immediately preceding the then current marketing year (excluding the high and low valued years), except that in no event could the support price be less than \$5.02 per bushel.

Title VIII also provides that the Secretary may not require rarticipation in any production adjustment program as a condition of eligibility for soybean price support under the bill; that 1982 through 1985 crop soy-beans will not be eligible for any storage reserve program; and that the Secretary may not make payments to producers to cover the cost of storing 1982 through 1985 crop

TITLE IX-SUGAR

Title IX establishes a price support program for the 1982 through 1985 crops of

sugar beets and sugarcane.

During the period beginning with the effective date of the bill and ending March 31, 1982, the Secretary will be required to support the price of domestically grown sugar beets and sugarcane (through purchases of processed sugar or other operations) at a level appropriate to approximate a raw sugar price of 19.6 cents per pound.

Beginning October 1, 1982, the Secretary will be required to support the price of dom stically grown sugar crops for each of the 1982 through 1985 crops through nonreco irse loans to producers, as follows:

(1) for sugar cane, at not less than 19.6

cents per pound of raw cane sugar; and
(2) for sugar beets, at a level that is fair
and reasonable in relation to the support

level for raw cane sugar.

Loans would have to be taken out and repaid in the same fiscal year.

TITLE X-GRAIN RESERVES

Title X makes a number of revisions in the farmer-held reserve program for wheat and feed grains, including the following:

(1) The establishment of a wheat reserv program would be made discretionary with the Secretary (under existing law, the Secretary is required to establish a

(2) Reserve price support loan levels could higher than the regular support level; and the requirements under existing law that the reserve loan levels for the 1980 and 1981 crops of wheat and corn be not less than \$3.30 and \$2.40 per bushel, respectively (with loans levels for such crops of the other feed grains to be set at levels comparable to the corn loan level), would be deleted;

(3) The establishment of program conditions relating to interest rates, storage payments, and other loan terms set out in the law would be discretionary with the Secre tary, rather than (as under existing law) required of the Secretary; and the requirement that the Secretary waive interest charges on loans made on the 1980 and 1981 crops of wheat and feed grains would be deleted:

(4) Storage payments could be made at levels designed to induce participation in the program, rather than (as under existing law) at levels sufficient to cover storage costs

(5) Interest rates on reserve loans could be increased as appropriate to encourage the orderly marketing of grain when the "release" level is reached;

(6) The provision in current law estab-lishing "call" levels would be deleted; al-though the Secretary could require repayment of reserve loans prior to maturity if

emergency conditions exist;

The requirements of current law that the wheat reserve be no smaller than 300 million bushels, nor larger than 700 million bushels, would be deleted; the Secretary would be authorized to place upper limits on the size of the reserves, but any such upper limit could not be less than 700 million bushels for wheat and one billion bushels for feed grains; and

(8) The generally applicable CCC sales price for wheat and feed grains when a reserve is in effect would be changed from 105 percent of the then current call level to 105 percent of the then current cost of production (including return for management and land values); and the exception to this sales price restriction relating to sales of corn used in the production of alcohol would be deleted.

Title X repeals provisions of existing law authorizing the establishment of a disaster reserve of wheat, feed grains, and soybeans.

Title X amends the provision of law relating to the CCC farm storage facility loan program to make the program permissive rather than mandatory.

TITLE XI-MISCELLANEOUS

Subtitle A-Provisions applicable to more than one commodity:

Payment limitation: Subtitle A of title XI extends to the 1982 through the 1985 crops the limitations in current law on the payments that a farmer may receive annually under the wheat, feed grains, upland cotton, and rice programs. The annual limitations are: \$50,000 for all program payments except disaster payments; and \$100,000 for disaster payments. Loan and purchase proceeds and compensation for resource adjustment (excluding land diversion payments) are not considered payments for the purpose of these limitations

Subtitle B-Other miscellaneous provi-

Subtitle B of title XI would amend a number of provisions of law relating to Department of Agriculture programs, as follows:

Grazing and hay program: extends the

special wheat grazing and hay program to the 1982 through 1985 crops;

Livestock feed: extends to poultry producers eligibility for assistance under the emergency livestock feed program established under the Food and Agriculture Act of 1977:

Farm income protection insurance: Directs the Secretary to appoint a special task force to study the concept of farm income protection insurance and the feasibility of such insurance as an alternative to current price support, income maintenance, and disaster assistance programs of the Department of Agriculture, and report to the Agriculture Committees of Congress (within 18 months) on the results of their study;

Grain inspection: Authorizes the Administrator of the Federal Grain Inspection Service to delegate his authority to perform official grain inspection and weighing at export port locations to any State agency that—
(1) performed official inspection at an ex-

port port location prior to June 1, 1976; and (2) is designated to perform official inspection at locations other than export port lo-cations on the date of enactment of the bill;

Advisory committees: Substantially revises XVIII of the Food and Agriculture Act of 1977 relating to advisory committees es-tablished within the Department of Agriculture to eliminate requirements under XVIII that are duplicative of the provisions of the Federal Advisory Committee Act;

Rural Telephone Bank: (1) increases— from \$300 million to \$600 million—the limit on the total amount of Class A stock of the Rural Telephone Bank that may be issued to the Government; and extends to September 30, 1991, the authority for the Government to purchase such stock; and (2) extends to September 30, 1995, the date after which Government stock in the Bank must be retired as soon as practicable; and

consultation: International Encourages the Secretary to continue to consult with representatives of other major comin ex ing nations on establishing more orderly marketing of grain and achieving higher farm income for grain producers.

TITLE XII-AGRICULTURAL EXPORTS

Agricultural export credit revolving fund: Title XII establishes an agricultural export credit revolving fund in the Treasury for use by the CCC to finance short-term commercial export sales of agricultural commodities, export sales of breeding animals, and the estab-lishment of handling facilities for agricultural commodities in importing countries, for market development purposes. The term of the revolving fund would expire October 1, 1985.

Congressional consultation on bilateral

Title XII requires the President to notify (at least 30 days in advance), and consult with, the Agriculture Committees of Congress on proposed bilateral agreements, other than treaties, involving commitments on the part of the United States to assure access by another country to U.S. agricultural commodities and products on a commercial basis.

Standby export subsidy:

Title XII directs the Secretary to formulate a special standby export subsidy program for U.S. agricultural commodities to neutralize export subsidy programs of other countries. The program would be implemented only if the President determines that the export subsidy program of an-other country is adversely affecting the export marketing of the U.S. agricultural commodities; a manually acceptable resolution of the matter caunot be obtained through consultation; and the special export subsidy program is authorized under dispute settlement procedures in international agreements, if any. However, title XII provides that the special export subsidy program could not be used to promote export sales of U.S. cotton.

Agricultural embargo protection: Title XII requires the Secretary to make payments or loans available to farmers in compensation for any national security or foreign policy embargo of the export of agricultural commodities to another country that is implemented after the bill is enacted, if-

(1) the embargo is not a complete embargo of all exports to the other country;

and

(2) the other country imported more than three percent of the total exports of the agricultural commodities involved during

the preceding year. The Secretary would have to make available, to producers of agricultural commodities for which price support is authorized, payments for the difference between 100 percent of parity for the commodity involved and the market price for the commodity during during the 20 day needs for the commodity during the 60-day period following the imposition of the embargo. Payments would be made available as long as the embargo is in effect, for production affected by the embargo.

An alternative to payments, if a loan program is in effect for the commodity involved in the embargo, the Secretary could make available to producers, for the period that the embargo is imposed, loans on the commodity at 100 percent of parity.

Secretary would also have the authority to implement a program that com-

bines payments and loans.

TITLE XIII-PUBLIC LAW 480

Title XIII extends-through December 31, 1985-the authority for the President to (1) make agreements to finance sales of agricul tural commodities under title I of P.L. 480, and (2) provide agricultural commodities for programs of assistance in other countries under title II of P.L. 480.

Title XIII deletes the limit of \$1.9 billion on annual appropriations to support the title I export sales program, and increases—from \$750 million to \$1 billion—the limit on annual appropriations to support the title II food assistance program. Title XIII also increases-from \$5 million to \$10 million-the annual limit on the use of title I loan repayments to meet emergency nonfood relief requirements

Title XIII adds provisions to title I of P.L. 480 to assure that countries receiving title I financing undertake self-help measures to increase agricultural production (including efforts to reduce illiteracy among, and improve the health of, the rural poor) so as to benefit needy people in such countries.

Title XIII provides authority for the domestic distilled spirits industry to participate in foreign market development under P.L. 480.

TITLE XIV—RESEARCH, EXTENSION, AND TEACH-ING IN THE FOOD AND AGRICULTURAL SCIENCES

Title XIV makes a number of amendments to the National Agricultural Research, Extension, and Teaching Policy Act of 1977 and related statutes.

Findings:

Title XIV revises the findings contained in the 1977 Act to emphasize the importance of the Federal-State partnership in the conduct of agricultural research, extension, and teaching; a strong basic research program; and long-range planning to meet national agricultural research, extension, and teaching objectives.

Joint Council on Food and Agricultural Sciences:

Title XIV extends the term of the Joint Council on Food and Agricultural Sciences to December 31, 1986, and sets the membership of the Joint Council at not fewer than 25 members. At least one-half of the membership would be representatives of land grant colleges and universities, and two of the members would be representatives of other colleges and universities.

Title XIV provides that the primary responsibility of the Joint Council will be to bring about more effective agricultural research, extension, and teaching by improving the planning and coordination of such activities and by relating Federal budget development and program management to such activities.

National Agricultural Research and Exten-

sion Users Advisory Board:
Title XIV extends the term of the National Agricultural Research and Extension Users Advisory Board to December 31, 1986, and increases the number of members from 21 to 25, including eight members who are producers.

Assistant Secretary of Agriculture:

Title XIV authorizes an additional Assistant Secretary of Agriculture to manage re-search, extension, and teaching activities in the Department of Agriculture

Competitive, special, and facilities grants for agricultural research:

Title XIV provides authorizations for appropriations of \$50 million annually for each

of the 1983 through 1987 fiscal years for the competitive grants program under Public Law 89-106.

Title XIV makes forestry schools receiving funds under the McIntire-Stennis Act and accredited colleges of veterinary medicine eligible for special grants under Public Law 89-106, and includes among the types of re-search programs that will be eligible for special grants program that facilitate coordination and cooperation of research among

With respect to the research facility grant program under Public Law 89-106, title

(1) limits eligibility for grants to projects) to renovate or refurbish research facilities or acquire equipment, or (b) for new construction of auxiliary facilities or fixed equipment used in research; and

(2) makes forestry schools and 1890 land grant colleges eligible for the grants.

Agricultural research facilities:

Title XIV provides authorizations for ap-propriations of \$31 million annually for each of the 1983 through 1987 fiscal years for the grant program under Public Law 88-74 (the Research Facilities Act)

Higher education in the food and agricultural sciences:

Title XIV directs the Secretary to promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs; and transfers to the Secretary all the functions and offices of the Secretary of Education and Department of Education under the Second Morrill Act (relating to 1890 land grant col-

Title XIV provides authorizations for appropriations of \$50 million annually for each the fiscal years 1983 through 1987 for grants and fellowships for food and agricultural science education.

Biomass energy research:

Title XIV extends—to the 1983 through 1987 fiscal years—the authorization for appropriations for the biomass energy research program under section 1419 of the 1977 Act. The total amount that could be appropriated for the program over the 10-year period ending with fiscal year 1987 would be \$40 million; and no more than \$5 million of such funds could be awarded to the colleges and universities of any one State.

Expanded food and nutrition education: Title XIV provides that, beginning with fiscal year 1982, any funds appropriated for the expanded food and nutrition education program in excess of amounts appropriated in fiscal year 1981 will be allocated as

(1) four percent will be available to the Secretary for administration;

(2) ten percent of the remainder will be distributed equally among the States; and
(3) the remainder will be distributed un-

der the formula provided in existing law.

Also, the Secretary could retain up to two percent of appropriations (up to the amount

appropriated for the program in fiscal year 1981) for use in conducting the program in States that did not participate in the program in fiscal year 1981.

Extension at 1980 colleges:

Under title XIV, effective beginning in fiscal year 1982, the authorization for annual appropriations to support extension work at the 1980 land grant colleges eligible for funding under the Second Morrill Act would be increased from four percent to five and one-half percent of the amount annually appropriated for extension work under the Smith-Lever Act.

Authorizations for appropriations: Title XIV provides authorizations for ap-propriations for agricultural research and extension programs for each of the 1983 through 1987 fiscal years as follows:

(1) For agricultural research and teaching programs (other than research at State agri cultural experiment stations) for which there are no specific appropriation authorizations-

\$780 million for fiscal year 1983, \$835 million for fiscal year 1984, \$890 million for fiscal year 1985, \$945 million for fiscal year 1986, and \$1 billion for fiscal year 1987.

(2) For agricultural research at State agricultural experiment stations

\$230 million for fiscal year 1983, \$240 million for fiscal year 1984, \$250 million for fiscal year 1985, \$260 million for fiscal year 1986, and \$270 million for fiscal year 1987.

(3) For the extension programs of the Department of Agriculture

\$360 million for fiscal year 1983, \$370 million for fiscal year 1984, \$380 million for fiscal year 1985, \$390 million for fiscal year 1986, and \$400 million for fiscal year 1987.

Title XIV also provides that not less than 25 percent of the funds (1) appropriated for cooperative research under the Hatch and McIntire-Stennis Acts, the special and competitive grants program under Public Law 89-106, the animal health research program under subtitle E of the 1977 Act, and the native latex research program, and (2) appropriated under the Agricultural Research heading, must be appropriated for agricul-tural research at State agricultural experiment stations.

Contracts, grants, and cooperative agree-

Title XIV authorizes the Secretary to enter into contracts and cooperative agreements, and award contracts, to further the agricultural research, extension, and teaching programs of the Department of Agriculture without regard to competitive bidding and other procurement requirements of Federal law.

Title XIV also authorizes the Secretary to transfer equipment and other personal property to persons with whom the Department of Agriculture has entered into such con-tracts or cooperative agreements, or to whom the Department has awarded such grants when the person pays for the property with contract, agreement, or grant funds and the Secretary determines that the transfer will further the agricultural research, extension, or teaching objectives of the Department.

Indirect costs and tuition remission:

Title XIV provides that no funds appropriated (1) under the animal health and disease research and 1890 college research and extension provisions of the 1977 Act, or (2) to carry out the Hatch Act, the Smith-Lever Act, or the McIntire-Stennis Act, may be used for the payment of indirect costs or tuition remission.

Rangeland research: Title XIV authorizes the Secertary to make grants to land grant institutions, State agricultural experiment stations, and other qualified institutions to carry out research to improve the production and quality of rangeland forage for livestock and wildlife. The grant program would be operated on a matching fund basis, with States required to supply 50 percent of the funding for the research. Up to \$10 million would be authorized to be appropriated annually for the program.

Section 32 funding:

Title XIV amends section 32 of the Act of August 24, 1935, which appropriates to the Secretary in each fiscal year an amount equal to 30 percent of customs receipts during the preceding calendar year, for operations to encourage exports and domestic consumption of agricultural commodities and reestablish farmers' purchasing power. Title XIV would permit the Secretary also to use sections 32 funds to support agricultural research, ex-

tension, and teaching. Excess Federal property:

Title XIV authorizes the Secretary to obtain excess Federal personal property and furnish it to State and county extension services, State agricultural experiment sta-tions, 1890 land grant colleges, McIntire-Stennis forestry schools, and institutions performing animal health and disease research eligible for funding under subtitle E of the 1977 Act. Title to such property would be retained by the Federal Government.

Rural development and small farm research

and extension:

Title XIV revises and extends the rural development and small farm research and extension programs under title V of the Rural Development Act of 1972.

Title XIV-

- (1) establishes new authority for a special program to strengthen research and education on national and regional issues in rural development:
- (2) provides a general authorization for appropriations under title V, and deletes the formula for allocation of small farm research and extension funds; and
- (3) provides that no State may receive more than \$75 thousand under title V in any fiscal year until all States have received \$75 thousand.

TITLE XV-RESOURCE CONSERVATION

Soil and water conservation policy:

Subtitle A of title XV reaffirms congressional policy to promote soil and water conservation, improve the quality of the Nation's water, and preserve and protect natural resources through the use of effective conservation and pollution abatement programs; and requires the Secretary to submit a report to Congress by December 31, 1981, setting forth a comprehensive soil and water conservation policy.

Special areas conservation program:

Subtitle B of title XV requires the Secre tary to establish a conservation program directed toward identifying and correcting severe and chronic erosion-related or water management-related problems in special areas designated by the Secretary. The program will provide technical and financial assistance to landowners and operators (in special areas that are designated by the Secretary during the 10-year period following enactment of the bill) to effectuate conservation measures set forth in approved conservation plans. The financial assistance, which may also be provided to compensate for lost income due to crop adjustments, is to be provided on a cost-sharing basis under contracts with landowners and operators. The Secretary could use the services of State, county, and local agencies in carrying out the program, and would be required to evaluate the program and report to Congress by January 1, 1986, and every year thereafter on the operation of the program. Participation in the program would not disqualify a person from receiving benefits under other Department of Agriculture programs.

Amendments to the small watershed program and the Bankhead-Jones Farm Tenant

Subtitle C of title XV makes Indian tribes and tribal organizations eligible to sponsor small watershed projects, and exempts watershed projects that cost the Federal government \$5 million or less from congressional approval requirements (under present law, the exemption is limited to projects involving costs of \$1 million or less)

Subtitle C also provides for energy resources conservation to be included as an element in watershed project agreements, and will allow the development of energy resources to be considered in land conservation and use projects eligible for cost sharing under the Bankhead-Jones Farm Tenant Act.

Reservoir sedimentation reduction pro-

gram:

Subtitle D of title XV authorizes the Secretary to establish a five-year pilot program to determine the feasibility of reducing excessive sedimentation in publicly-owned reservoirs through the implementation of conservation measures in the watershed drainage areas of the reservoirs. Sedimentation reduction plans for reservoirs would be developed under agreements with State and local agencles. However, the plans could be implemented only after approval by the agriculture committees of Congress.
Volunteers for conservation:

Subtitle E of title XV authorizes the Secretary to use volunteers in connection with conservation work carried out by the Soil Conservation Service.

Resource conservation and development

Subtitle F of title XV requires the Secre tary to establish a resource conservation and development program designed to assist States, local units of government, and nonprofit organizations in developing and implementing plans of land conservation and water management in designated rural areas. Under this program, technical and financial assistance (including cost sharing for works of improvement) will be provided to not more than 225 designated areas. Subtitle F authorizes appropriations, during fiscal years 1983 through 1987, of sums necessary to carry out the program.

Agricultural land protection policy:

Subtitle G of title XV contains provisions to assure that the importance of agricultural land as a national resource and the need to preserve the Nation's agricultural land base are recognized and considered in administration of Federal law and regulations. Subtitle G will require Federal agencies, except in the case of national defense or other overriding national interest, to consider appropriate alternatives before taking any action that would result in the conversion of agricultural land to nonagricultural purposes. Subtitle G will not regulate or affect any nonfederal action or use with respect to agricultural land.

Local search and rescue operation:

Subtitle H of title XV authorizes the Secretary to use the personnel and equipment of the Soil Conservation Service to assist in local search and rescue operations in disaster situations, when such assistance is requested by local officials.

Reclamation:

Subtitle H of title XV authorizes the Secretary to implement experimental reclamation treatment projects under the Surface Mining Control and Reclamation Act of 1977 on a hydrologic unit basis, rather than on individual land parcels of limited acreage, if he determines that treatment of the land on a hydrolic unit basis will achieve a greater reduction in the adverse affects of past surface mining practices.

Mr. HELMS addressed the Chair. The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield to the distinguished Senator from Indiana, who has made such a fine contribution to the work of the committee this year.

The PRESIDING OFFICER. The Sen-

ator from Indiana

Mr. LUGAR. Mr. President, I wish to make a brief opening statement.

While the Congressional Budget Office is suggesting that the Federal deficit in fiscal 1982 could reach \$80 billion, and while the President is ordering Cabinet members to cut a further 10 percent of their budgets for next year, the Senate Agriculture Committee has presented to the full Senate a 4-year farm bill which exceeds the first concurrent budget resolution by at least \$1.5 billion.

At a time when American farmers and all other citizens are deeply distressed about extraordinarily high interest rates and runaway deficit spending, a farm bill is presented in the name of helping farmers which runs absolutely counter to the Nation's need to cut spending and cut interest rates.

The farm bill is well beyond all budgetary limits because it is a collection of target price supports and other special provisions designed to shore up prices for various commodities which violate not only market economic ideas but any sense of basic fairness among farm groups.

The Senate Agriculture Committee met throughout last week, fashioning a bill to satisfy every Senator who serves as an advocate for a particular crop. Committee members hope that a unanimous consensus might convince the Senate that fairness has been achieved, and that American agriculture will necessarily be well served by any legislation which has been considered by this committee over the course of so many months.

The original administration farm bill had an estimated cost of \$9.197 billion over the course of the next 5 years. Senate bill 884, the product of the committee markup, has a 5-year estimated cost of \$13.007 billion, some 40 percent greater. Even this figure, and all estimates throughout the committee's proposal, are purely speculative because of the presence throughout S. 884 of target price programs, legally obligating Government to make deficiency payments to all qualified farmers whenever specified conditions exist.

If the Senate is serious about assisting President Reagan to gain a handle on a runaway budget, and serious about considering decreases in defense expenditures and additional cuts in vital social programs, this debate must have a very different and more constructive focus.

In order to assist that process, I plan to offer a series of amendments which would abolish target price supports. In each case, I will offer as substitute langauge the original administration proposal that the Secretary of Agriculture be given full authority to grant loans and make purchases in accordance with prevailing economic and budgetary circumstances throughout fiscal years 1982-85.

The administration sought the end of the target price supports because they expose the Federal Treasury to extraordinary and completely unpredictable costs, and because they encourage overproduction of commodities already in substantial supply. That was a good idea last spring. In view of today's interest rates and renewed concern about deficits, it is even more budget important.

A major reason for the deficits and high interest rates we face today is the prevalence of uncontrollable entitlement throughout the Federal programs budget. This is no time to be creating a host of new "uncontrollables." If we are to have any chance of budgetary control, the Secretary of Agriculture must be able to assume a management and not just a cashier's role. He must have a full gamut of options to maintain farm income while restraining overall spending.

I will also introduce an amendment to abolish the current peanut program and substitute for it a loan program comparable to those I am recommending for wheat, soybeans, corn, and other crops. I will support those who advocate the termination of a sugar program which the administration originally opposed.

I continue to favor farm loan rates which give basic income security to producers, strong agricultural research programs, very strong efforts by the USDA to boost export sales, and programs which encourage a farmer-held grain reserve.

As a member of the Agriculture Committee, I represent a State which ranks sixth in the Nation in crop production. Indiana farmers know that there can be no substantial increase in net farm income until interest rates come down and Federal deficit spending is under firm control.

Indiana farmers are eager to join farmers from all other States in putting strong pressure on the USDA and the Department of State to move much more vigorously in the sale of American farm products abroad. Indiana farmers resent attempts by special interests in American agriculture to carve out special support of agricultural production which makes inefficient use of valuable energy and water supplies.

I hope that our efforts during this debate will give some encouragement to the President, other Members of Congress, and the rest of the country that we are not engaged in business as usual here. I hope to give to my fellow Senators a chance to vote for reforms in agricultural legislation which are long overdue.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER (Mr. HAYA-KAWA). The Senator from North Carolina.

Mr. HELMS. I yield to the distinguished Senator from Mississippi (Mr. COCHRAN), without whom I do not think we would have a farm bill. I want to express to him, through the Chair, my appreciation for the fine work he has done.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN. Mr. President, I thank the distinguished chairman of the Senate Agriculture Committee for his fine words and also for the leadership which he has provided to the committee and to the Senate in putting together this very important piece of legislation.

He and the Senator from Kentucky (Mr. Huddleston) have worked very hard to bring to the floor a bill that attempts to meet some of the critical needs facing

American agriculture.

At the outset, I might say that even though the legislation is called an omnibus farm bill, that title might really be misleading to the extent that the economic well-being of agriculture is not dependent just on what is in this legislation. It is affected in large measure by not only our own domestic economy, but world economies, economies of other nations. Therefore, farmers are really affected by many events which are not directly related to agriculture but which, nonetheless, may have a major impact on farm income.

In spite of the difficulty of bringing to the floor a bill that seeks to do what has to be done if we are to have an economically healthy agricultural economy, I think great strides have been made in this legislation to move in that direction.

The farm bill, with its commodity programs and other provisions, is the cornerstone of our Government's effort to provide protection from economic disasters associated with weather-related swings in production, to help protect our soil and water resources, to develop and expand our markets, and to improve agricultural productivity.

While these are major problems which must be addressed through legislation, farm programs alone cannot guarantee economic health to American agri-

One of the major problems faced by farmers has been, and still is, the rapid rise in the cost of production. In a word, inflation. Farmers are not able to pass higher costs to buyers in the form of increased prices. They simply have to take what supply and demand conditions dictate the market prices to be. So in the short run, farmers simply have to absorb higher production costs which result in lower net income.

We saw some of the lowest net income figures for farmers last year, and projected for this year, that we have seen since the Depression. They have been hit hard by inflation, and they get it twice when other businesses sustain that impact only once: First, when their production costs go up, and again when they try to live off the income they have left.

A review of the expense side of the farm income account reveals what has been happening to farmers and why it is so important that inflation be brought under control.

Farmers spent \$132 billion in 1980 to produce this Nation's food and fiber. This represents an average increase in the prices paid by farmers of over 12 percent per year since 1977. If the rate of increase in input costs had been only 6 percent during the same period, farmers could have produced the same goods for \$111 billion. This would have been a reduction in cost of \$21 billion, and such a reduction would have more than doubled the \$19.6 billion in net farm income in 1980.

Mr. President, I think it is clear from that reference and illustration that farmers have a major stake in the success of President Reagan's economic recovery program and the effort to reduce interest rates which have a stranglehold on many farmers who have to finance

planting every year.

At the time the bill S. 884 was reported, it was consistent with the budget ceilings, the spending ceilings, recommended by the President and approved earlier by the Senate. Since then, though, further adjustments had to be made in our effort to bring these spending projections under closer control.

These have been worked out now and will be offered in the form of a committee amendment which this Senator intends to support. While some further reductions are made in the target prices, the bill provides a basic level of price and income support necessary to protect farmers from sharp swings in market prices caused by uncontrolled fluctuation in production. They are set at levels below cost of production and thus do not guarantee farmers a profit, nor will they interfere with the ability of the market to allocate resources.

In addition, the bill contains provisions which allow the Secretary of Agriculture to bring supply and demand into line when stocks become excessive and prices are thereby depressed. He will have this at his disposal, perhaps to expand demand and reduce supply. Either one will strengthen prices when they are depressed.

I think the committee has been responsible, Mr. President, under the leadership of Senator Helms and Senator HUDDLESTON. There are obviously areas in this bill each of us would like to change, but like any comprehensive piece of legislation the details were worked out through necessary compromise and after considerable debate.

I plan to join the managers of this bill, Mr. President, in resisting any amendments which change the basic structure of the bill.

I thank the Senator from North Car-

olina for yielding.

Mr. HELMS. Mr. President, I thank the distinguished Senator from Mississippi. He has properly outlined some of the problems that those of us who worked on this bill necessarily had to confront. I certainly would not imply any criticism of any Senator who offers any sort of amendment to this bill; however, as the Senator from Mississippi has eloquently stated, the committee had the responsibility of moving the farm program toward market orientation and doing it under the most severe budget restraints and doing it at a time when farmers throughout this country are facing economic collapse on a very personal

I could offer 50 amendments to this bill which would read well in Peoria or some other place and would sound good, and I could take a position now of doing something great for the country, but the last time I checked, most Americans had a habit of wanting something to eat three times a day. If the farmers are sent the rest of the way down the tube by overt action in terms of this farm bili, by our going too far too fast, we could very well face a tough situation in America in terms of food production. I do hope that Senators will take a close look at what agricultural exports do in terms of the balance of payments.

Mr. President, the general philosophy of the Senator from North Carolina is pretty well known. I say to the Chair and to other Senators present that if I had been a Member of the Senate x number of years ago, when this program or that program was adopted, I probably would not have agreed with it, but the fact is that these programs are in place. The fact is that farmers all over this country, independent as they are, must necessarily depend on these programs as they are being tapered off and as we

move toward a more fully market-ori-

ented agricultural sector.

That is precisely what the distinguished Senator from Mississippi was saying, that we have had substantial movement through this bill and the package of amendments or modifications which Senator HUDDLESTON and I shall offer a little later on this afternoon. We are trying desperately to meet every possible objection to this bill. I think that we will meet most reasonable objections. Certainly, we shall do our best. Perhaps we lack the wisdom of Solomon, but we shall come as close to it as we

This is all by way of saying, Mr. President, that a number of controversial concepts and topics were considered by the committee, and I hope that, in the ensuing debate on this bill, Senators may understand the reasoning which the committee used in each case.

Mr. President, I yield to the distinguished Senator from Alabama.

The PRESIDING OFFICER. The Sen-

tor from Alabama is recognized.

Mr. HEFLIN. Mr. President, I join with my other colleagues on the Committee on Agriculture, Nutrition, and Forestry in a call for the enactment of the Agriculture and Food Act of 1981 as recommended by our Committee on Agriculture, Nutrition, and Forestry.

It has been my good fortune to serve on the Committee on Agriculture, Nutrition, and Forestry in this Congress. It is a committee of dedicated Senators who represent 17 States in which farmers and ranchers produce nearly all of the hundreds of different commodities which are grown, marketed, and feed and clothe the people of this Nation and much of the hungry world as well.

I commend the chairman of the committee, the senior Senator from North Carolina (Mr. HELMS) for his leadership, perseverance, patience, and for the manner in which he has presided over the development of S. 884. I think the record will likely show that under the chairmanship of the distinguished Senator from North Carolina, the committee held the most exhaustive and extensive markup sessions that have ever been held or undertaken by the committee in the quest to develop a sound farm program within strict budgetary limitations. Everyone that wanted to have a say with respect to any feature of S. 884 was given the full opportunity to make his or her contribution and every amendment or suggestion which was propounded was the subject of careful and deliberate consideration.

I believe altogether there were 24 markup sessions. The Department of Agriculture was invited to participate, to be present, as they were during the markup. They were asked of their position in regard to this as to each and almost every provision in the bill as it was being marked up. For some reason or another they chose not to become involved in the process and wanted to follow a different process. The opportunity was available for them in any and every aspect of it to make suggestions and, of course, they would not be bound by it, but rather they adopted a mood of aloofness or "We will not participate" in these 24 sessions. which I feel is sort of an effort to really not go through the committee process.

I also commend the distinguished ranking minority member of the committee, the Senator from Kentucky (Mr. Huddleston), for his personal leadership in helping to fashion the new farm bill. I know of no person who is more dedicated to seeing that the farmers of this great Nation receive a decent and fair income for their labors. Senator HUDDLEston's service on the committee is to be looked upon as an example of the highest type of public service.

As has been said in this Chamber today, S. 884 is not legislation of partisan design, but rather of bipartisan cooperation. Since I have been in the Senate, I have never seen a group of Senators work in such an atmosphere of cooperation and bipartisanship of give and take. The members of the committee have given their best efforts to forge a bill which will assure Americans of plentiful supplies of food and fiber at reasonable costs while at the same time would be fair and equitable to farmers.

Mr. President, like the other members of the committee, I wish to see greater price protection offered our farmers. I wish to see an increase in the authorization for the expenditure of Federal funds for price supports. I wish to see other changes made in the bill-changes which would benefit not only the farmers of my State of Alabama, but which would benefit every agricultural producer in every part of our Nation. But, Mr. President, I, and the other members of the committee, fully realize that we cannot make such changes and stay within the limitations of the Federal budget. As the report on S. 884 states:

The legislation adopted by the Committee reflects the fact that 1981 was the first year in memory in which severe budgetary constraints were such a prominent factor in the consideration of farm policy. The Committee went to great lengths to fashion a farm bill that would not result in unacceptably large Federal outlays.

I think it should be emphasized. Mr. President, that our work did not stop with the committee markup of S. 884. We went further. In order to make the bill

more palatable and more in line with conditions which have changed since the bill was marked up and reported last spring, the committee has, in recent days, made additional downward spending adjustments. This was not an easy task. I cannot think of a single member of the committee who relished the necessity of making further spending decisions. The record will show, however, that reductions were made in every commodity program. This again points up the bipartisan accord and cooperation, oneness if you will, that exists in the committee.

It should be remembered throughout the floor debate on S. 884 that this legislation is in no way a profit guaranteeing bill. All the measure does is simply recognize the necessity for the food and fiber producers of this country to recover minimum costs of production. I repeat, Mr. President, S. 884 does not assure profits to the farmer-only the means to continue producing toward the goal of realizing a return is reflected in the provi-

sions of the measure.

Therefore, with all the earnestness I can command, I urge the Senate to preserve the delicate balance between the interests of producers and consumers which has been achieved by the committee and to pass the measure promptly without undercutting amendments which would be designed to reduce farm

Although S. 884 does not contain all of the provisions which I feel are necessary to round out our farm program, it does contain many feaures which are designed to give the American farmer a fair return on his investment, skills, and labor, if the opportunities for farmers in domestic and world markets come to fullest fruition. For example, continuation of the target price system and loans as market stabilizing, and loss-reduction mechanisms for most of the principal commodities is a major achievement. The bill also makes preventive planting and reduced yield disaster payments for wheat, feed grains, cotton, and rice. I support the thrust of the Federal Crop Insurance Act of 1981, and I am hopeful that in time this new crop insurance protection program will be expanded to the point where no additional protection likely will be needed by growers. Until the program is fully in place, however, I believe it is necessary to provide some discretion with the Secretary of Agriculture to authorize and make disaster pay ments under certain conditions, including natural disasters, to alleviate an ecoomic emergency and thereby prevent a farmer from financial ruin. At my suggestion, a proviso along this line was inserted into S. 884, but I still feel that this is one area of S. 884 that needs to be strengthened.

I have no doubt that officials of the Federal Crop Insurance Corporation and their designated agents are doing their dead-level best to phase-in the new allrisk crop insurance program. On the other hand, in my discussions with farmers and farm groups in Alabama this year, it is readily apparent that there are several problem areas relating to the implementation of the new program. For example, because of the complexity of the program and the lack of familiarity and experience many FCIC agents display in attempting to explain the program, there is a great deal of misunderstanding among farmers concerning the program. We further weakened emergency and disaster relief for farmers in the reconciliation process just before the Independence Day recess of the Congress by increasing interest rates for farmers applying for disaster loans and by limiting the amount that may be loaned under the program to such amounts as are provided in advance in appropriation acts. I am terribly afraid that the crop insurance and disaster programs for protecting our commodity growers from the economic perils which can result from natural disaster will prove to be limited in scope and ineffective in dealing with uncontrollable con-

Mr. President, the farmers of Alabama and the communities of my State which depend upon farm income as their principle economic base have a particular interest in several of the commodity programs set forth in the provisions of S.

It may come as a surprise to many people, but wheat is being grown more and more in Alabama as a cash crop. This year Alabama wheat growers will harvest some 600,000 acres of wheat. Much of this land, incidentally, is double-cropped with the second commodity being primarily soybeans. The growth of America's soybean crop in recent years in Alabama and elsewhere is indeed dramatic. For example, 15 years ago soybeans were grown on 240,000 acres in Alabama. It is estimated, however, that Alabama farmers this year will plant 2.3 million acres in soybeans.

Soybeans are the number one cash crop of this Nation and the number one cash export of the United States. In 1979, the latest year for which official statistics are available, more than \$.75 billion of U.S. soybeans went into the export market. The record will show, however, that the tremendous rise in soybean production in our Nation has not resulted from increased yields, but from expanded acreage.

In contrast to certain other agricultural commodities such as corn, whose yield has increased from 26 bushels per acre in 1929, to approximately 110 bushels per acre today, average soybean yields have increased only about one-fourth bushel per acre annually over the past quarter of a century.

This, to my way of thinking, points out the need to increase soybean yields through research and by increasing the efficiency of our farmers through grower education. A few weeks ago, specifically on June 19, the distinguished senior Senator from Indiana (Mr. Lugar) conducted a hearing in his capacity as chairman of the Senate Subcommittee on Agricultural Research and General Legislation on S. 1295, a bill I have introduced to establish a soybean research institute. The purpose of this bill is to focus attention on the importance of soybeans as a source of food and to step up programs designed to improve the production and marketing practices of this remarkable legume.

A little later on during the course of Senate action on S. 884, I intend to offer a revised version of S. 1295 as an amendment to the farm bill. This amendment will in no way encroach upon the freedom of soybean producers and their representative organizations. It is merely intended to be a means whereby the soybean industry, the Federal Government, and other interested disciples may join hands and work together toward the desired goal of achieving the full potential of the soybean.

Although cotton is no longer the leading cash crop in Alabama, it is still grown abundantly in my State. In fact, sales of Alabama-produced cotton ranks eighth among the States in terms of cash receipts.

Under the new farm bill the minimum target price for cotton will be 71 cents a pound for the 1982 crop year. The target will increase 76 cents, 83 cents, and 89 cents for the 1983, 1984, and 1985 crop years, respectively. In addition, the bill vests in the Secretary of Agriculture the authority to increase these levels for any such crop to reflect changes in production costs.

The loan level for cotton generally would be calculated as under present law, but in no case could the loan level be less than 55 cents a pound. I should like to stress to the Senate a new feature in connection with the establishment of the cotton loan which will be of interest to those interested in a market-oriented farm program.

Under the loan formula the loan rate for cotton is established for strict law middling 116 inch cotton. Also, the Department of Agriculture publishes a schedule of premiums and discounts. which, added to or subtracted from the base loan rate, establishes the loan rate for other grades and staple lengths of cotton. In the past the method of establishing the quality differentials in the loan-rate schedule has been done administratively by the Agriculture Department with no guidance or oversight by the Congress whatsoever. Unfortunately, as presently administered by the Agriculture Department, the loan differences for the cotton program are not based upon the market-oriented agricultural principles inherent in S. 884.

Mr. President, not only do the loan values assigned by the Agriculture Department bear no relationship to the actual market value of poor quality cotton, they also discriminate against cotton farmers who produce good quality cotton. This is so because through artificial loan discounts the Department of Agriculture is arbitrarily establishing a false criteria for determining the actual market value of poor quality growths of cotton, thereby leading to a weakening of cotton prices in general.

It is my belief that the premiums and discounts established annually for the cotton loan program should be based as closely as possible on the differences paid in the marketplace for the preceding crop. Accordingly, during markup, I introduced an amendment to the upland cotton section of the bill which sets forth the procedure to be followed by the Department of Agriculture to arrive at the

loan differences for the various qualities of cotton.

Mr. President, at this point I should like to read the committee report language which explains this amendment, but before doing so I should like to express my appreciation to the distinguished senior Senator from Iowa (Mr. JEPSEN) for the strong endorsement he gave the amendment in committee. I would also be remiss in my remarks about my amendment and, in fact, the entire cotton program, if I did not also express my gratitude to the junior Senator from Mississippi (Mr. Cochran). The farmers of America, particularly cotton and rice growers, have no greater friend than Than Cochran. And I believe that as Senator Cochran continues to grow in stature and service his name will stand near the top of Senators who have authored and worked for meaningful farm programs.

The Senate, in the past, has had some Senators who were very much interested in cotton. They had from Alabama a Senator by the name of Heflin who was known as Cotton Tom Heflin. In South Carolina they had a Senator by the name of Smith, and he was known as Cotton Ed Smith. I predict that Senator Cochran will be known in the not too distant future as Cotton Than

As I have previously stated, Mr. President, I should like to quote the committee report language relative to my amendment requiring the Secretary of Agriculture to establish premiums and discounts under the cotton loan program pursuant to an established formula:

The Committee believes this amendment addresses an inequity now existing in the cotton loan program. The amendment provides a formula to be followed by the Secretary of Agriculture to set on a market-oriented basis the ratio adjustment of premiums and discounts for cotton.

Under current law, for cotton, the Secretary has full discretionary authority to establish these premiums and discounts using various weightings of current market averages and loan values from the preceding year to establish the discounts and premiums for loan rates for the various grades of the upcoming cotton crop. This has frequently resulted in the establishment of artificially high loan rates for lower-quality cotton. Thus, in some instances, it may be more profitable to produce lower grade cotton to be used as collateral for a Commodity Credit Corporation (CCC) price support loan than it is to produce cotton for market consumption. When large quantities of these lowerquality cottons are produced and used by the producers as collateral to receive a CCC price support loan at rates which do not reflect true market value, it may create a distorted cost exposure to the CCC. If the cotton is forfeited, when it is sold by the CCC, the price realized by the agency must, under law, reflect the inflated loan value.

This amendment establishes the equal weighting of market differentials with prior loan rates for all grades of cotton; thus, if prices are strong one year for a particular quality of cotton, the loan program differences for the next year will reflect that demand and strong price for that quality to greater extent than recent USDA procedures have done. The amendment moves cotton into the market-oriented concept of this legislation and could result in the savings of millions of dollars each year in CCC budget exposure in the cotton loan program.

Mr. President, although I feel that the premiums and differences established annually for the cotton loan program should be based as closely as possible on the differences paid in the marketplace for the preceding crop, I did make provision in the amendment for the Secretary to blend in the loan differences for the preceding crop when determining the premiums and discounts for grade, staple and micronaire so as to give the Secretary some flexibility in this area.

One of the most important objectives of the farm bill is to emphasize the need for greater exports of farm commodities produced in our Nation. I endorse and applaud the avowed intention of the administration to pursue an aggressive program to develop and expand foreign agricultural markets for the bounty of American agriculture. Farm products are a major asset of our Nation in foreign trade and international relations. Export markets have become a major means of U.S. farm income and, as the record shows, the single greatest contributor to our Nation's international trade balance. I think it is widely recognized that our foreign trade debt would be a total shambles if not for the agricultural sales abroad.

Because the tremendous importance of foreign markets to the income of the producers of U.S. food and fiber, I am especially pleased with the mandate in S. 884 providing embargo protection to American agriculture. As stated in the committee report, we do not feel that the U.S. farmer should be singled out to absorb the economic brunt of a foreign policy decision. Under the provisions of S. 884, the embargo protection program would trigger when national security of foreign policy embargoes and trade suspensions are selectively applied to farm commodities. If such an embargo or trade suspension does occur, the Secretary of Agriculture is affected to set commodity loan rates at 100 percent of parity on an interest-free basis at the time of the embargo, or, in the alternative, the Secretary could operate a deficiency-payments program that would entitle farmers to payments representing the difference between 100 percent of parity and the average market price of the commodity for the 60-day period following the imposition of the embargo.

In closing, Mr. President, I should like to briefly discuss the peanut section of S. 884. Like every other section of S. 884, the peanut program was not conceived out of selfish or sectional interest nor was it the product of a single political party. The committee devised and laid down the basic programs in the legislation with bipartisan accord. We worked collectively within severe budget constraints to create a bill which would assure Americans an adequate supply of and fiber while at the same time providing incentives to our farmers to apply their capabilities to the fullest with a degree to independence based on market demand. It is in this context that the commodity provisions of S. 884 must be judged and it is in this framework that the peanut program meets the

The peanut program set forth in the provisions of S. 884, as amended by the committee package of amendments, is in essence, an improved and modified reauthorization of the program established in the 1977 Farm Act when changing conditions made clear the need to make extensive revisions in the old pro-With the exception of making needed upward adjustments in minimum price supports to help offset rapid increases in the cost of production, the 1977 peanut program has, for the most part, worked well. A devastating drought which ravaged the entire peanut belt was the first time in a quarter of a century that we have experienced a crop shortfall. Surely, all will agree that the 1981 short crop was certainly not the fault of growers or the program.

It should be noted, Mr. President, that the peanut program does not have a target price mechanism and, therefore, no Federal funds are used for deficiency payments to peanut producers. In addition, there are no Federal outlays for set-asides or land diversion payment programs and because peanuts are a semiperishable commodity, there is no Federal expenditure requirement for reserve programs. In fact, during the 3year period, 1978-80, program costs have declined 69 percent when compared to the 3-year period immediately prior to the peanut program enacted in the 1977 Farm Act. Thus, we see that the 1977 program has been highly effective in reducing taxpayer costs. More important, S. 884 as amended by the committee package will reduce program costs to zero. There are also other changes in the committee package of amendments which, I feel, will allay the other concerns which have been expressed rela-

tive to the peanut program.

Mr. President, I feel strongly that S. 884 should be passed by the Senate without substantive change. I say this not in the belief that this bill is in any way perfect, but because I know personally of the many compromises which have been made during the development of the legislation, including the most recent deliberations which resulted in the committee package of amendments, in order to make the measure fiscally responsible. Mr. President, it is my intention to oppose any and all amendments which may be offered during the course of Senate debate on S. 884 to reduce commodity programs further. With this bill, our committee and American agriculture have met their obligations to achieve the changes in Federal spending policy necessitated by the current economic

Our farmers and our farm families represent the base of rural America. Agriculture was one of man's first employments and it is still the wellspring the basic necessities of life. The bill now before us will have a profound effect upon the livelihood of thousands of farming families, as well as the State and communities that depend on them. For these and other reasons, I urge passage of S. 884.

At this time I yield to the distinguished Senator from Nebraska (Mr. ZORINSKY).

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from Nebraska. Mr. ZORINSKY. I thank the Chair.

Mr. President, when the Senate Agriculture Committee met for some 25 sessions last spring, the task before us was not an easy one. We were to devise comprehensive farm legislation for the next 4 years. To construct sound policies and effective programs that far into the future for agriculture is always difficult. To do so under the extreme budget constraints we faced this year was a really impossible task.

Still, the 17 members of the Agriculture Committee attempted it, and achieved at least a limited success. The bill which we reported does meet certain

necessary criteria.

S. 884 gives the Secretary the discretion he requested and needs to operate efficient, cost-effective farm program for wheat, corn, rice, and cotton.

S. 884 also meets the budget test. Although there is a slight overrun in fiscal year 1982, for all practical purposes S. 884 falls within the goals of the first concurrent budget resolution.

I might also add that—at least to this Senator-S. 884 falls far short of a perfect bill. Indeed in other years and under different circumstances, I might even have said that S. 884 was a bad bill. But it is this year, and this bill is apparently the best that we could do. It has sometimes been said, Mr. President, that the only just laws are the ones no one is satisfied with. If that is so, then surely S. 884 is fair legislation—for no one appears to be happy with it. A rough glance at the list of amendments is enough to show that the 1981 farm bill is being attacked from all sides.

There are amendments to increase target prices and loans and there are amendments to reduce them. Perhaps we should take that as a clue, Mr. President, that S. 884 does strike some sort of middle ground—a compromise which no one embraces, but which we can all perhaps live with.

Mr. President, those who attack S. 884 have advanced a number of arguments in favor of reducing or even eliminating some of the crucial Commodity Credit Corporation programs for commodities. These arguments more often than not are based on false impressions of the programs and their effects. I would like to debunk some of those popular myths.

The first myth is that farm programs are necessarily expensive; that America's producers are draining the U.S. Treasury. Quite simply, this is not true.

Farm programs may be expensive but they do not need to be. As I pointed out during the Agriculture Committee's consideration of S. 884, we have accorded the Secretary of Agriculture an unprecedented amount of discretionary authority. Under the committee bill, Secretary Block can act to raise target prices and loans to encourage participation in USDA programs. He can require a paid diversion or set-aside program to help bring supplies in line with demand. He can stimulate exports and he can set storage payments and interest rates on the farmer-held reserve program. All of these steps, Mr. President, are within the purview of the Secretary. It is a tremendous kit of tools, and it can—indeed, it should—be used to insure that farm programs provide a stable economy for agricultural producers without an exorbitant cost to the taxpayer.

We have heard it said that under S. 884 Commodity Credit Corporation costs in fiscal year 1982 could exceed \$4 billion. The larger than expected crops this year and extremely low prices may well mean this is true. But I must point out that the bill we are now considering can hardly be responsible for those costs. The crops which are being harvested this summer were planted last fall and earlier this spring. Any program costs on these crops are attributable to the 1977 Food and Agriculture Act, as amended. While it is true that this administration is only partially responsible for the management of 1981 crop programs-and therefore their costs—it would be grossly unfair to blame the fiscal year 1982 costs on the Congress and this bill.

Instead, I would point out that substantially the same authority to make adjustments in farm programs as are in S. 884 are in today's statutes. If Commodity Credit Corporation costs in fiscal year 1983—the first year they will be fully administered under the 1981 arm bill—are as great as fiscal year 1982 costs, it will not be because of this legislation. The means have been given to the administration to run an efficient, costeffective farm program. If it fails to do so, it is, as they say, a poor carpenter who blames his tools.

A second myth which requires debunking is that target prices interfere with the market. Nothing, Mr. President, could be further from the truth. Target prices do not interfere in the market—that is precisely why the target price concept was developed in the first place. Target prices and deficiency payments are intended to provide an income supplement to farmers in years when large crops and insufficient demand cause price depressions.

In 1973 and again in 1977, Congress wrote farm bills containing target prices. Why? Because farm income could not be allowed to fluctuate as wildly as crop prices sometimes did. The farm sector was too important and too sensitive to abandon entirely to the cold ups and downs of the market. Some sort of floor—designed to help producers through the bad years—was needed; and yet Congress was concerned about unduly interfering in the market and raising food prices for consumers.

The answer, of course, was target prices. They are triggered only in years of extremely low prices and poor farm income. They protect America's farmers from the worst economic catastrophies; allowing producers to survive for another year of business. But at the same time, target prices did not directly increase market prices. They did not decrease our ability to export and to compete in world markets.

The reasons that made target prices sound policy in 1973 and 1977 have not changed. Target prices are still the best solution to the complex problem of providing price stability without undue market interference.

S. 884 is a compromise which took weeks of committee hearings to develop. The committee has done the best job possible, given the present budget constraints.

I urge that the bill as it was conceived originally, S. 884, as passed out of committee and reported out of the committee to the full Senate, be passed.

Mr. President, I would like to say that if this is not the situation, I will have amendments to offer to reinstate compromises which, as I understand, will be offered to the bill in advance thereof.

Mr. President, I feel that the farmers of America can compete adequately in our free enterprise system. But, unfortunately, they are not competing freely with unencumbered ability, insofar as the Congress of this country. And I go back to the fact that I sat in this Chamber and watched the minimum price wage bill pass with an automatic escala-tor each year. Who got that as the fruits of their labor? Of course, it was the individual that delivered the bread, it was the baker of the bread, it was the seller of the bread, it was the man in the supermarket that sold the bread, but it was not the farmer whose labor produced the wheat for the bread. That chain cycle started above the farmer.

What that did is it exacerbated inflation which in turn came back and additionally penalized the farmer with increasing his or her cost of production to the extent that the family farm income today in no way is covering the cost of production of the products that the agricultural industry is producing in this Nation.

And what is the consequence of that? The consequence of that is today there are twice as many farm bankruptcies taking place. They cannot all be laid at the doorstep of what we are debating here today. Some of it has to do a great deal with the interest rates confronting this Nation today, also.

But, Mr. President, as I said before and I will say again, when we put the family farm out of business, we have taken the life blood of this Nation and turned it over to conglomerates and foreign countries in the importation of agricultural products to the extent that the day will come, if family farms are no longer available, that the conglomerates and other countries whom we will be dependent upon will set the prices for us, for our consumers in the aisles of the supermarkets of this great country of ours. And I do not think anyone in this room wants to see that happen.

Mr. President, as I said before, I will have some amendments to offer but, as I also said before, I feel in 5½ months we evolved a bill which I think was inadequate but yet was a compromise with the budgetary constraints that we had placed upon us at that time.

Thank you, Mr. President. I yield to the Senator from North Carolina.

Mr. QUAYLE. Mr. President, as we begin debate on the 1981 farm bill, I would like to call attention to the great contribution made by American farmers to our national well-being. American

farmers represent only about 3½ percent of the population, yet are able to feed the entire Nation and much of the rest of the world. As we know, the farming sector has continued to increase its productivity while other segments of the economy have become stagnant. While it took 7 hours of work to grow 100 bushels of corn in the 1965–69 period, the same amount of corn required only 4 hours of labor 10 years later. Higher productivity has also helped to keep food prices down in an age of spiralling inflation.

I feel that one of the principle reasons for continued growth of agricultural productivity is the strength of the free market economy. Indeed, American farming provides us with a textbook case of free market economics: The creativity and hard work of millions of producers results in an abundance of high quality foodstuffs, unprecedented in world history

We should applaud the success of millions of farmers and work to lessen Government interference in their productive efforts. We have all seen during the past two decades that overregulation of the economy not only serves to reward inefficient producers, but also discourages both investment and individual enterprise.

We should also recognize that many of our trading partners do not share our commitment to free trade. Even though exports of agricultural commodities totaled over \$34 billion last year, we still retain surplus grain, butter and other commodities in Government silos and warehouses. If we are to encourage American farmers to produce as much as they are able, then we should assist them by working to reduce restrictions on international trade and by assuring stable markets for their products.

Mr. President, I believe that the twin goals which should guide our discussion of the 1981 farm bill should be: First, reduce Federal involvement in agriculture, and second, work toward free and stable international trade of agricultural commodities.

American farmers have borne the impact of inflation even more than most other sectors of the economy. Because of the intense competition and high yields of agricultural production, farm prices have not kept pace with the costs of production and with the general inflation rate. The farmer's costs have risen from 70 to 80 percent of farm receipts in the past 20 years. More recently, the cost of fertilizer, which is largely produced from petroleum, and the cost of farm operating loans have skyrocketed. Total indebtedness for farmers has increased from \$53 billion in 1970 to \$157 billion in 1979. High interest rates have dramatically increased the costs of servicing this huge debt.

As we move toward reducing Government involvement in agriculture, we must keep in mind that the farmer's profit margin has been squeezed by inflation. We must not penalize this highly competitive and productive sector of the economy by suddenly eliminating decades-old support programs. Instead, we should allow the producer to recover the

costs of production as we seek to stabilize world markets and control infla-

In conclusion, Mr. President, I must insist that we begin the process of returning agriculture to the free market system. We cannot continue to support every agricultural crop without regard to its contribution to nutritional needs, its effect on the economy, our balance of payments, its costs to the Treasury, and its inflationary impact. I urge my colleagues to give serious attention to each separate program contained in the 1981 farm bill. At the appropriate time, I will offer an amendment to delete the sugar title from the farm bill, as reported by the Agriculture Committee. It is my firm belief that the sugar title represents an excellent place to begin our drive to reduce counterproductive Government involvement in American agriculture.

Mr. HELMS. Mr. President, I yield to the able Senator from Kansas.

The PRESIDING OFFICER (Mr. DANFORTH). The Senator from Kansas.

Mr. DOLE. Mr. President, I thank the distinguished Senator from North Carolina, the chairman of the committee.

Mr. President, it is not my intention to make a long statement regarding either the Agriculture Committee's farm bill, S. 884, or on the refining amendment approved by the committee last week which the chairman is introducing today.

Both pieces of legislation were developed under the most trying of circumstances—here in Washington and in rural America—and the bipartisan effort to reconcile budgetary restraint and prevailing economic distress speaks for itself.

TODAY'S THREAT TO OMNIBUS FARM LEGISLATION

I would like to state, Mr. President, that the concept of omnibus farm legislation has never faced to my knowledge as severe a test as it has this year.

The commitment which Congress made last spring to bring the growth of Government spending under control has brought into question the entire system through which we protect and support prices of basic agricultural commodities.

We have now seen 6 consecutive years of large global agricultural production, unprecedented interest rates, sustained double-digit inflation, and rocketing fuel and fertilizer costs.

At the same time, we have failed to protect the U.S. farmer's access to foreign markets, and have allowed the price-cutting tactics of our major competitors to reduce America to the world's supplier of last resort.

These events in the years since 1975 have progressively drained both profit and equity from our farm economy, and seriously endanger the future of its cornerstone—the family farm.

It is not only the viability of farm legislation during the next 4 years that we are addressing today, Mr. President, but the more crucial issue of whether the American agricultural system can and will survive the 1980's.

FARM LEGISLATION IS ONLY PART OF THE SOLUTION

As we have seen under the 1977 farm bill which expires with this year's crops, no one piece of legislation can guarantee prosperity in agriculture. It must be accompanied by aggressive policies in the area of foreign trade, by a revitalization in our Nation's industrial productivity, and by a total restructuring of Government's growth and regulatory function.

No one in 1977 could have foreseen the economic malaise which has pervaded our national spirit and sapped our confidence in the future. No one anticipated the impact which politics and foreign policy decisions would have on international trade and our balance of payments.

It is only by redressing these conditions that we can hope to return our economy, and the agriculture sector which plays such a vital role in its performance, to past levels of prosperity.

AGRICULTURE AND THE REAGAN ECONOMIC

There has been considerable criticism, Mr. President, of the current state of the economy, of the administration's budget and tax cuts passed by Congress in July, of the need for additional savings to bring the Federal budget into balance in 1984, and of continuing high interest rates.

I would only remind the administration's critics, however, that today's problems have been 40 years in the making, and that President Reagan's program for economic recovery is still 3 weeks from beginning to take effect.

It would be far easier to follow in the footsteps of previous administrations—Democratic and Republican alike—by taking short-range actions to put off the inevitable day of reckoning rather than dealing with the root cause of our economic disease—the unchecked growth of deficit spending by Government.

Mr. President, I have just returned from 10 days in my home State during which I was made painfully aware of the crisis conditions in the Nation's farm sector. Many farmers are facing bankruptcy at current financing costs, and many others are preparing to sell out while they can still salvage something from 30 or 40 years of hard work.

Almost all of the producers I met with, however, were steadfast in their belief that the President's program must be given a chance to succeed; that partial solutions and exceptions for special interests would betray the mandate which was made so clearly last November 4.

This Senator intends to keep that pledge, Mr. President, and I hope that my colleagues who shared our commitment during the first 6 months of this administration will not falter at the first signs that the medicine is only beginning to work.

CONCLUSION

In closing, Mr. President, I would only remind my colleagues of the circumstances in which we find ourselves today. There is no doubt in my mind that, if the committee bill and its amendment are not approved in the next few days, farm legislation will be overwhelmed by other issues, including the revised requirements of the second concurrent resolution on the budget and by the 60 or so amendments which may be offered to rewrite various provisions.

I join the chairman and the ranking minority member in asking for your support. S. 884 as amended will not be the bill requested by the administration, but the Department of Agriculture is not on record opposing it. It does not attain the level of savings we sought, but the additional cost—less than \$100 million per year over the 4-year life of the bill—is a remarkable achievement under unprecedented circumstances.

As many Members are aware, S. 884 as amended will also not be the legislation sought by many of our national and commodity farm organizations. I only ask that you carefully consider the consequences if the opposition of both those who would prefer more and those who would prefer less combine to defeat the measure.

Congress and the Nation must move forward to address questions that will have a tremendous impact on rural America—greater than any minor modifications in the committee bill. It would be far better to enact the legislation as proposed than to perpetuate a debate that will never be resolved to everyone's satisfaction.

Mr. President, having had an opportunity, I guess that is the correct word, to appear on the floor a number of times on farm legislation, this is the first time that we have come to the floor under the new so-called budget constraints where we have a total amount of money and we try to stay within those figures. One thing that adds that we did not have before is a little competition between commodities because if so much goes to one commodity it may mean less for another commodity. I would guess that there are some who may not agree with the sort of loose compromise that the majority of Republicans and Democrats on the committee, as I understand it, agreed to. But it is the hope of this Senator that we can stick together and pass a bill, and pass one very quickly.

I would say to my friends that we are in the process in the State of Kansas, and have been in the States of Texas, Oklahoma, and other wheat-producing States, of making plans now for how much should be planted and how much land should be worked. Even a set-aside announced by the Secretary comes a bit late because many farmers have expended capital, which they do not have much of, I might add, these days, in an effort to prepare the ground.

So we are hoping that we can pass the bill in the next day or so and get it to the House side to see what action the House might take.

I might add that I have spoken this morning with the chairman of the House committee, Congressman De LA Garza, who is waiting very anxiously for the Senate to act on what he would hope would be a responsible proposal that might be looked upon with some favor by the House. They are also, of course, concerned about the budget, as we all are.

I have said in my own State, and I have said to farm audiences, that when we talk about the economy, inflation, high interest rates, and the general problems we have, no one can escape the budget constraints, whether it is agriculture, whether it is defense, whether it is food stamps, whether it is education, whatever program it might be.

In my view, the big problem the farmers and those in rural America face are high interest rates and high inflation. I really believe we cannot solve those problems by trying to load up the farm

We have tried to act responsibly. As I understand it, we are not quite in agreement with the administration. But with the exception of dairy, we are so close on the other major commodities that we are talking about, as I add it up, less than \$100 million difference between what the administration may have proposed and what the majority of Democrats and Republicans have loosely agreed to insofar as the dollar amounts are concerned.

If you look over the life of a farm bill, a 4-year program with the major commodities of wheat, feedgrains, cotton, rice, and the other commodities, that is not a great deal of money. Again, these are only estimates, as I was reminded just a few minutes ago by the distinguished Presiding Officer. Those numbers could change. If, in fact, as we believe will happen, interest rates start to subside yet this year, and inflation levels off at about 9 percent and drops even lower next year, then these figures will drop.

I would just suggest that we have a severe test and we now have an opportu-

nity to pass the farm bill.

I thank the distinguished majority leader (Mr. Baker) for his persistence in urging us to bring the bill to the floor today. We do not have total agreement. There are some who do not like the sugar provision, some who do not like the peanut provision, some who do not like the cotton provision, or whatever. But I would suggest that is always the case in farm legislation. This Senator can never recall a farm bill coming to the floor without a great deal of debate and without some difference of opinion on just how we ought to construct the program. In fact, I think the last time we came here with general legislation we ended up passing two or three bills that affected some crops—sort of a cafeteria approach, everybody taking what they wanted to take.

It was not particularly successful in the final analysis, but it indicates that we have had some concern in the past with farm legislation. As I have said, it is only part of the solution.

I would hope that those who are cer-

tainly concerned about the dairy program will take a hard look at some of the

suggestions being made.

As this Senator views it, if, in fact, we can pass the bill that I have referred to as sort of a coalition of those of us on the committee in both parties who have addressed the major commodities, and if somehow we can accommodate the interests of those who produce milk as well as the consumers in this country and the taxpayers in this country, as far as that section is concerned, it is the belief of this Senator that we can pass a bill that will go to the House and perhaps receive favorable consideration and be signed by the President.

There has been some discussion that, "Well, this might be a chance for the President to veto his first piece of legislation and indicate his concern about the

economy." I would hope that is not the case. I do not believe that is the case. I do believe that we have acted responsibly in cutting back the cost of the bill that came out of the committee, S. 884.

That has been done, I might add, because of the diligence of the distinguished chairman, Senator Helms, and the distinguished ranking minority member on the committee, Senator Huddlesson. They have been working at this for the past several weeks. I might also add because of the efforts of the Department of Agriculture and the personal efforts of Secretary Brock and Under Secretary Lyng, meeting with every farm group in the late days of August and early September and going over the bill with every different commodity group to see if they could reach some agreement.

It is the belief of this Senator that we

have just about done that.

I will be speaking later on to certain amendments. I understand the distinguished Senator from Indiana may have a minor amendment which would, in effect, eliminate target prices and go back to the administration's original proposal.

I would say to the Senator from Indiana, to just take the wheat-producing area, since the Senator from Kansas understands that maybe better than some of the other provisions, we do not want payments under the target price program, but we would like some protection. The target price concept does offer some protection. It also has a way of putting pressure on any administration to use every possible effort it can and every tool it can to bring up the market prices.

The farmers in my State, the great, great majority of the farmers in the State of Kansas, do not want Federal payments. They want to make a profit in the marketplace. They cannot do that when the price of wheat is 40 cents, 50 cents, 70 cents, or even \$1 less than the costs of production per bushel. It is our hope that by retaining the target price concept we will not have Government payments but we will have enough pressure on any administration over the next 4 years that will indicate they are going to use the tools in the farm bill to bring up market prices. Whether that is setaside, diversion, or more aggressive export policies it would seem to me that is one advantage of the target price con-

Let us take this year, for example. Right now we are 3½ months into the 5-month formula. There may necessarily be target prices paid to wheat producers. To me that is unfortunate.

That, to me, is sort of a legacy of the embargo imposed in January 1980. I hope there will not be any more embargoes or, if there are embargoes, they are going to be across the board and not single out farmers in this country for special consideration. We are reaping the last adverse impact, I might say, of the so-called embargo imposed by President Carter. I do not say that in a partisan sense, because we have had embargoes under other Presidents who were Republican. But they have all ended up having the same adverse impact on the American farmers. We have had to come to Congress, and the American taxpay-

ers have had to put up billions of dollars to offset the adverse impact of the embargoes.

We go back to the soybean embargo under President Nixon. What was the final result? We almost lost the market to Brazil. We go back to the embargo imposed by President Ford. That did not do anything as far as the Soviets were concerned. There were great pressures on the President to impose embargoes, but the net result was that we lost part of our markets to other countries. I do not have the figures before me, but in such countries as Argentina, Australia, Canada, and other wheat-producing countries, not as large as the United States, if we look at their increase in exports to the Soviets in the past year or so, we understand just what an impact the embargo had.

If we look at the low prices in the marketplace, we understand today what an adverse impact the embargo had on American farmers. I believe President Reagan kept his campaign promise. He lifted the embargo. Not everybody agreed on that. It seemed to me what the President might do to lessen the target price exposures, even though only about 45 days remain, is to indicate that it is administration policy up and down the line—State Department, USDA—that if we have a big, big surplus of wheat, corn and other grains, we are prepared to sell at least 10 million tons, hopefully more, to the Soviets on commercial terms.

This, in itself, would not cost the President anything, but it would, I think, have a good impact on market prices. It might even save the administration millions of dollars when they have to compute what target prices might be after the 5-month period as provided in the law.

Finally, Mr. President, I remind my colleagues of the circumstances in which we find ourselves today. There is no doubt in my mind that unless we do something soon, this farm bill is going to be overwhelmed by other issues. In other words, if we reach a stalemate on the floor and cannot proceed with the farm bill, if the distinguished chairman of the committee decides after 3 or 4 days that we can just not pass the bill and has to pull it down, then other issues are going to be closing in on the time that we have remaining this year.

There is not any great interest, as we understand the term "great," as far as monumental issues in farm legislation. That does not mean it is not of importance to America, but it is hard to drum up a great deal of support for farm legislation outside those of us who come from farm States and farmers and consumers-some consumers. It is something that comes along every 4 years or less and we deal with it. We do the best we can under the circumstances. But there are a number of issues—all the appropriations bills, the debt ceiling, social security legislation, new budget cuts, and other matters that I think the distinguished majority leader outlined when Congress reconvened last Wednesday which would indicate that now is the time for the farm bill not only to be brought up in the Senate but to be passed in the Senate so we might move on to other business and go to conference on the farm bill. Hopefully, the House will see fit to move very quickly. Then we can say to the American farmer that we did act, we acted responsibly. We did not try to bust the budget with the farm bill.

I know that some find it difficult to vote for farm legislation and I know that some farmers themselves would like 100 percent of parity, they would like loan rates at 100 percent, they would like target prices at 100 percent. But the taxpayers have an interest, too.

On the other hand, as you travel across most farm States, you do not see a great number of young farmers. Even the percentage that there are, I think, has probably fairly well stabilized. Hopefully, it is going to increase in the next few years. But we need to do what we can to protect farm income-not to shovel it out of the Treasury; there is nothing in the Treasury—but to protect farm income. This Senator believes we shall be able to do that under the chairmanship of the distinguished Senator from North Carolina, with the so-called modifications that he will present at some time later on in the discussion of this

proposal.

Mr. President, it is the hope of the Senator from Kansas that we can, for the most part, accommodate wishes-in fact, the hopes-of the administration. Again, I remind those who may be listening in their offices and may be voting on some of the amendments that they look at S. 884 and then the socalled countercompromise offered by the administration, presented by Secretary Block to the members of the committee just a few days ago, then the modifications that will be offered with the exception of dairy in the next few hours. probably by the distinguished Senator from North Carolina. If we add up the difference in cost, we find, as the Senator from Kansas—I hope accurately—outlined, less than a half billion dollars total, probably \$100 million for the next 4 years above what the administration indicated they would accept.

Now, \$100 million is a lot of money and \$100 million should be scrutinized carefully. But these are estimates. We believe that in the final analysis, they will come within the numbers projected by the administration. We are talking about major farm crops—peanuts, sugar, cotton, wheat, and feed grains. Hopefully we can work out some accommodation on the dairy section. If we cannot, it is the view of this Senator that we just ought to bring up dairy by itself. If the dairy people want to go it alone, they are going to have an opportunity. If they do not want to compromise, they are going

to have a chance to go it alone.

It seems to me it would be in the best interests of the farmers and consumers in this country to try to reach some accommodation on the dairy section. If that cannot be done—and I hope there are some of us who believe we can support agriculture, support dairy producers, dairy farmers, and consumers-we can ourselves offer some modification of the dairy provision now contained in S. 884 to lower the cost. If that is not done, it is the opinion of this Senator that that would increase the cost over the next 4 years by about \$1 billion. Instead of \$400 million added cost or \$500 million, we are going to have about \$1.5 billion of added cost because of the one section.

I hope that those who look after the interests of American dairy farmers will understand that if there is no inclination to go along, they may have to go alone. am not certain what the outcome of that might be on the Senate floor.

Again, Mr. President, I indicate that there are certainly some concerns about this bill on the House side. This Senator is not certain what will happen on the House side, but I am told that they feel very strongly on the House side that they have to stay within the so-called Gramm-Latta budget constraints. If that is the case, if they exceed that, I am advised, they might have great difficulty in passing a bill on that side.

Again, Mr. President, I thank both the Senator from North Carolina (Mr. HELMS) and the Senator from Kentucky (Mr. Huddleston) for their bipartisan effort in getting this bill before us and getting it passed in the next few days.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. HELMS. Mr. President, I commend the able Senator from Kansas for his analysis of where we stand. I ask him if it is not correct that S. 884, as it will be modified by the package, moves the bill \$1.3 billion closer to the administration's proposal. Is that correct?

Mr. DOLE. That is correct. The Senator has even a somewhat more accurate figure. I was sort of rounding off figures. but he is correct. It is about \$1.3 billion.

Mr. HELMS. That does not leave very much difference. As a matter of fact, for fiscal year 1982, the administration proposal and the revised Senate proposal will cost the same thing, within the CBO figures.

Mr. DOLE. That is right.

Mr. HELMS. The Senator mentioned what will be an absolute necessity if we do not move along and pass a farm bill in any reasonable length of time. We are going to have to pull it down, and the likel hood is that there will not be a bill. Then what will happen?

Mr. DOLE. I am not certain anything will happen, but we go back to the 1949 act. I say to the Senator from North Carolina that we do not want that to

happen.

I am speaking now not for Senators but for farmers and others who would have to comply with that act. In addition, as I understand it, the cost would be out of sight.

Mr. HELMS. Twenty-four billion dollars for the 4-year period.

Mr. DOLE. That is out of sight. [Laughter]

Mr. HELMS. It is out of sight. I thank

the Senator for his comments.

Mr. President, I yield to the able Senator from Indiana.

Mr. LUGAR. Mr. President, I believe it is important that we review the bidding

as to how we came to this point, prior to getting into these amendments.

Clearly, the chairman of the committee, the distinguished Senator from North Carolina, and the ranking Republican member, Mr. Dole, have outlined the efforts of the committee to try to bring about income security for farmers and at the same time to do so within the constraints of the budget process.

Those who witnessed the initial hearings and the markup will recall the press coverage during the days of the markup, in which it was apparent that amendments being made to the original administration proposal were adding substantial sums of money. Indeed, each gay of the markup, it became a question of trying to gage how far we had marched up the hill.

The distinguished chairman of the committee kept assuring the committee and the press and Americans that we were marching up the hill rapidly but that, indeed, we would have to march down again; that we were under constraints, as are all other committees, of the general budget consideration of the

Senate.

Unfortunately, the markup concluded; and S. 884, which came as the vehicle for our consideration on the floor today, arrived with a very large price tag on it at that point. The administration may have been thinking in terms of an overall cost for fiscal 1982 of between \$1.5 and \$2 billion. It ended up, apparently, somewhere between \$2.1 billion and \$2.3 billion, according to USDA estimates.

Our dilemma is compounded as we come to this debate in the month of September because USDA now estimates that the same bill that was worth \$2.3 billion, more or less, when we completed it in the spring, is now worth over \$4 billion. The compromises that the administration and the Agriculture Committee have attempted to fashion would shave that \$4 billion plus by \$200 million or \$300 million at most.

I suspect that throughout the consideration of the debate, differing figures will be offered as to how much money is to be expended in the course of this multiyear bill. However, for the sake of the record, let me offer estimates that have

been made today.

The administration, as of 1 p.m., has released its estimate of the cost of the committee proposal, and this is the substitute that will be offered shortly, sometime today, with or without dairy attached to it. The estimate is \$12.2 billion, as compared to an estimate of \$9.01 billion for the administration's original proposal. The cost of S. 884 is still estimated by the administration at \$13 billion.

So the administration is suggesting that the committee proposal over a 5year period does shave the \$13 billion down to \$12.2 billion; but it is still clearly in excess, by over \$3 billion, of the administration proposal, which in itself presumably is barely inside the guidelines of the first concurrent resolution.

The CBO has different estimates. It estimates the committee compromise at \$13.2 billion. That is a full billion dollars

higher than the USDA estimates. But the CBO also estimates the administration proposal at \$12.3 billion.

Thus, the dialog that just ensued between Senator Helms and Senator Dole, suggesting that the two are coming close together—indeed they are, both at an extraordinarily high level.

I point out that the differences between the administration and the CBO estimates are apparently due to the higher CBO estimates of dairy and wheat and lower CBO estimates of rice.

The dairy and wheat situations point up the general course that the committee followed and the general course that I believe the committee should not adopt today, and it is hoped that the Senate will amend it if the committee persists.

There is no way of estimating the cost of this bill so long as the uncontrollables represented in the target prices remain. There is absolutely no way of making an astimate

The distinguished Senator from Kansas has pointed out that he does not want direct cash payments to Kansas wheat farmers, that that is abhorrent to him—the thought that the Federal Government would be shelling out hundreds of millions of dollars to Kansas wheat farmers under this bill or any other bill.

He points out, however, that they should have some protection, and others have pointed out the need for some basic way of covering production costs.

The dilemma is, of course, that at this moment the 5-month average of wheat prices points to a situation in which not only Kansas wheat farmers but also wheat farmers all over our country, on a 2.75 billion bushel crop, will be receiving so many cents for each of those bushels.

The way the target price system works is that you take the 5-month average of cash prices in the field, at the local market, and if that average is less than the target price, every farmer in the country who produced a bushel of wheat is eligible for that spread times the number of bushels his local agricultural stabilization committee gives him credit for producing on historical averages of his farm acreage and his normal production. It makes no difference whether he sold the crop a long time ago, went into the futures market and made a profit. He is entitled to an uncontrollable factor that the target price represents.

The USDA believes that that will be \$500 million of payments in this crop year, if a wheat crop already harvested is playing its way out now through the 5-month averages.

The fact of life is, as pointed out in the dairy situation, that the Federal Government is buying half the butter produced in the country. There are enormous oversupplies. Yet, the committee, in its wisdom, is still attempting to do what it calls a finely-tuned job of compromising.

The only compromise is within the members of the committee, sitting around the table, each trying to protect a specific commodity. That is the only compromise. There is no compromise with the Treasury, with the rest of the

Senate having passed a budget resolution, with the consumers in this country, or with any of the normal factors of the market.

The question always was; Could you get a compromise within the committee so that nobody would sepak out and say, essentially, "This won't work"? Here are uncontrollables sprouting in every direction; costs for the next 5 years beyond anyone's prediction. How in the world would a Senator know what the weather is going to be like for 5 years, what the predilections of various factors may be as to whether to plant or not to plant?

Of course, the U.S. Department of Agriculture is not defenseless against this situation. Already, to take a very concrete example that is not hypothetical, wheat has acted and said that if there is going to be a target price, if they are going to run up the cash register and pay out \$500 million, then next year the farmers in this country will be prohibited from planting 15 percent of wheat average if they want to participate

In other words, the wheat crop was up 14 percent this year. The USDA is saying that we are going to cut out 15 percent of the wheat crop. That means that if you are a wheat farmer, and I am—and there are not too many on this floor who are-my fields will be measured row by row. We will have the inspectors out again with the aerial photographer. In the event we should misplant two or three rows, we knock it out, all the way back, with the complications of controls and invasion into the workings of our farms, and we cannot use that acreage for other purposes. We cannot plant corn there. We cannot plant soybeans. We do not do anything.

In short, this bill, with target prices supposedly to help farmers, is a destruction of the use of productive land that cannot be used while the USDA tries to control the excesses that all of this has spawned. We know that and it was argued ably within the committee that the USDA's new course, the Secretary's new course was absolutely right: Get rid of the target prices. Let the Secretary of Agriculture be a manager, not a cashier passing out money, a manager, so that we have some chance using farmer-held reserves, using loan rates, using all of the efforts that we have to push exports and finally coming to a conclusion, that simply saying, "My production costs is x number of dollars is not a justification for me to be paid that amount of money." That is not the way the market works and in my judgment it is not the way the market should work.

In short, if there is not a demand for certain supplies in this country, the market should indicate to many farmers they should not be producing. There is no God-given right every year to go out and plant and simply to say "I will be guaranteed because of target prices x number of dollars because it costs me so much to do something the market did not need."

I think all of us appreciate the adjustments that have to be made as we

move from one style of agriculture to another. But the Secretary of Agriculture, given full flexibility under his original proposal to set low rates, to move into farmer-held grain reserves with vigor, offered some excellent floors and possibilities for that adjustment. I appreciate that a long time ago the Secretary in the face of this bill abandoned that situation, but I wish to read a letter he wrote to me this morning to make certain that it appears in this part of the debate.

This is dated September 14, 1981, today, from the U.S. Department of Agriculture.

DEAR DICK: Thank you for your letter requesting the Administration's view on your proposed amendments which would substitute our original commodity provisions for the current language contained in S. 884, as reported by the Committee on Agriculture, Nutrition, and Forestry. The Administration finds your amendments to S. 884 consistent with our original bill. Based on a prior commitment, however, the Administration has agreed not to take a position on peanut and sugar legislation at this time.

As you know, the Administration was willing to work with the Congress in a mutual effort to write a farm bill that not only would help our farmers and ranchers but also be responsible from a budgetary standpoint. Recently we proposed a package of amendments to S. 884 that would achieve these goals. As you know, the Senate Committee on Agriculture, Nutrition, and Forestry, while coming closer, failed to meet our objectives.

We support your efforts to bring prosperity to American agriculture through a greater market orientation. It is important that we restore profitability for American farmers.

Sincerely,

JOHN R. BLOCK, Secretary.

Mr. President, I simply say that I intend at the proper time, and I am fully prepared to enter into time agreements on each of my amendments, to expedite the debate. I think after one goes through on a target price debate we will be able to reach decisions on the others, ad seriatim, very rapidly. It appears to me that the peanut issue has been well debated for a long time and by this time most Members of the Senate have an idea what they are going to do.

I am prepared to move expeditiously in that area, also, as may be required. I hope all other Senators will share my desire to move expeditiously.

I think we must now get back to market orientation and get rid of the target prices. This is where the money lies. Until we do, this bill. I think, is in jeopardy, and even more in jeopardy is the faith of the American people that do not receive kindly special interests, as good as these interests may be, self-dealing as we might be accused of dealing if we are to front for each commodity. In my State corn is big and wheat is big, but I am perfectly prepared to take on, as each Senator knows, the fact that target prices in those two areas are wrong in a market sense, a budgetary sense, and the uncontrollable sense that we are trying to get away from in overall budgetary considerations, and I am hopeful that in due course the majority of our colleagues will agree with that position.

I yield the floor.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. LUGAR. Mr. President, it is my understanding that the distinguished Senator from Iowa, a member of the Agriculture Committee, has been engaged in some research that I think is very important. I was intrigued by mention earlier on of the consequences if we did not pass a farm bill and mention of restoration of certain provisions of the act of 1949 and others.

I wish to ask the Senator from Iowa is it true that he has put pencil on paper and tried to come up with some of the costs that are involved in the event that we should not be successful in passing

legislation this month?

Mr. JEPSEN. I have. The Senator mentioned that the projected costs under current plans and suggestions, target prices, and so on, for wheat would be somewhere in the neighborhood of \$500 million for next year. If indeed we should not have a farm bill, as I feel strongly we must have of some kind, indeed then, as the law states, we revert back to the farm legislation of 1949.

I point out that under the present projections of the new wheat crop, the cost next year to the Department of Agriculture, to the Government and to the taxpayers would be \$1.8 billion.

That is nearly as much in 1 year for one commodity under the 1949 farm legislation as the entire proposed bill as it came out from the Senate committee was

for 4 years for everything.

So when we hear talk of possibly not arriving at some type of a farm bill or the possibility of reverting back to the 1949 bill, I think that under any circumstances should not be used either as a lever, as a threat or as a fallback because it is unthinkable. It is not realistic, it is just not acceptable to even have that under consideration.

Mr. LUGAR. I would like to ask the Senator from Iowa, out of curiosity, whether he has asked the U.S. Department of Agriculture for their reactions with regard to moving back to that legislation?

Mr. JEPSEN. I did as late as 2 o'clock this afternoon in a Joint Economic Subcommittee hearing on the economic value of the agricultural sector to our economy of this country.

The Secretary appeared, and I asked the Secretary as to what thoughts they had about possibly reverting back to the 1949 program. He replied that as a matter of course and to be prepared for any eventuality that might happen they have people working on the possibility of having to implement that.

At that point I did ask the Secretary if he thought that under any stretch of the imagination there was any realistic rationale at all for thinking we could live or exist under that program, and pointed out to them the fact that the costs for just 1 year for the wheat program would cost nearly as much as 4 years for the entire program as reported from the Senate committee, and he indicated he was familiar with that. He indicated they were aware of that, and expressed the opinion it would be not realistic at all to consider reverting to the 1949 act.

Mr. LUGAR. I thank the Senator from Iowa, who is a distinguished member of the Joint Economic Committee and who has worked so hard on general economic

problems in this country.

I would just add my own comment, Mr. President, that clearly those of us who visited with our constituents throughout the month of August came back to Washington, as did many others, with the thought that Congress would be serious about budgets, that the President clearly would be serious about offering cuts and not additions; that we would all be serious about the lowering of interest rates. One of the ways that has been found to bring some potential for less governmental borrowing is to cut Federal spending.

It is amazing that we meet in this Chamber—this may be off the beaten track to all the rest of the debate—and we still throw out ideas with the thought that without an agricultural bill at this time we could go into as much as \$84

billion for spending.

If I heard the Senator from North Carolina earlier in his estimate of the 4-year consequences, it truly is unthinkable. If the American people find this bill now to be a dubious exercise of special interests, clearly figures such as the distinguished Senator from Iowa or the distinguished Senator from North Carolina have been propounding are even more outrageous. It brings me back to a central thought that I have, and that is that American agriculture really needs friends right now, not people doing in agricultural legislation by overreaching, by special arrangement.

We are going to have to be responsible in the course of this debate. The country is watching this as the first money bill out of the box following the recess, the very first one, and if the response of the Senate is to spend more and more and add on, that is not the response, in my judgment, the public was looking for or hopeful, I think, that the majority of Senators would look the other way.

Mr. MELCHER. Mr. President, will the

Senator yield?

Mr. LUGAR. Yes, I am happy to yield.
Mr. MELCHER. First, I thank the Senator for yielding. It is my impression, and I would be delighted to be corrected if I am wrong, that the amount of the bill we have brought before the Senate is less than the President's budget.

Mr. LUGAR. I think that is incorrect by all estimates. It is clearly much more than the budget that this Senate passed.

Mr. MELCHER. What was in the President's budget for agriculture when he presented it to Congress? Would the Senator enlighten me?

Mr. LUGAR. The distinguished Senator from Montana was present during the old days of that debate when we were talking about \$1.5 billion; that was escalated to \$2 billion by the time it got out of committee.

Mr. MELCHER. Can the Senator enlighten me further then as to the dollar figure the Senator is proposing as the President's budget for this bill?

Mr. LUGAR. I am proposing— Mr. MELCHER. Whenever he presented the budget, the first of June or what-

ever sequence you can enlighten me on? Mr. LUGAR. I am proposing a series of amendments and, hopefully, all would pass, and all would do away with target prices for corn, wheat, rice, and cotton, and by eliminating the target prices and giving the Secretary flexibility, the Secretary can then by definition make certain he stays within the administration's budget, and he eliminates the uncontrollable feature.

Mr. MELCHER. I appreciate the response of the Senator from Indiana. I would like to be enlightened as to what was the President's first budget request, the modified budget request prior to the recess, and what is the President's budget request now in terms of dollars.

Mr. LUGAR. I am sorry I cannot furnish that information to the distinguished Senator. I expect it will be illuminated in the course of the debate. My purpose is simply to make certain that we get whatever the budget turns out to be by giving the Secretary flexibility to manage it.

Mr. MELCHER. Am I to interpret that to mean that there have been several different budget figures and that they keep changing and that they keep

changing downward?

Mr. LUGAR. Yes, that is right. I think that is the nature of the budget process throughout the year, and it is still apparent it will continue to be as the President tries to grapple with a deficit that continues to grow rather than gets smaller.

My understanding is that the deficit of \$42.5 billion is in danger of not being met, and it seems to me we ought not to contribute toward escalating that any higher.

Mr. MELCHER. Well, I will ask one further question and I again thank the distinguished Senator from Indiana.

Do we have much chance, any chance, of passing a farm bill which is for 3 years' duration which will satisfy whatever the changing budget figures are of the President?

Mr. LUGAR. Yes, I think there is a good opportunity to pass a farm bill provided the Secretary of Agriculture has the flexibility to set loans and make purchases as opposed to being locked into target prices.

Mr. MELCHER. I beg the Senator's pardon. I may not have stated my question properly.

Has the Senate a decent chance of passing a farm bill with a certain set of figures that has been agreed upon by CBO as being the cost, and satisfying whatever the President's changing budget requirements will be or are we going to continue to revise—I am advised that the administration recommended \$3.9 billion as the budget costs for fiscal 1982; that we passed, the committee passed, slightly higher than that, \$200 million

more than that, slightly more; and then there is going to be a revised Senate figure of \$3.9 billion or almost \$4 billion.

The point of my question is: Since the President's budget changes no matter what we face here, might there be some readjustment and are we not still subject to the usual procedure of appropriation bills being the determinative factor?

Mr. LUGAR. Well, the Senator's question is well taken. I would suppose there would be many further changes in the estimates of the cost of the bill and maybe even of the President's requests of us during the course of this, and the appropriation process follows, as the Senator

points out.

It just seems to me that the nature of the debate in which we are engaged is an impossible one trying to quantify the unknowable. It appears to me, since the known uncontrollables are in the target price areas, that the elimination of that particular area makes it possible for a Secretary of Agriculture and a President to stay within the range of an acceptable budget that becomes more knowable, as opposed to the weather and the wheat crops and all the other things for 4 or 5 years that are unknowable.

Mr. MELCHER. I thank the Senator for yielding. I think he is raising some

very worthwhile points.

I wonder what time we could look at the Senator's amendment with a total dollar figure which would purport to represent what the administration today would like to see as the budget figure, say, for fiscal 1982 or a combination of fiscal years 1982, 1983, and 1984?

Mr. LUGAR. This Senator would simply reply that my purpose would be to make certain we were within the limits of the first concurrent resolution this body has already passed. I am offering a course of action that I am certain will bring us to that point by elimination of the target prices in four areas.

Mr. MELCHER. I thank the Senator. Mr. President, in discussing what the administration's budget is in reference to this bill and to the farm program, it is a little bit difficult because it has changed

from time to time.

I can understand that, but we have to use some sort of figures that we are talking about being the same. What the administration is now suggesting is that there be some changes in the farm bill that will reflect lowered costs, lowered outlays, for commodities, and those programs that are connected with commodities.

I would like to list, for the benefit of the Senate and for the benefit of the public which reads the RECORD, what the 1982 proposed budget was as presented by the administration at the time the Senate Agricultural Committee drafted S. 884 for these commodities and costs that are connected with these commodities. I will now read them.

Dairy, wheat, feedgrains, cotton, rice, soybeans, peanuts, tobacco, sugar, export credit, storage facility loans, net interest, working capital, administration, other, sunflowers, and wool.

It should be noted that in working capital, in sugar, and in sunflowers for

fiscal 1982 the administration recommended zero in each area.

That total as recommended by the administration for fiscal 1982 came to \$2.182 billion.

The committee bill, S. 884, as reported, added \$101 million to dairy. That was a semiannual price adjustment on dairy as the price fell below 70 percent on March 1.

The committee deducted or changed in their bill from the wool program a deduction of \$15 million. So the net difference is an increase over and above what the administration recommended of \$86 million

Now if we come in with a lower figure that is up, the President or the administration are certainly entitled to lower their budget estimates, their budget requests. I expect that is what Senator LUGAR would like to do with his amendment, to reflect those lower budget requests. But it is important to identify where we are starting so far as the administration requests and what they are asking for in these reductions and the areas in which they are asking for re-

In either case, it ought to be obvious that we are talking about a very minuscule part of the total Federal budget.

I would like to now turn to a couple of different subjects, some amendments that I shall offer and on which we can

perhaps agree.

I have been in Congress for 12 yearsplus, and during all those 12 years I have been concerned that the inspection process we have on imported meats left a lot to be desired. Over the course of the 12 years the Department of Agriculture has made some effort to tighten up those processes with respect to imported meats but has not been successful in making certain that we do not have some catastrophe befall this country. A recent escapade deserves our attention and, I think, warrants that we tighten up our process again.

A few weeks ago we learned that imported meat labeled as beef from Australia actually contained some horse-meat. When it was found that it contained horsemeat, the meat was taken out and removed from the market. Some got into the processing chain and, in some instances, was actually being sold as beef. One particular chain of tacoburrito sandwich retailers was identified as having a large amount of the horsemeat.

It is very harmful, of course, for the business of that particular chain. It is a situation where the public would be alarmed at the possibility that the fast food they were purchasing from this chain actually contained horsemeat rather than beef. It was a very damaging economic fact of life for that particular chain.

Besides that, it is an outrage to the consumers, who believe that they are eating beef and are told they are eating beef, and then find out that it is horsemeat.

Beyond that, Mr. President, it is an outrage for the entire meat industry of this country that we allow a process of importing meats falsely labeled, illegally labeled. It is obviously a breakdown in our inspection program.

First of all, to be licensed to sell meat in this country from another country, the establishment where that meat is slaughtered must be licensed and must meet the same requirements that we would make of a similar establishment in this country.

We do not use horsemeat here for human consumption. We do not process it into any type of hamburger or any type of sausage of any type of prepared food. It is obvious that an establishment, no matter where it is, Australia or anywhere else, that is licensed to sell in this country knows when they are slaughtering horses and knows when they are breaking the requirement established upon that licensed institution to sell meat to the United States. They know that they are breaking our law. It is no secret to them.

Unfortunately, also, it was found at about the same time, a week or two later. that some of the imported meat labeled as beef from Australia turned out to be kangaroo meat. We can all make a lot of very cute remarks about up jumped the kangaroo, or the box was jumping, the meat was very lively, and so on, but my purpose is a little bit more serious here today. Again, the establishment in Australia that was licensed to sell beef in the United States was well aware that the meat they were processing was not beef, that it was kangaroo. Again, it is a breakdown in our inspection system. First of all, Mr. President, the establishment that does that, whether it is in Australia or some other country-I guess if you are going to slaughter kangaroo and box it up, debone, and label it as beef, that probably has to be an establishment in Australia.

(Mr. WARNER assumed the chair.)

Mr. MELCHER. Whatever that establishment is that is licensed to sell meat here, in this country, must stand the scrutiny of our inspection. We require, under our law and under the regulations by the Department of Agriculture that carry out that law, that those establishments be inspected by our own inspector, routinely. It is obvious to me that the 200 or more or less establishments that are licensed to sell meat in Australia can bear a lot tougher scrutiny than what they have been getting.

It is obvious to me that the timing of the inspection could be better made so that there is a frequency that would discover when the horses are in the process of being slaughtered and deboned and packaged and labeled as beef so that they will be discovered by our inspectors. The same thing is true of kangaroo meat.

So, Mr. President, that is one part. We should tighten up that process by our frequency of inspection and thoroughness of inspection of those establishments abroad that are licensed to sell

their product here.

Second, we should tighten up the process of inspection once the meat reaches our shores. I have been on the docks and watched the procedures of inspection. When the meat is unloaded from a ship and is inspected on the docks, there is a hurrying and scurrying about to get rid of it quickly, and only a very minute sampling of the imported product is ever viewed by our inspectors. It varies on how big a shipment is. The bigger the shipment is, you look at a few more boxes. But let me tell you that only about 1 percent of the meat is ever viewed at the time it enters our country. That is a small percentage.

But even on what is viewed, Mr. President, we do not require species identification. We do not require that the meat be looked at to find out if it really is beef. In the case of the horsemeat that was discovered, the inspector observed that the meat did not look right. It looked too stringy; it had a different color; it was a different texture than beef. But it was all visual and there was no real procedure to identify what the species

Is it necessary? Yes, I think it is necessary. I think the episode has proved that it is necessary to add species identification to the process of inspection here in this country. I shall offer an amendment to do that. The amendment also will require that we establish a little more erudite, a little more detailed residue sampling procedure for harmful chemicals or drugs that might be in the meat. We are a little bit lax on that, also. This amendment, I believe, Mr. President, is necessary. I hope that the Senate can accept it.

I cannot project what the cost of adding species identification as a requirement of inspection on this shore, in the United States, at the docks, of imported meats would be. But I would say it would be minimal

I would say that if we require a bit more detailed residue sampling of the meat that is imported for harmful chemicals or drugs, perhaps we are talking about an increase in cost of \$3 to \$5 million. I would say that if we tighten up our inspection by the inspectors that operate abroad, the veterinarians that do inspect foreign plants abroad that are licensed to sell meat in this country, if we increase their visitations and tighten up on that process, it is probably going to add another million dollars to the budget alsoperhaps a little bit less for that particular additional cost.

But what does it do for us, Mr. President? It provides some protection for the people who buy this meat, whether it is an individual consumer or it is a chain of sandwich shops or taco shops that buys the product.

I believe it is absolutely essential that we do that. We should protect our consumers and our businesses from dishonest practices in connection with imported food products.

A second amendment I intend to offer deals with commodities that are in huge surplus and which are costing our Government storage costs.

I will propose an amendment that those commodities be made available to schools and to senior citizen nutrition centers as bonus commodities. I will propose that dried milk, cheddar cheese, and butter, all of which are in huge surplus, and wheat products such as flour, which

will be in huge surplus this year, be made available under our usual procedure of bonuses for schools and senior citizen nutrition programs.

I also draw the attention of the Senate to the fact that I will offer an amendment to restore the Wool Act to its present status. I see no reason to tinker with the program that has worked best and has been the most successful and has caused the least criticism of Congress over the past 10 years.

I note that the House, in its bill, maintains the Wool Act exactly as it is. The wool people feel that it has worked successfully. I believe that the users of wool in this country are in favor of the Wool Act as it is. I believe that to tinker with it will cause some disruption. Yet the committee bill, as it is presented to the Senate, does tinker with it and does reduce it slightly. We would be better off leaving the act exactly as it is and not changing it.

Another amendment I will offer, which I hope will receive the consideration of the Senate and will be adopted, would require that the President consult with the Federal Reserve Board, with the idea of reducing interest rates within 90 days; discuss with the Federal Reserve Board the open market activities, the Federal Reserve Board's requirement on the rediscount rate, and the Federal Reserve Board's requirement on reserves that member banks must carrywith the idea that joint action between the President and the Federal Reserve would reduce rates by 3 to 4 points within 90 days.

I point out to the Senate that we have reduced inflation 3 to 4 points, comparing 1981 with 1980; so it seems to me that we could reduce interest rates by changing the monetary policy, at least to the extent that we reduce the rates by 3 to 4 points.

The amendment would be binding on the President to consult with the Board, but that is as far as the requirement would go. I hope it would be a fruitful consultation and that we would see some reduction in rates during that period of time. It is considered a mild step, but I believe it is time we take some action jointly, among Congress, the President, and the Board, to bring about a reduction in rates.

Mr. PRESSLER. Mr. President, I would like to make some remarks on the farm bill. Let me say that I have been concerned about the effect of eliminating target prices, from both the domestic and international points of view. It seems that our target prices set the price for wheat in the international market. I think we must understand and consider the full international implications which would result if we were to eliminate target prices entirely.

I oppose the elimination of target prices and I have long felt that they are, in fact, frequently too low. In meetings with the Canadians and Australians and other countries, they have indicated that our target prices, in fact, fix the international wheat price or at least the figure around which the international price revolves.

I think it is very important that we take into careful consideration the im-

pact on international grain markets before considering the elimination of target prices. If we do so, we must take other steps, to increase domestic grain prices because we should not be selling U.S. grain abroad at below the cost of production.

I certainly do not advocate some of the tactics used by the Arab oil states in terms of price fixing. But grain and farm commodities are items in the international area that do require a great deal of foreign currency; in fact, they are our largest source of foreign revenue. Particularly in meetings with the Canadians—and we have another meeting scheduled for October regarding grain agreements—it has been emphasized that the target price concept sets the international grain prices. We should keep that in mind in dealing with this.

Also, Mr. President, I know we are in the time of budget cuts and they are important, but we must recognize the importance of agriculture to the total American economy. Agriculture is our No. 1 industry, with assets of \$927 billion; and our Nation's largest employer with between 14- and 17-million people working in some phase of agriculture. Farming itself has 3.6 million workers, which equals the combined payrolls of transportation, the steel industry, and the auto industry. Agriculture in some way accounts for one out of every five jobs in private enterprise.

In 1980, the United States exported \$41.2 billion worth of agricultural products. The agricultural trade surplus was almost \$23 billion, which is a great plus to our Nation's balance of trade. Agriculture exports have increased from \$7 billion in 1970 and further growth is still possible.

Mr. President, let me say that I fear that we are losing the family farmer on the American scene. I know that the phrase family farmer sounds like apple pie and motherhood, but the point is our agriculture sector has been and still is more productive than any other country. Many countries in this world are struggling with a shortage of food and we have been blessed with a surplus of food. Part of that is because we have the incentive system in which people own the land on which they work and own the machinery and own their livestock.

Coming from a farm family myself, I can assure you that even such a thing as the care of livestock is done in a much better fashion if there is ownership involved. But, increasingly, our farmland is being turned into great corporate farms and absentee ownership. This trend will result, eventually, in lessened productivity. So every consumer in America has an interest in this bill.

We call this legislation the farm bill, but we should call it the food and consumer bill, because in no other country in the world are the people provided such an abundant supply of food. This is the result of the family farm system.

I fear we are losing that system to corporate agriculture and absentee ownership and will experience the decreased productivity that has plagued other nations. In addition, American farmers are also major consumers. Farmers account for the use of 6.5 million tons of steel in some form which accounts for 40,000 jobs in the steel industry. They purchase \$14.4 billion worth of farm equipment which requires 140,000 employees to produce, and \$13.7 billion in petroleum products, more than any other single industry. This just shows the entire economy is based on the success of agriculture

Mr. President, all Americans also have an interest in preserving our top soil, our shelter belts, and our trees. That is a national heritage. We are losing our prime agricultural land, which is one of

our great assets.

I know that consumers, those who live in urban America may have very little understanding as to why this Congress should be interested in soil and water conservation programs, why we should be interested in shelter belts, or a trees program. Every American whether they live in the densest city or in the rural areas, has a great interest in conservation. We should all share in that heritage. It will cost, and that cost should be shared.

I shall be offering amendments relating to shelter belts, to soil and water conservation, meat imports, and certain other areas. I may offer an amendment on dairying, pending certain discussions which are occurring at this moment.

Those are some of the points I would like to make at the beginning of this de-

bate.

Let me add that on the international scene we as Americans have been the good fellows regarding international trade. I participated in the North Atlantic Treaty Organization's economic treaty discussions and have seen firsthand the attitudes of the representatives of other nations. No country in the world is as generous in its trade agreements as the United States. The Common Market is certainly not. Other countries that have agricultural exports act in their own interests. We insist on reciprocity in the general agreement on trade and tariffs in the industrial products area. In the area of our industrial products we are very careful not to give away trade concessions. Every time we give a trade concession, however, it is always in the agricultural area. That means that the American farmer is paying for part of our foreign policy. The farmer is willing to pay for a fair and equitable portion, but he is not willing to pay for such an excessive portion as he is being asked to pay under current policies.

We could be selling our products abroad at a much higher price. We essentially set the world food prices through our target prices. We have been very generous and I think we have reached the time, referring to other countries with regard to their needs, when we can be much tougher.

What happens in international agricultural trade in the next 5 years will affect farm prices more than any target price, more than anything we do on the domestic front.

Mr. President, I yield the floor.

Mr. HUDDLESTON. Mr. President, before I yield to the distinguished Senator from North Dakota, I point out that we are still anxious to have any Member of the Senate who has a statement to make relating to the farm bill to do so now, during this period. Very soon, we hope to have the committee amendments presented for adoption, to modify the bill. From that point on, other amendments will be forthcoming.

There has been a great deal of discussion here about the cost of this bill and much interest in trying to reduce the cost, which certainly the committee has done. Every member of the committee has attempted in some way to reduce it. But I believe we should try to keep in proper perspective what we are talking about here.

Some of my colleagues already have indicated the tremendous value of agriculture to this country and what it means to the economy of this country. I believe there is no question that the agriculture production capacity in the United States is the greatest asset we have. Anything we would do that would be detrimental to that asset could have a long-range implication with respect to the future development of the United States and the future economy that can be devastating.

If we at this time permit large numbers of people to move out of that production field, if we allow at this time increased acreage to be diverted from agricultural production to some other use that could not be returned to agriculture in the future, and if we consider the future population estimates for this country and the world, one need not be a great mathematician to figure out that, somewhere down the line, the problem of supply and demand will reverse, and we will be hard-pressed to supply ourselves in this country, much less meet the needs of the world as we have been doing.

In looking at these figures, you could note that any one commodity returns to the Government in taxes more than the total cost of this bill. We should look as closely at other programs the Government is involved in as part of setting priorities; and that is the game we are playing this year—trying to determine what the priorities are for the resources of the Government, which we realize are limited and should be cut back.

One program in which I have had some passing interest in recent years is the refugee assistance program. It probably will come as a surprise to most people in this body and most citizens that we are going to spend more money for refugee assistance than this farm bill costs. Perhaps not fiscal year 1982, which includes the 1981 crops. But from that point on, the refugee assistance program of the United States will cost the American taxpayers more than this farm bill will cost.

I believe it is time we try to make some determination as to what our obligation is and to whom it is directed; and to make sure that we do not destroy the very assets that make it possible for the United States to be the most generous country in the world, not only in food

assistance but also in refugee assistance and all other kinds of foreign aid throughout the world.

I believe the farm bill costs are modest costs when we are talking about what we are trying to protect and continue to develop, the kind of foundation that will be necessary in order to meet our needs in the future.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. HUDDLESTON. I have promised to yield to the Senator from North Dakota, but I yield to the Senator from Montana.

Mr. MELCHER. Mr. President, I concur with what the Senator from Kentucky has said. We seem to be able to spend a lot of money abroad.

I believe we credit ourselves with spending \$10 billion to \$11 billion for foreign aid, in a reconciliation budget resolution and the President's budget. which is virtually the same as we have been spending for the past several years, and a great deal more than involved in any given year, for the farm program. Yet, the farm program is basic to the entire economy of this country and even as presented is a very mild, weak bill. As reported by the committee, it is a very mild, weak bill. I do not believe it is good enough as it came from the committee. I object to it very vigorously. But now we are asked by the administration to whittle away at it some more.

We say whittle some more at foreign aid and we will do our own economy better if we could put more of our dollars into our basic economy such as agriculture.

Mr. HUDDLESTON. I thank the Senator, and I yield to the Senator from North Dakota.

Mr. ANDREWS. Mr. President, I appreciate my colleague and good friend from Kentucky yielding.

Mr. President, I think it should be pointed out this is not a bill for agriculture. This is a bill for the Nation's economy.

I think we make a mistake when we talk about the fact that the farmer needs this help when presenting a farm bill. That is not the only reason we pass a farm bill. In fact, it is one of the lesser reasons we pass a farm bill.

When meeting with some of our colleagues from the European Economic Community, I have asked them, "Why do you support your wheat at \$9.60 and \$9.70 a bushel," almost three times as much as our price supports for wheat in this country.

I asked:

Do your farmers have that much more political weight? Do your farmers represent that much greater percentage of the population than they do here in the United States?

The answer I have consistenly gotten back is:

Oh, no, we do not support the price of our agricultural commodities to help our farmers. We support the price of our agricultural commodities to undergird our entire economy because farming is basic. It is the greatest producer of new wealth in our countries. And when the farmer does well the rest of the economy does well.

We have heard a lot of speeches in this Chamber in the last 5 or 6 months about international trade and about the fact that the United States is in a difficult position vis-a-vis our friends in Japan. We cannot compete in steel production, the production of ships, and the production of automobiles. In fact, Japan has a pretty good system going. They are producing consumer goods that the consuming public in the United States seems to prefer and buy by the hundreds of millions of dollars worth each year.

Yet in the nation of Japan their price support for wheat is some \$27.90 a bushel.

I think the American public should be aware, far more aware than we ever seem to be able to make them, that they do have a bargain in the food prices they pay here. The American farm family, in effect, is subsidizing the European Economic Community far more than any foreign aid program that we have ever had.

My colleague from Montana just pointed out that we should think about the farm programs. This is the place we should spend our money instead of expending it in foreign aid. And that is

But he did not go on to point out that when we send a boatload of wheat to the European Economic Community and it lands in Rotterdam, our friends in Europe tag an additional tax, an import fee, to it. If that wheat is landed at Rotterdam at \$4.50 a bushel and their threshold price is \$9 they add a tax of \$4.50 to that particular bushel of wheat and that tax goes to pay their governmental expenses.

How many consumers in this country and how many in the press recognize that the farm families of this Nation are doing more to subsidize governments of the European Economic Community than we are doing to help the underdeveloped countries through foreign aid.

For all of these reasons, the reasons so eloquently brought out by my friend from Kentucky and a host of others, I rise in support of the 1981 farm bill.

As several Senators have pointed out, this is a culmination of many weeks of hard work by the Agriculture Committee. We heard witnesses from every segment of the industry, as well as administration witnesses and held some 24 sessions marking-up the final version.

The bill certainly does not contain everything we all want. It is a far cry from what I would have liked to have seen or from some of the amendments that I introduced in the committee. It is a far cry from some of the amendments my good friend from Kentucky put in or even the chairman of the committee introduced in committee. But it balances the needs of farmers, consumers, and everyone else, and in a year of severe budgetary constraints, it comes out very close to the administration's request.

As our distinguished chairman has pointed out, this is the first time in the history of the Agriculture Committee that we have had to write a farm bill under such severe budget constraints.

There will be amendments offered to this bill, but I urge you to keep in mind that this is a fine-tuned piece of legislation and any changes that unbalance the bill, could be disastrous to the American farmer and in the end harm the American consumer the most.

Every American has a stake in a viable agricultural economy. Americans spend less of their take-home pay for food than almost any other nation in the world, and they have been able to do this because of our farm programs and the protection they afford the American farmer. Without these programs many farmers would go out of business.

According to the latest USDA figures the U.S. farm population numbered 6.1 million during 1980, about 2.7 percent of

the total U.S. population.

Over the last 2 years, there has been a decline of 450,000 farm residents. This means that 2.7 percent of our population is producing enough food to feed our own people, with enough left over to help feed a great part of the hungry world—this is a success story that would be hard to match by any other industry in our country. This level of agricultural productivity is unmatched by any other nation in the world.

We must be sure that this success story continues. Farmers cannot be expected to stay in business if the prices they receive for their production fail to cover the increasing costs of production. Today we are dangerously close to seeing many of our farmers go bankrupt, brought on by rising costs and declining prices. We can only stop this trend by passing a farm bill which allows our farmers to receive a fair return on their investment. I believe the farm bill we present to you today will afford our farmers the minimal protection necessary at the least possible cost to the Government.

Agriculture is the Nation's largest industry, and the American farmer is industry's and labor's biggest customer. The economic activity generated by agricultural production, processing, and distribution amounts to approximately 25 percent of the total gross national product. The entire Nation has a stake in the economic well-being of agriculture, as it is basic to the American economy and the American way of life.

If the farm income situation is allowed to continue deteriorating, the ripple effects will undermine the administration's economic recovery program. The Federal Government, in behalf of all U.S. citizens, has an obligation to establish a floor under commodity price levels to provide farmers with the marketing tools necessary to achieve supply stability. This stability is extremely important to the American consumer. Food is still the consumer's best buy. Only in the United States can you get an abundant supply of high quality food for 16 percent of your disposable income. This percentage has remained relatively constant in spite of steady increases in transportation, processing, and marketing costs.

But, most important of all, American agriculture has made the United States the "bread basket" of the world. In 1981 we will produce 45 percent of the world's wheat exports, 24 percent of all rice exports, 81 percent of soybean exports, and 72 percent of total exports of feed grains. Agriculture is a major earner of foreign exchange to help offset the staggering costs of oil imports.

I would like to take a few minutes to discuss several sections of this bill. The wheat and feed grains sections of the bill set target prices for these commodities well below the actual cost of production. While we assure this protection of a bottom price for our farmers, we have given the administration many tools to use to avoid having to make any target payments. Our farmers are not looking for a hand-out and the Government is opposed to making any target payments. We, therefore, have included discretionary authority in this bill for the Secretary of Agriculture to impose set-asides or a paid diversion plan to control the size of the harvest.

This is a step Secretary Block has already proposed for next year, by announcing his intentions to implement a 15-percent reduced acreage program for the 1982 wheat crop to offset the effects of record supplies and depressed wheat prices. The Secretary can, also, of course, establish a strong export market development program to increase our exports, creating more demand for our commodities.

The bill also continues the commodity loan programs for wheat and feed grains at minimal levels. USDA has acknowledged that net farm income will fall somewhere between \$20 and \$24 billion. These loans will provide a valuable marketing flexibility for our farmers. The loans lessen the necessity for farmers to sell crops immediately after harvest to pay immediate production expenses. It should be noted that loans are recoverable costs to the Government, rather than direct outlays which are never returned. In addition the farmers pay interest on these loans and during recent history the record of repayment is very good.

For the 1981 crop wheat and corn, the loan rates represent a 6-percent increase of the 1980 levels. Farmers' operating costs, however, actually increased by 14 percent per acre between 1980 and 1981 according to USDA figures.

Between 1981 and 1982, farm operating costs probably will increase at least 10 percent, which, in keeping with the President's promise to reduce inflation, is a conservative figure according to a number of forecasts. The new loan levels contained in the bill—\$3.50 for wheat and \$2.60 for corn—represent less than a 10-percent increase. It is the least we can offer our farmers and expect them to stay in business.

The section of the bill which provides for a nonrecourse loan program for sugar means growers of sugarcane and sugar beets can anticipate at least some measure of the kind of support the bill provides producers of other commodities. At 18 cents, the loan level represents only about 74 percent of USDA's estimated cost of production so there is no way this level of support can be interpreted as sustaining more than only the efficient producers. At the same time, however, the operation of a domestic sugar program will mean fair and stable prices for consumers and assurance of abundant supplies.

Other Senators have addressed the remaining commodities covered by this bill. I want my colleagues to know that I support the provisions of this bill as they pertain to all farm commodities. Agriculture Department statistics show that the production costs of all major farm commodities are higher than the market price. We must pass a farm bill that will protect these commodities if we are to continue to enjoy having an abundance of food at reasonable prices. This bill is the least we can afford to offer and I urge everyone to vote against any weakening amendments.

This legislation does not only contain our commodity programs, but also the programs necessary to expand our scientific knowledge of agriculture and strengthen our conservation practices to preserve our most precious resource—our land.

With world demand for food expanding and with ever-increasing inflation and other serious threats to our ability to produce an adequate food supply in the future, it is essential that we continue to emphasize those programs which will strengthen food production. Agriculture research plays an integral part in assuring that we can continue to keep up with the demands placed on our agricultural productivity.

The most dramatic of America's achievements has been its agriculture production. If you go back to the founding of this country in 1776, something like 80 to 90 percent of the people were on farms. It took 8 to 9 people, working full time—12 to 16 hours a day—to feed themselves and their families and perhaps one other person. We owe the advances I have mentioned before to agriculture research and scientific advancement.

Contrast the success of America's farmers with the fact that in countries such as Bangladesh, India, and Pakistan, 70 to 75 percent of the population is still in agriculture. In many of the new African nations 30 to 90 percent of the population is engaged in subsistence agriculture. These conditions continue to exist because those countries do not have the scientific know-how to increase their production, freeing up their people for other occupations. We must continue to expand our scientific knowledge.

The conservation programs authorized in this bill have and must continue to make a major contribution to the preservation of our soil and water resources. It is important that we preserve our agricultural system and protect this natural resource for future generations. When land is scarce, people often go hungry.

We must be good managers of our land by wisely planning its use.

For years it was believed that cheap raw materials made the United States a great Nation. However, we must remember that during the early years of our country's existence we wore out, used up, and destroyed vast amounts of this plentiful supply of natural resources. The continuation of such abuse could eventually reduce this country to a barren wasteland, incapable of feeding ourselves, much less a great portion of the rest of the world.

Aware of this task, we have recommended strong conservation programs to assure that our Nation continues to invest a portion of its wealth in the protection of our food production capacity and its preservation for future generations.

I hope that my colleagues will join me in supporting this bill. It is basic to our economy and way of life. A financially healthy agriculture is extremely important to the national economy, as it helps provide for financially healthy industry and labor.

I yield back my time.

Mr. HUDDLESTON. Mr. President, I yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I rise to express my deep concern to the Members of the Senate on the current depressed state of agriculture and on S. 884, the Agriculture and Food Act of 1981, and its impact or lack thereof on the serious problems of the family farmer.

Plummeting market prices resulting from excessive stocks, insufficient and unstable demand, and unprecedented high interest rates are plaguing our food plant as never before. I cannot stress enough to my colleagues in this body the severity of the problems in rural America. I cannot remember a time in the recent past when the future of our agriculture community has been so threatened or our food producers more discouraged. They realize that this is not a situation of their own making but essentially a product of our ongoing international cheap food policy.

The Senate is now considering legislation, S. 884, which is supposed to provide an environment of stability through market oriented programs designed to bolster our sagging agriculture sector and provide it with a program which will enable it to regain its economic health.

But, Mr. President, I wonder just how many of my colleagues are aware of, and if not they should educate themselves on, the tremendous escalation in farm costs just since the 1977 act was passed and to what extent S. 884 will fail to actually address these cost problems if enacted. I suggest that the commodity programs in this legislation are insufficient to cover even the most conservative cost of production estimates and will do little to improve the current situation on the farm. I am well aware of the budgetary constraints Congress has mandated for

the Federal Government including agriculture, but I must point out to the Senate, Mr. President, that S. 884 as reported by the Agriculture Committee is, in this Senator's mind, the rockbottom figure. Further reductions in commodity program levels will only exacerbate an already dire situation.

At this point, Mr. President, I recall for my colleagues my remarks of March of last year in which I addressed the agriculture situation citing a study which compared agriculture outlays to the total Federal outlays from 1948 to 1983 and the significant decline in the Government support for agriculture.

In particular, I shall point out a few very interesting figures on agriculture spending from 1975 to the present. Agriculture budget outlays in 1975 were \$1.6 billion of the total Federal budget of \$326.7 billion or 0.51 percent of the total. We see that from this time frame through 1978 an increase in agriculture outlays which in 1978 peaked at \$7.7 billion or 1.71 percent of the total national budget. It should be noted that this period from 1975 through 1978 was a time when the agriculture industry was experiencing a particularly severe decline in prices brought about by the farm programs of massive production in the early 1970's resulting in excessive domestic stocks. In 1979 we see a decline in agriculture outlays of \$1.5 billion or 1.26 percent of the Federal budget. As we look on to 1980 and beyond we see a marked reduction in outlays. We are once again in a period of oversupply and ever-declining market prices. These factors coupled with excessive interest rates and reduced in relation to our total Federal budget have produced the depressed economic conditions on the farm today. Estimates of Federal outlays for 1981 expenditures for agriculture are 0.41 percent of the total budget, less than a fourth of the 1948-79 average or over 2 percent.

I ask a rhetorical question, Mr. President: Has not the agricultural sector already made more of a contribution to the cuts in Federal expenditures than they should? Mr. President, they have already taken it on the chin.

These figures indicate that the American farmer is continuing to be hurt by thoughtless action here in this Chamber and elsewhere. The farmer is not reaping the benefits claimed by many but is in fact in a very serious decline with little hope of a significant upturn in the near future. Certainly, the levels provided in S. 884 are the bare minimum. Amendments to further reduce these supports for our major commodity programs offered under the guise of economic recovery are at the farmer's expense. Mr. President, I say to my friends in this body, agriculture has taken more than its fair share of budget cuts already and to suggest that we continue to slice away in the name of fiscal responsibility is folly on our part and will spell disaster for many farming operations in the farm belt of America.

Mr. President, to emphasize the points I have made regarding the seriousness of the current agriculture situation, I would bring to the attention of the Senate the decline in overall farm income in recent years. Net income dropped from \$31 billion in 1979 to \$22 billion in 1980, a decrease of some 29 percent. Real net farm income in 1980 plunged to \$12.1 billion from \$19.1 billion in 1979, a drop of 37 percent. I fear that the 1981 income figures will show a continuation of this decline.

The American farmer is an invaluable part of our Nation's economy. Agriculture is one of the last things this country does well as a result of the genius of the American family farmers. Our food producers have shown their ability to adapt and vastly improve yields. This efficiency, however, is not guaranteed to last. We cannot expect our farmers to continue to produce with little or no opportunity to realize their costs plus enough profit to feed their families.

I know of no farmer who expects the Government to guarantee him a living. What he does ask for is a Federal program which will enable him to plan ahead with the knowledge that there is a program available to provide a reasonable floor and to assist when it becomes necessary. I am not convinced, at this juncture, that S. 884 as reported from the Senate Agriculture Committee will be such a pragmatic program but I am sure that amendments seeking to emasculate further these commodity programs will surely drive the number of family farming operations in this Nation ever downward.

I would like an explanation, if I could have one, Mr. President, from those who are proposing to reach some kind of a "compromise" on this bill, to explain to this Senator from Nebraska what essential changes have been made in the farm bill on peanuts. I suspect very little change has been made.

I recognize and realize that tobacco is not a part of this bill, but it is alined and akin thereto. I suspect there is going to be no change in the tobacco program.

I was prepared earlier as one Member of the Senate to basically vote against some of the attacks in the form of amendments that were going to be offered by several Members of this body because I felt it was important, frankly, to hold together the compromise, the coalition, if you will, that has tried to serve the American family-sized farmer.

But I see some cracks in that coalition; I see some cracks in that coalition with the advice and help of obviously the President of the United States. I suspect that peanuts and tobacco are not included essentially in the cuts because they are a part of the deal that was cut by the White House to make sure the President's tax and budget bill were passed.

As one Senator, I do not have the authority to make deals as does the President of the United States, but I think that, when we are talking about the fairness of a farm program or any other pro-

gram we had better realize and recognize that whoever is at 1600 Pennsylvania Avenue should not be dictating to the U.S. Senate or the House of Representatives what we should have in a farm bill.

Mr. HUDDLESTON. Mr. President, will the Senator yield at that point? Mr. EXON. I am happy to yield.

Mr. HUDDLESTON. Let me comment just briefly on the question of peanuts and tobacco. Peanuts are in the bill. The program has been scaled down, and the proposal that will be submitted as a committee package of amendments has been scaled down not only from its original version by the Senate Agriculture Committee but also from the House version.

I have read newspaper reports that the administration had agreed with somebody on the House side that it would accept the House version of the peanut bill. That has not been communicated to me, and I do not know whether it has been communicated to anybody else on this side of the Capitol. At any rate, the peanut program is in the bill at a lesser cost, and it is in the package of amendments at a lesser cost than was in the bill.

Tobacco is not in this bill. Tobacco is under a separate program and, consequently, is not covered by this farm bill. Tobacco has, however, sustained a reduction, if we might want to call it that, because the tobacco growers have had to pick up the costs of grading and inspection that previously the Government had been paying.

Also, the interest rate that is used by the Commodity Credit Corporation for the loans that are made by the co-ops to take the tobacco into pools has also been increased.

So, tobacco has sustained a reduction too, in keeping with the idea that, across the board, all programs are going to suffer some kind of reduction.

. I mention it at this particular point since the Senator has made reference to it

Mr. EXON. I thank my friend from Kentucky and I appreciate very much his explanation.

If he wishes to respond further, I would very much appreciate it because I, for one, am seeking a little bit of information, and there may be other people who are seeking other information.

I do not know anything about peanuts, we do not raise peanuts in Nebraska, but I have been led to believe that the peanut program is one of the best programs for the producers that you can imagine, and I would suggest that anybody looking at the meager modifications that I see on the bottom part of this sheet called the Committee's Compromise would have to agree that peanuts are not hurt very much.

I am not suggesting that they should be, but I am suggesting that if there is a farm program today that could be cut substantially as opposed to other farm programs it is peanuts.

I certainly said in my remarks that I recognized and realized that tobacco

was a separate program. The committee has taken action on this bill with the committee amendments that I understand are going to be offered by the chairman of the Committee on Agriculture, and have been agreed to by the ranking minority member.

Has the committee discussed or taken up what changes are going to be made in the tobacco program?

Mr. HUDDLESTON. Well, the committee has not because the tobacco program is not in this bill. There is some anticipation that there may be an amendment affecting the tobacco program offered before final consideration of this bill is completed. Speaking as one Senator, I know what position I am going to take, but the Committee on Agriculture, so far as I know, has taken no position on it.

Mr. EXON. Would my friend, the ranking member of the Agriculture Committee, tell me when the Agriculture Committee met and agreed to this "compromise" that I understand was shoved on the committee by the White House?

Mr. HUDDLESTON. The Agriculture Committee met in informal sessions on Wednesday, Thursday, and Friday of the past week; and it was on late Friday afternoon that that part of the package which could be agreed to was agreed to, which included all of the commodities with the exception of the dairy program. No agreement was made on dairy and that is right now being considered by certain members in an attempt to put together a workable position there.

Mr. EXON. Do I understand the ranking minority member to say that there was actually a majority vote on the Agriculture Committee and it was held sometime Friday?

Mr. HUDDLESTON. Yes, there was a vote taken of those present.

Mr. EXON. May I inquire for the record as to what was the vote? What was the vote to agree to this compromise?

Mr. HUDDLESTON. The vote was: Do you agree to this compromise? Aye. And do you not agree to it? Nay. And the majority present agreed to it. I do not have the actual numbers and I do not have the individuals.

Mr. EXON. Was it a rollcall vote or just the yeas and nays?

Mr. HUDDLESTON. It was not a rollcall vote. Ten members have signed the proposal, so that would indicate more than a majority.

Mr. EXON. How many members are on the Agriculture Committee?

Mr. HUDDLESTON. Seventeen.

Mr. EXON. Was the vote unanimous? Mr. HUDDLESTON. Ten voted for it. Mr. EXON. All 10 there voted for it?

Mr. HUDDLESTON. Ten signed it and obviously voted for it. I am not the secretary of the committee, I say to the Senator.

Mr. EXON. At this time would it be appropriate for me to ask the ranking minority member to read into the RECORD those 10 people who signed this compromise?

Mr. HUDDLESTON. I do not know that it is appropriate or not appropriate.

Mr. EXON. Why would it not be appropriate?

Mr. HUDDLESTON. If I have the names here, I will be glad to read them.

Senators Helms, Huddleston, Dole, Pryor, Cochran, Dixon, Jepsen, Heflin, Hawkins, and Andrews.

Mr. EXON. And the rest of the committee was absent and not voting?

Mr. HUDDLESTON. No, I did not say

Mr. EXON. Is it possible for me to find out if there was any opposition in the committee to the reporting out of this amendment?

Mr. MELCHER. Will the Senator yield?
Mr. EXON. I will be glad to yield, but
I do not want to preempt my friend
from Kentucky.

Mr. HUDDLESTON. There are other Members on the floor who can speak for themselves. Obviously, there was opposition. Mr. MELCHER. Will the Senator yield? Mr. EXON. I am glad to yield to the Senator from Montana.

Mr. MELCHER. I am a member of the committee. I am adamantly opposed to the package.

Mr. EXON. I thank my friend for the explanation.

Just let me close then by saying, Mr. President, I have a number of supporting documents that prove out on the facts that I have made with regard to the ever-declining portion of the Federal budget that is going to agriculture programs. I ask unanimous consent that they be printed in the Record at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EXON. Mr. President, my final word on this subject then is simply to

say that I hope that the compromise which has been forced on the U.S. Senate, I suspect, by the White House is not agreed to and that we will back the original decision of the Agriculture Committee by not going below S. 884 as they reported out to this body and was what most of us thought would be in place as the committee recommendation when we were to take up this bill today.

I was, frankly, quite surprised and a little bit shocked to find that after all of the deliberations and all of the hearings that I am sure the Agriculture Committee held, that suddenly, out of meetings on Wednesday, Thursday, and Friday, a rather significant change had been made in some of the programs. I object and I hope that enough of my colleagues will agree.

Mr. President, I thank the Chair, and I yield the floor.

EXHIBIT 1

OMB HISTORICAL TABLES OF FEB. 1, 1980

AGRICULTURE OUTLAYS COMPARED TO TOTAL FEDERAL OUTLAYS, 1948 TO 1983 (ESTIMATE)

[In millions]

Year	Agriculture outlays	Federal outlays	Percent	Year	Agriculture outlays	Federal outlays	Percen

 The marketing certificate value.
 The marketing certificate value.
 The marketing certificate payment rate was the difference between the price received by farmers the 1st 5 mo (July-November) of the marketing year and 100 percent of wheat parity on July 1. An advance payment equal to 75 percent of the estimated face value of the certificate was made to eligible producers.
- 10 Established target price, guaranteed on production from allotment acreage.
 11 Established target price on planted allotment acreage; established target price on unplanted allotment acreage was \$2.47.
 12 Established target price.
 13 Preliminary.
 14 Target price \$3.63 if planted within NCA; \$3.08, if exceeded NCA,
 15 Loan rate for regular loans/loan rate for wheat in the farmer-owned reserve.

Note: For statistics for 1933 through 1959, see Wheat Commodity Fact Sheet for 1979.

Mr. MELCHER addressed the Chair. The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. Mr. President, the abundance of this country has provided a great amount of surplus commodities at times. At this particular time, we have a great abundance resulting in a great surplus of dairy products. We have dried milk, butter, and cheddar cheese in storage in huge quantities.

The butter that we have in storage was a subject of negotiation by several countries during the past several weeks. Russia would have liked to have purchased a sizable amount of butter that we have in storage at a little over a dollar a pound.

We ended the grain embargo with Russia. The grain embargo, when established by President Carter, met with mixed feelings in this country. Grain producers felt that it unjustly penalized their particular industry while other types of American goods were still being sold to Russia. It became an item in the campaign, and President Reagan during the campaign, on several occasions, said if elected President he would end that grain embargo. He fulfilled that promise after considerable hemming and having by various members of the White House and the President's Cabinet adviser advising him one way or another. But he did end the grain embargo.

Among those that were recommending that the grain embargo not be ended in the President's Cabinet was Secretary of State Haig. When the situation arose on the possibility of selling butter out of storage to Russia, Secretary Haig very vigorously opposed it as, I believe, using "sending the wrong terminology

Other countries offered to purchase butter from the United States. The question arose: Would these other countries in purchasing butter from the United States then resell it to Russia?

New Zealand offered to purchase butter from the United States in large quantities. They made an offer of some 70 cents a pound for half of the butter surplus that we have in this country in storage as of August. The world price on butter is \$1.05 per pound. So their offer of about 70 cents, 70 point something cents, was not an attractive offer.

Their offer, in effect, if accepted, as compared to the world price of butter, would mean that we would lose \$30 million accepting their offer.

Secretary Haig seemed to find favor in the offer, however. Having blocked any sale to Russia or any other country that he found some problem with, he was silent, seemingly, to approve the sale to New Zealand. The term of the sale to New Zealand was that they would not resell the butter to Russia. But the term of the sale left open this great big loophole that it could be sold from New Zealand to Russia as butter oil. What difference it makes, I am not aware. Whether that would send a "wrong signal" to Russia, I do not know. It is obvious that a small country, a very tiny country, which as a dairy surplus of their own really does not need half of the excess butter that we have in the United States.

Offering slightly over 70 cents per pound in getting the agreement for us to sell it to them obviously gives them quite a bit of leeway between 70 cents and \$1.05, the world price. They would probably be able to return a very neat profit on the deal.

But that is not the worst of it. The worst of it is that part of the contract of the sale with New Zealand is that we would agree not to sell any other butter abroad for approximately 1 year.

We can get around that by asking them for their permission.

I do not really know what this means, why we first of all turn down offers from other countries at the world price, and, second, make the agreement with New Zealand saying, "Well, no, you cannot sell the butter to Russia but you can convert it into butter oil and sell it to Russia." And, furthermore, saying to ourselves that we also accept as a contract that we will not sell any more butter abroad unless New Zealand says it is all right.

It seems to me that, on the face, we sort of give up a little bit of our sovereignty. We are not only suckers for selling below the world market, though we had offers; we also say to New Zealand, "You can control whether or not we sell anything more abroad, even though we have it in storage and it costs us dearly to keep it in storage."

This leads me to a further point. We have had a very rapid drop in the price of wheat. Granted, we have had a large crop, another bountiful harvest, a huge crop. We thank the Good Lord for that abundance. But the price has dropped very rapidly.

We raised about 2 billion bushels of this huge crop to sell abroad. We will probably have a crop somewhere in the neighborhood of 2.6 billion or 2.7 billion bushels this year, and we will use 600 million to 700 million bushels for our domestic needs. It means that about 2 billion bushels of the 1981-82 crop is only grown here in the United States to sell abroad.

The rapid drop in the price leads me to wonder whether or not the Secretary of State, Mr. Haig, is involved in blocking, in disrupting, in sidetracking, in preventing in any way he can any negotiations with Russia, which has a severe shortage of grain; whether, as Secretary of State, he is thwarting any effort on our part to have grain sales to Russia. If so, he is inflicting on this country not only a staggering loss for wheat producers, with a declining market, but he is also hurting the economy of the United States and hurting our balance of payments.

The situation smells, Mr. President. The action by the Secretary of State in selling commodities that are in surplus in this country is a very harmful action in the case of the butter sales.

I ask unanimous consent to have printed in the RECORD at this point a document showing the details of the New Zealand butter sale.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

NEW ZEALAND BUTTER DEAL

220,460,000 pounds of butter (100,000 metric tons). This is 80 percent butterfat product. The price was \$1,550 per ton (70.3 cents per pound). The cost to New Zealand Dairy Board, ex warehouse is \$155,000,000.

Making the following assumptions concerning transport, handling and conversion costs, the Dairy Board would be looking at a cost structure as follows:

- Movement of product from warehouse to ocean port and loading aboard ship. Trade sources indicate five cents per pound fully adequate to cover these costs. Add \$11,023,000.
- (2) Ocean freight to north European port. It is probable that shipment would go that way rather than to New Zealnd as it would be closer to the ultimate destination. Again, trade sources indicate eight cents per pound will cover these costs. Add \$17,636,800.
- (3) Cost of conversion to butteroil. Estimated at six cents per pound. Add \$13,227,600.

Total cost of product, converted to butteroil and positioned at north European ports

Butter	\$155,000,000
Land transport	11, 023, 000
Ocean transport	17, 636, 800
Conversion	13, 227, 600

196 887 400

Butteroil is 99.8 percent butterfat. The 220,460,000 pounds of 80 percent fat butter would yield 176,721,440 pounds butteroil. The above would mean the butteroil would have a cost of \$1.114 cents per pound.

Traders indicate that butteroil prices on the world market are currently in the \$1.19 to \$1.25 per pound range. At \$1.19 per pound, the butteroil has a value of \$210,298,510.

The contract calls for payment within 180 days of invoicing. Billing is to be done monthly. If, on average, there is a 15-day lag between removal from warehouse and the date of payment. Assume a 45-day period for transit, reprocessing and resale. This would give the Dairy Board 150 days average to use the funds before paying the Commodity Credit Corporation. If interest during the period average 15 percent, the funds from the resale would yield \$12,963,607 prior to payment being due.

Thus, total potential return	would be:
Butteroll	\$210, 298, 510
Interest	12, 963, 607
	223, 262, 117
Less	196, 887, 400
Margin	26, 374, 717

CONTRACT FOR SALE OF BUTTER

Agreement, made in the City of Washington, District of Columbia, on August 5, 1981, by and between the New Zealand Dairy Board, a quasi-governmental agency of the Government of New Zealand (hereinafter called New Zealand Dairy Board), and the Commodity Credit Corporation, an agency and instrumentality of the United States within the Department of Agriculture (hereinafter called the "CCC").

Whereas, the parties to this agreement mutually agree as follows:

Quantity

CCC agrees to sell and the New Zealand Dairy Board agrees to buy 100,000 metric tons of butter, 10 percent more or less at buyer's option.

Quality

A. Butter shall be U.S. Grade A or higher at the option of CCC. The U.S. grades will be determined in accordance with the United States Standards for Grades of Butter, effective April 1, 1977.

B. Butter shall not have been manufactured more than 40 months prior to date butter is loaded out from the U.S. ware-

C. The last certificate of grade for the butter shall not have been issued more than six months prior to the date the butter is loaded out from the U.S. warehouse. New Zealand Dairy Board, at its option, may request, prior to loading out from the warehouse, regrading of any butter which was last graded more than 90 days prior to the date of load out from the U.S. warehouse. Such regrading will be for the account of CCC.

D. New Zealand Dairy Board may at its option reject at time it is loaded from U.S. warehouse, butter with peroxide values in

excess of 0.25 meg oxygen per kilogram.

E. Testing procedures in determining the grade, weight, and fat content shall be in accordance with the following CCC procedures:

1. Notice to Graders dated January 25, 1980 (DA Instruction No. 918-11).
2. General Instructions for Inspection,

2. General Instructions for Inspection, Grading and Grade Labeling of Butter dated June 12, 1980 (DA Instruction No. 918-10).

 Methods of Laboratory Analysis for Moisture, Fat, Salt, Curd, and PH dated November 30, 1972 (DA Instruction No. 918– 101-1).

Packaging and packing

A. Package Description—Butter will be packed in units of 68 pounds marked net weight in fiberboard shipping containers (1.1 cubic feet per container). Each container shall be lined with a vegetable parchment paper or a polyethylene bag or wrapper accepted by Food and Agriculture Organization/World Health Organization.

B. Package Markings—Containers will be marked to show name and location of manufacturing plant or plant number, name of product, churn number, and marked net weight.

C. Damaged Packaging—Buyer has the right to reject at time it is loaded from U.S. warehouse butter in damaged packaging.

Price

A. The purchase price of the butter shall be U.S. \$1,550 per metric ton f.o.b. conveyance designated by buyer, at U.S. warehouse where

stored. Ownership shall pass when the butter is loaded and a carter's receipt (bill of lading) is issued detailing the tonnage loaded and the date. The purchase price is based on the understanding that in order to market the butter it will have to be converted to butteroil.

B. Should the buyer claim that the butter fat percentage is less than 80%, the seller has the option to agree to the buyer's assessment or dispute it. Any dispute will relate only to quantities that the buyer can produce for re-testing and will be resolved by drawing samples and re-testing to CCC testing procedures prescribed in Section Two, E hereof. The number of samples and the testing authority will be determined by mutual agreement. No claim for reduced butterfat content will be recognized if made more than three months from load out date. The discount for reduced butterfat content will be US \$2.60 per 1/10 of each percent of butterfat reduction. Cost of re-testing will be borne by seller if the butterfat content is less than 80%; otherwise the cost of re-testing will be borne by buyer.

Payment

The CCC will invoice the New Zealand Dairy Board for butter on a monthly basis and the New Zealand Dairy Board will pay cash against documents at 180 days from invoice date. Payment will be against the following documents:

Seller's invoice and three copies.
Certificate of Origin and three copies.
Certificate of Quality and three copies.
Veterinary Certificate and three copies.
Specification and three copies.
Warehouse Packing List and three copies.

Delivery

A. The Buyer will uplift from CCC warehouses at a rate of not less than 5,000 tonnes per month on a cumulative basis September 1981 through June 1982.

B. Within the constraints of CCC's desire to move oldest product, CCC will do all possible to keep the buyer's costs to a minimum by providing product from warehouses as close to the buyer's nominated load port as possible and in sufficient volumes to keep transport costs to a minimum.

C. The buyer and seller will agree on warehouses for load out and for each warehouse the rate at which load out can take place and will agree on the timing of the load out before the buyer presents transport to the warehouses. The buyer will present transport on time and of sufficient capacity. Should either party fall to meet his obligations, then, subject to force majeure, the consequential costs will be for the falling party.

D. Load out temperature will be no greater than zero degrees Fahrenheit.

Export requirements

A. New Zealand Dairy Board shall export and shall take such precautions as are necessary to prevent reentry of the butter into the United States. New Zealand Dairy Board shall, within a reasonable period from taking delivery of the butter from the U.S. warehouse, furnish evidence of such exportation. The evidence of export may be in the form of a signed onboard ocean bill of lading.

B. If the butter or any part thereof is not exported or is reentered into the United States, the purchase price specified in Section 4 with respect to the quantity of the butter which is not exported or which is reentered into the United States shall be adjusted to domestic unrestricted use price of \$1.67 per pound.

C. Any upward adjustment of the purchase price stated in Section 4 for the butter not exported or reentered into the U.S. will not be made to the extent that the General Sales Manager determines that:

1. the butter acquired from CCC was lost, damaged, destroyed, or deteriorated and the physical condition thereof was such that its entry into domestic market channels will not impair CCC's price support operations, but if insurance proceeds or other recoveries such as from carriers exceed the purchase price of the quantity of the butter lost, damaged, destroyed, or deteriorated, plus other costs incurred by Buyer in connection with such butter prior to the time of its loss, the amount of excess shall be paid to CCC, or 2. the butter was reentered into the

United States due to causes without the fault or negligence of Buyer and was subsequently actually exported in accordance with the

provisions of this agreement.

D. Any upward adjustment of the contract price under the foregoing Subsection (C), with respect to any butter exported. will not be made to the extent that the General Sales Manager determines that the butter was, subsequent to exportation, lost, damaged, destroyed, or deteriorated so that it could not be used.

Force majeure

Neither the New Zealand Dairy Board nor the CCC shall be liable for any failure or delay in complying with their respective responsibilities under this agreement caused in whole or in part by force majeure which shall include, but not be restricted to, acts of God or of the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather; how-ever, in every case the failure to perform must be beyond the control and without the fault or negligence of the party to the contract seeking excuse from liability.

Special terms

A. The New Zealand Dairy Board will not sell this butter to the USSR.

B. In the event of a major change in international market prices during the period this agreement, both parties shall consult as to its effects, and agree on equitable adjustments to the prices for subsequent shipments. Should opportunities be found to sell some USA butter as such, then the Board would be willing to discuss with CCC

an appropriate price adjustment.

C. Except for official aid or for restricted welfare uses, CCC agrees not to sell for export any butter until July 1982, unless approved by the New Zealand Dairy Board.

D. The buyer has no wish to frustrate special sales provided both parties are agreed that such sales do not in any way affect the international butter market or the buyer's rights under this agreement. The parties will confer on such sales which will not take place without mutual agreement.

E. The seller agrees that should it be deemed necessary to offer for export sale any tonnage of butter after July 1982 then the New Zealand Dairy Board will have the first option to purchase such offerings up to December 31, 1982.

F. To facilitate the smooth execution of this contract it is envisaged that the buyer's representative will be present at the store before and during the load out. The CCC will make all reasonable efforts to assist the buyer's representative in such en-

Contingent fees

New Zealand Dairy Board warrants that it has not employed any person for the purpose of obtaining under this contract a commis-sion, percentage in the way of a brokerage fee, or additional fees, with the exception of trusted employees and trusted commercial agencies established by New Zealand Dairy Board with the object of obtaining such contracts and that it has not made and will not make any such payment. Without limiting the other rights which it may have, breach

of this provision will allow CCC to cancel this contract, with no responsibility on its part, and at its discretion, to add to the

Mr. MELCHER. Mr. President, I now wish to turn to other matters that are in the farm bill, one of which is the soil and water conservation program. I point out to the Senate that one of the most important and difficult topics facing America today, one that is certain to become more and more important in the years to come, is the protection of our Nation's productive agricultural lands.

This issue has always been difficult to fully comprehend. How can this Nation have a problem when we have a record wheat and corn crop in 1981? Why should we be concerned with the protection of farmland productivity when there is an abundance of food in Americawhen we are able to export billions of dollars worth of farm commodities each year-and when farmers face depressed prices because of the abundance of this year's crop?

The answer, of course, is that we have abundance for many reasons: The productivity of our resource base; our ability to pour large amounts of capital and technology into each acre; and last, but far from least, favorable weather.

In the early spring of 1981, the United States faced the distinct possibility of a drought that would have had calamitous effects on our farmers, on food prices, and on our national economy. Virtually every area of the Nation was vulnerable, and it seemed like only a miracle could prevent disaster. We got that miracle in most areas. By May and June, heavierthan-normal rainfall had occurred over much of the Nation, and crop prospects had gone from dismal to very bright.

It would be extremely shortsighted, however, to base national policy on the need for a miracle each year.

As the weather has been showing tendencies to be more and more variable and unpredictable, and as inflation and high interest rates have driven up the costs of modern farming to astronomical levels. we really only have one asset upon which to depend.

That is the productivity of our farm-

When fertilizer gets so expensive that farmers and ranchers apoly less, and when the weather falls a little short of optimum, the land must have the resilience and natural productive strength to vield a profitable crop. If it does not, we face serious challenges, both at home and in our dealings with the rest of the world.

Today, we debate a new farm bill, one that not only looks at the Federal programs that affect the growing and marketing of crops, but which also takes a hard look at the programs that help farmers keep the topsoil in place and the soil productive for this and future generations. It is important that we not be superficial in this debate, and that we not take for granted the sufficiency of our resource conservation efforts.

It is my view-borne out by the appraisal carried out by the Department of Agriculture under the auspices of the Resource Conservation Act—that soil erosion, water, waste, and other forms of

resource damage are occurring at intolerable rates.

Soil erosion is worse today, in terms of its effect on our Nation's most pro-ductive lands, than it was in the dust bowl days of the 1930's. We are producing record crops, but we are causing record damage in the process. This cannot

Our conservation programs, which largely date from the 1930's and the 1950's, have changed little in the past decade. Most of the trends, in terms of effectiveness, have been downward.

As Federal funds have become harder and harder to obtain, and the purchasing power of each available dollar has diminished, it has been more difficult to appropriate enough money at the Federal level to keep the Federal effort from withering away.

As a result, Congress enacted the Soil and Water Resources Conservation Act of 1977. In this landmark conservation legislation, we asked the Department to take an intensive look at the Nation's soil and water.

We requested a report on the condition of our lands, the trends that are affecting them and what these trends might mean for the future. That final report is now available. The scenario it paints of the future is not comforting. Let me cite a few examples.

Despite a significant investment in conservation practices by private landowners, as well as Federal, State, and local governments, soil erosion from agricultural lands is estimated to be nearly 4 billion tons per year, with half that loss occurring on croplands.

Some lands are being severely damaged. On 12 percent of our Nation's croplands, and 17 percent of our rangelands, we face the task of either stopping those losses or writing those acres out of our productive inventory within a few short decades.

We are ruining a significant portion of our productive strength.

While it is difficult to predict with any certainty, it has been estimated by several experts that the loss of productivity on the Nation's croplands over the next 50 years will be the equivalent of between 25 and 62 million acres.

To get some idea of the magnitude of that loss, 25 million acres could produce 50 to 75 million metric tons of grain, half the total exported from the United States in 1980.

If we lose 62 million acres, it could represent the loss of virtually all of 1980's exportable surplus. Such losses would be an economic tragedy to American agriculture and to the American economy.

In addition to soil erosion and cropland conversion, there are other forces at work that push down productivity. These include the loss of organic matter, soil compaction, increasing salinity and alkalinity of both soils and irrigation waters, and the loss of economical supplies of irrigation water.

In the past few years, the effect of soil losses has been hidden by new crop varieties, fertilizers, better control of pests and diseases, improved tillage, irrigation and the shifting of crops from marginal lands to new, more productive acres.

Some opportunities to increase productivity still exist. But they are getting more and more limited each year. In particular, it may become more difficult to find new lands that will be highly productive and economically profitable. We are rapidly nearing the end of the supply of good cropland.

In 1977, USDA estimated there were some 127 million acres of potential cropland remaining in the Nation. That, added to the 413 million acres already in cultivation, would give us a total of 540 million acres to use for crops.

That seems like a tremendous resource, but we should not be complacent. Several regional studies indicated that the 1977 estimate was too high. Since 1977, many millions of acres have been converted to crops. At the same time, conversion of cropland and potential cropland to other uses continues at a rate estimated to be somewhere in the range of 1 to 2 million acres each year.

In other words, by 1982, we may very well see that the farmers of the United States are farming most, if not all, of the lands that are economically feasible for crops. The Nation's productive resource base is huge and fantastically productive, but it is not limitless.

Water supply will become a greater problem, particularly in the arid and semi-arid regions where it is already short and where the competition from urban growth, energy production, and other industrial efforts is growing.

Agriculture is by far the Nation's largest single consumer of water, accounting for 83 percent of total water use, some 89 billion gallons each day.

Irrigated agriculture produced 27 percent of the value of farm crops harvested in 1980, on only 12 percent of the harvested acres. Most of that irrigation takes place in the 17 Western States, which harbor 5 out of every 6 irrigated acres in America.

The Water Resources Council has estimated that water consumption will increase almost 27 percent between 1975 and 2000. In regions where water supplies are limited, that means increasingly intense competition for the available supply.

Most of the time, that means agriculture will lose out, because other uses can nearly always afford to pay more for water.

What all this means is that the Nation faces a limit on the amount of farm products that can be grown for sale at home and abroad. Based on the rates of loss experienced in the decade between 1967 and 1977, our total land available for economic production could shrink to somewhere in the range of 500 million acres by the turn of the century.

What is really uncertain is how much crop we can grow, for that is almost entirely dependent on the yields we are able to coax from the land. American farmers have, with the aid of Government, industry, and their own hard work and ingenuity, steadily raised crop yields over the years. If that trend could continue, we would need less acres to meet

our growing needs. But a look at the numbers and the forecasts are not particularly comforting on this point.

Average crop yields have recently been rising at the rate of about 1 to 1½ percent a year. If they continue to trend upward at the rate of about 1 percent per year until the turn of the century, producing the basic food and fiber that we need here at home, plus a level of exports equal to what we sold abroad in 1977, would only take somewhere in the range of 400 million acres of cropland in the year 2000.

If we get those yield increases, we could double the 1977 level of exports by using about 500 million acres. Since we have already increased exports over half since 1977, a doubling by the year 2000 would represent a very slow growth over the next two decades. Some experts feel 500 million acres is about all the land we should realistically count on for economically productive cropland by the year 2000.

In other words, the recent rate of growth in farm exports may have to slow dramatically, and average per-acre yields will have to continue to rise, because of the limits on our land base and the rates of damage it is currently suffering.

One more word about the importance of agricultural research and development—if those per-acre yield increases are not realized—if we should somehow get to the year 2000 with average production somewhere near 1977 levels, we would be hard pressed to meet domestic needs and export even the relatively small amounts that were exported in 1977. Such a situation could force us to cut today's export levels dramatically.

These are the projections that the Resources Conservation Act have given us. They are not predictions—they are the extension of trends we see in motion today.

Those trends must be slowed immediately, and reversed wherever possible. The conservation measures in the 1931 farm bill before us can start that process, but I must, in all candor, admit that they will not meet the challenge. They are only a beginning. However they are an important beginning that the Senate should strongly support.

Several sections of the bill are important in this effort. We must have accelerated agricultural research and education—particularly in methods of producing higher yields with less soil damage and water waste. We can no longer continue the trend of mining more soil as we grow more grain. In several places, this bill urges the improvement of both the research and educational programs in USDA

But research and education are strategies for the mid-term future, 10 to 20 years away. New research, started tomorrow, may yield a practical result that is available to farmers, but only after several years of effort.

The new technology that will come on line in 1982 will be the product of research in the 1970's, a decade when research budgets were shrinking, and new scientists were rarely hired, and new projects were difficult to start.

What we can do immediately to meet

our need for productive land is accelerate efforts to protect the soils we have.

Topsoil that does not wash or blow away this winter will be available to help bring added crops to harvest next fall.

Prime farmlands saved from a shopping center or airport will continue to produce, both in 1982 and beyond.

Newly irrigated lands will grow more crops than before, and wet croplands that are drained will produce quick yield increases. These are steps that can be taken now, and we will see immediate results in productivity.

It is time we faced the facts. Productivity in American agriculture is absolutely essential to national strength, but it is no accident. Productivity is the result of the investment of time, care and proper management by millions of American farmers.

We must support those efforts, today more than ever before, if we expect this Nation to continue to grow and prosper in these difficult economic times.

Making new investments in productivity will not be easy, in the face of competing national priorities. We have just gone through an anguishing process of cutting Federal spending in many areas and holding it down virtually everywhere.

I point out that when we cut out money for agricultural conservation practices, we are cutting out the very future of this country. We have been doing that over the period of years by holding steady at \$190 million a year for agricultural conservation practices, and this year we are even reducing that amount. I believe we are cutting off our nose to spite our face. We are damaging the future of this country. We are placing in jeopardy the opportunity to increase our capacity for more production, and we are placing in jeopardy the opportunity to remain as productive as we are right now.

But we must be very careful in this process of budget cutting. I believe we have gone too far with respect to agricultural conservation practices. If I had my way, we would be increasing it, not decreasing it.

We decry the need to reduce social programs, but food—at affordable costs—is the most basic social need of all, and if we do not protect the productive lands that can produce that food, we are going to be in trouble.

I support the need for a strong national defense, but we cannot simply build a ring of missiles around the Nation and pretend that we have protected its strength. There must be productive strength inside that border to make defense necessary, and the basic elements of that strength must come from the land, no matter what the weather or the world markets or the national economy.

It was with these concerns in mind that the Agriculture Committee has drafted title XV of S. 884. We were painfully aware that the program changes we propose are only part of what is needed. We did not, and still do not, have an official proposal from USDA as to how they would like to improve the conservation programs.

We did not have the chance to hold the extensive hearings, and take the time, that development of a whole new program might take.

But we did have the concern of the members of the committee, and the results of many hearings, and the input of many witnesses. We developed some modest steps that can be taken, and that we feel must be taken, to begin the process of strengthening the national soil conservation effort.

Subtitle A of title XV requires the Secretary of Agriculture to submit a report to Congress not later than December 31, 1981, outlining a comprehensive national policy on soil and water conservation with recommendations on improvements of existing program authorities. This was contained in the administration's farm bill proposals and has been consistently supported by Secretary of Agriculture John Block. Tentative proposals for this policy and program document have already been made public, and we anticipate that they will be finalized in time to meet the deadline.

We look for this to provide the basis for Congress to continue beyond the relatively modest efforts outlined in S. 884 and consider a complete overhaul of the total soil conservation program. This report is similar to the one required by December 31, 1979, by the Soil and Water Resources Conservation Act of 1977. Since it will be late by at least 2 years, many of the elements it will contain have had a great deal of public discussion and debate.

For that reason, we in the committee feel confident about moving forward at this time with the remainder of the proposals contained in title XV. They are reforms and directions consistent with the needs shown by the RCA study, as well as the public response to the many proposals that have been tested by USDA.

Subtitle B establishes the special areas conservation program to provide accelerated technical and financial assistance in areas presently affected by serious erosion problems.

Such areas have been identified in many areas of the Nation, in virtually every State. They are areas where the severity of the soil erosion or water conservation problems is so bad the standard soil conservation programs have been unable to stem the flow of resource loss. We need to have a way to increase our efforts in those areas if the long-term productivity of the land is to be maintained.

The program proposed in S. 884 is modeled after the highly successful Great Plains conservation program, which requires long-term commitments through a contract between the landowner and USDA. It would allow local organizations and USDA people to identify serious problems, determine the kinds of practices and incentives needed in the region, develop an administrative pattern that fits their needs and capabilities, then come to the Secretary of Agriculture and the Congress with their proposal. Upon approval by the Secretary and the Agriculture Committees of both Houses, it would be authorized to seek funding for the special effort.

This is a way for national conservation programs to target specific problem areas without abandoning the vital preventative conservation programs on other lands that must have continuing care and maintenance to keep from deteriorating.

This is a very important principle: We must address serious problems in critical areas, but we must do so without abandoning other regions which could, themselves, become critical if we slow down our current efforts.

This program has strong bipartisan support in both Houses of Congress, and is totally consistent with the USDA's proposal to improve the targeting of Federal efforts.

Subtitle C has several sections that make minor, but needed, changes in the ongoing programs at USDA:

Section 1513(a) amends the Watershed Protection and Flood Prevention Act (Public Law 83–566) by authorizing Indian tribes and tribal organizations to become sponsoring local organizations for this program.

Tribes and tribal organizations have previously been precluded from sponsorship because of the definition of sponsoring local organization in the existing law.

This provision would allow them to cooperate in projects, provide land rights for needed structures, and work with other local organizations in solving flooding problems.

Section 1513 (b), (e), and (f) amends the small watershed program to authorize the Secretary of Agriculture to administratively approve those projects which have a total Federal cost of less than \$5 million. The current ceiling is at \$1 million, and projects with higher dollar figures are required to come before the Agriculture or Public Works Committees of Congress. As USDA has sought ways to reduce costs by speeding up project implementation, it has become clear that the current limits are too low.

This amendment should reduce the administrative paperwork on relatively small projects. The Soil Conservation Service has, in recent years, placed greater emphasis on projects which have more land treatment measures involved and fewer large earth-moving construction projects.

Many of these land treatment projects will undoubtedly be in the cost range of less than \$5 million, and administrative approval can hasten the establishment of needed conservation measures.

Section 1513(c) amends the small watershed program by adding energy as a purpose of the program. Small hydroelectric generation facilities can, in many instances, be incorporated into dams and reservoirs constructed for flood control and other purposes at relatively little additional cost. This amendment would authorize this activity.

Section 1513(d) amends the small watershed program to authorize the Secretary of Agriculture to share up to 50 percent of the cost of land rights acquired by local sponsors for the purpose of mitigating fish and wildlife habitat losses.

Requirements of other Federal statutes

have forced local project sponsors to acquire lands or land rights on which fish or wildlife mitigation measures will be performed. This provision would authorize the Federal Government to share in the costs involved.

Section 1514 amends the legislation under which the resource conservation and development program presently operates to authorize energy resource development as a project purpose.

Subtitle D establishes a new experimental program within USDA for reducing sediment loading or publicly owned reservoirs. Plans for sediment reducing activities are to be developed jointly by the Secretary of Agriculture and local concerned governments. This experimental program is authorized for funding 4 fiscal years, at which time the Secretary will report to Congress on the results of the program and suggestions for improvements.

Subtitle E authorizes the Secretary of Agriculture to provide tort claims and workers compensation coverage for persons providing voluntary services in programs administered by the Soil Conservation Service. This would allow SCS to use unpaid volunteer help in engineering surveys, soil surveys, inventory and monitoring, and other field activities where a great deal of help is needed.

Volunteers have been willing in the past to help, but SCS was precluded from accepting such help because of the uncertainties surrounding possible liability in the event of accidents.

This subtitle would clear up that problem. Similar legislation has been passed in recent years to cover volunteers in programs of other Federal agencies, It is a no-cost way of increasing the potential of the current programs, and should be enacted.

Subtitle F authorizes the Secretary of Agriculture to establish a resource conservation and development (R.C. & D.) program. The present R.C. & D. program has been developed administratively over a period of years based upon a hodgepodge of Federal legislative authorities, including the Soil Conservation and Domestic Allotment Act, the Watershed Protection and Flood Prevention Act, the Bankhead-Jones Farm Tenant Act, and the Rural Development Act of 1972. This subtitle consolidates existing authorities into one enabling act, adds increased emphasis for erosion and sediment control activities and water conservation and management. It also establishes a policy board within USDA to coordinate R.C. & D. policy within the Department.

Subtitle G establishes national policy relative to the importance of agricultural land. Although not a strict prohibition, it will require all Federal agencies to consider, and, where prudent and feasible alternatives exist, assure that their actions do not cause the unnecessary conversion of agricultural land to other uses.

Recent studies have shown that agricultural land is being converted to other uses at a rate which, if continued, will affect the Nation's ability to produce the food and fiber needed to meet domestic and export needs. These studies have also shown that Federal actions have caused

a significant amount of this conversion of agricultural land to other uses.

This section was drafted with strong bipartisan involvement in the Agriculture Committee. We feel it is a vital part of the farm bill which is before you.

Section 1543 establishes authority for the Soil Conservation Service to provide emergency assistance to local public agencies in search and rescue operations under specified disaster conditions. This section is necessary to provide the SCS with freedom from liability in providing such assistance. There is similar legislation covering other agencies of the Department of Agriculture

partment of Agriculture.

Section 1544 amends the Surface Mining Control and Reclamation Act to authorize experimental reclamation projects on an entire hydrologic unit (watershed) without regard to the acreage limitation of 320 acres in the present law where it is determined that greater reclamation benefits can be achieved.

Mr. President, I commend the conservation provisions of this bill to the Senate.

CAN AGRICULTURE SURVIVE?

Mr. TOWER. Mr. President, agriculture in Texas will undergo major transformations in the 1980's. The impact of energy cost, inflation, and limitations in natural resources threaten both productivity and the ability of Texas agricultural producers to remain competitive in the marketplace.

Agriculture today faces both shortand long-term problems which actually threaten its future production potential. The cost-price squeeze brought on by increasing energy prices and unprecedented inflation has created a short-run income and liquidity crisis for farmers.

TEXAS AGRICULTURE IN PERSPECTIVE

The value of farm assets in Texas totals more than \$62 billion. Cash receipts from agricultural commodities in Texas were \$9 billion in 1980. Suppliers of farm inputs, food processors, distributors, and others also benefit from agriculture production; every \$1 of farm sales leads to more than \$3.40 in the Texas economy.

The estimated economic impact of agricultural production and agribusiness activities on the Texas economy is more than \$33.7 billion per year—1.3 times the value added by all manufacturing.

Texas ranks among the top 10 States in production of 16 of the Nation's top 25 commodities. Texas is third in the Nation in agricultural receipts.

FUTURE OF THE FAMILY FARM

Agriculture in general, as well as agricultural demand, is dominated by four forces: Weather, livestock cycles, world crop supplies, and agricultural policies. As we consider the legislation to S. 884, farm policy for the next 4 years will be established. This farm policy comes at a time when our Nation's economy is stumbling, and the farm sector is faced with economic uncertainty. Net farm income in 1980 fell to approximately \$20 billion, down 39 percent from 1979 and the lowest in constant dollars since 1964. These factors have a particularly substantial impact upon the future of the family farm.

Families living on smaller farms obtain a higher percentage of their income from off-farm work than do families on larger farms.

There is a growing concern with the current trend toward business, that the very foundation of our agricultural heritage, the family farm, will be driven out of business. If 1981 is as poor a year as current projections indicate, this will be the worst 2-year period in 45 years—a crisis situation for U.S. agriculture by any standard.

The aim of a Federal farm policy is to induce elements of predictab'lity into an inherently unpredictable business. Agriculture products are subject to some of the most unpredictable free market conditions prevailing. Prices can fluctuate widely, depending on supply, demand, and other forces in the economy.

Yet, the farmer must rely on many other segments of the economy which are regulated—labor, energy, and a host of industries which manufacture needed equipment and supplies. That means his costs do not fluctuate with the price he receives for his product.

In order to make it possible for the farmer to stay in business—and thus continue to supply adequate amounts of food for our people and the export markets, the Federal Government provides basic economic stability through its farm policies.

1981 FARM BILL

I wish to commend the sincere efforts of the members of the Senate Agriculture Committee under the direction of Chairman Helms. It is a very difficult task to formulate a farm program and minimize budgetary exposure of the Treasury. Many of the agreements reached by the producers, the Agriculture Committee, and the administration exhibit a commitment by all to place our economy on the road to recovery—as President Reagan states, "A new beginning."

However, problems still exist in the legislative proposals to the farm bill. Our producers have their backs to the wall, they seek merely the opportunity to produce abundant amounts of food and fiber for our needs, and ask only for a fair return on their investment and hard work. When one receives less for his product than the cost of producing it, the writing is on the wall—"Go Broke."

As an elected representative, I am committed to support the interests of my constituents to the best of my ability. In Texas, we are very proud of our accomplishments in contributing to the agricultural success of America. Our producers are accustomed to hard times and prepared to accept their fair share of budget cuts to guarantee the survival of our economy. As I join my colleagues in considering the 1981 farm bill, I am thankful we as Americans live in a land of plenty.

Mr. THURMOND. Mr. President, today I rise to indicate my firm support for the Agriculture and Food Act of 1981. This legislation is designed to extend reasonable price protection to farmers and thereby insure a degree of economic stability within this agriculture sector of our Nation for the next 4 years.

Too often the American people forget

how fortunate we are to have an abundant variety of foods available at a reasonable cost. We also tend to overlook the fact that agriculture is a very unique industry, and that farmers are extremely susceptible to fluctuating market conditions and other forces over which they have little or no control, such as harmful weather and crop pests.

We need only to review recent events to illustrate this point. The imposition of the embargo on grain trade with the Soviet Union by the Carter administration threw our domestic grain markets into sudden turmoil. It was unfortunate that American farmers were asked to shoulder a disproportionate and unfair burden with respect to this grain embargo, which President Reagan has since lifted. Drought in much of the Southeast last year devastated crops and drove many farmers into bankruptcy. The Mediterranean fruit fly disaster in California clearly proves the amount of destruction pests can do to an important agricultural industry.

Mr. President, this legislation seeks to reduce the effects of these elements of unpredictability. Its provisions would establish loan and target price programs, disaster payments, price support levels, as well as acreage limitations and allotments. These programs will assist the farmer in making planting and marketing decisions more efficiently.

We must continue to develop an atmosphere in which the agricultural sector will be able to prosper and provide for the growing needs of consumers in this Nation and in other countries which buy our farm exports or receive food aid. Without these programs, many small, efficient farmers will be mercilessly forced out of business, and agricultural production will become concentrated in the hands of a few large growers and corporations.

The tools provided in this legislation will allow farmers to continue their chosen lifestyle, by enabling them to operate at a profit. It is time for this Nation to stand firmly behind the agricultural sector. We cannot desert the industry that we so greatly depend upon for our food and fiber needs. Accordingly, Mr. President, I hope the Senate will give its full support to this legislation

UP AMENDMENT NO. 355

(Purpose: To further revise the programs to provide price support and production incentives for farmers)

Mr. HELMS. Mr. President, on behalf of 10 members of the Committee on Agriculture, Nutrition, and Forestry, Senator Huddleston, the distinguished ranking member of the committee, and I have at the desk a package of modifications to S. 884.

The PRESIDING OFFICER. Without objection, the amendment is agreed to and the committee substitute is so modified.

The modification is as follows:

On page 139, lines 13 through 15, strike out "\$4.20", "\$4.40", "\$4.60", and "\$4.80" and insert in lieu thereof "\$4.10", "\$4.30", "\$4.50", and "\$4.70", respectively.

On page 153, lines 5 through 7, strike out "\$2.80", "\$2.95", "\$3.10", and "\$3.25" and in-

sert in lieu thereof "\$2.75", "\$2.90", "\$3.05",

and "\$3.20", respectively.
On page 170, line 5, strike out "\$0.85" and and insert in lieu thereof "\$0.83" "\$0.93

and "\$0.89", respectively.

On page 183, lines 22 through 25, strike out "\$11.23", "\$12.14", "\$12.70", and "\$13.50" and insert in lieu thereof "\$10.98", "\$11.63", '\$12.28", and "\$12.93", respectively

On page 197, beginning with line 12, strike out all that follows through line 2 on page 212 and insert in lieu thereof the following:

TITLE VII-PEANUTS

ANNUAL MARKETING QUOTA AND STATE ACREAGE ALLOTMENT

SEC. 701. Section 358 of the Agricultural Adjustment Act of 1938 is amended as follows:

(a) Subsections (a) and (e) shall not be applicable to the 1982 through 1985 crops of peanuts.

(b) Subsection (c) (1) is amended, effective for the 1982 through 1985 crops of peanuts, by striking out the period at the end of the second sentence and inserting in lieu thereof the following ": Provided, That the peanut acreage allotment for the State of New Mexico shall not be reduced below the 1977 acreage allotment as increased pursuant to subsection (c) (2) of this section.".

(c) Subsection (d) is amended by insert-

"(1)" immediately after the subsection ing "(1)" immediately after the subsection designation and adding a new paragraph (2) reading as follows:

"(2) If, in the case of any farm for which farm acreage allotment has been established, the Secretary determines that such farm does not have sufficient tillable acreage equal to the allotment, the portion of the allotment that is less than the tillable acres shall be lost to such farm and shall be placed in a pool. Acreage in such pool shall be made available for allocation to new farms in the same county as the farm from which the allotment was lost or, in the case of any State for which the peanut acreage allotment is eleven thousand acres or less, to any farm within the same State."

NATIONAL ACREAGE ALLOTMENT; NATIONAL POUNDAGE QUOTA; FARM POUNDAGE QUOTA; NATIONAL

Sec. 702. Effective for the 1982 through 1985 crops of peanuts, section 358 of the Agricultural Adjustment Act of 1938 amended by adding at the end thereof new subsections (k) through (p) as follows:

"(k) The Secretary shall, not later than December 1 of each year, announce a national acreage allotment for peanuts for the following crop taking into consideration projected domestic use, exports, and a reasonable carryover: Provided, That such allotment shall be not less than one million six hundred and fourteen thousand acres.

"(1) The Secretary shall, not later than December 1 of each year, announce a mini-mum national poundage quota for each of the marketing years 1982 through 1985 which shall not be less than one million two hundred forty thousand tons. If the Secretary determines that the minimum national poundage quota for any marketing year is insufficient to meet total estimated requirements for domestic edible use and a reasonable carryover, the national poundage quota for the marketing year shall be increased by the Secretary to the extent determined by the Secretary to be necessary to meet such requirements.

"(m) For each farm for which a farm acreage allotment has been established, a farm yield for peanuts shall be determined. Such yield shall be equal to the average of the actual yield per acre on the farm for each of the three crop years in which yields were highest on the farm out of the five crop years 1973 through 1977: Provided, That if peanuts were not produced on the farm in at least three years during such five-year period or there was a substantial change in the operation of the farm during such period (including, but not limited to, a change in operator, lessee who is an operator, or irrigation practices), the Secretary shall have a yield appraised for the farm. The appraised yield shall be that amount determined to be fair and reasonable on the basis of yields established for similar farms which are located in the area of the farm and on which peanuts were produced, taking into consideration land, labor, and equipment available for the production of peanuts, crop rotation practices, soil and water, and other relevant factors.

"(n) For each farm, a farm base production poundage shall be established equal to the quantity determined by multiplying the farm peanut acreage allotment by the farm yield determined in accordance with subsection (m) of this section.

"(o) For each farm, a farm poundage quota shall be established by the Secretary for each marketing year equal to the farm base production poundage multiplied by factor determined by the Secretary, such that the total of all farm poundage quotas will equal the national poundage quota for such marketing year. The poundage quota so determined, beginning with the 1982 crop for any farm, and continuing through the 1985 crop for any farm, shall be increased by the number of pounds by which marketings of quota peanuts from the farm during the immediately preceding marketing year beginning with 1981, were less than the farm poundage quota: Provided. That any such increase, to the extent that it may not be fully applied to the farm poundage quota for the marketing year following the marketing year in which such undermarketings occurred, shall be applied to the farm poundage quota for subsequent marketing years: Provided further, That the grower must have planted in such preceding marketing year at least 50 per centum of the farm allotment in order to qualify for such undermarketing carry forward: Provided further. That total marketings shall not exceed actual production from the farm acreage allotment: Provided further. That if the total of all such increases in individual farm poundage quotas exceeds 10 per centum of the national poundage quota for the marketing year, the Secretary shall adjust such increases so that the total of all increases does not exceed 10 per centum of the national poundage quota.

"(p) For the purpose of this part and title of the Agricultural Act of 1949, as amended-

"(1) 'quota peanuts' means, for any marketing year, any peanuts which are eligible for domestic edible use as determined by Secretary, which are marketed or considered marketed from a farm, and which do not exceed the farm poundage quota of such farm for such year;

"(2) 'additional peanuts' means, for any marketing year, any peanuts which are marketed from a farm and which are in excess of the marketings of quota peanuts from such farm for such year but not in excess of the actual production of the farm acreage allotment:

"(3) 'crushing' means the processing of peanuts to extract oil for food uses and meal for feed uses, or the processing of peanuts crushing or otherwise when authorized by the Secretary; and

"(4) 'domestic edible use' means use for milling to produce domestic food peanuts and seed and use on a farm, except that the Secretary may exempt from this definition seeds of peanuts that are used to produce peanuts excluded under section 359(c) of this Act, are unique strains, and are not commercially available.".

SALE, LEASE, AND TRANSFER OF ACREAGE ALLOTMENTS

SEC. 703. Effective for the 1982 through 1985 crops of peanuts, section 358a of the

Agricultural Adjustment Act of 1938 is amended by-

(1) in subsection (a)—
(i) striking out ", if he determines that will not impair the effective operation of the peanut marketing quota or price support program,": and

(ii) striking out "may" each place that word appears and inserting "shall" in lieu

thereof; and

(2) adding at the end thereof new subsec-

tions (i) and (j) as follows:

"(i) Notwithstanding any other provision of this section, transfers shall be on the basis of the farm base production poundage, and the acreage allotment for the receiving farm shall be increased by an amount deter mined by dividing the number of pounds transferred by the farm yield for the receiving farm, and the acreage allotment for the transferring farm shall be reduced by an amount determined by dividing the number of pounds transferred by the farm yield for the transferring farm.".

Notwithstanding the provisions of subsections (b) (1) and (g) of this section, in the case of any State for which the peanut acreage allotment is eleven thousand acres or less, all or any part of a farm acreage allotment may be transferred from a farm in one county to a farm in another county in the same State and the fifty-acre limitation on the total peanut allotment transferred to any farm shall not apply.".

MARKETING PENALTIES; DISPOSITION OF ADDITIONAL PEANUTS

SEC. 704. Effective for the 1982 through 1985 crops of peanuts, section 359 of the Agricultural Adjustment Act of 1938 is amended

(1) striking out in the first sentence of bsection (a) "75 per centum of the support subsection (a) price for" and inserting in lieu thereof per centum of the support price for quota";

(2) inserting after the first sentence of subsection (a) a new sentence as follows: The marketing of any additional peanuts from a farm shall be subject to the same penalty unless the peanuts, in accordance with regulations established by the Secretary, are placed under loan at the additional loan rate under the loan program made available under section 108(b) of the Agricultural Act of 1949 and not redeemed by the producers or are marketed under contracts between handlers and producers pursuant to the provisions of subsection (i) of this section.";
(3) striking out "normal yield" in subsec-

tion (a) and inserting in lieu thereof "farm

yield";

(4) inserting a new sentence at the end subsection (a) reading as follows: "Any of subsection (a) reading as follows: marketing penalty imposed under this section is a civil penalty only."; and

(5) adding at the end thereof new sub-

sections (f) through (k) as follows:

"(f) Only quota peanuts may be retained for use as seed or for other uses on a farm and when so retained shall be considered as marketings of quota peanuts, except that the Secretary may exempt from consideration as marketings of quota peanuts seeds of peanuts that are used to produce peanuts excluded under section 359(c), are unique strains, and are not commercially available. Additional peanuts shall not be retained for use on a farm and shall not be marketed for domestic edible use. Seed for planting of any peanut acreage in the United States shall be obtained solely from quota peanuts marketed or considered marketed for domestic edible use

"(g) Upon a finding by the Secretary that the peanuts marketed from any crop for domestic edible use by a handler are larger in quantity or higher in grade or quality than the peanuts that would reasonably be produced from the quantity of peanuts hav-ing the grade, kernel content, and quality of the quota peanuts acquired by such handler from such crop for such marketing, such handler shall be subject to a penalty equal

to 120 per centum of the loan level for quota peanuts on the peanuts which the Secretary determines are in excess of the quantity, grade, or quality of the peanuts that could reasonably have been produced from the pea-

nuts so acquired.

"(h) The Secretary shall require that the handling and disposal of additional peanuts be supervised by agents of the Secretary or by area marketing associations designated pursuant to section 108(c) of the Agricultural Act of 1949. Quota and additional peanuts of like type and segregation or quality may, under regulations prescribed by the Secretary, be commingled and exchanged on a dollar value basis to facilitate warehousing, handling, and marketing.

"(i) Handlers may, under regulations pre-scribed by the Secretary, contract with pro-ducers for the purchases of additional peanuts for crushing, export, or both. All such contracts shall be completed and submitted to the Secretary (or if designated by the Secretary, the area association) for approval not later than March 15 of the year in which

the crop is produced.

"(j) Subject to the provisions of section 407 of the Agricultural Act of 1949, as amended, any peanuts owned or controlled by the Commodity Credit Corporation may be made available for domestic edible use in accordance with regulations established by the Secretary. Additional peanuts received under loan shall be offered for sale for domestic edible use at prices not less than those required to cover all costs incurred with respect to such peanuts for such items as inspection, warehousing, shrinkage, other expenses, plus (1) not less than 100 per centum of the loan value of quota peanuts if the additional peanuts are sold and paid for during the harvest season upon delivery by and with the written consent of the producer, or (2) not less than 105 per centum of the loan value of quota peanuts if the additional peanuts are sold after delivery by the producer but not later than December 31 of the marketing year, or (3) not less than 107 per centum of the loan value of quota peanuts if the additional peanuts are sold later than December 31 of the marketing year: Provided. That between date of delivery of additional peanuts to Commodity Credit Corporation for loan and April 30 of the marketing year. the area association shall, unless otherwise agreed to by the association and the Commodity Credit Corporation, be responsible for deciding whether to accept or reject lot list bids when the price offered equals or exceeds the Commodity Credit Corporation minimum sales price specified in this subsection.

"(k) Notwithstanding any other provision of this section, the amount of any penalty assessed under this section with respect to marketing of quota or additional peanuts or otherwise shall be reduced or waived completely to the extent that the Secretary, through the local committees, determines that the marketing subject to penalty was done unintentionally or unknowingly: Provided. That weight errors with respect to marketing of quota or additional peanuts not exceeding one-tenth of 1 per centum per marketing document shall not be considered an excess marketing and shall not be subject to penalty."

REPORTS AND RECORDS

SEC. 705. Effective for the 1982 through 1985 crops of peanuts, the first sentence of section 373(a) of the Agricultural Adustment Act of 1938 is amended by inserting immediately before "all brokers and dealers in peanuts" the following: "all farmers en-gaged in the production of peanuts,".

PRESERVATION OF UNUSED ALLOTMENTS

SEC. 706. Effective for the 1982 through 1985 crops of peanuts, section 377 of the Agricultural Adjustment Act of 1938 is amended by inserting after the words "farm acreage allotment for such year" the following: "or, in the case of peanuts, an acreage sunicient to produce 75 per centum of the farm poundage quota".

PRICE SUPPORT PROGRAM

SEC. 707. Effective for the 1982 through 1985 crops of peanuts, title I of the Agricultural Act of 1949 is amended by adding at the end thereof a new section 108 as follows:

"PEANUT PROGRAM

"SEC. 108. Notwithstanding any other provision of law

"(a) The Secretary shall make price support available to producers through loans, purchases, or other operations on quota peanuts for each of the 1982 through 1985 crops. The national average quota support rate for the 1982 crop of quota peanuts shall be the national average cost or production, including the cost of land on a current value basis, for such crop, as estimated by the Secretary, but in no event less than \$596 per ton. The national average quota support rate for each of the 1983, 1984, and 1985 crops of quota peanuts shall be the national average quota support rate for such peanuts for the pre-ceding crop, adjusted to reflect the change, during the period January 1 and ending De-cember 31 of the calendar year immediately preceding the marketing year for which a level of support is being determined, in the national average cost of peanut production, excluding the cost of land. The levels of support so announced shall not be reduced by any deductions for inspection, handling, or storage: Provided, That the Secretary may make adjustments for location of peanuts and such other adjustments as are authorized by section 403 of this Act.

"(b) The Secretary shall make price sup-port available to producers through loans, purchases, or other operations on additional peanuts for each of the 1982 through 1985 crops. In determining support levels, the Secretary shall take into consideration the demand for peanut oil and peanut meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets: Provided, That the Sec-In loreign markets: Provided, That the Secretary shall set the support rate on additional peanuts at a level estimated by the Secretary to insure that there are no losses to the Commodity Credit Corporation on the sale or disposal of such peanuts. The Secretary shall announce the level of support for additional peanuts of such peanuts. port for additional peanuts of each crop not later than February 15 preceding the marketing year for which the level of support

is being determined.

"(c) (1) In carrying out subsections (a) and (b) of this section, the Secretary shall make warehouse storage loans available in each of the three producing areas (described in 7 CFR 1446.10 (1980)) only to a designated area marketing association of peanut producers which is selected and approved by the Secretary and which is operated primarily the purpose of conducting such loan activities. Such associations, and no others, may be used in administrative and supervisory activities relating to price support and marketing activities under this section and section 359 of the Agricultural Adjustment Act of 1938. Loans under this subsection shall include, in addition to the price support value of the peanuts, such costs as an association reasonably may incur in carrying out its responsibilities in its operations and activities under this section and section 359 of the Agricultural Adjustment Act of 1938: Provided. That cooperative marketing associations engaged in handling, shelling, or dealing in peanuts in any manner, other than the area marketing associations selected and approved by the Secretary under this paragraph, may not conduct loan, diversion or any other activities under this section and section 359 of the Agricultural Adjustment Act of 1938.

"(2) The Secretary shall require that each

association designated in paragraph establish pools and maintain complete and accurate records by type for quota peanuts handled under loans and for additional peanuts produced without a contract between handler and producer described in section 359(i) of the Agricultural Adjustment Act of 1938. Net gains on peanuts in each pool, unless otherwise approved by the Secretary, shall be distributed in proportion to the value of the peanuts placed in the pool by each grower. Net gains for peanuts in each pool shall consist of (A) for quota peanuts, the net gains over and above the loan in-debtedness and other costs or losses incurred on peanuts placed in such pool plus an amount from the pool for additional peanuts to the extent of the net gains from the sale for domestic food and related uses of additional peanuts in the pool for additional peanuts equal to any loss on disposition of all peanuts in the pool for quota peanuts and (B) for additional peanuts, the net gains over and above the loan indebtedness and other costs or losses incurred on peanuts placed in the pool for additional peanuts less any amount allocated to offset any loss on the pool for quota peanuts as provided in clause (A) of this paragraph. Notwithstanding any other provision of this su-section, any distribution of net gains on additional peanuts of any type to any producer shall be reduced to the extent of any loss by the Commodity Credit Corporation on quota peanuts of a different type placed under loan by such grower.".
On page 212, line 16, strike out "average

Chicago quoted cash price for number 1 yellow" and insert in lieu thereof "simple average price received by farmers for".

On page 214, line 22, strike out "19.6 cents

per pound for raw cane sugar" and insert in

lieu thereof the following:

"18 cents per pound for raw cane sugar for the 1982 crop, 18.5 cents per pound for the 1983 crop, 19 cents per pound for the 1984 crop, and 19.5 cents per pound for the 1985

thereof "years

On page 219, line 9, strike out "less than 105" and all that follows through the word "crop" on line 19, and insert in lieu thereof the following: "less than 110 per centum of the then current price level at which the Secretary may encourage repayment of producer storage loans with respect to the commodity prior to the maturity dates of such loans, as determined under clause (5) of the third sentence of subsection (b) of this section'

Mr. HELMS. Mr. President, I was thinking a moment ago that it was exactly 4 months ago yesterday—on May 13-that the Senate Agriculture Committee ordered reported S. 884. Our earnest belief at that time was that the bill we reported was sound and effective farm legislation.

That belief has not changed one iota. S. 884 was a good bill in May, and it is

a good bill today.

It preserves the most worthwhile elements of existing programs. It makes improvements in current law in a number of ways. And, in some significant ways, makes even further advancements from current law toward market orientation, which Senator Huddleston and I have been talking about this afternoon. Its provisions enhance the prospects for increased agricultural research and more effective soil conservation in response to urgent national needs in those areas, among other things I have already described in detail this afternoon.

Mr. President, S. 884, especially as now modified, represents a compromise of interests represented on the committee, and is a product of give-and-take. Its provisions have been tested in careful debate in committee to assure that they not only provide for the enhancement of the farm sector of our economy, but that they do so in a manner entirely consistent with the broad and diverse national good.

Senators should be aware that S. 884 was reported as a "bare bones" bill. The committee met in more than 25, 4-hour markup sessions. We "marched up the mountain and back down again" in terms of meeting the strictest of budgetary constraints. S. 884 met the test of the first concurrent budget resolution when it was reported.

We were successful in drafting a compromise that won the respect of virtually every farm, agribusiness, and consumer

group in the country.

Many of the farm organizations which had desired higher price support levels than are included in S. 884, accepted and even endorsed S. 884 as the best bill achievable under incredibly tight budgetary circumstances.

This was a truly responsible action on the part of these organizations, and I highly commend them for it. I joined them in the commitment to avoid divisive amendments so as to keep the structure of the committee bill intact.

All of these developments gave Senator Huddleston and me ample reason to build support for S. 884 without amendment. We diligently pursued such a course, and I feel certain we have persuaded most Senators and the agricultural community that the fundamental structure of our bill ought to remain unchanged.

This is important because a unified agriculture will make a strong agriculture, and a strong agriculture is the basis for a strong national economy. Unity and balance, then, was and is our objective.

Now, 4 months have passed since S. 884 was ordered reported. During that time economic conditions have changed. Crop forecasts have changed. Budgetary estimates have changed.

But the basic worth of the programs which our committee adopted has not changed.

On September 9, Agriculture Secretary Block met with the members of the committee in an informal caucus. We discussed the most recent cost estimates and all of the other economic and budgetary factors which affect farm programs provided for in our bill.

The Secretary described for Senators a set of proposals to reduce the cost of S. 884, principally through lower com-

modity support levels.

I was impressed that the proposals from the administration dealt strictly with the level of supports for a number of commodities. The package did not deal with the structure of the supports. In other words, the administration essentially proposed changes in the numbers provided for in the bill, but not in the fundamental conceptual structure of the legislation itself.

The proposal was not a total substitute bill, or some other alternative which would disrupt the careful compromise and delicate structure of the fabric of the committee bill.

In effect, by indicating its acceptance of the concepts our committee approved, the administration joined the ranks of virtually every other group knowledgeable of and interested in farm legislation.

At the same time, however, the economic and cost data was not encouraging. Due to lower than expected farm prices—brought about by the favorable vagaries of especially good harvest weather—there will be additional costs from the old expiring farm bill that will register in the 1982 budget. Such extra costs should not be charged against S. 884, of course.

However, the committee recognizes that it makes the adoption of the higher support levels provided for in S. 884 more difficult for the Senate to justify and accept. This is purely a question of greater potential costs than the committee originally anticipated.

In this setting, the committee decided to make a good faith effort to further reduce the cost of S. 884 as reported.

Once again, the members of the Agriculture Committee put in long hours in daily caucuses which seemed almost interminable. We met daily from September 9, the very day we returned from recess, until our last meeting ended at just 5 p.m., Friday, September 11.

In the course of those additional joint caucuses, the committee developed a package of amendments which is designed to bring our bill in line with reasonable budgetary constraints. It does not go as far as the Secretary of Agriculture first suggested on September 9, but it more than meets his goals halfway. In fact, our informal estimate is that the new Senate committee package achieves 56 percent of what he requested in the areas it addresses.

DESCRIPTION OF THE NEW COMMITTEE PROPOSAL

The compromise carefully crafted in the lengthy committee caucuses I just described is designed to reduce program costs in seven key commodity areas, and results in savings from S. 884 of \$1.2 billion over the 4-year life of the bill.

WHEAT

In the case of wheat, the committee proposed to set the first year target price at \$4.10, which is 10 cents per bushel less than S. 884. This level would increase each year in the same increments as in both S. 884 and the administration's proposed compromise.

According to the Congressional Budget Office, this results in savings of \$427 million. The amount would be 80 percent of the savings resulting from the administration's proposal, as calculated by CBO.

FEEDGRAINS

For feedgrains, we propose to set the 1982 corn target price at \$2.75 per bushel, 5 cents below S. 884, with increases of 15 cents in each of the other 3 years of the bill—the same as the administration proposal. According to

CBO, this provides savings of \$22 million over S. 884.

COTTON

In cotton, the cost-savings resulting from the various proposals which the committee considered is virtually the same. Our proposal will change the target price to 83 cents in 1984 and 89 cents in 1985. This is 2 cents above the administration's proposal in 1984 and 3 cents above in 1985. According to CBO, the cost difference between S. 884 and the administration's proposal is less than a half a million dollars.

RICE

In the case of rice, we propose to set the target price for each successive year of this bill at \$10.98, \$11.63, \$12.28, and \$12.93 per hundredweight. CBO estimates show that this provides a cost savings of \$120 million, from S. 884 as reported. This is 75 percent of the savings which would result from the administration's proposal.

SUGAR

The sugar program provided for in S. 884 is designed so that there is practically no direct cost to the Treasury resulting from the sugar loan program. Even so, the committee proposes to reduce the sugar rate to 18 cents per pound, increasing it by one-half cent per year. The administration took no position on sugar, finding the House bill acceptable.

In addition to this reduction in the support rates, the committee compromise also includes a technical amendment requested by Senators HAYAKAWA and Andrews of our committee to strike the definition of the crop year and loan periods for sugar beets and sugarcane. Current law leaves determination of the crop year to the discretion of the Secretary. This amendment would provide for his continued discretion, on the grounds that various crop cycles exist for sugar beets and sugarcane production in the States of Idaho, California, North Dakota, Louisiana, and Hawaii. In California, the crop year begins on July 1 and ends on June 30.

Hence, a specifically defined crop year of April 1 through March 31 of the following year as provided for in S. 884 leaves 3 months of harvest—April, May, and June—outside that particular crop year. That obviously presents confusion and problems with part of the same crop arbitrarily falling in one crop year and part in another.

In order to avert this disparity, the committee believes it is in the best interest of sugar producers to leave crop year determination to the Secretary's discretion.

SOYBEANS

As to sovbeans, we propose to change the base data from which the loan rate will be calculated. Loans would be based on the national simple average price received by farmers as reported by the Statistical Reporting Service of USDA, rather than the average Chicago quoted cash price.

This change is really technical in nature, and is supported by the American Soybean Association, and was suggested by the administration to be proposed in this package.

In the case of peanuts, the committee proposes the peanut provisions of the House of Representatives version of the farm bill with several modifications. This measure has been declared acceptable to the administration.

So that peanut farmers will not be exempted from any sacrifices asked of producers of other commodities, and to assure Senators that the peanut program has undergone meaningful reform, a number of further modifications are provided for.

The minimum national poundage quota will be reduced from 1.3 million tons provided for in S. 884, and 1.44 million tons provided for in the administration's original bill, to 1.24 million tons. This is done to virtually eliminate all Federal outlays for the peanut program. The quota loan rate will be reduced from \$631 in S. 884 to \$596 per ton. The committee proposes to clarify provisions in current law which provide that there will be no criminal penalties—only civil penalties-for violation of peanut marketing quotas. Further, we provide that no person may exercise allotment rights without sufficient tillable land to support the allotments. Any allotment or quota surrendered for lack of tillable land shall revert to a pool to be distributed to new growers. The program ought to benefit farmers and consumers, and not other business interests and corporations.

Although Secretary Block did not suggest cuts or changes in the peanut program when he met with us on September 9, this change would reduce taxpayer costs of the peanut program to virtually nothing. A 100-percent reduction in budget exposure is a remarkable contribution, indeed. This should result in about \$100 million in savings in the peanut provisions of S. 884 and S. 943original administration farm bill. No other commodity has made such a sub-

stantial sacrifice.

FARMER-OWNED GRAIN RESERVE

In regard to the farmer-owned grain reserve, we propose to allow the Commodity Credit Corporation to resell grain which it has acquired only if market prices for that commodity exceed 110 percent of the reserve release price, when a reserve is in effect. S. 884 as reported would not allow CCC resale until prices reached 105 percent of the average projected cost of production for growing grain in that year as calculated by USDA. The administration proposed 105 percent of the release price, but our proposal increased that to 110 percent in order to allow market prices more room to function without being influenced by Government action.

Mr. President, Senators will note that one commodity with rather large relative Treasury exposure has not been mentioned, and that is the dairy

The Secretary told us on September 9 that it was essential that the costs of the dairy program as provided for in S. 884 be reduced substantially. He emphasized that the cost exposure of that program is most critical, and the reductions in costs which he contemplated were so substantial that the committee could not reach agreement as to what it should propose for this package of amendments.

Now I believe that tells something very important about our package. The items addressed in the package represent an effective compromise that Senators took the time and effort to hammer out in excruciating detail. The fact that we have not included dairy in this package is evidence, I believe, that what we have here is a serious compromise. We were not able to move dairy sufficiently close to the administration position to warrant it being included, so we left it out.

So, the Senate will work its will on dairy. The dairy provisions provided for in S. 884 seemed reasonable to the committee when they were adopted, as did all other provisions. They represent sound policy in concept and structure. If the Senate wishes a less expensive program it will have to be achieved outside what is the committee compromise.

In summary, Mr. President, the administration has in essence accepted the structure of S. 884. However, the Secretary of Agriculture has pointed out that the cost of S. 884 is too high, and I agree

Therefore, let us reduce the cost of these programs as the committee proposes to do. Such action will preserve the integrity of the legislative branch of Government, and will serve the interests of both the farmer and the taxpaver.

I urge the Senate to adopt this compromise package. If it does that, and wants to consider other items such as dairy, it will not really be necessary for the Senate to spend much further time on this bill. We will have achieved a bill suitable for immediate approval because of its effective programs, and be-

cause of its budget worthiness.
Mr. GRASSLEY. Mr. President, I commend the members of the Senate Agriculture Committee for their long, hard work in reaching necessary compromises over various portions of the 1981 farm bill. As in the past, the committee has attempted to draft a bill that will continue to assure an abundance of food and fiber at reasonable costs to the consuming public, as well as to provide adequate protection to our Nation's farmers against volatile swings in market prices in order to assure a reasonable income.

This has been a particularly difficult task, for unlike in the past, the work on this farm bill has had to take place under the severe budget constraints that are necessary if we hope to control Government spending and bring our economy back to its feet.

As a member of the Senate Budget Committee, I know all too well how unpleasant this effort can be-on one hand we want to protect and preserve programs and the people affected by the programs that are dear to us, but on the other hand, we realize that if budget constraint is not practiced, all people of this country will continue to suffer from the devastating effects of inflation, high interest rates, dwindling economic productivity, and high unemployment.

Consequently, as with most other Government programs, those addressed by this piece of legislation have been drafted with fiscal restraints in mind. I believe the committee did a remarkable job of meeting congressional budget targets with the bill as reported.

However, recent budget estimates have required even further cost reductions. and therefore, the committee and the administration have met during the last few days to iron out differences and to develop a bill that the negotiating parties could find acceptable. This compromise was difficult for all involved, but we are facing difficult times and these revisions were necessary. I may not be completely satisfied with this legislation. But it is not because I believe the committee did a poor job; it is because of the tight fiscal environment under which we must operate. There ore I intend to support this legislation for the most part, and I hope my concagues of the Senate wisely choose to do the same.

Furthermore, I urge my Senate colleagues to resist the temptation of supporting amendments that will disrupt this delicately balanced compromise or that will add significantly to the cost of the legislation. It may be politically attractive to do so, but it is in the best interest of the people of our country-including our farmers-to resist this temp-

Before closing, I would like to make two additional points. First, I just returned from my home State of Iowa where I had the opportunity to talk to a large number of farmers, many of whom are balancing precariously on the edge of disaster. The immediate reason for this is that corn prices are dropping sharply. For this, I urge the Secretary of Agriculture to activate the farmer-held reserve for feed grains immediately.

The second problem, but equally pressing, is the problem farmers are facing with high interest rates. This, of course, is not unique to only the farm sectorothers are hurting, too. One of the major goals of our economic plan is to bring interest rates down. Congress and the administration have taken, and will continue to take, major steps toward this end by curbing Government spending. thus reducing inflation. I firmly believe that we will soon see positive results from our efforts with interest rates falling possibly 2 to 4 points by the end of the year.

There is one factor, however, over which Congress and the administration has no direct control—the policies of the Federal Reserve Board. There is definitely the need to restrain the growth of our money supply. It is essential, however, that the Board keep its policies in line with the administration's monetary growth rules where the growth of our monetary supply will not be greater or less than changes in the growth of our economic productivity. I strongly urge the Board to keep a close eye on the fiscal situation facing our farmers and other sectors of our economy to take heed to my message.

Second, I want to reiterate my position that food should not be singled out as a foreign policy tool. I believe it is in the best interests of our Nation to allow our farmers to seek out and to sell to countries wanting to buy our agricultural products. After all, you cannot convince me that agricultural products are sensitive strategic material. Thus, in cases where the U.S. Government involves itself with agricultural export negotiations, the Secretary of Agriculture, not State, should be given the lead.

Many of Iowa's farmers feel that no one in Washington really understands or recognizes the severe problems they are facing as a result of the three issues I just discussed. I stand here, today, to assure them that I fully understand and that I hope my colleagues in Congress, the administration, and the members of the Federal Reserve Board are listening as well.

Mr. HUDDLESTON. Mr. President, the chairman of the committee, the floor manager of the bill, has just submitted modifications to S. 884, which have been accepted. These modifications have been worked out by the members of the Agriculture Committee.

FISCAL RESTRAINT NEEDED

We all know that we are now faced with forecasts of huge budget deficits in the next several fiscal years; and a concerted effort is underway to limit the projected deficits. I strongly support the need for a balanced budget, and believe that Congress has the responsibility to lead in the effort to achieve fiscal responsibility.

The budget for Federal agricultural programs must be subjected to the same budgetary scrutiny now being given to other Federal programs.

SUPPORT AND TARGET LEVELS

As Chairman Helms has indicated, the Department of Agriculture recently informed us of their concerns about possible spending obligations that may result from the price support and target price provisions of the committee-reported farm bill if recently developing trends in the agricultural economy, including lower prices, continue.

In response to those concerns, we developed a proposal to lower the minimum target price levels for the 1982 through 1985 crops of wheat, feed grains, upland cotton, and rice, and lower the minimum price support levels for sugar and peanuts. These steps should reduce the possible outlay exposure under the commodity programs to levels that meet the budget requirements.

PROGRAM INTEGRITY

I believe that the stronger support and target levels under the committeereported bill will better serve the needs of agriculture and, in the long run, the economic interests of all our Nation's citizens.

However, I am willing to make the proposed cuts to assure that we pass a farm bill the President will sign and because I believe that the modification will not adversely affect the price stabilization features of the farm programs, nor prevent the Secretary of Agriculture from using the target price programs effectively to meet the needs of farmers.

I point out that all the modification does is lower minimum support and target levels. The Secretary of Agriculture will have the discretion to set the support and target rates at whatever levels, above the minimum, needed to respond to economic conditions.

Also, under S. 884 and existing law, the Secretary is given other tools, including the land diversion, farmer-held reserve, and export development programs, to strengthen farm prices.

STRONGER COMMODITY PRICES

Farmers do not want Federal handouts to stay in business. They prefer to make their return in the marketplace.

In fact, the purpose of the commodity programs is to enable farmers to receive fair prices in the market, not to funnel Federal money to farmers.

Farmers are now in a desperate economic position. More than ever, they need the protection of strong commodity prices. The administration will have a heavy responsibility, with respect to the next four annual crops, to adopt effective policies and programs to stabilize the agricultural economy.

The modification will not absolve the administration of this responsibility. But, I believe that Secretary Block realizes this and will do all he can to solve the problems that farmers face due to low commodity prices and high farm production costs.

NEED FOR MODIFICATIONS

To those Members who have indicated some concern that we have changed directions here so quickly, when we left for the August recess, after reporting out S. 884 some weeks prior to that, let me say that we acted earlier on the basis of a certain set of economic assumptions, just as the entire Congress had gone through the exercise of putting into place a budget and economic package including expenditures and projected tax revenues that made certain economic assumptions.

During that period of time, the month of August, there came about a reassessment and a reevaluation of some of those assumptions; and it was because of that that we felt compelled to take a look again at this package, as the administration requested us to do, to see whether or not we could reduce the potential costs. That is what we have attempted to do. We have not gone as far as the administration preferred but the modifications that have been now made to S. 884 were as far as the majority of the members of the Agriculture Committee felt we could go. Indeed, as has been expressed here on the floor, some Members did not want to go that far at all, or wanted to go in the other direction and actually increase both the target price levels and the loan levels for the various commodities.

S. 884 in itself was a compromise. There are many members of the committee who felt at the time it was reported out that it was more modest than it should have been or could have been. There again, we were working back in the spring under a different set of economic assumptions. The bill now is a product that has evolved during a period of time when the concern of the American people has turned to the budgetary situation, the deficit of the Federal Government and the orojected deficits in the future, and the inflation rate and the high interest rate.

What we have tried to do was to reach that happy middle ground, if it is indeed possible to so so, of trying to provide at least a minimum assistance and safety net for the agricultural producers without placing too great a burden upon the budget that we are operating under. I think that the modification represents the best effort that can be made at this time in that direction; and as someone has said, it is a bill that does not please everyone and very likely may not please anyone. But that just happens to be the nature of legislation. The legislative process in my experience has always been sort of a compromise between what is most desirable and what is possible. I think we have now about reached the point here in this bill of what is possible.

I vield the floor.

Mr. DOLE. Mr. President, the Senator from Kansas was in another meeting and was not present when the modifications were made, but I am wondering if dairy has been included in the modifications?

Mr. HELMS. No, it is not, I say to the Senator.

Mr. DOLE. It is the understanding of the Senator from Kansas that when we left the meeting dairy would be included. I am not going to quarrel with whether or not it was, but I wish to point out what I think may be a real problem, if dairy is not part of the agreement. That is to say if all of us are able to retain what we would like for the commodities we have a direct interest in and dairy is left to the final vote, I assume many would then feel free not to change the dairy section because they preserve what they are interested in in addition to dairy and that would mean that we would add about a billion dollars to the cost of the program and jeopardize it being signed by the President.

It was the hope of some of us that we would have the dairy modification as well as the modifications in the other programs and then if some wanted to add to the dairy program they could offer an

amendment to do that.

In view of that, I think some of the rest of us may have to reassess our position on the modifications, because it was my understanding less than 30 minutes ago that dairy would be a modification in the dairy propram, unless we can work out some order in which the amendments will be called up so that dairy will come first and not last. I just say as a practical matter around here if I have gotten everything I wanted why should I vote to anger anyone in the dairy business? I mean to preserve everything else we may as well throw in a little extra for the dairy program. That is the big problem, as I understand it, from everyone who is concerned with the program, if we are going to modify everything else we are also going to modify the dairy section, not to cause any adverse impact on dairy producers but to make certain we get a bill that can be signed.

Mr. ZORINSKY. Mr. President, having spent the last 5 weeks in my home State of Nebraska, and having listened to the plight of the peop'e in agriculture not only in my State but in numerous Midwestern States, it occurs to

me that as a member of the Senate Committee on Agriculture that I have sat in hearings, in debates with respect to the evolution of a new farm bill for

the last 5½ months.

We have had many people from the agricultural industry testify before our committee. We have had a lot of debate, we have had a lot of rhetoric, we have had a lot of give and take, and especially a lot of compromise, and that is why, as initially stated, I felt, inasmuch as there are many unhappy people on both sides of the issue, that this was the best acceptable compromise we could evolve.

That is just what the bill was as it came out of the Senate Committee on Agriculture, a bipartisan coalition acknowledging the fact that it is the best deal we could strike under the current budgetary constraints and requirements.

It was a compromise.

Last Thursday I was in Omaha, Nebr., and I received a call from my staff indicating that the members of the Senate Committee on Agriculture were meeting to talk about the substitution of an administration farm bill for the one we had worked on very hard for 5 months and with a compromise evolving.

It concerns me that after 51/2 months of debate and serious consideration, in approximately 5 to 6 hours one afternoon agreements were reached. Obviously I was not there. I had a staff member

represent me.

I feel what is happening to the farmers of this country, in addition to the citizens of this country, is the fact that when we make budget cutting a semiannual event or one that takes place every 3 or 4 months, going back to various sectors in our society and saying, "We missed this target, we miscalculated," and here we come again for more budgetary cuts, I think we are eventually destroying the credibility of the people of the United States in their Govern-ment, in our own ability to assess the goals that we all seek.

Obviously, this additional budget cutting came as a result of miscalculation on interest rates for next year, and from what I heard this is one of the initial targets which was sought out, and that was agriculture once again. We are sought out on embargoes and sought out on everything imaginable because we are an easy target. Less than 4 percent of the American people earn their livelihood by producing food and fiber, so obviously politically we do not have that much clout. We may have parity in the U.S. Senate since New Jersey and Nebraska have two Senators apiece, but then you get over into the House of Representatives, and that parity vanishes because, according to population. you are assigned Congressmen in a State and, therefore, numerically those denser populated cities which have large metropolitan areas far outnumber the sparsely populated areas of the Midwest.

So I think we are telling the American people by this action that we take on the floor of the Senate this week that-First, we do not know where we are going with respect to the budget cuts and what they ultimately were going to accomplish or, second, if we do know where we are going, we are going to pick out agriculture to be the shock troops to test those experimental economics on.

I certainly, for one, do not feel the time has come for agriculture and the farmers of America to accept a compromise of a compromise. The bill as it came to the Senate was a compromise consensus, a bipartisan consensus, and as of last Thursday an additional compromise began to evolve on the compromise.

I just want to see other areas of concern treated in like manner. The farmers of America do not mind taking their fair share of budgetary cuts, but, this reminds me of the exercise in our own neighborhood back in Omaha, Nebr. My wife serves on many committees and commissions, and there are numerous fundraisers for good causes like the Lung Association, the Heart Association, the Cancer Society, the Salvation Army, and numerous other well-worth fund drives.

My wife went door to door collecting contributions for those drives until finally those people started being out of the house when they saw her approaching, a little area having to make that additional contribution.

I think that is what we are imposing not only on the farmers of America but on the people of America; here we come again 4 months later after tremendous emotional and psychological exercisesand I support the President, and I support balanced budgets, and I support the direction we are taking. But when that direction begins to have indirection within itself because of miscalculation of numbers, I say we had better get our act together.

The reason I say we had better get our act together is that the constant trek back home to the farm areas of America is one which says, "Here I come again. We are going to cut budgets more severely and more deeply again." I think politically, psychologically, emotionally, and in the best interests of this country we had better look to see where we are going, what we need to get there, do it, and get it over with.

But I am not going to participate in these semiannual events or, as it turns out, about every 3 to 4 months to go back and tell the people of America. "We made a mistake, we miscalculated. We did not know that interest rates were going to be that high."

When, as a part of the formula for the budget next year, we ascribe a numerical number for the interest rates to service the debt of this Nation, which is approaching \$1 trillion, as 8.9 percent. I think certainly any economist would prefer to have the historical average of the last 3 years of interest rates to be used as the guess factor for interest rates for next year.

So these items and many more are complicating the process that is taking place in this Chamber, and I, for one Senator, intend to attempt to return this bill to the original compromise that was evolved on a bipartisan basis in the Senate Committee on Agriculture, and that is to return target prices on wheat back

to \$4.20 a bushel for 1982, and to return feed grains to their original position as compromised out in that original bill.

I think we spent far too much time evolving that bill in good faith in conjunction with the support and participation of all the farm groups of this Nation for us to tell them now that it is no deal, that we discovered new numbers, new figures, and we are going to change the

I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GRASSLEY). The clerk will call the roll. The legislative clerk proceeded to call

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

the roll.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction for routine morning business.

The PRESIDING OFFICER. Without

objection, it is so ordered.

PROPOSED CHANGES IN THE CRIM-INAL LAWS OF THE DISTRICT OF COLUMBIA

Mr. THURMOND, Mr. President, on September 9, 1981, the distinguished Senator from Alabama (Mr. Denton) introduced a resolution, Senate Resolution 207, to disapprove the recent action of the District of Columbia City Council in repealing local criminal laws against sodomy, adultery, fornication, and seduction. I commend him for that action and have joined with him as a cosponsor.

I have always been a strong advocate of local government. For that reason, I believe that only under extreme circumstances should Congress intrude into the local affairs of the District government. In this instance, however, the circumstances are extreme.

Washington is a special city. Washington is not only home for those who live in the city; it is also the Capital of our Nation and the leading city of the free world. Washington cannot be a laboratory for social experimentation, and the Congress must not allow it to become one. It is our responsibility to take whatever steps we can to prevent a clearly irresponsible action in an important area of criminal law.

If we do not act against the proposed legalization of criminal activity, we will send to the American people and to the world a signal that our moral standards have been again lowered.

I am disturbed with the action of the District Council which would decrease the penalty for rape from life to 20 years. This would mean that a convicted rapist could be out on the streets again after as little as 3 or 4 years. I am amazed that some have so little respect for women and so little concern for the seriousness of the crime of rape.

Other aspects of the proposed law are

equally distressing. If Congress permits the Council action to stand, then in the Capital of the United States, there would be no criminal sanctions against sodomy, bestiality, and other forms of deviant, although consensual, sexual activity involving persons over 16 years of age.

At some point, the concern we all feel for effective home rule in the District of Columbia must be outweighed by our responsibility to both the city and to the country. In this instance that point has been reached.

Some will undoubtedly argue that the City Council ordinance should be allowed to become law on the basis of respect for the power of the city government. Nevertheless, under the Home Rule Act, Congress expressly reserved the power to review and veto certain actions of the Council, notably with respect to criminal statutes. Since that reservation was one of the bases for the enactment of home rule for the District of Columbia, Congress must have anticipated occasions when it would be appropriate to utilize this reserved power.

A sweeping overhaul of criminal penalties such as that envisaged in the proposed law passed by Council is a matter which is particularly appropriate for congressional intervention. By law, the welfare of our Capital City is a matter of continuing responsibility for Congress. On that basis, I urge that the Senate promptly adopt Senate Resolution 207 and thereby disapprove the unwise and dangerous action of the District government. To do less would invite the deserved criticism of the entire country.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:30 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4209. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

ENROLLED BILLS SIGNED

At 12:50 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bills:

H.R. 2120. An act to facilitate the ability of product sellers to establish national product liability risk retention groups, to facili-

tate the ability of such sellers to purchase product liability insurance on a group basis, and for other purposes; and

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases.

The enrolled bills were subsequently signed by the President pro tempore (Mr. Thurmond).

HOUSE BILL REFERRED

The following bill was read twice, and referred as indicated:

H.R. 4209. An act making appropriations for the Department of Transportaion and related agencies for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1917. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals dated September 1, 1981; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget and the Committee on Appropriations.

EC-1918. A communication from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report with respect to converting the family housing maintenance function at Griffiss Air Force Base, New York, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC-1919. A communication from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report with respect to converting the family housing maintenance function at March Air Force Base, California, and the decision that performance under contract is the most cost effective method of accomplishment; to the Committee on Armed Services.

EC-1920. A communication from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report with respect to converting the commissary shelf-stocking function at Lackland Air Force Base, Texas, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC-1921. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Improved Management of Fleet Supplies and Spare Parts Can Save Millions Without Affecting Readiness"; to the Committee on Armed Services.

EC-1922. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a report entitled "Report to Congress on the Need for Further Legislation in the Area of Real Estate Settlements"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1923. A communication from the General Counsel of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to amend the Disaster Relief Act of 1974, as amended; to the Committee on Environment and Public Works.

EC-1924. A communication from the members of the Commission on the Review of the Federal Impact Aid program, transmitting, pursuant to law, a report on the administration of Title I of Public Law 874; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-403. A petition from a citizen of Houston, Tex., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-404. A petition from a citizen of Houston, Tex., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-405. A petition from a citizen of Houston, Tex., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-406. A petition from a citizen of Katy. Tex., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-407. A petition from a citizen of Windsor, Mo., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-408. A petition from a citizen of Fort Worth, Tex., favoring congressional support for the President in upgrading the Nation's military power; to the Committee on Armed Services.

POM-409. A resolution adopted by the House of Representatives of the Second Northern Marianas Legislature; to the Committee on Energy and Natural Resources:

"House Resolution No. 144

"Whereas, the Clean Air Act (42 USC 7401) was approved in order to reduce air pollution and improve air quality in continental United States; and

"Whereas, under the Commonwealth Covenant (U.S. Public Law 94-241) the Clean Air Act is made applicable to the Northern Marianas; and

"Whereas, the Commission on Federal Laws under U.S. Public Law 94–241 is mandated to study and recommend to the United States Congress which federal laws and regulations should be extended to or amended to suit the circumstances and environment of the Northern Marianas Commonwealth; and

"Whereas, the Governor and Northern Marianas Senate have requested that the application of the Clean Air Act to the Northern Marianas be suspended; now, therefore,

"Be it resolved, by the House of Representatives, Second Northern Marianas Legislature. Fourth Regular Session, 1981, that the President and the U.S. Congress are hereby respectfully requested to exempt the Northern Marianas from the application of the Clean Air Act until the Commission on Federal Laws has determined whether the Clean Air Act should apply to the Northern Marianas; and

"Be it further resolved that the Speaker of the House shall certify and the House Clerk shall attest to the adoption of this resolution and certified copies be transmitted to the President, the presiding officers of United States Congress, the Chairmen of the U.S. Senate Committee on Energy and Natural Resources and the U.S. House Committee on Interior and Insular Affairs, the Chairman of the U.S. Senate Committee on Environment and Public Works, the Admin-

istrator of the U.S. Environmental Protection Agency, the Secretary of the Interior, the Northern Marianas Representative to the United States, the Executive Director of the Commission on Federal Laws, and the Governor.

POM-410. A resolution adopted by the Universities Council on Water Resources, Inc., favoring passage of programs supporting water resources planning and research; to the Committee on Environment and Public Works

POM-411. A resolution adopted by the Political Action Committee of the Congress of Filipino American Citizens favoring ap-pointment of the National Chairman of the Congress of Filipino American Citizens U.S. Ambassador to the Philippines; to the Committee on Foreign Relations

POM-412. A resolution adopted by the National Sheriffs' Association favoring direct Federal grants to local law enforcement agencies; to the Committee on the Judiciary.

POM-413. A petition from the Mayor of the city of Brainerd, Minn., expressing the op-position of the city council to the bill S. 898; ordered to lie on the table.

POM-414. A resolution adopted by the Municipal Assembly of Carolina, supporting re-authorization of the Airport and Air Routes Development Project; to the Committee on Commerce, Science, and Transportation.

POM-415. Joint resolution adopted by the First Olbiil Era Kelulau, Third Regular Session, providing for Olbiil Era Kelulau (National Congress) contract with the U.S. Congress; to the Committee on Energy and Natural Resources

POM-416. Joint resolution adopted by the Legislature of the State of Alabama; to the Committee on the Judiciary:

"S.J.R. 41

"Whereas, there is a great need for a gov-ernment of laws and not of men in this country; and

"Whereas, many federal justices and judges have strayed in their rulings from strictly interpreting the Constitution of the United States as it was intended, passed and ratified: and

"Whereas, such straying from the intent of the Constitution is in effect judicial legis-lation by means of judicial extrapolation;

"Whereas, members of the federal judiciary have been able to follow this course of action because they are not answerable to the people because they are appointed for lifetime tenure; and
"Whereas, this country was founded in or-

der to escape the awesome power of lifetime appointments from nonelected rulers and royalty; and

"Whereas, the federal judiciary is the last remaining vestige of such awesome, lifetime political patronage in this country; and

"Whereas, the public has always been under the impression that federal judges aided and abetted criminals and criminal activity in America by giving the criminals more rights than the victims; now therefore,

"Be it resolved by the Legislature of Alabama, both Houses thereof concurring, That the Legislature of Alabama hereby petitions the Congress of the United States to convene a convention, pursuant to Article V of the Constitution of the United States, for the specific and exclusive purpose of proposing an amendment which would prohibit life time appointments of federal supreme court justices and all other federal judges and require that they be elected and re-elected every six years by the people.

"Be it resolved further, That the legislature of each of our sister states is urged to give the most serious consideration to the problems arising from lifetime judicial appointments, and to petition the Congress of the United States to call a convention for the specific and exclusive purpose of proposing an amendment which would prohibit lifetime appointments of federal supreme court justices and all other federal judges and require that they be elected and re-elected every six years by the people.

"Be it resolved further, That the Secretary of the Senate transmit duly authenticated copies of this resolution to the President of the United States, to the President of the United States Senate, to the Speaker of the United States House of Representatives, to each member of Congress, both Senate and House, and to the executive authority of each of our sister states for transmittal to its legislature."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOLE, from the Committee on Finance, with an amendment in the nature of a substitute, and an amendment to the title:

S. 754. A bill to require that most-favorednation treatment be granted only to the products of countries which have not expropriated United States citizen's property withcompensation therefor (Rept. No. out co

By Mr. HATFIELD, from the Committee

on Appropriations:

Special Report entitled "Allocation To Subcommittees Of Budget Totals From The First Concurrent Resolution On The Budget" (Rept. No. 97-190).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, with amendments, and an amendment to the

H.J. Bes. 223. Joint resolution to provide for the awarding of a special gold medal to Fred Waring.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Clarence Eugene Hodges, of Indiana, to be an Assistant Director of the Community Services Administration; and

Lawrence Y. Goldberg, of Rhode Island, to be an Assistant Director of the Community Services Administration.

(The above nominations were reported from the Committee on Labor and Human Resources, with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BENTSEN:

S. 1617. A bill to require that imported meat and meat food products be subject to certain examination and inspection requirements, and to require the labeling of such imported products; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HEINZ: S. 1618. A bill for the relief of Augustine Chi-Kuen Au, D.D.S., and Adrienne Au, hus-

band and wife; to the Committee on the Judiciary.

1619. A bill for the relief of William Kubrick; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN:

S. 1617. A bill to require that imported meat and meat food products be subject to certain examination and inspection requirements, and to require the labeling of such imported meats; to the Committee on Agriculture, Nutrition, and Forestry.

REQUIREMENTS FOR IMPORTED MEATS

• Mr. BENTSEN. Mr. President, I am today introducing legislation to protect consumers of meat from unknowingly being sold meat that is not up to the high quality standards that we demand and expect to get in this country. At the same time, this bill will protect the reputation for high-quality products which the American cattleman has built over the years with major investments of time, effort, and hard-earned money.

The need for this legislation is underscored dramatically by the recent discovery by the U.S. Department of Agriculture that meat from two foreign plants that was being imported as beef was in fact not beef, but contained horsemeat

and kangaroo meat.

Secretary of Agriculture Block is to be commended for his decision to impound and test all Australian meat in this country and to halt all meat imports from these plants. Further testing of meat from plants in the State of Victoria, the location of the two problem plants, is now underway. I hope that there will be a thorough and complete investigation of this incident and that decisive action will be taken to prevent it from happening again.

My bill would attack this problem by: First, requiring all imported meat to

be labeled as such:

Second, requiring all imported meat to meet the same standards as domestic beef for drugs, feed additives, and other residues:

Third, requiring species verification; and

Fourth, authorizing fees on imported meat to cover the costs of these inspections.

Mr. President, consumer acceptance is vital to the cattle industry. U.S. producers have invested years of effort and millions of dollars in promoting beef as a healthy and nutritious product. They have succeeded, and U.S. beef is renowned as the finest in the world. U.S. producers are not resting on their laurels-they are still working hard to produce a top-quality product and to maintain that reputation. Texas beef producers within the last few months have set up a statewide voluntary checkoff program and are contributing 25 cents per head on all cattle sold in the State. These funds are being used to promote beef consumption.

The Texas cattle industry is not taking this money out of its profits. In most cases these contributions are merely adding to losses. These ranchers are

making very real sacrifices for the good of their industry, yet their efforts are threatened by scandals such as this one.

Why should years of effort on the part of American ranchers be wiped out by a small group of criminals in a foreign country? There is simply no justification for allowing this.

U.S. consumers should know what they are getting. If imported meat was labeled today this scandal would be of no concern to American ranchers, because the housewife would know which meat is imported and which is domestic. Without labeling, all meat becomes suspect in the wake of such wrongdoing. Without labeling, the well deserved reputation for quality which the American rancher has built over many years cannot be protected as it should be.

Mr. President, by law all meat consumed in the United States, whether produced in this country or abroad, must be processed in plants which are either inspected by the U.S. Government or are under inspection systems at least equal to our Federal system.

In this country, State-inspected meat packing plants are subject to unannounced inspections by Federal inspectors, and State systems are closed down by USDA if they fail to measure up to Federal standards. These plants are most small, family-owned businesses. They produce a top-quality product. However, these American plants are not allowed to ship their product in interstate commerce.

By contrasts, USDA has only 17 inspectors to supervise some 1,159 foreign meat plants which are certified to export to the United States. Some of these plants are inspected only once every 2 years, and these inspections are preceded by advance notice to the foreign government.

However, the meat produced in these foreign plants, which amounts to about 7 percent of our total domestic consumption, is merely sampled when it enters the country and then is permitted to move freely in interstate commerce, the only label it now carries is USDA inspected—the same label carried by American beef processed in federally-inspected plants.

Mr. President, these problems have been known for too long. It is past time to do something about them, to tighten up our inspection standards so that the U.S. consumer can be assured of the quality and wholesomeness of all the food products sold in this country.

This issue is not new to the Senate, and it is not new to the Senator from Texas. I have introduced legislation in the past, and I have cosponsored legislation in the past, to achieve these same goals. I now hope that the time has come for this legislation. We have had a dramatic focusing of public attention on the problems of our meat inspection system, and I hope that those who in the past have dismissed these problems will take a second look now.

I hope that this bill will be recognized for what it is. This is a consumer protection bill. This is a consumer interest, a consumer concern, and it is not limited at all to cattle producers, I hope that my colleagues will recognize the pressing need to maintain our high food quality standards and will join me in supporting this legislation.

ADDITIONAL COSPONSORS

S. 398

At the request of Mr. Armstrong, the Senator from Oklahoma (Mr. Nickles) was added as a cosponsor of S. 398, a bill to amend the Walsh-Healey Act and the Contract Work Hours Standards Act to permit certain employees to work a 10-hour day in the case of a 4-day workweek; and for other purposes.

S. 569

At the request of Mr. Jepsen, the Senator from Pennsylvania (Mr. Heinz) was added as a cosponsor of S. 569, a bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures.

S. 675

At the request of Mr. Thurmond, the Senator from Georgia (Mr. Nunn) was added as a cosponsor of S. 675, a bill to establish a Federal Jurisdiction Review and Revision Commission.

S. 701

At the request of Mr. Bentsen, the Senator from Michigan (Mr. Riegle) was added as a cosponsor of S. 701, a bill to amend the Internal Revenue Act of 1954 to provide for the exclusion from taxation of interest earned on deposits which are used for residential mortgage lending purposes.

S. 873

At the request of Mr. Bentsen, the Senator from Virginia (Mr. Warner) was added as a cosponsor of S. 873, a bill to strengthen Federal programs and policies for combating international and domestic terrorism.

S. 1348

At the request of Mr. Sasser, the Senator from South Carolina (Mr. Thurmond), the Senator from Nevada (Mr. Cannon), and the Senator from New Jersey (Mr. Bradley) were added as cosponsors of S. 1348, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds.

S. 1366

At the request of Mr. WEICKER, the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 1366, a bill to provide for fair commercial credit reporting.

S. 1533

At the request of Mr. Weicker, the Senator from Vermont (Mr. Stafford), the Senator from Massachusets (Mr. Kennedy), the Senator from Ohio (Mr. Kennedy), the Senator from Ohio (Mr. Metzenbaum), the Senator from New Jersey (Mr. Williams), the Senator from Missouri (Mr. Danforth), the Senator from Maryland (Mr. Mathias), the Senator from Minnesota (Mr. Durenberger), the Senator from Pennsylvania (Mr. Heinz), the Senator from West Virginia (Mr. Randolph), the Senator from Connecticut (Mr. Dodd), the Senator from Connecticut (M

ator from North Dakota (Mr. Burdick), the Senator from Hawaii (Mr. Inouye), the Senator from Maryland (Mr. Sarbanes), the Senator from New York (Mr. Moynihan), the Senator from Messachusetts (Mr. Tsongas), and the Senator from Missouri (Mr. Eagleton) were added as cosponsors of S. 1533, an original bill to authorize the appropriations for the Legal Services Corporation for fiscal years 1982, 1983, and 1984, and to encourage the use of private attorneys in the provision of legal services under that act, and for other purposes.

S. 1604

At the request of Mr. Proxmire, the Senator from Arkansas (Mr. Pryor) was added as a cosponsor of S. 1604, a bill to require the enactment of special legislation to continue the expenditure or obligation of funds on any major civil acquisition whenever the cost of such acquisition has increased or, on the basis of estimates, will increase by 25 per centum or more.

SENATE JOINT RESOLUTION 101

At the request of Mr. Dole, the Senator from Kentucky (Mr. Huddleston) was added as a cosponsor of Senate Joint Resolution 101, a joint resolution designating "National High School Activities Week."

SENATE JOINT RESOLUTION 103

At the request of Mr. Hollings, the Senator from Alabama (Mr. Denton) was added as a cosponsor of Senate Joint Resolution 103, a joint resolution to authorize and request the President of the United States to issue a proclamation designating the 7 calendar days beginning October 4, 1981, as "National Port Week."

SENATE JOINT RESOLUTION 105

At the request of Mr. LAXALT, the Senator from Mississippi (Mr. Cochran), the Senator from New York (Mr. D'AMATO), the Senator from South Dakota (Mr. ABDNOR), the Senator from Texas (Mr. Tower), the Senator from Minnesota (Mr. Durenberger), the Senator from Idaho (Mr. Symms), the Senator from Kansas (Mrs. Kassebaum), the Senator from Oregon (Mr. HATFIELD), the Senator from South Dakota (Mr. PRESS-LER), the Senator from North Carolina (Mr. East), the Senator from Iowa (Mr. GRASSLEY), the Senator from Utah (Mr. HATCH), the Senator from Arkansas (Mr. PRYOR), the Senator from Arkansas (Mr. BUMPERS), the Senator from New York (Mr. Moynihan), the Senator from Florida (Mr. CHILES), the Senator from Alabama (Mr. HEFLIN), the Senator from Montana (Mr. Baucus), the Senator from Mississippi (Mr. STENNIS), the Senator from Illinois (Mr. DIXON), the Senator from North Dakota (Mr. BURDICK), the Senator from Montana (Mr. MELCHER), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Nevada (Mr. Cannon), the Senator from Washington (Mr. Jackson), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of Senate Joint Resolution 105, a joint resolution to designate October 1981 as "National PTA Membership Month."

SENATE RESOLUTION 175

At the request of Mr. Boren, the Senator from Virginia (Mr. Harry F. Byrd, Jr.) was added as a cosponsor of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its Diamond Jubilee.

AMENDMENTS SUBMITTED FOR PRINTING

AGRICULTURE AND FOOD ACT OF

AMENDMENT NO. 534

(Ordered to be printed and to lie on

Mr. KASTEN submitted an amendment intended to be proposed by him to the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

AMENDMENTS NO. 535 THROUGH 538

(Ordered to be printed and to lie on the table.)

Mr. BAUCUS submitted four amendments intended to be proposed by him to the bill S. 884, supra.

AMENDMENT NO. 539

(Ordered to be printed and to lie on the table.)

Mr. GRASSLEY submitted an amendment intended to be proposed to the bill S 884, supra.

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, I would like to announce, for the information of the Senate and the public, that the Committee on Government Affairs will hold a meeting to mark up the Regulatory Reform Act of 1981, S. 1080, on Tuesday, September 15 at 9:30 a.m. and on Wednesday, September 16 at 2 p.m. in room 3302 of the Dirksen Senate Office Building. For further information, please contact Dan Bensing at 224–4751.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to hold a business meeting during the session of the Senate on Monday, September 14, at 2 p.m. to consider the nominations of:

William Vaughan to be Assistant Secretary of Energy for Environmental Protection, Safety and Energy Preparedness;

Ray Hanzlik to be Administrator of the Economic Regulatory Administration;

Dallar Peck to be Director of the Geological Survey;

Guy Fiske to be Under Secretary of Energy; and

Robert Horton to be Director of the U.S. Bureau of Mines.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE VOTING RIGHTS ACT—THE NEED TO CONTINUE

• Mr. CHILES. Mr. President, the opportunity to vote is the most fundamental right that a democracy can extend to the citizenry. Voting is unquestionably the cornerstone of our elective process. The framers of the Constitution gave considerable attention, not only to concept of voting, but who should vote.

Basically, the States were recognized as having the primary responsibility for determining voting qualifications subject to specific limitations set forth in the national Constitution. For example, article I, section 2, provides that Members of the U.S. House of Representatives shall be chosen by "the electors of the most numerous branch of the State legislature."

And section 4 provides that Congress may alter the times and manner of holding elections for U.S. Senators and Representatives. Beyond these provisions of the original Constitution, however, the type and extent of congressional control over the election process has been a much later development.

In colonial times, ownership of property was the condition for exercising the suffrage. After the formation of the Republic, however, the States began to replace the property qualification with a taxpaying requirement. And this, in turn, almost completely disappeared during the Jacksonian era. However, nonproperty qualifications such as race, sex, and residence continued in effect with little interference until the Civil War.

The adoption of the 14th and 15th amendments to the Constitution ushered in a new franchised era for southern blacks. This same era was characterized by resistance to black suffrage. The techniques of resistance included the use of literacy tests, lengthy residence requirements, and poll taxes. During the period of time from the 1870's until the early 1960's the most effective Federal institution for striking down these obstacles was the U.S. Supreme Court. In landmark court decisions the high court struck down the "grandfather clauses," the white primary laws, and upheld the authority of Congress to regulate primaries in which Federal candidates are nominated.

In the early sixties Congress got into the act by passing the provisions of the 24th amendment, abolishing the poll tax and, of course, the Voting Rights Act, in 1965.

Few Chief Executives have been more eloquent than President Dwight Eisenhower who in 1960 included these remarks in his State of the Union Address.

"In the long perspective of history, the right to vote has been one of the strongest pillars of a free society. Our first duty is to protect this right against all encroachment."

President Johnson, on March 15, 1965, speaking before a joint session of Congress urged enactment of effective legislation to grant full voting rights to all citizens. The Senate, after much debate, passed the voting rights bill on May 26,

1965 and President Johnson signed the bill into law on August 6, 1965.

The bill was extended in 1970 and again in 1975. Each time the vote has been overwhelmingly supportive of the

I am aware of the concerns that have been voiced by the persons who oppose the act. I, too would like to see some kind of process where covered jurisdictions can work their way out of coverage by the act. I believe that if a jurisdiction demonstrates good faith and does not have any complaints lodged against it, then it will no longer have to submit to the provisions of the act.

Certainly the key consideration is not to punish States or covered jurisdictions. The key consideration is to protect the right to vote for all citizens. That consideration is the paramount reason for my support for the Voting Rights Act.

TAX DEFERRAL

• Mr. HART. Mr. President, last week I introduced legislation designed to address this Nation's rapidly deteriorating economic situation by deferring the massive personal income tax cuts passed by Congress earlier this summer until the Federal budget is in balance.

The views of a number of financial leaders interviewed this weekend provide strong support for the approach embodied in my bill. For example commenting on the recently announced reductions in defense spending, John D. Paulus, senior financial economist at Goldman Sachs and Co. said:

The defense trims may be a step in the right direction but they will not solve the problem that is weighing heavily on the financial markets. The trims don't address the hard numbers and facts the Street will have to face Monday morning. For instance, the numbers are that the Administration's three-year tax cut will deprive the Treasury of \$280 billion while the budget trims thus far projected for this period total some \$135 billion.

Other Wall Street experts were also skeptical about the prospects for economic recovery so long as huge personal income tax cuts increased the Federal deficit. According to Richard Scott-Ram, vice president and economist at the Chemical Bank:

The defense cuts are woefully inadequate to produce any significant reduction in the Federal deficit. Reductions three times that announced by the President or an equivalent increase in Federal revenues could be a significant move in the right direction. And confidence in the financial community will not be restored unless these spending cuts or additional revenues are enacted immediately. . . Investors cannot, understandably, see where the funds are coming from to finance both a soaring Federal deficit and the borrowing needs of business so necessary to revitalize American industry.

Mr. President, the administration and this Congress have already gone a long way toward reducing Federal spending. The massive personal income tax cut enacted earlier this year, however, flies in the face of a broad consensus of opinion in the financial community that additional revenues are also needed.

It is for this reason that I have introduced legislation to postpone the personal income tax cuts until the Federal budget is balanced. Congressional support on this measure is essential if we are to convince the financial community that we are serious about achieving a balanced budget.

I ask that two articles from the New York Times describing Wall Street's reaction to our current economic situation be printed in the RECORD. I believe they indicate strong support for my tax cut deferral bill.

The articles follow:

[From the New York Times, Sept. 13, 1981] REAGAN FINDS IT HARD TO ALLAY WALL STREET FEARS OVER CONFLICT

(By Leonard Silk)

The Reagan Administration is struggling to decipher an apparent and annoying contradiction:

Why, if Mr. Reagan has done so much for business, isn't its applause rolling in? Why, if Wall Street supported his tax cuts, budget cuts and restrictive monetary policies, is the Street now so critical of the Reagan program and driving down the values of stocks and bonds?

Part of the explanation emerges from comments by a broad range of Wall Street figures. This is that the Reagan program did in fact give most of what it wanted to Wall Street—that assemblage of stockbrokers and bond dealers, bankers, investment counselors, financial economists, investors, traders, speculators, corporate treasurers and chief executives who buy and sell securities. But the comments show that Wall Street also woke up with more than it expected, and that "extra" has revived fears of Federal deficits running out of control.

\$750 BILLION IN TAX CUTS

Wall Street supported the tax program, including 25 percent in cuts in personal income taxes over three years, cuts in the top income tax rate to 50 percent from 70, cuts in estate and gift taxes, accelerated depreciation, tax breaks for savers and investors and much else. But then it took fright when it saw tax cuts totaling \$750 billion over the next five years, plus climbing military and nonmilitary spending, even after the Reagan trims in social programs. In Wall Street's view, that all means a string of budget deficits as far as the eve can see.

"Clearly, the budget is heading in a trend toward a large deficit, rather than less," Michel David-Weill, senior partner of Lazard Frères & Company, the investment house, said. "This is inflationary in and of itself." Not everyone on Wall Street is critical of

Not everyone on Wall Street is critical of the President. Morris Cohen, an economic consultant, describes Mr. Reagan's leadership as "almost breathtaking" and predicts that his program "should prove highly beneficial to the economy in the next 12 to 18 months."

But Mr. Cohen is an exception on the Street. The thinking of many of those who have put their remarks on the record is that budget deficits mean heavy Government demands on the credit markets, and that means trouble. With the Federal Reserve holding a tight rein on money and credit, it means persistently high interest rates. That is bad news for stocks and bonds, and bad news, too, for autos, housing, state and local governments, small businesses and all others dependent on credit and the price of money.

"ADVERSE IMPACT" ON MARKETS

"The big concern is insuring that the President's program doesn't result in a massive budget deficit," John K. Castle, president of Donaldson, Lufkin & Jenrette Inc., said last Thursday. "If in fact the outcome were a larger debt and larger deficit, there is no doubt it would continue to have an adverse impact on the securities markets."

"I don't believe the market is rejecting the Reagan program, per se" Thomas Johnson, executive vice president of Chemical Bank's Treasury group, agreed. "It is saying that the increases being proposed in defense spending, combined with the size of the budget so far and the prospect of zero cutbacks in Social Security, can only mean a deficit that will put continued pressure on interest rates."

The Reagan White House has reacted with increasing exasperation—and Republican leaders in Congress with increasing anger—to Wall Street's negative reaction, as though the financial community had let down its man. Senator Howard Baker of Tennessee, the majority leader, even warned Wall Street of reprisals in the form of "credit controls, reorganizing the Federal Reserve, a windfall-profits tax on interest income, and wage and price controls."

But if Washington's Reagan supporters were disappointed in Wall Street, they should not have been surprised.

CONNALLY HAD MOST SUPPORT

Ronald Reagan was not Wall Street's first choice for President, most importantly because it feared the risks of his proposals for large tax cuts in the face of high infiation. If anyone, John B. Connally, Secretary of the Treasury in the Nixon Administration, commanded must support from the business and financial establishment. And it was George Bush, another establishment Republican candidate for President, who called Mr. Reagan's proposed economic program, especially the huge tax cuts, "voodoo economics."

According to the supply-side school of economics, the Reagan tax cuts would give business and investors new incentives and thereby touch off a burst of economic activity that would more than make up for the lest tax revenues. This expectation has required a leap of faith that conservative Wall Street has been unwilling to venture.

Most recently Wall Street's alarm was intensified by analyses of the budget for fiscal 1982, which begins only two weeks from row on Oct. 1, showing that the Reagan Administration's forecast of a deficit of \$42.8 billion was too optimistic. The Congressional Budget Office estimated that the deficit would be about \$65 billion in the new fiscal year.

Wall Street's most respected economists generally agreed with the Congressional estimate. The mounting cost of interest payments by Government would alone account for most of the underestimate by the Reagan Administration.

LARGE FISCAL IMPACT SEEN

The Conference Board, a nonpartisan business research body, placed the deficit for fiscal 1982 in a range of \$57.5 billion to \$62.5 billion, but said the true picture was far more stimulative than such figures implied. It predicted that large increases in military expenditures and tax cuts would give the economy a "massive" fiscal thrust of \$107.3 billion, or 3.33 percent of gross national product, in fiscal 1982. That compared with only \$34.6 billion in fiscal 1981, or 1.25 percent of gross national product.

Beyond fiscal 1982, analysts warned that the Reagan program was highly unlikely to produce the balanced budget the President had advertised on fiscal 1984. Data Resources, Inc. estimated that the budget deficit would climb from \$62.5 billion in 1981 to \$75.7 billion in 1984—and that it would continue to climb, reaching \$90.8 billion in fiscal 1983.

"They are trying to turn around overnight a system and spending patterns we have lived with for decades," said Seth Glickenhaus, director of Glickenhaus & Company, a Wall Street investment advisory firm. "It's just not that simple."

As painful as such appraisals were to the stock market, which tends to look only months, or maybe minutes, ahead, they were lethal to the long-term bond market. That market, already sinking before Wall Street

analysts had added up the budgetary implications of the Reagan tax cuts and the military buildup, sank to record lows.

BOND YIELDS SOAR

Yields on bonds soared to record levels, as did interest rates on long-term mortgages. Unless something was done to bring down those rates, the implications for both capital investment and housing construction would be severe.

"In 1979, when all the investors were promised a balanced budget, a \$1,000 Treasury bond came out at 9% maturing in the year 2009," Robert L. Shoemaker, manager of the Government trading department of Paine, Webber, Jackson & Curtis Inc., said last week. "Today that same bond is selling for \$635. This market is going to seek a level to hide at until it has some proof positive that inflationary deficits are not going to continue to eat away at the value of bond coupons."

Wall Street's doubts did come as something of a surprise in Washington. For one thing, very few Wall Street leaders criticized the President publicly. Some swallowed doubts because they sought favors—in the tax legislation, for instance—but also they were plainly reluctant to attack a President they like and heartily agree with on many issues.

It is also true that the White House has not been especially attentive to Wall Street or to big business. According to one of the President's long-time business friends from California, Mr. Reagan has yet to develop close new ties to leading business figures. He still listens to old friends, who typically are self-made entrepreneurs, not from the Wall Street or corporate establishment.

APPOINTMENTS BY REAGAN

During his campaign, in an effort to fore-stall criticism from the financial establishment, Mr. Reagan gave influential roles to such economists as Alan Greenspan, the Wall Street economist and chairman of the Council of Economic Advisers under President Ford, and George P. Shultz, president of Béchtel, the big international construction firm and Secretary of the Treasury under President Nixon.

The effort to reconcile the views of these traditional conservatives with the unorthodox supply-side economics produced the campaign budget document of Nov. 9, 1980, in which steep cuts in the budget were combined with the big tax cuts to achieve budget

balance by 1984.

It was like trying to square the circle. From the beginning, such traditionalists as Mr. Greenspan expressed grave doubts about the tax cuts and the sudden economic surge that was supposed to follow. The true significance of the tax cuts, Mr. Greenspan said, was not the promised spur to business, but rather the cuts in Federal spending that would have to follow, to keep the budget in balance.

It was also an effort to reassure the monetarists of the financial world—disciples of the belief, most forcefully promulgated by Prof. Milton Friedman, that slowing the growth of the money supply is the only true way to stop inflation—that led Mr. Reagan to appoint both monetarists and supply-siders to his Administration. He named a monetarist, Beryl Sprinkel, a close Friedman disciple, to be Under Secretary of the Treasury for Monetary Policy, and a supply-sider, Norman Ture, to be the Under Secretary for Tax Policy.

REGAN NAMED TREASURY HEAD

Indeed, Mr. Reagan named a Wall Streeter, Donald T. Regan, the former chairman of Merrill Lynch, Inc., to be his Secretary of the Treasury, to yoke these contradictory theories and theorists together.

Yet Wall Street was unconvinced. By May the markets had made clear that they found the President's design for restoring budget balance and reducing interest rates incredible. Despite the President's demonstration that he could win Congressional approval for his deep cuts in nonmilitary spendingshowing his supporters said would strengthmarkets-long-term bond prices plunged, short-term interest rates climbed

and equity markets weakened.

For a while, Mr. Reagan's top economic of-ficials argued before Congress that the prospective deficits did not matter; only the money supply mattered. Mr. Regan, Treasury Secretary, told the Senate Finance Committee in mid-May not to worry that the Administration's tax bill would be inflationary, because "inflation can be controlled through the money supply."

Whatever effect this had on the Senate, Wall Street was unimpressed. President Rea-

gan criticized the Street as unintelligent in economic matters, a truth he said he had picked up from Secretary Regan.

But one of the top Wall Streeters, Peter G. Peterson, chairman of Lehman Brothers Kuhn Loeb Inc., who had been Secretary of Commerce in the Nixon Administration, re-

sponded on June 25: "Wall Street has been told once again at the highest levels, that it does not offer good advice," Mr. Peterson said. "Yet, because the Street is not a message, but only a medium, the concept of Wall Street advice, like the concept of a Wall Street spokesman, is a kind of contradiction. The Street speaks only on tape—in prices and spreads—and these sig-nals come from all over the world.

"Blaming us for the implicit message," Mr.
Peterson concluded, "is like the fat man blaming his obesity on the waiter.

Though such criticism by the Wall Street establishment annoyed the White House, President Reagan sought to oblige by reducing the fiscal stimulus in his budget. This led him into one of his few political blunders: the hasty effort to cut an additional \$46 billion from Social Security benefits over the next five years.

The President again sought to appease Wall Street by scaling down his proposed tax cut from 30 percent over three years to 25 percent, and this proposal stuck. But in the bidding war with the Democrats over the tax bill in Congress, sufficient additional cuts were added to make the tax cuts at least as as Mr. Reagan had originally proposed.

Mr. Reagan's advisers fully expected that, once the tax bill, with its benefits to business and the financial institutions, was in place, Wall Street would celebrate. It certainly had got most of what it wanted, both directly in lower tax rates and indirectly through the impact on after-tax corporate earnings and the encouragement to individual as well as corporate savers and investers. Though it did not get a shorter holding period for long-term capital gains, this seemed only a small part of its persistent distress, which is linked primarily to budget deficits and high interest rates.

What Wall Street now wants is a stricter budget and fiscal policy, which would remove some of the burden from tight money and high interest rates. The traditional conservatives of Wall Street, including many pragmatic monetarists, are calling for major cuts in the military budget, amounting to \$30 billion or more, by fiscal 1984, as well as further cuts in nonmilitary programs.

Although Mr. Reagan has indicated his willingness to trim his military budget, he is still struggling to minimize the military cuts or even to instist that he will meet his aim of 7 percent annual increases in military spending, adjusted for inflation. And he has renewed his promises to cut nonmilitary spending as well.

His current aim is to reduce the fiscal 1982 budget by an additional \$10 billion to \$15 billion, and to cut \$75 billion more from the budgets for fiscal years 1983 and 1984. But this is to be done is still to be decided, and Wall Street, betting its own as well as its customers' money, is not yet convinced.

[From the New York Times, Sept. 14, 1981] WALL STREET EXPERTS SKEPTICAL ABOUT IMPACT OF MILITARY CUT

(By H. J. Maidenberg)

President Reagan's decision to trim military spending over the next three years as part of a drive to balance the Federal budget 1984 evoked cautious reactions among Wall Street economists yesterday.

While the economists welcomed the \$21 billion reduction in arms spending announced by the White House on Saturday, none thought the action would be sufficient to materially change the gloomy mood in the nation's financial markets.

The defense trims may be a step in the right direction but they will not solve the problem that is weighing heavily on the financial markets," said John D. Paulus, senior financial economist at Goldman, Sachs

"The trims don't address the hard numbers and facts the street will have to face Monday morning," he added. "For instance, the numbers are that the Administration's threeyear tax cut will deprive the Treasury of \$280 billion while the budget trims thus far projected for this period total some \$135 billion."

COSMETIC JOB "WILL NOT WORK'

Edward E. Yardeni, chief economist at E. F. Hutton & Company, summed up the views of several of his colleagues: "I hope" the military spending trims aren't "the beginning of a cosmetic approach to solving the soaring budget deficit, but a real start to bringing Federal spending into line with revenues. If it is a cosmetic job, it will not work be-cause the financial community will see right through it in no time and react even more negatively than it has in recent weeks.

Others interviewed supported the view held by Richard Scott-Ram, vice president and economist at the Chemical Bank, who said: "The defense cuts are woefully inadequate to produce any significant reduction in the Federal deficit. Reductions three times that announced by the President or an equivalent increase in Federal revenue could be a significant move in the right direction. And confidence in the financial community will not be restored unless these spending cuts or additional revenues are enacted im-

President Reagan's cuts in military spending are part of the \$75 billion of additional reductions in Federal spending he believes are necessary to balance the budget by 1984. The deeper budget cuts are needed because the Administration's previous estimate of a deficit of \$42.5 billion for the 1982 fiscal year alone is now widely held to be at least a third below projections by private economists.

Mounting fears of substantially higher Federal budget deficits have battered the securities markets in recent weeks, with stock and bond prices falling sharply.

Chemical Bank's Mr. Scott-Ram summed up his view of investor sentiment: "Investors cannot, understandably, see where the funds are coming from to finance both a soaring Federal deficit and the borrowing needs of business so necessary to revitalize American industry."

What is worse than the official Federal deficit figures, he added, "is the even greater rise in 'off-budget' borrowings by Government agencies that are not included in the Government debt figures." These agencies include the Federal Home Loan Board and the various entities serving agriculture.

THE COMMISSION ON MORE EFFECTIVE GOVERNMENT

• Mr. ROTH. Mr. President, public support for S. 10, to create a Commission on More Effective Government, continues to grow. The persistent failure of our governmental programs and agencies to perform at a satisfactory level underscores the need for a comprehensive review of our Federal Government's procedures and the manner in which it relates to State and local units and the private sector. S. 10, a bill that Senator EAGLETON and I introduced earlier this year will create the Commission that will carry out this review.

In an article that appeared recently in the Christian Science Monitor, Brad Knickerbocker caught the essence of the Commission effort, and the manner in which it can effectively improve the performance of our Government at all levels. I ask that Mr. Knickerbocker's article be included in the RECORD.

The article follows:

[From the Christian Science Monitor, Sept. 10, 1981]

U.S. ADVISORY BODY WILL TRY TO UNRAVEL BUREAUCRATIC KNOT-LIKE HOOVER COM-MISSION, PANEL SEEKS TO STREAMLINE GOV-ERNMENT

(By Brad Knickerbocker)

One can argue persuasively that this year's startling actions on budget, taxes, regula-tions, and intergovernmental relations are proof that the "Reagan revolution" is already

reality.

But there is widespread movement afoot in Wa hin ton to ma e e en deeper and more lasting changes in government operations.

Its model is the Hoover Commission, a blue-ribbon panel that had significant impact on the structure and business of gov-ernment in the years following World War II. It enjoys broad bipartisan support ranging from conservatives enjoying new-found power to unrepentent liberals. The White House likes the idea, and so does the "citi-zens' lobby," Common Cause.

Specifically, bills progressing through Conos: w 'tt' | establi h a new 'Commission on More Effective Government." The commission's broad mandate would be to probe the anagem nt. org nightly n and operations of the executive branch of federal government as well as Washington's relations with state and local governments and the private sector.

The 18-member commission would be appointed he the Presi et. Sena e ma ority leader, and House speaker, with some members representing state government and others not involved in any partisan political activity. Given the party loyalties of today's political leadership, there likely would be 10 Republicans and 8 Democrats unless expected amendments prevail and an even 9-9 membership is required.

The commission would have 30 months to

hold hearings and formulate recommendations before reporting to Congress and the

President.

"We've tinkered here and there with the governmental machine, but what we've ended up with is a Rube Goldberg arrangement that costs the taxpayers more and more in wasted money and gives less and less service to the people," says Sen. William Roth (R) of Delaware, chief Senate sponsor. "Now is the time to have the best minds in America we can start making it work better." comprehensively review government . .

Liberal Democratic Sen. Thomas Eagleton of Missouri agrees and has signed on as one of many cosponsors. Deputy White House budget director Edwin Harper told a Senate Committee the Parameter told a Senate Committee the Reagan administration "heartily endorses" the proposal.

To those cynics who say the commission's report would simply gather dust, the bills' supporters point out that the Hoover Commission (appointed by President Harry Tru-man in 1947 and chaired by former President Herbert Hoover) saw 72 percent of its recommendations adopted. Among these were the Military Unification Act and the State Department Reorganization Act.

"I was here in time to help implement the Hoover Commission recommendations," recalls Rep. Richard Bolling (D) of Missouri, veteran lawmaker and chairman of the influential House Rules Committee. "I'm completely convinced that this is the only possible way that this country can reform its government."

The growing bulk and complexity of government in this country is a source of increasing concern. Federal spending is 15 times greater today than it was 30 years ago. While the number of federal civilian employees has remained fairly constant since the late '60s, the number of workers in other levels of government has shot up. In 1950 there was one government job-holder for every 24 Americans; now, the ratio is one for every 14.

Many attribute this increase to federal programs and requirements. Between 1949 and 1979, there was a net gain of 529 federal departments, agencies, bureaus, offices, administrations, institutes, services, and other organizational subdivisions. The size of the Federal Register (one measure of the increase in federal regulatory activity) has increased nearly 300 percent in the past

"Intergovernmental relations today have clearly crossed a new threshold of complexity and confusion," the Advisory Commission on Intergovernmental Relations, a highly respected bipartisan group, warned last week. "The looming fear is one of unrestrained intergovernmentalism, of govern-

ment pragmatism out of control."

The Hoover Commission did its important work at a time when the United States was entering a new era in both foreign and domestic federal activity. Supporters of a new "Commission on More Effective Government" say the time is ripe for another look at the fundamentals of how Washington operates.

THE WAITSFIELD-FAYSTON TELEPHONE CO.

Mr. LEAHY. Mr. President, the tradition of American invention and innovation is a very long one, and Vermont has always been a part of that tradition.

With industry spending billions for research and development, there is a widespread belief in the United States that the age of individual ingenuity has passed. But there is a small company in Vermont that believes otherwise. The Waitsfield-Fayston Telephone Co. has fewer than 3,100 subscribers, 24 employees, and a service area that includes only a part of one Vermont valley. Yet this little company was computerized 15 years ago and is the only phone company in Vermont that transmits voice messages digitally. It has developed innovative solutions to problems like the looting of coin boxes and is applying its in-genuity to keeping its customers' monthly phone bills down. There are many other ways in which this small business has proven to be a pioneer in a field thought to be exclusively domain of giants.

I am very proud of this Vermont business and its officers, Dana and Eleanor Haskin. Mr. President, I request that a news story about the Waitsfield-Fayston Telephone Co. from the Burlington Free Press edition of Sunday, August 23, 1981, be printed in the Record.

The article follows:

It's Light Years Ahead—Phone Company Computer Is "Voice" to Its Customers

(By Neil Davis)

If Waitsfield-Fayston Telephone Co. disconnects a customer for nonpayment of a bill, he is told what has happened by the computer, which switches on a recorded message when the customer tries to make a routine call.

With the help of the computer, the company is able to leave the otherwise disconnected customer with emergency service, so he can call the police, ambulance service, fire department or telephone office.

State Public Service Department telecommunications specialist Charles Larkin said he would like such service offered universally.

"Waitsfield is light years ahead of every other phone company in Vermont, including Ma Bell's," he said. "It is really a pioneer."

The small, old, family-owned telephone company has fewer than 3,100 customers and only 24 employees, but it has been computerized for 15 years. In February, it became the only Vermont phone utility transmitting voice messages digitally.

The digital system, which converts spoken words into bits of computer language and back instantaneously, makes the business of routing a call from one phone to another much faster and more efficient than the older electronic system.

Creative use of its state-of-the-art data processing equipment has allowed the Mad River Valley company to offer its customers services unavailable elsewhere in the state or anywhere, in some instances.

About 10 years ago, before the Bell system began to offer charge-a-call service, the Waltsfield-Fayston company developed a forerunner.

To solve the problem of rampant looting of coin phones, the company asked the state Public Service Board permission to make the phones payless.

The costs of repairing and replacing the looted phones and of collecting the money from coin phones in general was greater than the income from local calls on those phones, so the company decided to make local calls cost-free.

Long-distance calls were allowed only if charged to a credit card or another phone.

In contrast to Waitsfield's coinless public phones, their counterparts in the rest of the state cost a dime, a figure New England Telephone has tried unsuccessfully to persuade the Public Service Board to double.

"The Public Service Board told us to try it for six months 10 years ago, and it was such a success they let us do it permanently," said Waitsfield-Fayston vice president, Eleanor Haskin.

"In a small company, you can make innovative decisions and see how they work out," she said. "In the Bell system, they can't do that as easily. It's harder for them to offer something in Vermont and not in the rest of the system."

She said rising labor costs may make it profitable for other phone companies to switch to coinless public phones to avoid having to send out money-collectors and repairmen.

Another unique service offered by the Waitsfield-Fayston company is semipublic phones, dubbed "condominium service."

The computer recognizes calls from phones in rented housing units for which the owner has asked to be protected from having to pay for long-distance calls by the tenants. Although toll calls from those phones can

Although toll calls from those phones can be dialed directly, without operator assistance, they must be charged to a credit card or another phone.

For local calls, the phones operate the same as typical private lines.

Waitsfield-Fayston is about to begin offering "custom calling services," offered al-

ready by New England Telephone Co. but only in certain localities, such as Burlington. The small independent will be the first

The small independent will be the first phone company in Vermont to offer those services systemwide.

Among custom services are speed-calling, call-forwarding and three-party conference calls.

Soon Waitsfield-Fayston may pioneer another service made possible by advanced computer programming—metered service.

Whereas phone companies conventionally group their customers into geographic zones for purposes of determining tolls, the computer has the capability of computing distances between phones precisely and determining charges on that basis.

Mrs. Haskin said her husband, company president Dana Haskin, is considering converting to a more cost-specific method of figuring out monthly phone bills.

People could keep monthly phone bills very low by keeping their calls short, both in distance and time.

"With the growing problems facing lowincome and fixed-income people, there has to be a way to provide service at a threshold rate," she said.

"We're almost ready to go ahead with this, but it's going to raise a lot of hackles with New England Telephone and other companies. The Bell system says: 'Please wait.'"

HIGH INTEREST RATES

• Mr. BOREN. Mr. President, I hope that all of my colleagues have been following closely the various statements that have been made since the Congress returned from the August recess concerning high interest rates.

The statements and the minidebates which have occurred since we returned last week have been very instructive and I commend them to any who have not yet read them.

The statements have contained a wide variety of views centered around the common theme that interest rates are too high and that something must be done to bring them down quickly.

There have been several recommendations for action, ranging from a proposal by the distinguished Senator from Mississippi, Senator STENNIS, calling for the creation of a commission to study the problem and make recommendations, to the proposal entered in the RECORD yesterday by the junior Senator from Florida, Senator HAWKINS, calling for a complete restructuring of the Federal Reserve Board, to a proposal by Senator MELCHER from Montana-a proposal. Mr. President, which I have enthusiastically cosponsored—calling for a meeting between the President and the Federal Reserve Board to modify the Board's monetary policy so as to significantly reduce interest rates within the next 90 davs.

There have been useful exchanges between distinguished Senators such as Senators Long and Byrd of Virginia, and thoughtful individual statements such as the one introduced in the Record yesterday by Senator Proxmire.

Mr. President, I cannot say that I have agreed with all of the statements that have been made, nor all the proposals advanced—but I believe it is extremely useful that these dialogs are taking place and that they continue as we search for an effective solution to this

commonly perceived economic calamity. It is highly significant that all speakers agree on the basic premise—that interest rates must come down. The only debate is over how this is to be achieved.

Mr. President, I would issue only one cautionary note to my colleagues, and that is that as useful as the rhetoric of these past several days has been, we must not lose sight of the imperative need for action—for quick action.

As I said last week, the distinguished majority leader, Senator Baker, was absolutely correct in his assessment that action needs to come now, within days,

not within months or weeks.

That is why I believe that the proper place for action to take place is within the executive branch. The problem is short-term need to reduce interest rates, and even with a complete consensus between the House and Senate and among the Members of the two bodies, it would take several weeks to move effective legislation through the legislative process. We do not have that kind of time.

I would hope that the President and others within the executive branch who have the capability to voluntarily address this problem, without being mandated to do so by the Congress, would recognize the need and proceed apace. If they do not, and if they force the Congress to seek its own solution, the result will very likely be additional bankruptcies both for individuals and businesses across the country, and legislation whose necessarily hasty enactment may not be totally satisfactory to all concerned.

In other words, Mr. President, the best solutions for the short-term difficulties we face rest within the grasp of

the administration.

The Congress can and will address the long-term needs through budget cutting and eliminating the Federal deficit so as to remove the Federal Government from the credit market. But the short-term cure, to carry us to the long-term solution, must come from the executive branch, and it must come soon.

RUTH LOVE FORMAN

 Mr. HEFLIN. Mr. President, I wish to call to the attention of the Senate the outstanding achievements of a dedicated educator of my State, Mrs. Ruth Love Forman. an elementary school teacher in Birmingham. Ala.

Recently, Mrs. Ruth Love Forman was selected to appear in the American Biographical Institute's 12th edition of "Personalities of the South." Personalities of the South recognizes thousands of outstanding southerners in various fields of endeavors. Each year a copy of the volume is placed in the Library of Congress and in all State libraries of the

South. Personalities of the South has been nationally acclaimed as a valuable research document for business leaders genealogists, biographers, historians, li-

I ask that a copy of a recent newspaper article pertaining to the accomplishments of Mrs. Forman be printed in the RECORD, along with my remarks.

The article follows:

brarians, and journalists.

PROFESSIONAL WOMAN CITED (By Rev. T. Thornes)

The Ebenezer Baptist Church, Pastor Rev. T. Thornes, the City of B'ham, State of Alabama, B'ham Times Newspaper, and Friends congratulates Mrs. Ruth Love Forman on her recent historic achievement.

Mrs. Ruth Love Forman's name was recommended to the Institute's Governing Board of Editors for biographical inclusion in the 12th Edition of Personalities of the South book. This recommendation was brought forward by the Research Division after they reviewed a newspaper article written on her in the B'ham Times. The south recognizes thousands of outstanding southerners in various fields of endeavor. Each year a copy of Personalities of the South is placed in the Library of Congress (Washington, D.C.) and in all state libraries of the south. This book has been nationally acclaimed a valuable research document for business leaders, genealogists, biographers, historians, librarians, and journalists. Mrs. Forman will appear in the 1982 volume. It comes out in the winter of that year.

Mrs. Ruth Forman received her high school diploma from Dunbar High School, Bessemer, Ala. She received her B.S. degree from Ala. A&M University, Huntsville, Ala. She has done extensive study at Auburn University, Auburn, Ala. She attends from one to three workshops each summer in Jefferson County.

She is presently employed by the Jefferson County Board of Education as an elementary school teacher. She teaches 4th grade math at Fultondale Elementary School, Fultondale. Ala. She has made a lasting contribution to the field of education. Her fourth graders head the list of winners in Jefferson County for the annual Math Fair for grade 4. That county competition lasted for 5 years. Her students won more trophies and ribbons than any fourth graders in Jefferson County. In March of 81 her fourth graders entered an Alabama Math League for the state of Alabama. Her students comagainst students in Alabama. They received certificates for their efforts. Her classes participate in Metric Week each year during the month of May. They are awarded certificates at the completion of their metric projects. Mrs. Forman has received letters of commendation for this from the state de-partment and local officials. Several times some of her metric booklets were chosen by the Elementary Math consultant to be used during her math workshops across the state of Alabama. 7n May 1981, her fourth graders won 2nd place in the Mexican Fiesta School Contest. He wrote an essay on Mexico. He was competing against county, city and catholic schools. She led the tract meet one year and brought her school in the top number. She had many top winners in the county competition when she was over the 4-H Club (Girls). Mrs. Forman was awarded the 4-H female leader award for the year 1972. She has been a judge for an elementary math fair and cheerleaders for a Jr. High School.

Mrs. Forman is a member of the Ebenezer Baptist Church, 3510 Todd Ave. S.W. B'ham, Rev. T. Thornes. Pastor. There she is very active. She is fathful in all of her endeavors. She teaches the Jr. Boys Class in Sunday School, she reads the 11:00 a nouncements on Sunday morning, she attends Bible Class on Friday evenings. She has narrated the Rev. T. Thornes Ministry 3½ yrs. each Sunday evening at 6:00 p.m. over radio station WSMQ 1450 on your dial. She has received over 21 Bible certificates from completing Bible courses all over the U.S., she has made two inspiring speeches to the Jefferson County Sunday School Congress during the last five years. Mrs. Forman has directed yard and church weddings, she is blessed with many talents and uses them all to perfec-

tion. She has made several women day speeches in Biptist and Methodist churches and is booked for more before the year is out. Mrs. Forman has cooperated with churches all over the city of Birmingham and Bessemer, and has taught classes, acted at Superintendent, reviewed Sunday School lessons, given meditations and acted as mistress of ceremonies.

The Ebenezer Baptist Church, her husband and family is proud of Mrs. Forman for the pride, honor and respect she has earned. She achieved all these merits because of the four basics (home, church, school, and community). She has done church work since she was very young. Mrs. Forman gives the credit to her parents, minister and above all God. This wisdom have surely paid off. All these things grew up in Mrs. Forman. She is a good example of a good, law abiding citizen, and is a qualified voter and have been for a long time. She has excelled in all areas. Ebenezer is blessed to have this wonderful personality that have produced all of these great things to be a part of us. Mrs. Forman has gone down into national history. Generations unborn will read about her contributions to society and call her blessed. She has traveled nationwide, this have therefore given her rich experiences in many areas. She is also the church writer for the Birmingham

I would like to commend the Research Division on a job well done. For we realize what a great honor it was just to be nominated even if she had not been accepted. But this deserving young lady was accepted. What a mighty act of God. Giving unselfish service to God and mankind have surely paid off for Mrs. Ruth Love Forman. Again congratulations to this worthy celebrity.

INTEREST RATES

• Mr. GARN. Mr. President, I would like to take this opportunity to call to my colleagues' attention an article that appeared most recently concerning interest rates.

In the Washington Post yesterday, columnist David Broder argued that President Reagan's economic plan "is being mauled by the money markets even before it gets a trial run."

This morning's Wall Street Journal adopted a somewhat different perspective, calling for congressional leaders to stop "wasting their energies scaring the life out of the capital markets," and "devote them instead to thinking of ways to see to it that the anti-inflation fight succeeds."

Mr. President, this editorial makes some very important points.

One is that President Reagan's economic program has not yet been given a chance. The tax cut does not even become effective until next month.

Given that today's high interest rates are the result of years of irresponsible Government spending, years of ballooning Federal deficits, years of running the monetary printing presses far too fast and years of mounting Government regulations, I believe the Reagan economic package should be given at least a few months to prove its ability to begin reversing the consequences of years of irresponsibility.

A second important point made by the editorial I have here is that the private sector of our economy has a great responsibility in bringing interest rates down and helping our economy regain a

sure footing. After all, interest rates are determined by the private sector and capital investment decisions are made by the private sector.

The Reagan administration's economic package is removing the Government from our economy as an engine of inflation and offering incentives to the private sector to focus its attention on productivity-enhancing capital investments. The private sector has a responsibility to incorporate lower inflationary expectations in its decisionmaking, and the private sector has a responsibility to respond to the new incentives.

The third important point made by the editorial is that inflation and high interest rates are truly political phenomena. Both result from Government policies that have political support from certain quarters. Moreover, an essential part of lowering high interest rates is a demonstration of a political will that is unquestionably strong enough to resist those parties with a vested interest in seeing high inflation persist.

I ask that this article be printed in full in the RECORD.

The article follows:

BLAME WALL STREET (By David S. Broder)

Despite the handicaps of being a non-lawyer, a non-financial expert and a non-partisan of the Reagan administration, it is plain even to me that the White House has grounds to sue Wall Street for non-support. Ronald Reagan's economic plan is being mauled by the money-managers even before it gets a trial run. If the assault weren't so recklessly selfish and stupid, you could really laugh.

If ever there has been a government in Washington eager to do acrobatics to please the business and financial big shots, it is this one. It has taken the biggest whack at federal spending in 50 years, and every nickel of it from "people programs" that the monied folks don't need, don't want, don't use and don't support.

It has cut taxes generously for rich folks and even more generously for corporations. And the response has been one sulky bear of a market, a tailspin in stocks and bonds and a run-up in interest rates that have given the country the shakes and cast a pall over the bright economic future Reagan and his allies projected. Thanks a bunch, Wall

Street.

However much Reagan and Co. have contrived to get government off business' back, the mighty men of the financial markets have said, "It's not enough, We want more."

Although Reagan never advertised it, the tax bill he bulled through Congress goes a long way toward eliminating the corporate income tax as a significant source of federal revenues. A top lobbyist for the bill says it will cut the corporate tax bills in half. But will cut the corporate tax bills in half. But a lawyer I know has a client company that paid \$42 million last year and will pay somewhere between \$2 million and nothing next year. Given the creativity of corporate accounting, I'll bet that is far from unique.

flow and future after-tax profits.

They know these are the ingredients for a booming stock market that would funnel billions into job-creating investment. But they ain't buying stocks. Why? Because they can make even more money cashing in on the incredible interest rates they can extract from government and private borrowers in the current debt-refinancing crunch.

As a top Washington business lobbyist put it, "They can make 20 percent, with virtually no risk, buying short-term government obligations, so why should they take the risk of equity investments?"

From one viewpoint, you could say Reagan is getting exactly what he deserves, as a true believer in the historically dubious theory that there is a "natural harmony" between business advantage and the public interest. Having exalted the virtues of the market-place, he is now seeing his own program victimized by men who calculate everything by the bottom-line calculus of that coldly impersonal market. For Reagan to "jawbone" the financiers for lower interest rates, as congressional Republicans suggest, would not just be ineffective, it would be thoroughly inconsistent with his own principles.

And yet it is stunning to see the big wheels of Wall Street so callously scuttling the very program that American business, in a literally unprecedented fashion, had pressured

Con_ress to pass just a few weeks ago.
I asked my lobbyist friend, a key figure in that effort, "Don't they realize they have bought in on Reagan's program and they have a stake in its working?" It was, apparently, a naive question.

"Let me tell you," he said, "there is no more shortsighted set of people than the Wall Street financial community. I'd really like to see Reagan tell these people to shove it. They didn't elect him and they don't own him."

But, of course, Reagan is not doing that. Instead, he is going back to Congress for yet more cuts, to convince the money-managers that he will somehow balance the budget.

I thought to myself: the people who are imposing these demands are people who proclaim the virtues of risk-taking. But they won't take risks themselves. They are the ones who say it's time for school-lunch users and subway riders to pay their own way and even make some sacrifices. But they will shortchange American enterprise's long-term capital needs in order to make a little more fast money from high interest rates.

My grandmother used to talk about people who know the price of everything and the value of nothing. If these money-men don't understand that they will never have a government more eager to please than this Reagan outfit, and they sink its policies by their own shortsighted selfishness, then they deserve what they will get.

It's just too damn bad a lot of other people will get hurt in the process.

ST. JOSAPHAT COMMANDERY

• Mr. LEVIN. Mr. President, September 12, 1981, marked the 100-year birthday of the Michigan Grand Commandery No. 65 as an individual unit of the Knights of St. John. Commandery No. 65, now known as the St. Josaphat Commandery was established one century ago expressing a deep sense of public duty by performing charitable deeds for members of the surrounding community. Since its birth, it has successfully upheld the pledge to provide continual guidance and support for its citizens.

Commandery No. 65 was originally formed as St. George Commandery No. 65 of the Knights of St. John. It later became known as the Bohemian Commandery of St. Wenceslaus and finally the St. Josaphat Commandery of the Knights of St. John.

The Knights of St. John united many different local Catholic organizations provided in various cities in 1879, thus forming a national organization under the name of Roman Catholic

Union of the Knights of St. John. The organization has grown steadily since 1879, always upholding its high standards of religion and citizenship.

Mr. President, I would like to take this opportunity to congratulate St. Josaphat Commandery for its success on its 100 birthday celebration. I would also like to commend the organization and its loyal members for 100 years of fine charitable service, and wish them much success in the future.

DR. RICHARD RUTLAND—FAMILY DOCTOR OF THE YEAR

 Mr. HEFLIN. Mr. President, I am very pleased and honored to inform my colleagues that a family physician from a small town in Alabama has been named the "Family Doctor of the Year" by the American Association of Family Physicians and Good Housekeeping magazine.

Dr. Richard O. Rutland, from Fayette, Ala., has brought a great deal of honor to his community and to the State of Alabama. I wish to take this opportunity to salute him upon his receiving this

most prestigious award.

While the entire community of Fayette takes pride in having one of its leading citizens receive this honor, no one in Fayette or in the west Alabama County that bears the town's name was surprised to learn of the award. Dr. Rutland, who founded the McNease-Hodo Medical Clinic in Fayette, has been a smalltown doctor and distinguished leader in the field of family medicine for nearly 30 years.

Dr. Rutland is committed to rural health care and he established Fayette as a rural preceptorship site for the University of Alabama School of Medicine in Birmingham, as well as for the students and residents at the College of Community Health Sciences in Tuscaloosa.

Dr. Rutland has delivered more than 1,800 babies and regularly works a 70-hour week as a family doctor. Dr. Rutland sees an average of 30 to 35 patients each working day and he regularly makes house calls.

Mr. President, I can think of no doctor who deserves this prestigious award more than Dr. Rutland.

And Dr. Rutland has passed his love of people and dedication to medicine and family health on to his children. One of Dr. Rutland's children, Dr. Richard O. Rutland III, is a practicing pediatrician in Gadsden, Ala. Dr. Rutland's daughter, Cynthia Lyn McBrearty, is married to Dr. Michael McBrearty, a practicing family physician in Fairhope, Ala. Dr. Rutland has two other children, Melissa Babb White, whose husband, Rick, is a sergeant in the U.S. Army stationed in Germany, and Craig Douglas Rutland, a senior at Fayette County High School.

Mr. President, I am very proud of this dedicated and skilled physician from my home State. I regret that I was in Alabama and was unable to attend the awards ceremony that was held at the Department of Health and Human Services building on August 22, 1981.

Mr. President, I ask that a letter of congratulations written to Dr. Rutland by President Reagan, a Birmingham News newspaper article written about Dr. Rutland, the news release written by the American Academy of Family Physicians and a detailed description of the "Family Doctor of the Year Award" be printed in the Record following my remarks.

The material follows:

THE WHITE HOUSE,
Santa Barbara, Calif., August 21, 1981.
Dr. RICHARD RUTLAND,
Fayette, Ala.

DEAR DR. RUTLAND: I am very proud and happy to commend your outstanding contributions to the field of Family Medicine.

Your friends have brought to my attention your 30 years of dedicated service as a family practice physician in Fayette, Alabama. I know you take pride in this service and particularly in the more than 1,800 babies you have delivered. Your leadership in the medical profession as reflected by your contributions to the founding of the College of Community Health Services at the University of Alabama is truly outstanding.

The family practitioner is a fundamental and important part of our primary health care network. It is most fitting that we honor you, Dr. Rutland, and, at the same time, pay tribute to those in your profession who have given so much to their fellowman.

Congratulations on being named "Family Doctor of the Year." You have my best wishes and warmest personal regard.

Sincerely,

RONALD REAGAN.

RURAL ALABAMIAN NAMED AS "FAMILY DOCTOR OF THE YEAR"

Washington.—An updated version of the "old-time rural family doctor," whose own family brackets the state of Alabama with health care service, is the 1981 Good House-keeping "Family Doctor of the Year."

heath care service, is the 1981 Good Housekeeping "Family Doctor of the Year."

Announcement of the fifth "Family Doctor of the Year" was made here today by
Dr. Edward N. Brandt, Assistant Secretary
for Health of the Department of Health and
Human Services. The 1981 honoree is Dr.
Richard O. Rutland, Jr. of Fayette, Ala. The
national citation of the country's prototypical family physician is cosponsored by the
widely known women's magazine and the
American Academy of Family Physicians.

Symbolic of the award is an original bronze sculpture of the Greek god of medicine, Asklepios, by James Taylor of Cincinnati. The 17-inch figure mounted on limestone was presented to Dr. Rutland by Dr. Brandt at the DHHS ceremony.

The Good Housekeeping "Family Doctor of the Year" award thus returns to rural America after having been held for the past year by a big-city family doctor.

Dr. Rutland, 55, conducts a full-time family practice in the west central Alabama town of Fayette. He is the father of a pediatrician in Gadsden, in east central, Alabama and father-in-law of another family doctor in Fairhope, Ala., on Mobile Bay in the extreme southern parts of the the contract of th

the extreme southern part of the state.
Dr. Rutland is committed to rural health care as a partner in the McNease-Hodo Clinic at Fayette. A board certified specialist in family practice, he was an early diplomate in the specialty (1971) and was recertified in

He is a graduate of Tulane University School of Medicine in New Orleans and attended both the University of Alabama and Duke University as an undergraduate. He interned in Birmingham, and took residency training in Bakersfield, Calif., and in Colorado. He served in the Navy in both World War II and the Korean War.

He established Fayette as a rural preceptorship site for the University of Alabama School of Medicine in Birmingham and later for the students and residents at the College of Community Health Sciences in Tus-

caloosa. He served on the active faculty of the College of Community Health Sciences from 1973 to 1978, and has been on the visiting faculty since 1978.

In the early 1970's, the small community of Berry was in desperate need of medical care. Dr. Rutland agreed to assist the community leaders in organizing a medical board and planning committee. In the interim, he provided medical care in Berry in his "spare time" and on his day off. A modern clinic now has been built in Berry and a physician recruited.

Dr. Rutland does a broad-spectrum family practice, including assisting in surgery, in his 70-hour-a-week practice. He has delivered some 1,800 babies in his career. He is family physician to some 30 elderly patients in local nursing homes and sees an average of 30-35 regular patients in his office daily. He makes housecalls regularly.

Dr. Rutland is married to the former Nancy Babb of Texas. Besides the son and daughter involved in Alabama medicine, they have two other children, a daughter in Germany, and a son in high school. Dr. and Mrs. Rutland were simultaneously "Man" and "Woman" of the year in Fayette in 1961, the only time this has occurred in the local competition.

Dr. Rutland and his four predecessors will be honored September 21 by their peers in the AAFP Congress of Delegates at the medical organization's annual meeting in Las Vegas, Nev. Identical bronze castings of the Asklepios sculpture will be presented to the previous awardees at that time.

THE FAMILY DOCTOR OF THE YEAR AWARD (Cosponsored by Good Housekeeping Magazine and American Academy of Family Physicians)

The Family Doctor of the Year is selected each year from among members of the American Academy of Family Physicians, the national association of family doctors. The Kansas City-based Academy has 50,000 members throughout the United States. Candidates are submitted by state chapters of the AAFP, which is the nation's second largest medical organization (next to the all-doctor AMA) and the largest medical specialty society.

Announcement of the physician selected has been made from the White House by the President or the First Lady and also by the Department of Health and Human Services. Announcement traditionally has been in the late Spring or Summer. Thereafter, the doctor is honored by the Academy's Congress of Delegates at its Annual Meeting in the Fall. An article honoring the winner and finalists appears in Good Housekeeping magazine.

The Family Doctor of the Year is selected by the editors of Good Housekeeping from a panel of 10 finalists determined by a screening group of doctors from the AAFP. Candidates are submitted to the screening group by the leadership of the various state chapters. The Family Doctor of the Year thus is truly chosen by his or her peers in family practice, with the final determination made by Good Housekeeping on the basis of evidence presented.

The purpose is to personify to the nation, through the announcement from Washington and subsequent news coverage and related activities, the concept of the emerging new type of American family doctors, whose numbers are increasing dramatically only a decade after approval of family practice as a primary medical specialty.

There have been five Family Doctors of the Year named to date: Robert Boyer, M.D., Kingman, Kansas; Mario Ramirez, M.D., Roma, Texas; J. Roy Guyther, M.D., Mechanicsville, Maryland; Eugene Fanta, M.D., Brooklyn, New York; and Richard O. Rutland, M.D., Fayette, Alabama. [From the Birmingham (Ala.) News]
FAYETTE PHYSICIAN PUT "FAMILY" BACK
INTO MEDICAL PRACTICE

(By Harold Kennedy)

FAYETTE.—Arising at 5 a.m. is "old hat" for Dr. Richard O. Rutland Jr. As a family doctor, he has been doing it for years to meet his seemingly impossible schedule of seeing scores of patients, conducting staff meetings and doing any number of other professional and civil duties.

But it was with a certain amount of apprehension Monday that the 55-year-old physician pushed back the bed covers in the pre-dawn hours and swung his legs to the moor for another long day.

His schedule at McNease-Hodo Medical Clinic, a \$500,000 facility he helped build, called for cramming about three days of work into one . . . And there was the packing and other preparation for the trip to Washington, D.C. The trip would consume those valuable three days in the life of this physician described by many in Fayette as one of the best and most dedicated family doctors anywhere.

Many outside Fayette apparently agree. His trip to the nation's capital was to receive the coveted Good Housekeeping national award of "Family Doctor of The Year." He earlier had been named Alabama's "Family Doctor of The Year."

Rutland, as anyone who knows him will quickly point out, didn't earn these honors in one year, as the title would indicate. It came for 25 years of uninterrupted service to his community and state.

The Eufaula native has been a driving force behind the family doctor concept from the time he, his wife Nancy and their children chose Fayette as their place in 1954. And he was instrumental in organizing and starting the state's present program of educating and training physicians for family practice, with particular emphasis on serving in rural areas of the state.

"It seems entirely appropriate that the nomination for 'Family Doctor of the Year' go to a man whose interest and competence began at home," said longtime Fayette Mayor Guthrie J. Smith. "Family has a special neaning to Dr. Rutland.

"His lovely wife and marvelous children

"His lovely wife and marvelous children have established, with his support, special places in the life and fabric of our community."

It take but a brief glance at the Rutland family to realize the truth in the mayor's statement. The oldest child Richard III, also is a physician and is practicing in Gadsden. Cindy, the second child, is married to a

Cindy, the second child, is married to a family doctor, Missy, the third child, lives with her military husband in Germany, and Craig, the youngest, is a pre-medical student at the University of Alabama.

Mrs. Rutland, the former Nancy Babb, of Denton, Tex., has, besides raising their four children, been involved in civic work for years.

One year the couple was named "Man and Woman of the Year" of Fayette. And the town named a swimming pool for Mrs. Rutland. She taught youngsters swimming for more than 20 years and has been involved in all phases of park and recreation work.

One of his few regrets in the past 25 years, says the physician, is that his practice and other duties have kept him away from his family too much. "Credit for raising children has to go mainly to their mother," he readily added. "That has been my most difficult problem—how to devote enough time to my practice, to my family, myself and community."

A look at the physician's background makes one realize his dilemma. He, his fellow doctors and the community built one of the most modern medical clinics in the state, greatly with the hope it will attract more physicians. They are particularly in need of another surgeon.

Rutland also was instrumental in establishing a smaller clinic in the Berry community of 800 some 18 miles away in east Fayette County. For years he drove to Berry on his day off to see patients after the community lost its only doctor in the early 1970s.

"The new clinic in Fayette is something he (Rutland) had dreamed of I suppose since he came here," said Bob Sanders, a Fayette insurance executive and close friend to doctor. "if Doc had died the day the clinic was dedicated he'd have died happy.

His efforts in establishing a family doctor program, though, perhaps stand out above all else, say his friends and associates.

Under his leadership, Fayette has served as general "preceptorship" site for the School of Medicine of the University of Alabama in Birmingham and the College of Community Health Sciences of the University of Alabama in Tuscaloosa.

It involves allowing medical students and family practice residents to spend from one to three months in Fayette to learn the various

aspects of a rural medical practice.
"We get them out here and teach them about country life, as well as what will be expected of them as a rural family doctor, said Rutland, who grew up in Eufaula in Bar-bour County the son of a railroad conductor. (Most of his medical education was obtained at Duke and Tulane universities, and he interned in California and Colorado.)

Another unique aspect of family practice, added Rutland, is that treating physical ail-

ments is but one phase.

"The family physician has to cope with the whole family—the whole person. He has to deal with all types of family problems," added Rutland. "I strongly believe that in the fu-ture it will play a vital role in helping to correct the breakdown of the family in this state and nation."

The concept often is referred to as "behavioral medicine.'

Rutland often spends an hour or so coun-seling a patient. "There's no rushing them through. He takes his time and makes sure that all the patients' needs are met before he lets them go," said David Poynor, editor of the Times-Record, a weekly newspaper in Fayette.

Equal attention is given to patients by his associates at the clinic, Drs. Henry G. Hodo Jr., Harold E. Breitling, John E. Sanford and Peter Peacock

Rutland gives equal credit for his national award to his associates at the clinic, his family and the community. "The other doctors have taken up the slack time and time again to allow me the time to push for a state family practice program," he said.

And this community has cooperated 100 percent in our preceptorship program, helping us to educate more than 30 future family physicians in all areas of rural living. And if your family doesn't support you in some-thing like this, you can forget it."

He also praises the state chapter of the American Academy of Family Physicians for its efforts in developing a family physician program in Alabama.

It was mainly through this organization that the medical profession was made to realize that more stress was needed on family practice and less on specialization, he

"When I first came back to the state and set up practice no one would listen to you about the need of more femily physicians," added Rutland, who has tried to pattern his practice and life after that of Dr. Paul Salter. his hometown doctor when growing up in Eufaula.

"The emphasis on specializing that began in the late 1940s had snowballed and it was like talking to a brick wall. There wasn't even a family practice residency in the state. Now we have several located throughout the state.

For more than a year, Rutland was director of the family practice residency at Tuscaloosa.

He once considered specializing but abandoned the idea because "I just couldn't restrict myself to one thing."

He figures the "big break" came during

former governor George Wallace's close race with Albert Brewer for the state's top office in 1970.

Wallace encountered so much talk about the need of doctors in rural areas that he it a major campaign issue, recalled Rutland. And when elected, Wallace kept his word, approving additional medical educa-tion facilities at Tuscaloosa, Huntsville and a new medical school at Mobile.

Ironically, the most "satisfying" thing over the years concerning Dr. Rutland's practice has nothing to do with the above accom-plishments. "I suppose my most satisfying thing is looking at the list of names graduating each year at the local high schools. Usually about 50 of them I delivered."

The physician, who still makes house calls, has delivered more than 1,800 babies.

AWARD OF GOLD MEDAL TO FRED WARING, LOUIS L'AMOUR, AND MRS JOE LOUIS

Mr. BAKER. Mr. President, I have one other matter I call to the attention of the Senate, which I understand cleared on the other side. I inquire of the distinguished acting minority leader if he is prepared at this time to proceed to the consideration of House Joint Resolution 223.

Mr. CRANSTON. Yes, this has been cleared by the minority on the Banking Committee and on this side. We are prepared to proceed.

Mr. BAKER. I thank the Senator.

Mr. President, in view of that, I ask unanimous consent that the Senate now proceed to the immediate consideration of House Joint Resolution 223.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as

A joint resolution (H.J. Res. 223) to provide for the awarding of a special gold medal to Fred Waring.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution which had been reported from the Committee on Banking, Housing, and Urban Affairs with amendments, as follows:

On page 2, line 18, strike "made", and insert "used"

On page 2, line 18, after "of", insert "this"; On page 2, line 19, strike "(a)"; On page 2, line 21, strike "Act", and insert

On page 2, after line 23, insert the follow-

SEC. 2. (a) The President of the United States is authorized to present, on behalf of the Congress, to Louis L'Amour, a gold medal of appropriate design in recognition of his distinguished career as an author and his contributions to the Nation through his historically based works. For such purpose, the Secretary of the Treasury is authorized and directed to cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary of the Treasury. There are authorized to be appropriated not to exceed \$15,000 to carry out the provisions of this subsection.

(b) The Secretary of the Treasury may cause duplicates in bronze of such medal to be coined and sold under such regulations as he may prescribe, at a price sufficient to cover the cost thereof, including labor, materials, dies, use of machinery, and overhead expenses, and the appropriation used for carrying out the provisions of this subsection shall be reimbursed out of the proceeds of such sale.

(c) The medals provided for in this section are national medals for the purpose of section 3551 of the Revised Statutes (31 U.S.C. 368).

SEC. 3. (a) The President is authorized to present, on behalf of the Congress, an appropriate gold medal to Mrs. Joe Louis in recognition of the quiet and unsurpassed dignity and grace of her late husband and in recognition of his contributions to the Nation as heavyweight boxing champion of the world. The Secretary of the Treasury shall cause to be struck a gold medal with suitable emblems, devices, and inscriptions to be determined by the Secretary. There are authorized to be appropriated not to exceed \$15,000 to carry out the provisions of this subsection.

(b) The Secretary of the Treasury may cause duplicates in bronze of such medal to be coined and sold under such regulations as he may prescribe, at a price sufficient to cover the cost thereof, including labor, materials, dies, use of machinery, and overhead expenses, and the appropriation used for carrying out the provisions of this sub-section shall be reimbursed out of the proceeds of such sale.

(c) The medals provided for in this section are national medals for the purpose of section 3551 of the Revised Statutes (31 U.S.C. 368).

Mr. HEINZ. Mr. President, Fred Waring is an individual for whom I have the greatest respect. This man has been a musical institution in Pennsylvania for the last 65 years. Because of his contributions to the world of music and especially because of the great debt of gratitude which Pennsylvania owes Mr. Waring, I introduced, along with Senator SPECTER, a joint resolution to award a gold medal to commemorate Fred Waring's achievements.

Today, the Senate Banking Committee acted on House Joint Resolution 223, which passed the House on July 27 by voice vote on an amended form. As September 15 commemorates Pennsylvania's 300th anniversary, I know of no better way to thank a man who has helped make Pennsylvania one of our country's best known musical centers.

I ask that the Senate approve this joint resolution as one small token of our esteem for perhaps the finest entertainer of the last half century, Fred Waring.

I ask unanimous consent that a short biographical sketch which was written for a recent Fred Waring Kennedy Center Concert be printed in the RECORD.

There being no objection, the biographical sketch was ordered to be printed in the RECORD, as follows:

MEET THE ARTIST

Fred Waring is known to generations as the "Man Who Taught America How To Sing"—"America's Singing Master"—or the man who helped make the popular song a classic American Art Form. He's one of the most fascinating and interesting figures in the history of show business.

Through over six decades of sharing his distinctive blend of beautiful music, he has always been up to date and, in actuality, ahead of his time. His fans, young and old, are awed by his contributions to the music industry via Vaudeville. Movies, Radio, Recordings, Broadway, Television and Love of the Concert Stage. His all new show, "Best of the Best," is as young and exciting as are his long lists of musical accomplishments and innovations, inspiring. Here, briefly, is his story... the story of a man, his love of music, and his famous Pennsylvanians.

It all began on June 9, 1900, in Tyrone, Pennsylvania, when Frederic Malcolm Waring was born, and from his first stage appearance, at age five, to becoming leader of the Boy Scout Drum Corp in his home town of Tyrone, Fred Waring has been making music. As a teenager, he and Freddie Luck joined the "Waring-McClintock Snap Orchestra," composed of Fred's younger brother, Tom, and his partner/drummer (still touring with the show), Poley McClintock. The quartet grew ... became "Waring's Banjo Orchestra," and toured colleges ... playing fraternity parties, proms and local dances.

Word spread that an exciting new band was available. They sang together! (an innovation at the time), and played everything faster than anyone else!

As engagements came pouring in, Fred, who was booking and managing the band while studying architecture at Penn State, put aside his pursuit of a degree and became leader of the band. In the twenties the name "Fred Waring's Pennsylvanians" was officially adopted. The band continued playing the top colleges and toured the B. F. Keith, Comerford, and Orpheum Vaudeville Houses and played the Loews and Paramount Movie Theatres for weeks at a time. The Pennsylvanians became the rage in Hollywood, starring in the first musical motion picture, Syncopation. They were featured in the first "talkie" shorts and starred in their own musicals; Hello Yourself, Rah Rah Daze—a Cole Porter Show in Paris, and in Cole Porter's The New Yorkers!

In the thirties Fred Waring's Pennsylvanians, as a 55 piece jazz orchestra, scored one of their greatest theatrical successes with an un-precedented six month run at New York's famous Roxy Theatre. They auditioned for, and won, the feature slot on a weekly old Gold Radio Show. This was the beginning of live musical spectaculars on network radio.

Waring's Pleasure Time programs for Chesterfield and General Electric Concerts are remembered still as classic chapters in the history of broadcasting. During World War II the Pennsylvanians added, to their daily radio show, a steady stream of appearances at war bond rallies, their own New York Canteen, Army camps and Naval training stations. They were available at any time for any worthy cause.

With the lifting of travel restrictions at the war's end, Fred's aggregation hit the road for their first concert tour in ten years. They drew tremendous crowds, and via "remotes" the Pennsylvanians were still being heard coast to coast on radio. April, 1949, was the start of the Pennsylvanians' TV performances when Fred Waring introduced "spectaculars" for General Electric.

During the summer of 1957, he made time for a series on CBS. Fred Waring has been a pioneer in the recording industry ever since his first record audition in the early 1920's for Thomas Edison. His Pennsylvanians' many recording "firsts" include the first "vocal dance recordings" and the first electronic recording. The group has recorded over 1.500 songs and put together over 100 albums. To share his wealth of choral arranements, he established the Shawnee Press Music Publishing Co., and to foster better singing, he

organized the Fred Waring Choral Music Workshop in 1946.

Today, he teaches many classes while personally supervising this Workshop and its staff of "working show business professionals." The Fred Waring Choral Music Workshop is now held each summer on the campus of East Stroudsburg State College, East Stroudsburg, Pennsylvania. For the third consecutive summer, all of the "Young Pennsylvanians" were featured at E.S.C. as Artists-in-Residence.

Music is not the sole interest in the life of this dynamic man. He is married to the lovely, former concert planist, Virginia Morley, and has five children, 14 grandchildren, and two great grandchildren. With his early background in architecture and engineering at Penn State, Fred became the developer of the famous Waring Blendor and the instant steam iron. His favorite sport is golf, and he plays almost daily . . . still able to break his age—79.

During the 1960's and 70's, Fred Waring has become known as the "King of the Road". touring some 40,000 miles every year, mostly by bus. He believes that there is "no substitute for live entertainment." His musical innovations are countless, having recently added the contemporary sounds of the "Today's Pennsylvanians Group" and the close harmony and blend of the "Waring Blendors Group" to the road show. His young, talent discoveries are always the 'cream of the crop". His remaining six veteran performers (called the "VFW'S" Veterans of Fred Waring Shows) are an inspiration to audiences everywhere. Their service to the Pennsylvanians adds up to 284 years.

On June 9, 1977 (Mr. Waring's 77th birthday), Governor Shapp, of Pennsylvania, saluted and paid tribute to "Pennsylvania's Music Man" by proclaiming "Fred Waring Day" throughout the Commonwealth of Pennsylvania. On March 15, 1978, Fred Waring received several awards marking the Pennsylvanians 63rd anniversary in show business by chapters of the American Choral Director's Association and the Music Educator's National Conference. One was suitably inscribed, "He Taught America How to Sing."

On March 15, 1979, Fred Waring began his 64th year in the entertainment business, and on June 1, 1979, Maestro Waring was named "America's Singing Master" by the Association of Professional Vocal Ensembles. On August 19, 1979, The Fred Waring Show, More About Love, was video-taped by the Public Broadcasting Service before a special audience in Hershey, Pennsylvania. The telecast is slated for national re-broadcast in December of 1979 on PBS.

• Mr. SPECTER. Mr. President, I rise today to join my colleague from the State of Pennsylvania, Senator Heinz, in honoring a popular and influential musician from our State, Fred Waring. Mr. Waring is receiving the Congressional Gold Medal for his extraordinary work as a composer, musical director, and educator over the past 50 years. The presentation of the Congressional Gold Medal exemplifies our Nation's recognition for the unique and enduring commitment to quality that Fred Waring has expressed throughout his long and rewarding career.

Like the sound from a finely tuned engine, Fred Waring's superb compositions and musicianship have set a standard of excellence which millions have enjoyed through the tens of thousands of miles traveled by this popularly appointed "King of the Road." From Mr. Waring and his dance band "The Penn-

sylvanians" appearance in Hollywood's first musical motion picture, "Syncopation," back in the 1920's to the Waring Choral Music Workshop at Pennsylvania State University campus started some 34 years ago, America has enjoyed this treasured national resource.

I am pleased to join my fellow colleagues of the Pennsylvania congressional delegation in honoring Mr. Waring with the Congressional Gold Medal on "Pennsylvania Day 1981"

"Pennsylvania Day 1981."

Mr. RIEGLE. Mr. President, today the Senate is considering an issue that is close to my heart, and to the hearts of all my constituents. The concept of a special honor for Joe Louis has been widely supported, as evidenced by the rapid consideration that the legislation received from the Banking Committee.

The professional boxing record for Joe Louis is impressive, and no one has yet challenged his unbroken reign as the heavyweight champion of the world. Joe Louis was more than a boxing champion, for he wore the crown during a troubled period in the world's history. His fights frequently took on political aspects, and the boost that he gave to our country's morale after defeating Max Schmeling in 1938 was enormous.

His life was full of victories, and the symbol that he created served to inspire millions of people around the world. He epitomized the struggle of the man who rises from destitute surroundings, in a world full of obstacles and barriers to any form of achievement, and gains the height of success. Yet, Joe Lou's never lost his feel for the common man, and he joined the ranks of millions during World War II to aid in our common struggle for peace in the world.

Mr. President, this medal is but a small token of our thanks and appreciation to a man who gave this Nation so very much. The excitement, thrill, joy, and hope that he gave to America are treasured by us all in our own ways, and this medal will continue that symbol for generations to come. I want to thank the distinguished chairman of the Senate Banking Committee for his assistance with this bill, and I urge that the Congress take quick action to insure its passage.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendments.

The committee amendments were agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendments and third reading of the joint resolution.

The amendments were ordered to be engrossed, and the joint resolution to be read the third time.

The joint resolution was read a third

The PRESIDING OFFICER. The joint resolution having been read the third time, the question is, Shall it pass?

So the joint resolution (H.J. Res. 223) was passed.

The title was amended so as to read: Joint resolution to provide for the awarding of special gold medals to Fred Waring, Louis L'Amour, and Mrs. Joe Louis.

ORDERS FOR TUESDAY

ORDER FOR RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS

Mr. BAKER. Mr. President, I ask unanimous consent that, after the recognition of the two leaders under the standing order, the Senator from Missouri (Mr. Eagleton) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. BAKER. Mr. President, after the Senator from Missouri (Mr. Eagleton) has been recognized, I ask unanimous consent that the Senator from Texas (Mr. Bentsen) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. BAKER. Mr. President, after the Senator from Texas (Mr. Bentsen) has been recognized, I ask unanimous consent that the Senator from South Carolina (Mr. Hollings) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I now ask that following on after the recognition of these three Senators designated for special orders on tomorrow, there be a brief period for the transaction of routine morning business to extend not more than 5 minutes in length, during which Senators may speak for not more than 1 minute each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF S. 884

Mr. BAKER. Mr. President, I ask unanimous consent that, at the hour of 11:15 a.m. tomorrow, the Senate resume consideration of the farm bill, S. 884.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. BAKER. Mr. President, tomorrow the Senate will convene at 10 a.m. After the recognition of the two leaders under the standing order, there will be three special orders, one each in favor of the Senator from Missouri (Mr. Eagleton), the Senator from Texas (Mr. Bentsen), and the Senator from South Carolina (Mr. Hollings).

After the recognition of these three Senators under the special orders thus provided for there will be a brief period for the transaction of routine morning business.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I inquire of the distinguished acting minority leader if there are other matters that he wishes to call to the attention of the Senate today. I have no further business on this side.

Mr. CRANSTON. We have no further business.

Mr. BAKER. I thank the Senator.

In view of that, I move that the Senate, under the order previously entered, stand in recess until 10 a.m. tomorrow.

The motion was agreed to, and, at 6 p.m., the Senate recessed until Tuesday, September 15, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate September 14, 1981:

EXTENSIONS OF REMARKS

ROSENTHAL APPLAUDS DINE'S ADDRESS

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

• Mr. ROSENTHAL. Mr. Speaker, there has been some public debate this year about the role of those Americans who, for reasons of cultural, religious, or ethnic ties, have a strong interest in particular areas of American foreign policy. The presence and activity of such lobbies have been a part of American political life since the founding of our country, and today they are vitally involved in the public debate on the policy choices facing the Nation.

A valuable contribution to this debate has been made by Thomas A. Dine, the executive director of the American-Israel Public Affairs Committee. Mr. Dine demonstrates how a special interest group can espouse its chosen cause with dignity, and with responsibility to the Constitution of the United States. It is with great satisfaction that I commend his address to my colleagues.

A CALL TO POLITICAL ACTION

(By Thomas A. Dine, Executive Director, AIPAC to the National Association of Jewish Legislators Meeting, State Senate Chamber, State Capitol, Atlanta, Ga., July 30, 1981)

The Jewish community in the United States is under attack. We are accused of possessing too much power, of having parochial interests and dual loyalties. Some believe that the friends of Israel pressure Congress into making decisions that are contrary to what our critics call the "objective national interest." Our convictions regarding America's moral and strategic necessity in preserving the security of Israel are doubted, as is our premise that the United States and Israel are allies and share common interests.

And the criticism comes from abroad as it does from inside. Just this morning in the Washington Post, George Ball writes, "... Europeans are disturbed that America, having pre-empted Middle East diplomacy, seems disabled by domestic constraints from effectively promoting peace or restraining Israeli adventurism."

Indeed, criticism is aimed at the exercise of our first amendment rights of political association and lobbying. Senator Charles Mathias of Maryland, in the current issue of "Foreign Affairs," has challenged ethnic interest groups in the United States. He denies the sacred historical and philosophical traditions of free association and participation so basic to the European and North American systems.

Alexander De Tocqueville, considered by scholars and politicians alike, after 150 years, to be the best foreign observer of the democratic process in the United States, said in 1832: "In no country in the world, has the principle of association been more successfully used or applied to a greater multitude of objects than in America . . . the right of association appears almost as inalienable as the right of personal liberty. No legislator can attack it without impairing the foundations of society."

Senator Mathias tries to draw a distinction between ethnicity, "which enriches American life," and organized ethnic interest groups, which "sometimes press causes that derogate from the national interest." He argues that ethnic groups cannot conceptualize an objective national interest, and regrets their involvement in political action

Do special interests groups subvert the national interest?

Are ethnic political interests separate and parochial?

The Senator applies arbitrary definitions and qualifications that are but similitudes and shadows of basic democratic ideals. Are ethnic groups only beneficial to society when they display their costumes, traditions, folklore and language, which may be colorful, but should not get in the way? Are ethnic groups like the children of aristocrats that should be seen and not heard?

Ethnic groups are, according to Senator Mathias, not as beneficial when they display "ethnic political activity." He questions the right of political activity that is preceded by the word "ethnic." General political activity is seen in the tradition of De Tocqueville, Mill, and Madison. Black political activity, Greek political activity and Jewish political activity are ipso facto harmful. I believe, however, that political theory so manipulated subverts our creative and unique pluralistic democracy.

All societies contain groups of citizens with specific and diverse interests. Even undemocratic regimes cannot forestall the development of this phenomenon. The Soviet Union's politburo, party apparatus, and government are all subjected to the pressures of special interest groups. But few societies truly resemble ours:

Interest groups ranging from Mobil Oil and ChrisCraft Industries seeking special tax advantages to those promoting the Family Protection Act:

A population constantly being mixed and challenged by relatively recent arrivals to the point that immigration policy is the domestic base determining foreign policy;

Decision making depending on the consensus of hundreds, if not thousands, of special interest groups, dramatically competing within the governmental sphere itself.

But the single most disturbing issue raised by our detractors is the charge of ethnic dual loyalty. The implied contention here is that the Jewish community supports out of a purely emotional zeal, void of any logic or pragmatic political sense, its co-religionists in Israel and the Soviet Union, in opposition to the "objective good" of all Americans. The late Hubert Humphrey answered this allegation in a 1976 speech: "We've heard careless, and I think, reckless things about the powerful Jewish Lobby, the Greek Lobby, the Turkish Lobby, the Baltic States Lobby—you mention it; as if somehow or an-

other, it was against the law in this country to speak up for what you believe in."

Responding to those who cry about dual loyalty and seek to remove certain groups from our democratic midst, I wish to explore three areas:

- The concept of a so-called objective national interest.
- 2. The imperative for individual, and especially group, political participation, and
- 3. The specific importance of ethnic political action.

John Stuart Mill warned against the adoption of a so-called objective national interest which he equated to the "tyranny of the majority." He strongly advised protection "against the tendency of society to impose, by other means than civil penalties, its own ideas and practices as rules of conduct on those who dissent from them."

Who determines, defines, and creates a national interest that is objective? Who possesses the answers? Who knows what's good for the United States? General Motors? Council on Foreign Relations? The oil industry headquartered in Houston? The Trilateral Commission? The Department of State or the Department of Defense? An allwise all-just body of patriotic aristocrats? Contemporary political scientists, elaborating on Mill's theme, warn us of the concept of the "average American." Which group speaks for the average American? What is an average American? Will a group's views of America's national interest be neglected because of the group's size, skin color, religion or country of origin? Can anyone be excluded from the formation of a true national interest? If so, we would be undermining our democracy and cutting ourselves off from an extremely valuable, if not indispensable source of national creativity and sensitivity

As you well know, government is competing factions, each having their own concepts, ideas and motivations. Members of Congress feel a variety of pressures, depending on region, philosophy, experience, committee assignment, that are different from those of the White House, the Departments, or independent agencies. Within the Congress there are subcommittees and caucuses and personal relationships that compete with each other. And there are alliances between parts of one bureaucracy and a congressional subcommittee that often stand up to the political leadership heading an Administration or the Congress. All are interest groups and are affected by competing interest groups. All attempt to influence and shape national policy. These add up to in-house interest groups.

From my own professional experience, I can reaffirm the analytical observations of three generations of noted scholars; Arthur Bentley, David Truman, and Stephen Krasner, that our government is "pluralistic," United States officials debate, formulate, and make decisions: They act and react. Government is not an autonomous actor, appearing on a stage so high above the audience that it is not affected by the applause—or lack thereof. The government—in our case the legislative and executive branches—must play the role of actors immersed in a huge theatre in the round,

where the pulse of the audience guides their movements and forces them to react. There is sharing of ideas and moods; and shared manipulations.

The government is composed of many interests, so whom does it represent? Its motivations and aspirations must not be above a consensus of associations. I reject the notion of national interest that has not been processed by associational interests. The pro-Israel lobby helps define a moral, fair, and representative national interest in the Near East. The American Israel Public Affairs Committee is not just a domestic lobby, it is a professional foreign policy house composed of experts and supported by serious, thoughtful citizens in all 50 states. Is a State Department consensus really an objective national interest just be-

ment structure?
I am not shortchanging the crucial role of government, but the Constitution sets up a framework where associations can contribute to the formation of consensus, which is both responsible and responsive. The government cannot be an island, isolated from the sea of public opinion. To a certain extent, it is an efficient and moral computer integrating the components that make up society, continuously processing inputs and outputs, to the point policy is finally agreed

cause it, as a specific interest group, hap-

pens to be located within the direct govern-

This leads me to my second point. Political awareness and participation, for the individual and the interest group, are not matters of choice. Political activity is survival, and one does not choose to survive-it is a feeling that is levied on us by nature. Political involvement is a societal imperative. It is not only a right, it is an obligation. If we are to survive in an open society, it is imperative we fully take part in the system. Should its foundations crumble from neglect, the freedom that our political structure offers will disappear. If we neglect politics we invalidate politics and we will have no shelter, no defense, when we finally realize that our case must be heard. We have an obligation that transcends singular issues to maintain a strong posture and stature in the political arena. Just as politics may complicate our lives, so will it defend us with its associational and democratic ideals. Strength stems from involvement in the system, with the system, through the system, and for the system.

But how? De Tocqueville witnessed the power of the political structure of the United States in transforming immigrants into exemplary citizens. This phenomenon is due to people participating actively in the government of society, each according to his capabilities, each in his own sphere.

Thucydides aptly and bluntly described the importance of political participation. He noted that "those who are politically apathetic can only survive if they are supported by people who are capable of taking action." The quote continues in an ominous vein: "Those who are politically apathetic are quite valueless in a city which controls an empire, though they would be safe slaves in a city that was controlled by others."

When we advance this obligation, we see just how deeply rooted ethnic interest groups are within American society. Professor Truman makes the point clearly: "Society is nothing other than the complex of the groups that compose it." De Tocqueville called the right of association "the most natural privilege of man." Mill lists this right alongside the liberties of thoughts and pursuits.

So basic is the right to form political interest groups.

So intrinsic is this right.

So incumbent and obligatory is this right. Government operations, says Mill, are all the same. They lack variety; they are boring. Individuals and associations, on the other hand, have "varied experiments and endless diversity of experience." The Government must circulate and diffuse. It must take advantage of these varied experiences. For that reason all foreign policy must be rooted in American soil. Any formation of a true national interest not derived from the sum of society's particularistic and specific societal aims will not receive domestic support and cannot, I submit, be sustained.

What about the point of ethnic political activity? How applicable is it to our community? On one level, a most basic level, often taken for granted, Jews as a group are involved. We care passionately about politics. We have to, for history has taught us the price of apathy. Two thousand years of painful experiences have forced us into round-the-clock political activity. Just contemplate this thought: What if the Jews of the Weimar Republic had been passionate participants in politics 50 years ago, as the six million of the United States are today which this audience demonstrates:

We vote in the highest proportion of any other identifiable group in the United States

We generously contribute our time, energy and money to candidates with whom we can identify.

We are concerned with issues clear across the spectrum.

We are hearty defenders of the process.

We ask questions—and call for policy explanations—of decision makers at the local, state, and federal levels.

We lobby on behalf of policies and programs that intertwine our communal interests with those of the nation.

Gerald Ford, as Vice President, saluted American Jews in 1973, saying that no single group of citizens are more steadfast in standing up for the United States.

These actions are manifestations of what journalist Cynthia Ozick calls our "spectacular citizenship." "This portrait of majority Jewish political behavior," says Ozick, "may seem romanticized to skeptics. Nevertheless it has been true from the start. Idealismthe aspiration to repair an imperfect world-continues to be a vivid impulse in the American Jewish community, and it is buttressed by wide ranging philanthropy." Hubert Humphrey, too, spoke in this same There is nothing new about lobbying on behalf of causes in foreign places.' he said a year before he died. "It's as American as a hot dog or apple pie, spaghetti, gefilte fish or Polish sausage. We are a nation of immigrants, even into our 200th year.'

Are unions, insurance companies, or tobacco groups allowed to lobby, while Jews, Greeks and Poles are to refrain from practicing pluralism? Look at this morning's insider's account in the Atlanta Journal of how the Administration persuaded seven of Georgia's nine Democratic House members to buck their party and, in some cases, "their own best judgment," and vote for the President's tax-cut bill. Businessmen and a White House backing off from a drastic cut in the peanut price support program, it is reported, were used to lobby and bring over wavering Georgians. To emphasize the problem, let me rephrase the questions: Are corporations, trade associations, or country clubs allowed to press their cause to their

representatives while Presbyterians, Baptists, Episcopalians and Jews are arbitrarily excluded from this most basic of rights?

The interests of ethnic political action groups are not antiethical to what is good for Americans at large. Such an attack is nonsense. Jews, the Chrysler Corporation, the National Council of Churches, the Irish, Exxon, various retailers and the real estate industry, whomever, lobby as concerned Americans for other Americans, in order to share their unique insights, knowledge and experience. Let's hear Senator Humphrey again: "It is good for the basic democratic process that people who have convictions about what American policy should be, take time to get their fellow Americans and their public officials to understand what they believe and to urge their support. That's what we mean by free speech in this country."

These groups sensitize the nation as a whole to those concerns about which they feel most acutely. Otherwise they would be less well understood. Sidney Hillman, the labor leader who emigrated to the U.S., once replied to a Senator who questioned his Americanism: "Unlike you, Senator, I chose to be an American." Even Senator Mathias admits that if it were not for lobbying by Black citizens, the United States would be less sensitive to South Africa's racial policies. It is the ethnic interest groups, because of their ties, passions and preoccupations, that sensitize the relevant parts of government. It is the ethnic interest groups that remind U.S. officials of the moral considerations in our foreign policy. Such considerations have always, and will always, differentiate us from our enemies. It is ethnic interest groups that ask the government challenging questions and remind the bureaucracy and politicians of past and future commitments. Can less than 3 percent of the population really force its views on the remaining 97 percent? Nonsense! Our public actions meet the test of the public interest.

AIPAC is an American organization lobbying as an association of concerned American citizens, sharing with the Congress and the Administration our foreign policy concerns:

 That Israel and the United States share a common system of government—representational democracy.

2. That we both attempt to determine policy based on the rule of law and our moral principles.

3. That we share a common biblical heritage.

4. That the United States is committed to support a homeland for the Jewish people.

5. That Israel has proven military capabilities and needs.

6. That Israel is of strategic value to the United States and NATO.

7. That Israel is a stable government.

8. That Israel is a proven and reliable ally. We must not forget that all Americans benefit from the strong and consistently close relationship between Israel and the United States, based on shared values and geopolitics together.

Saudi Arabia is an important Arab country, upon whose oil we depend. But do the Saudis lobby for the good of America's national interest? They are a foreign lobby! They hire foreign agents like Fred Dutton to do their bidding. Their support is not rooted in American soil!

The House of Saud boycotts American businesses that deal with Israel, thus compromising American values.

The Saudis delve out harsh punishment on countries that broadcast television shows about princesses; disrespecting our precious right of free speech.

The Saudis, while claiming judicial modernity and progressive government, reject justice and democracy.

The Saudi royal family, that demands the most sophisticated weapons in the world, is among the most feudal and unstable regimes in the world. Imported technology that was created in the spirit of scientific revolution, is used according to principles of religion that negates the spirit in which this technology was created. This dichotomy is creating confusion and unrest among Saudi Arabia's subjects. A mosque is captured and French soldiers must be secretly flown in to assist in its recapture. Is this stability?

The same Saudis who vehemently oppose America's foundation stone of a stable Middle East peace—the Camp David accords.

The same Saudis who generously fund the anti-U.S., Soviet supported, terrorist Palestine Liberation Organization that has as its policy to kill Israelis, all Israelis, civilian or military.

The same Saudis who declare Jihad against Israel.

The same Saudis who seek the downfall of America's real Arab ally, Anwar El-Sadat.

Mr. Abu Dawood, the President of the Council of Saudi Arabian Chambers of Commerce and Industry, recently threatened the United States explicity, saying that the AWACS and F-15 enhancement equipment sale is connected to that share of the Saudis projected \$258 billion oil economy development which will wind up in the United States. Are such threats in our national interests? Where are the critics of the Saudi lobby?

Conscious of all of these facts, should Jews only contribute to the United States our ethnicity, as Senator Mathias suggests? Would that be advisable? Should we contribute only our writers, artists, and scientists as took place in Weimar Germany, withholding our political activity—our very American support for Israel? Is this the objectivity? You and I know that the United States would not benefit from such a situation.

It is a privilege—and a humble responsibility—to be a good Jew and a good American at the same time. This dualism enriches the United States, indeed is in its best interest, and we shall not, and must not, be deflected or deflect ourselves from living and acting this dualism.

Political action is the key to our survival. To neglect such activity would be most devastating to Jewish citizens and to the United States as a whole. For without protecting ourselves, through political action, we will never be secure.

Bernard Malamud, in his book "The Fixer," poignantly articulated this imperative. "There's no such thing as an unpolitical man, especially a Jew. You can't be one without the other, that's clear enough. You can't sit still and see yourself destroyed."

You in your elected positions are active and assertive; we at AIPAC are also. All of us must reach out to those near and far who are not yet involved and pull them in. We must publicize and push Jewish political action and energize many more in the community. This is our calling. This is the best contribution I know to improving our lot—and that of America's and Israel's.

AN AMERICAN'S LAST WILL AND TESTAMENT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. WOLF. Mr. Speaker, I would like to bring the following essay to the attention of my colleagues. It was submitted to me by Mrs. Jack C. (Mollie) Pamplin, Falls Church, Va., whose inspirational writings have received statewide attention:

AN AMERICAN'S LAST WILL AND TESTAMENT

I hereby leave to every American citizen: The American flag, wherever she flies, on land or at sea; "The Stars and Stripes", "Old Glory", her 50 stars signifying one united Nation stretching from ocean to ocean, from the Atlantic to the Pacific, from Virginia to California, from Maine to Louisiana, from Washington to Texas, flying in every large city and every small town, and the right to thrill at the sight of her in every parade, on every patriotic holiday and every time you view her every day of your life.

The National Anthem, "The Star Spangled Banner," written by Francis Scott Key during a naval bombardment during the War of 1812. Never mind if you can not hit the high note. When you sing out "O'er the land of the free," your heart will soar, and when you think of the valiant dead and the veterans of all the wars to hold fast to that freedom, you will truly cherish "the home of the brave."

The colossal statue of the lady with the torch, the Statue of Liberty, possibly the best known symbol of the United States, given to us by the French people. One hundred and fifty-one feet high, millions of new citizens have first viewed their future home where they would live in freedom with their first glimpse of this famous lady. Keep her torch aglow. Never let her light die away. She proclaims liberty for every one of us.

The Liberty Bell, that historic relic of the American Revolution on display in Independence Hall in Philadelphia. Never forget it rang out in July 1776, proclaiming adoption of the "Declaration of Independence." That bell is our birthright. Tell your children to keep its promise to "Proclaim liberty throughout all the land to all the inhabitants thereof."

Our massive, graceful Capitol, home of the U.S. Congress, a major symbol of selfgovernment. Its white dome, 88 feet above the Potomac River, looms over you and you are the one who enters the voting booth and decides the identity of those who will sit there and speak for you.

The White House, official residence of the President of the United States, which belongs to you, the people. You may visit it and reflect upon your country's past and reach forward toward its future. Many men have lived there and many more will live there in the future. Some will be great men. Some will not, but all will become a part of the history of this Nation. The choice is yours to make as to their identity but the White House itself is the personal possession of every American citizen, for it is your yote which determines the occupant.

The "Pledge of Allegiance to the Flag," written in 2 hours on an August evening by Francis Bellamy and published in the Youth's Companion on September 8, 1892.

It was written for the 400th anniversary of the discovery of America. Stand erect when you say it. Recite it with pride. Think on its meaning and never forget we are "one Nation, under God, with liberty and justice for all."

And last, I leave to you the motto on our currency, "In God We Trust." Whatever your religious beliefs, whatever your own personal creed, I leave to you the inspiration of the belief in a higher power, a divine creator, to whom you may look for solace and comfort in time of grief and trouble and to whom you may offer prayers of Thanksgiving for your many blessings both to you and to your Nation.

As my beneficiaries as American citizens, I have left to you the best that I have, for they are mine as well as yours. I leave to you these national treasures. Guard them well. They are priceless.

THE LEGACY OF HAROLD KEEN

HON. DUNCAN HUNTER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. HUNTER. Mr. Speaker, it was with great sorrow that San Diegans learned June 26 of the death of Harold Keen, a distinguished journalist and one of the pioneers that gave west coast media the substance and credence only recently recognized nationally.

I had the pleasure of knowing Mr. Keen personally. However, everyone who heard or read his work knew what Keen was all about: professionalism, honesty, insight. This is the Harold Keen legacy.

My predecessor as Congressman from California's 42d District, the Honorable Lionel Van Deerlin, knew Harold Keen from his own years as a broadcaster. His testimonial to Keen appeared recently in the San Diego Evening Tribune. I commend it to the Members of the House.

KEEN'S LEGACY, TELEVISION'S DILEMMA (By Lionel Van Deerlin)

Washington—Over most of the U.S., said Charles Kuralt, local television news is delivered by handsome young men with pleasing ways, who wouldn't recognize a real news story "if it came up and hit them in the coiffure."

Harold Keen was not one of these. He slouched. He delivered his material too fast. He stuck with his horn-rimmed glasses instead of using contact lenses, also eschewing the huge prompter rolls just under the camera that make it seem the newscaster has memorized an entire script.

No, Harold was content to look up and down from typed sheets clutched in his hands—if crowded for time, he'd seem to be bobbing for apples. He made no effort to be chatty. The robust vigor of more youthful days had long since left him. Yet there never was a time, probably, that his techniques would have pleased the casting-office types whose advice now sets the tone for local news departments.

It might be said that Keen had only one thing going for him—credibility. If you had

watched TV only a few months in San Diego, or for the third of a century that Keen was a part of it-you came to know you could depend on this man. Not just on this knowledge, but on his judgment too. It was something the smart out-of-towners

never fully understood.

Both at the network level and among the 750 or so commercial TV stations that serve communities across the land, news programming has undergone radical changes over the years. It was first regarded (and logged licensing purposes with the Federal Communications Commission) as "public service." This slant was reflected in the very style of news presentation in the early years—usually stilted and pontifical. News film, when available, was modeled on the old movie theater newsreels.

No station manager expected to make money on news. Most were pleased if their early evening reports commanded enough audience to carry sizable "numbers" into the nighttime entertainment schedule-a

key to the real riches.

NBC launched Chet Huntley and David Brinkley in the late '50s as the first half-hour of local news. Millions of Americans were getting into the habit of dinnertime news-watching. Two major economic changes ensued: the circulation of longdominant evening newspapers went down, and TV news began making money. Camera crews, editors and producers represented an investment, and owners still logged news as public service-but it no longer had to be justified as a loss leader.

Today many stations wrap an hour-and some, 90 minutes-of locally produced news around the network slot-for a purely economic reason; selling commercial time at station rates is far more remunerative than their piddling share of time sold by the net-work. This is why local licensees have resisted the desire of all three networks to stretch the national news time to 45 minutes or an hour, as Walter Cronkite recommended so strongly on retirement.

Formats have changed too, though they remain much alike from station to station. The general newscaster of early days came to be designated an "anchor man." The new style is co-anchors, usually a man and woman. Generous segments always have been provided for sports and weather, which advertising solicitors find especially saleable, because they command viewer interest and seem certain to offend no one

As more stations were licensed, intense competition developed for news leadership. Station management auditioned widely for on-screen personalities, scores of whom are now represented by agents. Remote trucks and jacketed camera crews became a conspicuous part of station promotion. The nature of television as a business usually meant that top management had come up via the business side. Executives thus were less inclined to judge a news operation by its validity than by the "show business" quali-ties that shaped their other programming judgments

Inevitable, then, was the emergence of professional consultants-teams of experts to review a station's news operation, rate the performers and suggest changes. A halfdozen such firms have prospered, under names like Frank Magid, Media Associates and Research, Inc. And if you were to ask what they know about San Diego's needs in such places as Marion, Iowa, or Southfield, Mich., or Fairfax, Va.-which are some of the bases from which these firms operatethey'd answer that broadcasters have

common problems overriding individual differences from community to community

A station pays anywhere from \$40,000 to a quarter-million for their advice; many surrender to it totally. Thus a traveler discovers that almost every city has an "Eyewitness News" or "Action News." On-air talent is seldom much older than 30, and the women are stunning. It's virtually forbidden to allot more than 45 seconds to any storyand near the start of any newscast there should be some appealing file featuring animals or children.

But the real hallmark among all these informality, practitioners is the "happy" touch. When calling in the sportcaster or the weather expert, the anchorman is expected to add light comment, with the effect of suggesting that these auxiliaries are not to be taken too seriously. Everyone on the set then joins in laughter, often far heartier than seems justified by the level of wit.

It was here that Keen felt least at ease under the new format. Harold's forte being serious stuff, he could be visibly put off by an introduction about a flat tire he might have experienced on the way to work.

Television, obviously, is not the newspaper business, where Keen had honed his reportorial skills. Ease on the set is surely preferable to the stiff formality and doomsday delivery of those early days. But a good deal of what we need to know as informed, intelligent citizens cannot be conveyed through happy talk.

San Diego's immense loss in the passing of Keen should prompt the decision-makers to ponder the dilemma his example poses for

television news

Sure, his skills, his knowledge and his integrity were well enough established that Keen survived an era of change.

But suppose this were 1948 again-would Keen be offered a job in television?

CALIFORNIANS WANT A SECRETARY OF THE INTERIOR FOR ALL THE PEOPLE

HON. GEORGE E. BROWN. JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

Mr. BROWN of California. Mr. Speaker, while the last months have clearly indicated the concern of the American people over the state of the economy, I have been gratified to find that protection of the environment and stewardship of the public lands have retained their prominence as priority issues. It is for this reason that I will be holding a town hall meeting on the environment in my district this

In part, this meeting is in response to the overwhelming opposition I have heard to the actions of the present Secretary of the Interior, James Watt. I think that the alarm over his policies is by no means particular in my area. I am honored that the former Secretary of the Interior under Presidents Kennedy and Johnson, the Honorable Stewart Udall, will join me in California for the meeting. Although I have had policy disputes on various issues with many past Secretaries of the Interior, including Stewart Udall, Wally Hickel, Rogers C. B. Morton, and Cecil Andrus, I have never doubted that these men supported the basic thrust of the laws they administered. Contrary to this, the current Secretary seeks not to manage the public's natural resources for all Americans, but rather he proposes to limit acquisition of new wilderness and parkland while turning over other areas to special interests.

Secretary Watt is not serving as a proper steward of the public lands. The laws designed to protect our natural heritage and preserve it for future generations have traditionally enjoyed bipartisan support. I believe they will continue to be supported by this Congress as I believe the public is overwhelmingly in favor of laws to protect the public interest in a cleaner environment and adequate public lands, now and in the future.

UNFINISHED BUSINESS-NATION-AL AUTO POLICY-PART I

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. PEASE. Mr. Speaker, reviving our moribund auto industry is crucial to a bona fide economic recovery in America. But Detroit is languishing in the third year of its deepest crisis since the Great Depression.

A few weeks ago in an address to the sixth annual Automotive News World Congress, the president of the United Auto Workers, Douglas A. Fraser, issued a reasoned appeal to all Americans-in our corporate boardrooms, in our industrial boiler rooms, in our showrooms, and in our living roomsto contribute toward establishment of

a national auto policy.

The current voluntary restraints on imported Japanese cars represent a significant step forward. The next step was recently taken with the enactment of the largest corporate tax relief bill in American history. No doubt persists about the availability of huge sums of investment capital to be applied toward modernizing and retooling the means of production on our basic industries.

Now two further steps need to be taken to reverse the decline of our auto industry and the many related in-

dustries.

First, we must insist upon fair trade as well as free trade among the world's leading auto-producing nations. Open access to our market should carry with it an obligation to provide our people with some of the jobs flowing from that commerce.

Second, public pressure and Government pressure, if necessary, should be brought to bear upon the corporate managers of the American-based multinational auto companies to invest in America. Until 1980, our country was auto-manufacturing leading nation in the world. We attained that position largely through the hard work and productivity of American workers as well as the resourcefulness of enlightened, compassionate management. Surely with 160,000 American auto workers unemployed and with Japan having surpassed us in production, the American-based multinational auto companies ought to invest in the auto industry at home first. These companies in their past glory thrived on American freedom and enterprise in their fledglings stages. Now if our auto industry is to regain its vitality, these business leaders ought to respond as patriotic Americans and invest in America where the jobs are needed.

I commend Doug Fraser's address to my colleagues for careful consideration. It will be reproduced in three installments.

SPEECH BY UAW PRESIDENT DOUGLAS A. Fraser to the Sixth Annual Automotive NEWS WORLD CONGRESS

I'd like to talk with you tonight about what can be done to help bring a recovery to what has been the worst period auto workers have experienced since the Great Depression.

All of us here care about what happens to the North American auto industry. Most of us strongly hope that our sick auto industry

will regain its health.

But after 27 straight months, the fever continues unabated. And, even worse, the medicines prescribed by the Reagan Administration and the auto companies will only make the patient worse.

Two years ago, when I spoke at the Automotive News World Congress, we were beginning to feel the impact of the import offensive by the Japanese and the contracting

of the economy overall.

Today, more than two years after it began, the auto depression goes on. In fact, the true extent of the damage to the industry and its workers really remains under-

Much of that damage is permanent and, if it continues, will result in a further disastrous unraveling of the nation's fraying in-

dustrial fabric.

I'm sure that you winced, as I did last week when the sales figures for the first ten days of July were announced. General Motors down 13.8 percent. Ford down 34.2 percent. American Motors down 18 percent. Volkswagen of America down 14.6 percent.

Only Chrysler showed a gain over the year earlier-with sales up 13.6 percent.

Those are the figures you read about in the newspapers and hear on TV. But they really don't give you an adequate picture of how bad sales are

A more interesting comparison is to examine how current sales stack up against a good year in the auto industry like 1978, rather than a depressed year like 1980.

Looking at the first ten days of July, GM

sales are off a whopping 40.3 percent com-

pared to 1978.

Ford was down 42.6 percent. Chrysler, instead of being up 13.6 percent was down 24.4

Those figures give us a more revealing insight into what the auto industry is experiencing.

The annual sales rate for domestic new car sales for the first ten days of July was million-far below the comparable annual rate in 1978 of 8.8 million.

Let's look at the first six months of this year. Compared with the first six months of 1978. U.S. sales of North American-built cars during the period January-June 1981 were down 30.4 percent, sales of domestically produced trucks were down a staggering 50.7 percent.

Sales of imported cars, by contrast, were up 21 percent compared with the first six

months of 1978.

This boosted the imports' share of the total U.S. passenger car market to 27.8 percent for the first six months of 1981, up from 18.1 percent during the same months

Truck imports comparing the same periods, soared 50 percent.

To make matters worse, between 1970 and 1980 the value of motor vehicle parts imported into the U.S. from countries other than Canada skyrocketed 768 percent, albeit from a very low base.

Two-thirds of the increase has occurred 1975. Substantial increases in the volume of imported parts have been recorded from Europe, Japan and Latin America.

Two disturbing developments account for these huge increases.

First, the U.S. companies have reduced the domestic content of cars assembled in the U.S. and Canada.

Second, as the number of imported cars and trucks on our roads has grown, more replacement parts have been imported from their countries of origin.

Too often, foreign auto companies have unfairly denied domestic parts produces the opportunity to sell replacement parts to local dealers of foreign cars.

Our principal Japanese automotive competitiors were adding capacity during 1980despite a downturn in their own home market-at a time when the U.S. industry's capacity utilization had plunged to a postwar low of 58 percent, down from 89 percent for 1978.

Those same competitors scheduled heavy overtime, while hundreds of thousands of U.S. auto workers stood in quarter-mile long unemployment lines.

Presently, over 160,000 auto workers remain out of work, counting only the laidoff hourly workers at General Motors, Ford, Chrysler, and AMC.

At Chrysler alone, more than 40,000 UAW members are presently laid off; for every three UAW members on the job at that corporation, two others are not.

Some laid off workers have been recalled by the auto companies, but of the 240,000 auto workers on layoff at the Big Four in June 1980, barely over a third had been called back to work as of June 1981. By contrast, a year after the trough of the severe 1974-75 recession—until now the worst auto slump since the Great Depression—threefourths of the laid off workers were back on the job.

The impact of the current crisis extends well beyond massive prolonged unemployment among workers at the Big Four. According to the Bureau of Labor Statistics, every job in auto creates 2.3 additional jobs in steel, rubber, glass, textiles and other industries

In terms of employment, the auto industry constitutes the largest single industrial

sector in the U.S. economy; it used 21 percent of the steel consumed in the United States; more than 50 percent of the malleable iron produced; 34 percent of the zinc; 12 percent of the primary aluminum; 13 percent of the copper, and 60 percent of the synthetic rubber.

The auto crisis has reverberated throughout this entire closely linked chain of production, leaving innumerable plant closings. economic devastation and massive unemployment in its wake.

All told, the collapse in domestic motor vehicle sales in the past two years has raised national unemployment by an average of a full percentage point, at an estimated cost to the treasury of at least \$25 billion in tax receipts forgone, unemployment benefits and other forms of income support.

In Michigan, the unemployment rate is the highest of any state in the nation and has been in double digits for 18 consecutive months. Trade Adjustment Assistance and extended unemployment insurance exhaustions in Michigan have been running at the rate of 20,000 per month.

Countless thousands of unemployed parts workers never obtained any benefits under TAA, due to a cruel inequity in that program. Now the TAA program, which cushioned the hardships somewhat for jobless workers and their communities, is falling victim to the budget cutters' meat axe. The City of Detroit, since 1914 the nerve center of the nation's-and the world's-auto industry, has faced a potential financial col-

The bleakness of the past two years is made even more stark by the heavy weight of uncertainty which clouds every auto worker's future and that of every person with a stake in the industry's future. Some experts have begun expressing doubts publicly about whether there will be a significant domestic motor vehicle industry by the turn of the century. Considering that the is the world's largest motor vehicle market by far and, until 1980, the largest producer, that would be an industrial debacle with no parallel in economic history.

The UAW does not share this extreme pessimism, but we fully agree with the conclusion that only a rational and coherent national auto policy-oriented toward maintaining employment-can be relied upon to stave off industrial catastrophe.

The only auto policy our country has today is the lack of one. I guess that is consistent with the overall world view President Reagan has of getting government out of the way so the hallowed free market can solve all the problems.

Fortunately, there are enough people around with common sense who have begun to speak out against the view that market forces alone can solve the auto industry's problems. They understand that the "invisi-ble hand" of Adam Smith actually is a fist pummelling the auto industry and its workers day after day with body blows doing permanent damage.

What we need is a government which has the same degree of concern for auto workers and the auto industry as the governments of our major competitors in this sector. We need an auto policy that aims to create a climate in which industry doesn't just limp along, but thrives instead. That means a policy that enables us to be competitive not on the basis of reducing wages to the lowest common denominator, but rather by improved productivity, quality and innova-

A FARM POLICY SHOWDOWN

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

. Mr. PEYSER. Mr. Speaker, in the next few weeks the House will consider the farm bill of 1981. The sugar loan program, peanut allotment program, and dairy price support program contained in this bill are unnecessary and indefensible special interest programs which are intolerable to the American consumer. An editorial in the September 21 issue of Business Week points to the ridiculous nature of these runaway programs. I commend this article to my colleagues and at this point would request it to be inserted in the record.

[From Business Week, Sept. 21, 1981]

A FARM POLICY SHOWDOWN

The omnibus farm bill now coming up in Congress will be a major test of the Reagan Administration's determination to cut government spending and of its power to do so. The bill will set farm policy for the next four years. With farm income softening, every IOU the Administration issued in its struggle to get the budget cuts and the tax bill through Congress will now be presented for payment. Unless it can hold out for a program that ties farm prices to the market instead of propping them at unreal levels, Administration's whole campaign against inflation will lose credibility.

There are plenty of opponents of such provisions as the support programs for tobacco, peanuts, and sugar. But the Administration has already conceded privately that it would not veto the whole package to knock out individual provisions. And it is already obvious that the two biggest groups within the agricultual sector-grain farmers and dairymen-are not thinking in terms of restraint. Drafts of the milk program already adopted by committees of both the House and the Senate could cost as much as \$1 billion in federal outlays in 1982. Direct payments to wheat growers in the same period threaten to hit \$325 million under the target price program, which compensates farmers when market prices drop below specified levels.

For most of this century, the government has given the farmer special help-at the expense of the consumer and the taxpayer. But agriculture is a strong industry now. The typical, mechanized U.S. farm is the envy of the world for its efficiency and the income it generates. There is no excuse for pushing up prices and piling on government spending to assist an economic sector that is capable of standing on its own. It is time to start turning farm prices back to the free market.

EXTENSIONS OF REMARKS

THE HELEN KELLER NATIONAL CENTER. GOING FORWARD WITH VIGOR AND SUCCESS

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

Mr. LEBOUTILLIER. Mr. Speaker. the nationally distributed Sunday supplement, Parade magazine, ran an article in its September 8, 1981, edition that deserves the attention of my colleagues and all of our constituents who might benefit from the information which it contains.

The article, about the Helen Keller National Center in Sands Point, N.Y., is as concise, informative, and moving a description of this unique center as I

have yet to see in print.

The Helen Keller National Center is a national institution, and a unique one at that. It is a pioneering center for a successful and unprecedented level of rehabilitation for the blind. deaf, and verbally impaired youths and adults of America. Since the center's beginning in the mid-1960's, the Helen Keller National Center has become an internationally recognized institution not only for its successful individualized training activities, but also for its unique preparation and dissemination of teaching materials for the world's similarly impaired.

The Helen Keller Center serves deaf, blind, and verbally impaired people from every State and territory. I am pleased that this truly national center is located in my congressional district.

Earlier this year, I personally intervened with Office of Management and Budget Director David Stockman to dislodge the center from inclusion in a block grant that would incorporate many programs for the handicapped. I was successful in this effort, as the center was so removed within the second budget reconciliation bill which we passed.

I impressed Mr. Stockman and his staff into supporting efforts to excuse the Center from the block grant because of its unique national status, nationwide clientele, successful record, prudent use of appropriations, and production of vital and excellent teaching materials for national and international use.

I felt that inclusion in the block grant would, as the Center's management indicated in testimony before the House Committee on Appropriations' Subcommittee on Labor-Health and Human Services, jeopardize continued special funding, and would fail to allow the Center to grow with demand and accomplishment. A truly national Center should not have been left to the possible whims and caprices of block grant funding.

I would also like to point out to my colleagues that this institution deals with a most serious set of physical handicaps, and successfully trains and occupationally places most of these clients. While the Helen Keller Center cannot reach each of the more than 15,000 eligible clients, it stands as a beacon of realistic hope for all such persons. In addition, the methods developed and in progress in Sands Point will reach out to help scores of similarly afflicted people the world over.

This task would appear to be prohibitively expensive, but due to fiscal responsibility practiced by the Center, it

is not.

The Center operates on a budget of 33.5 million. It could use more, as it has done optimal work in training and communicating. Hence, the demand for inclusion and expansion is justified. For once, a justification for an increased government appropriation squarely rests on the ground of needing more to continue doing an excellent job. More is needed, as a great deal was done with less.

At this time, Mr. Speaker, I would like to offer Ms. Carpentier's article, "Beyond Help?" to my colleagues and their interested constituents for their

attention:

BEYOND HELP? (By Fran Carpentier)

Imagine yourself trapped inside a room with no windows, no doors, no phones or clocks or radios. A room so dark that when you try to escape you stumble into the unseen furniture, and so silent that you cannot hear the signal when someone comes to rescue you. You desperately want to get out, but what can you do? You collapse and pound your frustration into the floor. Or else, you just sit. And wait.

More than 15,000 deaf-blind Americans are waiting to be freed from their silent, colorless worlds. Some are institutionalized. Others stay at home, day after day. The luckier ones attend classes for the deaf or schools for the blind, which are sadly inadequate for the special needs of their double handicap. Yet all of them are victims of a popular myth that the hardships of being deaf-blind were wiped out 100 years ago when Helen Keller learned to see and hear and talk with her fingers.

The public has to be reminded that the deaf-blind are still with us, says Susan Hajjar, head of the communications skills department at the Helen Keller National Center for Deaf-Blind Youths and Adults in Sands Point, N.Y. But we also have to show them, says Hajjar, "that the limitations of the deaf-blind do not preclude a whole

range of possibilities.

Most of the deaf-blind-about 50 percent-have Usher's Syndrome, a congenital disease in which the child is born deaf then, without warning, loses his sight in his teen years. Under federal law, each state is responsible for educating these handicapped to age 16. The Helen Keller Center, the only national facility that exclusively serves the deaf-blind, picks up where the states leave off. There, deaf-blind clients (or "trainees") from the 50 states and territories each receive an individually tailored schedule of daily classes in such communications skills as sign language, Braille, or print-on-palm spelling. Also taught at the 25-acre wooded

complex on Long Island's north shore are daily living skills—cooking, housekeeping, handling paper currency, budget balancing—and mobility training, industrial arts

and recreation therapy.

"Isolation is still the biggest problem for the deaf-blind because they are so cut off from everything," says Terry Carr, a communications skills instructor. "The first time I meet my client, I introduce myself by forming my name into his hand," Carr says. "If no communication is possible, we just hold hands and be together. The most important thing to do is to establish trust. A person who's been isolated—maybe neglected or even abused—for so long needs to feel that there's somebody out there who cares. Touch is really the most important communicator we have here."

Associate Director Jules Coté says that "Helen Keller type" miracles really do happen at the center. "We had one 42-year-old client with only the very slightest hearing who had been in an institution since he was 5. When we started working with him, we were amazed at how much knowledge he had. He told us about the American Revolution, the Civil War and all the space flights!

It seems that nobody in his ward had ever paid any attention to him. Every day he used to move his chair way up close to the TV where he'd be able to distinguish the sounds. Then he would turn to the public television station and listen. All the education he ever got was on his own! "And" says Coté, "his is not a rare story."

"You wonder how the deaf-blind survive. Think of the amount of guts it took that man to survive like that for 37 years and still have an intact mind. It's like being in solitary confinement. You know," says Cote, who is legally blind himself, "it's beautiful what the human spirit can endure."

VOODOO ECONOMICS THREATEN DEFENSE

HON. STEVE NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

 Mr. NEAL. Mr. Speaker, as we begin to consider the administration's proposals to cut back on defense spending for the next few years, I think we must find the answers to several important questions.

The first of these questions is: If the administration's original projections of our defense needs were correct, is it in the best interests of the United States to reduce them by \$13 billion to

\$30 billion?

The second question arises from an affirmative answer to the first. If it is in the best interests of the country to cut back on defense spending just 2 months after a barebones budget was adopted, were our defense needs accurately portrayed in the first place?

It is not sufficient to say that we must provide the best defense establishment that we can afford—and that, unfortunately, we cannot now afford the weapons that 2 months ago were deemed essential to close the so-called window of vulnerability. Nor does it make sense to provide more than we

need in this time of economic insecurity, when a top priority must also be given to balancing the budget, lowering Government spending, bringing down interest rates, and winning the

war against inflation.

It seems to me, Mr. Speaker, that the administration did not give sufficient consideration to the interrelationship of economic strength and military preparedness. We cannot maintain a strong national defense with a weak economy; and a strong economy may be a transient prosperity without a military establishment sufficient to protect ourselves and our allies.

We are led to wonder, then, if something of our national defense capability is about to be sacrificed for a tax cut whose economic benefits are now

being seriously questioned.

Mr. Speaker, a recent edition of the Washington Post contained an excellent article along these lines by James R. Schlesinger, who was Director of the CIA and also Secretary of Defense under President Nixon, as well as Secretary of Energy under President Carter. At this point, I would like to commend Mr. Schlesinger's comments to my colleagues and to insert them in the Record.

[From the Washington Post, Sept. 9, 1981] REAGAN'S BUDGETARY DUNKIRK

(By James R. Schlesinger)

The last rites have now been pronounced over the great rearmament boomlet of 1981. Its demise had been expected by the diagnosticians for some time. Like Halley's comet, it visited us and then departed quickly, trailing only a long (though quite insubstantial) tail deserving further observation.

For the past six months the defense debate has focused on the wrong issue: could the "immense" funds ostensibly being made available to the Department of Defense be usefully spent in significantly enhancing the security of our international position. With the Soviet Union outspending the United States by some 50 percent on defense generally and by a disturbing 85 percent in the critical area of military investment (procurement), with conventional capabilities in Europe porous and relatively weak and theater nuclear forces now overshadowed by those of the Soviet Union, with deterrence flimsy (at best) in the region of the Persian Gulf despite the West's enhanced interests and responsibilities, with the naval balance deteriorating in the Far East, and with trouble even in the Caribbean (and an evanescent threat "to go to the source")-not to mention concern about the strategic balance, Minuteman vulnerability and aging B52s—that should have been an issue in principle easy to resolve. Yet, all along the real question should have been—given the administration's fiscal proposals-how to maintain adequate deterrence with growing responsibilities in the Indian Ocean and with resources dramatically less than those invested by the Soviet

Seven months have been wasted on an irrelevant debate. We shall now have to make do with a smaller growth in defense resources than that projected by the Carter administration—previously denounced as

hopelessly inadequate. So much for "making America strong again," "closing the window of vulnerability" and the vaunted "superiority" so casually endorsed in the Republican platform.

The unavoidable outcome, given its fiscal goals, seems genuinely to have surprised the Reagan administration. Disregarding the normal laws of arithmetic, and bemused by its own distortions of supply-side economics (alternatively known as "voodoo economics," snake oil or the Tooth Fairy), it lulled its pro-defense supporters (and itself) with farfetched projections supposedly demonstrating that the proposed rearmament effort could be achieved in the face of a massive shrinkage of the tax base.

According to the initial mythology, dramatically lower interest rates and cutting the "balance of government" almost in half (everything beyond interest payments, defense and the "social safety net") would permit the achievement of a balanced budget by 1984. But interest rates have risen rather than fallen, and only so much blood can be squeezed from the "balance of government" turnip, so the cuts unavoidably must now come from the fenced "social safety net" or from defense. More signifithe recent tax legislation-which seems likely to go down in history as the single most irresponsible fiscal action of modern times-reduced the tax base to 19 percent of the GNP by 1984 (with expenditures running some 22 percent of the GNP), a revenue reduction of \$150 billion or roughly 17 percent. As an offset, some \$35 billion in non-defense expenditure reductions have now been achieved-less than one-third of those projected for 1984, less than onefourth of the revenue loss.

The budget director, occupationally debarred from an abiding faith in the Tooth Fairy, has now read the grim arithmetic—the equivalent of a Budgetary Dunkirk. The fiscal consequences may be briefly, if sadly, stated. Unless the tax reductions are reversed—which seems unlikely—on the basis of present legislation and projected defense spending, the nation faces growing budget deficits of \$65 billion in 1982, \$90 billion in 1983 and \$120 billion in 1984. Non-defense reductions will be increasingly hard to achieve. Thus, only the total jettisoning of the administration's goal of a balanced budget will permit even a modified defense bulldup to survive.

Nor should one believe that with the halfannounced cuts for defense of \$20-\$30 billion we have reached the end of likely defense reductions. The best current estimate for fiscal year 1982 outlays is \$715-\$720 billion (\$20-\$25 billion over ceiling). The ceiling for fiscal year 1983 in the revised Reagan budget is \$732 billion—a total in-crease over 1982 of \$12-\$17 billion. Limiting spending to this ostensible ceiling, given probable inflation rates, would imply a reduction of real federal expenditures by 6-7 percent. Not very likely. Far more probably 1983 expenditures will run roughly to \$775 billion—a sum \$45 billion over the presumptive ceiling. Substantially to reduce the out-year deficits, given the growing difficulty in achieving non-defense cuts, would probably require that some three out of four dollars in reductions come from defense.

One can always spend less—by doing less. Gone now are the fancies of nine additional tactical air wings, of three additional Army divisions. Gone, too, in all probability, is the 600-ship Navy—unless, like Jefferson, we provide mostly frigates or gunboats. Embarking on major new systems like MX or

B1 or new acquisitions like carrier task forces will ultimately lead to an ill-balanced force by leaving insufficient funds for operations, readiness and sustainability.

The planned buildup for NATO will have to be reduced—especially so in light of Indian Ocean requirements. What an ideal moment, given the anti-nuclear tide running in Europe, to increase the degree of dependence on nuclear weapons and diminish con-

ventional capabilities.

The international ramifications are disquieting-to say the least. The already apprehensive Europeans will conclude that, while the United States is prepared to disturb the international scene by threatening to launch an arms race, it is now seen to be unwilling to provide the resources either to run the race or to provide additional mili-tary muscle. The Soviets will not be loath to exploit those European apprehensions. Moreover, the Soviets will conclude that, despite American bluster, they have little to fear in terms of additional forces to narrow the growing disparity in military capabilities. As for the Japanese (and others), this notable example implies that we might as well abandon the effort to persuade them significantly to increase defense spending.

In creating and maintaining forces, wishful thinking is no substitute for an adequate tax base. In this ill-fated venture the cycle from bold words to budget cuts has been the shortest on record—a kind of instantaneous New Look. The historic failure lies in so casually dissipating the carefully forged national consensus supporting higher defense spending—while leaving in the public mind the illusion that a sizable new defense effort

has actually been launched.

CALL TO CONSCIENCE—ILYA ESSES

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Monday, September 14, 1981

. Mr. SCHUMER. Mr. Speaker, I am proud to rise today and voice my concern for a particular Soviet "refuseas part of the continuing Call to Conscience Vigil, 1981. As you know, the Call to Conscience Vigil is a meaningful and effective congressional effort to draw attention to the ceaseless oppression of Jews and others in the Soviet Union, and to demonstrate bipartisan congressional support for individuals and families who wish to emigrate to the free world. As a participant in the Vigil, I would like to call the attention of my colleages today to the plight of Mr. Ilya Esses and his family who have been seeking to emigrate from the Soviet Union since

Trained as a mathematician, Ilya Esses was employed at the Academy of Sciences in Lithuania, and later as a lecturer in mathematics in a Moscow medical institute. Since his application to emigrate, however, he has been unable to find a job. During this time he has devoted himself to studying the tenets and customs of Judaism, a difficult task in a country which frowns on religious study and practice. With a

handful of materials from the West, he taught himself the Hebrew language, Torah, and Talmud. He has now become the unofficial "rabbi" of Jewish activists in Moscow, organizing atherings around Jewish holidays and using these occasions to teach his friends about Jewish traditions.

Ilya has consistently been harassed by the KGB for these activities. His home has been raided and materials confiscated. A Hebrew class that he teaches has been regularly disrupted, and he has been threatened with arrest on several occasions. With the recent Soviet crackdown on the flourishing Jewish cultural movement and the arrest of a number of its prominent leaders, Ilya's situation continues to worsen.

Soviet officials have repeatedly denied Mr. Esses and his wife Anya the right to emigrate on the grounds that Anya Esses was allegedly exposed to "secrets" while she was employed in the construction industry in 1971. It is difficult to see how information that Anya Esses may have been exposed to over 10 years ago could still be relevant to her application to emigrate. The Esses and their three small children have been waiting for over 8 years to be reunited with Mr. Esses' parents who reside in Israel. According to the provisions of both the U.N. Declaration on Human Rights and the 1975 Helsinki Final Act, which the Soviet Union has signed, the Esses have the basic right to be reunited with the rest of their separated family.

The recent dramatic decline in Jewish emigration from the Soviet Union-to its lowest level in 10 yearsand the arrest of a number of prominent Jewish activist leaders is of great concern to our entire Nation. The granting of permission to emigrate to Ilya Esses and his family-and to the estimated 50,000 others who have also been denied such permission-would be an important step to improving the strained relations between our two countries. Forty-nine Members of Congress have joined me in petitioning Soviet officials for the release of the Esses family. It is my hope that other Members of Congress will continue to join me in my efforts to secure emigration rights for the Esses family and others who seek reunion and freedom.

ANGOLA INVADED

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. RANGEL. Mr. Speaker, on Friday I introduced a resolution, House Resolution 212, that both condemns the South African Government for its illegal incursion into Angola this August, and disapproves the U.S. veto of the United Nations resolution condemning the South Africans. I take these steps because I feel that first, the South African invasion presents a serious danger to the peace and stability of that region, and second, that the American reaction to the raid was irresponsible, and damaging to our interest in Africa. Let me elaborate.

On August 24, the South African Armed Forces invaded southern Angola from its bases in Namibia. This act of aggression was in violation of international law, and is of significant concern to the international community. The circumstances surrounding South African involvement in Namibia add to this concern. The South African Government has been administering the trust territory of Namibia for the past 61 years. They were first given this privilege by the League of Nations in 1920, and it was held legally until 1967, when the United Nations, which took over the responsibility for trust territories from the defunct League of Nations, revoked South Africa's mandate for administering the territory. Since then, South Africa's claim to the territory can only be described as illegitimate. Yet, they have continued to administer the territory. and have denied the majority people of the territory the opportunity to de-termine their future. Further, they have set up an apartheid system similar to that in South Africa, reserving the resources and the political control of the territory for the white minority. Finally, to preserve their control, they have stationed thousands of troops in the territory. They have refused to recognize the organization that represents the native population, The South West Africa People's Organization, (SWAPO), which has been recognized by the United Nations as a legitimate representative of the Namibian people. Namibia is run like a colony: a small majority dictating to a disenfranchised majority, with South African military might supplying the only legitimacy for the government.

It was from Namibia that the Angola raid was launched. The raid was purportedly to protect Namibia from the SWAPO guerrillas operating out of Angolan bases, and the South Africans claim that they were forced to invade Angola to stop the violence in Namibia. This defense has two flaws. First, in January of this year the South African Government was approached by SWAPO President Sam Nujoma with an offer of a cease fire. The South Africans rejected this offer, which undercuts their claim of being interested in peace in the area. Second, it is the existence of a repressive apartheid system in Namibia that has precipitated the violence there. South African policy in Namibia has denied a people their right to self-determination, and it has embroiled another sovereign state in the dispute. For these reasons, and because of the potential for further instability in the region, the international community is rightly concerned with the situation in southern Africa, and its potential for disrupting other nations on the continent as well. The U.N. resolution was a responsible expression of this concern.

The American response to the raid was chilling to anyone who is interested in achieving racial and political equality in South Africa, and a settlement to the Namibia situation. On the one hand, the Assistant Secretary of State for African Affairs has claimed that the administration did not want to choose between black and white in South Africa, meaning I suppose that it does not matter that the apartheid regime in South Africa is politically and morally indefensible, its interest in preserving itself is as important to the administration as the interests of the 17 million people who exist there without political or human rights. On the other hand, it refuses to condemn the South African regime for its raid in Angola, saying that they are not responsible for all of the violence there, ignoring the fact that the South African military presence is the reason for violence in Namibia.

We have critical, strategic and political interests in Africa. On this issue, the administration and I would agree. However, I must state emphatically that one of those interests is the elimination of the abhorrent apartheid policy that exists in South Africa, and which the South Africans have instituted in South-West Africa. Not only is this goal important to us as a democratic, multiracial society; it is a basis for our ties with the rest of black Africa, which considers the elimination of this most egregious system of government as the No. 1 political issue on the continent. Our prestige as a free and just nation, and our relationships with black Africa, are dependent on continued active opposition to the system of apartheid. The administration, judging from its reaction to the South African raid, seems to be hedging on the American commitment to racial equality in southern Africa. The reasons the administration gave for not strongly criticizing the South Africans could have been written by the South African Foreign Ministry. The South Africans have been trying for years to convince the American people and Government that the Communist threat in southern Africa should be our real concern, and that their internal policies should not be the basis for our relations with them. They have insisted that they are the bulwark of anticommunism in the region, and that we should be alined with them.

This rhetoric is strikingly similar to what we hear from the Reagan administration; the emphasis on combatting Soviet influence in Africa, and a backing away from any criticism of the South African Government. The administration has made a number of remarks mildly critical of the apartheid system, but nothing that could be characterized as supportive of efforts to end that system. Now, in the wake of an act of international aggression, undertaken from bases in a territory held in defiance of international law, the United States has seen fit to hide behind the cloak of anticommunism to soft-pedal criticism of the South African action. I contend that this position is dangerous. The administration is clearly moving toward the policy in southern Africa that the Botha government desires; a tacit military alliance with South Africa, with little or no pressure on the South African Government to reform its internal racial policies. Not only is this policy suspect for moral reasons, it is politically unwise. It is not in the American interest to alienate black Africa and our Western allies for the sake of an alliance with South Africa against a rather small Soviet presence in Angola.

What is in the best interests of the United States is to pursue a policy in southern Africa that will lead to enlightened development of that continent's vast resources, and encourage foster democratic principles among the nations there. The administration's recent action on Angola suggests that it is moving away from this goal, and toward a policy centered on military alliances. We have worked too long to improve our relations with Africa to the level which we now enjoy to see the Secretary of State shatter our progress for the sake of a global anti-Soviet strategy that does not apply to Africa in the first place. The resolution that I have introduced seeks to show Africa and the world that there is still a significant part of this country that is opposed to what South Africa is doing in Namibia and at home. I urge my colleagues to sup-

SALUTE TO THE CITY OF NEWPORT BEACH, CALIF.

HON. ROBERT E. BADHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. BADHAM. Mr. Speaker, today it is my rare privilege to stand before this honorable body to salute the city of Newport Beach, Calif., which I represent in this Capitol and which is my hometown. The purpose of this salute is the celebration now going on in Newport Beach in honor of the city's 75th birthday anniversary.

Newport Beach is a great jewel of a city along California's incomparable coastline, with a beautiful pleasure boat harbor which has the greatest number of boats of any city in the United States.

Newport Beach has beautiful beaches, to which hundreds of thousands of southern California residents flock each year to swim, sun, and surf. It has lovely residential areas which hug the many miles of shoreline inside the harbor and have commanding views from heights above the city.

There are scores of restaurants, yacht clubs, small shops, and great stores, centers of commerce, and industry and a quaint waterfront, the highlight of which is the world-renown Balboa Pavilion, recently named a "Place of Historical Interest" by the State of California.

Above all, Newport Beach is rich in history, paralleling in many respects the growth of southern California, all the while maintaining a coveted reputation as a resort while providing an unusual atmosphere for year-round living for its residents.

It was on September 1, 1906, that Newport Beach became a city, with a population of just 230 souls. Since that time there has been steady, if unspectacular growth to the point that the 1980 census showed 63,475 permanent residents of the city.

In the intervening years the city has been the scene of many movies, the home of many movie stars and the Rendezvous Ballroom the home of many great orchestras, who came to play for thousands of soldiers, sailors, and marines during World War II.

One of the most famous names associated with Newport Beach is that of James Cagney, who, along with members of his family, own large sections of land in the city. It was Jimmy Cagney's home on Balboa Island that became the headquarters for the U.S. Coast Guard after the onset of World War II in 1941.

John Wayne was a fixture in Newport Beach, where he maintained a beautiful home until his recent death and where he kept his yacht, a converted Navy minesweeper. Not long after Wayne's death, the Orange County Board of Supervisors renamed the county's regional airport in his honor.

Andy Devine, the lovable, gravel-voiced comedian and veteran of more than 400 films, lived for years in Newport Beach until his death. He was known and loved by thousands of local citizens, who enjoyed meeting him in the grocery store or at one of the city's country clubs.

Buddy Ebsen, an avid sailor whose sailboat once won the Transpac race to Hawaii, lives on Balboa Island and is a tireless worker for local charities and other causes. At various times Shirley Temple, Dick Powell, Ray Milland, and Erroll Flynn lived in Newport Beach. Claire Trevor, star of many films, still lives in the city, as does Ruby Keeler.

Stan Kenton, the late, great bandleader, got his start at the Rendezvous, while other notables who played there were Benny Goodman, Count Basie, and Bob Crosby. Even today music of the 1940's can be heard coming from the Balboa Pavilion as oldtimers gather for nights of nostalgia.

Glenn L. Martin, the aviation pioneer, flew a seaplane from Balboa Pier to Catalina Island in 1912; setting a record for the longest and fastest overwater trip of 27 nautical miles in 37 minutes.

Newport Beach, with its vast array of wealth and influence, has become a mighty center of business, finance, and industry on the west coast. Acclaimed by some as the "American Riviera," I find it a great honor to represent the city and participate in its 75th birthday celebration, for in many respects there is none like Newport Beach in these United States.

WESLEYAN, IN 150TH YEAR, FINDS MUCH TO CELEBRATE

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES
Monday, September 14, 1981

• Mr. GEJDENSON. Mr. Speaker, Wesleyan University of Middletown, Conn., has been providing one of the finest educations in the country since the early 1800's. I am proud to say that throughout its entire history, Wesleyan has maintained its excellent standards and its commitment to teaching students how to think for themselves. This year marks Wesleyan's 150th anniversary. In honor of this occasion, I would like to submit for the record an article written by Matthew Wald of the New York Times.

WESLEYAN, IN 150TH YEAR, FINDS MUCH TO CELEBRATE

(By Matthew L. Wald)

MIDDLETOWN, CONN.—Wesleyan University is beginning its 150th anniversary year this month with fireworks, lectures, history exhibits and something not seen on its campus for a decade: a balanced budget.

The school year that began this month is the first since 1970 in which the endowment

is not being depleted.

It is also a year in which the college will celebrate its liberal roots as an institution founded partly in reaction against the rigid classicism of other universities in the early 19th century.

"There is a greater doubt today about liberal education," said Colin Campbell, the school's president, in a recent interview. But he added that the "sesqui," as the sesquicentennial celebration is known, should help counter that by boosting academic morale in a celebration.

As Nathanael Greene, the vice president for academic affairs, told the parents of incoming freshmen in an address, "The courses prudently chosen in pursuit of a career may not be the wisest if they blunt intellectual curiosity."

A STRUGGLING PHILOSOPHER

Indeed, many upperclassmen seem not to be particularly vocationally oriented. One junior, Kate King of Garrison, N.Y., described her plans like this; "I'll be a struggling philosopher. But I'll be happy."

Campus debate may be turning more heavily to academic questions because some of the most pressing financial ones have been resolved. One of the wealthiest and most prestigious universities in the country, Wesleyan went through an ambitious period of expansion in the 1960's, but following increasing expenses and reverses in its stock portfolio, the college began a retrenchment program in 1979. Some feared the cuts would save the institution only by eliminating what made it distinctive, and the campus was shaken at times by the debate over what to cut.

"Wesleyan was a millionaire spending like it was a two-millionare," said Jeffrey J. W. Baker, a senior fellow in the Science in Society program who first came to the stately,

ivy-covered campus 20 years ago.

Over that period, the college has grown rapidly, increasing its student body by 250 percent. In May 1965, it swapped American Education Publications, which it had developed, for 400,000 shares of Xerox Corporation common stock, and added more than \$100 million to the endowment, allowing it to take on faculty members even faster than students.

The ratio of faculty to students dropped from a peak of 8.5 to 1 in 1965-66 to 7 to 1 at the beginning of the last decade. Counting instructors, visiting faculty, and other staff, this gave Wesleyan the ratio of one teacher for every 6.1 students; educators consider a ratio of 12 to 1 to be very favorable.

But at about the same time, university planners calculated that if current income and spending continued, the endowment would be spent by 1981. Accordingly, the college turned to raising student fees to the level of the Ivy League schools with which it competes for students—this year by 16.7 percent, to \$10,920—and to paring the size of the faculty while increasing the student body.

This year's freshman class comprises 650 men and women, bringing enrollment to 2,600, including about 100 graduate students. With 10 faculty members cut in the last two years and 15 more due to go in the next three, the student-teacher ratio is now to 11 to 1 and is headed for 12 to 1. "There certainly is a tendency to larger classes," President Campbell said, adding that this was true "at almost all colleges, including the most selective, with which we are identified." But, he said, "The less favorable ratio is not the total answer to quality education."

CUTTING-ESOTERIC COURSES

Mr. Campbell is also stressing better use of the faculty by discouraging some of the most esoteric courses with the smallest enrollments. Last fall, for example, 52 courses attracted fewer than four students each.

The university is proud that it offered 1,917 individual tutorials last year, up substantially from previous years, and that the number of classes with 10 or fewer students is still 35.1 percent of the total. The peak

was in 1971-72, when 53.8 percent of all courses fell into that category.

Both faculty and students notice the change in the institution, which Mr. Campbell habitually refers to as "the little university."

Prof. Spencer J. Berry recalls when his course in cell biology had 40 sophomores; now it has 100, and he shares it with a colleague.

"I probably interact as extensively with about the same number of students, but there's a whole class of students whose names and faces I never put together," he said. "It loses a great deal, but maybe the old system was uneconomic. Maybe we couldn't sustain that."

Mr. Berry also feels that faculty salaries, which start at \$18,500 for assistant professors, should be increased.

Students feel the crush at the beginning of each semester, and the feeling is intensified by an eight-day "shop-around" period when they sample as many courses as they wish and choose the four or five in which they will enroll. They do not get all their first choices.

"Maybe it's been a little tougher to get into courses," said Gale Gold, a junior from Rosemont, Pa., who has seen enrollment rise by 150 since her arrival. But, she added, "I don't feel the quality of teaching has gone down. Everybody's terrific."

Two years ago, Mr. Campbell proposed academic changes that set off protests, but many have not come to pass. The debate fostered by his proposals, he said, is healthy and should continue. "Those academic debates go on forever," Mr. Campbell said. "They are part of what makes those places what they are."

WHY FOOD LABELS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. COLLINS of Texas. Mr. Speaker, I just read an interesting statement in the National Enquirer. They said that an Enquirer poll finds that 94 percent of the people do not understand common food labels. Why do we put all of this information on the package if people do not understand it and do not use it?

I buy cereal that is all natural and it states it is all natural. If they want to feature one of these particular terms in their advertising, they can feature it. What I want to do is see us eliminate so much unnecessary labeling that means nothing to the average citizen. Here is what Blincow wrote in the Enquirer about lack of understanding of common food labels.

ENQUIRER POLL FINDS 94 PERCENT DON'T UNDERSTAND COMMON FOOD LABELS

Processed, homogenized, pasteurized. Know what they mean? Don't feel bad if you don't. Virtually no one in an Enquirer poll correctly defined any of seven terms commonly found on food labels.

We surveyed 100 people shopping for groceries. Only 22 dared to make guesses—and only six guesses were correct.

Fortified, enriched, refined and smoked were the other terms in the poll.

HERE'S WHAT THEY MEAN

Here, in case you have been wondering, are the correct explanations as provided by food technologist Debbie Schwartz of the U.S. Department of Agriculture:

Processed-"Almost all food is processedchanged or altered to take it from a raw or natural state to another state. Even slicing

is processing."
Pasteurize—"Heating milk or other liquids to certain temperatures to kill harmful bac-

Homogenize-"To reduce food particles to the same size and distribute them evenly. Raw milk, for example, contains fat glob-ules of different size. These have to be broken down and blended so that you have

a relatively consistent end product."
Fortify—"Adding nutrients to food which

were not originally in them.'

Enrich-"Replacing nutrients lost in proc-

essing.

Smoking-"Originally a method of preservation done by exposure to smoke but now done as much to give it a special flavor as to preserve it. You could say it's a method of preservation and enhancing the flavor.

Refine-"To purify, clarify or distill."

HEAD START WORKS IN DES MOINES AREA

HON. NEAL SMITH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

• Mr. SMITH of Iowa. Mr. Speaker, at time of stringent and necessary fiscal austerity, I think it is encouraging that the Head Start preschool program emerged from the reconciliation process with an increase in its funding levels. For here, if ever, is a program that has proved its worth as a sound investment in our country's future.

In this context, I would like to call to the attention of my colleagues the extraordinary success of the Head Start program in the Des Moines, Iowa, area. Administered by the Drake University Education Department, this program now works with county and city governments and school districts in six Iowa counties-Boone, Marion, Jasper, Story, Polk, and

Warren.

The central objective of Head Start is to bring disadvantaged children into a stimulating learning environment so that they can compete successfully with more fortunate children when they commence school. For a number of years, the Des Moines program has done an outstanding job of meeting this goal. Mr. Speaker, I ask unanimous consent to have printed in the RECORD an editorial entitled: "Head Start Works in Des Moines Area" which appeared in the Des Moines Tribune of July 29, 1981.

It is as follows:

HEAD START WORKS IN DES MOINES AREA Joan Beck says in an accompanying column that Head Start has strayed from

its original purpose. That purpose was enriching the environment for low-income children to develop their learning abilities so they could enter school ready and eager to learn. A look at local Head Start programs indicates that Beck's criticism does not apply to the six-county program administered in Des Moines. The Des Moines program is a heartening example of cooperation among public schools, a private university, parents, community organizations and

Head Start locally is run by Drake University's Education Department, which took it over four years ago and now works with county and city governments and school districts in Boone, Marion, Jasper, Story, Polk,

and Warren counties.

federally financed officials.

The program takes low-income children (10 percent of the pupils must be handicapped) and provides three-hour sessions in classroom four days a week in the year just before the children enter kindergarten.

There was financing last year for 360 pupils; 424 went through the program because of departures and late arrivals. Each child receives a physical examination and help in getting whatever medical care is needed. The program pays for meals, transportation, speech and language services, parent and home services and a one-to-five ratio of adults to children in the classroom: all this for a cost of \$709,000 this year-including \$58,000 that Head Start was allowed to carry over from last year.

Those who run Head Start here stress two things: The core of the program is education, contrary to what Beck says, and the rest is tailored to the needs of the individual

children and parents.

The director of education, a former Head Start parent who has been with the program for 15 years, believes that educational levels have been stepped up since she came into Head Start. Drake has drawn up an education plan based on performance standards to follow national guidelines for achievement. In Des Moines, the program is linked directly into the kindergarten curriculum that follows it.

Parents meet once a month and elect from their ranks a council to help set policy for the six-county area. Parents run their own meetings, set their own agendas and receive help from Head Start officials on bringing in expertise in whatever area they decide they need it, from nutrition to career plan-

The spillover from the program includes home-school workers who work with par-ents—the children's "first teachers" who are indispensable in the Head Start educational program; health-care visits for the children where parents, too, inevitably learn about their own health needs and those of other members of the family, and where preventive health care is stressed; and the sense of community involvement that comes from sharing in such undertakings as fund-raising to enable the children to have special trips or to buy equipment for the centers.

The central purpose of Head Start is

bringing disadvantaged children into a stimulating learning environment so that they can compete successfully with more fortunate children when they get to school. The latest data indicate that this is happening. In a study of a Michigan Head Start program released last year, tracking children through the age of 15, those who had been in the program showed higher scores on reading, mathematics and language achievement than a control group who had not.

They showed fewer anti-social and delin-

quent tendencies. Preliminary data follow-

ing the students through age 19 show that the early learners were more likely to finish high school and get jobs or go to college than those in the control group, and less likely to end up on welfare.

Results like this led President Reagan to include Head Start in his "safety net" programs and to request \$950 million for it for 1982. The popularity of the program brought a bipartisan outcry when it was left out of the Federal budget, some say inadvertently. There seems to be little doubt that legislation reinstating the money will be acted on separately.

But Head Start does not stand alone. Some Head Start teachers are CETA employees, some of the children rely on federally financed nutrition programs, some need Medicaid for health care, and some benefit from federally financed education programs for disadvantaged children once they reach elementary school.

To date, local Head Start officials have brought an extraordinary degree of resourcefulness and cooperation to the aid of low-income children. They have more than earned the active support of the community as they face the new test created by socialprogram cutting now going on in Washing-

PENTAGON THREAT INSULTS CONGRESS

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

Mr. GREEN. Mr. Speaker, the threat by the Defense Department to withhold military aid to Israel if Congress rejects the AWACS sale to Saudi Arabia is insulting to Members of Congress who oppose the AWACS sale. It grossly misconceives the basis of our opposition.

We do not oppose the AWACS sale because Israel opposed it.

We oppose the AWACS sale because it is not in the best interest of the United States.

Surely, after our experience in Iran. the Pentagon ought to understand the risk inherent in giving top secret military equipment to a despotic regime that could crumble as quickly as did Shah-and thus permit the AWACS to fall into unfriendly hands.

Surely, after our experience in Iran, the Pentagon ought to understand the folly of relying on Saudi Arabia to maintain military stability in the Mid-

To threaten our one truly stable ally in the Mideast-Israel-with retribution if Congress exercises its statutory right to veto the AWACS sale is to cut off one's nose to spite one's face. It is an insult to Members of Congress exercising the independent judgment for which their constituents send them to Washington.

MACARTHUR THE DIPLOMAT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES
Monday, September 14, 1981

• Mr. McDONALD. Mr. Speaker, much has been written and discussed about General MacArthur's talents in military strategy and his flair for public relations, but to date very little has been written to evaluate his talents as a diplomat, which were considerable. MacArthur had a great sense of history and knew Asia as few men knew the area. His magnificent handling of Japan in the postwar years was described in a recent article in the Asia Mail by Marie D. Strazar. It also discusses MacArthur's role in the peace settlement with Japan in the August 1981 issue. The article entitled: "Dulles Versus Yoshia" is included in part, for the edification of my colleagues.

One man with a clear strategic view of Japan's importance to the U.S. was General MacArthur. His role in the San Francisco Peace Treaty negotiations was an interesting one

MacArthur held a particular vision of how postwar Japan should be treated, and what its international position should be at the conclusion of the Occupation. Dulles, as chief negotiator of the Japan-U.S. treaty, seems to have given considerable weight to MacArthur and his views on Japan.

MacArthur felt that Washington's vision was fixed too narrowly on Europe; not enough attention was being given to Asia. He was determined to correct the astigmatic vision of the United States towards Asia.

MacArthur deliberately thrust the peace treaty issue into the public spotlight in March 1947 by accepting a standing invitation to lunch with the Foreign Correspondent's Association in Japan. Afterward, when MacArthur offered to answer questions "on the record", for publication, the surprise was so genuine that many a newsman had neither paper nor pencils. Russell Brines, AP bureau chief in Japan at the time, re-members the meeting. "The General's highly articulate and well prepared comments on a peace treaty were . . . astounding, for the Occupation was still too vigorous to permit much speculation or much thought among foreigners in Tokyo over the basis for an eventual settlement. MacArthur's gesture succeeded, however, in implanting the subject so firmly that speculative stories on the peace were not unusual thereafter. I have no doubt that this was his major purpose.

Back in February 1946, Secretary of State James Byrnes had indicated in a press conference in Washington that when work on the treaties with Italy and the Balkan States was completed, work on those with Germany and Japan would commence. But until MacArthur's sally, nothing else specific to a Japanese peace treaty had been formally enunciated.

During the course of his press conference, MacArthur had indicated that the military phase of the Occupation was essentially completed. Japan was demilitarized and her troops demobilized. The political phase of establishing democracy in the country had proceeded about as far as it could under an

Occupation. Economically, Japan needed help to attain stability or she would become even more dependent upon the United States. A peace treaty, MacArthur declared, should be negotiated as soon as possible. Spoken in early 1947, at a time when the designs for Japan were still punitive ones, MacArthur's proposal for the conclusion of an early peace held out new hopes for the Japanese.

Prime Minister Yoshida recognized an important ally in the General. MacArthur could be used to help Japan as well as the

U.S.

Yoshida expressed outright admiration for sophisticated wielders of power like MacArthur. He mentioned to friends that he "found the Supreme Commander remarkably quick in sizing up a situation and acting on it." Yoshida's feelings toward other U.S. Occupational officials—especially liberated idealists—is revealing.

"If I did not get on well with the Government section, or with those whom I have called idealists," he wrote, "I did for some reason or other establish many friendships among men who were professional soldiers . . Though they were military men, many had cultured backgrounds and, what was more to the point, they were people who placed the actual effects of the Occupation administration above theories, so that, once convinced that a proposed measure had practical value, they were prepared to help and encourage us without troubling themselves with what had gone on before."

RECOMMENDATIONS TO IM-PROVE SERVICES FOR THE EL-DERLY

HON, EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, September 14, 1981

 Mr. ROYBAL. Mr. Speaker, the No. 1 issue affecting older Americans today is a retirement income crisis that already affects millions of persons 65 and older and threatens to engulf many more.

However, income alone will not solve all the problems of the elderly. Older Americans also need services. Consequently, it is imperative that our Nation develop a sound and comprehensive social services strategy to complement an effective income strategy.

Services can be cost effective for our Nation, particularly those that enable older persons to continue to live independently in their own homes rather than being placed in a nursing home at a much higher public cost. Most older persons would prefer to remain in their own homes if at all possible. And many can, if appropriate in-home services are available.

Transportation is also a valuable service for the elderly. Many now live under a form of house arrest, cut off from friends and service providers. Without transportation services, large numbers of elderly experience serious problems

In addition, the elderly need legal services. Most persons 65 or older have

had little contact with Government during their younger years, except, of course, to pay their taxes or perform their military obligation.

But upon reaching age 65, Government programs, such as social security, medicaid, and others, become vitally important for them. Unfortunately, these programs are oftentimes expressed in legalistic language which is not readily understandable by senior citizens. This problem is intensified for Hispanics, Asians, and other groups of senior citizens who may have limited English ability.

Legal services can help assure that older Americans receive benefits to which they are entitled. This is only fair because they typically have paid taxes during their working years with the expectation that these benefits, such as social security, will be available when they retire.

The legislative council of the National Retired Teachers Association and the American Association of Retired Persons recently developed recommendations to improve services to the elderly.

I am especially pleased that the council favors continuation of the congregate housing services program, which allows frail and temporarily disabled older persons to remain in their homes and not be forced unnecessarily into a nursing home.

The recommendations of the legislative council deserve the close and careful attention of the Congress.

For these reasons, Mr. Speaker, I submit the service recommendations of the NRTA and AARP Legislative Council to be printed in the RECORD.

NRTA-AARP 1981 FEDERAL AND STATE LEGISLATIVE POLICY RECOMMENDATIONS HOUSING

For the elderly, adequate housing at an affordable price is essential to other aspects of their lives such as maintenance of health and protection against crime. Since the cost of housing consumes nearly one-third of their family budget, government financial assistance that helps them afford adequate housing also helps them afford adequate food, fuel, and medical care.

The government must assure an adequate supply of shelter—with related services—for the elderly and should financially assist low and moderate-income older persons with the cost of housing. Any elderly housing program should be flexible in both the types of housing made available and eligibility standards. In addition, government programs should promote living arrangements, such as group homes, as alternatives to institutionalization and give special attention to the housing needs of the rural elderly.

The Section 202 Housing for the Elderly Program and the Section 8 Rental Subsidy Program represent the government's policy response to the elderly's housing needs. The Section 202 program should remain the primary vehicle for influencing the supply of housing and should be expanded. Section 8 funds, which provide rental subsidies to low-income individuals, should continue to be available in increasing amounts for use with

Section 202 projects. In addition, to stimulate construction, rehabilitation and use of existing housing, the Department of Housing and Urban Development (HUD) should continue efforts to expand the role of State Housing Finance and Development Agencies and Local Housing Authorities.

Sufficient funds should be appropriated to the congregate housing services program under the Housing and Community Development Act. Since this program provides shelter along with nutrition, housekeeping and personal care assistance for the elderly in public and private, non-profit housing projects, it can enable many older persons to remain in a residential setting and out of expensive nursing homes. In implementing this program, coordination of support services needs attention. HUD must cooperate with the Administration on Aging (AOA) in evaluating the impact of home mainte-

nance, nutrition, transportation and home-

maker/home health services programs that

enable the elderly to remain in their homes. In addition, HUD should emphasize demonstration projects dealing with residential security and reduction of crime.

As an adjunct to government efforts to help the elderly remain in their homes, the concept of the reverse annuity mortgage should be thoroughly explored. Under this concept, older homeowners would be able to convert their home equity into current income while still retaining title and possession for life. However, appropriate safeguards must be established to protect older

homeowners against fraudulent loss of both home and equity in such actions.

Seemingly at variance with government efforts to help the elderly remain in their homes is the recently released HUD report recommending that federal grants be withheld from cities which have rent control laws in place. Such controls, opponents charge, discourage investment in new rental properties, encourage conversion of existing properties to condominiums or cooperatives and prevent landlords from generating enough income to maintain rental properties. Although the Associations are sympathetic to some of these arguments, rent controls could not be lifted abruptly without causing severe hardship to and perhaps displacement of low income renters, many of whom are elderly. Therefore, the Associa-tions oppose the HUD recommendation. However, we would support tax incentives to encourage development of moderately priced rental units and subsidies to community agencies to develop plans for developing sufficient rental property to meet local needs. Once these tax incentives and plans produce additional units, rent controls could be removed.

Finally, minimum national standards for disclosure and consumer protection of purchasers, owners and tenants in condominium sales and conversions should be established. These same consumer protections and improved warranty service should be extended to those living in mobile homes and mobile home parks.

LEGAL SERVICES

Legal service programs are particularly important to the elderly because large numbers of them cannot afford to purchase legal representation privately. Legal service programs tend to be responsive to the unique legal problems of the elderly, such as problems involving government program benefits or instances of age discrimination. Since these programs provide needed and valuable assistance, the Associations support the expansion of legal service programs

under the Legal Service Corporation and the Administration on Aging (AOA).

NUTRITION

Balanced, nutritional diets can help older persons avoid chronic ailments and high medical expenses. However, such diets require that the elderly be able to determine the nutritional ingredients of packaged foods, have no severe income limitations, and be informed as to what constitutes proper diet.

Mandatory labeling standards should be developed listing nutritional values, ingredients by percentage and other essential consumer information. Descriptive illustrations on product or shelf should be used to convey such information. The food industry should also be encouraged to offer products which contain minimum or negligible quantities of salt and/or sugar to accomodate those who are on restricted diets. Food retailers should utilize both unit and item pricing.

The AOA Nutrition Program, with its home-delivered meals aspects, provides needy elderly with at least one nutritional meal a day, five days a week. Although outreach is required under the program, it is often not attempted since the program is already operating at the maximum level permitted by funds available. Better information is needed to determine the potential number of eligible participants and thus the maximum program cost. Once that information is obtained, the funding deficiency should be remedied. A study should also be undertaken to determine the extent to which home-delivered meals, particularly in rural areas, can be supplied in frozen form so that they could be delivered less often.

To date, nutrition education has been minimal and rarely directed toward the elderly. Therefore, nutrition education programs should be developed with special focus on low-income and minority elderly groups.

oups.

THE OLDER AMERICANS ACT AND SOCIAL SERVICES

The Older Americans Act (OAA), the only categorical, federal, social service program for the elderly, should be expanded in funding and scope to meet present and future needs. Increased funding is particularly needed if the innovations and improvements made by the 1978 OAA Amendments are to be implemented. It is important that each state designate a single-purpose agency, or a multi-purpose agency (which is required to designate a single organizational unit) and delegate to such agency responsibility for the major aging matters within the state. The community focal point concept emphasized by the 1978 Amendments reflects Congressional dissatisfaction with the lack of service information and service coordination.

The 1978 Amendments added focus on home-delivered meals for shut-ins in the Nutrition Program. Although this is a step forward, it must not result in a de-emphasis of congregate meals. The balance between congregate and home-delivered meals should depend upon the need in each planning and service area as determined by area agencies in consultation with Nutrition for the Elderly Program administrators.

While the federal and state governments must be urged to increase funding of OAA programs, the state and area agencies on aging structure must be relied upon to stimulate and coordinate local resources for the delivery of services. States are required to develop an intra-state formula for distribu-

tion of Title III funds under area plans. Besides taking into account the population age 60 and over, a new formula ought to provide a minimum funding base for each area plan and reflect distribution of older persons with the greatest economic needs. This last requirement would help correlate funding with racial and minority needs.

With respect to social services under Title XX of the Social Security Act, administrative linkages should be strengthened be-tween state plans under OAA and state social services plans under Title XX. Also, older individuals and local programs should participate in the Title XX planning process as well as in the commitment of Title XX funds to carry out the goals of state and area agency plans. Funding and Congressional oversight of the Title XX program should be increased to ensure that services are received by the most needy and that arbitrary "cutoffs" are avoided. The Title XX provision for protective services and information and referral services (which should be available to all persons without regard to income) should be strengthened to ensure that states provide these services

Although many state and local social service programs are supported by revenue sharing funds, the elderly have received less than their fair share of these funds. To correct this, the federal government should require that greater consideration be given to the elderly's needs in distributing revenue sharing funds and that they be given opportunities to be involved in the fund allocation process.

Federal policy should encourage and strengthen the provision of social services by families, volunteers and community groups. Families and unrelated persons who provide care for older persons should be helped financially (see HEALTH POLICY and TAX POLICY for further discussion), educated in methods of caring for dependent members and made eligible for social support services.

New and expanded roles should be created for volunteers and adequate training, supervision and some compensation for expenses should be provided for them. The use of volunteers can be encouraged through Area Agencies on aging, community mental health centers, and ACTION programs, such as the Retired Senior Volunteer Program (RSVP) and the Senior Companion Program (SCP).

Finally, there should be a comprehensive national study of social services most needed by and provided to the elderly. This should include an examination of the different ways of providing services, how services provided by families and informal support networks can be strengthened, and overall financing and manpower needs. Problems of underserved groups should be examined, especially minorities and those in rural areas.

AMERICAN SYSTEM OF FREE ENTERPRISE—NEVADA LEGIS-LATURE

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

 Mr. SANTINI. Mr. Speaker, I take this opportunity to make my colleagues aware of a piece of bipartisan legislation that was passed in the recent session of the Nevada State Legislature. This legislation requires that instruction be given in public high schools in matters concerning the American system of free enterprise.

For the information of this Congress, I would like to highlight the most significant points of this State

hill

First, the economics of the American system of free enterprise must be taught in all the public high schools in

this State

Second, the lessons must: (a) Emphasize the benefits of free enterprise as compared to other economic systems; (b) teach the principles of the profit motive and competition and the way in which investments generate progress and growth in the economy; (c) introduce pupils to the principles of owning and operating a small business; and (d) provide instruction in personal finance, including services available from financial institutions and the methods of obtaining and using those services.

The bill also directs the school districts to perform this economics instruction in cooperation with the people in the community who are engaged in business, and with labor organizations, chambers of commerce and other service organizations to obtain speakers and other assistance in carrying out the requirements of this sec-

tion.

Mr. Speaker, this kind of legislation is needed at the local level in order for our school districts to properly prepare our young people to live in a world that is becoming ever more complex. I congratulate the Nevada Legislature on the insight and dedication to proper education which they have shown with the passing of AB-396 of the 1981 legislative session. I am proud to share information about this new State law with my colleagues in the House of Representative.

DNC CHAIRMAN MANATT DE-NOUNCES REAGAN ECONOMIC PLAN

HON. PHILLIP BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. PHILLIP BURTON. Mr. Speaker, once again Congress is being asked by President Reagan to thoughtlessly slash funding for programs which have been effective and valuable for millions of our citizens. The Reagan economic plan was recently denounced in a rousing speech by Democratic National Committee Chairman Charles Manatt before the convention of the United Brotherhood of Carpenters and Joiners of America. The speech follows:

I am delighted to join you for your historic centennial convention. The craft unions are as old as America. And no union has done more to make our nation strong and just than this great organization of Carpenters and Joiners.

This is also a historic day for you because you have been honored by a visit by the

President of the United States.

Whatever our political differences, we Americans respect and revere that great office, and in time of need we rally behind our President.

But it is precisely because I respect the office of the President and the great promise that it holds for America that I must speak candidly to you today about the policies of this Administration.

You have seen firsthand today why President Reagan is called the "great communicator." My fellow Californian truly knows

how to give a speech.

But my friends in the Carpenters Union, there is an old saying in America. Actions speak louder than words. At this time we need to review not the President's words but the actions of this Administration.

Go down the list of every benefit, protection, and gain that you have fought to win for working people in your proud history, and look what this Administration has done.

Social security benefits, slashed; Davis-Bacon protection, gutted; unemployment insurance, cut; health and safety standards, weakened; food stamps for striking families, eliminated; loans to educate your children, reduced; and federal programs to build houses—programs that mean jobs—cut back, cut out, and crippled beyond repair.

Now we know why they took down Harry Truman's picture from the Cabinet room and put up a picture of Calvin Coolidge in-

stead.

This is the most anti-union, anti-labor Administration in Washington since Calvin Coolidge was President more than 50 years ago.

Actions speak louder than words.

Remember all those beautiful television commercials the Republicans ran last year showing Mr. Reagan outside all of those shut down factories promising jobs, promising growth, promising lower interest rates.

Now the Republicans economic program is enacted and let us look at what it means.

The prime rate hovers near 20 percent and they are talking recession again. One million fewer homes will be built in America this year under the Republicans than were built three years ago. And one out of every six construction workers in this country cannot find a job.

Let us take a vote of this convention: Is that your idea of economic recovery?

The Republicans say they have a new idea called supply-side economics. This is how it works

If you earn \$200,000 a year, your net taxes will be cut over \$4,000 by 1984. If you earn \$15,000 a year, your net taxes will go up more than \$1,000 during that same time.

As the old saying goes, a rose by any other name is still a rose. Trickle-down economics is still old fashioned Republican trickle-down economics.

One year ago in this very city, President Reagan gave the major economic speech of his campaign. And this is what he said:

"The time has come for the American people to reclaim their dream."

Last quarter, the gross national product of our country declined 2 percentage points. Annualized inflation jumped over 15 percent last month. And now they are talking

about \$100 billion federal deficit in 1984 or maybe sooner.

Is that your idea of the American dream?
It sounds like a Republican economic nightmare to me * * * trickle-down economics.

The President will blame anyone but the White House for the economic situation. But his Secretary of the Treasury, Donald Regan, spoke more candidly on "Face the Nation" just a few weeks ago about the interest rates that are killing the housing industry. He said:

"We're not happy with these high interest rates, but it's like bitter medicine. It's one of the side effects of our fight against infla-

tion."

Well, I have news for the Republicans. When you go to a doctor and the medicine he gives you makes you sicker than you were before, you get yourself a new doctor just as quickly as you can. And that is exactly what the American people are going to do to the Republicans on election day.

Part of that American dream the President spoke so eloquently about is the dream of owning a home, and your members have the skills to make that dream come true.

But go down the list of federal housing programs and this Administration, still the bastion of trickle-down economics, has cut them down to the bone.

Section 8-100,000 fewer homes will be

built under the Republicans.

Section 235-mortgage assistance—cut out entirely.

FHA home mortgages—\$3 billion less. The Administration first asked Congress to cut nine.

And over \$2.5 billion in federal backing for new construction—(Ginny Maes)—cut by the Republicans.

Actions speak louder than words, my friends. We don't have home builders in the White House today. We have a Republican wrecking crew.

In that same economic speech one year ago, President Reagan promised the American people, and I quote: "The integrity of the Social Security system will be defended by my Administration and its benefits once again be made meaningful." That promise won the Republican a lot of votes. Now look at their actions rather than their words.

3 million older Americans—100,000 of whom are over 90 years of age—cut off from their \$122 a month minimum benefit by this Administration.

2 million children of American workers disabled on the job—their Social Security benefits cut by 25 percent.

And 1,300,000 young Americans—trying to work their way through colleges and trade schools—all their Social Security benefits cut by 1982.

Action speak louder than words. The Republican Party is a friend of Social Security the way Colonel Sanders was a friend of chickens.

This Administration—and its spokesmen like David Stockman—talk as if Social Security recipients were statistics. But you know they are flesh and blood human beings.

Take one of your members here in Chicago—a carpenter who has worked 40 years on the job helping to build America.

That union brother has paid his taxes; supported his family; and been a law abiding American all his life. But now that that carpenter is getting on in years. He wakes up every morning and his bones ache with arthritis. Or maybe that back injury he suffered years ago is giving him more and more pain. And like a lot of your members, that

carpenter just may not be able to find steady work anymore because of this Administration's policies.

The one thing that carpenter thought he could depend on in this world of uncertainty was receiving that Social Security retirement check that he had contributed toward all those years. Now this Administration and the Republicans want to take that check away. If the program proposed by the Reagan Administration becomes law, that carpenter—and every other American worker who retires before age 65—will lose 40 cents out of every dollar in his Social Security retirement check.

My friends. It is wrong. It is inhumane. And we are not going to let the Republican Party destroy our Social Security system.

That Social Security retirement check is a contract between the government and the people—just as solemn as the contracts you sign and administer every day.

And with all due respect, it strikes me as a little strange that a President who fires 12,000 air traffic controllers because he says they broke their no-strike pledge does not seem very troubled about breaking his pledge to millions of American workers not to cut their Social Security benefits.

I am not going to stand before you and defend every action PATCO has taken or even their decision to strike. But this much I will say.

The President of the United States ought to be a bigger individual than to praise Polish workers for striking against their government and then jail American workers for doing the same thing.

This strike could be settled by negotiations, but this Administration is not interested in talking with organized labor.

Right now, the Department of Housing and Urban Affairs, is acting to foreclose immediately on any federal mortgage held by a striking air controller. It wasn't enough to fire 12,000 workers. Now the Administration wants to throw them out of their homes.

My friends; those are not actions befitting the government of the United States.

Unfortunately, those actions are typical of Republican attacks today on the labor movement.

It is the Republicans who want to bring the Justice Department and FBI into local labor disputes by amending the federal Hobbs Act—but only against the union side.

It is the Republicans who want to forbid unions from using treasury money for any political activity—but give the companies a green light.

And it is the Republicans who want to break your bargaining power with antitrust laws, but look the other way while the largest corporations in America gobble each other up.

Is that your idea of a birthday present on the 100th anniversary of the Carpenters' Union?

President Reagan may have had a union card once, but actions speak louder than words. The radical right Republican Party is no friend of organized labor today.

I do not stand before you as Chairman of my Party claiming Democrats have simple answers to every problem facing America today. But this much I can say. From Social Security to the Voting Rights

From Social Security to the Voting Rights Act, we Democrats and the labor movement have fought side by side for social justice in America and opportunity for all.

No Democratic President would preach the virtue of hard work and then throw one million Americans out of their jobs through savage budget cuts. No Democratic President would drive the federal deficit skyhigh and then try to balance his budget on the backs of those dependent on Social Security.

No Democratic President would make high interest rates and tight money the centerpiece of his economic program and then sit back and do nothing while constuction workers and home builders watched their livelihoods destroyed.

And no Democratic President would go before the American people and proclaim that our government is the cause of every social evil that we face and that the only way to solve our problems is to unleash the forces of selfishness and greed.

We Democrats are proud to be known as the Party of the people. We believe that all Americans deserve a chance to share in the bounty of our nation and all Americans must be a part of solving the problems we face. But that is not the mirror of America you see reflected in this Administration.

This is an Administration that came to Washington in private jets and limousines, and cannot understand why some people need to use public transportation.

This is an Administration whose members strive to outdo one another with lavish private parties, but says America's first priority is to cut food stamps for the poor.

This is an Administration that calls our Vietnam veterans heroes one day and then cuts all their psychological counseling clinics on the next.

On every issue you can name—from the tax cuts to human rights—this is an Administration of privilege and profit—that chooses the haves over the have-nots; the rich over the middle class; and the powerful over the vulnerable.

Are those the values you have fought for all your life in the labor movement? Are Jesse Helms, Strom Thurmond and Orrin Hatch the kind of leaders America needs to solve the problems that we face?

My friends in the labor movement. We must hold fast to the pillars of our beliefs. It is time to take a stand.

Let us join together, labor and the Democratic Party and progressive Americans everywhere. Let us say "no" to trickle-down economics, and no to Social Security cuts. No to the Republican Party's war on labor's rights. And no to the Jesse Helms and Orrin Hatchs of this land.

In every state, local and congressional election, in every Governor's and Mayor's race: let us give the Republicans a chance to enjoy the early retirement that they have so richly earned.

Let us restore to America the kind of government our people need and deserve; a government that respects the labor movement; fights for the working family; and strives to uphold the ideals of social justice and decency that make us proud to be Americans.

Franklin Roosevelt gave us our marching orders in the last words he wrote before he died. He said:

"The only limit on our realization of tomorrow will be our doubts of today. Let us move forward with strong and active faith. LET US SOLVE THE SLOW-PAY PROBLEM

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

 Mr. AuCOIN. Mr. Speaker, with so much attention being paid to bringing financial discipline to the Federal Government, we have overlooked one of the more shocking practices of the Federal bureaucracy, a practice that affects millions of small businesses all across America.

Simply put, the problem is that the Federal Government does not pay its bills on time.

I rise today, Mr. Speaker, to call attention to this problem and urge my colleagues to support a bill, H.R. 2036, that offers a solution to it.

While most businesses pay their bills in 30 days or less, about 39 percent of the Federal Government's bills are paid late, according to the General Accounting Office. While this may seem like a harmless oversight on the part of Federal managers, it is actually a pernicious business practice that robs small business of millions of dollars. Looked at another way, the Federal Government is actually borrowing from small business without permission \$11 billion a year by not paying its bills promptly. Because 90 percent of the everyday products purchased by the Federal Government come from small firms, the largest chunk of this \$11 billion problem lands in the lap of small business.

Small business in my own State of Oregon is not much different from small business elsewhere in the country. But in Oregon the economy has been severely shaken by high-interest rates; our timber and housing based economy is on its last leg. For the State's small businesses that must fight high-interest rates and a general decline in sales, the Federal Government's slow-pay policy means the margin of difference in surviving these hard times. In fiscal year 1980 for example, the Federal Government had a total procurement tab of \$403 million-sizable for a small State, and even greater if you were the owner of a small company trying to get by in hard times

H.R. 2036, of which I am a cosponsor, offers a solution. This bill would require Federal agencies and persons carrying on federally assisted programs to pay interest to business concerns on overdue bills and lease agreement payments, and to take early payment discounts only when payments are made in a timely way.

Some might say that this bill will cost the Federal Government money. But there will be no cost to the Government if its bills are paid in a timely

way. Moreover, it would act as an incentive to encourage agencies to review their procedures so payments can be disbursed efficiently. This can only work to save the Government money.

Mr. Speaker, when our constituents are late in paying taxes or other bills owed to the Federal Government, they must pay interest. It seems only fair that when the Federal Government is overdue in its bills that interest should

also be paid.

I am pleased to see the widespread support for this legislation; more than 20 trade associations endorse this bill. I am also pleased that 93 Members of the House are cosponsoring the bill but I want to encourage those who have not to look carefully at the slow pay problem and to get behind the solution this bill offers.

NATIONAL CONFEDERATION OF AMERICAN ETHNIC GROUPS REQUESTS RESOLUTE FOREIGN POLICY TOWARD THE U.S.S.R.

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Monday, September 14, 1981

• Mr. DORNAN of California. Mr. Speaker, since 1956, the National Confederation of American Ethnic Groups, Inc., has been the voice of uncompromising Americanism and resistance to Marxist-Leninist totalitarianism.

This organization, representing 18 different groups of Americans of European, Asian, and Latin American heritage constitute in 34 national and State organizations, held its national convention on May 31, 1981, which reelected President Edward S. Yambrusic, Esq., Executive Vice President Z. Michael Szaz, Ph. D., and Secretary-Director of Activities Radi Slavoff. It also elected George Georgiev as treasurer and the following vice presidents: Nicholas Grego, M.D., Mrs. Valentyna Kalynyk, Ph. D., Dean Blair Kolasa, Ph. D., J.D., Mrs. Angela Luvara, John Mahar, Ph. D., Mrs. Lilia Piaticia-Rastrigin, Le Phuoc Sang, Ph. D., and Hon. Olive S. Stoker. Chairman of the National Assembly of Representatives remained Joseph C. Swider and the two vice chairmen are Cynthia Maleski, Esq., and Helmut Kister.

The policy statement reflects the views of the 18 ethnic groups and form a cohesive blueprint for consideration of policies vis-a-vis the Soviet Union and its surrogates in Europe, Asia, and Central America. I insert at this time the text of the policy statement which was also sent to Secretary of State Al-

exander Haig.

POLICY STATEMENT

The National Confederation of American Ethnic Groups, Inc., constituted of 34 na-

tional and state organizations representing 18 different groups of Americans of European, Asian and Latin American heritage, congratulates the Reagan Administration on its recent initiatives to confront Soviet expansionism in the Middle East, Asia, Africa and Central America.

The NCAEG considers Soviet aggression, whether direct (Afghanistan), or indirect (Angola, Ethiopia, South Yemen) as the major threat to world peace. The NCAEG asserts that strong economic, political and military countermeasures are necessary to maintain the balance of power and the freedom and territorial integrity of the nations of the free world.

The NCAEG has specific concerns on foreign policy, reflecting the views of its con-

stituent organizations.

First, many of us, or our parents and grandparents, arrived from areas which now form parts of the U.S.S.R., or its East Central European satellites. Thus, we remember the erroneous moves of the Roosevelt Administration offering political and territorial concessions to the Soviet Union for entering the war against Japan and for maintaining the illusion of the Grand Alliance. These concessions profoundly affected the region, allowing Soviet political and military control of East Central Europe in return for empty promises of free elections which were either never held or later aborted by Soviet intervention.

Despite the executive agreement character of the Yalta Agreement, it was invoked by Ambassador Dobrynin on August 27, 1968 while announcing Soviet invasion of Czechoslovakia to President Johnson. Thus, at least the U.S.S.R., considers the agreement still in force. Soviet efforts to secure the Helsinki Accords of August 1, 1975 were also based on Soviet insistence that the territorial changes and the political status quo in Eastern and Central Europe must be fully recognized by the United States and its NATO allies.

We must end exportation of high technology items which could be of direct, or even indirect use, to the military efforts of the Soviet Union and its satellites. Detente produced the Kama river project, undertaken by the Italian Fiat and French Renault works and financed partially by the Ex Im Bank of the United States. It produced the trucks transporting Soviet troops to Afghanistan and to the borders of Poland. Not only should we act unilaterally, but also influence our allies in NATO to enlarge the COCOM list of exports forbidden to the Soviet bloc.

We must also give second thoughts to Ex Im Bank and private financing of trade with the Soviet Union. According to recent press reports, Western governments and banks have extended more than \$80 billion in loans to the U.S.S.R. and its satellites, creating a financial bond that could be rent only at the risk of financial collapse of the West.

Human rights have been a leitfaden in our policy toward both our allies and adversaries. Yet, in doing so, we paid disproportionate attention to deserving religious and dissident groups in the Soviet Union underplaying other religious groups and ethnic nationalities within the Soviet Empire. In the U.S.S.R. more than half of the population is non-Russian and, in addition to the deprivation of their human rights, they enjoy little, if any, cultural rights and no national self-determination.

We would like the Administration to concentrate more on the public denunciation of the grievous human rights violations com-

mitted by the governments of the U.S.S.R., Czechoslovakia, East Germany, Romania and Bulgaria. The persecution of religious groups, including the Catholic and Protestant churches and the takeover and misuse of the Orthodox churches in Romania and Bulgaria should be exposed in detail together with the brutal suppression of workers' dissent in the U.S.S.R. and Romania.

In addition, the U.S. should encourage the awakening national self-determination ambitions of the peoples of the U.S.R. We must condemn forced Russification and the oppression of the non-Russian peoples in European and Asiatic Russia, including the Ukrainian, Byelorussian, Baltic, Cossack and various Caucasian peoples in the European, and the Mongolic and Turkomen peoples in the Asiatic part of the Soviet Union and speak out in favor of the eventual freedom and self-determination of these captive peoples.

In the long run, the only alternative to a major nuclear war with its inconceivable destruction remains the dissolution of the last colonial empire: the Soviet Union. In showing sympathy for the aspirations of these peoples, we would be acting within the guidelines of the U.S. Decolonization Resolution.

It is both our opinion and that of our constituent organizations that the principle of national self-determination, without the reservations contained in the Helsinki Accords, should form the backbone of our foreign policy toward the Soviet bloc. Aligning ourselves with the aspirations of these captive nations we would be acting in line with our finest traditions while helping destabilize the U.S.S.R.

For neither the Soviet Union nor its East Central European satellites are monolithic. The revolts of East Berlin (1953), Poznan (1956), Hungary (1956) and the Prague spring of 1968 in Czechoslovakia were past reminders of the continuance of the flame of freedom and democracy among the satellite peoples. The modest, but significant and concrete, achievements of the Polish workers since August 1980 demonstrate that even overwhelming military power is unable to arrest the struggle for human rights and a better economic existence. We must provide the Polish people with moral support, and economically, we must encourage reforms but also help the Poles with debt rescheduling and other assistance so that they may obtain economic improvements within the present framework of government

In relation to the other satellite nations, we must show our empathy for their political and economic aspirations to decrease their dependence upon the Soviet Union. The details of this policy must be left to the Administration and to exigent circumstances. The long-term aim, i.e., the return of these states with traditions of nation-hood over a millennium to national independence unfettered by Soviet military presence, should never be lost.

We particularly miss coverage of human rights violations in Bulgaria and Yugoslavia. While Yugoslavia is not Soviet-controlled, it shares a Communist government and severe ethnic and economic problems with the Soviet bloc. We should encourage liberalization trends and the recognition of ethnic rights of the constituent nationalities in Yugoslavia to a greater extent.

Besides the Soviet Union and Yugoslavia, there are at least two other nations with significant ethnic problems in East Central Europe. They are Czechoslovakia with its several million Slovaks and some Hungarians, and to Romania with its two and a half million Hungarians and some Germans. In both cases, these ethnic groups are not only subject to political, but also to cultural oppression and are deprived of their self-government and national self-determination rights.

We salute the gallant freedomfighters of Afghanistan and call upon the Reagan Administration to extend any assistance needed and possible to them. We welcome the Administration's statement on Afghanistan. The invasion of Afghanistan was naked aggression adding a new chapter to Soviet aggression since World War II.

The Turkomen and Mongolic nationalities of the Soviet Union must be remembered in our policies. Increased VOA broadcasts in their languages would be an immediate step in developing an integrated policy toward them. We must, in general, upgrade our VOA and RFE/Radio Liberty broadcasts by satellite transmitters and strengthen our broadcasts in every major nationality languages spoken in the Soviet Union.

Several of our constituent organizations came from Vietnamese, Laos and Cambodian refugees. We believe, with President Reagan, that our involvement in Indochina was a noble cause aborted by internal domestic considerations, particularly by the

United States Congress.

The end of our military engagement in Indochina must not mean the loss of our interest in the region. We must play an active role politically, diplomatically and economically to hasten the day of Indochina's liberation from the Communist regime in Hanoi. Special attention must be paid to the non-Communist elements in Cambodia as an alternative to both the genocidal regime of Pol Pot and the Vietnamese-backed puppet regime of Hang Samarin.

Finally, we must focus attention of the burden created by the exodus of the Vietnamese boat people, the Laotian refugees and the Cambodians in Thai camps on the border upon the countries of first asylum and the entire free world. Their presence, increasing every month, should encourage on to follow policies to create political and economic circumstances rendering escape

unnecessary.

The NCAEG has concerns in Central America, too, as we represent free Cuban organizations. Cuba must be the central focus, as it is the Castro regime which spreads subversion to the Caribbean countries. We urge a policy of increased psychological warfare against the Castro regime, including the establishment of Radio Free Cuba, in order to bring hope to the Cuban people. The recent exodus from Muriel demonstrated the lack of support of the people for the Castro regime. Unless we can change the situation within Cuba, we might wind up with newer exoduses severely straining our hospitality, and serving as a safety ventil for the Castro regime.

This is not opposite our policies in El Salvador and Guatemala. Assisting those fighting Communist and other Marxist subversion is in line with the Truman Doctrine and policies pursued ever since, and we congratulate the Secretary of State for his res-

olute stand on these issues.

All in all, we trust that the Reagan Administration, under the able foreign policy leadership of Secretary of State Alexander Haig, will produce indeed a new beginning in international relations. We hope that it will be based on the pursuit of national interests within the framework of the timeless values of our Judeo-Christian heritage

which is ably expressed in the Declaration of Independence and the Constitution: peace with freedom and justice.

The NCAEG will try to contribute its share to the success of these policies and asks the Reagan Administration to consider our specific suggestions in formulating and implementing the foreign policy of the United States.

CONGRESSMAN BOLLING OF MISSOURI WILL BE MISSED

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES
Monday, September 14, 1981

• Mr. SKELTON. Mr. Speaker, the recent news about our colleague from Missouri, Richard Bolling, will end one of the most outstanding congressional careers in the history of our country. At a later date, I will more fully express my thoughts and respect for our retiring colleague, but I do wish, at this time, to insert into the Record an editorial from the Kansas City Times, dated September 2, which is a reprint from the Boston Globe concerning Dick Bolling:

Congress, as its students know, is a slow-moving beat, slouching reluctantly toward resolution. Its "image" today might still be the Claghorn caricature of decades past were it not for the diligence and determination of one of its members, Richard Bolling of Missouri, who announced last week that this, his 17th term in Congress, would be his last

Bolling is 65, one of the youngest congressmen in this century to serve as chairman of the House Rules Committee. Throughout the 1960s and 1970s, he was the most persistent and persuasive critic of the congressional seniority system, calling it "abusive to democratic principle." Long before the post-Watergate infusion of rectitude, he labored to make Congress more democratic and responsible, while others preferred the lethargy of the status quo.

Bolling was blunt, a trait he shared with his fellow Democrat from Kansas City, Harry Truman. He did not suffer fools gladly, as demonstrated during two losing contests for House majority leader, in 1962

and 1976.

His two books on congressional power angered colleagues who enjoyed the mindless, automatic progression of the system. "Those who best profit by this untenable system naturally are the Southern Democrats snugly entrenched in their safe, one-party districts," he wrote. "Not even a garden club would let itself be run this way."

In the 1960s, one of the notable rivalries in the House was between Bolling, a protege of the late Speaker Sam Rayburn, and Thomas P. O'Neill Jr., protege of Speaker John W. McCormack. The two did not agree on approaches to changing congressional rules until the 1970s, when O'Neill successfully sponsored Bolling's proposals to make voting in the House more accountable.

When O'Neill became speaker, he received Bolling's total loyalty and dedication. "No two people in the House know, understand and like each other more," O'Neill said at Bolling's retirement announcement last week. "He is my strong right arm."

As chairman of the Rules Committee last year, Bolling was more effective than others in the House leadership by at least guaranteeing a fair fight against the tide of Reaganomics. The Ways and Means Committee chairman, Dan Rostenkowski, could not persuade members of his committee to support a Democratic compromise. House Majority Leader Jim Wright lost eight of his fellow Texans to the Reagan tide.

Speaker O'Neill will miss him and the country, too, will lose an eloquent and persistent voice of common sense in Congress. Fortunately, Dick Bolling is unlikely to be

inactive or silent for very long.

THE CHINA CARD

HON, GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. SOLOMON. Mr. Speaker, I would like to draw the attention of my esteemed colleagues to some abstracts from "Symposium on ROC-U.S. Relations" by A. James Gregor published in Asian Outlook. Mr. Gregor brought out the fact that the Carter administration's hasty decision to establish formal diplomatic relations Peking were based on two assumptions: First, that the People's Republic of China, given Western technology and military aid, would have the capability of containing Soviet expansion and that this capability would compel the Kremlin to assume a more defensive and détente-oriented foreign policy; and second, that the armed forces of mainland China would not be able to successfully attack the Republic of China or extend Communist Chinese power beyond the confines of its present borders. Mr. Gregor argues that these assumptions are faulty and presents some very solid points in his refutation.

In our determination to contain Soviet imperialism, let us not forget the fact that mainland China is still a Communist country whose political system represents everything that is contrary to the principals upon which our Nation was founded. Therefore, we must be especially prudent, lest we overplay the so-called China card.

At this time, I would like to insert Mr. Gregor's article into the Congressional Record.

Symposium on ROC-U.S. Relations THE REAGAN ADMINISTRATION'S CHINA POLICY OPTIONS

(By A. James Gregor, University of California, Berkeley, Dec. 8, 1980, Taipei, Taiwan, ROC)

At the commencement of a new administration one can only venture upon educated guesses concerning the course of its subsequent foreign policy. In any given situation an indeterminate number of variables influence major foreign policy outcomes. As a case in point, it would have been difficult to anticipate the Nixon Administration's East Asia policy at the commencement of Rich-

ard Nixon's term of office. In retrospect we can begin to sort out, with some plausibility, the impact of domestic influences, economic and strategic concerns, personality variables and institutional factors in shaping the Nixon foreign policy. But when asked, in prospect, what any administration's foreign policy might be, at best we are invariably left with educated guesses.

Given such disclaimers, however, it does seem possible to suggest some of the major constraints and some of the real options open to a new administration. In the case of the Reagan Administration such suggestions are particularly interesting for the citizens of the Republic of China on Taiwan—since they, perhaps more than any others, have reason to hope for some relief as a consequence of a "new China policy."

Ronald Reagan's personal political commitment to, and personal affection for, the Republic of China is common knowledge. But how this might translate into specific foreign policy choices is very difficult to anticipate. In the first place it has already become obvious that the semi-official spokesmen of the new administration have made it plain that the new President will not embark on any radically new policies in East Asia. It seems clear that whatever the new President's views might be concerning American policy vis-a-vis Peking or Taipei. his most trusted advisers have counselled grave circumspection in dealing with mainland China. Many of them are primarily concerned with the strategic and political threat mounted by the Soviet Union—and conceive mainland China as an asset in the global balance of power. The same reasons that moved the Nixon Administration to open the path that ultimately led to "normalization" are operative in the post-Carter global environment. Under almost any foreseeable circumstances the Reagan Administration could not be expected to do anything that would significantly alter the present relations between Washington and

On the other hand, within those relations there is latitude for a considerable shift in emphasis in particulars and a not insignificant change in the character of those relations themselves. For one thing, while the general relations between Washington, Peking and Taipei will be determined by the same general factors that led to the diplomatic recognition of the one and the derecognition of the other, there are two assumptions central to the deliberations that led the Carter Administration to its hasty "normalization" that can no longer be defended.

The two assumptions upon which the Carter Administration's unseemly haste to enter into formal diplomatic relations with Peking were predicated include: (1) that the People's Republic of China, given Western technology and military aid, would have the capability of containing Soviet expansion and that that capability would compel the Kremlin to assume a more defensive and detente-oriented foreign policy; and (2) that the armed forces of mainland China would not be able to successfully attack the Republic of China or extend communist Chinese power beyond the confines of its present borders

That the advisers to the Carter Administration held both assumptions to be true is now reasonably well attested. In February 1979, Justin Galen (a pseudonym for a "highly placed" foreign policy adviser in the Carter Administration) attempted to make a case in support of the first assumption in an issue of the "Armed Forces Journal Interna-

tional." During the Senate Foreign Relations Committee hearings before the markup of the Taiwan Relations Act, Carter Administration spokesmen, both military and civilian alike, attempted to support the second

In retrospect it is difficult to understand why either assumption was conceived credible. But even if both were true, any policy pursued by the Carter Administration would generate dilemmas. If the force levels available to the Mainland regime were sufficiently enhanced to constrain the military of the Soviet Union, it would be hard to believe that Peking would no longer be in a position to undertake a successful military attack on Taiwan or any of its noncommunist neighbors. Every increment in the force capabilities of the military of continental China would generate a correlative threat to the security of every non-communist littoral and insular state in Asia. More ominously, as mainland China became more secure in terms of its military capabilities, it has given every evidence that it would be less and less concerned with American interests or the integrity of its neighbors. Peking has made it manifestly clear that its rela tionship with the United States is tactical at best. For the leadership of Peking the United States remains an "oppressor" destined to be "overthrown" at the first opportunity. In that regard the officials in Peking have been remarkably candid. As long as the mainland regime requires the capital, technological and military assistance of the United States, "friendship" will obtain between Peking and Washington. But once mainland China feels sufficiently secure from any Soviet threat, Peking plans to unite with the "revolutionary forces of the world" to overthrow both "imperialism" and its "client states" in Asia as well.

Any "flow of Western technology" to mainland China that would make it a major military power would ultimately against the best interests of the United States in the Pacific. But more important than that is the fact, now generally acknowledged, that any conceivable "flow of Western technology," could not enhance the force levels of the mainland Chinese military to the point where the integrity of the land boundaries of the People's Republic of China could be assured against determined Soviet attack. Even the officials in eking have acknowledged that continental China will continue to remain exposed to a range of Soviet attacks for the remainder of this century. The dearth of foreign exchange, the constraints of indigenous industry, the lack of requisite skills, all indicate that no effort made by the West could make mainland China secure against Soviet military initiatives or force the Soviet Union to be more conciliatory than it is now disposed to be. Northern and northwestern China will remain grievously exposed to Soviet armor and air attacks for the remainder of the century irrespective of Western assistance, military sales and technology transfers.

The upgrading of communist Chinese military capabilities would have made sense if such an enterprise promised constraint of Soviet power—even at the cost of making Peking a threat to its neighbors. But if mainland China cannot conceivably be shaped into such a power, then any force enhancements would be counterproductive as far as America's general interests are concerned. The Soviet Union would remain as much of a threat as ever and those nations in Asia that now look to the United States

for security would be driven into other arrangements not necessarily compatible with American strategic, economic and political interests.

In effect, the United States and its allies have already received every strategic and military benefit they could expect to receive from the mainland Chinese connection. The PRC has and will continue to tie down about forty Soviet divisions and their support elements along its borders. It is very unlikely that in the foreseeable future relations between the two communist powers will improve sufficiently to allow for massive reductions along their shared borders. Beyond that the United States can expect little more from mainland China. Bilateral trade will probably improve somewhat, and joint ventures may return some profit to American investors, but there will be little that would warrant significant changes in the present relations between the United States and the "People's Republic of China". There is no way in which the PRC could be fashioned into a military power of the first rank in this century.

* * any major military sales and transfer of critical dual purpose technology to the PRC could only serve to increase the threats to the Republic of China and the other non-communist states on mainland China's periphery without improving the United States' strategic position with respect to the Soviet Union. In substance, if the second assumption that subtended the Carter Administration's China policy was ever true, making arms and military technology available to Peking would rapidly degrade its credibility.

In fact, the second assumption-that the armed forces of mainland China could not attack the Republic of China or extend Peking's power beyond its present borderswas never true. At the very time of "normalization" even the Carter Administration's spokesmen admitted that mainland China had the military capability of undertaking armed attacks on its neighbors-particularly the Republic of China on Taiwan. While a combined amphibious invasion of the island was ruled out by virtue of mainland China's limited sea and air-lift capabilities, the possibility of naval invasion of Taiwan was recognized as constituting a real option for Peking in its announced policy of "restoring Taiwan to the arms of the motherland.'

As though calculated to drive the point home, almost immediately after Washington extended official recognition to the regime in Peking, communist Chinese forces invaded the Socialist Republic of Vietnam in an extensive military power beyond the immediate borders of mainland While Washington had no intrinsic interest in specifically protecting the integrity of Vietnam-a Soviet ally in Southeast Asia-it became clear that the PRC did possess the military power and the disposition to destabilize the balance in a region in which the United States had significant general interests. More to the point, the military activity of the PRC in Southeast Asia confirmed the of American strategists that mainland China had the capabilities, should it choose to employ them, to sorely try the defenses of the Republic of China on Taiwan. Should the Western allies upgrade mainland China's military capabilities that enhanced capability could not be directed against the Soviet Union-but could only threaten Peking's non-communist neighbors.

THE ALL-VOLUNTEER FORCE: IT IS NOT WORKING

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. BEARD. Mr. Speaker, in 1973 this Nation ended the draft and instituted the All-Volunteer Force (AVF). After 8 years of the AVF, I believe that the facts show it to be failing. It is not my purpose in this article to advocate any particular alternative to the AVF; it is instead to detail how I believe the AVF is failing and to describe briefly my proposal for a first step toward achieving a consensus on solutions for the AVF's problems.

solutions for the AVF's problems.

After 8 years, the AVF has shown that it can attract neither the quantity nor the quality of personnel needed to defend this country. The skilled, midcareer, noncommissioned officers who form the backbone of any military organization are leaving in droves, and not just because of inadequate pay. The junior enlisted personnel in the front-line combat unitsthe troops who will actually do the fighting-are, to an uncomfortably high degree, comprised of America's poor and poorly educated. We face a situation in which the casualty lists from the first few weeks of the next war will show the majority of the dead and wounded to be poor blacks and Hispanics; in other words, those with the least stake in our society will be paying the highest price to defend it.

QUANTITY PROBLEMS

The AVF is a failure simply in terms of numbers. It has neither attracted enough recruits nor retained enough career NCO's and junior officers to do

its job in a major war.

This failure is worst in the Army. In fiscal year 1979, the Army fell 16,000 men short of its recruiting goals. It met its needs in fiscal year 1980 only by lowering its goals and by further lowering its entrance standards. The Army has reduced its standards so much under the AVF concept that currently more than one out of every three recruits drops out before completing his first term of enlistment. This phenomenon obviously complicates the numbers problem, because not only is the Army falling short of recruiting goals, but many of the soldiers it does recruit wash out in their initial term.

Seven of the Army's 10 U.S.-based divisions were recently rated "not fully ready for combat," or lower, due to manpower shortages, including two divisions which are in the so-called

Rapid Deployment Force.

Even more important than overall manpower shortages, the people who make the Army work—the skilled NCO's—are in critically short supply in the combat units. For example, the

1st Cavalry and 2d Armored Divisions both lack at least a third of their required NCO's. Stateside units are so short of NCO's that the Army was recently forced to transfer several thousand back from Europe. The Army is also some 28 percent short of needed junior officers. It is indeed a "hollow Army," as Army Chief of Staff Gen. E. C. Meyer has so aptly characterized it.

The other branches are not free of critical personnel problems either. The Navy, Marines, and Air Force are all facing mounting shortages of pilots. air traffic controllers, avionics and radar specialists, jet mechanics and flight line personnel. The Navy is nearly 20,000 short of its requirement for petty officers. This lack of skilled supervisory personnel has already delayed, and in some cases canceled, ship deployments. Others have deployed with less than a full complement. At a time when the Reagan administration is planning to increase the fleet by over 100 ships, we cannot even adequately man the ones we now have.

The Navy has a particularly acute problem with regard to the retention of skilled petty officers. Because the Navy regularly sends men to sea for long deployments, a vicious cycle has developed. As the shortages increase, the cycle gets worse. Those personnel with essential skills have to go to sea more and more often as the Navy scrambles people to keep ships at sea. These added tours of duty at sea—with their attendant family separations—vastly increase the likelihood that the midcareer sailor will fail to reenlist after returning home from deployment.

All of the services are suffering serious shortages of doctors. This is perhaps the cruelest and most moral-damaging shortage of all, because a lack of doctors means the serviceman too often finds that his family does not receive adequate and timely medical care. As the shortage of physicians grows, those remaining must shoulder

an ever increasing workload.

All active-duty personnel, their dependents, and retired personnel are entitled to medical care. Yet at many bases around the country, the shortage is so acute that retired personnel are turned away as low priority patients, and dependents must wait for months for nonemergency medical and dental care. Many potential careerists see retired military people being turned away and wonder why they should stick out a full career for an ephemeral reward. I should note at this point that with many doctors in civilian life making incomes well into six figures, I seriously doubt we could afford to raise military pay high enough to attract enough doctors voluntarily. My own study of the situation, which included a number of interviews with military doctors, has convinced me that merely raising pay

would not significantly improve the situation, even assuming massive pay increases would be affordable.

However, damaging these medical shortages are to morale, they should also be considered within the context of the primary mission of maintaining the health of the troops in wartime. If the military medical community does not have adequate manpower to prevent infectious diseases or quickly treat the wounded, combat commanders will soon face precarious shortages of troops. Under the AVF, if we were to mobilize today, we would be short 50,000 combat medical corpsmen, 2,200 general anesthetists, and over 6,000 trained operating-room assistants These shortages would lead to countless deaths and permanent disabilities which would be entirely preventable.

The numerical shortages in the military place a heavy burden on recruiters. The pressure to meet quotas has been so great in recent years that the Congress learned of recruiters resorting to falsifying test scores and education certificates to get unqualified recruits qualified. These pressures can only get worse because the 18- to 21year-old population will drop steadily over the coming decade, shrinking the manpower pool from which new recruits must come. Both current and projected shortfalls in our active-duty Forces are serious enough to call into question the ability of our military to survive heavy losses in the first weeks of a major war. But even if the AVF active-duty units manage to hold their own against the first onslaught, the eventual outcome of the conflict would almost certainly be negative, because the Reserves, which provide the key to stopping prolonged aggression, have become dangerously inadequate after 8 years of the AVF.

The AVF was organized on the total force concept. It was understood by AVF planners that the Active-Duty Forces would not—and could not—be maintained at numerical levels sufficient to fight a prolonged war. In the case of such a war, the Active Forces were to be quickly reinforced by a mobilized reserve. Without that reserve mobilization capacity, the AVF would not be able to fight effectively beyond the initial few weeks.

The state of our Reserve Force today is frankly appalling. The organized reserves—those units which train once a month—are at only 85 percent of required strength. The Army Reserve, for example—which is crucial, because in a European war the Army would have the most casualties in the shortest time, thus needing the most replacements—currently stands at only 72 percent of its requirements. The Individual Ready Reserve (IRR) is comprised of those who, though not members of organized reserve units, are trained and ready to be called up

on short notice. Unfortunately, the IRR is over 700,000 men short of wartime requirements. In 1973, when the AVF began, the IRR had 1.2 million members; today it is down to 220,000. I might add that the IRR had fallen to 150,000 before the Army began counting first-term dropouts who had finished their basic training as part of the IRR.

The Army, under the social engineering mentality of its previous secretary, Clifford Alexander, attempted to alleviate its numerical shortfalls by recruiting more women and putting them into actual combat support roles. No other major military organization in the world-including the Israelishas gone so far as to put women into roles such as truck drivers, field comspecialists, military munications police, and mechanics. These types of duties will inevitably expose women to hostile fire. Alexander even ordered unisex boot camps with physical training standards reduced to the level of the weakest female.

In 1972 women made up only 2 percent of the Army, almost wholly in medical or clerical positions. Today there are nearly 70,000 women in the Army. The 1984 goal is 96,400, which represents 12 percent of the total force. At any given time, 14 percent of the Army's women are pregnant; many more provide the sole support of a child or children. The fact is that one in five women in the Army would be unable to deploy with their unit in an emergency. The extremely damaging effect this phenomenon would have on the Army's ability to mobilize quickly for major action is obvious, not to mention the damage to unit morale that comes from knowing many of your fellow soldiers do not bear the

same burdens.

I want to emphasize that women have always played and will continue to play vital roles in the military, but I simply must oppose this recent practice of putting women into roles for which the great majority are physically incapable. Our Armed Forces should not be used for this type of social experimentation. Some might call this assertion sexist; I call it realis-

QUALITY PROBLEMS

These numerical deficiencies are frightening enough, but even more deleterious to the potential combat effectiveness of the AVF is the quality of the personnel who will be expected to win a war in which they will almost certainly be vastly outnumbered by both men and machines.

In any war with the Warsaw Pact powers, U.S. forces would face tremendous disadvantages in numbers of tanks, planes, artillery tubes, and other conventional weapons. Nonetheless, Defense Department planners hope that these quantitative disadvantages will be offset by superior Ameri-

can weapons technology. But the superior weaponry-assuming it is superior, an assumption increasingly more tenuous-is highly complex and difficult to operate and maintain. To illustrate rather simply the problems our military faces, consider the following: In World War II, the most advanced American fighter plane of the war, the P-51 Mustang, was operated by a college graduate pilot. Today our military is preparing to deploy the XM-1 tank, a weapons system in many ways more complex and difficult to operate and maintain (with its laser and computer technology) than the World War II P-51 fighter. Yet these tanks will be manned not by college graduates but by soldiers who in many cases will not even be high school graduates or able to read on levels any higher than the seventh grade. Technologically superior weaponry is useless without personnel who are able to operate and maintain it. The hard, cold, incontrovertible fact is that the AVF does not have enough capable personnel.

The Armed Forces classify recruits into four categories of intellectual ability based on entrance examination scores. Category IV is the lowest range of scores that allows an individual to enter the military. Those who score in category IV come from the lower 30 percent in intelligence test scores of the overall American population. After 4 years of denials, former Assistant Secretary of Defense for Manpower Robert Pirie revealed last year that the percentage of Category among recruits was far higher than previously admitted by the Defense Department. In 1979, to take a recent example, 46 percent-nearly half-of all Army recruits were category IV's. This frightening figure contrasts with the figure of only 10 percent which was the Defense Department's assertion before Assistant Secretary Pirie's remarkable admission.

The Navy and Marine Corps fared somewhat better, with 18 and 26 percent respectively, but those are still unacceptably high percentages for today's high-technology military. Even the Air Force, the most technology-dependent service of all, had accepted 9 percent from category IV

percent from category IV.

The Army has been forced to rewrite all its training manuals at a seventh-grade level. Even so, a third of its soldiers reportedly still have difficulty comprehending them. Two percent of the Army cannot even speak English well enough to communicate with superiors.

In the draft Army of 1965, about one-fourth were high school dropouts. Today that figure is one-half. As I have previously mentioned, one in three Army recruits are so unsatisfactory that they never manage to complete their first term of enlistment.

During his tenure as Army Secretary, Clifford Alexander contended

that intelligence test scores were "irrelevant" to job performance and even went so far as to order them removed from the soldier's individual records. But the Army has examinations which are directly related to job performance. They are called skills qualifications tests (SQT), and they measure a soldier's ability to do the job to which he will be assigned in the event of war. The Army's own figures show massive failure rates on SQT's. For example, in 1979 only 18 percent of artillery target spotters could pass their SQT's, only 28 percent of ammunition specialists, and only 15 percent of helicopter repairmen. While these are only a sample of test score results, they are representative. Their import is shocking because they show an Army comprised of personnel who simply cannot do the job they will be entrusted to do in a war.

Our European allies are increasingly worried about the ability of our forces to fight. The performance of the AVF in recent NATO training exercises has frightened them. Even American troops selected from the best units have performed execrably in comparison to other NATO units.

For example, in the 1977 NATO tank gunnery competition, U.S. tankers finished dead last, behind the Canadians, Germans, Belgians, British, and Dutch. Two years later the Army attempted to improve its performance by putting together an elite competition team, one not at all representative of its Regular Forces. That elite team lost to the Germans, Belgians, and British. In a recent armored cavalry competition, U.S. forces lost to the Germans, Canadians, and Dutch. These are not just cases of small differences among crack units: German observers who regularly attend these events state that the American performances caused them to doubt the ability of U.S. troops to perform in war against the vastly larger Warsaw Pact forces.

These poor performances are no enigma, however; in fact, they should be perfectly understandable. The Germans, for example, as do all our allies except the British, have a draftee force which makes available the full range of intelligence abilities to its army. Only those who score in the upper 40 percent intelligence rank can be a tank commander or gunner. In contrast, according to the 1978 Army training study, the majority of U.S. tank commanders and gunners are below that upper 40-percent range. Fully one-quarter of the tank gunners could not operate their battlesights. That study showed that tank crew proficiency in the U.S. Army in Europe was 40 percent below combat readiness minimums; the situation with stateside units was even worse.

Thus we can see one significant cause of the exodus of skilled, midcareer NCO's from the services: their complete lack of faith in the troops they must supervise. I go on active duty as a reservist 2 weeks every year, and I have heard NCO's and junior officers often say that they were getting out because the quality of the enlisted personnel assigned to them was so poor that they simply could not get an adequate job done. As more than one put it: "It would be suicide to go into combat depending on some of these guys."

Nor is this observation limited to my personal experience. Numerous indicators bear it out. In an August 1979 survey of 3.000 Army officers, fully 83 percent named the low ability of personnel under their command as a current problem. Even more officers saw a problem with leadership and motivation among junior NCO's. The Defense Department recently released a report showing that those junior enlisted personnel who scored lowest on intelligence tests were the most likely to reenlist, thus eventually moving up into the NCO ranks to replace those now getting out. Therefore, what is oc-curring is that the most untrainable

are becoming trainers themselves. In 1975 70 percent of the Army's junior officers opted to stay in after their first-term obligation was up. Four years later, less than half-44 percent-agreed to stay in. Among regular, career officers the percentage resigning in early and midcareer has doubled during that time period. Even among West Pointers, the number resigning in early and midcareer has increased by 150 percent. If one believes, as I do, that people, vote with their feet, then the decline in retention rates among NCO's and officers is a massive vote of no confidence in the AVF from people in the best position to know, not the generals and DOD bureaucrats, but the sergeants and lieutenants.

The Reagan administration has tentatively adopted a policy of support for the AVF. It has stated that the AVF has never been given a real opportunity to work due to inadequate pay. There is certainly no question that military pay scales were allowed to fall behind inflation in an unconscionable way during the late 1970's. Allowing GI bill educational benefits to expire was also irresponsible.

Increasing pay drastically, particularly in the NCO and junior officer ranks, would no doubt ease the retention problems somewhat. But I strongly question whether this Nation can afford the massive and regular pay increases it would take to attract enough capable recruits to man our Active-Duty Forces adequately. I also doubt that higher active-duty pay will denough to improve the atrocious state of the Reserves. Nor do I believe that

higher pay will substantially alter the socioeconomic makeup of our military and make it more representative of our society as a whole. I must also state that in addition to the huge financial costs of constantly raising pay to fill recruiting quotas, I see serious moral problems with a nation which practices this type of checkbook patriotism. This policy is ultimately based on the premise that our society's middle and upper classes can buy their protection while avoiding service themselves.

MY PROPOSAL

In this article I have sought to explain why I believe the AVF is failing and must be altered. However, I do not know at this point what particular alternative would be best. To simply say we need a draft is only the beginning of the inquiry, not the end, because there are numerous and wildly different forms of conscription. The choices would include, to name a few, a lottery system dispensed with in 1973, a draft for the Reserves only, or some type of universal youth service. I would add though, that I would oppose including women in any new draft, and I would oppose exemptions for special groups, such as college students. Two facts are incontrovertible. First, it is time to act on the AVF's problems. Second, finding a politically feasible solution will require the broadest possible consensus. Thus, I have reintroduced in this Congress, House Concurrent Resolution 28, a proposal to establish on a temporary basis a select committee of both Senators and Representatives which would be tasked with identifying the problems of the AVF and recommending solutions. I favor such a joint select committee because I believe that any decision as politically volatile as reinstating some form of compulsory service must have the support of both parties and both Houses of Congress.

A single subcommittee of either the Senate or House Armed Services Committee which made such a recommendation would simply not command as much respect or attention as the bipartisan, bicameral panel that I am proposing. That is not in any way to denigrate those panels. I am a member of the House Armed Services Committee and have the utmost respect for my fellow members. But both those committees are regarded, rather unfortunately, as the repositories of all the congressional "hawks." Thus, any recommendation from them advocating a new draft would be dismissed by too many segments of society-especially the national media-as just another case of the "hawks screaming 'the Russians are coming.'" That charge could not be leveled at a joint select committee, and the diversity of its cosponsorship-from Tom Downey and George Miller to Bob Dornan and Jack Kemp-bears this out.

CONCLUSION

In this article I have underscored many negative aspects of today's military. Before closing I want to emphasize, however, that there are tens of thousands of hard-working, capable men and women in the military trying their best to give this Nation an adequate defense. Their efforts should not be overlooked. But many of them will be the first to agree with me that the all-volunteer concept has failed. It is time to get on with the business of finding a more effective means of recruiting and retaining enough people of sufficient ability to meet the needs of the Armed Forces of the United States.

NATIONAL BOY SCOUT JAMBOREE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, September 14, 1981

• Mr. DORNAN of California. Mr. Speaker, I would like to bring to the attention of my colleagues the following article written by Brian Rothenberg of El Segundo, Calif., a member of Boy Scout Troop No. 709, who recently participated in the National Boy Scout Jamboree 1981 held this summer in Virginia.

Scouting has always been a rewarding experience for those involved. In reading about the experiences of Brian at this year's jamboree, I can see that it still is. I know you will agree.

[From the El Segundo Herald, Aug. 27, 1981]

NATIONAL BOY SCOUT JAMBOREE, 1981—A SUCCESS

The 1981 National Boy Scout Jamboree was held on July 27th to August 5th, 1981, at Fort A. P. Hill in the State of Virginia.

This is a once in a lifetime experience for a Boy Scout as the Jamboree is held once every four years so that all scouts of all ages can have a chance to participate in this spectacular event.

Forty families signed up to send forty Boy Scouts and leaders from El Segundo, Redondo Beach, Palos Verdes and Torrance. During the six months before the Jamboree, these boys met, camped together, were evaluated by their leaders and formed Troop No. 709 from the Los Angeles Area Council of the Boy Scouts of America.

It cost over one thousand dollars to go to the Jamboree for each Scout. This included round trip air tickets, meals, supplies, tents, tours and lodging in Washington, D.C. and the right to participate in all the activities at the Jamboree.

A "DC-10 load" of Scouts and leaders left LAX at 2:30 a.m., July 23rd. We arrived at Baltimore Airport at 9:00 a.m. and went to the American University. We only had enough time to put our bags in our rooms, pick up our box lunch and board the bus to begin our tour of Washington, D.C. Our tour included the Lincoln Memorial, Iwo Jima Memorial, Arlington National Ceme-

tery and the changing of the guard, Jefferson Memorial, the Space Museum and many other National Buildings. We rode to the top of the Washington Monument but were allowed to walk down the many steps and

bypass the elevator.

Congressman Robert K. Dornan, who represents the 27th Congressional District where our Troop is from, was kind to arrange admission for all forty scouts and leaders to visit the Gallery of the House of Representatives as his guests on the afternoon of the 23rd. We did not sleep very much on the plane so some of us grabbed a few winks while sitting in the gallery. The guards woke us up and explained that there was no sleeping allowed because if the Representatives should see someone sleeping in the Gallery then he or she might feel that what was going on on the floor of the House was boring to those in the Gallery!

On Wednesday, July 27, we made our way to the Jamboree site at Fort A. P. Hill in Virginia. Our gear was waiting for us in the right spot and we set up our tents, our gateway, our kitchen and settled into Camp.

Our Troop Gateway had the Pacific Ocean as a theme and with fish nets, fishing poles, surf boards, etc., our Gateway represented the sports and inhabitants of the Pacific Ocean. My patrol Flag, the Barraccudas, was one of the 10 finalists judged from all the patrol flags at the Jamboree.

We were given our food each day which we had to cook ourselves and the chores of camping were rotated among all the scouts

in each patrol.

On the first night, all 30,000 scouts and leaders walked to the big Arena for the opening ceremonies. A show was presented called "American Heritage." It told how America became free. We were also shown a valuable painting by William H. Wilcox called "One Hundred Years Ago." Mr. Wilcox painted this in 1876. It dropped from sight in 1885 and in a small shop in Vermont in 1980 it was again found.

During the day we were kept busy. A scout could take advantage of one or all activities available: badge trading, swimming, fishing, rifle and shotgun, archery, activity booths, hiking, climbing, rafting, canoeing, knot tying, orienteering, the list goes on and on. Of course this included meeting, talking with and becoming involved with scouts from every part of the United States and some International Countries as well.

Our troop was invited to become involved in a "see and do." We cooked what we thought was the most popular food from our neighborhood—Burritos. Another troop held a skyrocket show. This is only one of the many activities which were held to involve the boys at the Jamboree.

The Jamboree was honored by the presence of King Carl Gustof XVI of Sweden. He was a guest at the Jamboree for 2 days and he mixed with the scouts and asked questions and I hope he had a good time.

We were called upon to use our scouting abilities on at least two occasions. A strong wind and a heavy rain visited us and with tents going down and water flooding our campsites our good training and lots of patience saw us through the storms and through all the mud we still continued to have the adventure of a lifetime.

Although the days were filled with work and learning adventures the nights were the most fun. There were regional campfires, sub-camp campfires and troop campfires. We sang, had skits and had lots of good fun.

On our last day in camp we were busy along with 50 other troops in our area

taking down and packing our camp. All you could hear was the hammering and voices of all of us.

When our gear was packed and loaded on the busses going back to the Airport, we were then ready to walk the two miles to the big arena for the closing ceremonies. The big show was called "America's Future." They had skydivers, parachutes and balloons flying everywhere and even a helicopter landed near the stage. The show included the performance of the Oak Ridge Boys and Mr. Burl Ives sang and played the guitar.

After the closing ceremonies, it took us over two hours to push through the sea of scouts and make our way to the busses waiting to take us to the Airport and our flight home.

Before we loaded on the busses we picked up our breakfast and some of us slept for three hours and then picked up our box lunch, did the final packing, loaded the busses and took off for a four hour bus ride to the Airport.

The above was a brief account of the adventures of Troop 709. The other Los Angeles Area Troops, 710, 711, 712 and 713 along with 654 Troops came as far as Hawaii and China to join in this experience of a lifetime.

My two older brothers each went to a National Jamboree and I listened to their stories about their experiences and wondered if I would ever have the chance to go to a National Jamboree. I Did have the chance, I Did go to a National Jamboree and I will always remember it for the rest of my life.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the Congressional Record on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, September 15, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 16

9:00 a.m.

Foreign Relations

International Economic Policy Subcommittee

To hold hearings on East/West economic relations.

4221 Dirksen Building Select on Intelligence

Closed briefing on intelligence matters. Room S-407, Capitol

9:30 a.m.

Appropriations

Labor, Health and Human Services, and Education Subcommittee

Business meeting, to mark up proposed legislation appropriating funds for fiscal year 1982 for the Departments of Labor, Health and Human Services, and Education.

1114 Dirksen Building

*Veterans' Affairs

Business meeting, to mark up S. 5, S. 7, S. 25, S. 26, S. 48, S. 105, S. 248, S. 417, and S. 742, bills providing educational assistance to members of the Armed Forces, and S. 266 and amendment No. 62 of S. 636 (Veterans' Administration Health Care Amendments), measures implementing procedures and guidelines for the interagency sharing of health resources between the Department of Defense and the Veterans' Administration.

412 Russell Building

10:00 a.m. Budget

To continue hearings on proposed second concurrent resolution revising the congressional budget for the Federal Government for fiscal years 1982, 1983, and 1984.

6202 Dirksen Building

Conferees

Closed, on S. 815, authorizing funds for fiscal year 1982 for military procurement programs of the Department of Defense.

Room H-405, Capitol

Energy and Natural Resources

Business meeting, to consider pending calendar business.

3110 Dirksen Building

10:30 a.m.

Banking, Housing, and Urban Affairs

Business meeting, to mark up S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977, and S. 1230, authorizing the minting of special coins commemorating the 1984 summer Olympic games in Los Angeles, California.

5302 Dirksen Building

2:00 p.m. Budget

To continue hearings on proposed second concurrent resolution revising the congressional budget for the Federal Government for fiscal years 1982, 1983, and 1984.

6202 Dirksen Building

Governmental Affairs

Business meeting, to continue markup of S. 1080, to improve and modify the Federal regulatory process.

3302 Dirksen Building

Special on Aging

To hold hearings on social security reform and retirement income policy. 6226 Dirksen Building 2:30 p.m.

Conferees

Closed, on S. 815, authorizing funds for fiscal year 1982 for military procurement programs of the Department of Defense.

Room S-407, Capitol

SEPTEMBER 17

9:30 a.m.

Armed Services

Manpower and Personnel Subcommittee To hold open and closed hearings on proposed Flag and general officers strength of the Department of Defense.

212 Russell Building

Labor and Human Resources

Aging, Family and Human Services Subcommittee

To hold hearings on primary interven-tion in addressing societal problems. 4232 Dirksen Building

9:45 a.m.

Foreign Relations

To hold hearings on U.S. foreign policy and the current situation in the Persian Gulf.

4221 Dirksen Building

10:00 a.m. Banking, Housing, and Urban Affairs

Business meeting, to continue markup of S. 708, clarifying the intent and modifying certain provisions of the Foreign Corrupt Practices Act of 1977, and S. 1230, authorizing the minting of special coins commemorating the 1984 summer Olympic games in Los Angeles, California.

5302 Dirksen Building

Energy and Natural Resources

Energy and Mineral Resources Subcom-

To hold hearings on S. 1457, S. 651, S. 466, S. 383, and S. 1605, bills providing for the reinstatement and validation of certain U.S. oil and gas leases

3110 Dirksen Building

Judiciary

Constitution Subcommittee

To hold hearings on proposed legislation to establish a Commission to plan and develop a program to commemorate the bicentennial of the U.S. Constitution.

318 Russell Building

2:00 p.m.

Budget

To continue hearings on proposed second concurrent resolution revising the congressional budget for the Federal Government for fiscal years 1982, 1983, and 1984.

6202 Dirksen Building

Conferees

Closed, on S. 815, authorizing funds for fiscal year 1982 for military procurement programs of the Department of

Room S-407, Capitol

Energy and Natural Resources
Energy and Mineral Resources Subcommittee

To hold hearings on S. 1575, proposed Combined Hydrocarbon Leasing Act. 3110 Dirksen Building

Foreign Relations

To hold hearings on the nominations of Nyle C. Brady, of New York, to be an Assistant Administrator of the Agency for International Development, and John A. Bohn, Jr., of California, to be U.S. Director of the Asian Development Bank.

4221 Dirksen Building

Judiciary

Constitution Subcommittee

To hold hearings on proposed legislation to amend the Federal Criminal Code with respect to the circumstances under which a person charged with or convicted of a crime may be released on bail or personal recognizance.

2228 Dirksen Building

3:00 p.m.

Governmental Affairs

To hold hearings on the nomination of Charles A. Bowsher, of Maryland, to be Comptroller General of the United

3302 Dirksen Building

SEPTEMBER 18

9:30 a.m.

*Governmental Affairs

Federal Expenditures, Rules Subcommittee Research, and

To hold hearings on S. 719, requiring the disclosure of Federal agency use of consultants.

3302 Dirksen Building

10:00 a.m.

Foreign Relations

To hold hearings on the nominations of Robert P. Paganelli, of New York, to be Ambassador to the Syrian Arab Republic, David E. Zweifel, of Maryland, to be Ambassador to the Yeman Arab Republic, Michael H. Nelin, of Maryland, to be Ambassador to the Democratic and Popular Republic of Algeria, and other pending nominations.

4221 Dirksen Building

SEPTEMBER 21

9:30 a.m.

Commerce, Science, and Transportation Merchant Marine Subcommittee

To hold hearings on S. 1593 and S. 125, bills revising and clarifying U.S. regulation of international liner shipping in the U.S. foreign trade. 235 Russell Building

10:00 a.m.

Energy and Natural Resources

Energy Research and Development Subcommittee

To hold oversight hearings on the implementation of the photovoltaic program of the Department of Energy

3110 Dirksen Building

Foreign Relations

To hold hearings on the nominations of George S. Vest, of Maryland, to be the Representative to the European Communities, with the rank and status of Ambassador, Jack F. Matlock, Jr., of Florida, to be Ambassador to the Czechoslovak Socialist Republic, John E. Dolibois, of Ohio, to be Ambassador to Luxembourg, and Raymond C. Ewing, of Virginia, to be Ambassador to the Republic of Cyprus.

4221 Dirksen Building

2:00 p.m.

Judiciary

Juvenile Justice Subcommittee

To hold hearings to examine the impact of media on juveniles.

2228 Dirksen Building

SEPTEMBER 22

9:00 a.m.

meeting.

Office of Technology Assessment The Board to hold a general business

Room S-138, Capitol

9:30 a.m.

Commerce, Science, and Transportation Business, Trade and Tourism Subcommit-

To hold hearings on the State Department's plan to implement a visa waiver program for foreigners who are required to apply for American visas. 235 Russell Building

Special on Aging

To hold hearings to explore the scope of criminal activities against the elderly. 6226 Dirksen Building

10:00 a.m.

Environment and Public Works

To resume mark up of an original bill authorizing funds for the municipal wastewater treatment construction grant programs of the Clean Water

4200 Dirksen Building

Governmental Affairs

To hold hearings on S. 1417, establishing a Commission to recommend policies and standards to reduce the risk of criminal assaults against the President, and review the criminal laws relating to the safety of the President.

3302 Dirksen Building

Judiciary

To hold hearings to review the President's proposal to admit refugees to the United States in 1982, and to receive the President's annual report to Congress on U.S. refugee programs. 2228 Dirksen Building

Select on Indian Affairs

To hold hearings on S. 503, providing for the purchase, sale and exchange of lands by the Devils Lake Sioux Tribe of the Devils Lake Sioux Reservation. North Dakota.

5302 Dirksen Building

10:30 a.m.

Governmental Affairs Governmental Efficiency and the District of Columbia Subcommittee
